Table of Contents**SABA SOFTWARE, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****(unaudited)****1. Basis of Presentation**

The accompanying unaudited condensed consolidated financial statements include the accounts of Saba Software, Inc. and its subsidiaries (Saba) and, in the opinion of management, reflect all adjustments (consisting only of normal recurring adjustments) necessary to fairly state Saba's consolidated financial position, results of operations, and cash flows as of and for the dates and periods presented.

These unaudited condensed consolidated financial statements should be read in conjunction with Saba's audited consolidated financial statements included in Saba's Amended Annual Report on Form 10-K/A filed with the Securities and Exchange Commission on October 27, 2004. The results of operations for the three and nine months ended February 28, 2005 are not necessarily indicative of results for the entire fiscal year ending May 31, 2005 or for any future period.

The condensed consolidated balance sheet at May 31, 2004 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements.

2. Basic and Diluted Net Loss Per Share

Basic and diluted net loss per share information for all periods is presented under the requirements of Statement of Financial Accounting Standards (SFAS) No. 128, Earnings per Share. Basic earnings per share has been computed using the weighted-average number of shares of common stock outstanding during the period, less shares that may be repurchased, and excludes any dilutive effects of options and warrants. Potentially dilutive issuances have been excluded from the computation of diluted net loss per share as their inclusion would be anti-dilutive. The calculations of basic and diluted net loss per share are as follows:

	<u>Three months ended</u>		<u>Nine months ended</u>	
	<u>February 28,</u> <u>2005</u>	<u>February 29,</u> <u>2004</u>	<u>February 28,</u> <u>2005</u>	<u>February 29,</u> <u>2004</u>
	(in thousands, except per share data)			
Net loss	\$ (485)	\$ (2,291)	\$ (2,844)	\$ (10,491)
Weighted-average shares of common stock outstanding	16,146	13,388	15,421	13,311

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

Weighted-average shares of common stock subject to repurchase		(18)	(2)	(30)
Weighted-average shares of common stock used in computing basic and diluted net loss per share	16,146	13,370	15,419	13,281
Basic and diluted net loss per share	\$ (0.03)	\$ (0.17)	\$ (0.18)	\$ (0.79)

3. Comprehensive Loss

Saba reports comprehensive loss in accordance with SFAS No. 130, Reporting Comprehensive Income. The following table sets forth the calculation of comprehensive loss for all periods presented:

	Three months ended		Nine months ended	
	February 28, 2005	February 29, 2004	February 28, 2005	February 29, 2004
	(in thousands)			
Net loss	\$ (485)	\$ (2,291)	\$ (2,844)	\$ (10,491)
Foreign currency translation (loss) gain	13	(12)	49	14
Unrealized (loss) gain on investments				(4)
Comprehensive loss	\$ (472)	\$ (2,303)	\$ (2,795)	\$ (10,481)

Table of Contents**4. Segment Information**

Saba operates in a single operating segment, providing human capital software and services that enable global organizations to increase the productivity and competency of people across their extended enterprise.

Geographic Information

The following tables present revenue and long-lived assets information by geographic area:

	<u>Total Revenue</u>		<u>Total Revenue</u>	
	<u>Three months ended</u>		<u>Nine months ended</u>	
	<u>February 28,</u> <u>2005</u>	<u>February 29,</u> <u>2004</u>	<u>February 28,</u> <u>2005</u>	<u>February 29,</u> <u>2004</u>
	(in thousands)

Rest of World	2,571	2,304	9,252	5,884
Total	\$ 10,538	\$ 7,835	\$ 30,188	\$ 24,256

	<u>Long-Lived Assets</u>	
	<u>As of</u> <u>February 28,</u> <u>2005</u>	<u>As of</u> <u>May 31,</u> <u>2004</u>
	(in thousands)	
United States	\$ 5,810	\$ 6,159
International	188	171
Total	\$ 5,998	\$ 6,330

Major Customers

For each of the three and nine months ended February 28, 2005 and February 29, 2004, no customer accounted for greater than 10% of revenues.

5. Credit Facility

In August 2004, Saba amended its credit facility to provide for a \$5.0 million non-formula based revolving line of credit and an equipment term loan of up to \$400,000. Under the revolving line of credit and equipment term loan, Saba may make draws through August 2005. Interest on borrowings under the revolving line of credit must be repaid monthly and outstanding principal must be repaid in August 2005. Borrowings under the equipment term loan must be repaid in 36 equal monthly installments of principal plus interest. Outstanding principal under the revolving line of credit bears interest at a rate equal to the bank's prime rate plus 1.50% and outstanding principal under equipment term loan bears interest at either a fluctuating rate equal to the bank's prime rate plus 1.75% or a fixed rate equal to the 36-month U.S. Treasury note plus 4.00%. Other terms of the credit facility remain unchanged. This amended credit facility requires us to satisfy certain covenants including a financial covenant to maintain a minimum balance of unrestricted cash and cash equivalents, net of borrowings, of \$7.5 million on deposit with the bank at all times. The credit facility also restricts Saba's ability to pay cash dividends. As of February 28, 2005, Saba had not borrowed any amounts under the revolving line of credit and was in compliance with the covenants applicable to this facility.

