ITEM: OTHER EVENTS
8.01

On May 1, 2008, Bovie Medical Corporation (“Bovie”) announced the acquisition of certain technology, patents and assets from Boston Scientific Corp. The acquired technology patents and assets related to the use of conductive sintered steel as an electrode for radio frequency (RF) cutting and coagulation, intended to lower blood loss, quicken procedure times and provide cost savings for hospitals.

On May 5, 2008, Bovie Medical announced a CE Mark for its modular Ergonomic Instruments (MEG laparoscopic line to be marketed throughout the European Union. The line’s patent pending modular forceps have been designed to provide added comfort while reducing per-procedure costs through the reduction of inventory and obsolescence. The proprietary instruments offer a simpler assembly process for laparoscopic procedures.
