

GOLDMAN SACHS GROUP INC

Form 424B2

September 01, 2015

[Table of Contents](#)

Filed pursuant to Rule 424(b)(2)
Registration Statement No. 333-198735

The information in this preliminary pricing supplement is not complete and may be changed. This preliminary pricing supplement is not an offer to sell nor does it seek an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.

Subject to Completion. Dated September 1, 2015

The Goldman Sachs Group, Inc.

\$

Callable Buffered Monthly S&P 500® Index-Linked Range Accrual Notes due

Subject to our redemption right described below, interest, if any, on your notes will be paid monthly on the 30th day of each month, commencing on the first interest payment date (expected to be October 30, 2015) and ending on the stated maturity date (expected to be March 30, 2023). The amount of interest that you will be paid each month will be based on the number of scheduled trading days, each a reference date, on which the closing level of the S&P 500® Index is *greater than or equal to* 80.00% of the initial index level. To determine your annualized interest rate with respect to each interest payment date, we will *divide* the number of reference dates in the immediately preceding interest period on which the above condition is met by the total number of reference dates in that interest period. We will then *multiply* the resulting fraction by the interest factor of 6.80%. Your monthly interest payment for each \$1,000 face amount of your notes will equal the *product* of the applicable annualized interest rate *times* \$1,000 *times* an accrued interest factor determined in accordance with the 30/360 (ISDA) day count convention. **Unless the above condition is met on each reference date in a monthly interest period, the interest rate with respect to the next interest payment date will be less than 6.80% per annum, and if it is never met, the interest rate with respect to such interest payment date will be 0%.**

We may redeem your notes at 100% of their face amount plus any accrued and unpaid interest on any monthly interest payment date on or after September 30, 2016.

If we do not redeem your notes, the amount that you will be paid on your notes on the stated maturity date, in addition to any accrued and unpaid interest, is based solely on the performance of the index as measured from the trade date (expected to be September 28, 2015) to and including the determination date (expected to be March 16, 2023). If the final index level on the determination date is *greater than or equal to* 80.00% of the initial index level, you will receive the face amount of your notes. **If the final index level is less than 80.00% of the initial index level, the amount you receive will depend on the index return but will be less than the face amount of your notes, as described below. You will not benefit from any increase in the final index level above the initial index level, and you could lose a substantial portion of your investment in the notes if the final index level is less than 80.00% of the initial index level.**

To determine your payment at maturity, excluding any interest payment, we will calculate the index return, which is the percentage increase or decrease in the final index level from the initial index level. On the stated maturity date, for each \$1,000 face amount of your notes, you will receive an amount in cash equal to:

- if the index return is *greater than or equal to* -20.00% (the final index level is *greater than or equal to* 80.00% of the initial index level), \$1,000; or
- if the index return is *less than* -20.00% (the final index level is *less than* 80.00% of the initial index level), the *sum* of (i) \$1,000 *plus* (ii) the *product* of (a) the *sum* of the index return *plus* 20.00% *times* (b) \$1,000.

You should read the additional disclosure herein so that you may better understand the terms and risks of your investment, including, among other things, our credit risk. See page PS-11. *The estimated value of your notes at the time the terms of your notes are set on the trade date is expected to be between \$905 and \$955 per \$1,000 face amount. For a discussion of the estimated value and the price at which Goldman, Sachs & Co. would initially buy or sell your notes, if it makes a market in the notes, see the following page.*

Original issue date:	expected to be September 30, 2015	Original issue price:	100.00% of the face amount*
Underwriting discount:	% of the face amount*	Net proceeds to the issuer:	% of the face amount

*The original issue price will be % for certain investors; see Supplemental Plan of Distribution on page PS-6.

Neither the Securities and Exchange Commission nor any other regulatory body has approved or disapproved of these securities or passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense. The notes are not bank deposits and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank.

Goldman, Sachs & Co.

Pricing Supplement No. dated , 2015.

Table of Contents

The issue price, underwriting discount and net proceeds listed above relate to the notes we sell initially. We may decide to sell additional notes after the date of this pricing supplement, at issue prices and with underwriting discounts and net proceeds that differ from the amounts set forth above. The return (whether positive or negative) on your investment in notes will depend in part on the issue price you pay for such notes.

Goldman Sachs may use this prospectus in the initial sale of the notes. In addition, Goldman, Sachs & Co. or any other affiliate of Goldman Sachs may use this prospectus in a market-making transaction in a note after its initial sale. ***Unless Goldman Sachs or its agent informs the purchaser otherwise in the confirmation of sale, this prospectus is being used in a market-making transaction.***

Estimated Value of Your Notes

The estimated value of your notes at the time the terms of your notes are set on the trade date (as determined by reference to pricing models used by Goldman, Sachs & Co. (GS&Co.) and taking into account our credit spreads) is expected to be between \$905 and \$955 per \$1,000 face amount, which is less than the original issue price. The value of your notes at any time will reflect many factors and cannot be predicted; however, the price (not including GS&Co. S customary bid and ask spreads) at which GS&Co. would initially buy or sell notes (if it makes a market, which it is not obligated to do) and the value that GS&Co. will initially use for account statements and otherwise is equal to approximately \$ per \$1,000 face amount, which exceeds the estimated value of your notes as determined by reference to these models. The amount of the excess will decline on a straight line basis over the period from the trade date through .

