**Notes to Condensed Consolidated Financial Statements**

Verizon Communications Inc. and Subsidiaries

(Unaudited)

**1. Basis of Presentation**

---

The accompanying unaudited condensed consolidated financial statements have been prepared based upon Securities and Exchange Commission (SEC) rules that permit reduced disclosure for interim periods. These financial statements reflect all adjustments that are necessary for a fair presentation of results of operations and financial condition for the interim periods shown including normal recurring accruals and other items. The results for the interim periods are not necessarily indicative of results for the full year. For a more complete discussion of significant accounting policies and certain other information, you should refer to the financial statements included in the Verizon Communications Inc. (Verizon) Annual Report on Form 10-K for the year ended December 31, 2004.

We have reclassified prior year amounts to conform to the current year presentation.

**2. MCI Acquisition**

---

On February 14, 2005, Verizon announced that it had agreed to acquire MCI, Inc. for a combination of Verizon common shares and cash (including MCI dividends). On May 2, 2005, Verizon announced that it agreed with MCI to further amend its agreement to acquire MCI for cash and stock of at least \$26.00 per share, consisting of cash of \$5.60, which is expected to be paid as a special dividend by MCI soon after the approval of the transaction by MCI shareholders, plus the greater of .5743 Verizon shares for each MCI common share or a sufficient number of Verizon shares to deliver to shareholders \$20.40 of value. Under this price protection feature, Verizon may elect to pay additional cash instead of issuing additional shares over the .5743 exchange ratio. This consideration is subject to adjustment at closing and may be decreased based on MCI's bankruptcy claims-related experience and international tax liabilities. The MCI board of directors has unanimously agreed to recommend approval of the amended agreement to its shareholders. In addition to MCI shareholder approval, the acquisition requires regulatory approvals, which the companies are targeting to obtain by year-end 2005.

Separately, on April 9, 2005, Verizon entered into a stock purchase agreement with eight entities affiliated with Carlos Slim Helu to purchase 43.4 million shares of MCI common stock for \$25.72 per share in cash plus an additional cash amount of 3% per annum from April 9, 2005 until the closing of the purchase of those shares. The transaction closed on May 17, 2005 and the additional cash payment was made through May 13, 2005. The total cash payment was \$1,121 million. Under the stock purchase agreement, Verizon will pay the Slim entities an adjustment at the end of one year in an amount per MCI share calculated by multiplying (i) 0.7241 by (ii) the amount, if any, by which the price of Verizon's common stock exceeds \$35.52 per share (measured over a 20-day period), subject to a maximum excess amount per Verizon share of \$26.98. Under Statement of Financial Accounting Standards (SFAS) No. 133, Accounting for Derivative Instruments and Hedging Activities and related amendments and interpretations, this additional cash payment is an embedded derivative which we carry at fair value and is subject to changes in the market price of Verizon stock. Since this derivative does not qualify for hedge accounting under SFAS No. 133, changes in its fair value are recorded in the condensed consolidated statements of income in Other Income and (Expense), Net. During the second quarter of 2005, we recorded pretax income of \$20 million in connection with this embedded derivative. After the closing of the stock purchase agreement, Verizon transferred the shares of MCI common stock it had purchased to a trust established pursuant to an agreement between Verizon and the Department of Justice.

**Table of Contents****3. Accounting Change**

Effective January 1, 2003, we adopted the fair value recognition provisions of SFAS No. 123, *Accounting for Stock-Based Compensation*, using the prospective method (as permitted under SFAS No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure*) to all new awards granted, modified or settled after January 1, 2003. The following table illustrates the effect on net income and earnings per share if the fair value method had been applied to all outstanding and unvested options in each period.

| (Dollars in Millions, Except Per Share Amounts)  | Three Months Ended June 30, |                 | Six Months Ended June 30, |                 |

| <b>Pro Forma Net Income</b>  | <b>\$ 2,113</b>             | <b>\$ 1,779</b> | <b>\$ 3,870</b>           | <b>\$ 2,960</b> |
| <b>Earnings Per Share</b>  |                             |                 |                           |                 |
| Basic as reported  | \$ .76                      | \$ .65          | \$ 1.40                   | \$ 1.08         |
| Basic pro forma  | .76                         | .64             | 1.40                      | 1.07            |
| Diluted as reported  | \$ .75                      | \$ .64          | \$ 1.38                   | \$ 1.07         |
| Diluted pro forma  | .75                         | .63             | 1.38                      | 1.06            |

After-tax compensation expense for other stock-based compensation included in net income as reported for the three and six months ended June 30, 2005 was \$78 million and \$199 million, respectively. For the three and six months ended June 30, 2004, after-tax compensation expense for other stock-based compensation included in net income as reported was \$44 million and \$95 million, respectively.

