UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2017

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____
Commission File Number 001-14818

Federated Investors, Inc.
(Exact name of registrant as specified in its charter)

Pennsylvania 25-1111467
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)
Federated Investors Tower 15222-3779
Pittsburgh, Pennsylvania
(Address of principal executive offices) (Zip Code)
(Registrant's telephone number, including area code) 412-288-1900

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No .

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No .

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer
Smaller reporting company Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Edgar Filing: FEDERATED INVESTORS INC /PA/ - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No .

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the last practicable date: As of July 21, 2017, the Registrant had outstanding 9,000 shares of Class A Common Stock and 101,445,914 shares of Class B Common Stock.

Special Note

Regarding

Forward-Looking

Information

Certain statements in this report on Form 10-Q constitute forward-looking statements, which involve known and unknown risks, uncertainties, and other factors that may cause the actual results, levels of activity, performance or achievements of Federated Investors, Inc. and its consolidated subsidiaries (Federated), or industry results, to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. Forward-looking statements are typically identified by words or phrases such as "trend," "potential," "opportunity," "believe," "expect," "anticipate," "current," "intention," "estimate," "position," "projection," "assume," "continue," "remain," "maintain," "sustain," "seek," "achieve," and similar expressions, or future or conditional verbs such as "will," "would," "should," "could," "may" and similar expressions. Among other forward-looking statements, such statements include certain statements relating to: asset flows, levels and mix; business mix; sources and levels of revenues, expenses, gains, losses, income and earnings; obligations to make additional contingent or other payments pursuant to employment or incentive arrangements; business and market expansion opportunities; debt, future cash needs and cash flows; uses of treasury stock; legal proceedings; the timing and impact of continuing regulatory oversight, increased or modified laws, regulations and rules, including potential, proposed and final rules, or possible deregulation, by U.S. and foreign regulators and other authorities; the components and level of, and prospect for distribution-related expenses; classification and consolidation of investments; the ability to raise additional capital; management's assessments, beliefs, expectations, assumptions, projections or estimates, including regarding fee rates, the level and impact of fee waivers and reimbursements or assumptions of expenses (Fee Waivers), the effect, and degree of impact, of changes in customer relationships, the level, timing, degree and impact of changes in interest rates, yields or asset levels or mix, legal proceedings, the timing, impact, effects and other consequences of potential, proposed and final laws, regulations and other rules and possible deregulation, borrowing, taxes, product and strategy demand, investor preferences, performance, product development and restructuring options and initiatives, including the plans for and timing of such options and initiatives, compliance, and related legal, compliance and other professional services expenses, interest payments or expenses, dedication of resources, accounting policies, indebtedness and certain investments, and liquidity; future

principal uses of cash; performance indicators; the adoption and impact of accounting policies, new accounting pronouncements and accounting treatment determinations; interest rate, concentration, market and other risks; guarantee and indemnification obligations; the impact of the special dividend on earnings per share and projected liquid assets; and various items set forth under Item 1A - Risk Factors included in Federated's Annual Report on Form 10-K for the year ended December 31, 2016. Among other risks and uncertainties, market conditions may change significantly resulting in changes to Federated's asset flows, asset levels, asset mix and business mix, which may cause a decline in revenues and net income, result in impairments and increase the amount of Fee Waivers incurred by Federated. The obligation to make contingent payments is based on net revenue levels and will be affected by the achievement of such levels, and the obligation to make additional payments pursuant to employment or incentive arrangements is based on satisfaction of certain conditions set forth in those arrangements. Future cash needs, cash flows and future uses of cash will be impacted by a variety of factors, including the number and size of any acquisitions, Federated's success in developing, structuring and distributing its products and strategies, potential changes in assets under management and/or changes in the terms of distribution and shareholder services contracts with intermediaries who offer Federated's products to customers, and potential increased legal, compliance and other professional services expenses stemming from additional or modified regulation or the dedication of such resources to other initiatives. Federated's risks and uncertainties also include liquidity and credit risks in Federated's money market funds and revenue risk, which will be affected by yield levels in money market fund products, changes in fair values of assets under management, investor preferences and confidence, and the ability of Federated to collect fees in connection with the management of such products. Many of these factors may be more likely to occur as a result of continued scrutiny of the mutual fund industry by domestic or foreign regulators, and any disruption in global financial markets. As a result, no assurance can be given as to future results, levels of activity, performance or achievements, and neither Federated nor any other person assumes responsibility for the accuracy and completeness of such statements in the future. For more information on these items and additional risks that may impact the forward-looking statements, see Item 1A - Risk Factors included in Federated's Annual Report on Form 10-K for the year ended December 31, 2016.

Notes to the
Consolidated
Financial
Statements
(unaudited)

(1) Basis of Presentation

The interim Consolidated Financial Statements of Federated Investors, Inc. and its consolidated subsidiaries (collectively, Federated) included herein have been prepared in accordance with United States (U.S.) generally accepted accounting principles (GAAP). In the opinion of management, the financial statements reflect all adjustments that are of a normal recurring nature and necessary for a fair presentation of the results for the interim periods presented.

In preparing the financial statements, management is required to make estimates and assumptions that affect the amounts reported in the Consolidated Financial Statements and accompanying notes. Actual results may differ from those estimates, and such differences may be material to the Consolidated Financial Statements.

These financial statements should be read in conjunction with Federated's Annual Report on Form 10-K for the year ended December 31, 2016. Certain items previously reported have been reclassified to conform to the current period's presentation.

(2) Significant Accounting Policies

For a listing of Federated's significant accounting policies, please refer to Federated's Annual Report on Form 10-K for the year ended December 31, 2016.

(3) Recent Accounting Pronouncements

(a) Recently Adopted Accounting Guidance

Deferred Taxes

On January 1, 2017, Federated adopted Accounting Standards Update (ASU) 2015-17, Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes. This update requires that deferred tax liabilities and assets be classified as noncurrent on the balance sheet. Management elected the prospective transition method, which did not require the restatement of prior years, and the adoption did not have a material impact on Federated's Consolidated Financial Statements.

(b) Recently Issued Accounting Guidance Not Yet Adopted

Revenue Recognition

On May 28, 2014, the Financial Accounting Standards Board (FASB) issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606), which supersedes virtually all existing revenue recognition guidance under GAAP. The update's core principle is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. During the third quarter of 2015, the FASB issued ASU 2015-14, which defers the effective date of the standard by one year. As a result of the deferral, the update is effective for Federated on January 1, 2018. While early adoption is permitted, Federated does not plan to early adopt in 2017. During 2016, the FASB issued

ASU 2016-08, which clarifies principal versus agent considerations, ASU 2016-10, which clarifies identifying performance obligations and the licensing implementation guidance, ASU 2016-12, which addresses implementation issues and provides additional practical expedients and ASU 2016-20, which provides technical corrections to narrow aspects of the guidance (collectively, with ASU 2014-09, Topic 606). Topic 606 allows for the use of either the retrospective or modified retrospective adoption method.

Management has substantially completed scoping activities, which include identifying the customer and evaluating revenue contracts, as well as identifying Federated's performance obligations and material revenue streams. For revenue streams evaluated to date, no changes have been identified to the timing of revenue recognition. Management continues to evaluate whether certain costs should be capitalized or expensed based on the criteria for costs to obtain or fulfill a contract, and the new disclosure requirements. Management continues to evaluate the available transition methods and the potential impact of adoption on Federated's Consolidated Financial Statements.

Financial Instruments

On January 5, 2016, the FASB issued ASU 2016-01, Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities. The ASU significantly revises an entity's accounting related to (1) the classification and measurement of investments in equity securities, including investments in mutual funds and (2) the presentation of certain fair value changes for financial liabilities. The ASU also amends certain disclosure requirements

Table of Contents

Notes to the
Consolidated
Financial
Statements
(continued)
(unaudited)

associated with the fair value of financial instruments. The update is effective for Federated on January 1, 2018, and, except for certain provisions, does not permit early adoption. An entity should apply the amendments, with certain exceptions, by means of a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption. The amendments pertaining to financial liabilities are currently not expected to have a material impact on Federated's Consolidated Financial Statements. Management continues to evaluate the amendments pertaining to equity securities and their potential impact of adoption on Federated's Consolidated Financial Statements.

Leases

On February 25, 2016, the FASB issued ASU 2016-02, Leases (Topic 842). The core principle of Topic 842 is that a lessee should recognize the assets and liabilities that arise from leases on the balance sheet, but retains a distinction between finance and operating leases. The update is effective for Federated on January 1, 2019, with early adoption permitted. The update requires the modified retrospective adoption approach. Management is currently evaluating the potential impact of adoption on Federated's Consolidated Financial Statements.

Clarifying the Definition of a Business

On January 5, 2017, the FASB issued ASU 2017-01, Business Combinations (Topic 805): Clarifying the Definition of a Business. The amendments in this update require that when substantially all of the fair value of the gross assets acquired (or disposed of) is concentrated in a single identifiable asset (or a group of similar identifiable assets), the assets are not considered to be a business. To be considered a business, an acquisition or disposal must include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create outputs. The amendments also narrow the definition of the term "outputs" to be consistent with Topic 606. The ASU is effective for Federated on January 1, 2018, with early adoption permitted in specific circumstances, and is required to be applied prospectively. Management is currently evaluating the potential impact of adoption on Federated's Consolidated Financial Statements.

(4) Concentration Risk

(a) Revenue Concentration by Asset Class

The following table summarizes the percentage of total revenue earned from Federated's asset classes for the periods presented:

	Six Months Ended June 30, 2017 2016			
Money market assets	41	%	47	%
Equity assets	42	%	37	%
Fixed-income assets	17	%	16	%

The change in the relative proportion of Federated's revenue attributable to money market assets for the first six months of 2017 as compared to the same period in 2016 was primarily the result of lower average money market assets and a decrease related to a change in a customer relationship. This was partially offset by a decrease in voluntary waivers (either through fee waivers or reimbursements or assumptions of expenses) in order for certain money market funds to maintain positive or zero net yields (Voluntary Yield-related Fee Waivers).

The change in the relative proportion of Federated's revenue attributable to equity assets for the first six months of 2017 as compared to the same period in 2016 was primarily the result of higher average equity assets due to market appreciation, partially offset by net redemptions.

Current Regulatory Environment

Federated and its investment management business are subject to extensive regulation in the U.S. and abroad. Federated and its products, both sponsored investment companies and other funds (Federated Funds) and strategies, are subject to: federal securities laws, principally the Securities Act of 1933, the Securities Exchange Act of 1934 (1934 Act), the Investment Company Act of 1940 (1940 Act) and the Investment Advisers Act of 1940; state laws regarding securities fraud and registration; and other rules and regulations, promulgated by various regulatory authorities, self-regulatory organizations or exchanges, as well as foreign laws, regulations or other rules promulgated by foreign regulatory or other authorities.

Notes to the
Consolidated
Financial
Statements
(continued)
(unaudited)

See the Business Developments - Current Regulatory Environment section of Management's Discussion and Analysis for additional information about the current regulatory environment.

Low Short-Term Interest Rates

After initiating a short-term interest rate increase of 0.25% in late 2015 and another increase of 0.25% in late 2016, the Federal Open Market Committee of the Federal Reserve Board (FOMC) raised the federal funds target rate by 0.25% twice in the first six months of 2017 to 1.00%-1.25%. The federal funds target rate, which drives short-term interest rates, had been close to zero for nearly seven years prior to the December 2015 increase. The long-term low interest-rate environment resulted in the gross yield earned by certain money market funds not being sufficient to cover all of the fund's operating expenses. As a result, since the fourth quarter of 2008, Federated has experienced Voluntary Yield-related Fee Waivers. These waivers have been partially offset by related reductions in distribution expense and net income attributable to noncontrolling interests as a result of Federated's mutual understanding and agreement with third-party intermediaries to share the impact of the Voluntary Yield-related Fee Waivers.

These Voluntary Yield-related Fee Waivers are calculated as a percentage of assets under management (AUM or managed assets) in certain money market funds and thus will vary depending upon the asset levels and mix in such funds. In addition, the level of waivers are dependent on several other factors including, but not limited to, yields on instruments available for purchase by, and changes in expenses of, the money market funds. As an isolated variable, an increase in yields on instruments held by the money market funds will cause the pre-tax impact of waivers to decrease. Conversely, as an isolated variable, an increase in expenses of the money market funds would cause the pre-tax impact of waivers to increase.

With regard to asset mix, changes in the relative amount of money market fund assets in prime and government money market funds (or between such funds and other money market funds or other products) as well as the mix among certain share classes that vary in pricing structure will impact the level of waivers. Generally, prime money market funds waive less than government money market funds as a result of higher gross yields on the underlying investments. As such, as an isolated variable, an increase in the relative proportion of average managed assets invested in prime money market funds as compared to total average money market fund assets should typically result in lower Voluntary Yield-related Fee Waivers. The opposite would also be true.

The impact of Voluntary Yield-related Fee Waivers on various components of Federated's Consolidated Statements of Income was as follows for the periods presented:

	Three Months		Six Months	
	Ended		Ended	
	June 30,		June 30,	
(in millions)	2017	2016	2017	2016
Revenue	\$(0.1)	\$(21.3)	\$(4.4)	\$(58.8)
Less: Reduction in Distribution expense	0.1	16.5	3.6	44.4
Operating income	0.0	(4.8)	(0.8)	(14.4)
Less: Increase in Noncontrolling interests	0.0	(0.2)	0.0	0.0
Pre-tax impact	\$0.0	\$(5.0)	\$(0.8)	\$(14.4)

The negative pre-tax impact of Voluntary Yield-related Fee Waivers decreased for the six-month period ended June 30, 2017 as compared to the same period in 2016 due primarily to higher yields on instruments held by the money market funds. As previously mentioned, the FOMC recently increased the federal funds target rate range by 25 basis points in December 2016, and in March and June 2017. These rate increases have nearly eliminated the pre-tax impact of the Voluntary Yield-related Fee Waivers.

