

AEROSONIC CORP /DE/  
Form 10-K  
May 01, 2013

UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

Annual Report Pursuant to Section 13 or 15(d) of  
The Securities Exchange Act of 1934

For the Fiscal Year Ended January 31, 2013  
Commission File Number 1-11750

AEROSONIC CORPORATION

(Exact name of registrant as specified in its charter)

<b>Delaware</b>	<b>74-1668471</b>
<b>(State or other jurisdiction of incorporation or organization)</b>	<b>(I.R.S. Employer Identification No.)</b>

1212 North Hercules Avenue  
Clearwater, Florida 33765  
(Address of principal executive offices and Zip Code)

Registrant's telephone number, including area code: (727) 461-3000

Securities registered pursuant to Section 12(b) of the Act:

<b>Title of Each Class</b>	<b>Name of Each Exchange on Which Registered</b>
Common Stock, \$.40 par value	NYSE MKT

Securities registered pursuant to Section 12(g) of the Act:

None.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act  
Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Securities Act  
Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 (the "Exchange Act") during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K ☐.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of "large accelerated filer", "large accelerated filer", "non-accelerated filer" and "small reporting company" in Rule 12b-2 of the Exchange Act. (Check one)

Edgar Filing: AEROSONIC CORP /DE/ - Form 10-K

Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer (do not check if a smaller reporting company) ☐  
Smaller reporting company ☒

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).  
Yes ☐ No ☒

The aggregate market value of the common stock held by non-affiliates of the registrant as of July 27, 2012, the last business day of the registrant's most recently completed second quarter was approximately \$13,633,000, based upon the closing price of the common stock on the NYSE MKT on that date.

As of May 1, 2013, the issuer had 4,020,334 shares of Common Stock outstanding, net of treasury shares.

Documents Incorporated by Reference:

Incorporation by reference: Portions of registrant's definitive proxy statement for the 2013 Annual Meeting of Stockholders to be held July 18, 2013 into Part III of this Form 10-K. The definitive proxy statement or an amendment to this Annual Report on Form 10-K is expected to be filed with the Securities and Exchange Commission within 120 days after the close of the fiscal year covered by this Form 10-K.

## **PART I**

Item 1	Business	1
Item 1A	Risk Factors	8
Item 1B	Unresolved Staff Comments	17
Item 2	Properties	17
Item 3	Legal Proceedings	17
Item 4	Mine Safety Disclosures	17

## **PART II**

Item 5	Market for Registrant's Common Stock and Related Stockholder Matters and Issuer Purchases of Equity Securities	18
Item 6	Selected Financial Data	19
Item 7	Management Discussion and Analysis of Financial Condition and Results of Operations	20
Item 7A	Quantitative and Qualitative Disclosures About Market Risk	32
Item 8	Financial Statements and Supplementary Data	33
Item 9	Changes In and Disagreements With Accountants on Accounting and Financial Disclosures	33
Item 9A	Controls and Procedures	33
Item 9B	Other Information	34

## **PART III**

Item 10	Directors, Executive Officers and Corporate Governance	35
Item 11	Executive Compensation	35
Item 12	Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters	35
Item 13	Certain Relationships, Related Transactions and Director Independence	35
Item 14	Principal Accountant Fees and Services	35

## **PART IV**

Item 15	Exhibits and Financial Statement Schedules	36
	Signatures	40
	Consolidated Financial Statements and Notes to Consolidated Financial Statements	

## Forward-Looking Statements

Unless stated to the contrary, or unless the context otherwise requires, references to “Aerosonic,” “the Company,” “we,” “our” or “us” in this report include Aerosonic Corporation and its subsidiaries.

Certain statements made in this Annual Report on Form 10-K that are not statements of historical or current facts are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995.

Forward-looking statements may involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from historical results or from any future results expressed or implied by such forward-looking statements.

In addition to statements that explicitly describe such risks and uncertainties, readers are urged to consider statements in future or conditional tenses or, include terms such as “believes,” “belief,” “expects,” “intends,” “anticipates” or “plans” to be uncertain and forward-looking. Forward-looking statements may include comments as to our beliefs and expectations as to future events and trends affecting our business. Forward-looking statements are based upon management’s current expectations concerning future events and trends and are necessarily subject to uncertainties, many of which are outside of our control. The factors set forth in Item 1A. Risk Factors, as well as other factors, could cause our actual results to differ materially from those reflected or predicted in forward-looking statements.

If one or more of these or other risks or uncertainties materialize, or if the underlying assumptions prove to be incorrect, actual results may vary materially from those reflected in or suggested by forward-looking statements. Any forward-looking statement you read in this Annual Report on Form 10-K reflects our current views with respect to future events and is subject to these and other risks, uncertainties and assumptions relating to our operations, results of operations, growth strategy and liquidity. All subsequent written and oral forward-looking statements attributable to us or individuals acting on our behalf are expressly qualified in their entirety by this paragraph. You should specifically consider the factors identified in this Annual Report on Form 10-K that would cause actual results to differ from those referred to in forward-looking statements.

Any forward-looking statements are based on management’s beliefs and assumptions, using information currently available to us. We assume no obligation for updating, and do not intend to update, these forward-looking statements.

We have a January 31 fiscal year end. Accordingly, all references in this Annual Report on Form 10-K to a fiscal year mean the fiscal year ended on January 31 of the referenced year; for example, references to fiscal year 2013 mean the fiscal year ended January 31, 2013.

PART I

**ITEM 1. BUSINESS**

General

We are a Delaware corporation formerly known as Instrument Technology Corporation (“ITC”). ITC, which was incorporated in 1968, was the surviving corporation of a merger, in 1970, with Aerosonic Corp., a Florida corporation. Aerosonic Corp., which was incorporated in 1957, ceased to exist as a separate corporation as a result of the merger. Following the merger, ITC changed its name to Aerosonic Corporation. In January 1993, we acquired Avionics Specialties, Inc. (“Avionics”), a Virginia corporation located in Earlysville, Virginia, from Teledyne Industries, Inc. (“Teledyne”). Avionics was previously a division of Teledyne. In fiscal year 2008, we commenced the consolidation of the Avionics operations with our Clearwater, Florida location. Avionics remains a wholly-owned subsidiary of the Company.

During fiscal year 2012, we completed the relocation of substantially all of our Avionics' manufacturing and repair/overhaul capabilities from Virginia into our Clearwater, Florida facility. Additionally, during fiscal year 2013, we continued our efforts to sell the Earlysville facility.

We are principally engaged in one business segment, which is the manufacture and sale of aircraft instruments and sensors. We design and manufacture both mechanical and digital altimeters, airspeed indicators, rate of climb indicators, microprocessor controlled air data test sets, and a variety of other flight instrumentation. Additionally, we design and manufacture angle of attack stall warning systems; integrated multifunction probes, which are integrated air data sensors; and other aircraft sensors and monitoring systems.

## **Merger Agreement**

On April 19, 2013, we entered into an Agreement and Plan of Merger (the "Merger Agreement") with TransDigm Group Incorporated ("TransDigm"), and Buccaneer Acquisition Sub Inc. ("Purchaser"), an indirect wholly-owned subsidiary of TransDigm. Pursuant to the Merger Agreement, and on the terms and subject to the conditions described in the Merger Agreement, TransDigm agreed to conduct a cash tender offer (the "Offer") to purchase all of our issued and outstanding shares of common stock (the "Shares"), at a price of \$7.75 per share in cash, without interest (less any applicable withholding taxes). Following the successful completion of the Offer, and subject to the terms and conditions of the Merger Agreement, Purchaser will be merged with and into the Company, with the Company surviving as an indirect wholly-owned subsidiary of TransDigm.

The obligation of TransDigm and Purchaser to consummate the Offer is subject to customary conditions, including but not limited to: (a) at least a majority of the outstanding Shares (determined on a fully-diluted basis) having been validly tendered and not withdrawn prior to the expiration of the Offer; and (b) there having occurred no Change in Recommendation (as defined in the Merger Agreement) by our Board of Directors. The Merger Agreement permits us to solicit alternative acquisition proposals from third parties for 40 days, until May 29, 2013. There is no assurance that this process will result in an alternative transaction.

This Form 10-K is not an offer to purchase or a solicitation of an offer to sell our securities. The planned tender offer by TransDigm for all of our outstanding shares of common stock has not been commenced. On commencement of the tender offer, TransDigm will mail to our stockholders an offer to purchase and related materials and we will mail to our stockholders a solicitation/recommendation statement with respect to the tender offer. Purchaser will file its offer to purchase with the Securities and Exchange Commission (the "SEC") on Schedule TO, and we will file its solicitation/recommendation statement with the SEC on Schedule 14D-9. Our stockholders are urged to read these materials carefully when they become available, since they will contain important information, including terms and conditions of the offer. Our stockholders may obtain a free copy of these materials (when they become available) and other documents filed by Purchaser or us with the SEC at the website maintained by the SEC at [www.sec.gov](http://www.sec.gov). These materials also may be obtained (when they become available) for free by contacting the information agent for the

tender offer (when one is selected).

## Industry

Military original equipment manufacturers (“OEMs”), such as BAE Systems, Bell Helicopter, Korea Aerospace Industries, Lockheed Martin Corporation, Alenia Aermacchi, Sikorsky Aircraft Corporation and The Boeing Company (“Boeing”) increasingly rely on subcontractors to carry a greater share of aircraft design scope, including system requirements, hardware and software design, and physical and electrical interfaces. Supporting this increased need has enabled us to develop a greater technical capability for serving our customer base. Our increased technical capability has also positioned us to push further into the commercial aircraft market with new technologies. We continue to work with customers to identify new products and new product application opportunities and we are exploring the design and development of core technologies that will have applications across our product lines. This will allow us to better control obsolescence and reduce material costs while increasing capability.

We are an aerospace industry leader in the design and manufacturing of aircraft instrumentation, air data sensing and air data test equipment. Our instrumentation products are used for both primary flight data and standby redundant instrumentation in cockpits. Our electronic displays are used for primary and standby flight data representation. As cockpit panel space becomes more valuable in the new age of glass displays, we have maintained a strong position with OEMs as a premier supplier of quality aircraft instrumentation in the military, general aviation and commercial aircraft marketplaces. Our air data sensing product line offers a broad range of air data and aircraft attitude sensing devices ranging from Angle of Attack (AoA) sensors, Stall Warning Transmitters (SWT) and Integrated Multi-Function Probes (IMFP®) to leading-edge Modular Static Flush Port (MSFP) technology. This range of products allows us to offer a fully integrated avionics package from air data to display and backup instrumentation thus reducing the number of suppliers required on the aircraft. Interest in our MSFP and derivative products has come from manufacturers of new manned and unmanned aircraft from around the world demonstrating the unique nature of this product. Variants of current production/development products have been named for integration on three of the latest technology aircraft in the US, Korea and Japan.

We are moving rapidly through the development cycle on the OASIS® backup display system. This product makes the latest technology in backup systems available to a broader range of aircraft through innovative design and affordable pricing.

Building on our expertise with mechanical instrumentation, we successfully developed and marketed digital instrumentation and displays for both primary flight data systems and standby redundant systems to complement our mechanical line of business. Continued development and enhancement of current technology has yielded an advanced anti-icing design for legacy air data systems as well as a number of technology enhancing implementations for both military and commercial aircraft including entry into the Transport aircraft category and a variety of advanced technology fighter and unmanned aerial vehicle (“UAV”) opportunities.

Our current market focus continues to be design, development and supply of electronic and mechanical primary and standby flight control systems components and instruments. These include altimeters, airspeed indicators, angle of attack indicators, stall warning systems, air data measurement/computation systems and flight display systems. All of these products are critical elements in the aircrew’s ability to reliably assess aircraft performance and to safely and efficiently operate aircraft in the international airspace environment.

As a small company, it is imperative that we have the ability to add expertise as required to respond to demanding development efforts. As such we have developed advantageous relationships with test laboratories, design and development companies, and subject matter experts allowing us to “right size” our capabilities in response to contract and research necessities.

In conjunction with our development and production activities, Aerosonic has developed expertise in the build, test and validation of critical test equipment including ESS chambers and wind tunnels. Aerosonic is expanding that

knowledge to offer customers the ability to order turnkey solutions to their test needs.

## Strategy

Our market objectives are to deliver increasing value to our customers in three primary ways. First, because Aerosonic has a large installed base with many existing aircraft, as well as many long-standing relationships with global OEMs, we are working to ensure that our service, repair, and overhaul operations provide effective product support. This is a significant driver of customer satisfaction and financial contribution for our business. Second, we continuously strive to improve our ability to deliver new production on-time to customers' exacting manufacturing schedules and technical specifications. Aircraft manufacturers are focused on increasingly lean and cost-effective supply chains and we are working to ensure that we support their initiatives. Third, and most important from a growth perspective, we strive to design and deploy new products that enable our customers to deliver upgraded and/or new aircraft models. An important example of this is our work to develop digital instrumentation to replace aging mechanical designs. We have specialized air sensor, information processing, data presentation, design methodology, and manufacturing process knowledge that enables us to develop product solutions that enhance pilot performance and aircraft safety. Continually reinvesting and building on that capability in support of our customers is one of our core commitments.

Our business strategy is supported by our Company values, whereby we strive every day to be the best in the world at what we do. Our stated values include customer focus, open communication, honesty, mutual respect, trust, a bias for action, teamwork, leadership and other values that we believe attract good people, help retain the best and support high performance. We expect that, over time, a team of people dedicated to serving our stakeholders based on these shared values will lead to the success and growth of our Company.

## Products and Distribution

Our products are sold to manufacturers of commercial and private aircraft, both domestic and foreign, and the United States (“U.S.”) and numerous foreign military services. For the years ended January 31, 2013 and 2012, approximately 41% and 35%, respectively, of our sales were to the United States commercial sector. During these same two years, 33% and 44%, respectively, of our sales were either directly or indirectly to United States military services.

Additionally, we sell our products to customers outside of the U.S.. Our aggregate percentages of international sales to overall sales were 26% and 20% for our fiscal years 2013 and 2012, respectively.

Most of our instrument sales are made directly through our sales personnel to OEMs or to the United States military, with our remaining sales being made through distributors and commissioned sales representatives who resell to aircraft operators.

We produce a full line of mechanical and electro-mechanical cockpit instruments. These instruments operate independently of the aircraft electrical system, as they transfer valuable flight data to the pilot using only air pressure from aircraft probes as a power source.

We produce a leading-edge line of angle of attack (“AoA”) stall warning products, including a “self-test” AoA sensor. We also produce Integrated Multi-Function Probes (“IMFP®”). This product combines existing technologies, including the angle of attack/air data sensing probe and pressure sensing electronics. We are one of a few developers of flush port air data technologies and are finalizing designs for both a Korean and European UCAV implementations using the same core technologies with prospects for further global expansion. Our air data devices also include stall warning transmitter (“SWT”) and indicating devices. This integrated approach to providing aircraft air data reduces a customer’s system complexity with respect to aircraft troubleshooting and logistics support, increases reliability, reduces supply complexity and decreases system costs.

We also produce digital cockpit instruments. These Technical Standard Order (“TSO”) certified indicators combine accuracy, robustness and long-term reliability of digital electronic equipment, with a “pilot familiar” analog pointer display.

In 2007, we purchased the stock of OP Technologies, Inc. with the intention of completing any further development on its display product line that may have been required to obtain FAA certification. We dedicated significant resources and efforts in that regard, but it was not successful for a number of reasons including the economic environment and significant competition. Accordingly, on January 21, 2013, as part of our decision to discontinue further development and certification efforts on the Op Tech Flight Display product, we entered into a Development Collaboration and Intellectual Property Agreement with LG CNS Co., Ltd. (“LG”). The Collaboration Agreement provides for the sale of certain intellectual property of ours (the “Purchased IP”) to LG. The aggregate purchase price for the Purchased IP is \$2,300,000, \$1,553,000 of which was already paid to us. The remainder of the purchase price is payable by LG to us in two lump sum payments in January 2016 and January 2017.

We are well into the development cycle of our new OASIS® Standby Display System. This product allows us to offer a next generation product that complements our highly successful line of standby instruments and systems. The OASIS® offers current technology with a flexible architecture that promotes ease of installation at a price that is already generating interest in the fixed wing and helicopter markets.

## Customers

We primarily market our products to OEMs, particularly manufacturers of helicopters, corporate and private jets, and to contractors of military jets. Customers include, among others, the U.S. Government and a majority of the OEMs throughout the world. We also market our products to general aviation aircraft owners through our network of authorized distributors.

During fiscal year 2013, our largest customers, in terms of revenue, were the U.S. Government, Korea Aerospace Industries, Carp Industries and The Boeing Company, which represented 19%, 11%, 10% and 10% of total revenues, respectively. The loss of the U.S. Government, Korea Aerospace Industries or The Boeing Company as a customer would have a material adverse effect on our results of operations. Sales to Carp Industries are primarily sales of aftermarket parts that are sold through our distribution agreement. As such, we would expect these sales to survive any loss of the relationship with Carp Industries as that demand would transfer to one of our other distributors.

## Contracts

Our contracts are normally for production or development and are generally firm fixed-price contracts. Our production contracts are typically fixed-price for a one year period with options to be exercised over a one to five year period with pricing targets established. The aerospace industry trend for such contracts continues to move away from five year contracts and toward contracts of shorter duration. We also secure purchase orders from customers for product sales in the normal course of our business that are binding contracts upon our acceptance of the terms and conditions of the orders.

Fixed-price contracts provide for a firm fixed-price on a variety of products and quantities of those products. Long-term contracts allow us to negotiate better overall prices that fit into customers' production programs. These long-term commitments also allow us to capitalize on quantity based price reduction for raw materials.

Under firm fixed-price contracts, we agree to perform for an agreed-upon price. Accordingly, we derive benefits from cost savings; however, we also bear the risk of cost overruns.

In accordance with normal practice, most of our contracts with the U.S. Government and its agencies and departments are subject to partial or complete termination at any time at the U.S. Government's convenience. Our government contracts generally contain provisions providing that in the event of a termination for convenience by the U.S. Government, we shall have the right to recover allowable costs incurred to the date of termination as well as a proportionate share of the profit on the work completed, consistent with U.S. Government contract regulations and procedures.

The inherent nature of the U.S. Government's contracting and budgeting process may affect our operating results and production backlog. Examples include the limited availability of year-end monies to accomplish important last minute contracts for supplies and services, enactment of continuing resolutions that limit spending to the previous year's level until a budget is signed into law, late approval of new budgets, and the use and timing of supplemental appropriations. These events significantly affect the amount of orders that we have in backlog and the number and size of major contracts for our products.

## Sales and Marketing

We focus our sales efforts on government and military entities, OEMs and distributors. We continue to pursue additional aftermarket opportunities as well, given the slow OEM market and the resulting increase in retrofit, modification and repair programs.

Due to the integration of components manufactured by us with flight management systems, our sales force is generally involved at a very early stage with the aircraft manufacturers' engineers to integrate the components into the aircraft design. Our component instruments and systems are often integrated into the aircraft design helping to maintain and ensure the safe and effective operation of the aircraft.

At January 31, 2013, our backlog of firm orders was approximately \$30.3 million, an increase of approximately \$4.8 million when compared to our backlog as of January 31, 2012. The amount of backlog that is deliverable within twelve months was approximately \$16.3 million at January 31, 2013, an increase of approximately \$1.5 million when compared to January 31, 2012. The foregoing backlog amounts represent firm production and development orders only and do not include current contract options. Such option orders, however, may be subject to rescheduling and/or cancellation. Backlog amounts include business generated through repair and spare parts orders.

## Government Regulation

The manufacture and installation of our products in aircraft owned and operated in the U.S. is governed by U.S. Federal Aviation Administration ("FAA") regulations. The regulations that have the most significant impact on us are the Technical Standards Order ("TSO") and Type Certificate or Supplemental Type Certificate ("STC") certifications. TSO outlines the minimum standards that a certain type of equipment must satisfy to be TSO certified. Many OEMs and retrofitters prefer TSO-certified aviation equipment because it acts as an aerospace industry-wide stamp of approval. We also sell our products to European and other non-U.S. OEMs, which typically require approval from the Joint Aviation Authorities ("JAA").

