THERMOGENESIS CORP. ANNOUNCES FIRST QUARTER RESULTS

Revenues Increase 12% and Gross Margin Increases 32% over Prior Year -
Company Makes Key Investments in New Product Development, Clinical Trials
& Compliance with Section 404 of the Sarbanes-Oxley Act of 2002

Rancho Cordova, California (November 9, 2004) - THERMOGENESIS CORP. (Nasdaq: KOOL) today announced results for its first quarter of fiscal 2005. Net revenues for the quarter ended September 30, 2004 increased 12% to a first quarter record of \$2,397,000, compared to \$2,143,000 for the first quarter of fiscal 2004. The gross margin for the first quarter increased 32% to \$780,000 or 33% of net revenues compared to \$589,000 or 27% of net revenues for the first quarter ended September 30, 2003.

The net loss for the quarter ended September 30, 2004, was \$1,879,000 or \$0.04 per basic and diluted common share compared to \$1,239,000 or \$0.03 per basic and diluted common share for the first quarter of fiscal 2003. The additional losses resulted from significantly increased investments in research and development, clinical and scientific affairs and compliance with Section 404 of the Sarbanes-Oxley Act of 2002.

The increased operating expenses were used for the following:

- o Engaged an outside Design and Development Engineering firm (the contract should end by March 2005) to accelerate the development of the DACTM System, a blood separation system which supported the FDA 510(k) filing in October 2004.

Edgar Filing: THERMOGENESIS CORP - Form 8-K

- o Upgraded and expanded our engineering capabilities by the addition of our new Vice President of R&D and increases to our electrical, software and mechanical engineering staff to assure that ongoing product development efforts meet our 3-year Business Plan milestones.
- o Replacing three (3) clinical sites to complete our Phase III CryoSeal(R) FS System clinical trial 150 patient enrollment by March 31, 2005. These sites will be operational by the end of November.
- o Completing the manufacturing transfer to Kawasumi Inc. in order to accomplish a 30-40% cost reduction for the CP-3, a CryoSeal FS processing disposable, beginning in the third quarter of fiscal 2005.
- o Expanded our European Sales staff to direct CryoSeal product sales efforts in Europe and the Middle East.
- o Engaged outside advisors in connection with Sarbanes-Oxley Section 404 compliance.

Kevin Simpson, President and Chief Operating Officer stated, "In spite of record revenues and gross margin for this quarter, this quarterly loss is higher than last year's due to planned investments necessary to accomplish our strategic goal of shifting our revenues from devices to sales of high margin single-use disposables. The market launches of the DAC System and the (Autologous) Thrombin Processing Device (TPD) will mark significant milestones on our path towards that goal in both the Blood Processing and Hospital Wound Care markets."

The DAC System is an innovative product which semi-automates the separation of whole blood into components. The System allows up to six units to be processed simultaneously. Included in the Blood processing set is a patented 25 ml freezing bag compatible for liquid nitrogen storage in the BioArchive(R) System. The Company has submitted an application pending FDA clearance to market the DAC System in the United States. The Company anticipates Beta Site market launch of the DAC in the third quarter of fiscal 2005.

The Thrombin Processing Device (TPD) is a stand-alone disposable which is designed to produce 8.5 ml of autologous thrombin from approximately 11 ml of patient plasma for various applications, including topical hemostasis or release of growth factors from platelets. The Company anticipates market launch of the TPD in Europe in the third quarter of fiscal 2005. The TPD is not available in the United States.

Company Conference Call

Management will host a conference call today, November 9, 2004 at 11:00am PST to review the financial results and other corporate events, followed by a Q&A session. The call can be accessed by dialing: (800) 860-2442 within the U.S. or (412) 858-4600 outside the U.S and giving the conference name "THERMOGENESIS". Participants are asked to call the assigned number approximately 5 minutes before the conference call begins. A replay of the conference call will be available two hours after the call for the following five business days by dialing: (877) 344-7529 within the U.S. or (412) 317-0088 outside the U.S. and entering the following account number: 323 and the following passcode: 353367.

About ThermoGenesis Corp.

After extensive research, ThermoGenesis Corp's newly introduced technology platforms lead the world in their ability to produce biological products from single units of blood. Umbilical cord blood banks are utilizing the Company's BioArchive System as a critical enabling technology for cryogenic archiving of their samples of stem cells for transplant, while our CryoSeal FS System is used to prepare hemostatic and adhesive surgical sealants from patient blood in about an hour. ThermoGenesis Corp. has been a leading supplier of state-of-the-art

Edgar Filing: THERMOGENESIS CORP - Form 8-K

Ultra-Rapid Blood Plasma Freezers and Thawers to hospitals and blood banks since 1992.