A listing of Federated's risk factors is included in Federated's Annual Report on Form 10-K for the year ended December 31, 2016 under Item 1A - Risk Factors.

(b) Revenue Concentration by Investment Strategy

Approximately 18% of Federated's total revenue for both the three- and six-month periods ended June 30, 2017, and 14% and 13% for the three- and six-month periods June 30, 2016, respectively, was derived from services provided to a specific domestic strategy, the Federated Strategic Value Dividend strategy, which includes Federated Funds and Separate Accounts

Table of Contents

Notes to the
Consolidated
Financial
Statements
(continued)
(unaudited)

(which include separately managed accounts, institutional accounts, sub-advised funds and other managed products). A significant and prolonged decline in the AUM of this strategy could have a material adverse effect on Federated's future revenues and, to a lesser extent, net income, due to a related reduction in distribution expenses associated with these funds.

(c) Revenue Concentration by Customer

Approximately 17% and 16% of Federated's total revenue for the three- and six-month periods ended June 30, 2017, respectively, and 15% for both the three- and six-month periods ended June 30, 2016, was derived from services provided to one intermediary customer, The Bank of New York Mellon Corporation, including its Pershing subsidiary. Significant negative changes in Federated's relationship with this customer could have a material adverse effect on Federated's future revenues and, to a lesser extent, net income due to a related reduction in distribution expenses associated with this intermediary.

(5) Consolidation

The Consolidated Financial Statements include the accounts of Federated and Federated Funds and other entities in which Federated holds a controlling financial interest. Federated is involved with various entities in the normal course of business that may be deemed to be voting rights entities (VREs) or variable interest entities (VIEs). From time to time, Federated invests in Federated Funds for general corporate investment purposes or, in the case of newly launched products, in order to provide investable cash to establish a performance history. Federated's investment in these Federated Funds represents its maximum exposure to loss. The assets of each consolidated Federated Fund are restricted for use by the respective Federated Fund. Generally, neither creditors of, nor equity investors in, the Federated Funds have any recourse to Federated's general credit. Given that the entities follow investment company accounting, which prescribes fair-value accounting, a deconsolidation generally does not result in gains or losses for Federated. Receivables from all Federated Funds for advisory and other services totaled \$25.4 million and \$27.1 million at June 30, 2017 and December 31, 2016, respectively.

In the ordinary course of business, Federated may implement Fee Waivers for various Federated Funds for competitive, regulatory or contractual reasons. For the three and six months ended June 30, 2017, Fee Waivers totaled \$84.8 million and \$175.3 million, respectively, of which \$53.8 million and \$113.6 million, respectively, related to money market funds which meet the scope exception of the consolidation guidance. For the three and six months ended June 30, 2016, Fee Waivers totaled \$112.2 million and \$242.1 million, respectively, of which \$80.9 million and \$179.7 million, respectively, related to money market funds which meet the scope exception of the consolidation guidance. Like other sponsors of investment companies, Federated in the ordinary course of business may make capital contributions to certain money market Federated Funds in connection with the reorganization of such funds into certain affiliated money market Federated Funds or in connection with the liquidation of a fund. In these instances, such capital contributions typically are intended to either cover realized losses or other permanent impairments to a fund's net asset value (NAV) or increase the market-based NAV per share of the investment company's portfolio that is being reorganized to equal the market-based NAV per share of the acquiring fund or to bear a portion of expenses relating to a fund liquidation. There were no contributions for the three and six months ended June 30, 2017, and no material contributions for the three and six months ended June 30, 2016. Under current

money fund regulations and Securities and Exchange Commission (SEC) guidance, Federated is required to report these types of capital contributions to the SEC as financial support to the investment company that is being reorganized or liquidated.

In accordance with Federated's consolidation accounting policy, Federated first determines whether the entity being evaluated is a VRE or a VIE. Once this determination is made, Federated proceeds with its evaluation of whether to consolidate the entity. The disclosures below represent the results of such evaluations as of June 30, 2017 and December 31, 2016.

(a) Consolidated Voting Rights Entities

Most of the Federated Funds meet the definition of a VRE. Federated consolidates certain VREs when it is deemed to have control. As of June 30, 2017 and December 31, 2016, consolidated VREs included on Federated's Consolidated Balance Sheets included \$1.4 million and \$14.9 million, respectively, in Investments—consolidated investment companies and \$0.3 million and \$3.1 million, respectively, in Redeemable noncontrolling interest in subsidiaries. The decrease in these line items primarily relates to the liquidation of three Federated Fund VREs.

Table of Contents

Notes to the
Consolidated
Financial
Statements
(continued)
(unaudited)

(b) Consolidated Variable Interest Entities

As of June 30, 2017 and December 31, 2016, Federated was deemed to be the primary beneficiary of, and therefore consolidated, certain Federated Funds as a result of its controlling financial interest. The following table presents the balances related to the consolidated Federated Fund VIEs that were included on the Consolidated Balance Sheets as well as Federated's net interest in the consolidated Federated Fund VIEs for each period presented:

(in millions)	June 30, December 31,	
	2017	2016
Cash and cash equivalents	\$ 0.1	\$ 0.0
Investments—consolidated investment companies	44.0	43.2
Receivables	1.5	0.7
Less: Liabilities	0.5	0.7
Less: Redeemable noncontrolling interest in subsidiaries	30.4	28.3
Federated's net interest in Federated Fund VIEs	\$ 14.7	\$ 14.9

Federated's net interest in the consolidated Federated Fund VIEs of \$14.7 million and \$14.9 million at June 30, 2017 and December 31, 2016, respectively, represents the value of Federated's economic ownership interest in these Federated Funds. The liabilities of the consolidated Federated Fund VIEs primarily represent operating liabilities of the entities.

In addition to the VIEs in the table above, at December 31, 2016, Federated held a majority interest (50.5%) and acted as the general partner in Passport Research Ltd. (Passport), a limited partnership. Edward D. Jones & Co., L.P. was the limited partner with a 49.5% interest. The partnership was an investment advisor to one sponsored fund as of December 31, 2016 and was deemed to be a VIE in accordance with the consolidation guidance. Federated transferred its partnership interest on January 27, 2017 and is no longer the primary beneficiary of Passport. Accordingly, Federated deconsolidated \$4.8 million from Cash and cash equivalents, \$2.6 million from Receivables, \$5.3 million from liabilities (primarily representing operating liabilities) and \$1.0 million from Nonredeemable noncontrolling interest in subsidiary on the Consolidated Balance Sheets as of the date of deconsolidation. Federated also recorded a receivable of \$1.1 million for the undistributed earnings of the partnership through the date of deconsolidation, which was collected during the second quarter of 2017. There was no impact to the Consolidated Statements of Income as a result of this deconsolidation.

Other than the deconsolidation mentioned above, Federated did not newly consolidate or deconsolidate any VIEs during the six months ended June 30, 2017.

(c) Non-Consolidated Variable Interest Entities

Federated's involvement with certain Federated Funds that are deemed to be VIEs includes serving as the investment manager, or at times, holding a minority interest or both. Federated's variable interest is not deemed to absorb losses or receive benefits that could potentially be significant to the VIE. Therefore, Federated is not the primary beneficiary of these VIEs and has not consolidated these entities.

At June 30, 2017 and December 31, 2016, Federated's investment and maximum risk of loss related to non-consolidated VIEs was entirely related to Federated Funds and totaled \$2.1 million and \$2.3 million, respectively, and was recorded in Investments—affiliates on the Consolidated Balance Sheets. AUM for these non-consolidated Federated Funds totaled \$67.9 million and \$76.3 million at June 30, 2017 and December 31, 2016, respectively.

(6) Investments

Investments on the Consolidated Balance Sheets as of June 30, 2017 and December 31, 2016 included available-for-sale and trading securities. At June 30, 2017 and December 31, 2016, Federated held investments totaling \$117.0 million and \$130.8 million, respectively, in fluctuating-value Federated Funds that were classified as available-for-sale securities and were included in Investments—affiliates on the Consolidated Balance Sheets.

Table of Contents

Notes to the
Consolidated
Financial
Statements
(continued)
(unaudited)

Available-for-sale securities were as follows:

	June 30, 2017				December 31, 2016			
	Cost	Gross Unrealized Gains	(Losses)	Estimated Fair Value	Cost	Gross Unrealized Gains	(Losses)	Estimated Fair Value
(in thousands)								
Equity funds	\$15,421	\$2,313	\$(26)	\$17,708	\$23,883	\$2,112	\$(266)	\$25,729
Fixed-income funds	99,820	105	(621)	99,304	105,514	92	(550)	105,056
Total available-for-sale securities	\$115,241	\$2,418	\$(647)	\$117,012	\$129,397	\$2,204	\$(816)	\$130,785

The decrease in the available-for-sale securities as of June 30, 2017 as compared to December 31, 2016 primarily related to redemptions of available-for-sale securities during 2017.

Federated's trading securities totaled \$50.6 million and \$65.5 million at June 30, 2017 and December 31, 2016, respectively. Federated consolidates certain Federated Funds into its Consolidated Financial Statements as a result of Federated's controlling financial interest in the Federated Fund (see Note (5)). All investments held by these Federated Funds were included in Investments—consolidated investment companies on Federated's Consolidated Balance Sheets. Investments—other on the Consolidated Balance Sheets represented other trading investments held in Separate Accounts.

Federated's trading securities as of June 30, 2017 and December 31, 2016, were primarily composed of domestic debt securities (\$46.2 million and \$45.5 million, respectively), stocks of large U.S. and international companies (\$3.2 million and \$7.2 million, respectively) and investments in Federated Funds (\$0.6 million and \$8.9 million, respectively).

The following table presents gains and losses recognized in Gain (loss) on securities, net on the Consolidated Statements of Income in connection with Federated's investments as well as economic derivatives held by certain consolidated Federated Funds:

	Three Months Ended		Six Months Ended	
	June 30, 2017	2016	June 30, 2017	2016
(in thousands)				
Net unrealized gains (losses)				
Trading securities	\$(225)	\$1,581	\$375	\$3,639
Derivatives ¹	625	(410)	992	(303)
Realized gains ²

Derivatives ¹	(22)	(266)	(318)	(647)

Gain (loss) on securities, net⁴ \$2,234 \$(569) \$4,796 \$522

1 Amounts related to the settlement of economic derivatives held by certain consolidated Federated Funds.

2 Realized gains and losses are computed on a specific-identification basis.

Proceeds from redemptions of available-for-sale securities were \$4.9 million and \$17.3 million for the three and six months ended June 30, 2017, respectively. These amounts exclude a redemption of \$1.5 million recorded as a receivable during the second quarter that was not settled until after June 30, 2017. Proceeds from redemptions of available-for-sale securities were \$0.1 million and \$0.2 million for the three and six months ended June 30, 2016, respectively.

Amounts related to consolidated entities, primarily Federated Funds, totaled \$1.3 million and \$2.6 million for the three and six months ended June 30, 2017, respectively and \$0.9 million and \$1.9 million for the three and six months ended June 30, 2016, respectively.

(7) Fair Value Measurements

Fair value is the price that would be received to sell an asset or the price that would be paid to transfer a liability as of the measurement date. A fair-value reporting hierarchy exists for disclosure of fair value measurements based on the observability of the inputs to the valuation of financial assets and liabilities. The levels are:

Level 1 – Quoted prices for identical instruments in active markets. Level 1 assets may include equity and debt securities that are traded in an active exchange market, including shares of mutual funds.

Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets. Level 2 assets and liabilities may include debt and equity securities, purchased loans and over-the-counter derivative contracts whose fair value is determined using a pricing model without significant unobservable market data inputs.

Level 3 – Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable in active markets.

NAV Practical Expedient – Investments that calculate NAV per share (or its equivalent) as a practical expedient. These investments have been excluded from the fair value hierarchy.

(a) Fair Value Measurements on a Recurring Basis

The following table presents fair value measurements for classes of Federated's financial assets and liabilities measured at fair value on a recurring basis:

(in thousands)	Level 1	Level 2	Level 3	NAV Practical Expedient	Total
June 30, 2017					
Financial Assets					
Cash and cash equivalents	\$84,866	\$0	\$0	\$ 30,302	\$115,168
Available-for-sale equity securities	93,752	0	0	23,260	117,012
Trading securities—equity	3,691	541	0	133	4,365
Trading securities—debt	0	46,230	0	0	46,230

Total financial liabilities ²	\$15	\$0	\$1,721	\$0	\$1,736
December 31, 2016					
Financial Assets					
Cash and cash equivalents	\$54,725	\$0	\$0	\$ 50,114	\$104,839

Edgar Filing: FEDERATED INVESTORS INC /PA/ - Form 10-Q

Available-for-sale equity securities	103,996	0	0	26,789	130,785
Trading securities—equity	13,866	0	0	6,193	20,059
Trading securities—debt	0	45,466	0	0	45,466
Other ¹	19	0	840	0	859
Total financial assets	\$172,606	\$45,466	\$840	\$83,096	\$302,008

Total financial liabilities ²	\$2	\$358	\$1,931	\$0	\$2,291
--	-----	-------	---------	-----	---------

¹ Amounts include structured trade finance loans held by Federated as well as futures contracts and/or foreign currency forward contracts held within certain consolidated Federated Funds.

² Amounts include acquisition-related future consideration liabilities and may include foreign currency forward contracts and/or futures contracts held within certain consolidated Federated Funds, as well as certain liabilities attributable to structured trade finance loans held by Federated.

Table of Contents

Notes to the
Consolidated
Financial
Statements
(continued)
(unaudited)

The following is a description of the valuation methodologies used for financial assets and liabilities measured at fair value on a recurring basis. Federated did not hold any nonfinancial assets or liabilities measured at fair value on a recurring basis at June 30, 2017 or December 31, 2016.

