LEXARIA CORP.
NOTES TO THE FINANCIAL STATEMENTS
July 31, 2013
(Expressed in U.S. Dollars)
(Unaudited)

1. Basis of Presentation

The unaudited interim financial statements for the nine months ended July 31, 2013 included herein have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with United States generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. These unaudited interim financial statements should be read in conjunction with the October 31, 2012 audited annual financial statements and notes thereto.

2. Organization and Business

The Company was formed on December 9, 2004 under the laws of the State of Nevada and commenced operations on December 9, 2004. The Company is an independent natural gas and oil company engaged in the exploration, development and acquisition of oil and gas properties in the United States and Canada. The Company's entry into the oil and gas business began on February 3, 2005. The Company has offices in Vancouver and Kelowna, BC, Canada.

These financial statements have been prepared in accordance with United States generally accepted accounting principles applicable to a going concern, which contemplates the realization of assets and the satisfaction of liabilities and commitments in the normal course of business. The Company has incurred an operating loss and required additional funds to maintain its operations. Management's plans in this regard are to raise equity and/or debt financing as required.

These conditions raise substantial doubt about the Company's ability to continue as a going concern. These financial statements do not include any adjustment that might result from this uncertainty.

3. Business Risk and Liquidity

The Company is subject to several categories of risk associated with its operating activities. Natural gas and oil exploration and production is a speculative business and involves a high degree of risk. Among the factors that have a direct bearing on the Company's financial information are uncertainties inherent in estimating natural gas and oil reserves, future hydrocarbon production and cash flows, particularly with respect to wells that have not been fully tested and with wells having limited production histories; access and cost of services and equipment; and the presence of competitors with greater financial resources and capacity.

4. Significant Accounting Policies

a) Principles of Accounting

These financial statements are stated in U.S. dollars and have been prepared in accordance with U.S. generally accepted accounting principles.

b) New Accounting Pronouncements

In January 2013, the FASB issued ASU No. 2013-01, Balance Sheet (Topic 210): Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities. The new guidance clarifies the scope of the offsetting disclosures and addresses any unintended consequences as a result of ASU No. 2011-11, Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities. This guidance is effective for fiscal years beginning on or after January 1, 2013, and interim periods within those annual periods. An entity should provide the required disclosures retrospectively for all comparative periods presented. The Company does not believe that the adoption of this guidance will have a material impact on its consolidated financial statements.

In February 2013, the FASB issued ASU No. 2013-02, *Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*. The new guidance requires an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under GAAP to be reclassified in its entirety to net income. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required under GAAP that provide additional detail about those amounts. This guidance is effective for fiscal years beginning on or after December 15, 2012, and interim periods within those annual periods. The Company will adopt this guidance during fiscal 2014, and is currently assessing the impact on its consolidated financial statements.

On February 28, 2013, the FASB issued Accounting Standards Update [ASU] 2013-04, entitled *Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation Is Fixed at the Reporting Date*. The ASU 2013-04 amendments add to the guidance in FASB *Accounting Standards Codification* [FASB ASC] Topic 405, entitled *Liabilities and require* reporting entities to measure obligations resulting from certain joint and several liability arrangements where the total amount of the obligation is fixed as of the reporting date, as the sum of the following:

The amount the reporting entity agreed to pay on the basis of its arrangement among co-obligors.

Any additional amounts the reporting entity expects to pay on behalf of its co-obligors.

On March 4, 2013, the FASB issued ASU 2013-05, *Foreign Currency Matters (Topic 830): Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity* (ASU 2013-05). ASU 2013-05 updates accounting guidance related to the application of consolidation guidance and foreign currency matters. This guidance resolves the diversity in practice about what guidance applies to the release of the cumulative translation adjustment into net income. This guidance is effective for interim and annual periods beginning after December 15, 2013. The Company does not anticipate that these changes will have a material impact on its consolidated financial statements or disclosures.

On April 22, 2013, the FASB issued Accounting Standards Update [ASU] 2013-07, entitled *Liquidation Basis of Accounting*. With ASU 2013-07, the FASB amends the guidance in the FASB *Accounting Standards Codification* [FASB ASC] Topic 205, entitled *Presentation of Financial Statements*. The amendments serve to clarify *when* and *how* reporting entities should apply the liquidation basis of accounting. The guidance is applicable to all reporting entities, whether they are public or private companies or not-for-profit entities. The guidance also provides principles for the recognition of assets and liabilities and disclosures, as well as related financial statement presentation requirements. The requirements in ASU 2013-07 are effective for annual reporting periods beginning after December 15, 2013, and interim reporting periods within those annual periods. Reporting entities are required to apply the requirements in ASU 2013-07 prospectively from the day that liquidation becomes imminent. Early adoption is permitted. The adoption of ASU 2013-07 is not expected to have a material effect on the Company's operating results or financial position.

5. Capital Stock

Share Issuances

As at July 31, 2013, Lexaria Corp. has 16,431,452 shares issued and outstanding. During the nine months period ended July 31, 2013, 1,971,429 warrants expired unexercised.

6. Oil and Gas Properties

(a) Proved properties

Properties		October 31, 2012		Addition	Depletion	July 31, 2013
U.S.A.	Proved property	\$	3,699,535	\$	64,381	\$ (282,533) \$ 3,481,383

(1) Palmetto Point Project

On December 21, 2005, the Company agreed to purchase a 20% working and revenue interest in a 10 well drilling program in Mississippi owned by Griffin & Griffin Exploration for \$700,000. Concurrent with signing the Company paid \$220,000 and January 17, 2006 the Company paid the remaining \$480,000. The Company applied the full cost method to account for its oil and gas properties, seven wells were found to be proved wells, and three wells were found impaired. One of the wells was impaired due to uneconomic life, and the other two wells were abandoned due to no apparent gas or oil shows present. The costs of impaired properties were added to the capitalized cost in determination of the depletion expense.

On September 22, 2006, the Company elected to participate in an additional two-well program in Mississippi owned by Griffin & Griffin Exploration and paid \$140,000. The two wells were found to be proved wells.

On June 23, 2007, the Company acquired an assignment of 10% gross working interest from a third party for \$520,000 secured loan payable. The Company recognized \$501,922 in the oil and gas property.

On October 4, 2007, the Company elected to participate in the drilling of PP F-12-3 in Mississippi by Griffin & Griffin Exploration. The Company had 30% gross working interest and paid \$266,348. On July 31, 2008, the Company accrued and paid an additional cost of \$127,707 for the workovers of wells PP F-12 and PP F-12-3. PP F-12 started production from October 2007, and PP F-12-3 started production from November 2007.

On April 3, 2009, the Company entered into an Asset Purchase Agreement to acquire additional interests in its existing core producing Mississippi oil and gas properties. The Company paid \$40,073.39 to acquire additional 2% working interest in the proven Belmont Lake oil and gas and an additional 10% working interest in potential nearby exploration wells. At this time the total working interest for Belmont Lake is 32%; and total working interest in the exploration wells on approximately 140,000 acres surrounding Belmont Lake in all directions is 60%.

The Company had a short-lived opportunity to acquire additional fractional interests in the Belmont Lake 12-4 well which was expected to be a horizontal well. An unrelated third party did not participate in its right to participate in the 12-4 well, and therefore a share of its interest (a non consent interest) was made available to the other participating parties including Lexaria. On August 28, 2009 and effective on September 1, 2009, to take best advantage of this opportunity, the Company entered into four separate assignment agreements, three of which were with people or companies with related management. The Company received from these four parties proceeds of \$371,608.57 to fund additional interests in this well. As a result, the Company has a 25.84% perpetual gross interest in the well (18.0% net revenue interest); as well as a 5.2% net revenue interest in the non-consent interest. The non-consent interest remains valid until such time as the well produces 500% of all costs and expenses back to the participants in the form of revenue, at which time the non-consent interest ends. Enertopia, a company with related management, had acquired from Lexaria a 6.16% perpetual gross interest in the 12-4 well; David DeMartini, a director of Lexaria, acquired from Lexaria a 5% gross interest in the non-consent interest in the 12-4 well; and Kelowna Resources Group formerly known as 0743608 BC Ltd. a company owned by the President of the Company, acquired from Lexaria a 11.60% gross interest in the non-consent interest in the 12-4 well.

On May 31, 2010, the Company signed a Settlement Agreement with Enertopia Corp., whereby the Company issued 499,893 units at \$0.12 per unit and each unit consists of one restricted common share and one share purchase warrant at \$0.20 per share for a period of two years in exchange for the working interest initially assigned on August 28, 2009.

On June 16, 2010, the Company signed a Settlement Agreement with a third party, who had originally participated in the August 28, 2009, opportunity in the non-consent interest for Belmont Lake 12-4. The Company returned back \$144,063.46 to the third party and cancelled its participation.

On July 29, 2010, the Company had agreed with its Operators at Belmont Lake not to proceed to drill a horizontal 12-4 well. Rather, two of the three proposed vertical wells 12-2, 12-4, or 12-5 were proposed to be drilled. To take best advantage of this opportunity, the Company cancelled all previous agreements relating to August 28, 2009 with respect to Belmont Lake horizontal well 12-4 and entered into three separate assignment agreements, of which all three were with people or companies with related management. The Company received total proceeds of \$324,677.12 to fund additional interests in these wells. As a result, the Company had a 32% perpetual gross interest in the wells (24.0% net revenue interest); as well as a 8% gross interest (6% net revenue interest) in the non-consent interest. The non-consent interest remains valid until such time as the well produces 500% of all costs and expenses back to the participants in the form of revenue, at which time the non-consent interest ends. Emerald Atlantic LLC, a company owned by a director of Lexaria, acquired from Lexaria a 8.74% gross interest in the non-consent interest in two of the three vertical wells; and Kelowna Resources Group formerly known as 0743608 BC Ltd. a company owned by the President of the Company, acquired from Lexaria a 20.79% gross interest in the non-consent interest in the two of the three vertical wells; an advisor to the Company acquired from Lexaria 2.46% gross interest in the non-consent interest in two of the three vertical wells.

The July 29, 2010 agreements were replaced on September 13, 2010, when the Company entered into three separate assignment agreements with Kelowna Resources Group formerly known as 0743608 BC Ltd, solely owned by Director/Officer of the Company; Emerald Atlantic LLC, solely owned by a Director of the Company, and the Senior VP Business Development. (the Assignees), whereby the Assignees have paid a fee of \$408,116 to earn a 24% share of the Company's gross non-perpetual 32% interest in the three oil wells being drilled in Wilkinson County, Mississippi. As a result of the three assignment agreements, Lexaria receives at no cost to the company, a carried interest of 8% in these same rights and benefits. The Company assigns, transfers and sets over to the Assignees, all proportionate rights, interest and benefits in the Assigned Non Perpetual Interest held by or granted to the Assignor in and to the Participation Agreement between the Company and Griffin but limited to a gross 500% revenue payout based on the total amount paid under the Initial Consideration and the Subsequent Consideration after which all rights, interests and benefits cease.

