On November 2, 2005, the Centers for Medicare and Medicaid Services ("CMS") released its final rule for reimbursement of medications administered by ESRD facilities for calendar year 2006. Among other things, the rule provided for the following: (1) payment for separately billable drugs and biologicals furnished by ESRD facilities would be based on 106% of average sales price; (2)

a 14.7% drug add-on to the ESRD composite rate; and (3) certain modifications of the geographic and wage index based adjustments of the ESRD composite rate. The final rule will have a small positive impact on our 2006 operating results.

On November 9, 2005, CMS announced a new national monitoring policy for claims for Epogen and Aranesp for ESRD patients treated in renal dialysis facilities. Previously, claims for Epogen reimbursement were subject to focused CMS review when the ESRD patient's hematocrit level reached 37.5 or more. In the new monitoring policy, CMS recognized that there is considerable natural variability in individual patient response to the drug which makes it difficult to maintain a hematocrit within a narrow range. Consequently, CMS will not initiate monitoring of claims until the patient's hematocrit level reaches 39.0 (hemoglobin of 13.0). Under the new monitoring policy, for services furnished on or after April 1, 2006, CMS will expect a 25 percent reduction in the dosage of Epogen or Aranesp administered to ESRD patients whose hematocrit exceeds 39.0 (or hemoglobin exceeds 13.0). If the dosage is not reduced by 25 percent, payment will be made by CMS as if the dosage reduction had occurred. This payment reduction may be appealed under the normal appeal process. In addition, effective April 1, 2006, CMS will limit Epogen and Aranesp reimbursement to a maximum per patient per month aggregate dose of 500,000 IU for Epogen and 1500 mcg for Aranesp. We are in the process of analyzing CMS's new Epogen and Aranesp monitoring policy and any impact it may have on our operating results.