Table of Contents**6. Restructuring**

During each of fiscal 2004, fiscal 2003 and fiscal 2002, Saba implemented restructuring programs to reduce expenses to align its operations and cost structure with market conditions. The restructurings programs during fiscal 2004 were implemented under the provisions of SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities, while the restructuring programs during fiscal 2003 and fiscal 2002 were implemented under EITF No. 94-3, Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring). The restructuring programs included worldwide workforce reductions across all functions and consolidation of excess facilities. Workforce reduction charges consist primarily of severance and fringe benefits. A summary of the movements on the restructuring accrual during the nine months ended February 28, 2005 is outlined as follows:

	Workforce Reduction Charges	Facilities Related Charges	Total
	_____	_____	_____
	(in thousands)		
Accrual as of May 31, 2004	\$ 72	\$ 677	\$ 749
Charges	2	12	14
Deductions cash payments	(51)	(312)	(363)
	_____	_____	_____
Accrual as of February 28, 2005	\$ 23	\$ 377	\$ 400
	_____	_____	_____
Estimated remaining cash expenditures	\$ 23	\$ 377	\$ 400
	_____	_____	_____

During the first quarter of fiscal 2004, Saba recorded net restructuring charges of \$432,000. These charges were comprised of \$80,000 for an excess facility that arose after default by a subtenant and \$393,000 from the consolidation of an excess facility. These charges were partially offset by a \$41,000 decrease to a workforce reduction accrual made in a prior period that resulted from severance payments that were less than previous estimates. The excess facilities charges were based on the present value of the sum of non-cancelable lease costs, less estimates for future sublease income, which will be paid over the estimated vacancy periods through fiscal 2006. As a result of this restructuring, Saba estimates that it will not recognize net lease expenses of approximately \$218,000 in fiscal 2005 and \$98,000 in fiscal 2006. There will not be any future cash savings from this restructuring.

During the second quarter of fiscal 2003, Saba recorded net restructuring charges of \$922,000. These charges were comprised of \$770,000 for employee severance payments and \$152,000 from the consolidation of an excess facility. This restructuring included a worldwide workforce reduction of 24 employees across all business functions and geographies. As of February 28, 2005 all amounts relating this restructuring had been paid.

During the third quarter of fiscal 2003, Saba recorded net restructuring charges of \$940,000. These charges were comprised of \$416,000 for employee severance payments and \$524,000 from the consolidation of excess facilities. This restructuring included a worldwide workforce reduction of 16 employees across all business functions and geographies. It is expected that the remaining workforce reduction payments will be made by the end of fiscal 2005. Amounts related to the excess facility charge will be paid over the remaining lease periods through the end of fiscal 2006.

7. Stock Options and Equity Instruments Exchanged for Services

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

Saba accounts for employee stock options using the intrinsic value method in accordance with APB Opinion No. 25, Accounting for Stock Issued to Employees while adhering to the disclosure requirements of SFAS No. 123, Accounting for Stock-Based Compensation and SFAS No. 148 Accounting for Stock-Based Compensation Transition and Disclosure. The fair value of options, warrants and restricted stock issued for services rendered by non-employees or assets acquired is determined using the Black-Scholes option-pricing model. To calculate the expense or asset value, Saba uses either the fair value of the consideration received or the fair value of the equity instruments issued, whichever is more reliably measured. The following table illustrates the effect on net loss and net loss per share had compensation cost for Saba's stock compensation plans been determined using the fair value method required by SFAS No. 123:

The value of stock-based awards on the date of grant using the Black-Scholes option pricing model was calculated using the assumptions in the following table:

	<u>Three months ended</u>		<u>Nine months ended</u>	
	<u>February 28, 2005</u>	<u>February 29, 2004</u>	<u>February 28, 2005</u>	<u>February 29, 2004</u>

8. Guarantees

Saba enters into license agreements that generally provide indemnification for its customers against intellectual property claims. To date, Saba has not incurred any costs as a result of such indemnifications and has not accrued any liabilities related to such obligations in its consolidated financial statements.

Saba's license agreements also generally include a warranty that its software products will substantially operate as described in the applicable program documentation for a period of generally 90 days after delivery. To date, Saba has not incurred or accrued any material costs associated with these warranties.