**4. Strategic Actions***Severance, Pension and Benefit Charges*

During the second quarter of 2004, we recorded pretax pension settlement losses of \$31 million (\$19 million after-tax). In addition, during the first quarter of 2004, we recorded pretax pension settlement losses of \$728 million (\$446 million after-tax). These settlement losses related to employees that received lump-sum distributions in connection with the 2003 voluntary separation plan under which more than 21,000 employees accepted the separation offer in the fourth quarter of 2003. These charges were recorded in accordance with SFAS No. 88, *Employers Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits* which requires that settlement losses be recorded once prescribed payment thresholds have been reached.

*Tax Matters*

## Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

As a result of the capital gain realized in the second quarter of 2005 in connection with the sale of our Hawaii businesses, we recorded a tax benefit of \$242 million related to prior year investment losses. The investment losses pertain to Grupo Iusacell, S.A. de C.V., CTI Holdings, S.A. and TelecomAsia.

Also during the second quarter of 2005, we recorded a net tax provision of \$232 million related to the repatriation of foreign earnings under the provisions of the American Jobs Creation Act of 2004, which provides for a favorable federal income tax rate in connection with the repatriation of foreign earnings, provided the criteria described in the law is met. Two of Verizon's foreign investments repatriated earnings resulting in income taxes of \$355 million, partially offset by a tax benefit of \$123 million.

### *Other Special Items*

In the second quarter of 2004, we recorded an expense credit of \$204 million (\$123 million after-tax) resulting from the favorable resolution of pre-bankruptcy amounts due from MCI. Previously reached settlement agreements became fully effective when MCI emerged from bankruptcy proceedings in the second quarter of 2004.

**Table of Contents**

Also during the second quarter of 2004, we recorded a charge of \$113 million (\$87 million after-tax) related to operating asset losses pertaining to our international long distance and data network. In addition, we recorded pretax charges of \$12 million (\$7 million after-tax) during the second quarter of 2004 in connection with the early retirement of debt. During the first quarter of 2004, we also recorded pretax charges of \$43 million (\$27 million after-tax) resulting from the early retirement of debt.

**5. Discontinued Operations**

During 2004, we announced our decision to sell Verizon Information Services Canada Inc. to an affiliate of Bain Capital, a global private investment firm, for \$1,540 million (Cdn. \$1,985 million). The sale closed during the fourth quarter of 2004 and resulted in a gain of \$1,017 million (\$516 million after-tax). In accordance with SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets, we have classified the results of operations of Verizon Information Services Canada as discontinued operations in the unaudited condensed consolidated statements of income for the three and six months ended June 30, 2004.

Summarized results of operations for Verizon Information Services Canada follow:

| (Dollars in Millions)   | Three Months Ended June 30, |       | Six Months Ended June 30, |       |
|---|-----------------------------|-------|---------------------------|-------|
|   | 2005                        | 2004  | 2005                      | 2004  |
| Income from operations of Verizon Information Services Canada before income taxes | \$                          | \$ 27 | \$                        | \$ 56 |
| Income tax provision  |                             | (12)  |                           | (25)  |
| Income on discontinued operations, net of tax                                     | \$                          | \$ 15 | \$                        | \$ 31 |

Included in income from operations of Verizon Information Services Canada before income taxes in the preceding table are operating revenues of \$80 million and \$160 million for the three and six months ended June 30, 2004, respectively.

**6. Sales of Businesses, Net and Assets Held for Sale**

During the second quarter of 2004, we entered into an agreement to sell our wireline and directory businesses in Hawaii, including Verizon Hawaii Inc. which operates approximately 700,000 switched access lines, as well as the services and assets of Verizon Long Distance, Verizon Online, Verizon Information Services and Verizon Select Services Inc. in Hawaii, to an affiliate of The Carlyle Group. This transaction closed during the second quarter of 2005. In connection with this sale, we received net proceeds of \$1,326 million and recorded a net pretax gain of \$530 million (\$336 million after-tax).