We have received TSO approval on over 400 different instruments, as well as 70 STCs. Most new instruments qualify for approval based on similarity. This provides a significant advantage to us and our customers by reducing the time required obtaining TSO approval on new instruments. We also have many instruments with JAA and development contractor approval.

## Quality Assurance

Product quality is critical in the aerospace industry. We strive to maintain the highest standards within our operations.

We are ISO 9001/AS9100 certified. ISO 9001/AS9100 standards are an international consensus on effective management practices for ensuring that we can consistently deliver our products and related services in a manner that meets or exceeds customer quality requirements. ISO 9001/AS9100 standards outline the minimum requirements a quality system must meet to achieve this certification.

As an ISO 9001/AS9100 certified manufacturer, we can represent to our customers that we maintain high quality industry standards in the education of employees and the design and manufacture of our products. In addition, our products undergo extensive quality control testing prior to being delivered to customers. As part of our quality assurance procedures, we maintain detailed records of test results and quality control processes.

#### Patents and Licenses

We have patents on certain commercial and military products such as air data probes. We also have certain registered trademarks. This intellectual property portfolio, in the aggregate, is valuable to our operations; however, we do not believe the business, as a whole, is materially dependent on any single patent, trademark or copyright.

## Research and Development

We expended approximately \$4,948,000 and \$2,719,000 in both internally and externally funded research and development (“R&D”) costs for potential new products and enhancements during the years ended January 31, 2013 and 2012, respectively.

We continued various development efforts during fiscal year 2013 for both military and commercial applications. Creating innovative digital, integrated standby devices has been a primary focus of our R&D efforts, along with additional advancements for our industry unique air data instruments. These efforts will provide for an integrated product line from sensors and information processing through primary and backup displays for the flight crew. Further, we plan to continue our design efforts to satisfy our existing contractual obligations as well as our internal development of products for future customer applications. This includes re-engineering of existing products and processes to improve manufacturability, increase reliability, enhance throughput, and reduce production costs.

## Competition

Markets for our products are highly competitive and characterized by several aerospace industry niches in which a number of manufacturers specialize. In our market niche, we believe that we manufacture a broader variety of aircraft instruments than our competitors who, in most instances, compete with us on no more than a few types of aircraft instruments. In addition to mechanical instruments that formed the initial foundation of our business, we offer digital instruments and components that are integrated into the flight management system of aircraft. This product offering allows us to compete on many levels within the aerospace industry.

Our AoA, stall warning and IMFP® products provide flight critical functions and are typically designed to meet the requirements of a specific aircraft. Our rotating probe design provides a competitive advantage in terms of responsiveness and accuracy. There is limited competition in this product family.

We believe that our principal competitive factors are development cycle time, responsiveness to customer preferences, product quality, delivery reliability, price, technology, product reliability and product variety. We believe that our significant and long-standing customer relationships reflect our ability to compete favorably with respect to these factors.

## Manufacturing, Assembly and Material Acquisition

Our manufacturing processes, except for certain electronic components, include the manufacture of all principal components and subassemblies for the instruments, the assembly of those components, and the testing of products at various stages in the manufacture and assembly process.

We manufacture, or have the capability to manufacture, principally all components, except for certain electronic components and subassemblies for our instruments. Raw materials, such as glass lenses, raw metals and castings, generally are available from a number of sources and in sufficient quantities to meet current requirements, subject to normal lead times. We believe that retaining the ability to completely manufacture the instruments allows us the flexibility to respond to customers quickly and control the quality of our products.

When appropriate, less critical component parts are purchased under short and long-term supply agreements. These purchased parts are normally standard parts that can be easily obtained from a variety of suppliers. This allows us to focus our attention on more critical component parts to maintain a level of quality control required to meet the exacting tolerances demanded within the aerospace industry and by our customers. Recently, we have increased the outsourcing of standard parts.

## **Employees**

As of both January 31, 2013 and January 31, 2012, we employed 199 full time employees. Our future success depends on the ability to attract, train and retain quality personnel. Our employees are not represented by labor unions and we consider our relations with our employees to be good.

## **Available Information**

Our most recent Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to those reports may be viewed or downloaded electronically, free of charge, from our website: <http://www.aerosonic.com> as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. In addition, you may read and copy any materials we file with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549. To obtain information on the operation of the Public Reference Room, you may call the SEC at 1-800-SEC-0330. Our recent press releases are also available to be viewed or downloaded electronically at <http://www.aerosonic.com>. We will also provide electronic copies of our SEC filings free of charge upon request. Any information posted on or linked from our website is not incorporated by reference into this Annual Report on Form 10-K. The SEC also maintains a website at <http://www.sec.gov>, which contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC.

## **ITEM 1A. RISK FACTORS**

The following factors are important and should be considered carefully in connection with any evaluation of our business, financial condition, results of operations, prospects, or an investment in our common stock. In particular, our results of operations, revenue, liquidity and capital resources may be materially and unfavorably affected by a number of risk factors, trends and uncertainties. Set forth below are the risk factors, trends and uncertainties which we believe could have a material and unfavorable impact on our results of operations, revenue, liquidity, capital resources and any investment in our stock. Additional risk factors, trends and uncertainties may be discussed elsewhere within this document.

### ***Our business is dependent on the aerospace industry and defense spending***

Our principal business is in the aerospace industry. Our commercial sector business is cyclically affected by the state of the economy. In the military sector, we are affected by overall spending levels in the defense budgets of the U.S.

and foreign governments, the priorities reflected in those budgets, and developments affecting the timing of those expenditures. Adverse developments in the economy generally, aerospace industry in particular, or government defense sector could have a material adverse effect on our results of operation.

***A portion of our business is dependent on U.S. Government contracts***

Our dependence on revenue from U.S. Government contracts subjects us to a number of risks, including the risk that we may not be successful in bidding for future contracts and the risk that funding for these contracts may be delayed or diverted to other uses.

We perform work under a number of contracts with the U.S. Department of Defense and other agencies and departments of the U.S. Government. Sales under these contracts as a whole, including sales under contracts with the U.S. Department of Defense, as prime contractor or subcontractor, represented approximately 33% and 44% of our total revenue for fiscal years 2013 and 2012, respectively.

U.S. Government contracts are conditioned upon the continuing availability of Congressional appropriations. Congress typically appropriates funds for a given program on a fiscal-year basis even though contract performance may take more than one year. As a result, at the beginning of a major program, a contract is typically only partially funded, and additional monies are normally committed to the contract by the procuring agency only as appropriations are made by Congress for future fiscal years.

Most of our U.S. Government contracts are subject to termination by the U.S. Government either at its convenience or upon our default. Termination-for-convenience provisions permit only the recovery of costs incurred or committed, settlement expenses, and profit on work completed prior to termination. Termination-for-default imposes liability on us for excess costs incurred by the U.S. Government in procuring undelivered items from another source.

A substantial majority of our U.S. Government contracts are fixed-price type contracts. A majority of these contracts are for mature products and costs are well established. However, some contracts include costs associated with product development. These types of contracts bear the inherent risk that actual performance cost may exceed the fixed contract price.

We, like other U.S. Government contractors, are subject to various audits, reviews and investigations (including private party "whistleblower" lawsuits) relating to our compliance with federal and state laws. In addition, we have a compliance program designed to uncover issues that may lead to voluntary disclosures to the U.S. Government. Generally, claims arising out of these inquiries and voluntary disclosures can be resolved without resorting to litigation. However, should the Company be charged with violation of law, or should the U.S. Government determine that the Company is not a "presently responsible contractor," the Company could be temporarily suspended or, in the event of a violation, could be debarred for up to three years from receiving new U.S. Government contracts or government-approved subcontracts. In addition, we could expend substantial amounts in defending against such charges and in damages, fines and penalties if such charges are proven or result in negotiated settlements. If we were to be debarred from U.S. Government contracts, it would have a material adverse effect on our results of operations, revenue, liquidity, and capital resources.

***Changes in levels of U.S. government defense spending or overall acquisition priorities could negatively impact our financial position and results of operations.***

We derive a substantial portion of our revenue from the U.S. government, primarily from defense related programs with the U.S. Department of Defense ("U.S. DoD"). Levels of U.S. defense spending in future periods are very difficult to predict and subject to significant risks. In addition, significant budgetary constraints may result in further reductions to projected spending levels. In particular, U.S. government expenditures are subject to the potential for automatic reductions, generally referred to as "sequestration." Sequestration may occur during fiscal year 2014, resulting in significant additional reductions to spending by the U.S. DoD on both existing and new contracts as well as disruption of ongoing programs. Even if sequestration does not occur, we expect that budgetary constraints and ongoing concerns regarding the U.S. national debt will continue to place downward pressure on U.S. DoD spending levels. Due to these and other factors, overall U.S. government defense spending could decline, which could result in significant reductions to revenue, cash flow, profit and backlog in our business.

In addition, as a result of the significant ongoing uncertainty with respect to both U.S. defense spending levels and the nature of the threat environment, we expect the U.S. DoD to continue to emphasize cost-cutting and other efficiency

initiatives in its procurement processes. If we can no longer adjust successfully to these changing acquisition priorities and/or fail to meet affordability targets set by the U.S. DoD customer, our revenues and market share would be further impacted.

***As part of the aerospace industry our business is heavily regulated and the cost of non-compliance with applicable regulations could be significant***

The aerospace industry is heavily regulated and failure to comply with applicable laws or regulations could reduce our sales or require us to incur additional costs to achieve compliance, which could have a material adverse effect on our results of operations.

The FAA prescribes standards and licensing requirements for aircraft components, including virtually all of our products. Comparable agencies, such as the U.K. Civil Aviation Authority, the Japanese Civil Aviation Board and South Korea's Aviation Safety Authority regulate these matters in other countries.

If we fail to obtain a required license for one of our products or services or lose a license previously granted, the sale of the subject product or service would be prohibited by law until such license is obtained or renewed. In addition, designing new products to meet existing regulatory requirements and retrofitting installed products to comply with new regulatory requirements can be both expensive and time consuming.

From time to time the FAA proposes new regulations. These new regulations generally cause an increase in costs to bring our existing and developmental products into compliance. Indirect events in other segments of the sector such as design failures (e.g., Boeing's 787 Lithium Ion battery failures) can influence development and production while regulatory issues are resolved.

***We have to compete against larger well-established companies that are well capitalized***

We compete with numerous well-established companies. Some of these companies have significantly greater financial, technological and marketing resources than us. Our ability to be an effective competitor depends in large part on our success in causing our products to be selected for installation in new aircraft, including next generation aircraft, and in avoiding product obsolescence. In addition some of our larger customers could develop the capability to manufacture products or provide services similar to the products we manufacture or the services we provide. This could result in these customers competing directly with us for sales of these products or services, all of which could significantly reduce our revenues. There can be no assurance that we will be able to compete successfully against our current or future competitors or that the competitive pressures we face will not result in reduced revenues and market share.

***We are engaged in a highly competitive marketplace, which demands that producers continue to develop new products. Our business will be adversely affected if we are not able to continue to develop new and competitive products***

Our customers continually seek improvements in the products that we manufacture and market. As a result, in order to meet our customers' needs, we must continue to develop new products and innovations and enhancements to existing products. Many of our competitors have significantly more capital than we have and as a result have the ability to devote more resources to research and development and to marketing of their products. In order to remain competitive, we must continue to devote a material portion of our financial resources to research and development and there is no assurance that we will be successful in our product improvement efforts in our competitive marketplace.

***We face continuous pricing pressure from our customers and our competitors. This will affect our margins and therefore our profitability and cash flow unless we can manage efficiently our manufacturing costs and market our products based on superior quality***

Our customers often award contracts based on product pricing, and we believe we have not received some awards due to pricing discounts given by our competitors. Many of our competitors have significantly greater financial resources than we have, and as a result may be able to withstand the adverse effect of discounted pricing and reduced margins in order to build market share. While one of our strategies is also to discount to retain and increase market share and to seek to manage our manufacturing efficiently to sustain acceptable margins, we may not be able to maintain appropriate prices or to manage product manufacturing costs sufficiently to sustain acceptable margins. Similarly, we seek to compete based on product quality rather than price, but we may not be successful in these efforts with enough contract awards to offset the need to reduce prices for other products. This could adversely affect our profitability, our liquidity and our market share.

***Increases in the prices paid for raw materials or labor costs may adversely affect profit margins***

If we experience significant increases in the prices paid for raw materials or labor costs, we may not be able to pass through to our customers such increases in those costs. Even if we are able to pass through all or a portion of such cost increases to our customers, profit margins on such products may be reduced. Fixed-price contracts are especially susceptible to such profit margin reductions.

***Our products are used in activities that are inherently risky. Accordingly, we may face product liability and exposure to other claims for which we may not be able to obtain adequate insurance***

The products that we manufacture are typically used in applications and activities that involve high levels of risk of personal injury. Failure to use these products for their intended purposes, failure to use these products properly, malfunction of these products and, in some circumstances, even correct use of these products could result in serious bodily injury or death. We cannot guarantee that our insurance coverage would be sufficient to cover the payment of any potential claim arising out of the use of our products. In addition, we cannot guarantee that our current insurance or any other insurance coverage will continue to be available or, if available, that it will be obtainable at a reasonable cost. Any substantial uninsured loss thus would have to be paid out of our assets as applicable and may have a material adverse effect on our business, financial condition, results of operations and liquidity. If we are unable to obtain product liability coverage, then we may be prohibited from bidding for orders from certain government customers because many governmental agencies currently require such insurance coverage. Any inability to bid for government contracts as a result of insufficient insurance coverage would have a material adverse effect on our business, financial condition, results of operations and liquidity.

***Our industry has rapid technological changes and products that are subject to obsolescence - as a result, we are developing new products that might not be successful***

Our operating results depend in part on our ability to introduce new and enhanced products on a timely basis. Successful product development and introduction depend on numerous factors, including our ability to anticipate customer and market requirements, changes in technology and aerospace industry standards, our ability to differentiate our offerings from offerings of our competitors, and market acceptance. The markets for a number of our products and services are generally characterized by rapid technological development, evolving aerospace industry standards, changes in customer requirements and new product introductions and enhancements. A faster than anticipated change in one or more of the technologies related to our products or services or in market demand for products or services based on a particular technology could result in faster than anticipated obsolescence of certain of our products or services and could have a material adverse effect on our business, results of operations and financial condition. We might not be successful in our efforts to develop new products and technology that gain market acceptance. Currently accepted aerospace industry standards are also subject to change, which may contribute to the obsolescence of our products or services and could have a material adverse effect on our business, results of

operations and financial condition.

***We face unforeseen liabilities arising from possible acquisitions and dispositions of businesses***

We have engaged in acquisitions of businesses in the past, and expect to continue to do so in the future. There could be unforeseen liabilities that arise in connection with the businesses that we may acquire in the future. In addition, there may be liabilities that we fail, or we are unable, to discover in the course of performing due diligence investigations on each business that we have acquired or may acquire.

***We are dependent on the ability to maintain reasonable levels of working capital along with capital needs for expansion***

Our need to expend resources on research and development to provide our customer base with new and enhanced products as well as to continuously upgrade our process technology and manufacturing capabilities requires us to invest necessary resources on an annual basis. If we elect to expand our operations in future periods, whether as a result of organic growth or through strategic acquisitions, our capital needs would increase. Our ability to raise capital to meet our existing and future needs may depend on a variety of factors, some of which will not be within our control, including investor perceptions of us, our businesses and the industries in which we operate, and general economic conditions. We may be unable to successfully raise additional capital, if needed. If we are unable to generate sufficient cash from operations or raise additional capital in the future, we may have to limit our growth, enter into less favorable financing arrangements, or scale back on planned research and development or upgrades, any of which could have a materially adverse effect on our profitability.

***We rely significantly on our ability to fill orders on a timely basis and collect accounts receivable for liquidity needs***

Our liquidity depends on cash generated from operations. We have been challenged during fiscal years 2013 and 2012 to efficiently process orders, ship finished goods, and collect receivables in order to maintain liquidity. Should we continue to experience operational inefficiencies in any of these areas it will have an adverse effect on our financial condition, operating results and cash flows, as well as our ability to access credit markets and to obtain reasonable trade terms from our vendors.

***We continue to experience liquidity challenges***

In addition to debt service on our credit facilities, we have significant cash obligations that we must meet in the near future. Should we not be able to execute our business plan to meet our cash obligations, improve our cash flows from operations, contain costs related to the development of new products and continue to obtain reasonable vendor terms, our financial condition and operating results will continue to suffer. See "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources.”

***The terms of our credit facilities include various covenants, and failure to meet these covenants could affect our ability to borrow***

Our Credit Facility with BMO Harris Bank, N.A. (“BMO Harris Bank”) requires us to maintain compliance with financial covenants that are based on total stockholders’ equity, ratio of funded debt to EBITDA covenant, and a fixed charge coverage ratio. We complied with all financial covenants as of and for the fiscal year ended January 31, 2013, however, we were not in compliance with certain financial covenants for the periods July 29, 2011 and October 28, 2011. The lender waived non-compliance for these periods and adjusted the funded debt to EBITDA covenant for our 2012 fiscal year, but there is no assurance that the lender will waive compliance or amend this Credit Facility in future periods, if such a waiver or amendment is needed. A default under the Credit Facility would adversely affect us. See "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources.”

Our Credit Facility with BMO Harris Bank is also subject to renewal provisions, including a maturity date for our Equipment Credit Line Note of May 1, 2014. This renewal may become more challenging as a result of our future financial position and credit constraints in the U.S. banking markets as a whole. Failure to obtain permanent financing may impair our liquidity.

***We face risks associated with handling and use of hazardous substances and related environmental matters***

Our operations require the handling and use of hazardous substances, and we are subject to federal, state and local laws, regulations, rules and ordinances relating to pollution, the protection of the environment and the use or cleanup of hazardous substances and wastes. From time to time, our operations could result in violations under such environmental laws, including spills or other releases of hazardous substances into the environment. We may incur substantial costs or experience interruptions in our operations for actual or alleged violations or compliance requirements arising under environmental laws. Additionally, we may be liable for the costs of investigating and cleaning up environmental contamination on or from our properties. In the event of a major incident, we could incur material costs or experience interruption in our operations as a result of addressing the incident and implementing measures to prevent such incidents in the future, as well as potential litigation that could arise from such an incident. In addition, we could incur significant expenditures in order to comply with existing or future environmental laws.

***We face risks associated with international sales***

During fiscal years 2013 and 2012, international sales accounted for approximately 26% and 20%, respectively, of our total revenues. We anticipate that future international sales will continue to account for a significant percentage of our revenues. Risks associated with these sales include:

- Political and economic instability;
- Export controls and other trade restrictions;
- Changes in legal and regulatory requirements;
- U.S. and foreign government policy changes affecting the markets for our products;
- Changes in tax laws and tariffs;
- Convertibility and transferability of international currencies; and
- International currency exchange rate fluctuations.

Any of these factors could have a material adverse effect on our business, results of operations and financial condition. Currency exchange rate fluctuations may negatively affect the cost of our products to international customers and therefore reduce our competitive position.

***If we are unable to successfully attract and retain executive leadership and other key personnel, our ability to successfully develop and market our products and operate our business may be harmed***

Our future success depends to a significant extent upon the continued service of our executive officers and other key management and technical personnel and on our ability to continue to attract, retain and motivate qualified personnel. Recruiting and retaining skilled technical personnel is highly competitive. The loss of the services of one or more of our key employees or our failure to attract, retain and motivate qualified personnel could have a material adverse effect on our business, financial condition and results of operations.

***Terrorism and world conflict could adversely affect our ability to market our product***

United States and global responses to the Middle East conflict, terrorism, perceived nuclear, biological and chemical threats and other global crises increase uncertainties with respect to U.S. and other business and financial markets. Several factors associated, directly or indirectly, with such crises and perceptions, including responses thereto, may adversely affect us.

While some of our products that are sold to the U.S. Government may experience greater demand as a result of increased defense spending, various responses could realign U.S. Government programs and affect the composition, funding or timing of our government programs. U.S. Government spending could shift to defense programs in which we do not participate.