Lexaria entered into an Asset Purchase Agreement dated August 12, 2011, with Brinx Resources Ltd. to acquire 100% of its 10% gross working interest in the oil and gas interests located in Mississippi, USA. By acquiring the additional 10% working interest in Belmont Lake oil and gas field, Lexaria then had 42% working interest in Belmont Lake and retains its existing 60% working interest in the exploration wells on approximately 130,000 acres surrounding Belmont Lake in all directions.

Lexaria has agreed to considerations as follows;

1. \$200,000 on August 12, 2011 (the "Initial Payment") (paid), and
2. \$200,000 on or before November 12, 2011; or interim payments, as agreed, in the amount of \$10,000 per month for up to 3 months following November 12, 2011 with the remaining balance of \$200,000 then due and payable (the "Final Payment"), and, should Lexaria not make the final payment on February 12, 2011 a penalty of \$500 per day (the Penalty Payments) beginning one day after February 12, 2011 and accruing until the balance of the \$200,000 Final Payment is made to the Vendor. Both the Vendor and the Purchaser agreed that, should any Penalty Payments be due, such

Penalty Payments are not deductible from the balance of the \$200,000 Final Payment. As at July 31, 2012, the Company has paid \$230,000, including the Final Payment.

3. 800,000 shares of restricted common stock issued from Lexaria treasury were issued on August 12, 2011.

As of July 31, 2013, additional expenditures of \$64,381 were incurred for workovers.

As of July 31, 2013, the Company's working interest and production in PPF-12-4 and PPF-12-5 well located at Belmont Lake, Mississippi, with carrying values of \$1,000,000, are used as security for the convertible debentures issued on November 30, 2010, December 16, 2010 and December 1, 2011 (see note 7 (b) and (c), with aggregate amount of \$820,000.

(b) Unproved Properties

Properties	July 31, 2013	October 31, 2012
U.S.A.-Unproved properties	\$ 19,293	19,293

(1) Mississippi and Louisiana, USA

The Company entered into an Agreement to acquire a working interest in multiple zones of potential oil and gas production in Mississippi and Louisiana. This Agreement contemplates up to a 50 well drill program for Wilcox and Frio wells, at the Company's option, within the defined area of mutual interest (AMI). The AMI includes over 200,000 gross acres located non-contiguously between Southwest Mississippi and North East Louisiana.

The Company originally agreed to pay 40% of all prospect fees, mineral leases, surface leases, and drilling and completion costs to earn a net 32% of all production from all producible zones to the base of the Frio formation (Frio Targets); and, 30% of all production to the base of the Wilcox formation (Wilcox Targets). All working interests are to be registered in the name of Lexaria Corp and the AMI expires on October 31, 2013 unless additional work is conducted by Lexaria.

The Joint Participation Agreement and Joint Lands Agreements are between Lexaria Corp. and Griffin & Griffin Exploration LLC (G&G) of Jackson, Mississippi.

On June 21, 2007, the Company acquired an additional 10% from a third party for all rights, title and benefits excluding the seven wells drilled under the AMI Agreement between August 3, 2006 and June 19, 2007, specifically wells CMR-USA-39-14, Dixon #1, Faust #1 TEC F-1, CMR/BR F-14, RB F-1 Red Bug #2, BR F-33, and Randall #1 F-4, and any offset wells that could be drilled to any of these specified wells.

On July 26, 2007, the Company acquired 5% from a third party for all rights, title and benefits in the seven wells drilled under the AMI Agreement between August 3, 2006 and June 19, 2007, specifically wells CMR-USA-39-14, Dixon #1, Faust #1 TEC F-1, CMR/BR F-14, RB F-1 Red Bug #2, BR F-33, and Randall #1 F-4, and any offset wells that could be drilled to any of these specified wells.

On April 3, 2009, the Company entered into an Asset Purchase Agreement to acquire additional interests in its existing core producing Mississippi oil and gas properties. The Company paid \$40,073 to acquire an additional 2% working interest in the proven Belmont Lake oil and gas field, and an additional 10% working interest in potential nearby exploration wells. Further, the Company is required to pay \$100 per month for a period of 4 years from the closing. Total working interest for Belmont Lake as of October 31, 2010 is 32%; and total working interest in the exploration wells on approximately 140,000 acres surrounding Belmont Lake in all directions as of October 31, 2010, is 60%.

On December 16, 2010, the Company entered into an assignment agreement with Emerald Atlantic LLC, solely owned by a Director of the Company (the Assignee), whereby the Assignee has paid a fee of \$30,076 to earn 18% of a 4.423% share of the Company's net revenue interest after field operating expenses for a Tuscaloosa well that was subsequently drilled and plugged and abandoned in Wilkinson County.

7. Loan Payable

Notes	Nature	Carrying amounts		
		Original amounts	July 31, 2013	October 31, 2012
		\$	\$	\$
a)	Promissory Note	75,000	75,000	75,000
b)	Convertible debentures	620,000	413,333	610,073
c)	Convertible debentures	200,000	141,667	200,000
d)	Promissory Note	50,000	50,000	50,000
e)	Promissory Note	50,000	12,500	50,000
f)	Promissory Note	657,447	606,190	657,447
Total Outstanding		1,652,447	1,298,690	1,642,520
Loan payable - current		1,652,447	1,298,690	1,642,520
Loan payable - long term		-	-	-

- a) On April 1, 2010, the Company entered into a purchase agreement with CAB Financial Services Ltd., a company controlled by Christopher Bunka, our President, Chief Executive Officer and Director, (Purchaser) for a non-secured promissory note in the amount of \$75,000 (the Promissory Note). The Purchaser agreed to purchase a non-secured 18% interest bearing Promissory Note of our company subject to and upon the terms and conditions of the Purchase Agreement. The Promissory Note is due and payable on April 1, 2012. The Promissory Note may be prepaid in whole or in part at any time prior to April 1, 2012 by payment of 108% of the outstanding principal amount including accrued and unpaid interest. Upon the mature of the Promissory Note, it has been renewed to a month to month basis.

As long as the Promissory Note is outstanding, the Purchaser may voluntarily convert the Promissory Note including accrued and unpaid interest to common shares of our Company at the conversion price of \$0.30 per common share.

The Company did not incur beneficiary conversion charges as the conversion price is greater than the fair value of the Company's equity at the time of issuance.

- b) On November 30, 2010, we closed the first tranche of a private placement offering of convertible debentures in the aggregate amount of \$450,000. The convertible debentures mature on November 30, 2012, subject to forced conversion as set out in the convertible debenture certificate. The convertible debentures pay an interest rate of 12% per annum (on a simple basis) and are convertible at \$0.35 per unit. Each unit is comprised of one share of our common stock and one share purchase warrant. Each warrant entitles the holder thereof to purchase one share at a price of \$0.40 per share up to the earlier of the maturity date of the convertible debenture or one year from conversion of the convertible debenture.

We also entered into a general security agreement with the subscribers, whereby the obligations to repay the convertible debenture are secured by the Company's working interest and production in and only in two oil wells located at Belmont Lake, Mississippi, with carrying value of \$1,000,000 as of October 31, 2012. One director of the Company and Emerald Atlantic LLC, solely owned by the director, subscribed the

convertible debentures with amount of \$50,000.

On December 16, 2010, the Company closed the second tranche of a private placement offering of convertible debentures in the aggregate amount of \$170,000. The convertible debentures mature on November 30, 2012, subject to forced conversion as set out in the convertible debenture certificate. The convertible debentures pay an interest rate of 12% per annum (on a simple basis) and are convertible at \$0.35 per unit. Each unit is comprised of one share of our common stock and one share purchase warrant. Each warrant entitles the holder thereof to purchase one share at a price of \$0.40 per share up to the earlier of the maturity date of the convertible debenture or one year from conversion of the convertible debenture. We also entered into a general security agreement with the subscribers, whereby the obligations to repay the convertible debenture are secured by the same assets for the first tranche of the private placement offering on November 30, 2010. One director of the Company and Emerald Atlantic LLC, solely owned by the director, subscribed the convertible debentures with amount of \$120,000.

The aggregate principal value of the above convertible debentures was \$620,000 and was allocated to the individual components on a relative fair value basis. In addition, because the effective conversion price of the convertible debentures was below the current trading price of the Company's common shares at the date of issuance, the Company recorded a beneficial conversion feature of approximately \$20,000. The value of the warrants and beneficial conversion feature has been recorded as additional paid in capital.

During the nine month period ended July 31, 2013, the Company has paid down the debt by \$196,740 (October 31, 2012: \$nil).

- c) On December 1, 2011, the Company closed a private placement offering of convertible debentures in the aggregate amount of \$200,000. The convertible debentures mature on December 1, 2012, subject to forced conversion as set out in the convertible debenture certificate. The convertible debentures pay an interest rate of 12% per annum (on a simple basis) and are convertible at \$0.35 per unit. Each unit is comprised of one share of our common share and one share purchase warrant. Each warrant entitles the holder thereof to purchase one share at a price of \$0.40 per share up to the earlier of the maturity date of the convertible debenture or one year from conversion of the convertible debenture. We also entered into a general security agreement with the subscribers, whereby the obligations to repay the convertible debenture are secured by the Company's working interest and production in and only in two oil wells located at Belmont Lake, Mississippi, with carrying value of \$1,000,000 as of October 31, 2012. Two directors of the Company, David DeMartini and Christopher Bunka, via CAB Financial Services Ltd, solely owned by the director, subscribed to the convertible debentures with the amount of \$200,000.

The aggregate principal value of the above convertible debentures was \$200,000 and was allocated to the individual components on a relative fair value basis. Because the effective conversion price of the convertible debentures was above the current trading price of the Company's common shares at the date of issuance, beneficial conversion feature is \$Nil, therefore, the amount of \$200,000 was recorded under loan payable.

During the nine month period ended July 31, 2013, the Company has paid down the debt by \$58,333 (October 31, 2012: \$nil).

- d) On March 30, 2012, the Company entered into a loan agreement with Christopher Bunka, our President, Chief Executive Officer and Director, (Lender) for a non-secured promissory note in the amount of \$50,000 (the Promissory Note). The Lender agreed to purchase a non-secured 12% interest bearing Promissory Note of our company subject to and upon the terms and conditions of the agreement. The Promissory Note has a month to month term.
- e) On July 20, 2012, the Company entered into a loan agreement with Christopher Bunka, our President, Chief Executive Officer and Director, (Lender) for a non-secured promissory note in the amount of \$50,000 (the Promissory Note). The Company promises to pay to Lender at the end of every month \$4,166

to be applied against the principal amount outstanding from the date of the Loan Agreement for twelve months, plus interest at the rate of 12% per annum on the outstanding balance.