As a result of entering into the agreement to sell the Hawaii businesses, we separately classified the assets held for sale and related liabilities in the December 31, 2004 condensed consolidated balance sheet. Additional detail related to the assets held for sale, and related liabilities, follows:

Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

| <b>Total</b>                                     | <b>\$ 10,533</b>         | <b>\$ 6,100</b>             | <b>\$ 10,372</b>         | <b>\$ 5,851</b>             |
| Unamortized intangible assets:                   |                          |                             |                          |                             |
| Wireless licenses                                | \$ 47,568                |                             | \$ 42,090                |                             |

Intangible asset amortization expense was \$381 million and \$752 million for the three and six months ended June 30, 2005, respectively. For the three and six months ended June 30, 2004, intangible asset amortization expense was \$347 million and \$690 million, respectively. It is estimated to be \$748 million for the remainder of 2005, \$1,087 million in 2006, \$769 million in 2007, \$612 million in 2008 and \$498 million in 2009, primarily related to customer lists and non-network internal-use software.

**8. Debt**

---

*Debt Issuances/Redemptions*

On June 24, 2005, we issued a redemption notice for \$250 million 6.875% debentures due October 1, 2023 issued by Verizon New England Inc.

*Support Agreements and Guarantees*

All of Verizon Global Funding's debt has the benefit of Support Agreements between us and Verizon Global Funding, which give holders of Verizon Global Funding debt the right to proceed directly against us for payment of interest, premium (if any) and principal outstanding should Verizon Global Funding fail to pay. The holders of Verizon Global Funding debt do not have recourse to the stock or assets of most of our telephone operations; however, they do have recourse to dividends paid to us by any of our consolidated subsidiaries as well as assets not covered by the exclusion. Verizon Global Funding's long-term debt, including current portion, aggregated \$13,674 million at June 30, 2005. The carrying value of the available assets reflected in our unaudited condensed consolidated balance sheets was approximately \$65.6 billion at June 30, 2005.

Verizon and NYNEX Corporation are the joint and several co-obligors of the 20-Year 9.55% Debentures due 2010 previously issued by NYNEX on March 26, 1990. As of June 30, 2005, \$113 million principal amount of this obligation remained outstanding. In addition, Verizon Global Funding has guaranteed the debt obligations of GTE Corporation (but not the debt of its subsidiary or affiliate companies) that were issued and outstanding prior to July 1, 2003. As of June 30, 2005, \$3,475 million principal amount of these obligations remained outstanding. NYNEX and GTE no longer issue public debt or file SEC reports. See Note 13 for information on guarantees of operating subsidiary debt listed on the New York Stock Exchange.

**Table of Contents***Zero-Coupon Convertible Notes*

Previously, Verizon Global Funding issued approximately \$5.4 billion in principal amount at maturity of zero-coupon convertible notes due 2021 which are redeemable at the option of the holders on May 15<sup>th</sup> in each of the years 2004, 2006, 2011 and 2016. In addition, the zero-coupon convertible notes are callable by Verizon Global Funding on or after May 15, 2006. On May 15, 2004, \$3,292 million of principal amount of the notes (\$1,984 million after unamortized discount) were redeemed by Verizon Global Funding. As of June 30, 2005, the remaining zero-coupon convertible notes were classified as long-term debt maturing within one year since they are redeemable at the option of the holders on May 15, 2006.

*Debt Covenants*

We and our consolidated subsidiaries are in compliance with all of our debt covenants.

**9. Comprehensive Income**

Comprehensive income consists of net income and other gains and losses affecting shareowners investment that, under GAAP, are excluded from net income.

Changes in the components of other comprehensive income (loss) are as follows:

| (Dollars in Millions)                                    | <b>Three Months Ended June 30,</b> |                 | <b>Six Months Ended June 30,</b> |                 |
|--|------------------------------------|-----------------|----------------------------------|-----------------|

The unrealized foreign currency translation loss in 2005 is primarily driven by a decline in the functional currencies on our investments in Vodafone Omnitel N.V. and Compañía Anónima Nacional Teléfonos de Venezuela (CANTV). The unrealized foreign currency translation loss in 2004 is primarily driven by the devaluation of the functional currencies at our investments in Verizon Dominicana, C. por A., Vodafone

Omnitel and CANTV.

During the second quarter of 2005, we entered into a zero cost euro collar to hedge a portion of our net investment in Vodafone Omnitel. In accordance with the provisions of SFAS No. 133, changes in the fair value of this contract due to exchange rate fluctuations are recognized in Accumulated Other Comprehensive Loss and offset the impact of foreign currency changes on the value of our net investment in the operation being hedged.