We have contracts with the government of South Korea. Continued actions and perceived provocations by the government of North Korea have resulted in increased concern regarding the stability of the Korean armistice. Additionally, reports indicate that North Korea has moved to produce and test nuclear weapons or otherwise provoke the U.S. and international community. Resulting instability on the Korean peninsula, and any U.S., local or global responses to perceived provocations by the government of North Korea, could impact our contracts with South Korea. While an escalation of hostilities on the Korean peninsula might lead to increased military spending by South Korea, there is no certainty that our contracts with South Korea would benefit. Additionally, it is possible that any instability in that region could have a negative impact on our contracts.

***Completion of the pending acquisition by TransDigm is uncertain***

On April 22, 2013, we announced that we entered into the Merger Agreement for TransDigm to acquire us. Completion of this transaction is subject to conditions and there is no assurance that this process will lead to a completed transaction. The Merger Agreement permits us to solicit alternative acquisition proposals from third parties for 40 days, until May 29, 2013. There is no assurance that this process will result in an alternative transaction. In addition, this process may distract the attention of our Board of Directors and management from our business, cause us to incur significant expenses pursuing this transaction, or impair our relationships with customers, suppliers and employees. If we are unable to effectively manage these risks, our business, financial condition, or results of operations might be adversely affected.

***Our stock price is volatile because it is affected by numerous factors outside of our control***

The market price and trading volume of our common stock is subject to significant volatility and this trend may continue. The general economic, political, and stock market conditions that may affect the market prices of our common stock are outside our control. The value of our common stock may decline regardless of our operating performance or prospects. Factors affecting market price include, but are not limited to: (i) variations in our operating results and whether we have achieved our key business targets; (ii) the limited number of shares of our common stock available for purchase or sale in the public markets; (iii) sales or purchases of large blocks of stock; (iv) changes in, or failure to meet, earnings estimates; (v) changes in securities analysts' buy/sell recommendations; (vi) differences between reported results and those expected by investors and securities analysts; and (vii) announcements of new contracts by us or by our competitors. In the past, securities class action litigation has been instituted against companies following periods of volatility in the market price of their securities.

Other factors and general market conditions that could affect our stock price are:

- Our quarterly and annual operating results and variations therein;

- Changes in earnings estimates by securities analysts;
- Changes in our business;
- Changes in the market's perception of our business;
- Changes in the businesses, earnings estimates or market perceptions of our competitors or customers;
- Changes in the outlook for the aerospace industry;
- Changes in general market or economic conditions unrelated to our performance;
- Changes in the legislative or regulatory environment;
- Changes in U.S. defense spending or appropriations;
- Increased military or homeland defense activities;

- An outbreak or escalation of national or international hostilities;
- Terrorist attacks;
- Sales of significant blocks of our common stock; and
- Our ability to successfully maintain our line of credit.

Additionally, the stock market has experienced extreme price and volume fluctuations in recent years that have significantly affected the quoted prices of the securities of many companies, including companies in the aerospace industry. The changes often appear to occur without regard to specific operating performance. The price of our common stock could fluctuate based upon factors that have little or nothing to do with our business or performance and these fluctuations could materially reduce our stock price.

***We do not plan to pay cash dividends on our common stock in the foreseeable future***

We intend to retain our earnings to finance the development and expansion of our business. Additionally, covenants in our long-term debt agreements may restrict our ability to pay dividends. This lack of dividend could adversely affect the market for our common stock and the return on our common stock for our stockholders.

***Our common stock may become subject to penny stock rules, which may make it more difficult for our stockholders to sell their common stock***

Our common stock may become a “penny stock” pursuant to Rule 3a51-1 of the Exchange Act. Broker-dealer practices in connection with transactions in penny stocks are regulated by certain penny stock rules adopted by the SEC. Penny stocks generally are defined as equity securities with a price of less than \$5.00 per share. The penny stock rules require a broker-dealer, prior to purchase or sale of a penny stock not otherwise exempt from the rules, to deliver to the customer a standardized risk disclosure document that provides information about penny stocks and the risks associated with the penny stock market. The broker-dealer also must provide the customer with current bid and offer quotations for the penny stock, the compensation of the broker-dealer and its salesperson in the transaction, and monthly account statements showing the market value of each penny stock held in the customer account. In addition, the penny stock rules generally require that, prior to a transaction in a penny stock, the broker-dealer make a special

written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written agreement to the transaction. These disclosure requirements, that apply to any stock that becomes subject to the penny stock rules, may have the effect of reducing the level of trading activity of our stock in the secondary market.

***We have risks related to the inherent limitations of internal control systems***

Effective internal controls are necessary for us to provide reliable financial reports. If we cannot provide reliable financial reports, our operating results could be misstated, our reputation may be harmed and the trading price of our stock could be negatively affected. Our management has concluded that there are no material weaknesses in our internal controls over financial reporting as of January 31, 2013. However, there can be no assurance that our controls over financial processes and reporting will be effective in the future or that additional material weaknesses or significant deficiencies in our internal controls will not be discovered in the future. Any failure to remediate any future material weaknesses or implement required new or improved controls, or difficulties encountered in their implementation, could harm our operating results, cause us to fail to meet our reporting obligations or result in material misstatements in our financial statements or other public disclosures. Inferior internal controls could also cause investors to lose confidence in our reported financial information, which could have a negative effect on the trading price of our stock.

We cannot guarantee that our internal controls and disclosure controls will prevent all error, loss, and fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. In addition, the design of a control system must reflect resource constraints and the benefit of controls relative to their costs.

***Our forward-looking statements and projections may prove to be inaccurate***

Our actual financial results likely will be different from those projected due to the inherent nature of projections and may be better or worse than projected. Given these uncertainties, you should not rely on any forward-looking statements that we provide. The forward-looking statements contained in this Form 10-K speak only as of the date of this Form 10-K. We expressly disclaim a duty to provide updates to forward-looking statements after the date of this Form 10-K to reflect the occurrence of subsequent events, changed circumstances, changes in our expectations, or the estimates and assumptions associated with them. The forward-looking statements in this Form 10-K are intended to be subject to the safe harbor protection provided by the federal securities laws.

## ITEM 1B. UNRESOLVED STAFF COMMENTS

Not Applicable.

## ITEM 2. PROPERTIES.

The following table sets forth the locations and general characteristics of our principal properties:

Location	Approximate Number of Square Feet of Plant and Office Area
Plant and office facilities, 1212 North Hercules Avenue, Clearwater, Florida (Owned)	61,000
Plant facility held for sale, 3369 Earlysville Road, Earlysville, Virginia (Owned)	53,000

On August 8, 2008, we suffered the destruction of one of the buildings comprising our Clearwater, Florida facility as a result of a fire. The Clearwater, Florida property, as reconfigured, is fully occupied by us and suitable for our present level of production.

In preparation for the sale of the Earlysville, Virginia facility, we engaged an environmental consulting firm to survey the property for any possible soil or groundwater contamination. This survey revealed impacts to both shallow soils and groundwater that may have resulted from the accidental loss of solvents by a former owner of the property. During fiscal year 2013, we signed an administrative order on consent with the U.S. Environmental Protection Agency to provide the former owner with access to the property and the former owner of the property signed an administrative order on consent with the U.S. Environmental Protection Agency for completion of a contamination characterization study. As a result of the initial and subsequent surveys, our responsibility for the remaining contamination treatment costs, future monitoring, oversight and other related costs is estimated at \$404,000 as of January 31, 2013. We have capitalized these costs as an increase to property held for sale, net, since such costs will be incurred in preparation for the sale of the Earlysville, Virginia facility and will not result in a carrying value in excess of the estimated fair value less cost to sell. Costs incurred during fiscal year 2013 totaled \$22,000 and costs incurred during the fiscal year ended January 31, 2012 totaled \$20,000. At this time, we cannot predict how much, if any, we will incur for more costs in fiscal year 2014.

On September 20, 2007, we signed a five-year operating lease at a much smaller 9,000 square foot facility in Charlottesville, Virginia to serve as our new location for support and repair/overhaul activities for existing Avionics Specialties products. During fiscal year 2012, substantially all of the support and repair/overhaul activities for existing Avionics Specialties products relocated from the leased facility in Charlottesville, Virginia to our facility in Clearwater, Florida. During fiscal year 2013, the operating lease in Charlottesville, Virginia terminated.

### **ITEM 3. LEGAL PROCEEDINGS**

From time to time, we may be involved in certain claims and legal actions arising in the ordinary course of business. In the opinion of management, at this time, there are no material claims or legal actions at this time.

### **ITEM 4. MINE SAFETY DISCLOSURE**

Not applicable.

## PART II

**ITEM MARKET FOR REGISTRANT'S COMMON STOCK AND RELATED STOCKHOLDER MATTERS**  
**5. AND ISSUER PURCHASES OF EQUITY SECURITIES**

**Market for Common Stock and Dividends**

Our common stock is listed on the NYSE MKT under the symbol "AIM." The range of high and low sales prices as reported by the NYSE MKT for each of the quarters of the fiscal years ended January 31, 2013 and January 31, 2012 was as follows:

	COMMON STOCK MARKET PRICE	
	HIGH	LOW
2013		
Fourth quarter	\$ 3.90	\$ 2.64
Third quarter	\$ 3.83	\$ 3.07
Second quarter	\$ 4.21	\$ 3.17
First quarter	\$ 3.40	\$ 2.35
2012		
	HIGH	LOW
Fourth quarter	\$3.39	\$2.15
Third quarter	\$3.45	\$2.25
Second quarter	\$3.48	\$2.86
First quarter	\$3.70	\$2.60

As of May 1, 2013, our outstanding shares of common stock were owned by approximately 2,000 stockholders of record.

During those same periods, no cash dividends were paid. We do not anticipate or intend on paying a dividend in the foreseeable future. Rather, we intend to retain our earnings to finance the development and expansion of our business. Additionally, covenants in our long-term debt documents may restrict our ability to pay dividends. Any future payment of any dividends on our common stock and the amount thereof will depend on our earnings, financial requirements, compliance with the above described covenants, and other factors deemed relevant by our Board of Directors.

## Securities Authorized for Issuance under Equity Compensation Plans

Information regarding our equity compensation plan at January 31, 2013 is summarized as follows:

Plan category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted average exercise price of outstanding warrants and rights	(c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders	330,100	\$ 2.87	419,900
Equity compensation plans not approved by security holders	None	N/A	N/A
Total	330,100	\$ 2.87	419,900

Stock warrants issued to the Investors, as discussed in Note 7 of “Notes to Consolidated Financial Statements”, are not included in the above table as they were not issued from an equity compensation plan.

**ITEM 6. SELECTED FINANCIAL DATA.**

The following table represents selected financial data for the most recent five fiscal years ended January 31. The data set forth below does not purport to be complete. It should be read in conjunction with, and is qualified in its entirety by, the more detailed information, including the Consolidated Financial Statements and Notes, appearing elsewhere in this document. The selected financial data as of January 31, 2011, 2010 and 2009 and for the years ended January 31, 2011, 2010 and 2009 have been derived from audited financial information not separately presented herein.

	As of and for the Years Ended January 31,				
	2013	2012	2011	2010	2009
Revenues, net	\$31,021,000	\$29,607,000	\$29,618,000	\$31,136,000	\$20,451,000
Cost of sales	(19,091,000)	(21,112,000)	(20,486,000)	(20,268,000)	(18,410,000)
Gross profit	11,930,000	8,495,000	9,132,000	10,868,000	2,041,000
Selling, general and administrative expenses	(10,152,000)	(7,154,000 )	(7,415,000 )	(6,725,000 )	(7,550,000 )
	13,000	-	-	-	18,000

Gain on sale of property, plant and equipment

Operating income (loss)	1,791,000	1,341,000	1,717,000	4,143,000	(5,491,000 )
Gain on sale of intangible assets	1,990,000	-	-	-	-
Other (expense) income	(339,000 )	(513,000 )	(637,000 )	(54,000 )	197,000
Income (loss) before income taxes	3,442,000	828,000	1,080,000	4,089,000	(5,294,000 )
Income tax (expense) benefit	(920,000 )	(436,000 )	(455,000 )	172,000	(33,000 )
Net income (loss)	\$2,522,000	\$392,000	\$625,000	\$4,261,000	\$(5,327,000 )
Basic earnings (loss) per share	\$0.67	\$0.10	\$0.17	\$1.15	\$(1.48 )
Fully diluted earnings (loss) per share	\$0.62	\$0.10	\$0.15	\$1.09	\$(1.48 )
Total assets	\$23,324,000	\$23,035,000	\$23,678,000	\$21,476,000	\$17,761,000
Long-term debt (1)	\$5,177,000	\$8,143,000	\$8,553,000	\$7,933,000	\$6,022,000

(1) Long-term debt is defined as all outstanding long-term debt and capital leases, including current maturities, and the revolving credit facility.

## **ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.**

### **EXPLANATORY NOTE**

Management's Discussion and Analysis of Results of Operations and Financial Condition ("MD&A") is provided to help provide an understanding of our business, financial condition, changes in financial condition and results of operations. The following should be read in conjunction with our Consolidated Financial Statements and Notes included elsewhere in this report. Our MD&A is organized as follows:

**Overview.** This section contains trend analysis, a summary of the challenges we encountered this fiscal year and steps we are taking to address these challenges. This section may contain forward-looking statements. These statements are based on our current expectations and actual results may materially differ from such expectations. Among the factors that could cause actual results to vary are those described in this "Overview" section and in "Item 1A. Risk Factors."

**Results of Operations.** This section provides an analysis of results of operations for the two fiscal years presented in the accompanying Consolidated Financial Statements and Notes.

**Liquidity and Capital Resources.** This section provides an analysis of cash flows, a discussion of outstanding debt, working capital and capital expenditures, and commitments, both firm and contingent, that existed as of January 31, 2013, and trends, demands, events and uncertainties with respect to our ability to finance our continuing operations.

**Critical Accounting Policies.** This section discusses the accounting policies (i) that require us to make estimates that are highly uncertain at the time the estimate is made, (ii) for which a different estimate which could have been made would have a material impact on our consolidated financial statements, (iii) that are the most important and pervasive policies utilized, and (iv) that are the most sensitive to material change from external factors.

### **OVERVIEW**

We design and manufacture aircraft instrumentation and sensor systems. These products are used for data collection and display of both primary and standby flight data. Display products are the instruments in the cockpit of an aircraft that provide the pilot with primary and standby information about the flight situation of the aircraft, such as altitude, speed and direction. As cockpit panel space becomes more valuable in the new age of glass displays, we have

maintained a strong position with Original Equipment Manufacturers (OEM) as a premier supplier of quality aircraft instrumentation in both the military and commercial aircraft marketplace. We are enhancing this position with the introduction of the digital OASIS® backup display system.

Our air data collection products include a range of conic probes (e.g., AoA, SWT and IMFP®), flush port probes as well as the air data unit within the OASIS® backup system that can be used independently of the OASIS® display unit for use with other digital display systems. We continue to expand the range of aircraft using our air data systems which now include a growing number of UAV's and next generation fighter aircraft.

This wide range of products allows us to offer multiple solutions for air data collection as well as primary and standby displays and backup instrumentation which allow our aircraft manufacturer customers to reduce their number of suppliers. Our unique capabilities in air data collection products continue to expand with the development of multiple air data system designs for domestic and international customers, including highly advanced contour flushport systems as well as new variants of our legacy probe designs. These technologies support manned aircraft and the expanding Unmanned Aerial Vehicle (UAV) markets. During fiscal years 2013 and 2012, we were awarded development contracts to modify or extend air data capabilities for products on existing airframes using these technologies.

Building on our expertise with mechanical instrumentation, we have successfully developed and marketed digital instrumentation and displays for standby redundant systems to complement our mechanical product line.

Our current market focus has been, and will continue to be, the design, development and supply of electronic and mechanical primary and standby flight control systems components and instruments. These include altimeters, airspeed indicators, angle of attack indicators, stall warning systems, air data measurement systems and standby flight display systems. These products are critical to aircraft operation, performance and safety.

In conjunction with our development and production activities, we have developed expertise in the building, testing and validation of critical test equipment, including environmental stress screening chambers and wind tunnels. We are expanding that knowledge to offer customers the ability to order turnkey solutions for their test needs.

The trend in the aerospace industry continues toward digital cockpits and away from mechanical cockpit instrumentation that was our foundation. During fiscal year 2013, we continued to make progress in our ability to design and manufacture digital instrumentation that is integrated into cockpit flight management systems. We maintained and strengthened our commitment to research and development to further enhance our product line as we anticipate continued movement toward digital cockpits in the aerospace industry. Our new OASIS® multi-function standby display is being promoted in support of this trend. We plan to position ourselves such that we continue to offer both digital and mechanical instrumentation solutions to our customers. While we believe that this strategy will, over time, strengthen our position in the aerospace industry, we cannot guarantee that this strategy will be successful or that we will have access to the capital resources needed to fully support this strategy.

A significant amount of our business relates to the sale of our products, services and support to United States ("U.S.") and foreign military programs. As a consequence, our sales can fluctuate materially, either favorably or unfavorably, depending upon the level of government spending on those military programs which are a major focus of our manufacturing efforts. While we have been successful in obtaining contracts to supply military needs in recent years, sudden reductions in government spending or delays in the government contract award process could have a material unfavorable effect on our current and future military sales and related cash flow. While we cannot predict the outcome of the U.S. government contract award or budget process, we expect that the majority of the military programs that we supply will be sustained at current or near current levels. Additionally, U.S. government procurement offices often require long periods of time to issue requests for proposals and to negotiate contracts. Such lengthy contract cycle times may delay the award of certain anticipated contracts of significant value to the Company. Delays of significant contract awards may have an adverse effect on the financial results of the Company.

In August 2011, the Budget Control Act reduced the U.S. DoD top line budget by approximately \$490 billion through 2021. In addition, U.S. government expenditures are subject to the potential for further reductions, generally referred to as "sequestration". Sequestration would result in additional reductions of approximately \$500 billion from the defense top line budget through 2021. The Office of Management and Budget (OMB) has estimated that sequestration

would reduce non-exempt defense discretionary accounts during U.S. government fiscal year 2013 by approximately 9.4% (excluding military personnel accounts). The OMB has further stated that the budget for Overseas Contingency Operations and any unobligated balances in prior year funds would be included in aggregate reductions but has otherwise indicated that it cannot yet assess the impact of sequestration at the program, project and activity level. The U.S. DoD has indicated that such reductions might require the termination of certain, as yet undetermined, procurement programs, and other U.S. government customers, such as NASA and various intelligence agencies, may be required to take comparable actions. Any such impacts could have a material effect on our results of operations, financial position and/or cash flows. With the aforementioned fiscal challenges as a backdrop, the U.S. DoD announced a significant revision to the defense strategy in January 2012. This new strategy prioritized the Asia Pacific and Middle East regions, reduced the number of ground forces, maintained nuclear deterrence and reduced Cold War assets. Additionally, it emphasized the increasing importance of Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR); Cyber Security; Space; Special Operations; and Unmanned Systems in implementing the nation's security posture. We have been developing organic capabilities to better serve our customers and their emerging needs in these markets, including the continued R&D efforts on both our flush port and legacy probe air data technologies.

Similarly, changes in the commercial sector of the aerospace industry can have a favorable or unfavorable impact on our future business. While we have historically invested heavily in product development for both funded and unfunded programs, OEM requirements may change such that additional product development efforts will be necessary to maintain or increase our revenue in the aerospace industry. With respect to ongoing contracts, several of our commercial customers continue to operate with reduced operations and manufacturing. While this may be offset by additional increases in aftermarket support, it is likely that our business will continue to be negatively affected until the economy recovers and our customers resume prior levels of production and growth. The recession in the general aviation and business jet markets has continued longer than previously expected and significant improvement is not forecasted for at least another year. Continued reductions of customer deliveries may have a significant adverse effect on our financial results.

Recognizing the risks and challenges of the current environment in both our military and commercial markets, we continue to closely monitor our operations and cost structure for opportunities to enhance our financial performance in the face of a difficult economic environment. We will continue to pursue actions we deem appropriate to counter the near-term challenges in our markets while preserving our ability to be responsive to our customers as the economy improves.

## **RESULTS OF OPERATIONS**

Our senior management regularly reviews the performance of our operations including reviews of key performance metrics and the status of operating initiatives. We review information on the financial performance of the operations, new business opportunities, customer relationships and initiatives, independent research and development (IR&D) activities, human resources, manufacturing effectiveness, cost reduction activities, as well as other subjects. We compare performance against budget, against prior comparable periods and against our most recent internal forecasts. We do not expect the impact of inflation and changing prices on net sales and income from continuing operations to be material.

While we believe the prospects for our financial performance to be very good over the long term, we continue to work our way through short-term challenges which may cause our financial results to vary on a quarterly basis. Our backlog of firm orders, not including options, as of January 31, 2013 is \$30.3 million, an increase of \$4.8 million, when compared to the \$25.5 million backlog as of January 31, 2012.

Our ability to enhance gross profit and operating results will require that we introduce new products and grow our business while continuing to improve manufacturing throughput and delivery performance. We are well engaged in implementing lean manufacturing principles, supported by training programs, to further develop a consistent, disciplined, and innovative engineering and production culture. We complement these initiatives with a marketing and sales strategy that builds on our market presence and core competencies in sensor, air data computation, and display technologies.

We believe that our recent and planned future investments in support of our customers will produce strong returns as our markets continue their recovery. Because of our improved operating metrics, as well as direct customer feedback with respect to quality and delivery performance, we are far better positioned to win new business. We believe that our improved systems, focused value-stream teams, and growing capabilities will enable us to far more reliably fulfill commitments to our customers, suppliers, and stockholders.

### **Fiscal year 2013 compared to fiscal year 2012**

Net sales were \$31,021,000 during fiscal year 2013, an increase of \$1,414,000, or 4.8%, compared to \$29,607,000 for fiscal year 2012. During fiscal year 2013, our sales volume increased from the prior year by approximately \$2.2 million on increased demand for repairs, sensors, spares and development services, offset by approximately \$0.8 million on reduced demand for mechanical instruments. Our net sales continue to be impacted by the ongoing recession in the business jet and general aviation markets.

As a percent of sales, gross profit for fiscal year 2013 was 38.5% versus 28.7% for fiscal year 2012. The increase in gross profit in fiscal year 2013, as a percent of sales, reflects (a) increased variable margin due to the higher sales volume, (b) an increase in repairs and spares as a percentage of the overall sales dollar volume in the period, (c) favorable pricing on certain customer orders, particularly in spares and repairs, (d) the positive impact of quality improvements and investments in lean activities over the past two years, and (e) the unfavorable impact in the prior year of costs associated with the transition of the Virginia repair station to our Florida facility.

Selling, general and administrative expenses (SG&A) for fiscal year 2013 were \$10,152,000, an increase of \$2,998,000 compared to \$7,154,000 in fiscal year 2012. The net increase was driven primarily by \$2.4 million of increased independent research and development costs, most significantly relating to the OASIS® product. In addition, we incurred increased compensation costs and outside services costs, which were partially offset by lower business development costs.

Interest expense, net decreased to \$258,000 in fiscal year 2013 from \$371,000 in fiscal year 2012, primarily due to lower interest expense on reduced debt levels.

The Company recognized a \$1,990,000 non-recurring gain on sale of intangible assets in the fourth quarter of fiscal year 2013 relating to the sale of certain intellectual property to an international manufacturer. Because of its presentation in Other Income, this sale did not impact gross profit. With the renewal of the BMO Credit Facility prior to maturity, we reported a loss on early extinguishment of debt in fiscal year 2013 of \$9,000. In fiscal year 2012, due to the early settlement of the Notes Payable we reported a loss on early extinguishment of debt of \$25,000.

Income before taxes was \$3,442,000 in fiscal year 2013, compared to income before taxes of \$828,000 in fiscal year 2012. The increase of \$2,614,000 was primarily due to the gain on sale of intangibles, improved operating income and lower interest expenses.

Income tax expense was \$920,000 in fiscal year 2013 compared to income tax expense of \$436,000 in fiscal year 2012. The effective tax rate of 26.6% in fiscal year 2013 was lower than the effective tax rate of 52.7% in fiscal year 2012 due primarily to the fiscal year 2013 benefit of a research and development tax credit as well as fiscal year 2012 permanent differences. See Note 11 of “Notes to Consolidated Financial Statements”.

For fiscal year 2013, our net income was approximately \$2,522,000, or \$0.67 basic and \$0.62 diluted income per share, compared to net income of approximately \$392,000, or \$0.10 basic and diluted income per share for fiscal year 2012. The higher income per share amounts were driven by the higher income before taxes combined with the lower effective tax rate in fiscal 2013.

## LIQUIDITY AND CAPITAL RESOURCES

Our principal sources of capital have been cash flows from operations and borrowings under our Credit Facility, described below. As of January 31, 2013, we had approximately \$0 in cash and cash equivalents, compared to approximately \$157,000 as of January 31, 2012. In addition, as of January 31, 2013 and 2012, we had \$3,097,000 and \$888,000, respectively, available under the Credit Facility.

Our cash provided by operating activities was \$2,194,000 for fiscal year 2013, an increase in cash provided of \$670,000 compared to cash provided of \$1,524,000 for fiscal year 2012. This net increase in cash provided by operating activities is primarily attributable to increases in cash provided by operating activities of:

\$2,130,000 from increased operating net income in fiscal year 2013 of \$2,522,000 when compared to operating net income in fiscal year 2012 of \$392,000,

- \$1,669,000 from advanced customer payments presented as deferred revenue at January 31, 2013,

\$1,133,000 as presented by decreased accrued expenses and other liabilities at January 31, 2013 of \$860,000, due primarily to the release of accrued contract losses related to completed engineering contracts in fiscal year 2013, when compared to the change in accrued expenses and other liabilities at January 31, 2012 of \$1,993,000, due primarily to the accrual of contract losses related to engineering contracts in process in fiscal year 2012 and

\$683,000 for increased accrued compensation and benefits of \$521,000 as of January 31, 2013 when compared to decreased accrued compensation and benefits of \$162,000 as of January 31, 2012;

Partially offset by increases in cash used in operating activities of:

\$2,004,000 as presented by increased inventory at January 31, 2013 of \$1,544,000 when compared to decreased inventory levels of \$460,000 at January 31, 2012,

- \$1,990,000 due to the fiscal year 2013 gain on sale of intangible assets,

\$1,087,000 as presented by fiscal year 2013 provisions for contract losses of \$187,000 when compared to fiscal year 2012 provisions for contract losses of \$1,274,000 and

\$757,000 from the fiscal year 2013 pay down of accounts payable of \$873,000 when compared to the fiscal year 2012 pay down of accounts payable of \$116,000.

Our cash provided by investing activities in fiscal year 2013 of \$615,000 consisted primarily of proceeds from the sale of intangible property of \$1,382,000 less capital improvements and equipment of \$780,000. In fiscal year 2012, cash used in investing activities amounted to \$1,068,000 for capital improvements and equipment.

Our cash used in financing activities for fiscal years 2013 and 2012 was \$2,966,000 and \$461,000, respectively, resulting in an increase to cash used in financing activities of \$2,505,000. The change was attributable to a \$3,105,000 fiscal year 2013 net pay down of our Credit Facility, offset by a \$600,000 fiscal year 2012 net pay off of the Investors' Notes Payable described below.

Our days sales in accounts receivable remained at 64 days at January 31, 2013, unchanged from January 31, 2012. Through consistent operating income, advance customer payments and the sale of our intellectual property, our

outstanding balances with vendors and suppliers declined as days purchases in accounts payable decreased to 26 days at January 31, 2013, down from 41 days at January 31, 2012.

Our liquidity will depend on our ability to continue to achieve improved operating results and contain costs related to the development of new products. Sufficient liquidity is necessary to, among other things, (i) satisfy working capital requirements, (ii) fulfill necessary capital spending, and (iii) meet our debt obligations in fiscal year 2014 and beyond. A fiscal year 2013 cash advances from a customer, presented as deferred revenue of \$1,669,000 as of January 31, 2013, improved our cash flow from operations as presented on our statement of cash flows for the year ended January 31, 2013. Our failure to improve our operating results could have a material adverse effect on our liquidity and could require the implementation of curative measures, including raising capital, deferring planned capital expenditures and research and development efforts, reductions in force, reducing discretionary spending, and selling assets. There can be no assurance that our proposed plans and actions will be successful or that unforeseen circumstances will not require us to seek additional funding sources in the future or effectuate additional plans to conserve liquidity. In addition, there can be no assurance that in the event additional sources of funds are needed, they will be available on acceptable terms, if at all.

## Note Payable and BMO Harris Bank Credit Facility

On May 14, 2009, we entered into unsecured notes payable arrangements with three investors allowing us to borrow up to an aggregate of \$2,000,000. We completed repayment of the outstanding balance of these notes payable in the first quarter of fiscal year 2012. See Note 7 of “Notes to Consolidated Financial Statements”.

We are party to a Loan Agreement (the “Loan Agreement”) with BMO Harris Bank (the “Lender”) with a maximum amount of credit facilities (the “Credit Facility”) available to us of \$10,100,000. The Loan Agreement provides for (a) a \$4,000,000 revolving line of credit, pursuant to a revolving line of credit note in the original principal amount of up to \$4,000,000 (the “Revolving Credit Line Note”), (b) a \$3,500,000 first real estate mortgage loan, (c) a \$1,900,000 term loan and (d) a \$700,000 equipment line of credit. The Credit Facility is secured by substantially all of our assets. See Note 9 of “Notes to Consolidated Financial Statements”.

The Credit Facility is secured by substantially all assets of the Company. Details of the Credit Facility are as follows:

The Amended and Restated Revolving Credit Line Note provides a line of credit in an amount equal to the lesser of (a) the Revolving Credit Limit of \$4,000,000; or (b) a Borrowing Base determined based on eligible accounts receivable and inventory. Interest is paid monthly. The interest rate on the Amended and Restated Revolving Credit Line Note is one-month LIBOR (which was 0.2087% at January 31, 2013) plus 300 basis points. Available borrowings on the Amended and Restated Revolving Credit Line Note at January 31, 2013 were \$3,097,000.

The Real Estate Mortgage Note, which supports a \$3,500,000 first real estate mortgage loan, has a three-year term, a 15-year amortization period, and the interest rate is one-month LIBOR plus 340 basis points with a 4% floor. Interest and principal are paid monthly. The proceeds of the Real Estate Mortgage Note were used for refinancing an existing loan relating to the Clearwater, Florida property and for working capital and capital expenditure needs.

The Equipment Term Note, which supports a \$1,900,000 term loan, has a three-year term, a five-year amortization period, and the interest rate is one-month LIBOR plus 340 basis points with a 4% floor. Interest and principal are paid monthly. The proceeds of the Equipment Term Note were used for refinancing an existing loan relating to the Earlysville, Virginia property and for working capital and capital expenditure needs. The Company must pay any proceeds from the sale of the Earlysville, Virginia property to BMO Harris Bank to be applied as a principal payment under the Equipment Term Note.

The Equipment Credit Line Note, which supports a \$700,000 equipment line of credit, has a three-year term, a five-year amortization period, and the interest rate is one-month LIBOR plus 325 basis points with a 4% floor. Interest is paid monthly. Principal payments began October 2011. Proceeds are used to purchase equipment for use in the Company’s business. The Equipment Credit Line Note matures on May 1, 2014.

The Credit Facility contains certain financial and other restrictive covenants, including the requirement to maintain: (i) minimum Total Stockholders’ Equity; (ii) a ratio of Funded Debt to EBITDA; and (iii) a Fixed Charge Coverage Ratio. See Note 9 of “Notes to Consolidated Financial Statements”.

On January 31, 2013, we entered into an amendment (the “Third Amendment”) to the Loan Agreement. The Amendment (a) renews to January 31, 2016, the maturity date of the Amended and Restated Revolving Credit Line Note in the amount of \$4 million; (b) renews to May 1, 2015, the maturity date of the Equipment Term Note in the amount of \$887,000, and (c) renews to January 31, 2018, the maturity date of the Real Estate Mortgage Note in the approximate amount of \$2,877,000. Except as amended to extend their respective maturities, the new notes contain the same terms and conditions as the promissory notes that they replace.

We were in compliance with all covenants within the Credit Facility as of and for the fiscal year ended January 31, 2013.

## **Working Capital and Capital Expenditures**

Our working capital at January 31, 2013 was \$9,084,000 compared to \$9,296,000 at January 31, 2012. This decrease in working capital of \$212,000 as of January 31, 2013 relates, in part, to a \$1,669,000 customer advance, presented in deferred revenue, a decrease in prepaid expenses and other assets of \$1,220,000, due primarily to released deferred charges on completed engineering contracts and an increase in accrued compensation and benefits of \$521,000. These unfavorable changes to working capital are offset, in part, by favorable changes to working capital resulting from an increase in inventory of \$1,402,000, a decrease in accrued expenses and other liabilities of \$1,167,000, due primarily to the release of contract loss provisions related to completed engineering contracts and a decrease to accounts payable of \$873,000. The collection of our accounts receivable is the primary source of cash used to fund our operations. Our banking line of credit is used as an additional source of cash as necessary from time to time, and we sweep any excess cash back against the line of credit on a daily basis to minimize interest expense. We believe that cash collected from our accounts receivable, as further supplemented by advances under our Credit Facility, are adequate to fund our ongoing operations for the next twelve months. On January 31, 2013, prior to the June 27, 2013 maturity date of the Amended and Restated Revolving Credit Line Note and the May 1, 2013 maturity date of both the Real Estate Mortgage Note and the Equipment Term Note, we renewed and replaced said notes with BMO Harris Bank. Prior to the maturity of the Equipment Credit Line Note of May 1, 2014, we intend on refinancing or renewing said note with BMO Harris Bank. However, there can be no assurance that we will achieve our expected operating results and/or have access to and/or renew or refinance our Credit Facility, or that unforeseen circumstances will not require us to seek additional funding sources in the future. In addition, there can be no assurance that in the event additional sources of funds are needed, they will be available on acceptable terms, if at all.

Our future capital requirements depend on numerous factors, including research and development, expansion of product lines and other factors. Furthermore, we may need to develop and introduce new or enhanced products, respond to competitive pressures, invest or acquire businesses or technologies or respond to unanticipated requirements or developments, which would require additional resources. Currently, our cash flow from operations alone may not be sufficient to meet these challenges.

Our capital expenditures for fiscal year 2013 were \$780,000, compared to \$1,068,000 for fiscal year 2012. Historically, our capital budget was intended to replace fixed asset equipment as needed and to take advantage of technological improvements that would improve productivity. We continued to replace certain critical fixtures, environmental test chambers and testing equipment that we lost in the August, 2008 fire during fiscal years 2013 and 2012. Additionally, we continue to renovate and reconfigure our Florida production facility to accommodate equipment previously located in our building destroyed in the fire.

## **Inflation and Changing Prices**

Our profitability is dependent, among other things, on our ability to anticipate and react to changes in the cost of key operating resources, including labor and raw materials. Substantial increases in cost of sales and expenses could impact our operating results to the extent that such increases cannot be passed along to customers. While we are taking steps to mitigate our risk to rising prices with prudent purchasing practices and improving our inventory management techniques, there can be no assurance that future supplies of raw materials and labor will not fluctuate due to market conditions outside of our control.

Certain operating costs such as taxes, insurance and other outside services continue to increase at or above the general rate of inflation, and we may be subject to other cost and supply fluctuations outside of our control.

### **Off-Balance Sheet Arrangements**

We did not have any off-balance sheet arrangements as of January 31, 2013.

## Contractual Obligations

The following table presents estimated cash requirements for contractual obligations outstanding as of January 31, 2013.

	Payments Due By Period				Total
	Less Than One Year	One Year to 3 Years	Greater Than 3 Years to 5 Years	After 5 Years	
Purchase commitments	\$5,681,000	\$411,000	\$ -	\$ -	\$6,092,000
Long-term debt	763,000	1,333,000	2,178,000	-	4,274,000
Revolving credit facility	-	903,000	-	-	903,000
Total contractual obligations	\$6,444,000	\$2,647,000	\$2,178,000	\$ -	\$11,269,000

## Environmental Matters

In preparation for the sale of the Earlysville, Virginia facility, we engaged an environmental consulting firm to survey the property for any possible soil or groundwater contamination. This survey revealed impacts to both shallow soils and groundwater that may have resulted from the accidental loss of solvents by a former owner of the property. During fiscal year 2013, we signed an administrative order on consent with the U.S. Environmental Protection Agency to provide the former owner with access to the property and the former owner of the property signed an administrative order on consent with the U.S. Environmental Protection Agency for completion of a contamination characterization study. As a result of the initial and subsequent surveys, our responsibility for the remaining contamination treatment, future monitoring, oversight and other related costs is estimated at \$404,000 as of January 31, 2013. We have capitalized these costs as an increase to property held for sale, net, since such costs will be incurred in preparation for the sale of the Earlysville, Virginia facility and will not result in a carrying value in excess of the estimated fair value less cost to sell. Costs incurred during fiscal year 2013 totaled \$22,000 and costs incurred during the fiscal year ended January 31, 2012 totaled \$20,000. At this time, we cannot predict how much, if any, we will incur for more costs in fiscal year 2014.

## CRITICAL ACCOUNTING POLICIES

The discussion and analysis of our financial condition and results of operations are based upon the accompanying consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States ("U.S. GAAP"). The preparation of those consolidated financial statements and this Annual Report on Form 10-K requires us to make estimates and judgments that affect the reported amount of assets and liabilities, revenues and expenses, and related disclosure items, including disclosure of contingent assets and

liabilities, at the date of our consolidated financial statements. Actual results may differ from these estimates under different assumptions or conditions, and as a result of trends and uncertainties identified above under “Results of Operations” and “Liquidity and Capital Resources” and in “Item 1A. Risk Factors”. Further, such differences could be material.

Set forth below is a discussion of our critical accounting policies. We consider critical accounting policies to be those (i) that require us to make estimates that are highly uncertain at the time the estimate is made, (ii) for which a different estimate which could have been made would have a material impact on our consolidated financial statements, (iii) that are the most important and pervasive policies utilized, and (iv) that are the most sensitive to material change from external factors. Additionally, the policies discussed below are critical to an understanding of the consolidated financial statements because their application places the most significant demands on our judgment, with financial reporting results relying on estimates about the effect of matters that are highly uncertain. Specific risks for these critical accounting policies are described in the following paragraphs. The impact and any associated risks related to these policies on business operations is discussed throughout this MD&A where such policies affect reported and expected financial results.

For a detailed discussion regarding the application of these and other accounting policies, see Note 1 of “Notes to Consolidated Financial Statements.” We have discussed the development and selection of the critical accounting estimates and the related disclosure included herein with the Audit Committee of the Board of Directors.

### *Revenue Recognition*

The Company generally recognizes revenue from sales of its products when the following have occurred: evidence of a sale arrangement exists; delivery or shipment has occurred or services have been rendered; the price to the buyer is fixed or determinable; and collectability is reasonably assured.

For fixed-price contracts, the Company may recognize revenue on a Multiple-Elements Arrangement basis. The Multiple-Elements Arrangement method requires the Company to evaluate all deliverables in an arrangement to determine whether they represent separate units of accounting. The Company makes that determination at the inception of the arrangement. In an arrangement with multiple deliverables, the delivered item(s) shall be considered a separate unit of accounting if (a) the delivered item(s) have value to the customer on a standalone basis, (b) there is objective and reliable evidence of the fair value of the undelivered item(s) and (c) the arrangement includes a general right of return relative to the delivered item(s) and delivery or performance of the undelivered item(s) is considered probable and substantially in the control of the vendor. The Company may also recognize its revenue under the completed contract method.

For long-term, fixed-price contracts meeting certain criteria, the Company may elect to follow the percentage-of-completion method of accounting for revenue recognition. Under this method, contract revenue is computed as that percentage of estimated total revenue that costs incurred to date bear to total estimated costs, after giving effect to the most recent estimates of costs to complete. From time to time, the Company will record costs and estimated profits in excess of billings for a contract. Revisions in costs and revenue estimates are reflected in the period in which the revisions are determined. Provisions for estimated losses on uncompleted contracts are made in the period in which such losses are determined without regard to the percentage-of-completion.

Periodically, the Company enters into research and development contracts with customers. When the contracts provide for milestone or other interim payments, the Company will recognize revenue either under the Milestone method or the Multiple-Elements Arrangement method. The Milestone method requires the Company to deem all milestone payments within each contract as either substantive or non-substantive. That conclusion is determined based upon a thorough review of each contract and the Company’s deliverables committed to in each contract. For substantive milestones, the Company concludes that upon achievement of each milestone, the amount of the corresponding defined payment is commensurate with the effort required to achieve such milestone or the value of the delivered item. The payment associated with each milestone relates solely to past performance and is deemed reasonable upon consideration of the deliverables and the payment terms within the contract. For non-substantive milestones, including advance payments, the recognition of such payments are pro-rated to the substantive milestones.

Milestones may include, for example, the successful completion of design review or technical review, the submission and acceptance of technical drawings, delivery of hardware, software, spares, test equipment or regulatory agency certifications.

*Accounts Receivable, Allowance for Doubtful Accounts and Credit Losses*

We continuously evaluate our customers and provide reserves for anticipated credit losses as soon as collection becomes compromised. While credit losses have historically been within expectations of the provisions established, we cannot guarantee that we will continue to experience the same credit loss rates that have been experienced in the past. Measurement of such losses requires consideration of historical loss experience, including the need to adjust for current conditions, and judgments about the probable effects of relevant observable data, including present economic conditions such as delinquency rates and financial health of specific customers.

### *Inventories*

The Company values inventory at standard cost which generally reflects the most recent significant cost for manufactured or purchased inventory. Standards are revalued from time to time to reflect the lower of cost (using a method that approximates the first-in, first-out method “FIFO”) or net realizable value. The reserve for obsolete and slow moving inventory is based upon reviews of inventory quantities on hand, usage and sales history.

### *Work In Process Inventories*

We employ certain methods to estimate the value of work in process inventories for financial reporting purposes. Our practice has been to conduct cycle counts of inventory throughout the year. Generally, for items that are in process at the end of a fiscal year, we will make an estimate during the cycle counting process regarding the percentage of completion of such items in order to accurately reflect costs incurred to date on the production of the items that are still in process. These estimates are affected by the nature of the operation at which the items are located at the time a physical inventory is conducted, and are subject to judgment. This practice was employed for fiscal years 2013 and 2012.

### *Manufacturing Overhead Cost Application*

We establish our inventoriable cost of manufacturing overhead by calculating our overhead costs as a percentage of direct labor and applying that percentage to direct labor that has been charged to inventory on a twelve month rolling average basis. This application percentage is reviewed and adjusted no less than annually.

### *Deferred Tax Asset Valuation Allowance*

We account for income taxes in accordance with U.S. GAAP, which states that deferred tax liabilities and assets are determined based on the difference between the financial statement carrying amounts and tax bases of assets and liabilities using enacted tax rates in effect in the years in which the differences are expected to reverse. A valuation allowance is provided against the future benefit of deferred tax assets to the extent it is determined that it is more likely than not that the future tax benefits associated with the deferred tax asset will not be realized.

### *Property Held for Sale*

Property held for sale is reported at the lower of its carrying amount or fair value less cost to sell. Depreciation on property held for sale is discontinued at the time the criteria, established by U.S. GAAP, are met. The Earlysville, Virginia property is presently held for sale. The property consists of a 53,000 square foot manufacturing facility on approximately 12 acres of land. In preparation for the sale of the Earlysville, Virginia facility, we engaged an environmental consulting firm to survey the property for any possible soil or groundwater contamination. This survey revealed impacts to both shallow soils and groundwater that may have resulted from the accidental loss of solvents by a former owner of the property. During fiscal year 2013, we signed an administrative order on consent with the U.S. Environmental Protection Agency to provide the former owner with access to the property and the former owner of the property signed an administrative order on consent with the U.S. Environmental Protection Agency for completion of a contamination characterization study. As a result of the initial and subsequent surveys, our responsibility for the remaining contamination treatment, future monitoring, oversight and other related costs is estimated at \$404,000 as of January 31, 2013. We have capitalized these costs as an increase to property held for sale, net, since such costs will be incurred in preparation for the sale of the Earlysville, Virginia facility and will not result in a carrying value in excess of the estimated fair value less cost to sell. Costs incurred during fiscal year 2013 totaled \$22,000 and costs incurred during the fiscal year ended January 31, 2012 totaled \$20,000. At this time, we cannot predict how much, if any, we will incur for more costs in fiscal year 2014.

### *Goodwill and Intangible Assets*

The carrying value of goodwill is reviewed at least annually for impairment and will be reviewed more frequently if current events and circumstances indicate a possible impairment. An impairment loss is charged to expense in the period identified. As current events and circumstances warrant, the Company examines the carrying value of its intangible assets with finite lives, such as capitalized software and development costs, purchased intangibles, and other long-lived assets, to determine whether there are any impairment losses. If indicators of impairment are present and future cash flows are not expected to be sufficient to recover the asset's carrying amount, an impairment loss is charged to expense in the period identified. Factors that may cause impairment include negative industry or economic trends or significant underperformance relative to historical or projected future operating results.

### *Long-Lived Assets*

The useful lives of property, plant and equipment for purposes of computing depreciation are:

Land improvements	15-20 Years
Buildings and improvements	25-40 Years
Machinery and equipment	3-15 Years
Patterns, dies, and tools	5-10 Years
Furniture and fixtures	3-10 Years

We periodically evaluate long-lived assets for potential impairment and will record an impairment charge whenever events or changes in circumstances indicate the carrying amount of the assets may not be fully recoverable. As of January 31, 2013 and January 31, 2012, we do not believe that any assets are impaired.

We will capitalize production costs for computer software that is to be utilized as an integral part of a product when both (a) technological feasibility is established for the software; and (b) all research and development activities for the other components of the product have been completed. Amortization is charged to expense at the greater of the expected unit sales versus units sold or the straight line method for a period of three years from the date the product becomes available for general release to customers.

### *Income Taxes*

The Company and its includable subsidiaries file a consolidated U.S. federal income tax return in accordance with the provisions of the Internal Revenue Code of 1986, as amended.

The Company's accounting for income taxes represents management's best estimate of various events and transactions.

Deferred tax assets and liabilities resulting from temporary differences between the financial reporting and tax bases of assets and liabilities are measured at the balance sheet date using enacted tax rates expected to apply to taxable income in the years the temporary differences are expected to reverse.

The realization of deferred tax assets depends upon the existence of sufficient taxable income within the carryback or carryforward periods under the tax law in the applicable tax jurisdiction. Valuation allowances are established when management determines, based on available information, that it is more likely than not that deferred income tax assets will not be realized. Significant judgment is required in determining whether valuation allowances should be established as well as the amount of such allowances. When making such determination, consideration is given to, among other things, the following:

- future taxable income exclusive of reversing temporary differences and carryforwards;
- future reversals of existing taxable temporary differences;
- taxable income in prior carryback years and

·tax planning strategies.

We believe that we will ultimately recover a majority of the deferred tax assets recorded on our consolidated balance sheets. However, should there be a change in our ability to recover our deferred tax assets, our tax provision would increase in the period in which we determined that the recovery was not likely.

We re-evaluate uncertain tax positions on a regular basis. This evaluation is based on factors such as changes in facts or circumstances, changes in tax law, new audit activity, and effectively settled issues. Determining whether an uncertain tax position is effectively settled requires judgment. Such a change in recognition or measurement would result in the recognition of a tax benefit or an additional charge to the tax provision.

The Company classifies tax related interest and tax related penalties as a component of income taxes.

#### *Research and Development*

Research and development costs that are not associated with specific customer contract requirements are expensed in the period incurred and are included in selling, general and administrative expenses.

#### *Environmental Expenditures*

The Company assesses its property held for sale, along with any property that is being taken out of its initially intended use, for the presence of hazardous or toxic substances that would result in an environmental liability. In addition, management assesses its current property in use for any environmental issues.

Liabilities for environmental remediation costs not related to retirements of tangible long-lived assets, and arising from claims, assessments, litigation, fines, and penalties and other sources, are recorded when it is probable that a liability has been incurred and the amount of the assessment and/or remediation can be reasonably estimated.

Legal costs incurred in connection with environmental remediation are expensed as incurred. Recoveries of environmental remediation costs from third parties, which are probable of realization, are separately recorded as assets, and are not offset against the related environmental liability, in accordance with U.S. GAAP.

*Stock-Based Compensation*

The Company adopted the fair value recognition provisions of U.S. GAAP using the modified-prospective-transition method which requires us to recognize compensation expense on a prospective basis. U.S. GAAP requires that all stock-based compensation be recognized as an expense in the financial statements and that such cost be measured at the fair value of the award. Under this method, in addition to reflecting compensation for new share-based awards, expense is also recognized to reflect the remaining service period of awards that had been included in pro-forma disclosure in prior periods. The stock-based compensation expense is included in selling, general and administrative expenses in the consolidated statements of operations. During the fiscal years ended January 31, 2013 and January 31, 2012, the Company recorded stock-based compensation, including director-fees expense, of \$103,000 and \$188,000, respectively.

Stock issued in payment for services provided by members of the board of directors is expensed in the period the services are provided. During both fiscal years ended January 31, 2013 and 2012, the Company recorded director-fees expense, through the issuance of stock, of \$60,000.

*Product Warranties*

We provide for the estimated costs of warranties at the time the related revenue is recognized. We estimate the costs based on historical and projected product failure rates and historical and projected repair costs. Warranty terms and conditions vary depending upon the product sold and the customer it was sold to, but generally includes parts and labor over a period generally ranging from one to five years. We regularly reevaluate our estimates to assess the adequacy of the recorded warranty liabilities and adjust the amounts as necessary.

### *Use of Estimates*

We prepare our consolidated financial statements in conformity with U.S. GAAP. These principles require management to make estimates and judgments that affect reported and contingent amounts of assets, liabilities, revenues and expenses, including such items as (i) inventory, restructuring and environmental costs, (ii) percentage-of-completion estimates, (iii) other miscellaneous accruals and (iv) valuation allowances for accounts receivable, inventory, long-lived assets, property held for sale and deferred tax assets. Actual results may differ from these estimates under different assumptions or conditions, and such differences could be material.

### **Adoption of New Accounting Pronouncements**

In September 2011, the Financial Accounting Standards Board (FASB) amended the guidance on the annual testing of goodwill for impairment. The amended guidance will allow us to assess qualitative factors to determine if it is more-likely-than-not that goodwill might be impaired and whether it is necessary to perform the two-step goodwill impairment test required under current accounting standards. This guidance will be effective for our fiscal year ending January 31, 2013, with early adoption permitted. We have determined that this new guidance will not have a material impact on our consolidated financial statements.

In July 2012, the FASB amended guidance on the annual testing of indefinite-lived intangible assets for impairment. Under the amended guidance, an entity has the option first to assess qualitative factors to determine whether the existence of events and circumstances indicates that it is more likely than not that the indefinite-lived intangible asset is impaired. If, after assessing the totality of events and circumstances, an entity concludes that it is not more likely than not that the indefinite-lived intangible asset is impaired, then the entity is not required to take further action. However, if an entity concludes otherwise, then it is required to determine the fair value of the indefinite-lived intangible asset and perform the quantitative impairment test by comparing the fair value with the carrying amount. This guidance will be effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012, with early adoption permitted. We have determined that this new guidance will not have a material impact on our consolidated financial statements.

In February 2013, the FASB issued guidance on the Reporting of Amounts Reclassified out of Accumulated Other Comprehensive Income. The guidance requires that companies present either in a single note or parenthetically on the face of the financial statements, the effect of significant amounts reclassified from each component of accumulated other comprehensive income based on its source (e.g., the release due to cash flow hedges from interest rate contracts) and the income statement line items affected by the reclassification (e.g., interest income or interest expense). If a component is not required to be reclassified to net income in its entirety (e.g., the net periodic pension cost), companies would instead cross reference to the related footnote for additional information (e.g., the pension footnote). This guidance is effective for fiscal and interim reporting periods beginning after December 15, 2012. The adoption of this guidance is not expected to have a material effect on our consolidated financial statements.

**ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

We do not issue or invest in financial instruments or their derivatives for trading or speculative purposes. Our market risk is limited to fluctuations in interest rates pertaining to our borrowings under our existing debt facilities which require the payment of interest at a variable rate equal to one-month LIBOR plus 300 to 340 basis points. We therefore are exposed to market risk from changes in interest rates on funded debt. Any increase in these rates could adversely affect our interest expense. The extent of market rate risk associated with fluctuations in interest rates is not quantifiable or predictable because of the volatility of future interest rates and business financing requirements. We use no derivative products to hedge or mitigate interest rate risk.

Based on the outstanding balances on our credit facilities as of January 31, 2013, a 1% increase in interest rates would cost us approximately \$48,000 annually.

We purchase materials for use in our products based on market prices established with our suppliers. Many of the materials purchased can be subject to volatility due to market supply and demand factors outside of our control. To mitigate this risk, in part, we attempt to enter into fixed-price purchase agreements with reasonable terms.

We have limited market risk exposure to fluctuations in foreign exchange rates as we have a limited number of purchase and sale transactions denominated in British Pounds.

## **ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA**

The consolidated financial statements and supplementary data required by Item 8 are listed in the index beginning on page F-1 and are included in this Form 10-K.

## **ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE**

None.

## **ITEM 9A. CONTROLS AND PROCEDURES**

### ***Evaluation of Disclosure Controls and Procedures***

The Company maintains disclosure controls and procedures, as defined in Rules 13a-15(e) and 15(d)-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). These disclosure controls and procedures are designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

*Evaluation of Disclosure Controls and Procedures as of January 31, 2013*

As of the end of the period covered by this report, the Company carried out, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and the Company's Chief Financial Officer, an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act. Based on that evaluation, the Company's Chief Executive Officer and the Company's Chief Financial Officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures are effective to ensure that all material information required to be included in our reports filed or submitted under the Exchange Act is (1) recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission and (2) accumulated and communicated to the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding disclosure.

## Internal Control Over Financial Reporting

### (a) Management's Annual Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Rule 13a-15(f) or 15d-15(f) promulgated under the Exchange Act as a process designed by, or under the supervision of, the Company's principal executive and principal financial officers and implemented by the Company's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the company;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with Generally Accepted Accounting Principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the Company; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisitions, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Financial management has documented and evaluated the effectiveness of the internal control of the Company as of January 31, 2013 pertaining to financial reporting in accordance with the criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO").

Based on management's assessment under the framework of the criteria in *Internal Control-Integrated Framework* issued by COSO, management concluded that our internal control over financial reporting was effective as of January 31, 2013.

### (b) Changes in Internal Control Over Financial Reporting

Management, including our Chief Executive Officer and Chief Financial Officer, has evaluated the Company's internal control over financial reporting to determine whether any changes occurred during the quarter ended January 31, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. Based on that evaluation, there have been no changes in the Company's internal control over financial reporting during the quarter ended January 31, 2013 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

**ITEM 9B.**

**OTHER INFORMATION**

None.

PART III

**ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE**

Information with respect to Directors and certain Executive Officers required by Item 10 shall be included in the Proxy Statement or an amendment to this Annual Report on Form 10-K and is incorporated herein by reference.

**ITEM 11. EXECUTIVE COMPENSATION**

Information with respect to executive compensation required by Item 11 shall be included in the Proxy Statement or an amendment to this Annual Report on Form 10-K and is incorporated herein by reference.

**ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS**

Information with respect to security ownership and the other matters required by Item 12 shall be included in the Proxy Statement or an amendment to this Annual Report on Form 10-K and is incorporated herein by reference.

**ITEM 13. CERTAIN RELATIONSHIPS, RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE**

Information with respect to certain relationships and related transactions required by Item 13 shall be included in the Proxy Statement or an amendment to this Annual Report on Form 10-K and is incorporated herein by reference.

**ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES**

Information with respect to principal accountant fees and services required by Item 14 shall be included in the Proxy Statement or an amendment to this Annual Report on Form 10-K and is incorporated herein by reference.

PART IV

**ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES**

a) The following documents are filed as part of this Annual Report:

1. The financial statements listed in the index to Financial Statements following the signature pages hereof.

2. Exhibits

<b>Exhibit No.</b>	<b>Description of Exhibit</b>
2.1	Agreement and Plan of Merger dated as of April 19, 2013, among Aerosonic Corporation, TransDigm Group Incorporated and Buccaneer Acquisition Sub Inc., incorporated by reference to Exhibit 2.1 of the Company's Current Report on Form 8-K, filed on April 22, 2013.
3.1	Restated Certificate of Incorporation of Instrument Technology Corporation, filed on January 12, 1970, incorporated by reference to Exhibit 3.1 of the Company's Annual Report on Form 10-K for the year ended January 31, 2003, filed on October 31, 2003.
3.2	Certificate of Amendment to the Articles of Incorporation, changing the name Instrument Technology Corporation to Aerosonic Corporation, filed on September 21, 1970, incorporated by reference to Exhibit 3.3 of the Company's Annual Report on Form 10-K for the year ended January 31, 2003, filed on October 31, 2003.
3.3	Certificate of Amendment to the Articles of Incorporation of Aerosonic Corporation, filed on August 6, 1971, incorporated by reference to Exhibit 3.4 of the Company's Annual Report on Form 10-K for the year ended January 31, 2003, filed on October 31, 2003.
3.4	Certificate of Reduction of Capital of Aerosonic Corporation, filed on June 5, 1978, incorporated by reference to Exhibit 3.5 of the Company's Annual Report on Form 10-K for the year ended January 31, 2003, filed on October 31, 2003.
3.5	Certificate of Amendment to Articles of Incorporation of Aerosonic Corporation, filed on February 12, 1993, incorporated by reference to Exhibit 3.6 of the Company's Annual Report on Form 10-K for the year ended January 31, 2003, filed on October 31, 2003.
3.6	Amended and Restated Bylaws of the Company, incorporated by reference to Exhibit 3.8 of the Company's Annual Report on Form 10-K for the year ended January 31, 2005, filed on April 18, 2005.

- 4.1 Amendment to Aerosonic Corporation 2004 Stock Incentive Plan (as amended and restated on July 26, 2007), incorporated by reference to Appendix A of the Company's Definitive Proxy Statement on Schedule 14A, filed on June 1, 2009.
- 10.1\* Employment Agreement, dated April 17, 2008, between the Company and Douglas Hillman, incorporated by reference to Exhibit 10.1 of the Company's Current Report on Form 8-K, filed on April 23, 2008.
- 10.2\* Amended and Restated Employment Agreement, dated November 28, 2005, between the Company and Mark Perkins, incorporated by reference to Exhibit 10.3 of the Company's Quarterly Report on Form 10-Q for the quarter ended October 28, 2005, filed on November 28, 2005.

- 10.3\* Employment Agreement, dated August 25, 2008, between the Company and Thomas Cason, incorporated by reference to Exhibit 10.1 of the Company's Current Report on Form 8-K, filed on August 25, 2008.
- 10.4\* Aerosonic Corporation 2004 Stock Incentive Plan (as amended and restated on July 26, 2007), incorporated by reference to Exhibit 4.1 of the Company's Registration Statement on Form S-8, filed on August 31, 2007.
- 10.5 Share Purchase Agreement, dated August 21, 2007, between the Company, OP Technologies, Inc., Optimization Technologies, Inc. and certain stockholders thereof, incorporated by reference to Exhibit 10.1 of the Company's Current Report on Form 8-K, filed on August 24, 2007.
- 10.6 Form of Loan Agreement, dated May 14, 2009, between the Company and Investors, incorporated by reference to Exhibit 10.1 of the Company's Current Report on Form 8-K, filed on May 20, 2009.
- 10.7 Form of 14% Subordinated Note, dated May 14, 2009, between the Company and its wholly-owned subsidiaries, Avionics Specialties, Inc. and OP Technologies, Inc., and Investors incorporated by reference to Exhibit 10.2 of the Company's Current Report on Form 8-K, filed on May 20, 2009.
- 10.8 Form of Warrant Certificate between the Company and Investors, incorporated by reference to Exhibit 10.3 of the Company's Current Report on Form 8-K, filed on May 20, 2009.
- 10.9\* Employment Agreement, dated May 26, 2009, between the Company and Kevin J. Purcell, incorporated by reference to Exhibit 10.1 of the Company's Current Report on Form 8-K, filed on May 29, 2009.
- 10.10 \$4,000,000 Revolving Line of Credit Note dated as of April 30, 2010 between Aerosonic Corporation and BMO Harris Bank, incorporated by reference to Exhibit 10.28 of the Company's Current Report on Form 10-K, filed on May 3, 2010.
- 10.11 \$3,500,000 Real Estate Term Loan Note dated as of April 30, 2010 between Aerosonic Corporation and BMO Harris Bank, incorporated by reference to Exhibit 10.29 of the Company's Current Report on Form 10-K, filed on May 3, 2010.
- 10.12 \$1,900,000 Equipment Term Loan Note dated as of April 30, 2010 between Aerosonic Corporation and BMO Harris Bank, incorporated by reference to Exhibit 10.30 of the Company's Current Report on Form 10-K, filed on May 3, 2010.
- 10.13 \$700,000 Equipment Line of Credit Note dated as of April 30, 2010 between Aerosonic Corporation and BMO Harris Bank, incorporated by reference to Exhibit 10.31 of the Company's Current Report on Form 10-K, filed on May 3, 2010.
- 10.14 Security Agreement dated as of April 30, 2010 between the Company and BMO Harris Bank, incorporated by reference to Exhibit 10.32 of the Company's Current Report on Form 10-K, filed on May 3, 2010.
- 10.15 Mortgage, Security Agreement and Assignment of Rents dated as of April 30, 2010 between the Company and BMO Harris Bank, incorporated by reference to Exhibit 10.33 of the Company's Current Report on Form 10-K, filed on May 3, 2010.

- 10.16 Guaranty Agreement dated as of April 30, 2010 between the Company and BMO Harris Bank, incorporated by reference to Exhibit 10.35 of the Company's Current Report on Form 10-K, filed on May 3, 2010.
  
- 10.17 First Amendment to Loan Agreement dated as of January 10, 2011 between the Company and BMO Harris Bank, incorporated by reference to Exhibit 10.17 of the Company's Current Report on Form 10-K, filed on May 2, 2011.
  
- 10.18 Joint Amendment to Loan Agreement and Revolving Line of Credit Note dated as of April 29, 2011 between the Company and BMO Harris Bank, incorporated by reference to Exhibit 10.18 of the Company's Current Report on Form 10-K, filed on May 2, 2011.
  
- 10.19 Joint Amendment to Loan Agreement and Revolving Line of Credit Note, dated as of June 27, 2011, between Aerosonic Corporation and BMO Harris Bank, incorporated by reference to Exhibit 10.1 of the Company's Current Report on Form 10-Q, filed on September 12, 2011.
  
- 10.20 Second Amendment to Loan Agreement, dated September 26, 2011, between Aerosonic Corporation and BMO Harris Bank N.A., incorporated by reference to Exhibit 10.1 of the Company's Current Report on Form 8-K, filed on September 30, 2011.
  
- 10.21 Amended and Restated Revolving Line of Credit Note, dated September 26, 2011, between Aerosonic Corporation and BMO Harris Bank N.A., incorporated by reference to Exhibit 10.2 of the Company's Current Report on Form 8-K, filed on September 30, 2011.
  
- 10.22 Amendment to Aerosonic Corporation 2012 Summary Compensation Table, as presented within the Company's Definitive Proxy Statement on Schedule 14A, filed on May 30, 2012, incorporated by reference to the Company's Current Report on Form 8-K, filed on June 21, 2012.
  
- 10.23 First Amendment to Amended and Restated Revolving Line of Credit Note, dated June 15, 2012, between Aerosonic Corporation and BMO Harris Bank N.A., incorporated by reference to Exhibit 10.1 of the Company's Current Report on Form 8-K, filed on June 21, 2012.
  
- 10.24 Development Collaboration and Intellectual Property Agreement, dated January 21, 2013, between Aerosonic Corporation and LG CNS Co., Ltd.
  
- 10.25\* Retention Agreement, dated April 18, 2013, between the Company and Douglas J. Hillman, incorporated by reference to Exhibit 10.1 of the Company's Current Report on Form 8-K, filed on April 22, 2013.
  
- 10.26\* Retention Agreement, dated April 18, 2013, between the Company and Kevin J. Purcell, incorporated by reference to Exhibit 10.1 of the Company's Current Report on Form 8-K, filed on April 22, 2013.
  
- 10.27\* Retention Agreement, dated April 18, 2013, between the Company and Thomas W. Cason, incorporated by reference to Exhibit 10.1 of the Company's Current Report on Form 8-K, filed on April 22, 2013.
  
- 10.28\* Retention Agreement, dated April 18, 2013, between the Company and P. Mark Perkins, incorporated by reference to Exhibit 10.1 of the Company's Current Report on Form 8-K, filed on April 22, 2013.

- 10.29 Retention Agreement, dated April 18, 2013, between the Company and Scott R. Kempshall, incorporated by  
\* reference to Exhibit 10.1 of the Company's Current Report on Form 8-K, filed on April 22, 2013.
- 21 Subsidiaries of the Registrant, as of January 31, 2013
- 23.1 Consent of Independent Registered Public Accounting Firm-Mayer Hoffman McCann P.C.
- 24 Power of Attorney, incorporated into the Signature Page hereto.
- 31.1 Section 302 Certifications
- 31.2 Section 302 Certifications
- 32.1 Section 906 Certifications
- 32.2 Section 906 Certifications

**Report of Independent Registered Public Accounting Firm**

To the Board of Directors and Stockholders of

Aerosonic Corporation and Subsidiaries:

We have audited the accompanying consolidated balance sheets of Aerosonic Corporation and Subsidiaries (Company) as of January 31, 2013 and 2012, and the related consolidated statements of operations, stockholders' equity and cash flows for the years in the two-year period ended January 31, 2013. The Company's management is responsible for these consolidated financial statements. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Aerosonic Corporation and Subsidiaries as of January 31, 2013 and January 31, 2012, and the results of its operations and its cash flow for each of the years in the two-year period ended January 31, 2013 in conformity with accounting principles generally accepted in the United States of America.

/s/ Mayer Hoffman McCann P.C.

Clearwater, Florida

## **AEROSONIC CORPORATION AND SUBSIDIARIES**

### **Notes to the Consolidated Financial Statements**

#### **1. Description of Business, Basis of Presentation and Summary of Significant Accounting Policies**

##### **Description of Business**

Aerosonic Corporation (“Aerosonic”) and its wholly-owned subsidiaries, Avionics Specialties, Inc. and OP Technologies, Inc. (collectively referred to herein as the “Company”) manufacture and sell aircraft instrumentation and sensors systems, including integrated cockpit displays, digital and mechanical standby displays, sensors and probes. Our customers include government and commercial users located worldwide. The Company’s production facilities are located in Clearwater, Florida.

##### **Liquidity, Covenant Compliance and Management’s Plans**

The Company’s liquidity will depend on its ability to continue to achieve improved operating results and contain costs related to the development of new products. Sufficient liquidity is necessary to, among other things, (i) satisfy working capital requirements, (ii) fulfill necessary capital spending and (iii) meet the Company’s debt obligations in fiscal year 2014 and beyond.

The Company’s principal sources of capital have been cash flows from operations and borrowings under its credit facilities (the “Credit Facility”) with BMO Harris Bank, N.A. (“BMO Harris Bank”). As more fully described in Note 9, the Company is required to comply with a number of financial and other covenants under the Credit Facility. The Company did not comply with certain financial covenants for the periods ended July 29, 2011 and October 28, 2011. BMO Harris Bank waived non-compliance for these periods and agreed to modify certain financial covenants and other terms of the Credit Facility. However, absent a waiver or modification to the Credit Facility, the Company’s failure to comply with these covenants in future periods would constitute a default under the Credit Facility, which would entitle BMO Harris Bank to terminate the Company’s ability to borrow under the Credit Facility and accelerate the Company’s obligations to repay outstanding borrowings. There can be no assurance that BMO Harris Bank would agree to any future waivers or modifications. The Company, however, was in compliance with all covenants within the Credit Facility as of January 31, 2012 and for all compliance periods within fiscal year 2013.

Failure by the Company to maintain its improved operating results or contain costs related to the development of new products could have a material adverse effect on the Company’s liquidity and could require the implementation of

curative measures, including raising capital, deferring planned capital expenditures and research and development efforts, reductions in force, reducing discretionary spending, and selling assets. There can be no assurance that any curative measures proposed by management will be successful to conserve liquidity. In addition, there can be no assurance that in the event additional sources of funds are needed, they will be available on acceptable terms, if at all.

#### Basis of Presentation

The Company prepares its consolidated financial statements in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP"). These principles require management to make estimates and judgments that affect reported and contingent amounts of assets, liabilities, revenues and expenses, including such items as (i) inventory, (ii) restructuring and environmental costs, (iii) other miscellaneous accruals and (iv) valuation allowances for accounts receivable, inventory and deferred tax assets (including the measurement of uncertain tax positions). Actual results may differ from these estimates under different assumptions or conditions, and such differences could be material.

## **AEROSONIC CORPORATION AND SUBSIDIARIES**

### **Notes to the Consolidated Financial Statements**

The accompanying consolidated financial statements include the accounts of the Company. All significant intercompany balances and transactions have been eliminated in consolidation. The Company operates on a fiscal year that ends on January 31, consisting of four quarters, each of the first three quarters ending on the Friday of each successive 13 week period. Accordingly, all references to the third quarter mean the third quarter ended on the 39<sup>th</sup> Friday of the fiscal year. For example, references to the third quarter of fiscal year 2013 mean the quarter ended October 26, 2012.

#### **Reclassifications**

Certain amounts in the fiscal year 2012 financial statements have been reclassified to conform to the fiscal year 2013 presentation. Such reclassifications had no effect on net loss or stockholders' equity as previously reported.

#### **Accounts Receivable, Allowance for Doubtful Accounts and Credit Losses**

The Company continuously evaluates our customers and provides reserves for anticipated credit losses as soon as collection becomes compromised. While credit losses have historically been within expectations of the provisions established, the Company cannot guarantee that it will continue to experience the same credit loss rates that have been experienced in the past. Measurement of such losses requires consideration of historical loss experience, including the need to adjust for current conditions, and judgments about the probable effects of relevant observable data, including present economic conditions such as delinquency rates and financial health of specific customers.

#### **Inventories**

The Company values inventory at standard cost which generally reflects the most recent significant cost for manufactured or purchased inventory. Standards are revalued from time to time to reflect the lower of cost (using a method that approximates the first-in, first-out method "FIFO") or net realizable value. The reserve for obsolete and slow moving inventory is based upon reviews of inventory quantities on hand, usage and sales history.

### **Work In Process Inventories**

The Company employs certain methods to estimate the value of work in process inventories for financial reporting purposes. The Company's practice has been to conduct cycle counts of inventory throughout the year. Generally, for items that are in process at the end of a fiscal year, the Company will make an estimate during the cycle counting process regarding the percentage of completion of such items in order to accurately reflect costs incurred to date on the production of the items that are still in process. These estimates are affected by the nature of the operation at which the items are located at the time a physical inventory is conducted, and are subject to judgment. This practice was employed for fiscal years 2013 and 2012.

### **Manufacturing Overhead Cost Application**

The Company establishes its inventoriable cost of manufacturing overhead by calculating overhead costs as a percentage of direct labor and applying that percentage to direct labor that has been charged to inventory on a twelve month rolling average basis. This application percentage is reviewed and adjusted no less than annually.

### **Deferred Tax Asset Valuation Allowance**

The Company accounts for income taxes in accordance with U.S. GAAP, which states that deferred tax liabilities and assets are determined based on the difference between the financial statement carrying amounts and tax bases of assets and liabilities using enacted tax rates in effect in the years in which the differences are expected to reverse. A valuation allowance is provided against the future benefit of deferred tax assets to the extent it is determined that it is more likely than not that the future tax benefits associated with the deferred tax asset will not be realized.

## AEROSONIC CORPORATION AND SUBSIDIARIES

### Notes to the Consolidated Financial Statements

#### Property Held for Sale

Property held for sale is reported at the lower of its carrying amount or fair value less cost to sell. Depreciation on property held for sale is discontinued at the time the criteria, established by U.S. GAAP, are met. The Earlysville, Virginia property is presently held for sale. The property consists of a 53,000 square foot manufacturing facility on approximately 12 acres of land. In preparation for the sale of the Earlysville, Virginia facility, the Company engaged an environmental consulting firm to survey the property for any possible soil or groundwater contamination. This survey revealed impacts to both shallow soils and groundwater that may have resulted from the accidental loss of solvents by a former owner of the property. During fiscal year 2013, the Company signed an administrative order on consent with the U.S. Environmental Protection Agency to provide the former owner with access to the property and the former owner of the property signed an administrative order on consent with the U.S. Environmental Protection Agency for completion of a contamination characterization study. As a result of the initial and subsequent surveys, the Company's responsibility for the remaining contamination treatment, future monitoring, oversight and other related costs is estimated at \$404,000 as of January 31, 2013. The Company has capitalized these costs as an increase to property held for sale, net, since such costs will be incurred in preparation for the sale of the Earlysville, Virginia facility and will not result in a carrying value in excess of the estimated fair value less cost to sell. Costs incurred during fiscal year 2013 totaled \$22,000 and costs incurred during the fiscal year ended January 31, 2012 totaled \$20,000. At this time, the Company cannot predict how much, if any, it will incur for more costs in fiscal year 2014.

#### Property, Plant and Equipment

Property, plant and equipment are stated at cost less accumulated depreciation. Depreciation is calculated on the straight-line method over the estimated useful lives of the assets. Upon disposition, the cost and related accumulated depreciation are removed from the accounts and any related gain or loss is included in earnings. Expenditures for repairs and improvements that significantly add to the productive capacity or extend the useful life of an asset are capitalized. Repair and maintenance charges are expensed as incurred.

The useful lives of property, plant and equipment for purposes of computing depreciation are:

Land improvements	15-20 Years
Buildings and improvements	25-40 Years
Machinery and equipment	3-15 Years

Patterns, dies and tools	5-10 Years
Furniture and fixtures	3-10 Years

#### Goodwill and Intangible Assets

The carrying value of goodwill is reviewed at least annually for impairment and will be reviewed more frequently if current events and circumstances indicate a possible impairment. An impairment loss is charged to expense in the period identified. As current events and circumstances warrant, the Company examines the carrying value of its intangible assets with finite lives, such as capitalized software and development costs, purchased intangibles, and other long-lived assets, to determine whether there are any impairment losses. If indicators of impairment are present and future cash flows are not expected to be sufficient to recover the asset's carrying amount, an impairment loss is charged to expense in the period identified. Factors that may cause impairment include negative industry or economic trends or significant underperformance relative to historical or projected future operating results.

## AEROSONIC CORPORATION AND SUBSIDIARIES

### Notes to the Consolidated Financial Statements

#### Other Assets

Capitalized loan fees are recorded at cost less accumulated amortization. The costs are determined at the time the loan transactions are closed and are amortized over the life of the loan using a method which approximates the effective interest method.

#### Income Taxes

The Company and its includable subsidiaries file a consolidated U.S. federal income tax return in accordance with the provisions of the Internal Revenue Code of 1986, as amended.

The Company's accounting for income taxes represents management's best estimate of various events and transactions.

Deferred tax assets and liabilities resulting from temporary differences between the financial reporting and tax bases of assets and liabilities are measured at the balance sheet date using enacted tax rates expected to apply to taxable income in the years the temporary differences are expected to reverse.

The realization of deferred tax assets depends upon the existence of sufficient taxable income within the carryback or carryforward periods under the tax law in the applicable tax jurisdiction. Valuation allowances are established when management determines, based on available information, that it is more likely than not that deferred income tax assets will not be realized. Significant judgment is required in determining whether valuation allowances should be established as well as the amount of such allowances. When making such determination, consideration is given to, among other things, the following:

- future taxable income exclusive of reversing temporary differences and carryforwards;
- future reversals of existing taxable temporary differences;
- taxable income in prior carryback years and
- tax planning strategies.

The Company believes that it will ultimately recover a majority of the deferred tax assets recorded on its consolidated balance sheets. However, should there be a change in the Company's ability to recover its deferred tax assets, its tax provision would increase in the period in which it was determined that the recovery was not likely.

The Company re-evaluates uncertain tax positions on a regular basis. This evaluation is based on factors such as changes in facts or circumstances, changes in tax law, new audit activity, and effectively settled issues. Determining whether an uncertain tax position is effectively settled requires judgment. Such a change in recognition or measurement would result in the recognition of a tax benefit or an additional charge to the tax provision.

The Company classifies tax related interest and tax related penalties as a component of income taxes.

#### Revenue Recognition

The Company generally recognizes revenue from sales of its products when the following have occurred: evidence of a sale arrangement exists; delivery or shipment has occurred or services have been rendered; the price to the buyer is fixed or determinable; and collectability is reasonably assured.

## AEROSONIC CORPORATION AND SUBSIDIARIES

### Notes to the Consolidated Financial Statements

For fixed-price contracts, the Company may recognize revenue on a Multiple-Element Arrangement basis. The Multiple-Element Arrangement method requires the Company to evaluate all deliverables in an arrangement to determine whether they represent separate units of accounting. The Company makes that determination at the inception of the arrangement. In an arrangement with multiple deliverables, the delivered item(s) shall be considered a separate unit of accounting if (a) the delivered item(s) have value to the customer on a standalone basis, (b) there is objective and reliable evidence of the fair value of the undelivered item(s), and (c) if the arrangement includes a general right of return relative to the delivered item(s) and delivery or performance of the undelivered item(s) is considered probable and substantially in the control of the buyer. The Company may also recognize its revenue under the completed contract method.

For long-term, fixed-price contracts meeting certain criteria, the Company may elect to follow the percentage-of-completion method of accounting for revenue recognition. Under this method, contract revenue is computed as that percentage of estimated total revenue that costs incurred to date bear to total estimated costs, after giving effect to the most recent estimates of costs to complete. From time to time, the Company will record costs and estimated profits in excess of billings for a contract. Revisions in costs and revenue estimates are reflected in the period in which the revisions are determined. Provisions for estimated losses on uncompleted contracts are made in the period in which such losses are determined without regard to the percentage-of-completion.

Periodically the Company enters into research and development contracts with customers related primarily to aircraft instruments and sensors. When the contracts provide for milestone or other interim payments, the Company will recognize revenue either under the Milestone method or the Multiple-Element Arrangement method. Contracts in process during fiscal year 2013, presented as contracts B, D and E, are being accounted for under the Milestone method. The Milestone method requires the Company to deem all milestone payments within each contract as either substantive or non-substantive. That conclusion is determined based upon a thorough review of each contract and the Company's deliverables committed to in each contract. For substantive milestones, the Company concludes that upon achievement of each milestone, the amount of the corresponding defined payment is commensurate with the effort required to achieve such milestone or the value of the delivered item. The payment associated with each milestone relates solely to past performance and is deemed reasonable upon consideration of the deliverables and the payment terms within the contract. For non-substantive milestones, including advance payments, the recognition of such payments are pro-rated to the substantive milestones. Milestones may include, for example, the successful completion of design review or technical review, the submission and acceptance of technical drawings, delivery of hardware, software, spares, test equipment or regulatory agency certifications. During fiscal year 2013, revenue recognized through the achievement of multiple milestones related to contracts B, D and E amounted to \$1,513,000.

F-11

**AEROSONIC CORPORATION AND SUBSIDIARIES****Notes to the Consolidated Financial Statements**

Milestone considerations for contracts in process during fiscal year 2013 include:

Contract B (Completed in fiscal year 2013)	Milestone consideration
Milestone 1 (Substantive)	\$ 100,000
Milestone 2 (Substantive)	29,000
Milestone 3 (Substantive)	100,000
Milestone 4 (Substantive)	41,000
Milestone 5 (Substantive)	10,000
Milestone 6 (Substantive)	115,000
Milestone 7 (Substantive)	38,000
Milestone 8 (Substantive)	73,000
Milestone 9 (Substantive)	51,000
Milestone 10 (Substantive)	82,000
Milestone 11 (Substantive)	23,000
	\$ 662,000

Contract D	Milestone consideration
Milestone 1 (Substantive)	\$ 319,000
Milestone 2 (Substantive)	333,000
Milestone 3 (Substantive)	196,000
Milestone 4 (Substantive)	40,000
	\$ 888,000

Contract E	Milestone consideration
Milestone 1 (Non Substantive)	\$ 187,500

Milestone 3 (Substantive)	318,750
Milestone 4 (Substantive)	56,250
	\$ 750,000

When there is no milestone or other interim payments, revenue is generally recognized at completion.

As a general matter, the terms specified in customer purchase orders determine whether the Company or the customer bears the obligation for payment of freight charges. While customers pay for freight in most transactions, the Company does occasionally pay freight charges on behalf of customers and may bill all or a portion to customers.

## Research and Development

R&D costs that are not associated with specific customer contract requirements are expensed and included in selling, general and administrative expenses and approximated \$3,684,000 and \$1,312,000 for the years ended January 31, 2013 and 2012, respectively. Unrecognized R&D costs that are associated with specific customer contract requirements are presented as a deferred charge in prepaid expenses and other current assets, net and approximated \$267,000 and \$1,332,000 as of January 31, 2013 and January 31, 2012, respectively. Recognized R&D costs that are associated with specific customer contract requirements are expensed and included in selling, general and administrative expenses approximated \$1,264,000 and \$1,407,000 for the years ended January 31, 2013 and January 31, 2012, respectively.

## Environmental Expenditures

The Company assesses its property held for sale, along with any property that is being taken out of its initially intended use, for the presence of hazardous or toxic substances that would result in an environmental liability. In addition, management assesses its current property in use for any environmental issues.

## AEROSONIC CORPORATION AND SUBSIDIARIES

### Notes to the Consolidated Financial Statements

Liabilities for environmental remediation costs not related to retirements of tangible long-lived assets, and arising from claims, assessments, litigation, fines, and penalties and other sources, are recorded when it is probable that a liability has been incurred and the amount of the assessment and/or remediation can be reasonably estimated.

Legal costs incurred in connection with environmental remediation are expensed as incurred. Recoveries of environmental remediation costs from third parties, which are probable of realization, are separately recorded as assets, and are not offset against the related environmental liability, in accordance with U.S. GAAP.

#### Treasury Stock

The Company accounts for the acquisition of treasury shares at cost. The Company has not reissued acquired shares.

#### Stock-Based Compensation

U.S. GAAP requires that all stock-based compensation be recognized as an expense in the financial statements and that such cost be measured at the fair value of the award. Under this method, in addition to reflecting compensation for new share-based awards, expense is also recognized to reflect the remaining service period of awards that had been included in pro-forma disclosure in prior periods. U.S. GAAP requires that the cost of all share-based transactions be measured at fair value and recognized over the period during which a grantee is required to provide goods or services in exchange for the award. Although the terms of the Company's share-based plans do not accelerate vesting upon retirement, or the attainment of retirement eligibility, the requisite service period subsequent to attaining such eligibility is considered non-substantive. Accordingly, the Company recognizes compensation expense related to share-based awards over the shorter of the requisite service period or the period to attainment of retirement eligibility. U.S. GAAP also requires an estimation of future forfeitures of share-based awards to be incorporated into the determination of compensation expense when recognizing expense over the requisite service period.

Although the Company did not issue stock options to employees during fiscal year 2013, the Company issued 22,000 stock options to employees during fiscal year 2012. The weighted average per share fair value of options granted was determined using the Black-Scholes option-pricing model with the following assumptions (See Note 10 for further discussion of stock-based compensation):

	2012	
Volatility	67	%
Risk-free interest rate	0.25	%
Expected life in years	10.00	
Dividend yield	0	%

#### Income per Share

Basic income per share is computed using the weighted average number of shares of common stock outstanding. Diluted income per share is computed by dividing net income available to common stockholders by the weighted average number of shares of common stock outstanding for the period, adjusted for the dilutive effect of potential common stock, using the treasury stock method.

F-13

## **AEROSONIC CORPORATION AND SUBSIDIARIES**

### **Notes to the Consolidated Financial Statements**

#### **Concentrations of Credit Risk**

Financial instruments which potentially subject the Company to concentrations of credit risk consist principally of cash and cash equivalents and accounts receivable. As of January 31, 2013 and 2012, substantially all of the Company's cash balances were deposited with financial institutions determined by management to be of high credit quality. During the normal course of business, the Company extends credit, without collateral, to customers conducting business in the aerospace industry worldwide.

#### **Exchange Rate Fluctuation**

The Company conducts a limited amount of business in transactions that are denominated in foreign currencies. The Company employs a method of matching accounts receivable denominated in foreign currencies with accounts payable denominated in foreign currencies to mitigate this risk. These amounts have been insignificant.

#### **Financial Instruments**

U.S. GAAP requires disclosure of the fair value of certain financial instruments. Cash, accounts receivable, short-term borrowings and certain accrued liabilities are included in the consolidated financial statements at amounts which approximate fair value because of the short term nature of these instruments. The carrying amount of long-term debt at January 31, 2013 and 2012 approximates fair value as these instruments have adjustable rates which change in accordance with the market.

#### **Adoption of New Accounting Pronouncements**

In September 2011, the FASB amended the guidance on the annual testing of goodwill for impairment. The amended guidance allows companies to assess qualitative factors to determine if it is more likely than not that goodwill might be impaired and whether it is necessary to perform the two-step goodwill impairment test required under current accounting standards. This guidance is effective for the Company's fiscal year ending January 31, 2013. The Company

has determined that this new guidance does not have a material impact on its consolidated financial statements.

In July 2012, the FASB amended guidance on the annual testing of indefinite-lived intangible assets for impairment. Under the amended guidance, an entity has the option first to assess qualitative factors to determine whether the existence of events and circumstances indicates that it is more likely than not that the indefinite-lived intangible asset is impaired. If, after assessing the totality of events and circumstances, an entity concludes that it is not more likely than not that the indefinite-lived intangible asset is impaired, then the entity is not required to take further action. However, if an entity concludes otherwise, then it is required to determine the fair value of the indefinite-lived intangible asset and perform the quantitative impairment test by comparing the fair value with the carrying amount. This guidance will be effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012, with early adoption permitted. The Company has determined that this new guidance will not have a material impact on its consolidated financial statements.

In February 2013, the FASB issued guidance on the Reporting of Amounts Reclassified out of Accumulated Other Comprehensive Income. The guidance requires that companies present either in a single note or parenthetically on the face of the financial statements, the effect of significant amounts reclassified from each component of accumulated other comprehensive income based on its source (e.g., the release due to cash flow hedges from interest rate contracts) and the income statement line items affected by the reclassification (e.g., interest income or interest expense). If a component is not required to be reclassified to net income in its entirety (e.g., the net periodic pension cost), companies would instead cross reference to the related footnote for additional information (e.g., the pension footnote). This guidance is effective for fiscal and interim reporting periods beginning after December 15, 2012. The adoption of this guidance is not expected to have a material effect on the Company's consolidated financial statements.

**AEROSONIC CORPORATION AND SUBSIDIARIES****Notes to the Consolidated Financial Statements****2.****Accounts Receivable**

Accounts receivable at January 31, 2013 and 2012 consisted of the following:

	2013	2012
Accounts receivable, trade	\$5,811,000	\$5,548,000
Less: allowance for doubtful accounts	(403,000 )	(358,000 )
Accounts receivable, net	\$5,408,000	\$5,190,000

The Company's allowance for doubtful accounts activity for the years ended January 31, 2013 and 2012 was as follows:

	2013	2012
Beginning balance	\$358,000	\$608,000
Amounts written off	(151,000)	(368,000)
Amounts provided for	196,000	118,000
Ending balance	\$403,000	\$358,000

**3.****Prepaid Expenses and Other Current Assets**

Included in, and making up the majority of, prepaid expenses and other current assets was \$267,000 and \$1,332,000 of deferred charges related to several current engineering contracts as of January 31, 2013 and January 31, 2012, respectively. The Company has been retained for the development of customer specific engineering projects. All the contracts are short-term in nature and not expected to extend beyond twelve months. As of January 31, 2013, the deferred charges consist of \$166,000 of internal engineering labor, including overhead, and \$101,000 of external engineering contract labor. As of January 31, 2012, the deferred charges consist of \$1,332,000 of internal engineering labor, including overhead, and \$0 of external engineering contract labor. The deferred charges are offset by residual interim payments from customers of \$19,000 and \$0 as of January 31, 2013 and January 31, 2012, respectively. Related to the deferred charges are accrued contract losses of \$71,000 and \$1,086,000 as of January 31, 2013 and January 31, 2012, respectively, which are included in accrued expenses and other liabilities.

Prepaid expenses and other current assets, net consisted of the following:

	2013	2012
Deferred charges on engineering contracts, net	\$267,000	\$1,332,000
Prepaid insurance expenses	223,000	266,000
Other prepaid expenses	92,000	204,000
Prepaid expenses and other current assets, net	\$582,000	\$1,802,000

#### **4. Inventories**

Inventories at January 31, 2013 and 2012 consisted of the following:

F-15

**AEROSONIC CORPORATION AND SUBSIDIARIES****Notes to the Consolidated Financial Statements**

	2013	2012
Raw materials	\$7,627,000	\$6,626,000
Work in process	2,619,000	2,005,000
Finished goods	21,000	381,000
Reserve for obsolete and slow moving inventory	(2,072,000)	(2,219,000)
Inventories, net	\$8,195,000	\$6,793,000

The Company's reserve for obsolete and slow moving inventory activity for the years ended January 31, 2013 and 2012 was as follows:

	2013	2012
Beginning balance	\$2,219,000	\$2,424,000
Amounts written off	(289,000 )	(315,000 )
Amounts charged to operations	142,000	110,000
Ending balance	\$2,072,000	\$2,219,000

**5. Property, Plant and Equipment**

Property, plant and equipment at January 31, 2013 and 2012 consisted of the following:

	2013	2012
Land and improvements	\$173,000	\$173,000
Building and improvements	2,522,000	2,510,000
Machinery and equipment	7,207,000	6,724,000
Patterns, dies and tools	691,000	611,000
Furniture and fixtures	1,801,000	1,635,000
Construction in progress	695,000	776,000
	13,089,000	12,429,000
Less: accumulated depreciation	(8,555,000 )	(8,223,000 )
Property, plant and equipment, net	\$4,534,000	\$4,206,000

Depreciation expense was \$451,000 and \$380,000 for the years ended January 31, 2013 and 2012, respectively. Certain components of property, plant and equipment are pledged as collateral for debt obligations. See Note 9 for further discussion of collateralized property, plant and equipment.

## **6.Intangible Assets**

Intangible assets as of January 31, 2013 and 2012 consisted of the following:

F-16

**AEROSONIC CORPORATION AND SUBSIDIARIES****Notes to the Consolidated Financial Statements**

	Useful Lives	2013	2012
Intangible assets subject to amortization:			
Acquired product prototype	5	\$-	\$730,000
Non-compete agreements	3	-	175,000
Acquired customer base	5	-	75,000
Total intangible assets subject to amortization		-	980,000
Accumulated amortization		-	(886,000)
Net		\$-	\$94,000
Intangible assets with indefinite lives:			
Goodwill		\$366,000	\$366,000

Amortization expense related to intangible assets for the years ended January 31, 2013 and 2012 was \$94,000 and \$161,000, respectively. During the year ending January 31, 2013, the intangible assets were fully amortized.

Amortization expense related to capitalized debt issuance costs for the years ended January 31, 2013 and 2012 was \$37,000 and \$36,000, respectively. As more fully described in Note 9, on January 31, 2013, the Company renewed its Long-term Debt and Revolving Credit Facility prior to its maturity dates. As a result of the early renewal, the Company recognized accelerated amortization expense in the amount of \$9,000 for the year ended January 31, 2013, which is reported as loss on extinguishment of debt, presented separately on the Consolidated Statement of Operations.

Amortization expense related to intangible assets and capitalized debt issuance costs is included in selling, general and administrative expenses. Capitalized debt issuance costs are included in other assets.

On January 21, 2013, the Company entered into a Development Collaboration and Intellectual Property Agreement with LG CNS Co., Ltd. ("LG"). The Collaboration Agreement provides for the sale of certain intellectual property of the Company (the "Purchased IP") to LG. The aggregate purchase price for the Purchased IP is \$2,300,000, \$1,553,000 of which was already paid to the Company. The remainder of the purchase price is payable by LG to the Company in two lump sum payments in January 2016 and January 2017. The Company reported a gain on sale of \$1,990,000, presented in Other Income.

On May 14, 2009, the Company entered into three separate unsecured notes payable, herein referred to collectively as the “Notes Payable”, with three separate private lenders, Bruce J. Stone, Redmond Family Investments, LLLP and Martin L. Schaffel, herein referred to collectively as “the Investors”, each containing a drawdown provision allowing the Company to borrow up to an aggregate of \$2,000,000. The loan agreements, entered into in connection with the Notes Payable (the “Loan Agreements”), initially provided for the issuance of warrants with an exercise price of \$0.64 per warrant issued at the rate of one warrant for every four dollars loaned to the Company and common shares at the rate of one share for every ten dollars loaned to the Company. Additionally, any amounts borrowed are subject to 14% interest per annum, payable monthly.

On May 21, 2009, the Company borrowed an aggregate principal amount of \$800,000 based upon the cash drawdown provision of each of the three unsecured loan agreements. The 200,000 warrants issued to the Investors pursuant to the \$800,000 drawdown are exercisable at any time during the period after May 21, 2010 and before the warrant expiration date of April 10, 2015. The Company also issued 80,000 common shares in connection with the \$800,000 cash. The aggregate amount borrowed of \$800,000 was initially payable in full under each of the three Notes Payable on or before April 10, 2010.

## AEROSONIC CORPORATION AND SUBSIDIARIES

### Notes to the Consolidated Financial Statements

On February 19, 2010, the Company borrowed an additional \$600,000 from the Investors under the Loan Agreements entered into on May 14, 2009 and also entered into amendments to each of the Loan Agreements with the Investors. The note modifications (a) extended the maturity date of the subordinated notes for a period of one year from April 10, 2010 to April 10, 2011, (b) removed Aerosonic's obligation to issue shares of its common stock upon each cash drawdown made on or after February 19, 2010, (c) revised the ratio of common shares underlying warrants issuable per each \$1.00 of principal amount borrowed from ".25 shares per \$1.00 of principal amount" to ".20 shares per \$1.00 of principal amount" with respect to cash draw downs made on or after February 19, 2010 and (d) deleted certain negative covenants relating to the issuance of securities. The warrant modifications (a) extended the expiration date of any warrants issued prior to February 19, 2010 for a period of five years from April 10, 2015 to April 10, 2020, (b) extended the expiration date of any warrants issued on or after February 19, 2010 from April 10, 2015 to the sixth anniversary date of the issuance of the warrant certificate and (c) revised the purchase price for any warrants issued on or after February 19, 2010 from \$0.64 per share to a price equal to 50% of the volume weighted average of the selling price of the Company's common stock on February 12, 2010 and for the 19 trading days prior to February 12, 2010, or \$1.98 per share. The 120,000 warrants issued to the Investors pursuant to the additional \$600,000 loan are exercisable at any time before the expiration date of February 19, 2016.

On October 13, 2010, the Company repaid \$700,000 of the outstanding balance of the Notes Payable, with each Investor receiving a pro-rata portion of the aggregate repayment amount based on the Investors' balance on that date.

On December 31, 2010, the Company repaid an additional \$100,000 of the outstanding balances of the Notes Payable, with each Investor receiving a pro-rata portion of the aggregate repayment amount based on the Investors' balance on that date.

During the first quarter of fiscal year 2012, the Company repaid the remaining outstanding balance of the Notes Payable, with each Investor receiving a pro-rata portion of the aggregate repayment amount based on the Investors' balance on that date.

The warrants and common shares issued under the Loan Agreements described above are recorded as a separate component of interest and are being accreted into the loan balances over the term of the loans. For the year ended January 31 2012, the Company recognized accretion of \$26,000 presented as additional interest expense. In addition, as a result of early repayments to the Investors, the Company recognized accelerated interest accretion expense in the amount of \$25,000 for the year ended January 31, 2012 which is reported as loss on extinguishment of debt.

**8. Accrued Expenses and Other Liabilities**

Accrued expenses and other liabilities at January 31, 2013 and 2012 consisted of the following:

	2013	2012
Environmental liability (see Note 13)	\$404,000	\$788,000
Contract costs provision	278,000	-
Contract loss provision	71,000	1,086,000
Warranty liability	167,000	226,000
Other	411,000	398,000
Accrued expenses and other liabilities	\$ 1,331,000	\$2,498,000

## AEROSONIC CORPORATION AND SUBSIDIARIES

### Notes to the Consolidated Financial Statements

#### *Contract Costs Provision*

As of January 31, 2013, the Company accrued costs of \$278,000 associated with two customer funded fixed price development contracts accounted for using the milestone method. As of January 31, 2013, neither contract required a provision for contract loss.

#### *Contract Loss Provision*

As of January 31, 2013, the Company recognized a contract loss provision of \$71,000 associated with one customer funded fixed price development contract. As of January 31, 2012, the Company recognized a contract loss provision of \$1,086,000 associated with one customer funded fixed price development contract. As of January 31, 2013, remaining revenues associated to one uncompleted project amounted to \$40,000. As of January 31, 2012, remaining revenues associated to one uncompleted project amounted to \$308,000.

#### *Warranty Liability*

The Company has established a liability for warranty claims based on historical experience, which has not been significant. The Company's warranty activity for the years ended January 31, 2013 and 2012 was as follows:

	2013	2012
Beginning balance	\$226,000	\$144,000
Cost incurred	(146,000)	(162,000)
Provision for warranty cost	87,000	244,000
Ending balance	\$167,000	\$226,000

### 9. Long-term Debt and Revolving Credit Facility

The Company is party to a Loan Agreement (the "Loan Agreement"), dated April 30, 2010, with BMO Harris Bank, the "Lender", for a Credit Facility with a maximum amount available to the Company of \$10,100,000. The Loan Agreement provides for (a) a \$4,000,000 revolving line of credit (the "Revolving Credit Line Note"), (b) a \$3,500,000 first real estate mortgage loan (the "Real Estate Mortgage Note"), (c) a \$1,900,000 term loan (the "Equipment Term Note" and together with the Real Estate Mortgage Note, the "Bank Notes"), and (d) a \$700,000 equipment line of credit (the "Equipment Credit Line Note" and together with the Revolving Credit Line Note, the "Credit Line Notes"). The available funds received and financing available under the Loan Agreement will be and have been used for new product development, working capital and capital expenditure needs. Pursuant to a First Amendment to Amended and Restated Revolving Credit Line Note, dated June 15, 2012, the Company and the Lender agreed to extend the maturity date of the Amended and Restated Revolving Credit Line Note to June 27, 2013.

The Credit Facility is secured by substantially all assets of the Company. Details of the Credit Facility are as follows:

The Amended and Restated Revolving Credit Line Note provides a line of credit in an amount equal to the lesser of (a) the Revolving Credit Limit of \$4,000,000; or (b) a Borrowing Base determined based on eligible accounts receivable and inventory. Interest is paid monthly. The interest rate on the Amended and Restated Revolving Credit Line Note is one-month LIBOR (which was 0.2087% at January 31, 2013) plus 300 basis points. Available borrowings on the Amended and Restated Revolving Credit Line Note at January 31, 2013 were \$3,097,000. The Real Estate Mortgage Note, which supports a \$3,500,000 first real estate mortgage loan, has a three-year term, a 15-year amortization period, and the interest rate is one-month LIBOR plus 340 basis points with a 4% floor. Interest and principal are paid monthly. The proceeds of the Real Estate Mortgage Note were used for refinancing an existing loan relating to the Clearwater, Florida property and for working capital and capital expenditure needs.

F-19

## AEROSONIC CORPORATION AND SUBSIDIARIES

### Notes to the Consolidated Financial Statements

The Equipment Term Note, which supports a \$1,900,000 term loan, has a three-year term, a five-year amortization period, and the interest rate is one-month LIBOR plus 340 basis points with a 4% floor. Interest and principal are paid monthly. The proceeds of the Equipment Term Note were used for refinancing an existing loan relating to the Earlysville, Virginia property and for working capital and capital expenditure needs. The Company must pay any proceeds from the sale of the Earlysville, Virginia property to BMO Harris Bank to be applied as a principal payment under the Equipment Term Note.

The Equipment Credit Line Note, which supports a \$700,000 equipment line of credit, has a three-year term, a five-year amortization period, and the interest rate is one-month LIBOR plus 325 basis points with a 4% floor. Interest is paid monthly. Principal payments began October 2011. Proceeds are used to purchase equipment for use in the Company's business. The Equipment Credit Line Note matures on May 1, 2014.

Prior to the Third Amendment, noted below, the Credit Facility contained certain financial and other restrictive covenants, including the requirement to maintain: (i) on a consolidated basis, Total Stockholders' Equity, defined as the value of total assets less total liabilities, equal to at least \$7,419,000, which amount shall increase on a quarterly basis in an amount equal to ninety percent (90%) of the Company's net income (calculated on a consolidated basis) for such quarter; (ii) on a consolidated basis, a ratio of Funded Debt, defined as all outstanding liabilities for borrowed money and other interest-bearing liabilities, including current and long term debt, less the non-current portion of Subordinated Liabilities, defined as liabilities subordinated to the Company's obligations to the lender in a manner acceptable to the lender in its sole discretion, to EBITDA not exceeding 3.0:1.0; and (iii) on a consolidated basis, a Fixed Charge Coverage Ratio, defined as the ratio of (a) the sum of EBITDA plus lease expense and rent expense, minus income tax, minus dividends, withdrawals, and other distributions, to (b) the sum of cash interest expense, lease expense, rent expense, scheduled principal amortization actually paid to the lender during the measuring period (excluding any principal payments under the Amended and Restated Revolving Credit Line Note and the Investors' Notes Payable), and scheduled payments on capitalized lease obligations during the measuring period, of at least 1.20:1.0. These covenant amounts were calculated at the end of each quarterly reporting period for which the lender required financial statements.

On January 31, 2013, the Company entered into an amendment (the "Third Amendment") to the Loan Agreement. The Amendment (a) renews to January 31, 2016, the maturity date of the Amended and Restated Revolving Credit Line Note in the amount of \$4 million; (b) renews to May 1, 2015, the maturity date of the Equipment Term Note in the amount of \$887,000, and (c) renews to January 31, 2018, the maturity date of the Real Estate Mortgage Note in the approximate amount of \$2,877,000. Except as amended to extend their respective maturities, the new notes contain the same terms and conditions as the promissory notes that they replace. The Third Amendment adjusts the Company's requirement to retain Total Stockholders' Equity to no less than \$8,759,000.

For the periods measured as of January 31, 2012, April 27, 2012, July 27, 2012, October 26, 2012 and January 31, 2013, the Company was in compliance with all covenants within the Credit Facility.

Long-term debt at January 31, 2013 and January 31, 2012 consisted of the following:

	2013	2012
Real Estate Mortgage Note	2,877,000	3,111,000
Equipment Term Note	887,000	1,267,000
Equipment Credit Line Note	510,000	653,000
	4,274,000	5,031,000
Less: current maturities	(763,000 )	(753,000 )
Long-term debt, less current maturities	\$3,511,000	\$4,278,000

F-20

**AEROSONIC CORPORATION AND SUBSIDIARIES****Notes to the Consolidated Financial Statements**

At January 31, 2013, principal repayment of Long-term debt consisted of the following:

	2014	2015	2016	2017	2018
Revolving Credit Facility	-	-	903,000	-	-
Real Estate Mortgage Note	233,000	233,000	233,000	233,000	1,945,000
Equipment Term Note	380,000	380,000	127,000	-	-
Equipment Credit Line Note	150,000	360,000	-	-	-
	763,000	973,000	1,263,000	233,000	1,945,000

Interest and accretion expense on long-term debt and the Amended and Restated Revolving Credit Line Note for the fiscal year ended January 31, 2013 and January 31, 2012 amounted to \$258,000 and \$371,000, respectively.

**10. Stockholders' Equity*****Income Per Share***

Basic income per share is based upon the Company's weighted average number of common shares outstanding during each period. Diluted income per share is based upon the weighted average number of common shares outstanding during each period, assuming the issuance of common shares for all dilutive potential common shares outstanding during the period, using the treasury stock method. Potential common stock of 118,000 and 122,000 shares were not included in the computation of diluted income per share for the years ended January 31, 2013 and 2012, respectively, as the inclusion of the potential common stock would be anti-dilutive.

	Years Ended January 31,	
	2013	2012
Weighted average shares outstanding-basic	3,782,861	3,760,483
Dilutive effect of stock options and warrants	310,664	286,533
Weighted average shares outstanding-diluted	4,093,525	4,047,016

***Options to Purchase Stock***

In July 2004, the Company adopted the Aerosonic Corporation 2004 Stock Incentive Plan (“2004 SIP”), which authorized the awarding of options to purchase up to a total of 400,000 shares of the Company’s common stock. For option awards, the 2004 SIP provides that the strike price shall not be less than the fair market value of the common stock on the date of grant and that no portion of any option award may be exercised beyond ten years from that date. In addition, no incentive stock option can be granted and exercised beyond five years to a stockholder owning 10% or more of the Company’s outstanding common stock. On July 13, 2009, stockholders approved an amendment to the Aerosonic Corporation 2004 Stock Incentive Plan (the Plan) that extended the duration of the Plan for five years to July 14, 2014 and increased the total number of shares of Aerosonic common stock issuable pursuant to the Plan from 400,000 shares of common stock to 550,000 shares.

During the first quarter of fiscal year 2012, the Company issued to its President and Chief Executive Officer, options to purchase 6,000 shares of the Company’s common stock at the common stock’s market price on that day of \$2.70. Additionally, the Company issued to its Executive Vice President and Chief Financial Officer, its Executive Vice President of Sales and Marketing and its Executive Vice President and Chief Operating Officer, options to purchase 4,000 shares each of the Company’s common stock at the common stock’s market price on that day of \$2.87. In the second quarter of fiscal year 2012, the Company issued to its Vice President of Technology and Product Development, options to purchase 4,000 shares of the Company’s common stock at the common stock’s market price on that day of \$3.06. These options vest from one to three years from the date of grant.

**AEROSONIC CORPORATION AND SUBSIDIARIES****Notes to the Consolidated Financial Statements**

On April 20, 2012, stockholders approved an amendment to the Plan that increased the total number of shares of Aerosonic common stock issuable pursuant to the Plan from 550,000 shares of common stock to 750,000 shares.

During the fiscal year ended January 31, 2013, no stock options were issued.

A summary of the activity related to the Company's stock options during fiscal year 2013 and 2012 is presented in the table below:

	Years Ended January 31, 2013			2012		
	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (In years)	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (In years)
Beginning options outstanding	339,200	\$ 2.83		320,200	\$ 2.82	
Options granted	-	\$ -		22,000	\$ 2.86	
Options exercised	(3,300 )	\$ 1.32		(1,000 )	\$ 1.01	
Options expired, cancelled or forfeited	(5,800 )	\$ 1.88		(2,000 )	\$ 1.87	
Ending options outstanding	330,100	\$ 2.87	5.79	339,200	\$ 2.83	6.81
Options exercisable at January 31,	315,400	\$ 2.87	5.68	250,000	\$ 3.09	6.54

Stock options vest over a period of two to four years and have 10-year terms. Exercise prices of stock options awarded for all periods were equal to the market price of the stock on the date of grant. The weighted average grant date fair value per share of options granted during the years ended January 31, 2013 and 2012, vested and unvested, was \$0 and \$2.83, respectively.

As of January 31, 2013, there was approximately \$18,000 of unrecognized compensation cost related to unvested options. This cost is expected to be recognized over a weighted average period of approximately 1.2 years.

The Company recorded equity-based compensation expense on its options in accordance with U.S. GAAP of approximately \$39,000 and \$127,000 for the years ended January 31, 2013 and 2012, respectively, which is included in selling, general and administrative expenses.

During the fiscal years ended January 31, 2013 and January 31, 2012, option holders exercised 3,334 and 1,000 options, respectively.

## **11.**

## **Income Taxes**

Income tax (benefit) expense for the years ended January 31, 2013 and 2012 consisted of:

**AEROSONIC CORPORATION AND SUBSIDIARIES****Notes to the Consolidated Financial Statements**

	2013	2012
Current:		
Federal	\$-	\$-
State	-	-
	-	-
Deferred:		
Federal	839,000	397,000
State	81,000	39,000
	920,000	436,000
Income tax expense	\$920,000	\$436,000

The following table illustrates the difference between the statutory income tax rates applicable to the Company versus the effective tax expense rate for the years ended January 31, 2013 and 2012:

	2013	2012
Federal tax rate	34.0 %	34.0%
Increase (decrease) in taxes resulting from:		
State income taxes, net of federal tax benefit	3.4	4.1
Intrinsic costs warrants	-	2.1
Stock based compensation	0.4	5.2
Research and development tax credit	(11.4)	5.9
Other - primarily non-deductible expenses	0.2	1.4
Effective tax rate	26.6 %	52.7%

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities at January 31, 2013 and 2012 were as follows:

	2013	2012
Current deferred tax assets:		
Accounts receivable	\$150,000	\$133,000
Inventories	1,117,000	1,130,000
Compensation expense	169,000	187,000
Contract loss	(25,000 )	15,000
Other	64,000	84,000
Total current deferred tax assets	1,475,000	1,549,000
Non-current deferred tax assets:		

Property, plant and equipment, principally due to differences in depreciation and capitalized interest	(843,000 )	(133,000 )
Building held for sale	62,000	70,000
Research and experimentation and alternative minimum tax credits	888,000	325,000
Stock-based compensation	-	-
Net operating loss carryforward	185,000	508,000
Total non-current deferred tax assets	292,000	770,000
Total deferred tax asset	1,767,000	2,319,000
Non-current deferred tax liabilities:		
Identifiable intangibles	224,000	35,000
Net deferred tax asset	\$1,543,000	\$2,284,000

F-23

## **AEROSONIC CORPORATION AND SUBSIDIARIES**

### **Notes to the Consolidated Financial Statements**

At January 31, 2013, the Company has a total net operating loss carryforward for U.S. Federal tax purposes of approximately \$496,000 and research and development tax credits of \$623,000 which expire in various years through 2029.

Realization of the Company's net deferred tax asset is dependent upon the Company generating sufficient taxable income in future years to obtain a benefit from the reversal of deductible temporary differences and from tax loss carryforwards. The Company has concluded that, based on expected future results and the future reversals of existing taxable temporary differences, a reserve is not needed at January 31, 2013.

The Company records provisions dealing with uncertain tax positions as required in ASC740. As a result, the Company has recorded a liability of \$0 at January 31, 2013 and 2012, of unrecognized tax benefits, inclusive of estimated accrued interest and penalties. At January 31, 2013, there was no accrued interest or accrued penalties related to uncertain tax positions.

The Company is generally no longer subject to examinations with respect to returns that have been filed for years prior to 2010.

The Company is not currently under examination by any taxing authority. We do not anticipate that the amount of the unrecognized benefit will significantly increase or decrease within the next twelve months.

### **12. Major Customer Information**

Direct and indirect sales to U.S. Government agencies, when combined, amounted to approximately \$10,275,000, representing 33%, and \$13,112,000, representing 44%, for the years ended January 31, 2013 and 2012, respectively. Of these amounts, approximately \$5,901,000 and \$6,365,000 were sales directly to U.S. Government agencies for the years ended January 31, 2013 and 2012, respectively. The remaining amounts of \$4,374,000 and \$6,747,000 represent sales to commercial customers for government applications for the years ended January 31, 2013 and 2012, respectively.

Foreign sales for the years ended January 31, 2013 and 2012 were approximately \$8,085,000 and \$5,903,000, respectively. Substantially all foreign sales contracts are payable in U.S. dollars.

Sales to the U.S. Government, Korea Aerospace Industries, Carp Industries and The Boeing Company represented approximately 19%, 11%, 10% and 10% of total sales for the year ended January 31, 2013, respectively. Accounts receivable at January 31, 2013 included approximately \$1,082,000 due from Korea Aerospace Industries and \$704,000 due from Carp Industries. Accounts receivable at January 31, 2012 included approximately \$1,118,000 due from Alenia Aermacchi, \$882,000 due from the U.S. Government and \$654,000 due from Carp Industries. No other customer represented greater than 10% of accounts receivable at January 31, 2013 or 2012.

### **13. Commitments and Contingencies**

#### **Commitments**

##### *Purchase commitments*

At January 31, 2013, the Company was committed to future purchases of approximately \$6,092,000 for materials and services as well as a development contract. These purchase commitments are supported by firm underlying contracts with customers and contain provisions permitting the Company to terminate such purchase commitments in the event the underlying contracts should be terminated or discontinued.

Purchase commitments as of January 31, 2013 are as follows:

**AEROSONIC CORPORATION AND SUBSIDIARIES****Notes to the Consolidated Financial Statements**

	Payments Due By Period				
	Less Than One Year	One Year to 3 Years	Greater Than 3 Years to 5 Years	After 5 Years	Total
Purchase commitments	\$5,681,000	\$ 411,000	\$ -	\$ -	\$6,092,000

*Leases*

On September 20, 2007, the Company entered into a five year operating lease at a location near Charlottesville, Virginia, which represents the new facility for the support and repair/overhaul employees of Avionics who were retained subsequent to the consolidation of the Earlysville operations into the Clearwater facility. Total rental expense was approximately \$152,000 and \$167,000 for the years ended January 31, 2013 and 2012, respectively, which is included in cost of sales. During fiscal year 2013, the lease term expired.

At January 31, 2013, there are no future minimum rental payments under leases that have initial or remaining non-cancelable lease terms in excess of one year.

**Contingencies***Litigation*

From time to time, the Company may be involved in certain claims and legal actions arising in the ordinary course of business. As of January 31, 2013, there were no claims or legal actions that will have a material adverse effect on the Company's financial position, results of operations, or liquidity.

*Environmental*

In preparation for the sale of the Earlysville, Virginia facility, the Company engaged an environmental consulting firm to survey the property for any possible soil or groundwater contamination. This survey revealed impacts to both shallow soils and groundwater that may have resulted from the accidental loss of solvents by a former owner of the property. During fiscal year 2013, the Company signed an administrative order on consent with the U.S. Environmental Protection Agency to provide the former owner with access to the property and the former owner of the property signed an administrative order on consent with the U.S. Environmental Protection Agency for completion of a contamination characterization study. As a result of the initial and subsequent surveys, the Company's responsibility for the remaining contamination treatment, future monitoring, oversight and other related costs is estimated at \$404,000 as of January 31, 2013. The Company has capitalized these costs as an increase to property held for sale, net, since such costs will be incurred in preparation for the sale of the Earlysville, Virginia facility and will not result in a carrying value in excess of the estimated fair value less cost to sell. Costs incurred during fiscal year 2013 totaled \$22,000 and costs incurred during the fiscal year ended January 31, 2012 totaled \$20,000. At this time, the Company cannot predict how much, if any, it will incur for more costs in fiscal year 2014.

#### *U.S. Government Defense Budget/Sequestration*

In August 2011, the Budget Control Act reduced the U.S. DoD top line budget by approximately \$490 billion through 2021. In addition, U.S. government expenditures are subject to the potential for further reductions, generally referred to as "sequestration". Sequestration would result in additional reductions of approximately \$500 billion from the defense top line budget through 2021. The Office of Management and Budget (OMB) has estimated that sequestration would reduce non-exempt defense discretionary accounts during U.S. government fiscal year 2013 by approximately 9.4% (excluding military personnel accounts). The OMB has further stated that the budget for Overseas Contingency Operations and any unobligated balances in prior year funds would be included in aggregate reductions, but has otherwise indicated that it cannot yet assess the impact of sequestration at the program, project, and activity level. The U.S. DoD has indicated that such reductions might require the termination of certain, as yet undetermined, procurement programs and other U.S. government customers, such as NASA and various intelligence agencies, may be required to take comparable actions. Any such impacts could have a material effect on our results of operations, financial position and/or cash flows.

**AEROSONIC CORPORATION AND SUBSIDIARIES****Notes to the Consolidated Financial Statements***Repayment Guaranty and performance Guaranty*

On August 2, 2012, the Company entered into a stand-by letter of credit agreement with BMO Harris Bank in the amount of \$187,500 related to our commitment for the repayment of a cash advance from a certain customer upon our failure to timely perform. This agreement had no effect on reducing the amount of credit available on the Amended and Restated Revolving Credit Line Note as of January 31, 2013. As of January 31, 2013, as a result of the Company's timely performance, the stand-by letter of credit is void. In addition, the Company guaranteed 10% of the contract price, or \$75,000, should the Company fail to deliver hardware. The contract subjects the Company to liquidated damages, limited to 10% of the total amount paid to the seller to date, for failure to timely deliver hardware. As of January 31, 2013, the Company expects to timely perform on the contract and avoid all contract damages.

**14. Employee Retirement Plan**

The Company's employees are eligible, after completing three months of service, to participate in a 401(k) plan (the "Plan") sponsored by Aerosonic Corporation. Under the terms of the Plan, employees may contribute up to 15% of their gross earnings subject to IRS limitations. The Company may match up to 100% of the first 3% of employees' contributions. The Company's matching contributions to the Plan were \$273,000 and \$222,000 for the years ended January 31, 2013 and 2012, respectively and are included in selling, general and administrative expenses.

**15. Quarterly Data (Unaudited)**

Set forth below are the Company's quarterly data (unaudited) for the years ended January 31, 2013 and 2012.

	Quarters Ended			
	April 27	July 27	October 26	January 31
<b>2013</b>				
Sales, net	\$7,361,000	\$7,472,000	\$7,267,000	\$8,921,000

## AEROSONIC CORPORATION AND SUBSIDIARIES

### Notes to the Consolidated Financial Statements

#### 16. Subsequent Events

##### *Merger Agreement*

On April 19, 2013, the Company entered into an Agreement and Plan of Merger (the “Merger Agreement”) with TransDigm Group Incorporated (“TransDigm”), and Buccaneer Acquisition Sub Inc. (“Purchaser”), an indirect wholly-owned subsidiary of TransDigm. Pursuant to the Merger Agreement, and on the terms and subject to the conditions described in the Merger Agreement, TransDigm agreed to conduct a cash tender offer (the “Offer”) to purchase all of the Company’s issued and outstanding shares of common stock (the “Shares”), at a price of \$7.75 per share in cash, without interest (less any applicable withholding taxes). Following the successful completion of the Offer, and subject to the terms and conditions of the Merger Agreement, Purchaser will be merged with and into the Company, with the Company surviving as an indirect wholly-owned subsidiary of TransDigm.

The obligation of TransDigm and Purchaser to consummate the Offer is subject to customary conditions, including but not limited to: (a) at least a majority of the outstanding Shares (determined on a fully-diluted basis) having been validly tendered and not withdrawn prior to the expiration of the Offer; and (b) there having occurred no Change in Recommendation (as defined in the Merger Agreement) by the Company’s Board of Directors. The Merger Agreement permits the Company to solicit alternative acquisition proposals from third parties for 40 days, until May 29, 2013. There is no assurance that this process will result in an alternative transaction.