Cash and cash equivalents

Cash and cash equivalents include investments in money market funds and deposits with banks. Investments in money market Federated Funds totaled \$108.5 million and \$96.7 million at June 30, 2017 and December 31, 2016, respectively. Cash investments in publicly available money market funds are valued under the market approach through the use of quoted market prices in an active market, which is the NAV of the funds, and are classified within Level 1 of the valuation hierarchy. For an investment in a money market Federated Fund that is not publicly available but for which the NAV is calculated daily and for which there are no redemption restrictions, the security is valued using NAV as a practical expedient and is excluded from the fair value hierarchy. This investment is included in the NAV Practical Expedient column in the table above.

Available-for-sale equity securities

Available-for-sale equity securities include investments in fluctuating-value Federated Funds and are included in Investments—affiliates on the Consolidated Balance Sheets. For investments in Federated Funds that are publicly available, the securities are valued under the market approach through the use of quoted market prices available in an active market, which is the NAV of the funds, and are classified within Level 1 of the valuation hierarchy. For certain investments in Federated Funds that are not publicly available but for which the NAV is calculated daily and for which there are no redemption restrictions, the securities are valued using NAV as a practical expedient and are excluded from the fair value hierarchy. These investments are included in the NAV Practical Expedient column in the table above.

Trading securities—equity

Trading securities—equity primarily represent certain equity investments held in Separate Accounts (included in Investments—other on the Consolidated Balance Sheets) as well as equity securities held by consolidated Federated Funds (included in Investments—consolidated investment companies on the Consolidated Balance Sheets). For publicly traded equity securities available in an active market, the fair value of these securities is classified as Level 1 when the fair value is based on quoted market prices. The fair value of certain equity securities traded principally in foreign markets and held by consolidated Federated Funds are determined by a third-party pricing service (Level 2). For certain investments in Federated Funds that are not publicly available but for which the NAV is calculated daily and for which there are no redemption restrictions, the investments are valued using NAV as a practical expedient and are excluded from the fair value hierarchy. These investments are included in the NAV Practical Expedient column in the table above.

Trading securities—debt

Trading securities—debt primarily represent domestic bonds held by consolidated Federated Funds. The fair value of these securities may include observable market data such as valuations provided by independent pricing services after considering factors such as the yields or prices of investments of comparable quality, coupon, maturity, call rights and other potential prepayments, terms and type, reported transactions, indications as to values from dealers and general market conditions (Level 2).

(b) Fair Value Measurements on a Nonrecurring Basis

Federated did not hold any assets or liabilities measured at fair value on a nonrecurring basis at June 30, 2017.

(c) Fair Value Measurements of Other Financial Instruments

The fair value of Federated's debt is estimated by management using observable market data (Level 2). Based on this fair value estimate, the carrying value of debt appearing on the Consolidated Balance Sheets approximates fair value.

(8) Debt

On June 5, 2017, Federated entered into an unsecured Third Amended and Restated Credit Agreement by and among Federated, certain of its subsidiaries as guarantors party thereto, a syndicate of ten banks as Lenders party thereto, PNC Bank, National Association as administrative agent, PNC Capital Markets LLC, as sole bookrunner and joint lead arranger, Citigroup Global Markets, Inc., as joint lead arranger, Citibank, N.A. as syndication agent, and TD Bank, N.A. as documentation agent (Credit Agreement). The Credit Agreement amended and restated Federated's prior unsecured Second Amended and Restated Credit

Table of Contents

Notes to the
Consolidated
Financial
Statements
(continued)
(unaudited)

Agreement, which was dated June 24, 2014 and scheduled to mature on June 24, 2019 (Prior Credit Agreement). The Credit Agreement refinanced \$200 million available on the revolving credit facility and \$178.5 million outstanding on the term loan facility under the Prior Credit Agreement, replacing both with a \$375 million revolving credit facility which has an additional \$200 million available via an optional increase (or accordion) feature. Federated had no borrowings under the previous revolving credit facility. The Credit Agreement does not include a term loan facility.

The Credit Agreement, which expires on June 5, 2022, has no principal payment schedule, but instead requires that any outstanding principal be repaid by the expiration date. Federated, however, may elect to make discretionary principal payments prior to the expiration date. As of June 30, 2017, outstanding borrowings under the revolving credit facility were \$178.5 million and were recorded in Long-term debt on the Consolidated Balance Sheets. The interest rate was 2.201% as of June 30, 2017, which was calculated at the London Interbank Offering Rate (LIBOR) plus a spread. The commitment fee under the Credit Agreement currently is 0.125% per annum on the daily amount of the unused portion of each Lender's commitment. As of June 30, 2017, Federated has \$196.5 million available for borrowings in its revolving credit facility.

As of December 31, 2016, the outstanding balance on the term loan facility under the Prior Credit Agreement was \$191.3 million, which consisted of \$25.5 million recorded in Short-term debt and \$165.8 million recorded in Long-term debt. The interest rate was 1.745% as of December 31, 2016, which was calculated as LIBOR plus a spread.

The Credit Agreement, similar to the Prior Credit Agreement, includes representations and warranties, affirmative and negative financial covenants, including an interest coverage ratio covenant and a leverage ratio covenant, reporting requirements and other non-financial covenants. Federated was in compliance with all covenants at and during the six months ended June 30, 2017 (see the Liquidity and Capital Resources section of Management's Discussion and Analysis for additional information). The Credit Agreement also has certain stated events of default and cross default provisions which would permit the lenders/counterparties to accelerate the repayment of the debt if not cured within the applicable grace periods. The events of default generally include breaches of contract, failure to make required loan payments, insolvency, cessation of business, notice of lien or assessment, and other proceedings, whether voluntary or involuntary, that would require the repayment of amounts borrowed. The Credit Agreement also requires certain subsidiaries to enter into a Second Amended and Restated Continuing Agreement of Guaranty and Suretyship to guarantee payment of all obligations incurred through the Credit Agreement.

(9) Share-Based Compensation Plans

(a) Restricted Stock

During the first six months of 2017, Federated awarded 543,570 shares of restricted Federated Class B common stock, nearly all of which was granted in connection with a bonus program in which certain key employees received a portion of their bonus in the form of restricted stock under Federated's Stock Incentive Plan. This restricted stock, which was granted on the bonus payment date and issued out of treasury, will generally vest over a three-year period. The remaining shares were awarded to certain key employees and generally vest over a ten-year period.

During 2016, Federated awarded 943,160 shares of restricted Federated Class B common stock under its Stock Incentive Plan. Of this amount, 464,660 shares were awarded in connection with the aforementioned bonus program in 2016. The remaining shares were awarded to certain key employees and generally vest over a ten-year period.

(b) Non-Management Director Stock Award

During the second quarters of 2017 and 2016, Federated awarded 6,000 and 5,700 shares of Federated Class B common stock, respectively, to non-management directors. There were no additional awards to non-management directors in 2017 or 2016.

(10) Equity

In October 2016, the board of directors authorized a share repurchase program that allows Federated to buy back up to 4 million shares of Federated Class B common stock with no stated expiration date. No other programs existed as of June 30, 2017. The program authorizes executive management to determine the timing and the amount of shares for each purchase. The repurchased stock is to be held in treasury for employee share-based compensation plans, potential acquisitions and other corporate activities, unless Federated's board of directors subsequently determines to retire the repurchased stock and restore the shares to authorized but unissued status (rather than holding the shares in treasury). During the first six months of 2017,

Table of Contents

Notes to the
Consolidated
Financial
Statements
(continued)
(unaudited)

Federated repurchased 1.1 million shares of Class B common stock for \$28.3 million, the majority of which were repurchased in the open market. The remaining repurchased shares represent restricted stock forfeited by employees and are not counted against the board-approved share repurchase program. At June 30, 2017, 2.8 million shares remain available to be purchased under Federated's buyback program.

(11) Earnings Per Share Attributable to Federated Investors, Inc. Shareholders

The following table sets forth the computation of basic and diluted earnings per share using the two-class method for amounts attributable to Federated:

	Three Months Ended		Six Months Ended	
	June 30, 2017	2016	June 30, 2017	2016
(in thousands, except per share data)				
Numerator – Basic and Diluted				
Net income attributable to Federated Investors, Inc.	\$53,451	\$52,709	\$103,092	\$98,152
Less: Total income available to participating unvested restricted shareholders ¹	(2,159)	(2,118)	(4,122)	(3,947)
Total net income attributable to Federated Common Stock ²	\$51,292	\$50,591	\$98,970	\$94,205
Denominator				
Basic weighted-average Federated Common Stock ²	97,581	99,592	97,722	99,697
Dilutive potential shares from stock options	1	1	1	1
Diluted weighted-average Federated Common Stock ²	97,582	99,593	97,723	99,698
Earnings per share				
Net income attributable to Federated Common Stock – Basic and Diluted	\$0.53	\$0.51	\$1.01	\$0.94

¹ Income available to participating unvested restricted shareholders includes dividends paid on unvested restricted shares and their proportionate share of undistributed earnings.

² Federated Common Stock excludes unvested restricted shares which are deemed participating securities in accordance with the two-class method of computing earnings per share.

(12) Commitments and Contingencies

(a) Contractual

Federated may be required to make certain compensation-related payments through 2019 in connection with various significant employment and incentive arrangements. Federated is obligated to make future minimum compensation payments of approximately \$6 million. Based on asset levels as of June 30, 2017 and performance goals, incentive payments could total up to another \$8 million over the remaining terms of these arrangements.

On June 5, 2017, Federated refinanced the Prior Credit Agreement and is no longer committed to make quarterly principal payments. Outstanding principal is to be paid no later than the expiration date of the Credit Agreement. See Note (8) to the Consolidated Financial Statements for additional information.

(b) Guarantees and Indemnifications

On an intercompany basis, various wholly owned subsidiaries of Federated guarantee certain financial obligations of Federated Investors, Inc., and Federated Investors, Inc. guarantees certain financial and performance-related obligations of various wholly owned subsidiaries. In addition, in the normal course of business, Federated has entered into contracts that provide a variety of indemnifications. Typically, obligations to indemnify third parties arise in the context of contracts entered into by Federated, under which Federated agrees to hold the other party harmless against losses arising out of the contract, provided the other party's actions are not deemed to have breached an agreed-upon standard of care. In each of these circumstances, payment by Federated is contingent on the other party making a claim for indemnity, subject to Federated's right to challenge the other party's claim. Further, Federated's obligations under these agreements may be limited in terms of time and/or amount. It is not possible to predict the maximum potential amount of future payments under these or similar agreements due to the conditional

Table of Contents

Notes to the
Consolidated
Financial
Statements
(continued)
(unaudited)

nature of Federated's obligations and the unique facts and circumstances involved in each particular agreement. As of June 30, 2017, management does not believe that a material loss related to any of these matters is reasonably possible.

(c) Legal Proceedings

Federated has claims asserted and threatened against it in the ordinary course of business. As of June 30, 2017, Federated does not believe that a material loss related to these claims is reasonably possible.

See Item 1A - Risk Factors included in Federated's Annual Report on Form 10-K for the year ended December 31, 2016 for additional information regarding risks related to claims asserted or threatened against Federated.

(13) Accumulated Other Comprehensive Income (Loss) Attributable to Federated Investors, Inc. Shareholders

The components of Accumulated other comprehensive income (loss), net of tax attributable to Federated shareholders are as follows:

(in thousands)	Unrealized (Loss) Gain on Securities Available for Sale ¹	Foreign Currency Translation Loss	Total
Balance at December 31, 2015	\$ (3,795)	\$ (814)	\$ (4,609)
Other comprehensive income (loss) before reclassifications and tax	1,549	(424)	1,125
Tax impact	(564)	148	(416)
Reclassification adjustments, before tax ²	2,898	0	2,898
Tax impact ²	(1,054)	0	(1,054)
Net current-period other comprehensive income (loss)	2,829	(276)	2,553
Balance at June 30, 2016	\$ (966)	\$ (1,090)	\$ (2,056)
Balance at December 31, 2016	\$ 908	\$ (1,431)	\$ (523)
Other comprehensive income before reclassifications and tax	2,258	558	2,816
Tax impact	(865)	(195)	(1,060)
Reclassification adjustments, before tax	(1,875)	0	(1,875)
Tax impact	718	0	718
Net current-period other comprehensive income	236	363	599
Balance at June 30, 2017	\$ 1,144	\$ (1,068)	\$ 76

¹ Other than as described in note 2 below, amounts reclassified from Accumulated other comprehensive income (loss), net of tax were recorded in Gain (loss) on securities, net on the Consolidated Statements of Income.

Amount includes reclassification of \$0.8 million, net of tax from Accumulated other comprehensive income (loss), net of tax to Retained earnings on the Consolidated Balance Sheets as a result of the adoption of ASU 2015-02, Consolidation (Topic 810): Amendment to the Consolidation Analysis.

(14) Subsequent Events

On July 27, 2017, the board of directors declared a \$0.25 per share dividend to shareholders of record as of August 8, 2017 to be paid on August 15, 2017.

18

Part I, Item 2. Management's Discussion and Analysis

of Financial Condition and Results of Operations (unaudited)

The discussion and analysis below should be read in conjunction with the consolidated financial statements appearing elsewhere in this report. Management has presumed that the readers of this interim financial information have read or have access to Management's Discussion and Analysis of Financial Condition and Results of Operations appearing in Federated's Annual Report on Form 10-K for the year ended December 31, 2016.

General

Federated is one of the largest investment managers in the U.S. with \$360.4 billion in managed assets as of June 30, 2017. The majority of Federated's revenue is derived from advising Federated Funds and Separate Accounts in both domestic and international markets. Federated also derives revenue from providing administrative and other fund-related services, including distribution and shareholder servicing.