About Your Prospectus

The notes are part of the Medium-Term Notes, Series D program of The Goldman Sachs Group, Inc. This prospectus includes this pricing supplement and the accompanying documents listed below. This pricing supplement constitutes a supplement to the documents listed below and should be read in conjunction with such documents:

- Product supplement no. 3142 dated September 15, 2014
- General terms supplement dated September 26, 2014

- Prospectus supplement dated September 15, 2014
- Prospectus dated September 15, 2014

The information in this pricing supplement supersedes any conflicting information in the documents listed above. In addition, some of the terms or features described in the listed documents may not apply to your notes.

Table of Contents

SUMMARY INFORMATION

We refer to the notes we are offering by this pricing supplement as the offered notes or the notes. Each of the offered notes, including your notes, has the terms described below. Please note that in this pricing supplement, references to The Goldman Sachs Group, Inc., we, our and us mean only The Goldman Sachs Group, Inc. and do not include its consolidated subsidiaries. Also, references to the accompanying prospectus mean the accompanying prospectus, dated September 15, 2014, as supplemented by the accompanying prospectus supplement, dated September 15, 2014, of The Goldman Sachs Group, Inc. relating to the Medium-Term Notes, Series D program of The Goldman Sachs Group, Inc., references to the accompanying general terms supplement mean the accompanying general terms supplement, dated September 26, 2014, of The Goldman Sachs Group, Inc. and references to the accompanying product supplement no. 3142 mean the accompanying product supplement no. 3142, dated September 15, 2014, of The Goldman Sachs Group, Inc.

This section is meant as a summary and should be read in conjunction with the section entitled General Terms of the Callable Range Accrual Notes on page S-23 of the accompanying product supplement no. 3142 and Supplemental Terms of the Notes on page S-13 of the accompanying general terms supplement. Please note that certain features, as noted below, described in the accompanying product supplement no. 3142 and general terms supplement are not applicable to the notes. This pricing supplement supersedes any conflicting provisions of the accompanying product supplement no. 3142 or the accompanying general terms supplement.

Key Terms

Issuer: The Goldman Sachs Group, Inc.

Underlier: the S&P 500® Index (Bloomberg symbol, SPX Index), as published by the S&P Dow Jones Indices LLC (S&P)

Specified currency: U.S. dollars (\$)

Terms to be specified in accordance with the accompanying product supplement no. 3142:

- type of notes: notes linked to an underlier

- redemption right or price dependent redemption right: yes, as described below
- reference rate: not applicable
- rate trigger range: not applicable
- trigger buffer level: not applicable
- buffer level: yes, as described below

Face amount: each note will have a face amount of \$1,000; \$ in the aggregate for all the offered notes; the aggregate face amount of the offered notes may be increased if the issuer, at its sole option, decides to sell an additional amount of the offered notes on a date subsequent to the date of this pricing supplement

Purchase at amount other than face amount: the amount we will pay you at the stated maturity date for your notes or upon any early redemption of your notes, will not be adjusted based on the issue price you pay for your notes, so if you acquire notes at a premium (or discount) to face amount and hold them to the stated maturity date or date of early redemption, it could affect your investment in a number of ways. The return on your investment in such notes will be lower (or higher) than it would have been had you purchased the notes at face amount. Also, the stated buffer level would not offer the same measure of protection to your investment as would be the case if you had purchased the notes at face amount. See **Additional Risk Factors Specific to Your Notes If You Purchase Your Notes at a Premium to Face Amount, the Return on Your Investment Will Be Lower Than the Return on Notes Purchased at Face Amount and the Impact of Certain Key Terms of the Notes Will be Negatively Affected** on page PS-13 of this pricing supplement.

Supplemental discussion of U.S. federal income tax consequences: you will be obligated pursuant to the terms of the notes in the absence of a change in law, an administrative determination or a judicial

Table of Contents

ruling to the contrary to characterize each note for all tax purposes as an income-bearing pre-paid derivative contract in respect of the underlier, as described under Supplemental Discussion of Federal Income Tax Consequences on page S-29 of the accompanying product supplement no. 3142. Pursuant to this approach, it is the opinion of Sidley Austin LLP that it is likely that any interest payment will be taxed as ordinary income in accordance with your regular method of accounting for U.S. federal income tax purposes. If you are a United States alien holder of the notes, we intend to withhold on interest payments made to you at a 30% rate or at a lower rate specified by an applicable income tax treaty. In addition, upon the sale, exchange, redemption or maturity of your notes, it would be reasonable for you to recognize capital gain or loss equal to the difference, if any, between the amount of cash you receive at such time (excluding amounts attributable to any interest payment) and your tax basis in your notes. Pursuant to Treasury regulations, Foreign Account Tax Compliance Act (FATCA) withholding (as described in United States Taxation Taxation of Debt Securities Foreign Account Tax Compliance Act (FATCA) Withholding in the accompanying prospectus) will generally apply to obligations that are issued on or after July 1, 2014; therefore, the notes will generally be subject to FATCA withholding. However, according to final Treasury regulations, the withholding tax described above will not apply to payments of gross proceeds from the sale, exchange, redemption or other disposition of the notes made before January 1, 2017.