As of July 31, 2013, the Company has paid down the debt by \$37,500 (October 31, 2012: \$nil).

- f) On October 27, 2008 the Company entered into a Purchase Agreement in the amount of CAD\$900,000 of Notes being purchased by the President (CAD\$400,000), the President's wholly-owned company (CAD\$300,000) and a shareholder (CAD\$200,000) of the Company (Purchasers). The Purchasers agreed to purchase an 18% interest bearing Promissory Note of the Company subject to and upon the terms and conditions of the Purchase Agreement. The Company's obligations to repay the Promissory Note will be secured by certain specified assets of the Company pursuant to a Security Agreement. As long as the Promissory Note is outstanding, the Purchasers may voluntarily convert the Promissory Note to Common Shares at the conversion price of \$0.45 per share of Common Stock. The Promissory Note matures on October 27, 2010 or by mutual agreement by all parties on October 27, 2009.

In connection with the Purchase Agreement, the Company issued a total of 390,000 (1,560,000 pre-consolidation) warrants which two warrants entitle a holder to purchase a common share of the Company of which 195,000 (780,000 pre-consolidation) warrants are eligible at \$0.05 (adjusted price) and 195,000 (780,000 pre-consolidation) warrants are eligible at \$0.05 (adjusted price) per share and expire October 27, 2009 and October 27, 2010, respectively.

The Company did not incur beneficiary conversion charges as the conversion price is greater than the fair value of the Company's equity.

As at the date of the issuance of the above noted Promissory Note, the Company allocated CAD\$21,321 and CAD\$683,559 to warrants (additional paid-in capital) and Promissory Note based on their relative fair value.

On July 10, 2009 the Purchasers converted \$45,000 of the Promissory Note into equity at \$0.05.

On October 27, 2009, 191,000 warrants were exercised for 95,500 common shares.

On October 21, 2010, the Company settled a portion of the debt, namely \$1,625 with the President's wholly-owned company by converting 65,000 warrants into 32,500 common shares of the Company as per Purchase Agreement dated October 27, 2008 at a price of \$0.05 per share.

On October 21, 2010, the Company settled a portion of the debt, namely \$2,167 with the President by converting 86,667 warrants into 43,333 common shares of the Company as per Purchase Agreement dated October 27, 2008 at a price of \$0.05 per share.

On October 21, 2010, the Company entered into an amendment with loan holders to extend the loan to be on a month-to-month basis with the same terms and conditions as pursuant to the amendment.

During the fiscal year of October 31, 2011, the Company has paid down the debt by CAD\$185,000.

During the nine month period ended July 31, 2013, the Company has paid down the principal by \$36,134 (October 31, 2012: \$nil).

- g) On November 22, 2012 the Company entered into an Amendment to existing debt agreements totaling \$930,000, with maturity dates of month to month and December 1, 2012 with CAB Financial Services Ltd., David DeMartini, Emerald Atlantic LLC, and other debt holders of the Company, whereby the various lenders have agreed to modify various terms of the earlier agreements and provide for a final debt repayment schedule ending in December 2013. The Company will repay the debt in twelve equal monthly principal payment, plus interest on the monthly declining balances. The interest rates of the amendment debt are the same as the existing debt agreement.

8. Asset retirement obligations

Remediation, reclamation and mine closure costs are based principally on legal and regulatory requirements. Management estimates costs associated with reclamation of mining properties as well as remediation costs for inactive properties. The Company uses assumptions about future costs, capital costs and reclamation costs. Such assumptions are based on the Company's current mining plan and the best available information for making such estimates. In calculating the present value of the asset retirement obligation the Company used a credit-adjusted risk free interest rate of 10% and a projected mine life of 12 years. On an ongoing basis, management reevaluates its estimates and assumptions; however, actual amounts could differ from those based on such estimates and assumptions.

Changes to the Company's asset retirement obligation on its Palmetto Point project are as follows:

		July 31, 2013	October 31, 2012
Asset retirement obligation beginning balance	\$	59,245	-
Incurred		-	59,245
Asset retirement obligation ending balance		59,245	59,245

9. Related Party Transactions

- (a) For the nine months ended July 31, 2013, the Company paid / accrued \$72,000 to CAB (2012: \$72,000); to Tom Ihrke, the VP of business development, \$90 (2012: \$7,878); and to BKB Management Ltd. (BKB) CAD\$49,500 (2012: CAD\$49,500) for management, consulting and accounting services. CAB is owned by the President of the Company and BKB is owned by the CFO of the Company.

The related party transactions are recorded at the exchange amount established and agreed to between the related parties.

- (b) On October 27, 2008 the Company entered a secured loan agreement in the amount of CAD\$300,000 with CAB (See Note 7f). On July 10, 2009 \$40,000 of the debt was converted to equity. On October 21, 2010, the Company settled a portion of the debt, namely US\$1,625 with CAB by converting 65,000 warrants into 32,500 common shares of the Company as per Purchase Agreement dated October 27, 2008 at a price of \$0.05 per share. On June 28, 2011, the Company paid down CAD \$100,000 of the debt. For the nine months ended July 31, 2013, the Company paid interest expenses of CAD \$20,500 (2012: CAD\$20,500).
- (c) On October 27, 2008 the Company entered a secured loan agreement in the amount of CAD\$400,000 with Christopher Bunka (See Note 7f). On October 21, 2010, the Company settled a portion of the debt, namely \$2,167 with Christopher Bunka by converting 86,667 warrants into 43,333 common shares of the Company as per Purchase Agreement dated October 27, 2008 at a price of \$0.05 per share. For the nine months ended July 31, 2013, the Company paid interest expenses of CAD \$53,707 (2012: CAD\$53,707).
- (d) On April 1, 2010, the Company entered a non-secured loan agreement in the amount of US\$75,000 with CAB (See Note 7a). For the nine months ended July 31, 2013, the Company paid interest expenses of \$10,125 (2012: \$10,125).
- (e) On March 30, 2012, the Company entered a non-secured loan agreement in the amount of US\$50,000 with Chris Bunka. For the nine months ended July 31, 2013, the Company incurred interest expenses of \$4,500 (2012: \$2,000).

- (f) On July 20, 2012, the Company entered a non-secured loan agreement in the amount of US\$50,000 with Chris Bunka. For the nine months ended July 31, 2013, the Company incurred interest expenses of \$3,024 (2012: \$nil) and paid back principal of \$37,500 (2012: \$nil).
- (g) On December 1, 2011, the Company entered into a secured loan agreement in the amount of \$200,000 with two directors of the Company (see Note 7c, g). This loan agreement was amended for another year to repay the debt in twelve equal monthly principal payment, plus interest on the monthly declining balances. The interest rates of the amendment debt are the same as the existing debt agreement. For the year six months ended July 31, 2013, the Company paid/accrued interest expense of \$22,667 (2012: \$10,000).
- (h) Included in accounts payable, \$72,941 (October 31, 2012: \$55,011) was payable to companies controlled by the president, key management personnel and directors of the Company.
- (i) For the nine month ended July 31, 2013, the Company has paid/accrued \$35,552 (2012: \$33,119) to Kelowna Resources Group formerly known as 0743608 BC Ltd.; \$12,692 (2012:\$22,777) to Emerald Atlantic LLC; and, \$4,213 to Tom Ihrke (2012: \$3,475) for their respective Non-consent Interests in Belmont Lake. Kelowna Resources Group, formerly known as 0743608 BC Ltd., is owned by the president of the Company, and Emerald Atlantic LLC is owned by a Director of the Company.
- (j) See Note 5, 6, and 7.

10. Stock Options

On June 18, 2013, the Company granted 500,000 stock options to Officers/Directors/Consultants of the Company with an exercise price of \$0.10, vested immediately, expiring June 18, 2018.

For the nine months ended July 31, 2013, the Company recorded a total of \$21,279 (2012: \$9,589) for stock based compensation expenses.

The fair value of each option granted has been estimated as of the date of the grant using the Black-Scholes option pricing model with the following assumptions:

	Nine months ended July 31, 2013
Expected volatility	142.25%
Risk-free interest rate	1.93%
Expected life	5 years
Dividend yield	0.0%

A summary of the stock options for the nine months ended July 31, 2013 is presented below:

	Options Outstanding	
	Number of Shares	Weighted Average Exercise Price
Balance, October 31, 2012	1,700,000	\$ 0.26
Granted	500,000	0.10
Balance, July 31, 2013	2,200,000	\$ 0.23

The Company has the following options outstanding and exercisable:

July 31, 2013	Options outstanding	Options exercisable
------------------	---------------------	---------------------

Edgar Filing: LEXARIA CORP. - Form 10-Q

Exercise prices	Number of shares	Weighted average remaining contractual life	Weighted average exercise price	Number of shares	Weighted average exercise price
\$0.20	150,000	2.04 years	\$ 0.20	150,000	\$ 0.20
\$0.20	850,000	1.47 years	\$ 0.20	850,000	\$ 0.20
\$0.35	700,000	2.95 years	\$ 0.35	700,000	\$ 0.35
\$0.10	500,000	4.88 years	\$ 0.10	500,000	\$ 0.10
Total	2,200,000	2.76 years	\$ 0.23	2,200,000	\$ 0.23

11. Commitments, Significant Contracts and Contingencies

On November 27, 2008, the Company entered into a Consulting Agreement with CAB Financial Services Ltd. for consulting services of CAB on a continuing basis for a consideration of US\$8,000 per month plus GST.

On May 12, 2009 the Company entered into a consulting agreement with BKB Management Ltd. to act as the Chief Financial Officer and a Director for an initial period of six months for consideration of CAD \$4,500 per month plus GST. This agreement replaces the September 1, 2008, Controller Agreement with CAB Financial Services Ltd. Subsequent to October 31, 2010, effective January 1, 2011, the consideration was increased to CAD\$5,500 per month plus GST/HST.

On August 5, 2010 we entered into a three-month Management agreement with Tom Ihrke, whereby Mr. Ihrke will act as the Senior Vice-President, Business Development for the Company for consideration of \$3,125 per month. On December 2, 2010, the Company entered into a month to month management agreement with Tom Ihrke, where by Mr. Ihrke will continue to act as the Senior Vice-President Business Development for the Company. On October 3, 2011 Mr. Ihrke and the Company amended the agreement whereby his title changed to Manager, Business Development. The Company will pay a monthly consulting fee of \$3,125. Effective January 15, 2012, payment for the consulting agreement has decreased to \$10 a month.

On July 1, 2013, the Company entered into a 2 year lease for the Kelowna office with monthly rental rate of \$1,652 including GST.

See also Note 6 and 7.