Federated's investment products and strategies are distributed in four markets. These markets and the relative percentage of managed assets attributable to such markets at June 30, 2017 are as follows: wealth management and trust (39%), broker/dealer (35%), institutional (22%) and international (4%).

Investment advisory fees, administrative service fees and certain fees for other services, such as distribution and shareholder service fees, are contract-based fees that are generally calculated as a percentage of the net assets of managed investment portfolios. Federated's revenue is primarily dependent upon factors that affect the value of managed assets including market conditions and the ability to attract and retain assets. Nearly all managed assets in Federated's investment products and strategies can be redeemed or withdrawn at any time with no advance notice requirement. Fee rates for Federated's services generally vary by asset and service type and may vary based on changes in asset levels. Generally, management-fee rates charged for advisory services provided to equity products and strategies are higher than management-fee rates charged to fixed-income products and strategies, which are higher than management-fee rates charged to money market products and strategies. Likewise, Federated Funds typically have a higher management-fee rate than Separate Accounts. Accordingly, revenue is also dependent upon the relative composition of average AUM across both asset and product types. Federated may implement Fee Waivers for competitive reasons such as to maintain certain fund expense ratios, to maintain positive or zero net yields on certain money market funds, to meet regulatory requirements or to meet contractual requirements. Since Federated's products are largely distributed and serviced through financial intermediaries, Federated pays a portion of fees earned from sponsored products to the financial intermediaries that sell these products. These payments are generally calculated as a percentage of net assets attributable to the applicable financial intermediary and represent the vast majority of Distribution expense on the Consolidated Statements of Income. Certain components of Distribution expense can vary depending upon the asset type, distribution channel and/or the size of the customer relationship. Federated generally pays out a larger portion of revenue earned from managed assets in money market funds than revenue earned from managed assets in equity or fixed-income funds.

Federated's most significant operating expenses are Distribution expense as described above, and Compensation and related expense. Compensation and related expense includes base salary and wages, incentive compensation and other employee expenses including payroll taxes and benefits. Incentive compensation, which includes stock-based compensation, can vary depending on various factors including, but not limited to, the overall results of operations of Federated, investment management performance and sales performance.

The discussion and analysis of Federated's financial condition and results of operations are based on Federated's Consolidated Financial Statements. Federated operates in a single operating segment, the investment management business. Management evaluates Federated's performance at the consolidated level. Management analyzes all expected revenue and expenses and considers market demands in determining an overall fee structure for services provided and in evaluating the addition of new business. Federated's growth and profitability are dependent upon its ability to attract and retain AUM and upon the profitability of those assets, which is impacted, in part, by Fee Waivers

(including management's decisions regarding Voluntary Yield-related Fee Waivers). Fees for mutual fund-related services are ultimately subject to the approval of the independent directors or trustees of the mutual funds. Management believes that meaningful indicators of Federated's financial performance include AUM, gross and net product sales, total revenue and net income, both in total and per diluted share.

Business Developments

Current Regulatory Environment

Domestic

The increased regulation and oversight of the investment management industry, and the possibility for deregulation, continues in 2017. Certain rules and regulations adopted by the SEC and Department of Labor (DOL), among other regulatory authorities, self-regulatory organizations or exchanges, have or may become effective, other rules and regulations have been proposed, and other regulatory actions have been taken or are contemplated, that impact the investment management industry (collectively, both domestically and abroad, as applicable, Regulatory Developments). In light of the policies of President Trump's administration, however, the possibility continues for repeal or modification of certain aspects of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) or the modification, or delay in the final implementation, of other laws, rules or regulations, as well as other deregulation. Among other Presidential actions, on February 24, 2017, President Trump signed an Executive Order on enforcing the regulatory reform agenda, which stated that it is the policy of the U.S. to alleviate unnecessary regulatory burdens on the American people. This Executive Order, among other directives, directed that: (1) within 60 days of the date of this Executive Order (or by April 25, 2017) the head of each agency, unless a waiver is obtained, designate an agency official as its Regulatory Reform Officer; (2) each Regulatory Reform Officer oversee the implementation of regulatory reform initiatives and policies to ensure that agencies effectively carry out regulatory reforms consistent with applicable law; (3) each agency establish a Regulatory Reform Task Force consisting of certain specified officials; and (4) each Regulatory Reform Task Force evaluate existing regulations and make recommendations to their agency head regarding the repeal, replacement or modification of such existing regulations consistent with applicable law.

In addition to President Trump's January 20, 2017 Executive Order imposing a regulatory moratorium, which expired on March 21, 2017, President Trump signed an Executive Order on reducing regulation and controlling regulatory costs on January 30, 2017. This Executive Order, among other directives, directed that (1) executive departments or agencies identify at least two existing regulations to be repealed any time a new regulation is proposed or promulgated, (2) with limited exceptions, the total incremental costs of all new (including repealed) regulations in 2017 be no greater than zero unless otherwise required by law, and (3) any new incremental costs associated with new regulations be offset by the elimination of existing costs associated with at least two prior regulations. On February 3, 2017, President Trump also signed an Executive Order on core principles of regulating the U.S. financial system, which, among other core principles, includes a policy to make regulations efficient, effective and appropriately tailored.

Among other legislative initiatives, on June 8, 2017, the House of Representatives passed the Financial Choice Act. While the Financial Choice Act may not pass the Senate in its current form, if it is approved by the Senate and enacted, in whole or in part, without material modification it would repeal or modify aspects of the Dodd-Frank Act. On July 5, 2017, legislation was introduced into Congress to override aspects of the DOL's final rule regarding the

definition of "fiduciary" and conflicts of interest in connection with retirement investment advice (Final Fiduciary Rule). Other legislation also continues to be discussed in Congress relating to regulatory reform, such as legislation seeking to prevent the final implementation of the DOL's Final Fiduciary Rule and legislation seeking to reverse certain aspects of money market fund reform. For example, a proposed law would permit the use of amortized cost valuation by, and override the floating NAV and certain other requirements for, institutional and municipal (or tax-exempt) money market funds, which requirements were imposed under the SEC's structural, operational and other money market fund reforms adopted through amendments to Rule 2a-7 under the 1940 Act (Rule 2a-7), and certain other regulations, on July 23, 2014 (2014 Money Fund Rules) and related guidance (collectively, the 2014 Money Fund Rules and Guidance).

The current regulatory environment has affected, and is expected to continue to affect, to varying degrees, Federated's business, results of operations, financial condition and/or cash flows. Increased regulation and regulatory developments have required, and are expected to continue to require, additional internal and external resources to be devoted to technology, legal, compliance, operations and other efforts to address regulatory-related matters, and have caused, and may continue to cause, product structure, pricing, offering and development effort adjustments, as well as changes in asset flows and mix, customer relationships, revenues and operating income. Given the possibility for deregulation that exists in the current regulatory environment in the U.S., the degree of impact of the 2014 Money Fund Rules and Guidance, Final Fiduciary Rule and Other Regulatory Developments can vary and is uncertain.

On December 11, 2015, the SEC proposed new rules that, if adopted as proposed, would increase the regulation of the use of derivatives by investment companies. Under these proposed rules, a fund would be required (among other requirements) to (1) comply with one of two alternative portfolio limitations designed to limit the amount of leverage the fund may obtain through derivatives and certain other transactions, (2) manage the risks associated with the fund's derivatives transactions by

of
Operations
(unaudited)

segregating certain assets in an amount designed to enable the fund to meet its obligations, including under stressed conditions, (3) establish a formalized derivatives risk management program if the fund engages in more than a limited amount of derivatives transactions or uses certain complex derivatives, and (4) segregate certain assets to cover the fund's obligations if a fund uses certain financial commitment transactions, such as reverse repurchase agreements and short sales. In a comment letter, dated March 23, 2016, Federated acknowledged certain constructive elements of the proposed rules, but opposed elements of the proposed rules in their current form, including, among other points, the adoption of a rules-based regime that employs fixed limits on notional exposure and disallows netting of most hedges, the proposed requirement that eligible coverage assets are limited to cash and cash equivalents, and the ability of advisors to adopt lesser standards for derivatives risk management programs where notional derivatives exposure is less than 50% of fund assets. It is unclear when the derivative rules will be finalized. Management does not expect these rules to be finalized before the fourth quarter of 2017 with an extended compliance period. The regulatory policies of the Trump administration, and possibility for deregulation in the U.S., could further delay or result in modifications to these rules or result in these rules not being adopted.

On April 6, 2016, the DOL released its Final Fiduciary Rule. The Final Fiduciary Rule, which, together with related guidance, imposes a modified fiduciary standard for retirement plan advisors. The Final Fiduciary Rule modifies the definition of "fiduciary" under the Employee Retirement Income Security Act of 1974 and addresses conflicts of interest raised by the receipt of compensation (such as Rule 12b-1 fees) by retirement plan advisors by requiring such advisors to (among other requirements) put their clients' interests before their own profits, acknowledge their fiduciary status, level certain fees, enter into customer contracts addressing standards of impartial conduct (subject to certain exceptions), provide disclosure regarding investment fees and costs, adopt certain policies and procedures to address conflicts of interest and retain certain records. The DOL issued Frequently Asked Questions (FAQs) on the Final Fiduciary Rule on October 27, 2016, and on January 13, 2017. These FAQs addressed various topics, such as the Best Interest Contract Exemption, level fee requirements, covered investment recommendations, investor education, transactions with independent fiduciaries, investor rights and other requirements and issues under the Final Fiduciary Rule.

On February 3, 2017, President Trump also issued a memorandum on the DOL Final Fiduciary Rule directing the DOL to examine the Final Fiduciary Rule to determine whether it has or is likely to harm or adversely affect investors and, if so, to propose a rule rescinding or revising it. Specifically, the memorandum directed the DOL, as part of its examination of the Final Fiduciary Rule, to prepare an updated economic and legal analysis concerning the likely impact of the Final Fiduciary Rule, which must consider, among other things, whether (1) the anticipated applicability of the Final Fiduciary Rule has harmed or is likely to harm investors due to a reduction of Americans' access to certain retirement savings offerings, retirement product structures, retirement savings information or related financial advice; (2) the anticipated applicability of the Final Fiduciary Rule has resulted in dislocations or disruptions within the retirement services industry that may adversely affect investors or retirees; and (3) the Final Fiduciary Rule is likely to cause an increase in litigation and an increase in the prices that investors and retirees must pay to gain access to retirement services.

In response to President Trump's February 3, 2017 memorandum, on March 2, 2017, the DOL published a document seeking comment on a proposed 60-day extension of the applicability date of the Final Fiduciary Rule. The comment period concluded on March 17, 2017. In that document, the DOL also requested comments regarding the examination described in the President's memorandum. This comment period ended on April 17, 2017. On April 7, 2017, the DOL published a rule delaying the applicability of its Final Fiduciary Rule for 60 days or from April 10, 2017 to June 9, 2017. After making an announcement on May 22, 2017, the DOL permitted the new "fiduciary" definition, impartial conduct standards and certain class exemption conditions under the Final Fiduciary Rule to become applicable on June 9, 2017. The DOL did not require full compliance with all conditions of certain exemptions, such as the Best Interest Contract Exemption and an exemption relating to principal transactions, until January 1, 2018 while the DOL conducts its ongoing examination of the Final Fiduciary Rule as directed by President Trump. In May 2017, the DOL issued additional FAQs to provide information on the applicable provisions of the Final Fiduciary Rule and the transition period from June 9, 2017 to January 1, 2018. The DOL also has updated its enforcement policy for 2017 to indicate that the DOL and Internal Revenue Service will not pursue claims against fiduciaries who are working diligently and in good faith to comply with the Final Fiduciary Rule or treat those fiduciaries as being in violation of the Final Fiduciary Rule.

On June 1, 2017, prompted by DOL Secretary Acosta's invitation for the DOL and SEC to work constructively together on applicable standards of conduct for broker/dealers and investment advisors, SEC Chairman Jay Clayton issued a statement requesting public comment on the standards of conduct applicable to investment advisors and broker/dealers when providing advice to retail investors. In the request, among other questions, SEC Chairman Clayton inquired whether the SEC should move ahead with a disclosure- or standards of conduct-based approach and how any SEC action should be implemented and how it should comport with the DOL's Final Fiduciary Rule. On June 29, 2017, the DOL released its own request for information that specifically seeks public input that the DOL indicated could form the basis of new exemptions or changes/revisions to the Final

(unaudited)

Fiduciary Rule, and public input regarding the advisability of extending the January 1, 2018, applicability date for the remaining provisions of the Final Fiduciary Rule. Comments in response to the question relating to extending the January 1, 2018, applicability date for the remaining provisions of the Final Fiduciary Rule were due by July 21, 2017. Comments in response to all other questions are due by August 7, 2017. Given these developments, it is possible that the final implementation of the remaining provisions of the Final Fiduciary Rule may be delayed beyond January 1, 2018.