The components of Accumulated Other Comprehensive Loss are as follows:

| (Dollars in Millions)                            | At June 30, 2005 | At December 31, 2004 |
|--|------------------|----------------------|
| Foreign currency translation adjustments         | \$ (657)         | \$ (112)             |
| Unrealized gain on net investment hedge          | 2                |                      |
| Unrealized derivative losses on cash flow hedges | (34)             | (37)                 |
| Unrealized gains on marketable securities        | 12               | 31                   |
| Minimum pension liability adjustment             | (936)            | (935)                |
| Accumulated other comprehensive loss             | \$ (1,613)       | \$ (1,053)           |

**Table of Contents****10. Earnings Per Share**

The following table is a reconciliation of the share amounts used in computing earnings per share.

(1) Total per share amounts may not add due to rounding.

Stock options for 253 million shares and 249 million shares for the three and six months ended June 30, 2005, respectively, were not included in the computation of diluted earnings per share because the exercise price of stock options was greater than the average market price of the common stock. For the three and six months ended June 30, 2004, the number of shares not included in the computation of diluted earnings per share was 255 million.

## 11. Segment Information

---

We have four reportable segments, which we operate and manage as strategic business units and organize by products and services. Our segments include: Domestic Telecom principally representing our telephone operations that provide local telephone services in 28 states and Washington, D.C., including voice and data transport, enhanced and custom calling features, network access, directory assistance, private lines and public telephones as well as long distance services, customer premises equipment distribution, data solutions and systems integration, billing and collections, Internet access services and inventory management services; Domestic Wireless domestic wireless products and services, including wireless voice and data services and equipment sales across the United States; Information Services representing our directory publishing businesses and electronic commerce services; and International which includes wireline and wireless communications operations and investments primarily in the Americas and Europe.

**Table of Contents**

We measure and evaluate our reportable segments based on segment income. This segment income excludes unallocated corporate expenses and other adjustments arising during each period. The other adjustments include transactions that the chief operating decision makers exclude in assessing business unit performance due primarily to their non-recurring and/or non-operational nature. Although such transactions are excluded from the business segment results, they are included in reported consolidated earnings. Gains and losses that are not individually significant are included in all segment results, since these items are included in the chief operating decision makers' assessment of unit performance. These gains and losses are primarily contained in Information Services and International since they actively manage investment portfolios.

The following table provides operating financial information for our four reportable segments and a reconciliation of segment results to consolidated results:

| (Dollars in Millions)              | Three Months Ended June 30, |           | Six Months Ended June 30, |           |

During the first quarter of 2004, we sold all of our investment in Iowa Telecom preferred stock, which resulted in a pretax gain of \$43 million (\$43 million after-tax) included in Income From Other Unconsolidated Businesses in the unaudited condensed consolidated statements of income.

## Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

Financial information for Domestic Telecom and Information Services excludes the effects of Hawaii access lines and directory operations sold in the second quarter of 2005 (see Note 6). Financial information for Information Services also excludes the effects of Verizon Information Services Canada (see Note 5).

Corporate, eliminations and other includes unallocated corporate expenses, intersegment eliminations recorded in consolidation, the results of other businesses such as lease financing, and asset impairments and expenses that are not allocated in assessing segment performance due to their non-recurring nature.

We generally account for intersegment sales of products and services and asset transfers at current market prices. We are not dependent on any single customer.

**Table of Contents****12. Employee Benefits**

We maintain noncontributory defined benefit pension plans for substantially all employees. In addition, we maintain postretirement health care and life insurance plans for our retirees and their dependents, which are both contributory and non-contributory and include a limit on the company's share of cost for certain recent and future retirees.

*Net Periodic Cost*

The following tables summarize the benefit costs related to our pension and postretirement health care and life insurance plans:

| Three Months Ended June 30,                   | (Dollars in Millions) |                 |                              |        |

Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

|   |         |        |          |        |
|---|---------|--------|----------|--------|
| Curtailment loss - Hawaii operations sold | 6       |        |          |        |
| Total (income) cost                       | \$ (89) | \$ 496 | \$ 1,044 | \$ 914 |

The termination benefits, settlement loss and curtailment loss amounts pertaining to the Hawaii operations sold were recorded in the condensed consolidated statements of income in Sales of Businesses, Net.