9. Equity Funding

In August 2004, Saba entered into a common stock purchase agreement with Pequot Private Equity Fund III, L.P. and Pequot Offshore Private Equity Partners III, L.P. providing for the issuance of 2,674,500 shares of Saba's common stock at a price of \$3.2841 per share. Total proceeds, net of issuance costs of \$115,000, from the private placement were \$8.7 million. Under the terms of the funding agreement, Saba filed a Registration Statement with the Securities and Exchange Commission for the common stock issued.

10. Legal Matters

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

In November 2001, a complaint was filed in the United States District Court for the Southern District of New York against Saba, certain of its officers and directors, and certain underwriters of Saba's initial public offering. The complaint was purportedly filed on behalf of a class of certain persons who purchased Saba common stock between April 6, 2000 and December 6, 2000. The complaint alleges violations by Saba and its officers and directors of the Securities Act of 1933 in connection with certain alleged compensation arrangements entered into by the underwriters in connection with the offering. An amended complaint was filed in April 2002. Similar complaints have been filed against hundreds of other issuers that have had initial public offerings since 1998. The complaints were later consolidated into a single action. On July 16, 2003, a committee of Saba's board of directors conditionally approved a proposed partial settlement with the plaintiffs in this matter. The settlement would provide, among other things, a release of Saba and of the individual defendants for the conduct alleged in the action to be wrongful in the amended complaint. Saba would agree to undertake other responsibilities under the partial settlement, including agreeing to assign away, not assert, or release certain potential claims Saba may have against its underwriters. Any direct financial impact of the proposed settlement is expected to be borne by Saba's insurers. The committee agreed to approve the settlement subject to a number of conditions, including the participation of a substantial number of other issuer defendants in the proposed settlement, the consent of Saba's insurers to the settlement, and the completion of acceptable final settlement documentation. In June 2004, an agreement of settlement was submitted to the Court for preliminary approval. The court requested that any objections to preliminary approval of the settlement be submitted by July 14, 2004, and the underwriter defendants formally objected to the settlement. The plaintiffs and issuer defendants separately filed replies to the underwriter defendants' objections to the settlement on August 4, 2004. The court granted preliminary approval motion on February 15, 2005, subject to certain modifications. If the parties are able to agree upon the required modifications, and such modifications are acceptable to the court, notice will be given to all class members of the settlement, a fairness hearing will be held and if the court determines that the settlement is fair to the class members, the settlement will be approved. There can be no assurance that this proposed settlement would be approved and implemented in its current form, or at all. If the settlement is not finalized, Saba intends to dispute these claims and defend the lawsuit vigorously. However, due to the inherent uncertainties of litigation, Saba cannot accurately predict the ultimate outcome of the litigation. An unfavorable outcome in litigation could materially and adversely affect Saba's business, financial condition and results of operations.

Table of Contents

On March 12, 2004, Docent, Inc. filed a complaint against Saba and two employees in the Circuit Court of Cook County, Illinois. The complaint alleges, among other things, that Saba and the two employees gained an unfair competitive advantage by using Docent confidential employee information to solicit and hire certain Docent employees. In addition, the complaint alleges that Saba and the two employees used certain Docent proprietary information to interfere with Docent's client and prospective client relationships. On October 26, 2004 we entered into a settlement agreement with Docent. Under the terms of the settlement agreement, the litigation was dismissed. The settlement will have no material impact on our financial condition or operations.

Saba is also party to various legal disputes and proceedings arising from the ordinary course of general business activities. While, in the opinion of management, resolution of these matters is not expected to have a material adverse effect on Saba's consolidated financial position, results of operations or cash flows, the ultimate outcome of any litigation is uncertain. Were an unfavorable outcome to occur, the impact could be material to Saba.

11. Recent Accounting Pronouncements

On December 16, 2004 the Financial Accounting Standards Board or FASB issued Statement of Financial Accounting Standard (revised) Share Based Payment or SFAS123R. SFAS123R, which is effective for the first annual or interim period beginning after June 15, 2005 will require that any share based payment, including stock option, made to an employee be recognized in the financial statements based on their fair value. Under the terms of SFAS 123R the fair value of any equity award will be estimated at the grant date and this fair value will be recognized as compensation cost over the service period for all awards that are subject to a vesting period. SFAS123R requires that fair value be estimated using an option pricing model that takes into account at least the following items: the exercise price, the expected term of the option, the current price of the underlying share, the expected volatility of the price of the underlying share, the expected dividends on the underlying share and the risk free rate of interest.

SFAS123R will be effective for the second quarter of fiscal 2006. The effects of the adoption of SFAS 123R on our results of operations and financial are dependent upon a number of factors, including the number of employee options which may be granted in the future, the future market value and volatility of our stock price, movements in the risk free rate of interest, stock option exercise and forfeiture patterns and the stock option valuation model used to estimate the fair value of each option. As a result of these variables it is not possible to estimate the effect of the adoption of SFAS123R on our results of operations and financial condition, however note 7 provides an indication of the effects of using the Black Scholes option pricing model using the assumptions detailed therein to estimate the fair value of employee stock options and employee stock purchase plan options upon the results of operations for the three and nine months ended February 28, 2005.

