Item 2.02

Results of Operations and Financial Condition.

On August 3, 2016, Dynegy Inc. (*Dynegy*) issued a press release announcing its second quarter financial results and the updating of its 2016 guidance estimates. A copy of Dynegy's August 3, 2016 press release is furnished herewith as Exhibit 99.1 and is incorporated herein by this reference. Dynegy's earnings presentation and management comments on the earnings presentation will be available on the Investor Relations section of Dynegy's website (www.dynegy.com) later today. Dynegy's management will hold an investor conference call and webcast tomorrow, August 4, 2016, at 9 a.m. ET/8 a.m. CT, to answer questions related to its second quarter financial results and related information. Participants may access the webcast from the Dynegy website.

Pursuant to General Instruction B.2 of Form 8-K and Securities and Exchange Commission (the *SEC*) Release No. 33-8176, the information contained in the press release furnished as an exhibit hereto shall not be deemed filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, is not subject to the liabilities of that section and is not deemed incorporated by reference in any filing under the Securities Act of 1933, as amended, except as shall be expressly set forth by specific reference in such a filing. In addition, the press release contains statements intended as forward-looking statements which are subject to the cautionary statements about forward-looking statements set forth in such press release.

Non-GAAP Financial Information

In analyzing and planning for Dynegy's business, management supplements Dynegy's use of the Generally Accepted Accounting Principles of the United States of America (*GAAP*) financial measures with non-GAAP financial measures, including earnings before interest, taxes, depreciation and amortization (*EBITDA*) and Adjusted EBITDA. These non-GAAP financial measures reflect an additional way of viewing aspects of Dynegy's business that, when viewed with its GAAP results and the accompanying reconciliations to corresponding GAAP financial measures, may provide a more complete understanding of factors and trends affecting its business. In this Form 8-K, Dynegy discusses such non-GAAP financial measures included in the press release, including definitions of such non-GAAP financial information, identification of the most directly comparable GAAP financial measures and the reasons why management believes these measures provide useful information regarding Dynegy's financial condition, results of operations and cash flows, as applicable, and, to the extent material, the additional purposes, if any, for which these measures are used. Reconciliations of non-GAAP financial measures to the most directly comparable GAAP financial measures, to the extent available without unreasonable effort, are contained in the schedules attached to the press release.

EBITDA Measures.

EBITDA is defined as earnings (loss) before interest expense, income tax expense (benefit), and depreciation and amortization expense.

Adjusted EBITDA is defined as EBITDA adjusted to exclude (i) gains or losses on the sale of certain assets, (ii) the impacts of mark-to-market changes on derivatives related to Dynegy's generation portfolio, as well as interest rate swaps and warrants, (iii) the impact of impairment charges and certain other costs such as those associated with acquisitions and (iv) other material items. Beginning in 2016, Adjusted EBITDA also excludes non-cash compensation expense.

Edgar Filing: DYNEGY INC. - Form 8-K

Management believes EBITDA and Adjusted EBITDA provide meaningful representations of Dynegy's operating performance. Management considers EBITDA as another way to measure financial performance on an ongoing basis. Adjusted EBITDA is meant to reflect the operating performance of Dynegy's entire power generation fleet for the period presented; consequently, it excludes the impact of mark-to-market accounting, impairment charges, and other items that could be considered non-operating or non-core in nature. Because EBITDA and Adjusted EBITDA are financial measures that management uses to allocate resources, determine Dynegy's ability to fund capital expenditures, assess performance against Dynegy's peers and evaluate overall financial performance, management believes they provide useful information for Dynegy's investors. In addition, many analysts, fund managers, and other stakeholders that communicate with Dynegy typically request its financial results in an EBITDA and Adjusted EBITDA format.

As prescribed by the SEC, when EBITDA or Adjusted EBITDA is discussed in reference to performance on a consolidated basis, the most directly comparable GAAP financial measure to EBITDA and Adjusted EBITDA is Net income (loss). Management does not analyze interest expense and income taxes on a segment level; therefore, the most directly comparable GAAP financial measure to EBITDA or Adjusted EBITDA when performance is discussed on a segment level is Operating income (loss).

Cash Flow Measure.

Dynegy's non-GAAP Cash Flow measure may not be representative of the amount of residual cash flow that is available to Dynegy for discretionary expenditures, since it may not include deductions for mandatory debt service requirements and other non-discretionary expenditures. Management believes, however, that Dynegy's non-GAAP Cash Flow measure is useful because it measures the cash generating ability of Dynegy's operating asset-based energy business relative to its capital expenditure obligations and financial performance.

Free Cash Flow is defined as cash flow from operations less non-discretionary maintenance and environmental capital expenditures, the cash impact of acquisition-related fees and financing costs plus the return of restricted cash. Free Cash Flow also includes receipts or payments related to interest rate swaps and excludes the impact of changes in collateral and working capital. Beginning in 2016, Free Cash Flow excludes certain capital costs related to compliance with environmental requirements. The most directly comparable GAAP financial measure to such measure is cash flow from operations.

Management believes that the historical non-GAAP measures and forward-looking non-GAAP measures disclosed in Dynegy's filings are only useful as an additional tool to help management and investors make informed decisions about Dynegy's financial and operating performance. Further there can be no assurance that the assumptions made in preparing forward-looking non-GAAP numbers will prove accurate, and actual results may be materially less or greater than those contained in the forward-looking non-GAAP numbers. By definition, non-GAAP measures do not give a full understanding of Dynegy; therefore, to be truly valuable, they must be used in conjunction with the comparable GAAP measures. In addition, non-GAAP financial measures are not standardized; therefore, it may not be possible to compare these financial measures with other companies' non-GAAP financial measures having the same or similar names. Dynegy strongly encourages investors to review its consolidated financial statements and publicly filed reports in their entirety and not rely on any single financial measure.

Item 7.01 Regulation FD Disclosure.