*Employer Contributions*

In 2005, based on the funded status of the plans at December 31, 2004, we anticipate qualified pension trust contributions of \$730 million, including voluntary contributions, \$140 million to our nonqualified pension plans and \$1,060 million to our other postretirement benefit plans. During the three months ended June 30, 2005, we contributed \$28 million to our nonqualified pension plans and \$263 million to our other postretirement benefit plans. During the six months ended June 30, 2005, we contributed \$698 million to our qualified pension trusts, \$74 million to our nonqualified pension plans and \$559 million to our other postretirement benefit plans. Federal legislation on pension funding relief was enacted on April 10, 2004. The legislation provides temporary funding relief for the 2004 and 2005 plan years, principally replacing the 30-year treasury rate with a higher corporate bond rate for determining current liability. The anticipated required qualified pension trust contributions disclosed in Verizon's Annual Report on Form 10-K for the year ended December 31, 2004 continue to be accurate.

**Table of Contents***Medicare Drug Act*

On December 8, 2003, the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (Medicare Drug Act) was signed into law. The Medicare Drug Act introduces a prescription drug benefit under Medicare (Medicare Part D) as well as a federal subsidy to sponsors of retiree health care benefit plans that provide a benefit that is at least actuarially equivalent to Medicare Part D. We sponsor several postretirement health care plans that provide prescription drug benefits that are deemed actuarially equivalent to the Medicare Part D. We elected to recognize the impact of the federal subsidy on our accumulated postretirement benefit obligation and net postretirement benefit costs in the fourth quarter of 2003. We anticipate the recognition of the Medicare Drug Act to decrease our accumulated postretirement benefit obligation by \$1,337 million. During the three and six months ended June 30, 2005 and 2004 we have reduced our net postretirement benefit cost as follows:

*Severance Benefits*

During the three and six months ended June 30, 2005, we paid severance benefits of \$60 million and \$122 million, respectively. At June 30, 2005, we had a remaining severance liability of \$678 million, which includes future contractual payments to employees separated as of June 30, 2005.

**Table of Contents****13. Guarantees of Operating Subsidiary Debt**

Verizon has guaranteed the following two obligations of indirect wholly owned operating subsidiaries: \$480 million 7% debentures series B, due 2042 issued by Verizon New England Inc. and \$300 million 7% debentures series F issued by Verizon South Inc. due 2041. These guarantees are full and unconditional and would require Verizon to make scheduled payments immediately if either of the two subsidiaries failed to do so. Both of these securities were issued in denominations of \$25 and were sold primarily to retail investors and are listed on the New York Stock Exchange. SEC rules permit us to include condensed consolidating financial information for these two subsidiaries in our periodic SEC reports rather than filing separate subsidiary periodic SEC reports.

Below is the condensed consolidating financial information. Verizon New England and Verizon South are presented in separate columns. The column labeled Parent represents Verizon's investments in all of its subsidiaries under the equity method and the Other column represents all other subsidiaries of Verizon on a combined basis. The Adjustments column reflects intercompany eliminations.

**14. Recent Accounting Pronouncement**

In March 2005, the Financial Accounting Standards Board (FASB) issued FASB Interpretation (FIN) No. 47, Accounting for Conditional Asset Retirement Obligations – an interpretation of FASB Statement No. 143. FIN No. 47 clarifies SFAS No. 143, Accounting for Asset Retirement Obligations, such that conditional asset retirement obligations require recognition at fair value if they can be reasonably estimated. These rules are effective December 31, 2005; we are currently evaluating the impact, if any, on our results of operations and financial position.

**15. Commitments and Contingencies**

Several state and federal regulatory proceedings may require our telephone operations to pay penalties or to refund to customers a portion of the revenues collected in the current and prior periods. There are also various legal actions pending to which we are a party and claims which, if asserted, may lead to other legal actions. We have established reserves for specific liabilities in connection with regulatory and legal actions, including environmental matters, that we currently deem to be probable and estimable. We do not expect that the ultimate resolution of pending regulatory and legal matters in future periods, including the Hicksville matters described below, will have a material effect on our financial condition, but it could have a material effect on our results of operations.

## Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

During 2003, under a government-approved plan, remediation commenced at the site of a former facility in Hicksville, New York that processed nuclear fuel rods in the 1950s and 1960s. Remediation beyond original expectations proved to be necessary and a reassessment of the anticipated remediation costs was conducted. In addition, a reassessment of costs related to remediation efforts at several other former facilities was undertaken. As a result, an additional environmental remediation expense of \$240 million was recorded in 2003. We expect overall remediation efforts, including soil and ground water remediation and property costs, to take place over the next several years, and our cost estimates may be revised as remediation continues.

There are also litigation matters associated with the Hicksville site primarily involving personal injury claims in connection with alleged emissions arising from operations in the 1950s and 1960s at the Hicksville site. These matters are in various stages.