12. Subsequent Events

On March 24, 2005, Saba, entered into an Agreement and Plan of Merger (the Merger Agreement) providing for the acquisition of THINQ Learning Solutions, Inc., a privately held Delaware corporation (the Merger). The Boards of Directors of Saba and THINQ have unanimously approved the Merger and the Merger Agreement.

If the Merger is completed, THINQ will become a wholly-owned indirect subsidiary of Saba. The Merger will be a combined stock-for-stock and cash transaction and the aggregate consideration payable by Saba is up to 1,700,000 shares of Parent common stock and \$500,000, subject to a post-closing balance sheet adjustment. In addition, up to an additional 100,000 shares of Saba common stock may be issued over a three-year period pursuant to an earn-out provision. As security for the Stockholders' indemnification obligations set forth in the Merger Agreement, approximately 20% of the total merger consideration will be held in escrow until the date that Saba's Annual Report on Form 10-K for the fiscal

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

year ended May 31, 2006 is required to be filed with the Securities and Exchange Commission.

The Merger is subject to customary conditions to closing, including (i) obtaining all required third party consents and approvals of governmental entities, (ii) the accuracy of representations and warranties and the absence of any material adverse change in THINQ (in each case, subject to certain exceptions), and (iii) the delivery of customary opinions from counsel to THINQ. Closing is expected to occur within 60 days of the date of the Merger Agreement.

Table of Contents**ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with the condensed consolidated financial statements and related notes contained herein and the information included in our annual report on Form 10-K for our fiscal year ended May 31, 2004 and in our other filings with the Securities and Exchange Commission. This discussion includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 (the Securities Act) and Section 21E of the Securities and Exchange Act of 1934 (the Exchange Act). All statements in this Quarterly Report on Form 10-Q other than statements of historical fact are forward-looking statements for purposes of these provisions, including any statements of the plans and objectives for future operations and any statement of assumptions underlying any of the foregoing. Statements that include the use of terminology such as may, will, expects, believes, plans, estimates, potential, or continue, or the negative thereof or other comparable terminology are forward-looking statements. Forward-looking statements include (i) in Part I, Item 1, statements regarding estimates of recognition of net lease expenses and the absence of future cash savings from restructuring, expectations regarding workforce reduction payments and payments related to the excess facility charge, statements regarding the resolution and effect of pending litigation, statements regarding the adequacy of our tax provision and statements regarding the acquisition of THINQ, (ii) in Part I, Item 2, statements regarding the design of our products to increase organizational performance and help large enterprises, that the timing of a few large software license transactions can substantially affect quarterly revenue, our belief that support revenue will continue to grow, continued investment in areas that we believe accelerate growth, that business conditions may require us to adopt additional restructuring programs, that many of our customers have not resumed previous levels of expenditures on information technologies, our anticipation that the negative impact of seasonality on our first quarter will continue, our expectation that research and development expenses will remain relatively flat for the foreseeable future, our anticipation that we will continue to experience long sales cycles, the sufficiency of cash resources, credit facilities and cash flows to meet working capital, capital expense and business expansion requirements for at least the next 12 months, our expectation to derive substantially all of our revenues for the foreseeable future from the licensing of Saba Enterprise Learning and providing related services, our expectation to derive revenues from new products over the long term, our expectation to continue to incur non-cash expenses relating to the amortization of purchased intangible assets, along with any potential goodwill impairment, that our operating results will fluctuate significantly in the future, our expectation to increase our operating expenses, the impact of SFAS No. 123R and Statement of Position 97-2, our intention to expand our international presence in the future, our expectation to regularly release new products and new versions of existing products, our expectation of continued operating losses and negative cash flow from operations, our expectation to continue to acquire complementary businesses or technologies, that the acquisition of THINQ and any future acquisitions would result in the use of significant amounts of cash, potentially dilutive issuance of equity securities, and/or the incurrence of debt, (iii) in Part I, Item 3, that more of our contracts may be denominated in foreign currencies, and (iv) in Part II, Item 1, statements regarding the resolution and effect of pending litigation. These forward-looking statements involve known and unknown risks and uncertainties. Our actual results may differ materially from those projected or assumed in such forward-looking statements. Among the factors that could cause actual results to differ materially are incorrect estimates or assumptions, unanticipated adverse results for pending litigation, contraction of the economy and world markets, lack of demand for information technologies from our customers, requirements for increased spending in research and development, unanticipated need for capital for operations, lack of demand for our products, inability to introduce new products and the factors detailed under the heading Management's Discussion and Analysis of Financial Condition and Results of Operations Factors That May Impact Future Operating Results. All forward-looking statements and risk factors included in this document are made as of the date of this report, based on information available to us as of such date. We assume no obligation to update any forward-looking statement or risk factor.