Cash settlement amount (on the stated maturity date): for each \$1,000 face amount of your notes, in addition to any accrued and unpaid interest, we will pay you on the stated maturity date, subject to our early redemption right, an amount in cash equal to:

- if the final underlier level is *greater than or equal to* the buffer level, \$1,000; or
- if the final underlier level is *less than* the buffer level, the *sum* of (1) \$1,000 *plus* (2) the *product* of (i) \$1,000 *times* (ii) the buffer rate *times* (iii) the *sum of* the underlier return *plus* the buffer amount

Early redemption right: we have the right to redeem your notes, in whole but not in part, on each redemption date at a price equal to 100% of the face amount *plus* any accrued and unpaid interest to but excluding such redemption date, subject to ten business days prior notice, as further described under General Terms of the Callable Range Accrual Notes Redemption of the Notes on page S-23 of the accompanying product supplement no. 3142

Redemption dates: the interest payment date that is expected to fall on September 30, 2016 and each interest payment date occurring thereafter

Interest rate: the interest rate with respect to any interest payment date will be determined on the immediately preceding interest determination date, based on the closing level of the underlier on each reference date during the interest period immediately preceding such interest payment date. The interest rate will be equal to the *product* of (1) the interest factor *times* (2) the *quotient* of (i) the number of reference dates during the applicable interest period when the closing level of the underlier is *greater than or equal to* the underlier barrier level *divided by* (ii) the number of reference dates in such interest period, subject to adjustment as described under General Terms of the Callable Range Accrual Notes Interest Payments on page S-23 of the accompanying product supplement no. 3142.

Interest factor: 6.80%

Interest period: each period from and including each interest determination date (or the original issue date in the case of the initial interest period) to but excluding the next succeeding interest determination date

Interest determination dates: the tenth scheduled trading day prior to each interest payment date

Interest payment dates (to be set on the trade date): expected to be the 30th day of each month (except for the interest payment date in each February, which will be the last calendar day of such month), beginning on October 30, 2015, up to and including the stated maturity date, subject to adjustment as described under General Terms of the Callable Range Accrual Notes Interest Payments on page S-23 of the accompanying product supplement no. 3142

Day count convention: 30/360 (ISDA)

Accrued interest factor: calculated in accordance with the day count convention with respect to each period from and including each interest payment date (or the original issue date, in the case of the first interest payment date) to but excluding the next succeeding interest payment date

Initial underlier level (to be set on the trade date):

Underlier barrier level: 80.00% of the initial underlier level

Final underlier level: the closing level of the underlier on the determination date, except in the limited circumstances described under Supplemental Terms of the Notes Consequences of a Market

PS-5

Table of Contents

Disruption Event or a Non-Trading Day on page S-19 of the accompanying general terms supplement and subject to adjustment as provided under Supplemental Terms of the Notes Discontinuance or Modification of an Underlier on page S-23 of the accompanying general terms supplement

Closing level: as described under Supplemental Terms of the Notes Special Calculation Provisions Closing Level on page S-27 of the accompanying general terms supplement

Underlier return: the *quotient* of (1) the final underlier level *minus* the initial underlier level *divided by* (2) the initial underlier level, expressed as a percentage

Buffer level: 80.00% of the initial underlier level

Buffer amount: 20.00%

Buffer rate: 100.00%

No listing: the offered notes will not be listed on any securities exchange or interdealer quotation system

Business day: as described under Supplemental Terms of the Notes Special Calculation Provisions Business Day on page S-27 of the accompanying general terms supplement

Trading day: as described under Supplemental Terms of the Notes Special Calculation Provisions Trading Day on page S-27 of the accompanying general terms supplement

Trade date: expected to be September 28, 2015

Original issue date (settlement date) (to be set on the trade date): expected to be September 30, 2015

Determination date (to be set on the trade date): expected to be March 16, 2023, subject to adjustment as described under Supplemental Terms of the Notes Determination Date on page S-14 of the accompanying general terms supplement

Stated maturity date (to be set on the trade date): expected to be March 30, 2023, subject to adjustment as described under Supplemental Terms of the Notes Stated Maturity Date on page S-13 of the accompanying general terms supplement

Reference date: for each interest period, each day that is a scheduled trading day

Business day convention: following unadjusted

Regular record dates: the scheduled business day immediately preceding each interest payment date

Use of proceeds and hedging: as described under Use of Proceeds and Hedging on page S-28 of the accompanying product supplement no. 3142

ERISA: as described under Employee Retirement Income Security Act on page S-36 of the accompanying product supplement no. 3142

Supplemental plan of distribution; conflicts of interest: as described under Supplemental Plan of Distribution on page S-37 of the accompanying product supplement no. 3142 and Plan of Distribution Conflicts of Interest on page 117 of the accompanying prospectus; The Goldman Sachs Group, Inc. estimates that its share of the total offering expenses, excluding underwriting discounts and commissions, will be approximately \$.