The level fee, and certain other requirements, under the Final Fiduciary Rule have raised questions regarding the sale and distribution of mutual fund shares under the 1940 Act. In response, in December 2016, the SEC staff issued IM Guidance Statement 2016-06 relating to mutual fund fee structures in which, among other things, the SEC staff advised that they would not object if, subject to certain requirements being satisfied, lengthy sales load variation disclosure for multiple intermediaries is included as an appendix to (or a stand-alone document incorporated into) a mutual fund's statutory prospectus as a means for the mutual fund to comply with Rule 22d-1 under the 1940 Act and Item 12(a)(2) under Form N-1A, which is the form used to register a mutual fund with the SEC. Rule 22d-1 and Item 12(a)(2) require that each variation to a mutual fund's sales price be applied uniformly to particular classes of investors or transactions and disclosed with specificity. On January 11, 2017, the SEC then issued a no-action letter granting relief from the requirements of Section 22(d) under the 1940 Act to permit, subject to certain requirements being satisfied, broker/dealers, when acting as brokers, to charge a commission on sales of mutual fund shares that do not have any front-end or contingent deferred sales loads or other asset-based sales charges (so called "clean shares") for sales or distribution services outside of the mutual fund. In its May 2017 FAQs, the DOL specifically discussed "clean shares" as an innovation in the mutual fund market to mitigate conflicts of interest, and, in its June 29, 2017 request for information, the DOL requested information regarding the use of both T Shares and clean shares to potentially address conflicts of interest. On July 5, 2017, legislation was introduced into Congress to override the fiduciary standards and related requirements in the DOL's Final Fiduciary Rule and replace them with a best interest standard and simplified requirements to avoid, disclose or otherwise reasonably manage material conflicts of interest. The regulatory policies of the Trump administration, and possibility for deregulation in the U.S., could further delay or result in modifications to these rules as finally applicable or result in these rules not becoming fully applicable. While courts have upheld the Final Fiduciary Rule to date, lawsuits challenging the validity of the Final Fiduciary Rule on various grounds are proceeding and, in connection with such lawsuits, the DOL has announced that it does not intend to enforce a provision in the Final Fiduciary Rule that would prohibit arbitration clauses in best-interest contracts.

On June 28, 2016, the SEC proposed rules that would require registered investment advisors to adopt and implement written business continuity and transition plans. If enacted as proposed, the rules would require registered investment advisors to assess and inventory components of their businesses, including operational and other risks related to significant disruptions in operations, and to design, adopt and implement written business continuity and transition plans "reasonably designed to address operational and other risks related to a significant disruption in the investment advisor's operations." Registered investment advisors also would be required to comply with certain additional

recordkeeping and compliance requirements related to business continuity and transition plans. In a comment letter dated September 2, 2016, Federated acknowledged the need for an updated framework to strengthen industry practices regarding business continuity, but respectfully asserted that the proposed rules: (i) set an unreasonable standard for advisors that is not justified by cost/benefit assessments; (ii) fail to acknowledge the obstacles advisors face due to the inability of critical service providers to provide adequate clarity regarding their business continuity programs because of the service providers' need for confidentiality (thus requiring greater redundancies by investment advisors); and (iii) fail to acknowledge and clarify the important role of disclosure in informing investors of the risks associated with business continuity events. Regarding transition plans, Federated respectfully asserted that the proposed rules: (i) are highly burdensome while having little practical value as they require meaningless speculation by the advisor regarding transactions it may undertake in hypothetical risk scenarios; (ii) are not cost/benefit justified based on the historical experience of advisors of registered vehicles that would be most affected by the proposed rules; and (iii) create a record to assist in regulatory oversight that could alternatively be achieved by far simpler and less costly means. It is unclear when the business continuity and transition planning rules will be finalized. Management does not expect these rules to be finalized before the fourth quarter of 2017. The regulatory policies of the Trump administration, and possibility for deregulation in the U.S., could further delay or result in modifications to these rules or result in these rules not being adopted.

On August 25, 2016, the SEC promulgated final rules (originally proposed on May 20, 2015) amending Form ADV (the registration form and disclosure brochure for investment advisors) to, in part, require advisors to maintain additional performance records, and provide additional information regarding borrowing and the use of derivatives, relating to separately managed accounts. Compliance with these amendments is required with respect to any Form ADV, or amendment to Form ADV, filed on or after October 1, 2017.

On October 13, 2016, the SEC adopted new rules relating to the modernization of investment company reporting and disclosure, the enhancement of liquidity risk management by open-end investment companies and the permitted use of "swing

Table of Contents

Management's
Discussion
and Analysis
(continued)
of
Financial
Condition
and
Results
of
Operations
(unaudited)

pricing" by open-end investment companies. Among other requirements and changes, the new reporting modernization rules require registered investment companies to make certain disclosures regarding securities lending activities and, using a standardized data format, require registered investment companies (other than money market funds) to report portfolio-wide and position-level holding data monthly on Form N-PORT, and registered investment companies (other than face-amount certificate companies) to report certain census-type information annually on Form N-CEN. The new rules also require standardized and enhanced disclosure regarding derivatives in fund financial statements. The Federated Funds that are registered under the 1940 Act are required to report on Form N-PORT and Form N-CEN by June 1, 2018. The compliance date for other disclosure requirements is August 1, 2017. The SEC, however, did not adopt a proposed rule that would have permitted delivery of fund shareholder reports through website posting in lieu of mailing. Given the possibility for deregulation in the U.S., it is uncertain whether aspects of the modernization of investment company reporting rules will be modified or eliminated prior to the required compliance dates.

The new liquidity risk management rules require open-end investment companies (other than money market funds and certain exchange traded funds (ETFs)) to establish liquidity risk management programs that contain certain required elements, including (among others): (1) classification of the liquidity of fund portfolio investments into four "buckets" (i.e., highly liquid, moderately liquid, less liquid and illiquid); (2) assessment, management and periodic review of a fund's liquidity risk; (3) the establishment of a highly liquid investment minimum (i.e., a minimum percentage of cash and investments that can be liquidated in three business days without significantly changing the market value of the investment); (4) a limitation on illiquid investments (i.e., 15% of net assets) with board reporting of exceptions; and (5) fund board review and approval of the liquidity management program and the designation of a fund advisor or officer to administer the program. In addition to certain other policy and procedure, disclosure and recordkeeping requirements, the new rules require confidential reporting on Form N-LIQUID when a fund's level of illiquid assets exceeds 15% of its net assets or when the fund's highly liquid investments fall below its highly liquid investment minimum for more than a brief period of time. Larger fund complexes, such as Federated's, are required to establish their liquidity risk management programs and begin reporting on Form N-LIQUID by December 1, 2018. Compliance with disclosure and certain other requirements was required by June 1, 2017. Given the possibility for deregulation in the U.S., it is uncertain whether aspects of the liquidity risk management rules will be modified or eliminated prior to the final required compliance date.

The new swing pricing rule permits open-end investment companies (other than money market funds and ETFs) to use swing pricing to effectively pass on the costs resulting from shareholder purchase and redemption transactions to the transacting shareholders. Specifically, swing pricing involves a fund determining its NAV in accordance with its established policies and procedures and adding to or subtracting from that calculated (or unswung) NAV a specified amount - a "swing factor" - to determine the price at which purchases and redemptions in fund shares would be transacted. The swing factor would be applied to a fund's unswung NAV once the level of net purchases into or net redemptions out of the fund has exceeded a specified percentage or percentages of the fund's unswung NAV known as a "swing threshold." In addition to certain disclosure, reporting, recordkeeping and other requirements, for a fund that

elects to adopt swing pricing, the new rule requires the fund's board to adopt policies and procedures that specify the process for the determination of the fund's swing factor and swing threshold (taking into account certain considerations) and to establish and disclose an upper limit on the swing factor used, which may not exceed two percent of the fund's NAV per share. The fund's board also would be required to approve the fund's swing factor upper limit, swing pricing threshold and any changes thereto, and to review a written report covering the adequacy of the fund's swing pricing policies and procedures and the effectiveness of their implementation. The new swing pricing rule becomes effective on November 19, 2018. Given the policies of the Trump administration and the possibility for deregulation in the U.S., it is uncertain whether aspects of the swing pricing rule will be delayed or modified prior to the effective date.

On March 1, 2017, the SEC issued a proposed rule that would require the use of the Inline XBRL format for the submission of operating company financial statement information and mutual fund risk/return summaries, and would eliminate the requirement for investment companies and other filers to post interactive data files on their websites. Comments on this proposed rule were due by May 16, 2017. In a comment letter dated May 16, 2017, Federated supported rescinding the current XBRL filing and posting requirements and not finalizing the proposed new Inline XBRL requirements because Federated does not believe that XBRL filings and postings are utilized by fund shareholders. In the event the SEC does not rescind the existing requirements and finalizes the proposed requirements, Federated proposed utilizing Inline XBRL formatting and including required tagged data on Form N-CEN, rather than in fund registration statements, with an extended compliance date of at least 18 months.

On March 22, 2017, the SEC adopted an amendment to Rule 15c6-1(a) under the 1934 Act (Settlement Cycle Rule) to shorten the standard settlement cycle for most broker/dealer transactions from three business days after the trade date (T+3) to two business days after the trade date (T+2). This amendment became effective on May 30, 2017 and compliance with the amendment is required by September 5, 2017.

The SEC staff has been engaging in a series of investigations, enforcement actions and/or examinations involving investment management industry participants, including certain sweep examinations of investment management companies and investment advisors involving various topics, including, but not limited to, compliance with the 2014 Money Fund Rules and Guidance, "distribution in guise," marketing support payments, and intermediary and other payments and related disclosures, allocation of initial public offerings, allocation of portfolio security litigation proceeds, manager of managers arrangements, monitoring of use of social networks, target date funds, the impact of the United Kingdom's (UK) vote to exit the European Union (EU) (known as "Brexit"), valuation practices, share class selection, fixed-income and high yield liquidity, liquidity controls, liquid alternatives, cybersecurity, side-by-side management of private funds, private placements, mutual fund waivers, direct and indirect custody of client assets by investment advisors, separately managed or wrap-fee accounts, performance reporting and excessive trading. In addition to compliance with the 2014 Money Fund Rules and Guidance, the SEC staff also has announced that, among other areas of focus, cybersecurity, anti-money laundering, payments for order flow, wrap fee programs and private fund advisors will be examination priorities in 2017. These investigations, actions and examinations have led, and may lead, to further regulation and scrutiny of the investment management industry. Over the past three years, the SEC staff also issued various guidance statements on cyber-security, investment company business continuity, mutual fund distribution, revising fund disclosure in light of changing market conditions, inadvertent custody, and sales load variation disclosure, among other topics. Given the policies of the Trump administration, the changes in SEC management, and the possibility for deregulation in the U.S., the degree to which regulatory investigations, actions and examinations will continue, as well as their frequency and scope, can vary and is uncertain.

Regulation or potential regulation by other regulators, in addition to the SEC and DOL, also continued, and may continue, to affect investment management industry participants, including Federated. For example, various state legislatures or regulators have adopted or are beginning to adopt state-specific cybersecurity and/or privacy requirements that may apply to varying degrees in addition to federal regulation. The Financial Stability Oversight Council (FSOC) indicated in 2014 that it intended to monitor the effectiveness of the 2014 Money Fund Rules. This prompted concerns that the FSOC may recommend new or heightened regulation for "non-bank financial companies" under Section 120 of the Dodd-Frank Act, which the Board of Governors of the Federal Reserve System (Governors) have indicated can include open-end investment companies, such as money market funds and other mutual funds. Management continues to respectfully disagree with this position and does not believe that asset managers and management products, such as money market funds, create systemic risk. The FSOC has since moved away from potential systemically important financial institution designations of asset managers or investment products, in favor of studying and evaluating the financial stability implications of the asset management sector. On April 18, 2016, the FSOC released its Update on Review of Asset Management Products and Activities (Update), which reported its views on potential risks to financial stability arising from certain asset management products and activities, including mutual funds, other pooled investment vehicles and separately managed accounts. In the Update, the FSOC focused on potential risks arising from liquidity/redemptions and leverage, as well as securities lending, operational risks of service provider concentrations and resolvability and transition planning. The FSOC also indicated that, among other

additional analysis, it would continue to review and monitor the SEC's proposed rules on modernization, liquidity management and derivatives and their implications for financial stability. The FSOC has periodically received at its meetings updates on asset management products and activities, which have included a discussion of SEC initiatives and data gaps, potential risks stemming from asset management products, such as hedge funds, the impact of the 2014 Money Fund Rules and Guidance, and the process for non-bank financial company designations under the Dodd-Frank Act (including six quantitative thresholds applied to a broad group of non-bank financial companies during stage one of the process).

There are efforts underway to improve the transparency and to seek to curtail certain authority of the FSOC. For example, on February 28, 2017, the Republican Staff of the Committee on Financial Services, U.S. House of Representatives, issued a report entitled "The Arbitrary and Inconsistent FSOC Nonbank Designation Process." The report criticized the FSOC for not following its own rules and guidance relating to designations on systemically important non-bank financial institutions and for inconsistent and arbitrary analysis of companies. On March 28, 2017, ten U.S. Senators sent a letter to Treasury Secretary Steven Mnuchin criticizing the FSOC's process for designating non-bank systemically important financial institutions as lacking transparency and accountability, insufficiently tracking data, and not having a consistent methodology for determinations. In the letter, the 10 Senators expressed their support for ending the FSOC's "too big to fail" policy. On April 21, 2017, President Trump issued a Presidential Memorandum for the Secretary of the Treasury that, among other directives, directed the Treasury Secretary to consider whether the FSOC's processes for making determinations and designations are sufficiently transparent, provide adequate due process, adequately consider the costs of any determination or designation on the regulated entity, and are consistent with President Trump's Executive Order on core principles for regulating the U.S. financial system. This Presidential Memorandum also directed the Treasury Secretary not to vote for any non-emergency proposed determinations or designations for a period of 180 days pending the completion of the Treasury Secretary's review, and submission of recommendations, in response to the Presidential Memorandum. Given the possibility of deregulation in the U.S.,

(unaudited)

coupled with the efforts underway to improve the transparency and to seek to curtail certain authority of the FSOC, the degree to which actions by the FSOC can impact the investment management industry, including Federated, is uncertain.