12. Segmented Information

The Company's business is considered as operating in one segment (Oil and gas in the United States) based upon the Company's organizational structure, the way in which the operation is managed and evaluated, the availability of separate financial results and materiality considerations.

13. Subsequent Events

On August 23, 2013, the Company entered in to a six month agreement with Carmel Advisors LLC to assist the Company with the development and implementation of a public and investor relations and communications program, and provide ongoing assistance to the Company regarding the development and enhancement of the Company's public and market image. The Company will issue 160,000 restricted shares at a deemed price of \$0.08 per share to Camel Advisors LLC for their services as compensation.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This quarterly report contains forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. These statements relate to future events or our future financial performance. In some cases, you can identify forward-looking statements by terminology such as "may", "should", "expects", "plans", "anticipates", "believes", "estimates", "predicts", "potential" or "continue" or the negative of these terms or other comparable terminology. These statements are only predictions and involve known and unknown risks, uncertainties and other factors, including the risks in the section entitled "Risk Factors", that may cause our or our industry's actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. Except as required by applicable law, including the securities laws of the United States, we do not intend to update any of the forward-looking statements to conform these statements to actual results.

Our unaudited interim financial statements are stated in United States Dollars (US\$) and are prepared in accordance with United States Generally Accepted Accounting Principles. The following discussion should be read in conjunction with our financial statements and the related notes that appear elsewhere in this quarterly report. The following discussion contains forward-looking statements that reflect our plans, estimates and beliefs. Our actual results could differ materially from those discussed in the forward looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed below and elsewhere in this quarterly report, particularly in the section entitled "Risk Factors" of this quarterly report.

In this quarterly report, unless otherwise specified, all dollar amounts are expressed in United States dollars. All references to "CAD\$" refer to Canadian dollars and all references to "common shares" refer to the common shares in our capital stock.

As used in this quarterly report, the terms "we", "us", "our" and "Company" mean Company and/or our subsidiaries, unless otherwise indicated.

Overview

We were incorporated in the State of Nevada on December 9, 2004. We are an exploration and development oil and gas company currently engaged in the exploration for and development of petroleum and natural gas in North America. We maintain our registered agent's office and our U.S. business office at Nevada Agency and Transfer Company, 50 West Liberty, Suite 880, Reno, Nevada 89501. Our telephone number is (755) 322-0626.

The address of our principal executive office is Suite 950, 1130 West Pender Street, Vancouver, British Columbia V6E 4A4. Our telephone number is (604) 602-1675. We have another office located in Kelowna. Our current locations provide adequate office space for our purposes at this stage of our development.

Our common stock is quoted on the OTC Bulletin Board under the symbol "LXRP" and on the Canadian National Stock Exchange under the symbol LXX

Lexaria is an oil and gas company engaged in the exploration for oil and natural gas in Canada and the United States. The Company is currently generating revenues from its business operations in Mississippi. The Company's business plan is to focus on development of the Belmont Lake oil field, in which it has working interests, in order to maximize cash flow and use excess cash flow to pay debt and conduct additional development well drilling. Eventually, if cash flows are strong enough, the Company will once again be able to explore for additional oil and gas by way of its existing 60% interest option to drill 38 exploratory wells (see Oil & Gas Properties - Mississippi and Louisiana: Frio-Wilcox Project). To accomplish this, the Company intends to focus on development drilling first. Eventually the Company will seek a balance between exploration, development and exploitation drilling. To achieve sustainable and profitable growth, the Company intends to control the timing and costs of its projects wherever possible. The Company is not currently the operator of any of its properties and will consider becoming the operator only when its financial conditions have improved sufficiently.

Due to the implementation of British Columbia Instrument 51-509 on September 30, 2008 by the British Columbia Securities Commission, we have been deemed to be a British Columbia based reporting issuer. As such, we are required to file certain information and documents at www.sedar.com.

Our Current Business

The Company is an oil and gas company engaged in the exploration for oil and natural gas in Canada and the United States. The Company is currently generating revenues from its business operations in Mississippi.

We have acquired working interests in various oil and gas properties in Mississippi USA. All of our current oil and gas assets are located in Wilkinson and Amite counties, Mississippi, where we have between 42% gross working interest and 60% gross working interests in producing oil and/or gas wells and in exploration wells yet to be drilled. Our Belmont Lake oil field discovered in December 2006 is located within the Palmetto Point area of Wilkinson County, Mississippi. We previously had an interest in oil and gas wells located in Oklahoma but those assets were sold in August 2008. We previously had a nominal interest in a non-commercial well located in Strachan Alberta, but during this quarter, that lease expired and has now been written down.

The Company's business plan is to focus on development of the Belmont Lake oil field, in which it has working interests, in order to maximize cash flow and use excess cash flow to pay debt and conduct additional development well drilling. Eventually, if cash flows are strong enough, the Company expects to explore for additional oil and gas by way of its existing 60% interest option to drill 38 exploratory wells (see Oil & Gas Properties - Mississippi and Louisiana: Frio-Wilcox Project). To accomplish this, the Company intends to focus on development drilling first. Eventually the Company will seek a balance between exploration, development and exploitation drilling. To achieve sustainable and profitable growth, the Company intends to control the timing and costs of its projects wherever possible. The Company is not currently the operator of any of its properties and will consider becoming the operator

only when its financial conditions have improved sufficiently.

During the nine month period ended July 31, 2013, we experienced the following significant corporate developments:

On November 22, 2012 the Company entered into an Amendment to existing debt agreements totaling \$930,000, with maturity dates of month to month and December 1, 2012 with CAB Financial Services Ltd., David DeMartini, Emerald Atlantic LLC, and other debt holders of the Company, whereby the various lenders have agreed to modify various terms of the earlier agreements and provide for a final debt repayment schedule ending in December 2013. The Company will repay the debt in twelve equal monthly principal payment, plus interest on the monthly declining balances. The interest rates of the amendment debt are the same as the existing debt agreement.

On April 17, 2013, the Company had its Annual General Meeting. Certain motions were approved and adopted:

Re-Election of Chris Bunka, Bal Bhullar, David DeMartini, Nicholas Baxter and Dustin Elford as directors, approved with the following:

Nominee	For	Against	Withheld
Chris Bunka	3,684,042	NIL	4,675
Bal Bhullar	3,684,542	NIL	4,175
David DeMartini	3,684,542	NIL	4,175
Nicolas Baxter	3,687,042	NIL	1,675
Dustin Elford	3,687,042	NIL	1,675

- Ratification of MNP LLP our independent registered public accounting firm for the fiscal year ending October 31, 2013 and to allow directors to set the remuneration, approved with 4,582,651 votes for, 219,509 votes against and 1 vote absent.

On June 18, 2013, based on this original 2010 Stock Option Plan, the Company has granted additional 500,000 stock options to Directors and Officers, and a consultant of the Company. The exercise price of the stock options were US\$0.10, vested immediately and expire on June 18, 2018.

The Company plans to continue its current business of acquiring interests in potentially high-impact oil and gas property interests that offer a high probability of being able to drill without significant time delays. The Company also tries to choose North American properties where, if drilling is successful, the wells could be quickly connected to infrastructure and thus, with success, brought into production and able to generate cash flow as quickly as possible.

The Company has also investigated the viability of monetizing some of its oil assets and will continue to assess the business environment in order to maximize any possible return to all Company stakeholders.

The Company's business plan does not anticipate that it will hire a large number of employees or that it will require extensive office space. The Company has to date, and plans to continue to acquire most of the industry and geological expertise it requires, through third party contractual relationships with consulting experts and with operating companies which will act as operators of the Company's various interests. Although this exposes the Company to certain risks on behalf of those operators, it also allows the Company to participate in the often unique experience and knowledge that local persons have related to certain properties. This strategy allows the Company to participate in a wider variety of oil and gas opportunities than if all of its geological expertise were in-house and confined to a single geographical area. From a business operations perspective, this strategy also enables the Company to minimize its ongoing fixed in-house costs for geological or geophysical analytical expenses while still allowing it to contract for that expertise when and as needed. This business strategy has been successful during a time of declining oil and gas prices, when many companies with high internal overheads and cost structures due to large numbers of highly expensive in-house professionals cannot be sustained due to declining revenues. The Company will hire third-party consulting geophysicists and geologists on an as-needed basis to evaluate oil and gas properties that may be of interest, and to reinforce and double-check the technical work and abilities of its third-party operators. This provides the Company with the required expertise it needs, when it is needed, whilst avoiding high fixed long-term costs.

The Company relies on the business experience of its existing management, on the technical abilities of consulting experts, and on the technical and operational abilities of its operating partner companies to evaluate business opportunities.

Mississippi

On December 21, 2005, the Company agreed to purchase a 20% gross working and revenue interest in a 10 well drilling program in Palmetto Point, Mississippi owned by Griffin & Griffin Exploration (Griffin) for cash payments of \$700,000, comprised of \$220,000 paid upon entering the Agreement and the remaining balance of \$480,000 paid on January 17, 2006. The Company applied the full cost method to account for its oil and gas properties and as of July 31, 2010, seven wells were found to be proved wells, and three wells were found impaired. One of the wells was impaired due to uneconomic life, and the other two wells were abandoned due to no apparent gas or oil shows present. The costs of impaired properties were added to the capitalized cost in determination of the depletion expense. Palmetto Point is approximately 150 miles southwest of Jackson, Mississippi and approximately 50 miles north/northwest of Baton Rouge, Louisiana. It is 30 miles west of Woodville, Mississippi off of State Highway 33 and is entirely within Wilkinson County.

There were no further costs to the Company in earning its interest in the 10 well drilling program, including well development costs or pipeline connections. Griffin has agreed that the leases held by it covering any mineral estate underlying the applicable well site acreage shall not provide for more than twenty-five (25%) percent royalty and overriding royalty interest. The Company's net interest in any oil and gas produced is calculated by subtracting the applicable royalties from its 20% gross interest. Consequently, its original net working interest in the drilling program was a minimum fifteen (15%) percent net working interest. Griffin conducted the Drilling Program in its capacity as Operator and receives a 15% carried interest.

One of these original 10 wells was the PP F-12-1 well, which was the discovery well of a field now known as the Belmont Lake field. All of these original 10 wells were targeting the Frio geological formation of the Cenozoic era and Oligocene series, which is characterized in this region as a generally shallow, sandstone-rich layer. In this area of Mississippi, the Frio geologic formation is generally found between 2,000 and 4,500 foot depth from surface.

On September 22, 2006, the Company elected to participate in an additional two-well program in Palmetto Point, Mississippi owned by Griffin by paying an additional \$140,000 (paid). The Company earned the same 20% gross interest in the two (2) additional wells (12 wells total and all drilled) and subsequently increased its gross interest to 32% in these 12 wells, or a net revenue interest of 20.802815% .