OVERVIEW**Business, Principal Products, Revenue Models and Locations**

We are a leading provider of human capital management solutions, which are designed to enable global organizations to increase the productivity and competency of people across their extended enterprise. Our solutions can help large enterprises to efficiently manage regulatory compliance, increase sales and channel readiness, accelerate time-to-competency of people across the extended enterprise, increase speed of customer acquisition, shorten time-to-market of new products and increase visibility into organizational performance. Our leadership position is supported by publicly available reports published by independent, third-party analysts that research vendors in our industry and rank them based on a number of factors, including product offerings, technology and customer base.

We commenced operations in April 1997 and, through March 1998, focused substantially all of our efforts on research activities, developing our products and building our business infrastructure. We shipped our first Saba Enterprise Learning products and began to generate revenues from software license fees, implementation and consulting services fees and support fees in April 1998. In August 2003, we shipped our generally available version of Saba Enterprise Performance.

Substantially all of our revenues are derived from perpetual licenses of our software products and related product-support and professional services. Specifically, we license our software solutions in multi-element arrangements that include a combination of our software, product support and/or professional services. To date, a substantial majority of our software license revenue has been derived from Saba Enterprise Learning. Our license revenue is affected by the strength of general economic and business conditions, as well as customers' budgetary cycles and the competitive position of our software products. In addition, the sales cycle for our products is long, typically 6 to 12 months. The timing of a few large software license transactions can substantially affect our quarterly license revenue.

Product support includes technical support and future updates for the applicable software product. We typically sell support for an initial period of one year concurrently with the sale of the related software license. After the initial period, support is renewable on an annual basis at the option of the customer. Accordingly, our support revenue depends upon both our sale of additional software licenses and annual renewals of existing support agreements. The growth rate of support revenue does not necessarily correlate directly to the growth rate of license revenue as the support renewal rate has a greater impact on support revenue as our installed base of customers grows. For example, if license revenues remained constant, support revenue would continue to grow as a result of the incremental support revenue associated with new license sales, assuming renewal rates stayed relatively constant. We believe that support revenue will continue to grow as we anticipate that a substantial majority of our customers will renew their annual contracts and the sale of new software licenses will increase the number of customers that purchase support.

Our professional services offerings include (i) implementation services, (ii) education services for our customers regarding how to use our software, and (iii) hosting services that enable customers that separately purchase software licenses to access and use the software on computers operated by or for us. Our implementation and education services are typically initiated and provided to customers that license software directly from us over a period of three to nine months after licensing the software. Accordingly, our implementation and education services revenue varies directly with the levels of license revenue generated from our direct sales organization in the preceding three- to nine-month period. In addition, our implementation and education services revenue varies following our commercial release of significant software updates as our customers generally engage our services to assist with the implementation and education of their software upgrade. Although we primarily provide implementation services on a time and materials basis, a significant portion of these services is provided on a fixed fee basis. Hosting services are generally provided pursuant to annual agreements and the associated revenue is recognized ratably over the hosting term.

Table of Contents

Our corporate headquarters are located in Redwood Shores, California. In addition, we have seven non-U.S. subsidiaries through which we conduct various operating activities related to our business. In each of the non-U.S. jurisdictions in which we have subsidiaries, India, France, Japan, Germany, the United Kingdom, Canada and Australia, we have employees or consultants engaged in sales and services activities. In the case of our India subsidiary, our employees primarily engage in software development and quality assurance testing activities.

Significant Trends and Developments in Our Business

Since we began operations in 1997 and continuing throughout fiscal 2001, our business grew rapidly. During fiscal 2002 and continuing through the first three quarters of fiscal 2004, our revenues declined as a result of a deterioration of the overall economy and information technology industry. Beginning in the later part of fiscal 2004, many key indicators began to demonstrate signs of an economic recovery. Consistent with these indicators, our business began to improve during the fourth quarter of fiscal 2004 and the first three quarters of fiscal 2005.

During fiscal 2004, fiscal 2003 and fiscal 2002, in response to the global economic slowdown, we implemented restructuring programs to reduce expenses to align our operations and cost structure with market conditions. The restructuring programs included worldwide workforce reductions across all functions and consolidation of excess facilities. Although we do not have any current plans to implement additional restructuring programs, business conditions may require us to reduce or otherwise adjust our workforce or consolidate excess facilities in the future.

Despite these recent improvements in macro-economic trends, we believe many of our customers have not resumed previous levels of expenditures on information technologies, particularly enterprise software. We attribute this continued level of depressed spending on enterprise software to customers' concerns regarding the sustainability of the current economic recovery and the current geopolitical environment.