In connection with the execution of agreements for the sales of businesses and investments, Verizon ordinarily provides representations and warranties to the purchasers pertaining to a variety of nonfinancial matters, such as ownership of the securities being sold, as well as financial losses.

**Table of Contents**

Under the terms of an investment agreement, Vodafone Group Plc (Vodafone) may require Verizon Wireless to purchase up to an aggregate of \$20 billion worth of Vodafone's interest in Verizon Wireless at designated times at its then fair market value. In the event Vodafone exercises its put rights, we have the right, exercisable at our sole discretion, to purchase up to \$12.5 billion of Vodafone's interest instead of Verizon Wireless for cash or Verizon stock at our option. Vodafone had the right to require the purchase of up to \$10 billion during a 61-day period opening on June 10 and closing on August 9 in 2004, and did not exercise that right. As a result, Vodafone still has the right to require the purchase of up to \$20 billion worth of its interest, not to exceed \$10 billion in any one year, during a 61-day period opening on June 10 and closing on August 9 in 2005 through 2007. Vodafone also may require that Verizon Wireless pay for up to \$7.5 billion of the required repurchase through the assumption or incurrence of debt.

**Item 2. Management's Discussion and Analysis of Results of Operations and Financial Condition**

---

**Overview**

Verizon Communications Inc. (Verizon) is one of the world's leading providers of communications services. Verizon's domestic wireline telecommunications business provides local telephone services, including broadband, in 28 states and Washington, D.C. and nationwide long-distance and other communications products and services. The domestic wireline consumer business generally provides local, broadband and long distance services to customers. Our domestic wireline business also provides a variety of services to other telecommunications carriers as well as large and small businesses. Verizon's domestic wireless business provides wireless voice and data products and services across the United States using one of the most extensive wireless networks. Information Services operates directory publishing businesses and provides electronic commerce services. Verizon's international presence includes wireline and wireless communications operations and investments, primarily in the Americas and Europe. Stressing diversity and commitment to the communities in which we operate, Verizon has a highly diverse workforce of 214,000 employees.

The sections that follow provide information about the important aspects of our operations and investments, both at the consolidated and segment levels, and include discussions of our results of operations, financial position and sources and uses of cash. In addition, we have highlighted key trends and uncertainties to the extent practicable. The content and organization of the financial and non-financial data presented in these sections are consistent with information used by our chief operating decision makers for, among other purposes, evaluating performance and allocating resources. We also monitor several key economic indicators as well as the state of the economy in general, primarily in the United States where the majority of our operations are located, in evaluating our operating results and analyzing and understanding business trends. While most key economic indicators, including gross domestic product, impact our operations to some degree, we have noted higher correlations to housing starts, non-farm employment, personal consumption expenditures and capital spending, as well as more general economic indicators such as inflation and unemployment rates.

Our results of operations, financial position and sources and uses of cash in the current and future periods reflect Verizon management's focus on the following four key areas:

**Revenue Growth** Our emphasis is on revenue transformation, devoting more resources to higher growth markets such as wireless, wireline broadband connections, including digital subscriber lines (DSL) and fiber optics to the home (Verizon's FiOS data product), long distance and other data services as well as expanded services to enterprise markets, rather than to traditional services, where we have been experiencing access line losses. In the second quarter of 2005, revenues from these growth areas increased by 14% compared to the similar period in 2004 and represent 57% of our total revenues, up from 52% of total revenues in the second quarter of 2004. Verizon reported consolidated revenue growth of 4.6% in the second quarter of 2005 compared to the similar period in 2004, led by 14.6% higher revenue at Domestic Wireless and 10.9% total data revenue growth at Domestic Telecom. Verizon added 1,921,000 wireless customers, 278,000 broadband connections and 223,000 long distance lines in the second quarter of 2005.

**Operational Efficiency** While focusing resources on growth markets, we are continually challenging our management team to lower expenses, particularly through technology-assisted productivity improvements including self-service initiatives. The effect of these and other efforts, such as the 2003 labor agreements and voluntary separation plans and real estate consolidations and call center routing improvements, has been to significantly change the company's cost structure and maintain stable operating income margins. Real estate consolidations include our decision to establish a new center in New Jersey for the leadership teams of Domestic Telecom, Domestic Wireless and International.