The current regulatory environment, including the SEC's 2014 Money Market Fund Rules and Guidance and the DOL's Final Fiduciary Rule, has impacted, and will continue to impact, Federated's business, results of operations, financial condition and/or cash flows. For example, the floating NAV for institutional and municipal (or tax-exempt) money market funds, and redemption fees and liquidity gates, required beginning October 14, 2016 under the 2014 Money Fund Rules and Guidance resulted in a shift in asset mix from institutional prime and municipal (or tax-exempt) money market funds to stable NAV government money market funds across the investment management industry and at Federated, which impacted its AUM, revenues and operating income. While management believes that, as interest rates rise, money market funds will benefit generally from increased yields, particularly as compared to deposit account alternatives, and that, as spreads widen, investors who exited prime money market funds will likely reconsider their investment options over time, including Federated's prime private money market fund and prime collective fund, the degree of improvement to Federated's business can vary and is uncertain. The DOL's Final Fiduciary Rule also has impacted, and will continue to impact, Federated's AUM, revenues and operating income. For example, while management believes that Federated's separately managed account/wrap-fee strategies work well in level wrap fee account structures and can provide transparency and potential tax advantages to clients, and that Federated's experience with bank trust departments and fiduciary experience and resources presents an opportunity to add value for clients, intermediaries have begun to reduce the number of Federated Funds offered on their platforms and mutual fund-related sales and distribution fees earned by Federated may decrease. In that case, similar to other investment management industry participants, Federated could experience a further shift in asset mix and AUM, and a further impact on revenues and operating income.

Federated has dedicated, and continues to dedicate, significant internal and external resources to analyze and address the 2014 Money Fund Rules and Guidance and the Final Fiduciary Rule, including considering and/or effecting legislative, regulatory, product structure and development, information system development, reporting capability, business and other options that have been or may be available in an effort to minimize the potential impact of any adverse consequences. For example, Federated took steps to adjust its money market fund product line to offer a broad menu of institutional, municipal, prime, government, 60-day maximum maturity, 7-day maximum maturity and private and collective money market funds. Federated also has taken steps to comply with the applicable requirements of the DOL's Final Fiduciary Rule that became effective on June 9, 2017, and, while the possibility for delay or further modification exists, Federated will continue to prepare for the Final Fiduciary Rule by its current January 1, 2018 full implementation date. Federated's preparation includes having conversations with intermediary customers regarding the Final Fiduciary Rule and related guidance, and analyzing product offering and structure adjustments, regulatory alternatives and other means to comply, and to assist its customers to comply, with the Final Fiduciary Rule, the 1940 Act and other applicable laws and regulations. Among other actions, Federated has developed an educational website to assist clients with compliance with the Final Fiduciary Rule, increased the number of Federated Funds that offer

clean shares, including R6 shares, and added T Shares to 33 Federated Funds, which currently are not being offered. Federated also continues to dedicate internal and external resources to analyze and address the evolving landscape of other Regulatory Developments applicable to Federated, including the investment company modernization, liquidity, derivative, business continuity and transition planning, and other final and proposed regulations, guidance, initiatives and actions referred to above, and their effect on Federated's business, results of operations, financial condition and/or cash flows. For example, as appropriate, Federated participated, and will continue to participate, either individually or with industry groups, in the comment process for proposed regulations. Federated also continues to expend legal and compliance resources to examine corporate governance and public company disclosure proposals issued by the SEC and to adopt, revise and/or implement policies and procedures and to respond to examinations, inquiries and other matters involving its regulators, including the SEC, customers or other third parties. Federated continues to devote resources to technology and system investment, and the development of other investment management and compliance tools, to enable Federated to, among other things, be in a better position to address new or modified regulatory requirements. The 2014 Money Fund Rules and Guidance, Final Fiduciary Rule, and other Regulatory Developments, and related regulatory oversight, also impacted, and/or may impact, Federated's customers and vendors, their preferences and their businesses, which has caused, and/or may cause, certain product line-up, structure, pricing and product development changes, money market, equity, fixed income or balanced fund products to be less attractive to institutional and other investors, reductions in the number of Federated Funds offered by intermediaries, changes in the fees Federated, retirement plan advisors and intermediaries will be able to earn on investment products and services sold to retirement plan clients, and reductions in AUM, revenues and operating profits, as well as changes in asset flows, levels and mix and customer relationships.

Members of Congress and political candidates also continue to discuss proposals to enact a Financial Transactions Tax (FTT) on securities transactions in the U.S. Proposals that have been discussed involve, among other matters being considered, taxing stock, bond, derivative and certain other transactions at varying rates, while providing credits to lower income individuals and

(unaudited)

married couples. The enactment of an FTT on a broad basis in the U.S. would be detrimental to Federated's fund business and could materially and adversely affect Federated's business, results of operations, financial condition and/or cash flows. Federated is unable to assess the degree of any potential impact that a U.S. FTT may have on its business, results of operations, financial condition and/or cash flows until such a proposal is enacted. In light of the policies of the Trump administration, management does not anticipate that an FTT will be enacted in the U.S. in 2017. Federated will continue to monitor regulatory developments as necessary, and may implement additional changes to its business and practices as Federated deems necessary or appropriate. Further analysis and planning, or additional refinements to Federated's product line and business practices, may be required in response to market, customer or regulatory changes and developments, such as further money market fund regulation or potential deregulation, the Final Fiduciary Rule and other Regulatory Developments, or any additional regulation or guidance issued by the SEC or other regulatory authorities.

Management believes that the floating NAV, and fees and gates, required by the 2014 Money Fund Rules, as well as the Final Fiduciary Rule and other Regulatory Developments, has been and will be detrimental to Federated's fund business. In addition to the impact on Federated's AUM, revenues, operating income and other aspects of Federated's business described above, on a cumulative basis, Federated's regulatory, product development and restructuring, and other efforts in response to the 2014 Money Fund Rules and Guidance, Final Fiduciary Rule and other Regulatory Developments, including the internal and external resources dedicated to such efforts, have had, and may continue to have, a material impact on Federated's expenses and, in turn, financial performance. As of June 30, 2017, given the current regulatory environment, the possibility of future additional or modified regulation or oversight, and the potential for deregulation in the U.S., Federated is unable to fully assess the impact of adopted or proposed regulations, and other Regulatory Developments, and Federated's efforts related thereto, on its business, results of operations, financial condition and/or cash flows. The regulatory changes and developments in the current regulatory environment, and Federated's efforts in responding to them, could have a material and adverse effect on Federated's business, results of operations, financial condition and/or cash flows. As of June 30, 2017, given the potential for deregulation in the U.S. and the efforts underway to improve the transparency of, and to seek to curtail certain authority of, the FSOC, Federated also is unable to assess whether, or the degree to which, any of the Federated Funds, including money market funds or any of its other products, could ultimately be designated a systemically important non-bank financial company by the FSOC. While the FSOC's authority is subject to scrutiny amidst the political uncertainty and regulatory environment in the U.S., in management's view, the issuance of final regulations pertaining to systemically important non-bank financial companies is, and any reforms ultimately put into effect would be, detrimental to Federated's money market fund business and could materially and adversely affect Federated's business, results of operations, financial condition and/or cash flows. Federated also is unable to assess at this time whether, or the degree to which, any deregulation efforts or potential options being evaluated in connection with regulatory changes and developments ultimately may be successful.

International

On March 13, 2017, the UK Parliament passed the European Union (Notification of Withdrawal) Bill (Brexit Bill), which received Royal Assent from Her Majesty the Queen and became an Act of Parliament on March 16, 2017. On March 29, 2017, UK Prime Minister Theresa May delivered a letter to European Council President Donald Tusk formally notifying the European Council, in accordance with Article 50(2) of the Treaty on European Union, of the UK's intention to withdraw from the EU and the European Automatic Energy Community.

The UK voted to approve Brexit and exit the EU on June 23, 2016. Since that time, the Bank of England reduced interest rates in the UK in August 2016 from 0.5% to 0.25% and announced an extension of its quantitative easing program, the value of the British Pound has remained lower than pre-Brexit levels and the UK's credit rating was downgraded and concerns regarding the UK's credit persist given the uncertainty over the outcome of Brexit negotiations. While UK financial markets have rebounded, with the formal Article 50(2) notice having been delivered, debate continues regarding the exit process, the actions Scotland and Ireland may take in response to the UK's exit from the EU, whether work and travel permit restrictions will be imposed, the health, welfare and other rights that EU citizens will have in the UK and such rights that UK citizens will have in the EU, whether the UK will remain part of a single European market, and the ultimate impact Brexit will have on the UK economy and the EU. The process for agreeing and implementing the UK's withdrawal from the EU is expected to take up to two years or more and result in significant political and economic uncertainty, while the UK government and the European Commission negotiate the withdrawal agreement covering the terms of the UK's exit and its future relationship with the EU. See Item 1A, Risk Factors in Federated's most recent Annual Report on Form 10-K for the fiscal year ended December 31, 2016 for a further discussion of the risks of political instability, currency abandonment and other market disruptions on Federated and its business. The UK's exit from the EU also will likely affect the requirements and/or timing of implementation of legislation and regulation applicable to doing business in the UK, including the laws and regulations applicable to Federated, as well as to the sponsoring, management, operation and distribution of Federated's products and services, both in and outside the UK. For example, while EU Directives have been approved by the UK Parliament, EU regulations generally are effective in the EU without local

(unaudited)

parliament action and will need to be approved by the UK Parliament to remain in effect post-Brexit. If the UK does not remain part of the single European market (referred to as either a "Hard or Clean Brexit"), the ability to passport fund distribution and management services could be eliminated between the UK and EU, increasing regulatory burdens and compliance and other costs for UK funds being distributed in the EU and EU funds (such as Irish-domiciled funds) being distributed in the UK. The ability to engage investment managers for EU funds and UK funds also could be impacted, resulting in structural and other changes for UK and EU-domiciled funds. It also remains unclear whether Brexit may impact various initiatives underway in the EU, such as money market fund reform and the FTT. Federated is monitoring the impact of Brexit, and, while Brexit has not had a significant impact on Federated's business as of June 30, 2017, Federated remains unable to assess the degree of any potential impact Brexit, and resulting changes, may have on Federated's business, results of operations, financial condition and/or cash flows.

On April 5, 2017, European Parliament passed EU money market fund reforms (Money Market Fund Regulation or MMFR). European Council adopted the MMFR on May 16, 2017. The MMFR was published in the EU's Official Journal on June 30, 2017, and went into force on July 21, 2017. The reforms will be effective (i.e., must be complied with) in regards to new funds on July 21, 2018 and will be effective in regards to existing funds on January 21, 2019. Federated continues to engage with trade associations and appropriate regulators in connection with the MMFR as the European Securities Market Authority (ESMA) and the European Commission begin work on the next stage of implementing the MMFR.

The MMFR provide for the following types of money market funds in the EU: (1) Government constant NAV (CNAV) funds; (2) Low volatility NAV (LVNAV) funds; (3) Short-term variable NAV (VNAV) funds; and (4) standard VNAV funds. Among other characteristics, the government CNAV funds will need to invest 99.5% of their assets in public debt securities, which includes government debt/assets, reverse repurchase agreements securitized by government debt/assets of any eligible sovereign nation as determined by the funds' managers, and will be able to utilize amortized cost accounting to value all portfolio securities. Among other characteristics, the LVNAV funds will be able to invest in money market instruments, such as government, corporate and asset-backed commercial paper, among other instruments. LVNAV funds will be able to utilize amortized cost accounting to value securities with maturities of 75 days or less so long as the amortized cost value of the securities is within 10 basis points of the mark-to-market value of the securities, and will need to utilize mark-to-market/mark-to-model values for securities with maturities over 75 days. The LVNAV funds' NAVs, which will be rounded to two decimal places, will convert to four decimal places and move only if the NAV moves outside of a 20 basis point collar. Short-term VNAV funds and standard VNAV funds will be able to invest in money market instruments like LVNAV funds, but will need to utilize mark-to-market/mark-to model values for portfolio securities rather than using amortized cost accounting and will calculate their NAVs to four decimal places.

Government CNAV, LVNAV, and short-term VNAV funds will be able to hold portfolio securities with maturities of 397 days or less, and will be required to maintain a maximum weighted average maturity (WAM) of 60 days or less and a maximum weighted average life (WAL) of 120 days or less. Standard VNAV funds will be able to hold

portfolio securities with maturities of two years or less, and will be required to maintain a maximum WAM of 120 days or less and a maximum WAL of 360 days or less. Government CNAV and LVNAV funds will be required to maintain minimum daily liquidity of at least 10% and minimum weekly liquidity of at least 30%. Short-term VNAV and standard VNAV funds will be required to maintain minimum daily liquidity of at least 7.5% and minimum weekly liquidity of at least 15%. Unlike government CNAV and LVNAV funds, short-term VNAV and standard VNAV funds will not be subject to discretionary and mandatory redemption gates and/or liquidity fees. Government CNAV or LVNAV funds will need to consider the imposition of discretionary redemption gates and liquidity fees if a fund falls below 30% of its total portfolio in weekly liquidity and suffers daily outflows (i.e., net redemptions) of 10% of its assets and the fund's board determines action needs to be taken. Potential measures may include the application of fees reflecting the cost to the fund of selling assets to pay redemptions and/or redemption gates limiting redemptions to 10% of the fund's assets for up to 15 days. Government CNAV or LVNAV funds will need to impose mandatory redemption gates and/or liquidity fees if a fund's weekly liquidity falls below 10% of its total portfolio; in that case, a meeting of the fund's board will need to be convened and the board must determine an appropriate action to be taken (i.e., redemption gate and/or liquidity fees). Under the final EU money market fund reforms, sponsor support is prohibited for all money market funds.

While the MMFR will need to be complied with in 2018 or early 2019, government CNAV and LVNAV fund reforms will be subject to a future review by the European Commission in 2022. This review will consider the adequacy of the reforms from a prudential and economic perspective, taking into account, among other factors, the impact of the reforms on investors, money market funds, money fund managers and short-term financing markets, the role that money market funds play in purchasing debt issued or guaranteed by EU Member States, and international regulatory developments. As noted above, it is uncertain whether Brexit could delay implementation of the EU money market fund reforms.