In order to achieve profitability, we will need to generate significantly higher revenue and continue to manage our expenses. Our ability to generate higher revenues and achieve profitability depends on many factors, including the demand for our products and services, the level of product and price competition, market acceptance of our new products and general economic conditions. In this regard, we continue to invest in areas that we believe can accelerate revenue growth and to manage expenses to align our operations and cost structure with market conditions. For example, we recently expanded our worldwide field organizations, particularly our North American sales team, and reduced research and development expenses by reallocating headcount from the U.S. to our lower-cost development center in India. We currently do not have plans to shift any other operations outside of the U.S.

We experience seasonality during our first fiscal quarter as sales are typically lower than sales in the immediately preceding fourth fiscal quarter. Contributing to this seasonality is the timing of our first fiscal quarter that occurs during the summer months when general business activities slow down in a number of territories where we conduct our operations, particularly Europe. Our commission structure and other sales incentives also tend to result in fewer sales in the first fiscal quarter than in the fourth fiscal quarter. We anticipate that the negative impact of seasonality on our first quarter will continue.

CRITICAL ACCOUNTING POLICIES

Our discussion and analysis of financial condition and results of operations is based upon our condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of financial statements in conformity with generally accepted accounting principles requires us to make estimates and assumptions that affect the reported

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ materially from those estimates. We base our estimates and judgments on historical experience and on various other assumptions that we believe are reasonable under the circumstances. However, future events are subject to change and the best estimates and judgments routinely require adjustment. While there are a number of accounting policies, methods and estimates affecting our financial statements, areas that are particularly significant include revenue recognition policies, the allowance for doubtful accounts, the assessment of recoverability of goodwill and purchased intangible assets and restructuring costs. We have reviewed the critical accounting policies described in the following paragraphs with our Audit Committee.

Revenue Recognition. We recognize revenues in accordance with the provisions of American Institute of Certified Public Accountants (AICPA) Statement of Position (SOP) 97-2, Software Revenue Recognition, as amended by SOP 98-9, Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions. Under SOP 97-2, as amended, we recognize revenues when all of the following conditions are met:

persuasive evidence of an agreement exists;

delivery of the product has occurred;

the fee is fixed or determinable; and

collection of these fees is probable.

SOP 97-2, as amended, requires revenue earned on software arrangements involving multiple elements to be allocated to each element based on the relative fair values of the elements. We have analyzed each element in our multiple-element arrangements and determined that we have sufficient vendor-specific objective evidence (VSOE) to allocate revenues to support, consulting, hosting and education services. Accordingly, assuming all other revenue recognition criteria are met, revenues from perpetual licenses are recognized upon delivery using the residual method in accordance with SOP 98-9. We limit our assessment of VSOE for each element to either the price charged when the same element is sold separately or the price established by management, having the relevant authority to do so, for an element not yet sold separately.

License revenues are generally recognized on delivery if the other conditions of SOP 97-2 are satisfied. We do not grant our resellers the right of return and we do not recognize revenue from resellers until the end-user has been identified. Support revenue is recognized ratably over the support term, typically 12 months, and revenue related to implementation, consulting, education and other services is generally recognized as the services are performed. Although we primarily provide implementation and consulting services on a time and materials basis, a significant portion of these services is provided on a fixed-fee basis. For contracts that involve significant customization and implementation or consulting services that are essential to the functionality of the software, the license and services revenues are recognized over the service delivery period using the percentage-of-completion method. We use labor hours incurred as a percentage of total expected hours as the measure of progress towards completion.

Table of Contents

We recognize revenue from multiple element arrangements involving licenses and hosting services in accordance with SOP 97-2, Software Revenue Recognition, as these arrangements are with customers that have separately licensed and taken possession of our software independent of the hosting services. Revenue from our application service provider offerings is recognized under SAB 104, Revenue Recognition, as these arrangements are integrated offerings pursuant to which the customers' ability to access our software is not separable from the services necessary to operate the software and customers are not allowed to take possession of our software. Revenue from both our hosting services and application service provider offerings are recognized as service arrangements, whereby the revenue is recognized ratably over the term of the arrangement.

Allowance for doubtful accounts. Accounts receivable are recorded net of allowance for doubtful accounts and totaled approximately \$9.1 million as of February 28, 2005. The allowance for doubtful accounts, which totaled approximately \$226,000 as of February 28, 2005, is based on our assessment of the collectibility of specific customer accounts historical experience and the aging of the accounts receivable. If there is a deterioration of a major customer's credit worthiness or actual defaults are higher than our historical experience, we may be required to increase the allowance for doubtful accounts.

Recoverability of goodwill and purchased intangible assets. Effective June 1, 2002, we adopted SFAS No. 142. As such, we ceased amortization of goodwill as of May 31, 2002. In addition, we evaluated our purchased intangible assets and determined that all such assets have determinable lives. Total amortization of goodwill prior to June 1, 2002 was \$2.5 million and our remaining goodwill balance at February 28, 2005 was \$5.3 million. As of February 28, 2005, we had no remaining balance of purchased intangibles to be amortized.