On June 23, 2007, the Company acquired an assignment of a 10% gross working interest in the Palmetto Point wells described above from a third party for \$520,000 which was payable by a secured loan. The \$520,000 loan was valued at a Net Present Value of \$501,922, which is the capitalized amount. The Company calculated the net present value of the secured loan payable by applying 8% interest rate, which was based on a T-bill rate of 4.28% plus a risk premium.

On October 4, 2007, the Company elected to participate in the drilling of the PP F-12-3 well in Palmetto Point, Mississippi which was conducted by Griffin. This well was the second well drilled in the Belmont Lake oil field. The Company had a 30% gross working interest and paid \$266,348. On July 31, 2008, the Company accrued and paid an additional cost of \$127,707 for the workovers of wells PP F-12 and PP F-12-3. PP F-12 has had intermittent production from October 2007, and PP F-12-3 has had intermittent production from November 2007.

On April 3, 2009, the Company entered into an Asset Purchase Agreement with Delta Oil & Gas, Inc., and The Stallion Group to acquire additional interests in its existing core producing Mississippi oil and gas properties. The Company paid \$40,073.39 to acquire an additional two percent (2%) working interest in the proven Belmont Lake oil and gas field and an additional 10% working interest in potential nearby exploration wells. Total working interest for Belmont Lake as of July 31, 2009 is 32%; and total working interest in the exploration wells on approximately

140,000 acres surrounding Belmont Lake in all directions as of July 31, 2010, is 60%.

The Company had a short-lived opportunity to acquire additional fractional interests in the upcoming Belmont Lake 12-4 well which was expected to be a horizontal well. An unrelated third party did not participate in its right to participate in the 12-4 well, and therefore a share of its interest (a non consent interest) was made available to the other participating parties including Lexaria. On August 28, 2009 and effective on September 1, 2009, to take best advantage of this opportunity, the Company entered into four separate assignment agreements, three of which were with people or companies with related management. The Company received from these four parties proceeds of \$371,608.57 to fund additional interests in this well. As a result, the Company has a 25.84% perpetual gross interest in the well (18.0% net revenue interest); as well as a 5.2% net revenue interest in the non-consent interest. The non-consent interest remains valid until such time as the well produces 500% of all costs and expenses back to the participants in the form of revenue, at which time the non-consent interest ends. Enertopia, a company with related management, had acquired from Lexaria a 6.16% perpetual gross interest in the 12-4 well; David DeMartini, a director of Lexaria, had acquired from Lexaria a 5% gross interest in the non-consent interest in the 12-4 well; and Kelowna Resources Group formerly known as 0743608 BC Ltd. a company owned by the President of the Company, had acquired from Lexaria a 11.60% gross interest in the non-consent interest in the 12-4 well.

On May 31, 2010, the Company signed a Settlement Agreement with Enertopia Corp., whereby the Company issued 499,893 units at \$0.12 per unit and each unit consists of one restricted common share and one share purchase warrant at \$0.20 per share for a period of two years in exchange for the working interest initially assigned on August 28, 2009.

On June 16, 2010, the Company signed a Settlement Agreement with a third party, who had originally participated in the August 28, 2009, opportunity in the non-consent interest for Belmont Lake 12-4. The Company returned back \$144,063 to the third party and cancelled its participation.

On July 29, 2010, the Company had agreed with its Operators at Belmont Lake not to proceed to drill a horizontal 12-4 well. Rather, two of the three proposed vertical wells 12-2, 12-4, or 12-5 were proposed to be drilled in August 2010. To take best advantage of this opportunity, the Company cancelled all previous agreements relating to August 28, 2009 with respect to Belmont Lake horizontal well 12-4 and entered into three separate assignment agreements, of which all three were with people or companies with related management. The Company received total proceeds of \$324,677 to fund additional interests in these wells. As a result, the Company has a 32% perpetual gross interest in the wells (24.0% net revenue interest); as well as a 8% gross interest (6% net revenue interest) in the non-consent interest. The non-consent interest remains valid until such time as the well produces 500% of all costs and expenses back to the participants in the form of revenue, at which time the non-consent interest ends. Emerald Atlantic LLC, a company owned by a director of Lexaria, has acquired from Lexaria a 8.74% gross interest in the non-consent interest in two of the three vertical wells; and Kelowna Resources Group formerly known as 0743608 BC Ltd. a company owned by the President of the Company, has acquired from Lexaria a 20.79% gross interest in the non-consent interest in two of the three vertical wells; an advisor to the Company has acquired from Lexaria 2.46% gross interest in the non-consent interest in two of the three vertical wells.

On September 13, 2010, Lexaria Corp. (the Company) entered into three separate assignment agreements, replacing the July 29, 2010 agreements with Kelowna Resources Group formerly known as 0743608 BC Limited, solely owned by a Director/Officer of the Company; Emerald Atlantic LLC, solely owned by a Director of the Company, and the Senior VP Business Development. (the Assignees), whereby the Assignees have paid a fee of US\$408,116.48 to earn a 24% share of the Company s gross non-perpetual 32% interest in the three oil wells being drilled in Wilkinson County, Mississippi. As a result of the three assignment agreements, Lexaria receives at no cost to the company, a carried interest of 8% in these same rights and benefits. The Company assigns, transfers and sets over to the Assignees, all proportionate rights, interest and benefits in the Assigned Non Perpetual Interest held by or granted to the Assignor in and to the Participation Agreement between the Company and Griffin but limited to a gross 500% revenue payout based on the total amount paid under the Initial Consideration and the Subsequent Consideration after which all rights, interests and benefits cease.

Total working interest for Belmont Lake as of October 31, 2010 is 32%, with the exception of a 40% interest in wells PP F-12-4 and PP F-12-5; and total working interest in the exploration wells on approximately 130,000 acres surrounding Belmont Lake in all directions as of October 31, 2010, is 60%.

Edgar Filing: LEXARIA CORP. - Form 10-Q

As of July 31, 2013, there were additional well interest changes or workovers in the amount of \$64,381. The Company is working towards completing all outstanding plug and abandonment programs on all historic wells in Mississippi in which it has participated, and expects that work to be completed during the 2013 fiscal year.

As of July 31, 2013, the status of the Palmetto Point, Mississippi wells is as follows:

Well Name	Spud/Start	Complete	Results	Depth	Status
PP F- 29	Nov 11/06	Nov. 14/06	Frio Gas; 37 ft.	4100	Temporarily Suspended
PP F-12-1	Dec 18/06	Dec. 24/06	Frio Gas; 3 ft. Frio Oil, 26 ft.	4016	Producing
PP F-12-3	Oct/07	Oct/07	Frio Oil	3150	Producing
PP F-12-4	Aug/10	Oct/10	Frio Oil	3150	Producing
PP F-12-5	Sep 12/10	Nov 23/10	Frio Oil	3150	Producing

Mississippi and Louisiana: Frio-Wilcox Project

After participating in the Palmetto Point project, the Company entered into a separate agreement that expanded both its percentage interest in future wells, and also expanded the geographical area on which those wells could be drilled.

On August 3, 2006, the Company entered into a Phase II agreement with Griffin, to acquire a working interest in multiple zones of potential oil and gas production in Mississippi and Louisiana. This agreement contemplates up to a 50 well drill program, which are exclusive to the participants, for Wilcox and Frio wells, at the Company's option, within the defined area of mutual interest (AMI). From these 50 prospects, Griffin and the participants will select all drill locations with the expectation that the wells will be drilled to depths sufficient to test prospectively for producible hydrocarbons from the top of the Frio Formation to the bottom of the Wilcox Formation.

These 50 wells are in addition to all wells drilled under the original 10-well agreement and also in addition to any development wells to be drilled at the Belmont Lake oil field discovery. The AMI includes over 130,000 gross acres located non-contiguously between Southwest Mississippi and North East Louisiana which include the approximately 32,000 acres of the Palmetto Point area but also include other areas.

The Company had contracted to assume a 40% gross interest in this AMI, meaning it was obligated to pay 40% of costs related to licensing, permitting, drilling, completion and all other related costs. Upon payment of 40% of the costs, the Company earned a net 32% of all production from all producible zones to the base of the Frio formation (Frio Targets); and, 30% of all production to the base of the Wilcox formation (Wilcox Targets). All working interests are to be registered in the name of the Company. This 50-well AMI is intended to be drilled in several stages.

The Company's pro rate share of the first stage had a total cost \$1.6 million. As of October 31 2007, the Company had placed \$1,600,000 in trust to completely fund this initial commitment. During the drill program, an unrelated third party participant elected not to continue their participation in the program, and we assumed our pro-rata portion of their 10% gross working interest as our own, at no additional cost, bringing our total gross working interest in the seven (7) wells and their leases (Initial AMI Drilling Program), to 45%.

On June 21, 2007, the Company acquired an additional 10% from a third party for all rights, title and benefits *excluding* the seven wells drilled under the AMI Agreement between August 3, 2006 and June 19, 2007, specifically wells CMR-USA-39-14, Dixon #1, Faust #1 TEC F-1, CMR/BR F-14, RB F-1 Red Bug #2, BR F-33, and Randall #1

F-4, and any offset wells that could be drilled to any of these specified wells (Subsequent AMI Drilling Program). This brought our interest in the remaining 43 wells to 50% and we drilled 5 wells under this arrangement.

On April 3, 2009, the Company acquired an additional 10% working interest in the 38 exploration wells remaining to be drilled, bringing its total gross working interest to 60% in the 38 wells that remain to be drilled of this original 50-well option in over 140,000 acres surrounding Belmont Lake in all directions. This AMI expires on October 31, 2013 unless Lexaria conducts certain additional work before then.

On December 16, 2010, the Company entered into an assignment agreement with Emerald Atlantic LLC, solely owned by a Director of the Company (the Assignee), whereby the Assignee has paid a fee of US\$30,076 to earn 18% of a 4.423% share of the Company's net revenue interest after field operating expenses for a Tuscaloosa well subsequently drilled, plugged and abandoned in Wilkinson County.

Initial AMI Drilling Program

The Company's pro rata share of the first stage had a total cost \$1.6 million. As of October 31 2007, the Company had placed \$1,600,000 in trust to completely fund this initial commitment. During the drill program, an unrelated third party participant elected not to continue their participation in the program, and we assumed our pro-rata portion of their 10% gross working interest as our own, at no additional cost, bringing our total gross working interest in these seven (7) drilled wells and their leases, to 45%.

The Company successfully drilled and completed seven (7) wells under this drilling program. Certain wells were placed into production.

Subsequent AMI Drilling Program

Five additional wells were drilled under the 50-well AMI. Each of these wells encountered non commercial quantities of hydrocarbons and were plugged and abandoned.

Significant Acquisitions and Dispositions

None applicable.

Purchase of Significant Equipment

We do not intend to purchase any significant equipment (excluding oil and gas activities) over the twelve months other than office computers, furnishings, and communication equipment as required.