The Goldman Sachs Group, Inc. expects to agree to sell to Goldman, Sachs & Co. (GS&Co.), and GS&Co. expects to agree to purchase from The Goldman Sachs Group, Inc., the aggregate face amount of the offered notes specified on the front cover of this pricing supplement. GS&Co. proposes initially to offer the notes to the public at the original issue prices set forth on the cover page of this pricing supplement, and to certain securities dealers at such prices less a concession not in excess of % of the face amount. The original issue price for notes purchased by certain fee-based advisory accounts will be % of the face amount of the notes, which will reduce the underwriting discount specified on the cover of this pricing supplement with respect to such notes to %. GS& Co. is an affiliate of The Goldman Sachs Group, Inc. and, as such, will have a conflict of interest in this offering of notes within the meaning of Financial Industry Regulatory Authority, Inc. (FINRA) Rule 5121. Consequently, this offering of notes will be conducted in compliance with the provisions of FINRA Rule 5121. GS&Co. will not be permitted to sell notes in this offering to an account over which it exercises discretionary authority without the prior specific written approval of the account holder.

Edgar Filing: GOLDMAN SACHS GROUP INC - Form 424B2

We expect to deliver the notes against payment therefor in New York, New York on September 30, 2015, which is expected to be the second scheduled business day following the date of this pricing supplement and of the pricing of the notes.

PS-6

Table of Contents

We have been advised by GS&Co. that it intends to make a market in the notes. However, neither GS&Co. nor any of our other affiliates that makes a market is obligated to do so and any of them may stop doing so at any time without notice. No assurance can be given as to the liquidity or trading market for the notes.

Calculation agent: GS&Co.

CUSIP no.: 38148TDN6

ISIN no.: US38148TDN63

FDIC: the notes are not bank deposits and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank

PS-7

Table of Contents**HYPOTHETICAL EXAMPLES**

The following tables and examples are provided for purposes of illustration only. They should not be taken as an indication or prediction of future investment results and are intended merely to illustrate (i) the method we will use to determine the interest rate on any given interest payment date based on the closing level of the underlier on the applicable reference dates in the immediately preceding interest period, (ii) the method we will use to calculate the amount of interest accrued between interest payment dates and (iii) the impact that the various hypothetical closing levels of the underlier on the determination date could have on the cash settlement amount at maturity assuming all other variables remain constant.

The examples below are based on a range of underlier levels that are entirely hypothetical; no one can predict what the underlier level will be on any day throughout the life of your notes, what the final underlier level will be on the determination date and what the interest rate will be on any interest payment date. The underlier has been highly volatile in the past meaning that the underlier level has changed substantially in relatively short periods and its performance cannot be predicted for any future period.

The information in the following examples reflects the method we will use to calculate the interest rate applicable to any interest payment date and the hypothetical rates of return on the offered notes assuming that they are purchased on the original issue date at the face amount and held to the stated maturity date. If you sell your notes in a secondary market prior to the stated maturity date, your return will depend upon the market value of your notes at the time of sale, which may be affected by a number of factors that are not reflected in the tables below such as interest rates, the volatility of the underlier and our creditworthiness. In addition, the estimated value of your notes at the time the terms of your notes are set on the trade date (as determined by reference to pricing models used by GS&Co.) is less than the original issue price of your notes. For more information on the estimated value of your notes, see Additional Risk Factors Specific to Your Notes The Estimated Value of Your Notes At the Time the Terms of Your Notes Are Set On the Trade Date (as Determined By Reference to Pricing Models Used By GS&Co.) Is Less Than the Original Issue Price Of Your Notes on page PS-11 of this pricing supplement. The information in the table also reflects the key terms and assumptions in the box below.

Key Terms and Assumptions	
Face amount	\$1,000
Buffer level	80.00% of the initial underlier level
Buffer amount	20.00%
Buffer rate	100.00%
Underlier barrier level	80.00% of the initial underlier level
Interest factor	6.80%
The day count convention calculation results in an accrued interest factor of approximately 0.08333	
The notes are not called	
Neither a market disruption event nor a non-trading day occurs on the originally scheduled determination date	
No market disruption event or non-trading day occurs on any reference date	
No change in or affecting any of the underlier stocks or the method by which the underlier sponsor calculates the underlier	

Notes purchased on original issue date at the face amount and held to the stated maturity date
--

Moreover, we have not yet set the initial underlier level that will serve as the baseline for determining the interest payable at each interest payment date, the underlier return and the amount that we will pay on your notes at maturity, subject to our early redemption right. We will not do so until the trade date. As a result, the actual initial underlier level may differ substantially from the current level of such underlier prior to the trade date. They may also differ substantially from the level of the underlier at the time you purchase your notes.