On March 24, 2005 Saba announced that it had entered into an agreement and plan of merger providing for the acquisitions of THINQ Learning Solutions, Inc. (THINQ), a privately held Delaware Corporation, for consideration of up to 1,700,000 shares of Saba stock and \$500,000. Saba may issue up to an additional 100,000 shares of common stock pursuant to an earn-out provision. We expect that, should the acquisition be completed, the allocation of the purchase price will result in the identification of purchased intangible assets, which will be amortized to expense over their useful economic lives. Until the final purchase price has been determined and fully allocated, it is not currently possible to identify the value of these assets and the expected amortization expense, which will arise in future periods. In addition, it is likely that some portion of the purchase price will be allocated to goodwill, increasing that balance which must be assessed for impairment on a regular basis.

SFAS No. 142 prescribes a two-phase process for impairment testing of goodwill. The first phase screens for impairment; while the second phase, if necessary, measures the impairment. We consider Saba to be a single reporting unit. Accordingly, all of our goodwill is associated with the entire company. We perform the required impairment analysis of goodwill annually, or on an interim basis if circumstances dictate. Any reduction of enterprise fair value below the recorded amount of stockholders' equity could require us to write down the value of goodwill to its fair value and record an expense for the impairment loss.

Restructuring costs. The total accrued restructuring balance as of February 28, 2005 was \$401,000, which was comprised of \$377,000 for facilities related charges and \$24,000 for workforce reduction charges. The assumptions we have made are based on the current market conditions in the various areas where we have vacant space and necessarily entail a high level of management judgment. These market conditions can fluctuate greatly due to such factors as changes in property occupancy rates and the rental prices charged for comparable properties. These changes could materially affect our accrual. If, in future periods, it is determined that we have over accrued for restructuring charges for the consolidation of facilities, the reversal of such over accrual would have a favorable impact on our results of operations in the period this was determined and would be recorded as a credit to restructuring costs. Conversely, if it is determined that our accrual is insufficient, an additional charge would have an unfavorable impact on our results of operations in the period this was determined.

RESULTS OF OPERATIONS

THREE AND NINE MONTHS ENDED FEBRUARY 28, 2005 AND FEBRUARY 29, 2004

Revenues

	Three months ended				Nine months ended			
	February 28, 2005	Percent of Total Revenue	February 29, 2004	Percent of Total Revenue	February 28, 2005	Percent of Total Revenue	February 29, 2004	Percent of Total Revenue
(dollars in thousands)								
Revenues								
License	\$ 3,758	36 %	\$ 2,320	30 %	\$ 9,598	32 %	\$ 6,316	26 %
Services	6,780	64 %	5,515	70 %	20,590	68 %	17,940	74 %
Total revenues	\$ 10,538	100 %	\$ 7,835	100 %	\$ 30,188	100 %	\$ 24,256	100 %

Total Revenues: Total revenues increased by 34% during the three months ended February 28, 2005 compared to the three months ended February 29, 2004. For the nine months ended February 28, 2005, total revenues increased by 24% compared to the nine months ended February 29, 2004. These increases were the result of increases in both license and services revenue. As a percentage of total revenues, revenues from customers outside the United States represented 36% for the three months ended February 28, 2005 and 41% for the three months ended February 29, 2004. For the nine months ended February 28, 2005 and February 29, 2004 revenues from customers outside the United States represented 39% and 27% of total revenues, respectively. During each of the three months and nine months ended February 28, 2005 and February 28, 2004, no customer represented more than 10% of our total revenues.

License Revenue. License revenue increased by 62% during the three months ended February 28, 2005 compared to the three months ended February 29, 2004 and 52% during the nine months ended February 28, 2005 compared to the nine months ended February 29, 2004. The increase in the dollar amount of license revenue for the three and nine months periods ended February 29, 2004 was attributable to an increase in new license sales.

Services Revenue. Service revenue increased by 23% during the three months ended February 28, 2005 compared to the three months ended February 29, 2004 and 15% during the nine months ended February 28, 2005 compared to the nine months ended February 29, 2004. The increase in services revenue during the three months ended February 28, 2005 is attributable to an increase in consulting revenue of approximately \$663,000 and an increase in maintenance revenue of approximately \$494,000. The increase in consulting revenue is attributable to an increase in the number of consulting projects resulting from an increase in the number of new license sales. The increase in maintenance revenue results from a continued high level of maintenance renewals combined with additional maintenance purchased by new customers.

Table of Contents

The increase in services revenue during the nine months ended February 28, 2005 is attributable to an increase in maintenance revenue of approximately \$1.5 million and consulting revenue of approximately \$1.1 million. The increase in maintenance revenue is attributable to an increase in the number of customers purchasing maintenance across an expanded base of installed customers and to approximately \$325,000 of back maintenance fees received from an existing customer during the first quarter of fiscal 2005. The increase in consulting revenue is attributable to an increase in the number of consulting projects resulting from an increase in the number of new license sales.

International revenue as a percentage of total revenues and the mix of license and services revenue as a percentage of total revenues have varied significantly primarily due to variability in new license sales.

Cost of Revenues

	Three months ended				Nine months ended			
	February 28, 2005	Percent of Total Revenue	February 29, 2004	Percent of Total Revenue	February 28, 2005	Percent of Total Revenue	February 29, 2004	Percent of Total Revenue
(dollars in thousands)								
Cost of revenues								
Cost of license	\$ 43	1 %	\$ 27	0 %	\$ 219	1 %	\$ 178	1 %
Cost of services	2,895	27 %	2,845	36 %	9,054	30 %	9,188	38 %
Amortization of acquired developed technology			96	1 %	2	%	290	1 %
Total cost of revenues	\$ 2,938	28 %	\$ 2,968	37 %	\$ 9,275	31 %	\$ 9,656	40 %

Cost of License Revenue. Our cost of license revenue includes the cost of manuals and product documentation, production media, shipping costs and royalties to third parties. As a percentage of license revenue, cost of license revenue was approximately 1% for each of the three months ended February 28, 2005 and February 29, 2004. As a percentage of license revenue, cost of license revenue was approximately 2% for the nine months ended February 28, 2005 and 3% for the nine months ended February 29, 2004. The increase on an absolute basis for both periods is primarily due to an increase in the amount of third party royalties.

Cost of Services Revenue. Our cost of services revenue includes salaries and related expenses for our professional services and support organizations, as well as third-party subcontractors, hosting costs and billed expenses. For the three months ended February 28, 2005 cost of services revenue increased 2% compared to the three months ended February 29, 2004. The increase in the cost of services revenue was primarily attributable to an increase in employee related salary and benefits expense of \$227,000 and increase in the use of third party consultants of approximately \$85,000, partially offset by a decrease of \$219,000 related to the allocation of facilities costs. As a percentage of services revenue, cost of services was 43% for the three months ended February 28, 2005 and 52% for the three months ended February 29, 2004. The decline in cost of services revenue as a percentage of service revenue during the three months ended February 28, 2005 is due to an increase in maintenance revenue, which is generally higher margin, as well as improvements in the overall utilization levels of our consulting services personnel.

Edgar Filing: SABA SOFTWARE INC - Form 10-Q

For the nine months ended February 28, 2005 cost of services decreased 1% compared to the nine months ended February 29, 2004. The decrease is primarily attributable to a decrease of approximately \$686,000 as a result of lower headcount and the restructuring of certain of our United States facilities and \$42,000 as a result of a lower depreciable base of fixed assets. These decreases were partially offset by an increase of \$693,000 associated with an increased use of third party consultants. As a percentage of services revenue, cost of services was 44% for the nine months ended February 28, 2005 and 51% for the nine months ended February 29, 2004. The decrease in the cost of services revenue as a percentage of services revenue during the nine months ended February 28, 2005 was attributable to higher margin support revenue as a percent of total services revenue, savings as a result of our restructuring and improvements in the overall utilization levels of our consulting services personnel.

Amortization of Acquired Developed Technology. The cost of revenues includes amortization of acquired developed technology of \$96,000 for the three months ended February 29, 2004. This amortization resulted from our March 2001 acquisition of Human Performance Technologies, Inc. and June 2001 acquisition of Ultris Inc. These intangible assets were fully amortized as of August 31, 2004.

We expect that, should the acquisition of THINQ be completed, the allocation of the purchase price will result in the identification of purchased intangible assets, some of which will may need to be amortized to total cost of revenues over their useful economic lives. Until the final purchase price has been determined and fully allocated it is not currently possible to identify the value of these assets and the expected amortization expense, which may arise in future periods.

Because our cost of services revenue is greater than our cost of license revenue, cost of total revenues, as a percentage of total revenues, will fluctuate based on the mix of licenses and services sold.

Table of Contents

Operating Expenses

We classify all operating expenses, except amortization of purchased intangible assets, to the research and development, sales and marketing and general and administrative expense categories based on the nature of the expenses. Each of these three categories includes commonly recurring expenses such as salaries, employee benefits, stock compensation, other stock charges, travel and entertainment costs, and allocated communication, rent and depreciation costs. We allocate these expenses to each of the functional areas that derive a benefit from such expenses based upon their respective headcounts. The sales and marketing category of operating expenses also includes sales commissions and expenses related to public relations and advertising, trade shows and marketing collateral materials. The general and administrative category of operating expenses also includes allowance for doubtful accounts and administrative and professional services fees.

Three months ended