**Capital Allocation** Verizon's capital spending continues to be directed toward growth markets. High-speed wireless data (Evolution-Data Optimized, or EV-DO) services, replacement of copper access lines with fiber optics to the home, as well as expanded services to enterprise markets are examples of areas of capital spending in support of these growth markets. In the six months ended June 30, 2005, approximately

## Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

73% of Domestic Telecom and Domestic Wireless capital spending was focused toward these growth areas, compared to 60% in the second quarter of 2004. In 2005, Verizon management expects to spend approximately 15% more than 2004 capital expenditures of \$13,259 million in support of growth initiatives. In addition to capital expenditures, Domestic Wireless continues to acquire wireless spectrum in support of expanding data applications and customer base. This includes participation in the Federal Communications Commission (FCC) Auction 58 and the NextWave Telecom Inc. (NextWave) and Qwest Wireless, LLC acquisitions.

**Table of Contents**

**Cash Flow Generation** The financial statements reflect the emphasis of management on not only directing resources to growth markets, but also using cash provided by our operating and investing activities for the repayment of debt in addition to providing a stable dividend to our shareowners. At June 30, 2005, Verizon's total debt was \$41,757 million, an increase of 6.3% from December 31, 2004 and a decrease of 0.3% from June 30, 2004. As anticipated, Verizon's debt balance increased in the second quarter of 2005 principally as a result of the acquisitions of wireless spectrum, as well as the purchase of shares of MCI, Inc. from entities affiliated with Carlos Slim Helu (see **Other Factors That May Affect Future Results** **Recent Developments** ).

Supporting these key focus areas are continuing initiatives to more effectively package and add more value to our products and services. In 2004, Verizon announced a deployment expansion of FiOS in several states in our service territory. Our FiOS high-speed data services are currently available in 15 states, and we are on track to meet our goal of passing three million premises by the end of 2005. Verizon plans to begin offering video on the FiOS network later this year in some of our service areas which will include cable and broadcast channels, hundreds of other digital video channels, high-definition programming, video-on-demand content, music channels and an interactive programming guide. Significant capital expenditures in connection with the video infrastructure have been made, including completing construction of two national super head ends and substantial progress made in building regional video hub offices. Progress is also being made in securing video franchises; we currently have franchises in eight markets and are nearing completion in another 15 markets. Innovative product bundles include local wireline, long distance, wireless and broadband services for consumer and general business retail customers. In our enterprise markets, we are broadening our presence having expanded our national network and by increasing our portfolio of advanced data services. These efforts will also help counter the effects of competition and technology substitution that have resulted in access line losses that have contributed to declining Domestic Telecom revenues over the past several years.

At Domestic Wireless, we will continue to execute on the fundamentals of our network superiority and value proposition to deliver growth for the business while at the same time provide new and innovative products and services for our customers. We are continuing to expand the areas where we are offering Broadband Access, our EV-DO service which provides typical data downloads of 300-500 kilobits per second. During the second quarter of 2005, Domestic Wireless expanded its broadband network to 50 major metropolitan markets and 57 airports. Domestic Wireless's broadband network is the largest in the U.S. and reaches one-third of the U.S. population. Our goal is to reach approximately one-half of the U.S. population by year-end 2005. During the first quarter of 2005, we launched V CAST, our consumer broadband wireless service offering, which provides customers with unlimited access to a variety of video and gaming content on EV-DO handsets. In the second quarter of 2005, V CAST customers increased by 129%.

**Consolidated Results of Operations**

In this section, we discuss our overall results of operations and highlight special and non-recurring items. In the following section, we review the performance of our four reportable segments. We exclude the effects of the special and non-recurring items from the segments' results of operations since management does not consider them in assessing segment performance, due primarily to their non-recurring and/or non-operational nature. We believe that this presentation will assist readers in better understanding our results of operations and trends from period to period. This section on consolidated results of operations carries forward the segment results, which exclude the special and non-recurring items, and highlights and describes those items separately to ensure consistency of presentation in this section and the **Segment Results of Operations** section.

| Consolidated Revenues              | \$ 18,569 | \$ 17,758 | 4.6    | \$ 36,748 | \$ 34,814 | 5.6    |
|                                    | <hr/>     |           |        | <hr/>     |           |        |

Consolidated revenues in the second quarter of 2005 were higher by \$811 million, or 4.6% and \$1,934 million, or 5.6% for the six months ended June 30, 2005 compared to the similar periods in 2004. These increases were

**Table of Contents**

primarily the result of significantly higher revenues at Domestic Wireless, partially offset by lower revenues at Domestic Telecom and the sale of Hawaii operations in the second quarter of 2005.