Corporate Offices

The address of our principal executive office is Suite 950, 1130 West Pender Street, Vancouver, British Columbia, V6E 4A4, for which we share 250 square feet of office space, which includes one executive office for a monthly rental of CAD\$1,337. Our telephone number is (604) 602-1675. We have another office located in Kelowna, for which we have 1,500 square feet of office space, which includes four executive offices for a monthly rate of CAD\$1,652. Our current locations provide adequate office space for our purposes at this stage of our development.

Employees

We primarily used the services of sub-contractors and consultants for manual labour exploration work and drilling on our properties. Our Director, Mr. David DeMartini is our technical advisor.

The Company has a consulting agreement with BKB Management Ltd., a corporation organized under the laws of the Province in British Columbia. BKB Management Ltd. is a consulting company controlled by the chief financial officer and director for a consideration of CAD \$5,500 per month plus HST.

The Company has a consulting agreement with CAB Financial Services Ltd., a corporation organized under the laws of the Province of British Columbia. CAB Financial Services is a consulting company controlled by the chairman of the board and the chief executive officer of the Company. The consulting services provided by CAB Financial Services are on a continuing basis for a consideration of \$8,000 per month plus HST. CAB Financial Services Ltd.

may terminate the agreement at any time by giving 30 days written notice.

On September 9, 2009, the Company appointed Mr. David DeMartini to the Board of Directors.

On August 6, 2010 the Company entered into a three month consulting agreement with Tom Ihrke to act as the Company's Senior Vice President, Business Development for consideration of US\$3,125 per month and 150,000 stock options granted at \$0.20. On December 2, 2010, the Company entered into a month to month management agreement with Tom Ihrke, where by Mr. Ihrke will continue to act as the Senior Vice-President Business Development for the Company. The Company paid a monthly consulting fee of \$3,125. Effective January 15, 2012, the consulting agreement has been decreased to \$10 a month.

We do not expect any material changes in the number of employees over the next 12 month period. We do and will continue to outsource contract employment as needed. However, with project advancement and if we are successful in our initial and any subsequent drilling programs we may retain additional employees.

Off-Balance Sheet Arrangements

We have no significant off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to stockholders.

Critical Accounting Policies

Our financial statements and accompanying notes are prepared in accordance with generally accepted accounting principles used in the United States. Preparing financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, and expenses. These estimates and assumptions are affected by management's application of accounting policies. We believe that understanding the basis and nature of the estimates and assumptions involved with the following aspects of our financial statements is critical to an understanding of our financials.

Oil and Gas Properties

We utilize the full cost method to account for our investment in oil and gas properties. Accordingly, all costs associated with acquisition, exploration and development of oil and gas reserves, including such costs as leasehold acquisition costs, capitalized interest costs relating to unproved properties, geological expenditures, and tangible and intangible development costs including direct internal costs are capitalized to the full cost pool. As of July 31, 2013, we have properties with proven reserves and production and sales from these reserves has commenced. Capitalized costs, including estimated future costs to develop the reserves and estimated abandonment costs, net of salvage, are being depleted on the units-of-production method using estimates of the proved reserves. Investments in unproved properties and major development projects including capitalized interest, if any, are not depleted until proved reserves associated with the projects can be determined. If the future exploration of unproved properties are determined uneconomical the amount of such properties are added to the capitalized cost to be depleted. At July 31, 2013, management believes none of our unproved oil and gas properties were considered impaired other than as previously reported.

The capitalized costs included in the full cost pool are subject to a "ceiling test", which limits such costs to the aggregate of the estimated present value, using a ten percent discount rate, of the future net revenues from proved reserves, based on current economic and operating conditions plus the lower of cost and estimated net realizable value of unproven properties.

Sales of proved and unproved properties are accounted for as adjustments of capitalized costs with no gain or loss recognized, unless such adjustments would significantly alter the relationship between capitalized costs and proved reserves of oil and gas, in which case the gain or loss is recognized in the statement of operations.

Long-Lived Assets

In accordance with FASB ASC 360 Section S45, "Accounting for the Impairment or Disposal of Long-Lived Assets", the carrying value of intangible assets and other long-lived assets is reviewed on a regular basis for the existence of facts or circumstances that may suggest impairment. We recognize impairment when the sum of the expected undiscounted future cash flows is less than the carrying amount of the asset. Impairment losses, if any, are measured as the excess of the carrying amount of the asset over its estimated fair value.

Revenue Recognition

Oil and natural gas revenues are recorded using the sales method whereby our Company recognizes oil and natural gas revenue based on the amount of oil and gas sold to purchasers when title passes, the amount is determinable and collection is reasonably assured. Actual sales of gas are based on sales, net of the associated volume charges for processing fees and for costs associated with delivery, transportation, marketing, and royalties in accordance with industry standards. Operating costs and taxes are recognized in the same period of which revenue is earned.

Going Concern

We have suffered recurring losses from operations. The continuation of our Company as a going concern is dependent upon our Company attaining and maintaining profitable operations and/or raising additional capital. The financial statements do not include any adjustment relating to the recovery and classification of recorded asset amounts or the amount and classification of liabilities that might be necessary should our Company discontinue operations.

The continuation of our business is dependent upon us raising additional financial support and/or attaining and maintaining profitable levels of internally generated revenue. The issuance of additional equity securities by us could result in a significant dilution in the equity interests of our current stockholders. Obtaining commercial loans, assuming those loans would be available, will increase our liabilities and future cash commitments.

Recently Issued Accounting Standards

In December 2011, the FASB issued new accounting guidance for disclosures about offsetting assets and liabilities which requires an entity to disclose information about financial instruments that have been offset and related arrangements to enable users of its financial statements to understand the effect of those arrangements on its financial position. Entities will be required to provide both net (offset amounts) and gross information in the notes to the financial statements for relevant assets and liabilities that are offset. The new guidance is effective for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. The Company expects to adopt this guidance in fiscal year 2013 and does not believe it will have a significant impact on its results of operations, financial condition and cash flows.

In February 2013, the FASB issued new accounting guidance to improve the reporting of reclassifications out of accumulated other comprehensive income. Under the guidance, an entity is required to provide information about the amounts reclassified out of accumulated other comprehensive income (AOCI) by component. In addition, an entity is required to present, either on the face of the financial statements or in the notes, significant amounts reclassified out of AOCI by the respective line items of net income, but only if the amount reclassified is required to be reclassified in its entirety in the same reporting period. For amounts that are not required to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures that provide additional details about those amounts. The guidance did not change the requirements for reporting net income or other comprehensive income in the financial statements. The new guidance is effective for annual reporting periods beginning on or after December 15, 2012, and interim periods within those annual periods. The Company expects to adopt this guidance in fiscal year 2014 and does not believe it will have a significant impact on its results of operations, financial condition and cash flows.

Accounting standards that have been issued or proposed by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on the Company's financial statements upon adoption.

Results of Operations Three Months Ended July 31, 2013 and 2012

The following summary of our results of operations should be read in conjunction with our financial statements for the quarter ended July 31, 2013, which are included herein.

Our operating results for the three months ended July 31, 2013, for the three months ended July 31, 2012 and the changes between those periods for the respective items are summarized as follows:

		Three Months Ended July 31, 2013		Three Months Ended July 31, 2012		Change Between Three Months Period Ended July 31, 2013 and July 31, 2012
Revenue	\$	251,481	\$	494,483	\$	(243,002)
General and administrative		133,820		197,012		(63,192)
Interest expense		41,692		58,806		(17,114)
Consulting fees		46,407		52,936		(6,529)
Cost of Revenue		175,330		229,349		(54,019)
Oil and gas operating expenses		92,813		56,586		36,227
Professional Fees (legal and audit fees)		3,779		61,263		(57,484)
Net Income (Loss)		(57,669)		68,122		(125,791)

Our accumulated losses increased to \$4,931,409 as of July 31, 2013. Our financial statements report a net loss of \$57,669 for the three month period ended July 31, 2013 compared to a net income of \$68,122 for the three month period ended July 31, 2012. Our revenues have decreased for the three month period ended July 31, 2013 compared to the three month period ended July 31, 2012, by \$243,002. During the period ended July 31, 2012 the oil field enjoyed flush production from the 12-1 and 12-3A wells as a result of workovers completed during that period, and that flush production will not be repeated from those well. As a result there are lower production volumes for wells 12-1 and 12-3A. Additionally, wells 12-4 and 12-5 did not operate for several weeks during the 2013 period due to maintenance and repairs. Our General and administrative costs in the three month period ending July 31, 2013 were lower by \$63,192 than the year-earlier period. This is primarily due to a decrease in professional fees, investor relations, filing fees, interest expense and travel.

The cost of revenue was \$175,330 for the three month period ended July 31, 2013, compared to \$229,349 for the three month period ended July 31, 2012; the decrease in cost of revenue in the current period is largely due to decreased depletion costs. The Company had oil and gas operating expenses of \$92,813 in the three months ending July 31, 2013 compared to \$56,586 for the three months ended July 31, 2012. The operating costs are higher by \$36,227 due to gas supply well 12-29 being temporarily suspended leading to higher production costs in the current period.

Results of Operations Nine Months Ended July 31, 2013 and 2012

The following summary of our results of operations should be read in conjunction with our financial statements for the nine months ended July 31, 2013, which are included herein.

Our operating results for the nine months ended July 31, 2013, for the nine months ended July 31, 2012 and the changes between those periods for the respective items are summarized as follows:

		Nine Months Ended July 31, 2013		Nine Months Ended July 31, 2012		Change Between Nine Months Period Ended July 31, 2013 and July 31, 2012
Revenue	\$	856,360	\$	888,726	\$	(32,366)
General and administrative		510,047		653,945		(143,898)
Interest expense		208,326		171,801		36,525
Consulting fees		150,477		179,535		(29,058)
Cost of Revenue		563,596		517,699		45,897
Oil and gas operating expenses		281,063		240,432		40,631
Professional Fees		58,849		165,416		(106,567)
Net loss		(217,283)		(282,918)		65,635

As at July 31, 2013, we had \$1,398,588 in current liabilities. Our net cash provided in operating activities for the nine months ended July 31, 2013 was \$246,726 compared to net cash used of \$67,664 used in the nine months ended July 31, 2012. Our accumulated losses increased to \$4,931,409 as of July 31, 2013. Our financial statements report a net loss of \$217,283 for the nine month period ended July 31, 2013 compared to a net loss of \$282,918 for the nine month period ended July 31, 2012. Our losses have decreased for the nine months ended July 31, 2013 primarily due to lower fees for investor relations, legal, consulting and travel compared to July 31, 2012. The increase in our legal fees for 2012 was for prospectus-related expenses and increased legal costs due to a legal dispute that has been resolved. The Company recognized cost of revenue in oil and gas properties of \$563,596 during the nine months ended July 31, 2013, compared to \$517,699 for the nine months ended July 31, 2012. This is due to operating costs being higher by \$40,631 due to gas supply well 12-29 being temporarily suspended leading to higher production costs in the current period.

