Ranking: Senior unsecured; structurally subordinated to subsidiary debt

Listing: None

Joint book-running managers: Morgan Stanley & Co. Incorporated and Goldman, Sachs & Co.

Co-manager: Deutsche Bank Securities Inc.

Use of proceeds: The net proceeds from the offering, after deducting the underwriters' discounts and estimated offering expenses payable by the Issuer of approximately \$5.8 million, will be approximately \$194.2 million (or approximately \$223.4 million if the underwriters exercise their over-allotment option in full).

The Issuer intends to use a portion of the net proceeds of this offering to pay approximately \$21.5 million for the cost of capped call transactions that the Issuer entered into with the counterparties thereto in respect of an aggregate of approximately 39.3 million shares of the Issuer's common stock. The capped call transactions were entered into with cap prices of 60% higher than the public offering price of the Issuer's common stock in the concurrent public offering of common stock. If the underwriters exercise their option to purchase additional notes to cover over-allotments, the Issuer intends to use approximately \$3.2 million of the net proceeds from the sale of the additional notes to enter into additional capped call transactions with respect to 5.9 million additional shares of the Issuer's common stock.

The remaining net proceeds from this offering of approximately \$172.7 million (or approximately \$198.7 million if the underwriters exercise their over-allotment option in full) will be used for general corporate purposes, including working capital, capital expenditures, potential acquisitions and strategic transactions. From time to time, the Issuer evaluates potential acquisitions and strategic transactions of businesses, technologies or products.

Currently, however, the Issuer does not have any agreements with respect to any material acquisitions or strategic transactions.

Adjustment to conversion rate upon a make-whole change in control:

Holders who convert their notes in connection with a make-whole change in control will be, under certain circumstances, entitled to a make-whole premium in the form of an increase in the conversion rate for notes surrendered for conversion in connection with such make-whole change in control. The following table sets forth the stock price, effective date and number of make-whole shares to be added to the conversion rate per \$1,000 principal amount of the notes.

The exact stock prices and effective dates may not be set forth in the above table, in which case:

- if the stock price is between two stock prices in the table above or the effective date is between two effective dates in the table above, the make-whole shares issued upon conversion of the notes will be determined by straight-line interpolation between the number of make-whole shares set forth for the higher and lower stock prices and/or the earlier and later effective dates, as applicable, based on a 365-day year;
- if the stock price is in excess of \$50.00 per share of common stock (subject to adjustment in the same manner as the stock prices set forth in the table above), no make-whole shares will be issued upon conversion of the notes; and
- if the stock price is less than \$4.15 per share of common stock (subject to adjustment in the same manner as the stock prices set forth in the table above), no make-whole shares will be issued upon conversion of the notes.

Notwithstanding the foregoing, the conversion rate of the notes shall not exceed 240.9638 per \$1,000 principal amount of notes, subject to adjustment in the same manner

as described in the preliminary prospectus supplement dated April 7, 2009 under Description of Notes Adjustment to Conversion Rate General.

The Issuer's obligation to deliver the make-whole shares could be considered a penalty, in which case the enforceability of our obligation to deliver make-whole shares would be subject to general principles of reasonableness of economic remedies.

Concurrent Offering of Common Stock

Concurrently with this offering, pursuant to a separate prospectus supplement, the Issuer priced an underwritten public offering of 60,240,000 shares (69,276,000 shares if the underwriters exercise their over-allotment option with respect to that offering in full) of the Issuer's common stock (the Common Stock Offering). Neither the completion of the Common Stock Offering nor the completion of this offering is contingent on the completion of the other. Assuming no exercise of the underwriters' over-allotment option with respect to the Common Stock Offering, the net proceeds of the Common Stock Offering, after deducting the underwriting discount and estimated expenses, will be approximately \$239.7 million, based on a public offering price of \$4.15 per share.