Discussions regarding a European FTT also continue without the FTT being adopted. Notwithstanding challenges to its legality, discussions regarding the scope, application and allocation of the FTT continue in 2017. Proponents of the FTT have sought the widest possible application of the FTT with low tax rates. On October 10, 2016, the finance ministers of the 10 participating Member States agreed on another proposal for an FTT. Under this proposal, the FTT would be applied on Group of Ten (G10) shares (i.e., shares issued by issuers located in the G10 countries). In this case, the G10 countries include Austria, Belgium, France, Germany, Greece, Italy, Portugal, Slovakia, Slovenia and Spain. After a transition period, the FTT would be extended to all shares unless participating Member States decide otherwise. Regarding derivatives, the proposal provides that for option-type derivatives the tax base should be based on the option premium. For derivatives other than options, the proposal provides that a term-adjusted notional amount or market value (where applicable) may be considered as the appropriate taxable base. The proposal also indicates that adjustments to the tax rates or to the definition of the tax base may be necessary in order to avoid distortions. Under the proposal, repurchase agreements and reverse repurchase agreements and transactions of public debt managers and their counterparts would be exempt from the FTT. Derivatives "with public debt to 100% as direct underlying" (e.g., futures, forwards and options that have all sovereign bonds issued by governmental entities as the underlying asset) also would initially be exempt from the FTT. After a transition period, the FTT would be extended to such derivatives with public debt unless participating Member States decide otherwise. With the exceptions noted above, the proposal would subject all derivatives to the FTT. Under the proposal, a reduced minimum rate (80% of the normal tax rate) could be applied for market makers bound by a contract with a specific trading venue to carry out market making activities with regard to specific shares, irrespective of whether it is proprietary trading or market making. As proposed, when applicable to securities transactions, the FTT would be applied on the gross transaction amount. The FTT also would apply to all transactions involved in a transaction chain, except with respect to transactions by agents or clearing members when the agents and clearing members act as facilitators. Under previous proposals, it had been agreed that the impact of the FTT on the real economy and pension schemes should be minimized, subject to further analysis. The participating Member States agreed that further analysis with regard to real economy and pension funds is required, and did not address these matters in the proposal. It has been reported that government officials in Belgium are concerned over the FTT's potential negative impact for Belgium's pension funds and national financial market. It also has been reported that Austria and Italy were hoping for a final agreement on the FTT in the first half of 2017. At a mid-January 2017 plenary session of the European Parliament, a debate on the progress of the negotiations on the FTT was undertaken and it was reported that a final text of a legislation proposal for the FTT could be expected by mid-2017. Discussions continued at a February 21, 2017 meeting of the economic and finance ministers of the participating Member States where a number of issues were discussed, including an exemption for pension funds, without any final decisions being reached. At a meeting on March 20, 2017, participating Member States agreed to exempt pension funds, but not life insurance companies, from the FTT. The May 22, 2017 meeting of the economic and finance ministers of the participating Member States was cancelled and no definitive action was taken on the FTT at meetings held on June 15-16, 2017. If two Member States decide not to participate, the FTT proposal cannot be finalized. Austria's Finance Minister, Hans Schelling, had indicated that his objective is to have an

agreement on the FTT in place before Austria's October 15, 2017 elections. However, a July meeting of the economic and finance ministers of the participating Member States was also postponed to the end of 2017 at the earliest. The exact time needed to reach resolution, implement any agreement and enact legislation, however, is not known at this time. As noted above, Brexit could delay agreement on, and implementation of, the FTT in Europe. The Labour Party in the UK also has proposed a UK FTT.

The Financial Stability Board (FSB) and International Organization of Securities Commissions (IOSCO) published for comment on March 6, 2015 a second consultative document on "Assessment Methodologies for Identifying Non-Bank Non-Insurer Global Systemically Important Financial Institutions" (Second Consultation). In the Second Consultation, the FSB and IOSCO took a more inclusive approach setting forth revised methodologies for assessing the systemic risk of investment funds with an increased focus on leverage, and a new methodology for asset managers that focuses on activities that are conducted by a particular asset manager and may have the potential to generate systemic risk and warrant consideration. Each methodology contemplated the application of a materiality threshold to determine an assessment pool and requires assessment of global systemic importance for entities selected for further analysis by reviewing "impact factors" (e.g., size, interconnectedness, complexity, substitutability, and cross jurisdictional activities) based on sector-specific indicators relating to each of the relevant impact factors. As noted in its May 29, 2015 comment letter submitted to the FSB and IOSCO on the Second Consultation, Federated believes that the application of the Second Consultation's criteria should generally result in the exclusion of funds and asset managers that do not make significant use of leverage or derivatives from being designated as non-bank, non-insurance company global systemically important financial institutions. Management believes that money market funds should not be designated as non-bank, non-insurance company global systemically important financial institutions. On June 17, 2015, IOSCO announced that its risk analysis will initially focus on industry activities and managers in the broader global financial context in identifying potential systemic risks, rather than on the size of asset managers, but that after that review is complete, work on methodologies for the identification of individual entities should be reassessed. On July 30, 2015, the FSB announced that it has decided to wait to finalize the assessment methodologies for non-bank non-insurance company global systemically

(unaudited)

important financial institutions until after its current work on financial stability risks stemming from asset management activities is completed. The FSB indicated that, after discussing its initial findings in September 2015, it will develop activities-based policy recommendations.

Regarding the FSB's work on financial stability risks stemming from asset management activities, the FSB published a consultative document, "Proposed Policy Recommendations to Address Structural Vulnerabilities from Asset Management Activities" in June 2016. On January 12, 2017, the FSB published its final "Policy Recommendations to Address Structural Vulnerabilities from Asset Management Activities" (Final FSB Recommendations), which set forth 14 final policy recommendations intended to address four identified structural vulnerabilities from asset management activities that the FSB believes could potentially present financial stability risks. The four identified structural vulnerabilities identified by the FSB include: (1) a perceived liquidity mismatch between fund investments and redemption terms and conditions for open-end fund shares; (2) leverage within investment funds; (3) operational risk and challenges at asset managers in stressed conditions; and (4) securities lending activities of asset managers and funds. Regarding the perceived liquidity mismatch, the Final FSB Recommendations seek to increase information and transparency, strengthen liquidity risk management, and encourage the use of system-wide stress testing by regulatory authorities, through, among other efforts, developing consistent disclosure and reporting requirements, distinguishing between information useful to investors and regulatory authorities, making more liquidity risk management tools (e.g., swing pricing, redemption fees, other anti-dilution methods) available to open-end funds, and requiring and providing guidance on stress testing to support liquidity risk management. Regarding leverage, the Final FSB Recommendations focus on measuring and monitoring leverage within funds, including through, among other efforts, developing consistent measures of leverage, identifying or developing more risk-based measures to monitor leverage risk and collecting fund-level and aggregate data on leverage and its use in funds. Regarding operational risk, the Final FSB Recommendations aim to improve risk management frameworks and practices taking into account the level of risk an asset manager's activities pose to the financial system, including through, among other efforts, imposing requirements or providing guidance on business continuity and transition planning. Regarding securities lending, the Final FSB Recommendations focus on monitoring for situations where indemnifications provided by asset managers to their clients in relation to securities lending activities indicate the development of material risks or regulatory arbitrage that may adversely affect financial stability and recommend that regulatory authorities verify and confirm asset managers adequately cover potential credit losses. The Final FSB Recommendations also set forth preliminary results of the FSB's analysis regarding potential vulnerabilities of pension funds and sovereign wealth funds and address additional considerations relating to the liquidity transformation of exchange traded funds. It has been reported that IOSCO intends to implement the recommendations relating to liquidity mismatch by the end of 2017 and those relating to leverage by the end of 2018. On July 7, 2017, IOSCO published a "Consultation on CIS Liquidity Risk Management Recommendations," which sets forth IOSCO's framework for liquidity risk management for collective investment schemes. In doing so, IOSCO's consultation document addresses certain of the structural vulnerabilities identified by the FSB in the Final FSB Recommendations regarding liquidity risk management in the asset management industry, and makes recommendations regarding disclosure of liquidity risk management programs to investors, monitoring and

assessment of liquidity risk, availability and effectiveness of liquidity risk management tools, fund level stress testing and contingency planning, among other matters. On July 7, 2017, IOSCO also published a consultation report, "Open-ended Fund Liquidity and Risk Management - Good Practices and Issues for Consideration," which is intended to assist regulators, asset managers and investors in understanding liquidity risks and addressing liquidity risk management. Management, while generally supporting many of the recommendations in the Final FSB Recommendations and IOSCO consultation document that can be viewed as guidance on liquidity, leverage and other related risks, continues to respectfully disagree with the premise that the regulated fund industry, particularly in the U.S., creates financial stability risk and believes that additional burdensome regulation is not warranted. Management believes that an EU FTT or UK FTT, particularly if enacted with broad application, would be detrimental to Federated's business and could materially and adversely affect Federated's business, results of operations, financial condition and/or cash flows. Management continues to monitor and evaluate the potential impact of European money market reforms on Federated's business, results of operations, financial condition and/or cash flows. Regulatory reforms stemming from Brexit, as well as the potential political and economic uncertainty surrounding Brexit, the Final FSB Recommendations, the IOSCO consultation document or other initiatives also may adversely affect, potentially in a material way, Federated's business, results of operations, financial condition and/or cash flows. Similar to Federated's efforts in the U.S., Federated has dedicated, and continues to dedicate, significant internal and external resources to analyze and address European reforms that impact Federated's fund business. European regulatory developments, and Federated's efforts relating thereto, have had, and may continue to have, an impact on Federated's expenses and, in turn, financial performance. As of June 30, 2017, Federated is unable to assess the potential impact that EU money market reforms, a FTT or other regulatory reforms or initiatives may have on its business, results of operations, financial condition and/or cash flows until such regulatory developments become effective and are required to be complied with or a FTT is enacted. Federated also is unable to assess at this time whether, or the degree

Changes in Federated's average asset mix period-over-period across both asset classes and product types have a direct impact on Federated's operating income. Asset mix impacts Federated's total revenue due to the difference in the fee rates earned on each asset class and product type per invested dollar and certain components of distribution expense can vary depending upon the asset class, distribution channel and/or the size of the customer relationship. The following table presents the relative composition of average managed assets and the percent of total revenue derived from each asset class and product type for the periods presented:

	Percent of Total Average Managed Assets				Percent of Total Revenue			
	Six Months Ended June		Six Months Ended June		Six Months Ended June		Six Months Ended June	
	30, 2017	2016	30, 2017	2016	30, 2017	2016	30, 2017	2016
By Asset Class

Equity assets	10	% 9	% 34	% 30	% 10	% 30	%	%
Fixed-income assets	11	% 10	% 15	% 14	% 11	% 14	%	%
Separate Accounts:								
Money market assets	19	% 11	% 2	% 1	% 19	% 1	%	%
Equity assets	8	% 6	% 8	% 7	% 8	% 7	%	%
Fixed-income assets	3	% 4	% 2	% 2	% 3	% 2	%	%

Total managed assets represent the balance of AUM at a point in time. By contrast, average managed assets represent the average balance of AUM during a period of time. Because substantially all revenue and certain components of distribution expense are generally calculated daily based on AUM, changes in average managed assets are typically a key indicator of changes in revenue earned and asset-based expenses incurred during the same period.

As of June 30, 2017, total managed assets decreased 2% from June 30, 2016 primarily as a result of a decrease in money market assets, partially offset by increases in equity and fixed-income assets. Average money market assets decreased 5% for both the three and six months ended June 30, 2017 as compared to the same periods in 2016. Period-end money market assets decreased 5% at June 30, 2017 as compared to June 30, 2016. After initiating just one short-term interest rate increase late in 2016, the FOMC raised the target funds rate twice in the first six months of 2017 to a still accommodative range of 1.00% to 1.25%, and signaled at least one more potential increase in 2017.

Average equity assets increased 11% and 16% for the three and six months ended June 30, 2017, respectively, compared to the same periods in 2016. Period-end equity assets increased 6% at June 30, 2017 as compared to June 30, 2016 primarily due to market appreciation, partially offset by net redemptions. Average fixed-income assets increased 3% and 2% for the three and six months ended June 30, 2017, respectively, compared to the same periods in 2016. Period-end fixed-income assets increased 4% at June 30, 2017 as compared to June 30, 2016, primarily as a result of market appreciation and, to a lesser extent, net sales. Equity markets as measured by the major indexes set a series of new records in the second quarter 2017, driven by improved earnings and continued economic growth. The bond market roughly moved in lockstep, as prices rose and yields as measured by the 10-year Treasury fell for much of the three-month period, staying within a relatively tight trading range between 2.14% and 2.41%.

Results of Operations

Revenue. Revenue decreased \$13.9 million for the three-month period ended June 30, 2017 as compared to the same period in 2016 primarily due to a decrease of \$25.5 million due to lower average money market assets and a net decrease of \$16.2 million due to a change in a customer relationship (after taking into account the \$4.4 million impact of Voluntary Yield-related Fee Waivers for this customer, which is included in the change in waiver amount below). The decrease in revenue was partially offset by a decrease of \$21.2 million in Voluntary Yield-related Fee Waivers and an increase of \$7.2 million due to higher average equity assets.

Revenue decreased \$12.6 million for the six-month period ended June 30, 2017 as compared to the same period in 2016 primarily due to a decrease of \$54.2 million from lower average money market assets and a net decrease of \$21.1 million due to a change in a customer relationship (after taking into account the \$13.7 million impact of Voluntary Yield-related Fee Waivers for this customer, which is included in the change in waiver amount below). The decrease in revenue was partially offset by a decrease of \$54.4 million in Voluntary Yield-related Fee Waivers and increases of \$22.0 million and \$3.5 million due to higher average equity assets and fixed-income assets, respectively.