Our total liabilities as of July 31, 2013 were \$1,457,833 as compared to total liabilities of \$1,770,577 as of October 31, 2012 as certain debts have been paid down.

Liquidity and Financial Condition*Working Capital*

	July 31, 2013	October 31, 2012
Current assets	\$ 182,329	\$ 472,925
Current liabilities	1,398,588	1,711,332
Working capital (Deficit)	\$ (1,216,259)	\$ (1,238,407)

Cash Flows

	Nine Months Ended	
	July 31, 2013	July 31, 2012
Cash flows provided by (used in) operating activities	\$ 246,726	\$ (67,664)
Cash flows (used in) investing activities	(64,381)	(247,092)
Cash flows provided by (used in) financing activities	(335,330)	300,000
Increase (decrease) in cash and cash equivalents	(152,985)	(14,756)

Operating Activities

Net cash provided in operating activities was \$246,726 for the nine months ended July 31, 2013 compared with net cash used in operating activities of \$67,664 in the same period in 2012.

Investing Activities

Net cash used in investing activities was \$64,381 in the nine months ended July 31, 2013 compared to net cash used in investing activities was \$247,092 in the same period in 2012.

Financing Activities

Net cash used in financing activities was \$335,330 in the nine months ended July 31, 2013 compared to net cash provided by financing activities of \$300,000 in the same period in 2012. This is attributable to the repayment of the convertible debt loans for the nine month period July 31, 2013 and there was a convertible debt financing completed on December 1, 2011.

Oil and gas sales volume comparisons for the nine months ended July 31, 2013 compared to the nine months ended July 31, 2012

For the nine month period ended July 31, 2013, the Company had \$856,360 in revenues compared to \$888,726 in revenues for the same nine month period in the prior year. Oil revenues in the first six months of the 2013 fiscal year were higher than those of the same period in fiscal 2012; while oil revenue in the three months ending July 31 2013 were lower than in the same period in fiscal 2012, due to the above mentioned well workovers of wells 12-1 and 12-3A.

Item 4. Controls and Procedures***Management's Report on Disclosure Controls and Procedures***

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports filed under the *Securities Exchange Act of 1934*, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such

information is accumulated and communicated to our management, including our president and chief executive officer (also our principal executive officer) and our chief financial officer (also our principal financial and accounting officer) to allow for timely decisions regarding required disclosure.

As of July 31, 2013, the end of our quarter covered by this report, we carried out an evaluation, under the supervision and with the participation of our president and chief executive officer (also our principal executive officer) and our chief financial officer (also our principal financial and accounting officer), of the effectiveness of the design and operation of our disclosure controls and procedures. Based on the foregoing, our president and chief executive officer (also our principal executive officer) and our chief financial officer (also our principal financial and accounting officer) concluded that our disclosure controls and procedures were effective at a reasonable assurance level as of July 31, 2013.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of control procedures. The objectives of internal control include providing management with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition, and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of financial statements in conformity with accounting principles generally accepted in the United States. Our management assessed the effectiveness of our internal control over financial reporting as of July 31, 2013. In making this assessment, our management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in *Internal Control-Integrated Framework*. Our management has concluded that, as of July 31, 2013, our internal control over financial reporting is effective in providing reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with US generally accepted accounting principles. Our management reviewed the results of their assessment with our Board of Directors.

Inherent limitations on effectiveness of controls

Internal control over financial reporting has inherent limitations which include but is not limited to the use of independent professionals for advice and guidance, interpretation of existing and/or changing rules and principles, segregation of management duties, scale of organization, and personnel factors. Internal control over financial reporting is a process which involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting also can be circumvented by collusion or improper management override. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements on a timely basis, however these inherent limitations are known features of the financial reporting process and it is possible to design into the process safeguards to reduce, though not eliminate, this risk. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal controls over financial reporting that occurred during the quarter ended July 31, 2013, that have materially or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II

OTHER INFORMATION

Item 1. Legal Proceedings

We know of no other material, existing or pending legal proceedings against our company, nor are we involved as a plaintiff in any other material proceeding or pending litigation. There are no other proceedings in which any of our directors, executive officers or affiliates, or any registered or beneficial stockholder, is an adverse party or has a material interest adverse to our interest.

Item 1A. Risk Factors

Much of the information included in this quarterly report includes or is based upon estimates, projections or other "forward looking statements". Such forward looking statements include any projections or estimates made by us and our management in connection with our business operations. While these forward-looking statements, and any assumptions upon which they are based, are made in good faith and reflect our current judgment regarding the direction of our business, actual results will almost always vary, sometimes materially, from any estimates, predictions, projections, assumptions or other future performance suggested herein.

Such estimates, projections or other "forward looking statements" involve various risks and uncertainties as outlined below. We caution the reader that important factors in some cases have affected and, in the future, could materially affect actual results and cause actual results to differ materially from the results expressed in any such estimates, projections or other "forward looking statements".

Prospective investors should consider carefully the risk factors set out below.

We have had negative cash flows from operations.

To date we have had negative cash flows from operations and we have been dependent on sales of our equity securities and debt financing to meet our cash requirements and have incurred losses totaling approximately \$217,283 for the nine month period ending July 31, 2013, and cumulative losses of \$4,931,409 to July 31, 2013. As of July 31, 2013 we had deficit in working capital of \$1,216,259 as a result of past financing activities. We do expect positive cash flow from operations at some point; however there is no assurance that actual cash requirements will not exceed our estimates, or that our sales projections will be realized as estimated. In particular, additional capital may be required in the event that:

- drilling and completion costs for further wells increase beyond our expectations; or
- commodity prices for our production decline beyond our expectations; or
- production levels do not meet our expectations; or
- we incur higher well plug and abandonment costs than currently expected; or
- we encounter greater costs associated with general and administrative expenses or offering costs.

The occurrence of any of the aforementioned events could adversely affect our ability to meet our business plans.

We will depend almost exclusively on outside capital to pay for the continued exploration and development of our properties. Such outside capital may include the sale of additional stock and/or commercial borrowing. Capital may not continue to be available if necessary to meet these continuing development costs or, if the capital is available, that it will be on terms acceptable to us. The issuance of additional equity securities by us would result in a significant dilution in the equity interests of our current stockholders. Obtaining commercial loans, assuming those loans would be available, will increase our liabilities and future cash commitments.

If we are unable to obtain financing in the amounts and on terms deemed acceptable to us, we may be unable to continue our business and as a result may be required to scale back or cease operations for our business, the result of which would be that our stockholders would lose some or all of their investment.

A decline in the price of our common stock could affect our ability to raise further working capital and adversely impact our operations.

A prolonged decline in the price of our common stock could result in a reduction in the liquidity of our common stock and a reduction in our ability to raise capital. Because our operations have been primarily financed through the sale of equity securities, a decline in the price of our common stock could be especially detrimental to our liquidity and our continued operations. Any reduction in our ability to raise equity capital in the future would force us to reallocate funds from other planned uses and would have a significant negative effect on our business plans and operations, including our ability to develop new products and continue our current operations. If our stock price declines, we may not be able to raise additional capital or generate funds from operations sufficient to meet our obligations.

We have a history of losses and fluctuating operating results.

From inception through to July 31, 2013, we have incurred aggregate losses of approximately \$4,931,409. Our loss from operations for the nine month period ended July 31, 2013 was \$217,283. There is no assurance that we will operate profitably or will generate positive cash flow in the future. In addition, our operating results in the future may be subject to significant fluctuations due to many factors not within our control, such as the unpredictability of world prices and market for oil and gas, the demand for our production, and the level of competition and general economic conditions. If we cannot generate positive cash flows in the future, or raise sufficient financing to continue our normal operations, then we may be forced to scale down or even close our operations. Until such time as we generate significant revenues, we expect an increase in development costs and operating costs. Consequently, we expect to continue to incur operating losses and negative cash flow until we receive significant commercial production from our properties.

We have a limited operating history and if we are not successful in continuing to grow our business, then we may have to scale back or even cease our ongoing business operations.

We have limited history of revenues from operations and have limited significant tangible assets. We have yet to generate positive earnings and there can be no assurance that we will ever operate profitably. The success of our company is significantly dependent on a successful acquisition, drilling, completion and production program. Our company's operations will be subject to all the risks inherent in the establishment of a developing enterprise and the uncertainties arising from the absence of a significant operating history. We may be unable to locate recoverable reserves, extract the reserves economically, and/or operate on a profitable basis.

Trading of our stock may be restricted by the SEC's "Penny Stock" regulations, which may limit a stockholder's ability to buy and sell our stock.

The U.S. Securities and Exchange Commission has adopted regulations which generally define "penny stock" to be any equity security that has a market price (as defined) less than \$5.00 per share or an exercise price of less than \$5.00 per share, subject to certain exceptions. Our securities are covered by the penny stock rules, which impose additional sales practice requirements on broker-dealers who sell to persons other than established customers and "accredited investors." The term "accredited investor" refers generally to institutions with assets in excess of \$5,000,000 or individuals with a net worth in excess of \$1,000,000 or annual income exceeding \$200,000 or \$300,000 jointly with their spouse. The penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from the rules, to deliver a standardized risk disclosure document in a form prepared by the SEC, which provides information about penny stocks and the nature and level of risks in the penny stock market. The broker-dealer also must provide the customer with current bid and offer quotations for the penny stock, the

compensation of the broker-dealer and its salesperson in the transaction and monthly account statements showing the market value of each penny stock held in the customer's account. The bid and offer quotations, and the broker-dealer and salesperson compensation information, must be given to the customer orally or in writing prior to effecting the transaction and must be given to the customer in writing before or with the customer's confirmation. In addition, the penny stock rules require that prior to a transaction in a penny stock not otherwise exempt from these rules, the broker-dealer must make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written agreement to the transaction. These disclosure requirements may have the effect of reducing the level of trading activity in the secondary market for the stock that is subject to these penny stock rules. Consequently, these penny stock rules may affect the ability of broker-dealers to trade our securities. We believe that the penny stock rules discourage investor interest in and limit the marketability of, our common stock.

The Financial Industry Regulatory Authority, or FINRA, has adopted sales practice requirements which may also limit a stockholder's ability to buy and sell our stock.

In addition to the "penny stock" rules described above, FINRA has adopted rules that require that in recommending an investment to a customer, a broker-dealer must have reasonable grounds for believing that the investment is suitable for that customer. Prior to recommending speculative low priced securities to their non-institutional customers, broker-dealers must make reasonable efforts to obtain information about the customer's financial status, tax status, investment objectives and other information. Under interpretations of these rules, FINRA believes that there is a high probability that speculative low priced securities will not be suitable for at least some customers. FINRA requirements make it more difficult for broker-dealers to recommend that their customers buy our common stock, which may limit your ability to buy and sell our stock and have an adverse effect on the market for our shares.

Trading in our common shares on the OTC Bulletin Board is limited and sporadic making it difficult for our shareholders to sell their shares or liquidate their investments.

Our common shares are currently listed for public trading on the OTC Bulletin Board. The trading price of our common shares has been subject to wide fluctuations. Trading prices of our common shares may fluctuate in response to a number of factors, many of which will be beyond our control. The stock market has generally experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of companies with no current business operation. There can be no assurance that trading prices and price earnings ratios previously experienced by our common shares will be matched or maintained. These broad market and industry factors may adversely affect the market price of our common shares, regardless of our operating performance.

In the past, following periods of volatility in the market price of a company's securities, securities class-action litigation has often been instituted. Such litigation, if instituted, could result in substantial costs for us and a diversion of management's attention and resources.

Because of the early stage of development and the nature of our business, our securities are considered highly speculative.

Our securities must be considered highly speculative, generally because of the nature of our business and the early stage of its development. We have largely been engaged in the business of exploring and until only recently attempting to develop commercial reserves of oil and gas. Only our Mississippi properties have commenced production. Accordingly, we have generated revenues but we have not realized a profit from our operations to date and there is little likelihood that we will generate significant revenues or realize any profits in the short term. Any profitability in the future from our business will be dependent upon attaining adequate levels of internally generated revenues through locating and developing economic reserves of oil and gas, which itself is subject to numerous risk factors as set forth herein. Since we have not generated significant revenues, we will have to raise additional monies through either securing industry reserve based debt financing, or the sale of our equity securities or debt, or combinations of the above in order to continue our business operations.

As our properties are in the exploration and early development stage there can be no assurance that we will establish commercial discoveries and/or profitable production programs on these properties.

Exploration for economic reserves of oil and gas is subject to a number of risk factors. Few properties that are explored are ultimately developed into producing oil and/or gas wells. Our Mississippi properties are in the production and development stages only.

The potential profitability of oil and gas ventures depends upon factors beyond the control of our company.

The potential profitability of oil and gas properties is dependent upon many factors beyond our control. For instance, world prices and markets for oil and gas are unpredictable, highly volatile, potentially subject to governmental fixing, pegging, controls, or any combination of these and other factors, and respond to changes in domestic, international, political, social, and economic environments. Additionally, due to worldwide economic uncertainty, the availability and cost of funds for production and other expenses have become increasingly difficult, if not impossible, to project. These changes and events may materially affect our financial performance.

Adverse weather conditions can also hinder drilling operations. A productive well may become uneconomic in the event water or other deleterious substances are encountered which impair or prevent the production of oil and/or gas from the well. In addition, production from any well may be unmarketable if it is impregnated with water or other deleterious substances. The marketability of oil and gas, which may be acquired or discovered, will be affected by numerous factors beyond our control. These factors include the proximity and capacity of oil and gas pipelines and processing equipment, market fluctuations of prices, taxes, royalties, land tenure, allowable production and environmental protection. These factors cannot be accurately predicted and the combination of these factors may result in our company not receiving an adequate return on invested capital.

Competition in the oil and gas industry is highly competitive and there is no assurance that we will be successful in acquiring leases.

The oil and gas industry is intensely competitive. We compete with numerous individuals and companies, including many major oil and gas companies, which have substantially greater technical, financial and operational resources and staff. Accordingly, there is a high degree of competition for desirable oil and gas leases, suitable properties for drilling operations and necessary drilling equipment, as well as for access to funds. We cannot predict if the necessary funds can be raised or that any projected work will be completed. Our budget does not anticipate the potential acquisition of additional acreage in Mississippi although this may change at any time without notice. This acreage may not become available or if it is available for leasing, that we may not be successful in acquiring the leases. There are other competitors that have operations in these areas and the presence of these competitors could adversely affect our ability to acquire additional leases.

Our producing oil and gas wells are located in the floodplain of a river and are subject to seasonal flood conditions.

Our most significant wells are the producing oil wells PP F-12-1, PP F-12-3, PP F-12-4, and PP F-12-5 located within the Belmont Lake oil field which is located in the Palmetto Point region. The Belmont Lake oil field is onshore, as are all of our company's wells, but located in a flood plain of the Mississippi River which forces seasonal constraints on certain field activities. We have suffered repeated delays in the development of this oil field due to the seasonal flooding, and we could experience additional development delays in the future.

Our company has an interest in one producing gas well, the PP F-29, but because the gas from this well is consumed by field operations it is deemed to be of no commercial value. Except for this and the four oil wells noted immediately above, **OUR COMPANY HAS NO OTHER PRODUCING WELLS**. Seasonal river-flooding conditions can negatively impact the viability of our oil production and thus, our ability to generate revenue.

The marketability of natural resources will be affected by numerous factors beyond our control, which may result in us not receiving an adequate return on invested capital to be profitable or viable.

The marketability of natural resources, which may be acquired or discovered by us, will be affected by numerous factors beyond our control. These factors include market fluctuations in oil and gas pricing and demand, the proximity and capacity of natural resource markets and processing equipment, governmental regulations, land tenure, land use, regulation concerning the importing and exporting of oil and gas and environmental protection regulations. The exact effect of these factors cannot be accurately predicted, but the combination of these factors may result in us not receiving an adequate return on invested capital to be profitable or viable.

Oil and gas operations are subject to comprehensive regulation, which may cause substantial delays or require capital outlays in excess of those anticipated causing an adverse effect on our company.

Oil and gas operations are subject to federal, state, and local laws relating to the protection of the environment, including laws regulating removal of natural resources from the ground and the discharge of materials into the environment. Oil and gas operations are also subject to federal, state, and local laws and regulations, which seek to maintain health and safety standards by regulating the design and use of drilling methods and equipment. Various permits from government bodies are required for drilling operations to be conducted; no assurance can be given that such permits will be received. Environmental standards imposed by federal, provincial, or local authorities may be changed and any such changes may have material adverse effects on our activities. Moreover, compliance with such laws may cause substantial delays or require capital outlays in excess of those anticipated, thus causing an adverse effect on us. Additionally, we may be subject to liability for pollution or other environmental damages, which it may elect not to insure against due to prohibitive premium costs and other reasons. To date we have not been required to spend any material amount on compliance with environmental regulations. However, we may be required to do so in future and this may affect our ability to expand or maintain our operations.

Exploration and production activities are subject to certain environmental regulations, which may prevent or delay the commencement or continuance of our operations.

In general, our exploration and production activities are subject to certain federal, state and local laws and regulations relating to environmental quality and pollution control. Such laws and regulations increase the costs of these activities and may prevent or delay the commencement or continuance of a given operation. Compliance with these laws and regulations has not had a material effect on our operations or financial condition to date. Specifically, we are subject to legislation regarding emissions into the environment, water discharges and storage and disposition of hazardous wastes. In addition, legislation has been enacted which requires well and facility sites to be abandoned and reclaimed to the satisfaction of state authorities. However, such laws and regulations are frequently changed and we are unable to predict the ultimate cost of compliance. Generally, environmental requirements do not appear to affect us any differently or to any greater or lesser extent than other companies in the industry.

We believe that our operations comply, in all material respects, with all applicable environmental regulations.

Our operating partners maintain insurance coverage customary to the industry; however, we are not fully insured against all possible environmental risks.

Exploratory and development drilling involves many risks and we may become liable for pollution or other liabilities, which may have an adverse effect on our financial position.

Drilling operations generally involve a high degree of risk. Hazards such as unusual or unexpected geological formations, power outages, labor disruptions, blow-outs, sour gas leakage, fire, inability to obtain suitable or adequate machinery, equipment or labour, and other risks are involved. We may become subject to liability for pollution or hazards against which it cannot adequately insure or which it may elect not to insure. Incurring any such liability may have a material adverse effect on our financial position and operations.

Any change to government regulation/administrative practices may have a negative impact on our ability to operate and our profitability.

The laws, regulations, policies or current administrative practices of any government body, organization or regulatory agency in the United States, Canada, or any other jurisdiction, may be changed, applied or interpreted in a manner which will fundamentally alter the ability of our company to carry on our business.

The actions, policies or regulations, or changes thereto, of any government body or regulatory agency, or other special interest groups, may have a detrimental effect on us. Any or all of these situations may have a negative impact on our ability to operate and/or our profitability.

Our By-laws contain provisions indemnifying our officers and directors against all costs, charges and expenses incurred by them.

Our By-laws contain provisions with respect to the indemnification of our officers and directors against all costs, charges and expenses, including an amount paid to settle an action or satisfy a judgment, actually and reasonably incurred by him, including an amount paid to settle an action or satisfy a judgment in a civil, criminal or administrative action or proceeding to which he is made a party by reason of his being or having been one of our directors or officers.

Investors' interests in our company will be diluted and investors may suffer dilution in their net book value per share if we issue additional shares or raise funds through the sale of equity securities.

Our constating documents authorize the issuance of 200,000,000 shares of common stock with a par value of \$0.001. In the event that we are required to issue any additional shares or enter into private placements to raise financing through the sale of equity securities, investors' interests in our company will be diluted and investors may suffer dilution in their net book value per share depending on the price at which such securities are sold. If we issue any such additional shares, such issuances also will cause a reduction in the proportionate ownership and voting power of all other shareholders. Further, any such issuance may result in a change in our control.

Our By-laws do not contain anti-takeover provisions, which could result in a change of our management and directors if there is a take-over of our company.

We do not currently have a shareholder rights plan or any anti-takeover provisions in our By-laws. Without any anti-takeover provisions, there is no deterrent for a take-over of our company, which may result in a change in our management and directors.

As a result of a majority of our directors and officers are residents of other countries other than the United States, investors may find it difficult to enforce, within the United States, any judgments obtained against our company or our directors and officers.

Other than our operations offices in Vancouver and Kelowna, British Columbia, we do not currently maintain a permanent place of business within the United States. In addition, a majority of our directors and officers are nationals and/or residents of countries other than the United States, and all or a substantial portion of such persons' assets are located outside the United States. As a result, it may be difficult for investors to enforce within the United States any judgments obtained against our company or our officers or directors, including judgments predicated upon the civil liability provisions of the securities laws of the United States or any state thereof.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Submission of Matters to a Vote of Securities Holders

None.

Item 5. Other Information

Due to the implementation of British Columbia Instrument 51-509 on September 30, 2008 by the British Columbia Securities Commission, we have been deemed to be a British Columbia based reporting issuer. As such, we are required to file certain information and documents at www.sedar.com.