For these reasons, the actual performance of the underlier over the life of your notes, the actual underlier level on any reference date in any interest period, as well as the interest payable at each interest payment date, may bear little relation to the hypothetical examples shown below or to the historical levels of the underlier shown elsewhere in this pricing supplement. For information about the levels of the underlier during recent periods, see *The Underlier Historical Closing Levels of the Underlier* on page PS-14. Before investing in the notes, you should consult publicly available information to determine the underlier level between the date of this pricing supplement and the date of your purchase of the notes.

Table of Contents

The following tables and examples illustrate the method we will use to calculate the interest rate with respect to an interest payment date, subject to the key terms and assumptions above. The numbers in the first column represent the number of reference dates (N) during any given interest period for which the closing level of the underlier is greater than or equal to the underlier barrier level. The levels in the fourth column represent the hypothetical interest amount, as a percentage of the face amount of each note, that would be payable with respect to a given interest period in which the closing level of the underlier is greater than or equal to the underlier barrier level for a given number of reference dates (as specified in the first column).

Also, the hypothetical examples shown below do not take into account the effects of applicable taxes. Because of the U.S. tax treatment applicable to your notes, tax liabilities could affect the after-tax rate of return on your notes to a comparatively greater extent than the after-tax return on the underlier stocks.

0	20	0.00000000	0.00%
5	20	0.01700000	0.14%
10	20	0.03400000	0.28%
15	20	0.05100000	0.43%
20	20	0.06800000	0.57%

* The number of days for which the closing level of the underlier is greater than or equal to the underlier barrier level in a given interest period is subject to numerous adjustments, as described under General Terms of the Callable Range Accrual Notes Interest Payments on page S-23 of the accompanying product supplement no. 3142.

The levels in the left column of the table below represent hypothetical final underlier levels and are expressed as percentages of the initial underlier level. The amounts in the right column represent the hypothetical cash settlement amounts, based on the corresponding hypothetical final underlier level (expressed as a percentage of the initial underlier level), and are expressed as percentages of the face amount of a note (rounded to the nearest one-thousandth of a percent). Thus, a hypothetical cash settlement amount of 100.000% means that the value of the cash payment that we would deliver for each \$1,000 of the outstanding face amount of the offered notes on the stated maturity date would equal 100.000% of the face amount of a note, based on the corresponding hypothetical final underlier level (expressed as a percentage of the initial underlier level) and the assumptions noted above.

Hypothetical Final Underlier Level (as Percentage of Initial Underlier Level)	Hypothetical Cash Settlement Amount (as Percentage of Face Amount)
175.000%	100.000%
150.000%	100.000%
100.000%	100.000%
95.000%	100.000%

Edgar Filing: GOLDMAN SACHS GROUP INC - Form 424B2

80.000%	100.000%
50.000%	70.000%
25.000%	45.000%
0.000%	20.000%

If, for example, the final underlier level were determined to be 25.000% of the initial underlier level, the cash settlement amount that we would deliver on your notes at maturity would be 45.000% of the face amount of your notes, as shown in the table above. As a result, if you purchased your notes on the original issue date at the face amount and held them to the stated maturity date, you would lose 55.000% of your investment (if you purchased your notes at a premium to face amount you would lose a correspondingly higher percentage of your investment). In addition, if the final underlier level were determined to be 110.000% of the initial underlier level, the cash settlement amount that we would deliver on your notes at maturity would

PS-9

Table of Contents

be limited to 100.000% of each \$1,000 face amount of your notes, as shown in the table above. As a result, if you held your notes to the stated maturity date, you would not benefit from any increase in the final underlier level over the initial underlier level.

The cash settlement amounts shown above are entirely hypothetical; they are based on market prices for the underlier stocks that may not be achieved on the determination date and on assumptions that may prove to be erroneous. The actual market value of your notes on the stated maturity date or at any other time, including any time you may wish to sell your notes, may bear little relation to the hypothetical cash settlement amounts shown above, and these amounts should not be viewed as an indication of the financial return on an investment in the offered notes. The hypothetical cash settlement amounts on notes held to the stated maturity date in the examples above assume you purchased your notes at their face amount and have not been adjusted to reflect the actual issue price you pay for your notes. The return on your investment (whether positive or negative) in your notes will be affected by the amount you pay for your notes. If you purchase your notes for a price other than the face amount, the return on your investment will differ from, and may be significantly lower than, the hypothetical returns suggested by the above examples. Please read *Additional Risk Factors Specific to the Callable Range Accrual Notes The Market Value of Your Notes May Be Influenced by Many Unpredictable Factors* on page S-20 of the accompanying product supplement no. 3142.