See Note (4) to the Consolidated Financial Statements for additional information on Voluntary Yield-related Fee Waivers, including the offsetting decreases in distribution expense and the net pre-tax impact on income.

For the six-month period ended June 30, 2017, Federated's ratio of revenue from managed assets to average managed assets was 0.30% as compared to 0.31% for the same period of 2016. The decrease in the rate was primarily due to the decrease related to a change in a customer relationship, partially offset by a decrease in Voluntary Yield-related Fee Waivers.

Operating Expenses. Total operating expenses for the three-month period ended June 30, 2017 decreased \$10.5 million as compared to the same period in 2016. Distribution expense decreased \$7.6 million in the second quarter of 2017 as compared to the same period in 2016 primarily due to a decrease of \$14.6 million related to lower average money market fund assets and a net decrease of \$10.7 million due to a change in a customer relationship (after taking into account the \$1.2 million impact of Voluntary Yield-related Fee Waivers for this customer, which is included in the change in waiver amount below). These decreases in Distribution expense were partially offset by an increase of \$16.4 million related to a decrease in Voluntary Yield-related Fee Waivers and an increase of \$2.5 million related to higher average equity fund assets. Compensation and related expense decreased \$3.9 million in the second quarter of 2017 as compared to the same period in 2016 primarily due to a decrease in incentive compensation driven primarily by sales performance.

Total operating expenses for the six-month period ended June 30, 2017 decreased \$12.3 million compared to the same period in 2016. Compensation and related expense decreased \$7.2 million in the first six months of 2017 compared to the same period in 2016 primarily due to a decrease in incentive compensation driven primarily by sales performance. Distribution expense decreased \$5.6 million in the first six months of 2017 compared to the same period in 2016 primarily due to a decrease of \$34.1 million related to lower average money market fund assets and a net decrease of \$12.8 million due to a change in a customer relationship (after taking into account the \$5.8 million impact of Voluntary Yield-related Fee Waivers for this customer, which is included in the change in waiver amount below). These decreases in Distribution expense were partially offset by an increase of \$40.8 million related to a decrease in Voluntary Yield-related Fee Waivers and increases of \$5.7 million and \$2.1 million related to higher average equity and fixed-income fund assets, respectively.

Nonoperating Income (Expenses). Nonoperating income, net increased \$2.6 million for the three-month period ended June 30, 2017 as compared to the same period in 2016. The increase is primarily due to a \$2.8 million increase in Gain (loss) on securities, net due to the impairment of two available-for-sale securities in the second quarter of 2016 (\$1.6 million) and net gains realized from the redemption of available-for-sale securities in 2017 (\$0.8 million).

Nonoperating income, net increased \$4.2 million for the six-month period ended June 30, 2017 as compared to the same period in 2016. The increase is primarily due to a \$4.3 million increase in Gain (loss) on securities, net due to net gains realized from the redemption of available-for-sale securities in 2017 (\$1.9 million) and the impairment of two available-for-sale securities in the second quarter of 2016 (\$1.6 million).

Income before income taxes. Consistent with the projected impact as disclosed in Federated's Annual Report on Form 10-K for the year ended December 31, 2016, the expected reduction in pre-tax income related to the change in a customer

relationship continues to be approximately \$2 million per quarter for future quarters as compared to the fourth quarter 2016 (including the impact of Voluntary Yield-related Fee Waivers for this customer).

Income Taxes. The effective tax rate was 37.1% for the three-month period ended June 30, 2017 as compared to 35.7% for the same period in 2016. The increase in the effective tax rate is primarily due to a decrease in net income from noncontrolling interests for the three-month period ended June 30, 2017 as compared to the same period in 2016, which is not taxable to Federated but is included in Income before income taxes.

The income tax provision increased \$3.6 million for the six-month period ended June 30, 2017 as compared to the same period in 2016 primarily due to higher income before income taxes. The effective tax rate was 37.0% for the six-month period ended June 30, 2017 as compared to 35.7% for the same period in 2016. The increase in the effective tax rate is primarily due to a decrease in net income from noncontrolling interests for the six-month period ended June 30, 2017 as compared to the same period in 2016, which is not taxable to Federated but is included in Income before income taxes.

Net Income Attributable to Federated Investors, Inc. Net income increased \$0.7 million for the three months ended June 30, 2017 as compared to the same period in 2016, primarily as a result of the changes in revenues and expenses noted above. Diluted earnings per share for the three months ended June 30, 2017 increased \$0.02 as compared to the same period of 2016 primarily due to lower weighted-average Federated Common Stock outstanding and, to a lesser extent, increased net income.

Net income increased \$4.9 million for the six months ended June 30, 2017 as compared to the same period in 2016, primarily as a result of the changes in revenues and expenses noted above. Diluted earnings per share for the six months ended June 30, 2017 increased \$0.07 as compared to the same period in 2016 primarily due to increased net income and, to a lesser extent, lower weighted-average Federated Common Stock outstanding.

Liquidity and Capital Resources

Liquid Assets. At June 30, 2017, liquid assets, net of noncontrolling interests, consisting of cash and cash equivalents, investments and receivables, totaled \$296.7 million as compared to \$310.3 million at December 31, 2016. The change in liquid assets is discussed below.

At June 30, 2017, Federated's liquid assets included investments in certain Federated-sponsored money market and fluctuating-value funds that may have direct and/or indirect exposures to international sovereign debt and currency risks. Federated continues to actively monitor its money market, fixed-income and equity portfolios to manage sovereign debt and currency risks with respect to certain eurozone countries (such as the UK in light of Brexit), China

and surrounding countries, and countries subject to economic sanctions. Federated's experienced portfolio managers and analysts work to evaluate credit risk through quantitative and fundamental analysis. Further, regarding international exposure, certain money market funds (approximately \$108 million), that meet the requirements of Rule 2a-7 or operate in accordance with requirements similar to those in Rule 2a-7, include holdings with indirect short-term exposures primarily in high-quality international bank names that are subject to Federated's credit analysis process.

Cash Provided by Operating Activities. Net cash provided by operating activities totaled \$98.9 million for the six months ended June 30, 2017 as compared to \$89.2 million for the same period in 2016. The increase of \$9.7 million was primarily due to an increase of \$19.6 million in cash received for the sales of trading securities during the six months ended June 30, 2017 as compared to the same period in 2016, partially offset by an increase of \$9.6 million in cash paid for taxes during the six months ended June 30, 2017 as compared to the same period in 2016 due primarily to increased taxable income for the same comparative periods.

Cash Provided by Investing Activities. During the six-month period ended June 30, 2017, net cash provided by investing activities was \$8.1 million which primarily represented \$17.3 million in proceeds from redemptions of securities available for sale, partially offset by \$4.4 million in cash paid for a business acquisition and \$3.5 million in cash paid for property and equipment (including technology).

Cash Used by Financing Activities. During the six-month period ended June 30, 2017, net cash used by financing activities was \$96.7 million. During the first six months of 2017, Federated (1) paid \$50.9 million or \$0.50 per share in dividends to holders of its common shares, (2) paid \$30.1 million to repurchase shares of Class B common stock primarily in connection with its stock repurchase program (see Note (10) to the Consolidated Financial Statements for additional information) and

(unaudited)

(3) repaid \$12.8 million in connection with its long-term debt obligations (see Note (8) to the Consolidated Financial Statements for additional information).

Borrowings. During the second quarter 2017, Federated entered into its Credit Agreement that refinanced \$200 million available on the revolving credit facility and \$178.5 million outstanding on the term loan facility under the Prior Credit Agreement, replacing both with a \$375 million revolving credit facility, which has an additional \$200 million available via an optional increase (or accordion) feature. The original proceeds were used for general corporate purposes including cash payments related to acquisitions, dividends, investments and share repurchases. During each of the six-month periods ended June 30, 2017 and 2016, Federated made debt payments of \$12.8 million. As of June 30, 2017, Federated has \$196.5 million available to borrow under the Credit Agreement. See Note (8) to the Consolidated Financial Statements for additional information.

The Credit Agreement includes an interest coverage ratio covenant (consolidated earnings before interest, taxes, depreciation and amortization (EBITDA) to consolidated interest expense) and a leverage ratio covenant (consolidated debt to consolidated EBITDA) as well as other customary terms and conditions. Federated was in compliance with all of its covenants, including its interest coverage and leverage ratios at and during the six months ended June 30, 2017. An interest coverage ratio of at least 4 to 1 is required and, as of June 30, 2017, the interest coverage ratio was 100 to 1. A leverage ratio of no more than 3 to 1 is required and, as of June 30, 2017, the leverage ratio was 0.5 to 1. The Credit Agreement has certain stated events of default and cross default provisions which would permit the lenders/counterparties to accelerate the repayment of the debt if not cured within the applicable grace periods. The events of default generally include breaches of contract, failure to make required loan payments, insolvency, cessation of business, notice of lien or assessment and other proceedings, whether voluntary or involuntary, that would require the repayment of amounts borrowed.

Future Cash Needs. Management expects that principal uses of cash will include funding distribution expenditures, paying incentive and base compensation, paying shareholder dividends, repaying debt obligations, funding business acquisitions and global expansion, paying taxes, repurchasing company stock, developing and seeding new products, modifying existing products and relationships and funding property and equipment (including technology). As a result of the highly regulated nature of the investment management business, management anticipates that aggregate expenditures for compliance and investment management personnel, compliance systems and related professional and consulting fees may continue to increase.

On July 27, 2017, the board of directors declared a \$0.25 per share dividend to shareholders of record as of August 8, 2017 to be paid on August 15, 2017.

After evaluating Federated's existing liquid assets, expected continuing cash flow from operations, its borrowing capacity under the Credit Agreement and its ability to obtain additional financing arrangements and issue debt or stock, management believes it will have sufficient liquidity to meet its present and reasonably foreseeable cash needs.

Financial Position

The following discussion summarizes significant changes on the Consolidated Balance Sheets that are not discussed elsewhere in Management's Discussion and Analysis of Financial Condition and Results of Operations as well as the status of Federated's goodwill as of June 30, 2017.

Accrued compensation and benefits at June 30, 2017 decreased \$34.9 million from December 31, 2016 primarily due to the 2016 accrued annual incentive compensation being paid in the first quarter of 2017 (\$64.5 million), partially offset by certain 2017 incentive compensation accruals recorded at June 30, 2017 (\$32.5 million).

There were no indicators of goodwill impairment as of June 30, 2017 as Federated's market capitalization exceeded the book value of equity by more than 350%.

Contractual Obligations and Contingent Liabilities

Contractual. Pursuant to various employment and incentive arrangements, Federated may be required to make certain compensation-related payments. See Note (12) to the Consolidated Financial Statements for more information.

Recent Accounting Pronouncements

For a list of new accounting standards applicable to Federated, see Note (3) to the Consolidated Financial Statements.

Critical Accounting Policies

Federated's Consolidated Financial Statements have been prepared in accordance with GAAP. In preparing the financial statements, management is required to make estimates and assumptions that affect the amounts reported in the Consolidated Financial Statements and accompanying notes. Management continually evaluates the accounting policies and estimates it uses to prepare the Consolidated Financial Statements. In general, management's estimates are based on historical experience, information from third-party professionals and various other assumptions that are believed to be reasonable under the facts and circumstances. Actual results may differ from those estimates made by management and those differences may be material.

Of the significant accounting policies described in Federated's Annual Report on Form 10-K for the year ended December 31, 2016, management believes that its policy regarding accounting for intangible assets involves a higher degree of judgment and complexity. See Federated's Annual Report on Form 10-K for the year ended December 31, 2016, Item 7 - Management's Discussion and Analysis of Financial Condition and Results of Operations under the section Critical Accounting Policies for a complete discussion of this policy.

Part I, Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have not been any material changes to Federated's exposures to market risk during the six months ended June 30, 2017 that would require an update to the disclosures provided in Federated's Annual Report on Form 10-K for the year ended December 31, 2016.

Part I, Item 4. Controls and Procedures

Federated carried out an evaluation, under the supervision and with the participation of management, including Federated's President and Chief Executive Officer and Chief Financial Officer, of the effectiveness of Federated's (a) disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of June 30, 2017. Based upon that evaluation, the President and Chief Executive Officer and the Chief Financial Officer concluded that Federated's disclosure controls and procedures were effective at June 30, 2017.

There has been no change in Federated's internal control over financial reporting that occurred during the quarter (b)ended June 30, 2017 that has materially affected, or is reasonably likely to materially affect, Federated's internal control over financial reporting.

Item 1. Legal Proceedings

Information regarding this Item is contained in Note (12) to the Consolidated Financial Statements.

Item 1A. Risk Factors

There are no material changes to the risk factors included in Federated's Annual Report on Form 10-K for the year ended December 31, 2016.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) The following table summarizes stock repurchases under Federated's share repurchase program during the second quarter of 2017.

	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ¹	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs ¹
April ²	48,950	\$ 22.10	40,000	3,351,916
May ²	471,324	25.49	462,608	2,889,308
June	60,000	26.46	60,000	2,829,308
Total	580,274	\$ 25.30	562,608	2,829,308

¹ In October 2016, the board of directors authorized a share repurchase program that allows Federated to buy back up to 4.0 million shares of Federated Class B common stock with no stated expiration date. No other programs existed as of June 30, 2017. See Note (10) to the Consolidated Financial Statements for additional information on this program.

² In April and May of 2017, 8,950 and 8,716 shares, respectively, of restricted stock with a weighted-average price of \$3.00 per share and \$2.96 per share, respectively, were repurchased as employees forfeited restricted stock.

Item 6. Exhibits

The following exhibits required to be filed or furnished by Item 601 of Regulation S-K are filed or furnished herewith and incorporated by reference herein:
