Qualitative information related to the operating results:

With respect to the financial and economic environment for the third quarter ended December 31, 2004, though overseas economies moved toward recovery in the first half of the current fiscal year, a certain degree of uncertainty prevailed over overseas economies in the latter part of the fiscal year as growth in the United States slowed, and due to measures taken in China to restrain investments and the sharp rise in crude oil prices. Similarly, the Japanese economy moved toward recovery led by exports and capital expenditures in the first part of the current fiscal year, but began slowing down in the latter part of the fiscal year and deflation continued.

Regarding the financial environment, in the EU, the European Central Bank's policy rate remained at 2%. In the United States, the target for the federal funds rate was raised from 1.0% to 2.25 % between June and December 2004. In Japan, the Bank of Japan continued its current easy monetary policy and kept short-term interest rates at near zero percent. On the other hand, the yield on ten-year Japanese government bonds rose temporarily due to expectations of economic recovery to approximately 1.9%, before declining again to around 1.4%. In the foreign exchange markets, although the yen initially depreciated against the US dollar to around 115, in the latter part of the current fiscal year, the yen strengthened against the US dollar to around 102 as concerns rose over the US budget and current account deficit.

Amidst this environment, for the nine months ended December 31, 2004, MTFG's ordinary profit was ¥470.1 billion and net income was ¥284.2 billion.