Payments on the notes are economically equivalent to the amounts that would be paid on a combination of other instruments. For example, payments on the notes are economically equivalent to a combination of an interest-bearing bond bought by the holder and one or more options entered into between the holder and us (with one or more implicit option premiums paid over time). The discussion in this paragraph does not modify or affect the terms of the notes or the U.S. federal income tax treatment of the notes, as described elsewhere in this pricing supplement.

We cannot predict the actual closing level of the underlier on any day, the final underlier level or what the market value of your notes will be on any particular day, nor can we predict the relationship among the closing level of the underlier and the market value of your notes at any time prior to the stated maturity date. The actual interest payment, if any, that a holder of the notes will receive at each interest payment date, the actual amount that you will receive at maturity and the rate of return on the offered notes will depend on the actual initial underlier level, which we will set on the trade date, and on the actual closing levels of the underlier and the actual final underlier level determined by the calculation agent as described above. Moreover, the assumptions on which the hypothetical examples are based may turn out to be inaccurate. Consequently, the interest amount to be paid in respect of your notes, if any, and the cash amount to be paid in respect of your notes on the stated maturity date may be very different from the information reflected in the tables and examples above.

Table of Contents

ADDITIONAL RISK FACTORS SPECIFIC TO YOUR NOTES

An investment in your notes is subject to the risks described below, as well as the risks and considerations described in the accompanying prospectus dated September 15, 2014, in the accompanying prospectus supplement dated September 15, 2014, under Additional Risk Factors Specific to the Notes in the accompanying general terms supplement, and under Additional Risk Factors Specific to the Callable Range Accrual Notes in the accompanying product supplement no. 3142. You should carefully review these risks and considerations as well as the terms of the notes described herein and in the accompanying prospectus, dated September 15, 2014, as supplemented by the accompanying prospectus supplement, dated September 15, 2014, the accompanying general terms supplement, dated September 26, 2014, and the accompanying product supplement no. 3142, dated September 15, 2014, of The Goldman Sachs Group, Inc. Your notes are a riskier investment than ordinary debt securities. Also, your notes are not equivalent to investing directly in the underlier stocks, i.e., the stocks comprising the underlier to which your notes are linked. You should carefully consider whether the offered notes are suited to your particular circumstances.

The Estimated Value of Your Notes At the Time the Terms of Your Notes Are Set On the Trade Date (as Determined By Reference to Pricing Models Used By GS&Co.) Is Less Than the Original Issue Price Of Your Notes

The original issue price for your notes exceeds the estimated value of your notes as of the time the terms of your notes are set on the trade date, as determined by reference to GS&Co.'s pricing models and taking into account our credit spreads. Such estimated value on the trade date is set forth above under Estimated Value of Your Notes ; after the trade date, the estimated value as determined by reference to these models will be affected by changes in market conditions, our creditworthiness and other relevant factors. The price at which GS&Co. would initially buy or sell your notes (if GS&Co. makes a market, which it is not obligated to do), and the value that GS&Co. will initially use for account statements and otherwise, also exceeds the estimated value of your notes as determined by reference to these models. As agreed by GS&Co. and the distribution participants, the amount of this excess will decline on a straight line basis over the period from the date hereof through the applicable date set forth above under Estimated Value of Your Notes . Thereafter, if GS&Co. buys or sells your notes it will do so at prices that reflect the estimated value determined by reference to such pricing models at that time. The price at which GS&Co. will buy or sell your notes at any time also will reflect its then current bid and ask spread for similar sized trades of structured notes.

In estimating the value of your notes as of the time the terms of your notes are set on the trade date, as disclosed above under Estimated Value of Your Notes , GS&Co.'s pricing models consider certain variables, including principally our credit spreads, interest rates (forecasted, current and historical rates), volatility, price-sensitivity analysis and the time to maturity of the notes. These pricing models are proprietary and rely in part on certain assumptions about future events, which may prove to be incorrect. As a result, the actual value you would receive if you sold your notes in the secondary market, if any, to others may differ, perhaps materially, from the estimated value of your notes determined by reference to our models due to, among other things, any differences in pricing models or assumptions used by others. See Additional Risk Factors Specific to the Callable Range Accrual Notes The Market Value of Your Notes May Be Influenced by Many Unpredictable Factors on page S-20 of the accompanying product supplement no. 3142.

Edgar Filing: GOLDMAN SACHS GROUP INC - Form 424B2

The difference between the estimated value of your notes as of the time the terms of your notes are set on the trade date and the original issue price is a result of certain factors, including principally the underwriting discount and commissions, the expenses incurred in creating, documenting and marketing the notes, and an estimate of the difference between the amounts we pay to GS&Co. and the amounts GS&Co. pays to us in connection with your notes. We pay to GS&Co. amounts based on what we would pay to holders of a non-structured note with a similar maturity. In return for such payment, GS&Co. pays to us the amounts we owe under your notes.

In addition to the factors discussed above, the value and quoted price of your notes at any time will reflect many factors and cannot be predicted. If GS&Co. makes a market in the notes, the price quoted by

PS-11

Table of Contents

GS&Co. would reflect any changes in market conditions and other relevant factors, including any deterioration in our creditworthiness or perceived creditworthiness. These changes may adversely affect the value of your notes, including the price you may receive for your notes in any market making transaction. To the extent that GS&Co. makes a market in the notes, the quoted price will reflect the estimated value determined by reference to GS&Co.'s pricing models at that time, plus or minus its then current bid and ask spread for similar sized trades of structured notes (and subject to the declining excess amount described above).

Furthermore, if you sell your notes, you will likely be charged a commission for secondary market transactions, or the price will likely reflect a dealer discount. This commission or discount will further reduce the proceeds you would receive for your notes in a secondary market sale.

There is no assurance that GS&Co. or any other party will be willing to purchase your notes at any price and, in this regard, GS&Co. is not obligated to make a market in the notes. See *Additional Risk Factors Specific to the Callable Range Accrual Notes Your Notes May Not Have an Active Trading Market* on page S-20 of the accompanying product supplement no. 3142.

The Notes Are Subject to the Credit Risk of the Issuer

Although the interest and return on the notes will be based on the performance of the underlier, the payment of any amount due on the notes is subject to our credit risk. The notes are our unsecured obligations. Investors are dependent on our ability to pay all amounts due on the notes, and therefore investors are subject to our credit risk and to changes in the market's view of our creditworthiness. See *Description of the Notes We May Offer* *Information About Our Medium-Term Notes, Series D Program* *How the Notes Rank Against Other Debt* on page S-4 of the accompanying prospectus supplement.

You May Lose a Substantial Portion of Your Investment in the Notes

You can lose a substantial portion of your investment in the notes. The cash settlement amount on your notes on the stated maturity date will be based solely on the performance of the underlier as measured from the initial underlier level set on the trade date to the closing level on the determination date. If the final underlier level for your notes is *less than* the buffer level, you will have a loss for each \$1,000 of the face amount of your notes equal to the *sum* of the underlier return *plus* the buffer amount *times* \$1,000. Thus, you may lose a substantial portion of your investment in the notes, which would include any premium to face amount you paid when you purchased the notes.

Also, the market price of your notes prior to the stated maturity date may be significantly lower than the purchase price you pay for your notes. Consequently, if you sell your notes before the stated maturity date, you may receive far less than the amount of your investment in the notes.

We Are Able to Redeem Your Notes at Our Option

On any monthly interest payment date on or after September 30, 2016, we will be permitted to redeem your notes at our option. Even if we do not exercise our option to redeem your notes, our ability to do so may adversely affect the value of your notes. It is our sole option whether to redeem your notes prior to maturity and we may or may not exercise this option for any reason. Because of this redemption option, the term of your notes could be anywhere between twelve and ninety months. See **Additional Risk Factors Specific to the Callable Range Accrual Notes We Are Able to Redeem Your Notes at Our Option** on page S-19 of the accompanying product supplement no. 3142.

If the Closing Level of the Underlier Is Less Than the Underlier Barrier Level on Any Reference Date in Any Interest Period, the Interest Rate With Respect to the Next Interest Payment Date Will Be Reduced

Because of the formula used to calculate the interest rate applicable to your notes, if, on any reference date in any applicable interest period, the closing level of the underlier is less than the underlier barrier level, the interest rate with respect to the next interest payment date will be reduced. Therefore, if the closing level of the underlier is less than the underlier barrier level for an entire interest period, you will receive no interest on the related interest payment date. In such case, even if you receive some interest payments on some or all of the interest payment dates, the overall return you earn on your notes may be less than you would have earned by investing in a non-indexed debt security of comparable maturity that bears interest at a prevailing market rate.

PS-12

Table of Contents

If You Purchase Your Notes at a Premium to Face Amount, the Return on Your Investment Will Be Lower Than the Return on Notes Purchased at Face Amount and the Impact of Certain Key Terms of the Notes Will be Negatively Affected

The cash settlement amount you will be paid for your notes on the stated maturity date or the amount we will pay you upon any early redemption of your notes will not be adjusted based on the issue price you pay for the notes. If you purchase your notes at a premium to face amount and hold them to the stated maturity date, the return on your investment in the notes will be lower than it would have been had you purchased the notes at face amount or a discount to face amount. In addition, the impact of the buffer level on the return on your investment will depend upon the price you pay for your notes relative to face amount. For example, the buffer level, while still providing some protection for the return on the notes, will allow a greater percentage decrease in your investment in the notes than would have been the case for notes purchased at face amount or a discount to face amount.

You Have No Shareholder Rights or Rights to Receive Any Underlier Stock

Investing in your notes will not make you a holder of any of the underlier stocks. Neither you nor any other holder or owner of your notes will have any voting rights, any right to receive dividends or other distributions, any rights to make a claim against the underlier stocks or any other rights with respect to the underlier stocks. Your notes will be paid in cash and you will have no right to receive delivery of any underlier stocks.

We May Sell an Additional Aggregate Face Amount of the Notes at a Different Issue Price

At our sole option, we may decide to sell an additional aggregate face amount of the notes subsequent to the date of this pricing supplement. The issue price of the notes in the subsequent sale may differ substantially (higher or lower) from the original issue price you paid as provided on the cover of this pricing supplement.

The Tax Consequences of an Investment in Your Notes Are Uncertain

The tax consequences of an investment in your notes are uncertain, both as to the timing and character of any inclusion in income in respect of your notes.

The Internal Revenue Service announced on December 7, 2007 that it is considering issuing guidance regarding the tax treatment of an instrument such as your notes, and any such guidance could adversely affect the value and tax treatment of your notes. Among other things, the Internal Revenue Service may decide to require the holders to accrue ordinary income on a current basis and recognize ordinary income on payment at maturity, and could subject non-U.S. investors to withholding tax. Furthermore, in 2007, legislation was introduced in Congress that, if enacted, would have required holders that acquired instruments such as your notes after the bill was enacted to accrue interest income over the term of such notes. It is not possible to predict whether a similar or identical bill will be enacted in the future, or whether any such bill would affect the tax treatment of such notes. We describe these developments in more detail under Supplemental Discussion of Federal Income Tax Consequences on page S-29 of the

accompanying product supplement no. 3142. You should consult your tax advisor about this matter. Except to the extent otherwise provided by law, The Goldman Sachs Group, Inc. intends to continue treating the notes for U.S. federal income tax purposes in accordance with the treatment described under Supplemental Discussion of Federal Income Tax Consequences on page S-29 of the accompanying product supplement no. 3142 unless and until such time as Congress, the Treasury Department or the Internal Revenue Service determine that some other treatment is more appropriate. Please also consult your tax advisor concerning the U.S. federal income tax and any other applicable tax consequences to you of owning your notes in your particular circumstances.

Foreign Account Tax Compliance Act (FATCA) Withholding May Apply to Payments on Your Notes, Including as a Result of the Failure of the Bank or Broker Through Which You Hold the Notes to Provide Information to Tax Authorities

Please see the discussion under United States Taxation Taxation of Debt Securities Foreign Account Tax Compliance Act (FATCA) Withholding in the accompanying prospectus for a description of the applicability of FATCA to payments made on your notes.

Table of Contents

THE UNDERLIER

The S&P 500® Index includes a representative sample of 500 leading companies in leading industries of the U.S. economy. The S&P 500® Index is calculated, maintained and published by S&P Dow Jones Indices LLC.

The underlier sponsor has announced that it expects that, effective with the September 2015 rebalance, consolidated share class lines will no longer be included in the S&P 500® Index. Each share class line will be subject to public float and liquidity criteria individually, but the company's total market capitalization will be used to evaluate each share class line. This may result in one listed share class line of a company being included in the S&P 500® Index while a second listed share class line of the same company is excluded.

As of August 28, 2015, the 500 companies included in the S&P 500® Index were divided into ten Global Industry Classification Sectors. The Global Industry Classification Sectors include (with the approximate percentage currently included in such sectors indicated in parentheses): Consumer Discretionary (12.89%), Consumer Staples (9.66%), Energy (7.12%), Financials (16.63%), Health Care (15.40%), Industrials (10.02%), Information Technology (19.91%), Materials (2.94%), Telecommunication Services (2.43%) and Utilities (2.99%) (Sector designations are determined by the underlier sponsor using criteria it has selected or developed. Index sponsors may use very different standards for determining sector designations. In addition, many companies operate in a number of sectors, but are listed in only one sector and the basis on which that sector is selected may also differ. As a result, sector comparisons between indices with different index sponsors may reflect differences in methodology as well as actual differences in the sector composition of the indices.)

The above information supplements the description of the underlier found in the accompanying general terms supplement. This information was derived from information prepared by the underlier sponsor, however, the percentages we have listed above are approximate and may not match the information available on the underlier sponsor's website due to subsequent corporation actions or other activity relating to a particular stock. For more details about the underlier, the underlier sponsor and license agreement between the underlier sponsor and the issuer, see "The Underliers' S&P 500® Index" on page S-37 of the accompanying general terms supplement.

Historical Closing Levels of the Underlier

The closing level of the underlier has fluctuated in the past and may, in the future, experience significant fluctuations. Any historical upward or downward trend in the closing level of the underlier during the period shown below is not an indication that the underlier is more or less likely to increase or decrease at any time during the life of your notes.

You should not take the historical levels of the underlier as an indication of the future performance of the underlier. We cannot give you any assurance that the future performance of the underlier or the underlier stocks will result in your receiving any interest payment on any interest payment date.

Neither we nor any of our affiliates make any representation to you as to the performance of the underlier. The actual performance of the underlier over the life of the offered notes, as well as the cash settlement amount, may bear little relation to the historical levels shown below.

The graph below shows the daily historical closing levels of the underlier from August 31, 2005 through August 31, 2015. We obtained the closing levels in the graph below from Bloomberg Financial Services, without independent verification.