Domestic Wireless's revenues increased by \$999 million, or 14.6% in the second quarter of 2005 and \$2,255 million, or 17.3% for the six months ended June 30, 2005 compared to the similar periods in 2004. These increases were primarily due to a 17.1% increase in customers as of June 30, 2005 compared to June 30, 2004, partially offset by decreases in average service revenue per customer (ARPU). ARPU decreased by 2.7% to \$49.42 in the second quarter of 2005 and by 0.4% to \$49.23 for the six months ended June 30, 2005 compared to the similar periods in 2004, primarily due to pricing changes to our America's Choice and Family Share plans earlier this year, partially offset by higher data revenues. Increases in handsets sold and increased equipment upgrades also drove increases in equipment and other revenue in the second quarter of 2005 and for the six months ended June 30, 2005 compared to the similar periods in 2004.

Revenues at Domestic Telecom declined during the second quarter of 2005 by \$47 million, or 0.5% and \$161 million, or 0.8% for the six months ended June 30, 2005 compared to the similar periods in 2004 primarily due to lower revenues from local services, partially offset by higher long distance and other services revenues. The decline in local service revenues of \$165 million, or 3.6% in the second quarter of 2005 and \$362 million, or 3.9% for the six months ended June 30, 2005 compared to the similar periods in 2004 was mainly due to lower demand and usage of our basic local exchange and accompanying services, as reflected by a 5.5% decline in switched access lines in service from June 30, 2004, driven by the effects of competition and technology substitution. Long distance service revenues increased \$69 million, or 6.7% in the second quarter of 2005 and \$153 million, or 7.6% for the six months ended June 30, 2005 compared to the similar periods in 2004, principally as a result of customer growth from our interLATA long distance services. We added 223,000 long distance lines in the second quarter of 2005 and 597,000 long distance lines in the six months ended June 30, 2005, for a total of 18.0 million long distance lines nationwide, representing an 8.8% increase in long distance lines from June 30, 2004. Revenues from other services increased by \$35 million, or 4.0% in the second quarter, and \$29 million, or 1.7% for the six months ended June 30, 2005 compared to the similar periods in 2004 as a result of higher sales of voice and data customer premises equipment services.

Lower revenue of Hawaii operations sold of \$93 million, or 63.7% during the second quarter of 2005 and \$93 million, or 31.5% for the six months ended June 30, 2005 compared to the similar periods in 2004 are the result of the sale during the second quarter of 2005 of our wireline and directory operations in Hawaii.

**Cost of Services and Sales**

Consolidated cost of services and sales in the second quarter of 2005 increased \$638 million, or 11.4% and \$1,271 million, or 11.4% for the six months ended June 30, 2005 compared to the similar periods in 2004. These increases were driven by higher wireless network costs, increases in wireless equipment costs, increases in pension and other postretirement benefit costs and higher costs associated with our wireline growth businesses, including long distance and broadband connections.

The higher wireless network costs were driven by increased minutes of use (MOUs) on the wireless network in the second quarter of 2005 and for the six months ended June 30, 2005 compared to the similar periods in 2004, partially offset by lower roaming, local interconnection and long distance rates. Cost of wireless equipment sales increased in second quarter of 2005 and for the six months ended June 30, 2005 compared to the similar periods in 2004 primarily as a result of an increase in wireless devices sold due to an increase in gross activations and equipment upgrades in the second quarter of 2005 and for the six months ended June 30, 2005 compared to the similar periods in 2004.

## **Table of Contents**

Costs in this period were impacted by increased pension and other postretirement benefit costs. As of December 31, 2004, Verizon evaluated key employee benefit plan assumptions in response to conditions in the securities markets. The expected rate of return on pension plan assets has been maintained at 8.50%. However, the discount rate assumption has been lowered from 6.25% in 2004 to 5.75% in 2005, consistent with interest rate levels at the end of 2004. Further, there was an increase in the retiree health care cost trend rates. The overall impact of these assumption changes, combined with the impact of lower than expected actual asset returns over the past few years, resulted in net pension and other postretirement benefit expense (primarily in cost of services and sales) of \$330 million in the second quarter of 2005 and \$680 million for the six months ended June 30, 2005, compared to net pension and postretirement benefit expense of \$271 million and \$550 million in the second quarter of 2004 and six months ended June 30, 2004, respectively.

Also contributing to expense increases in cost of services and sales were higher costs associated with our growth businesses, including a 2,400, or 1.7% increase in the number of Domestic Telecom employees as of June 30, 2005 compared to June 30, 2004. Further, both the quarter and year-to-date comparisons were affected by a favorable adjustment to our interconnection expense in connection with the MCI settlement in the second quarter of 2004.

## **Selling, General and Administrative Expense**

Consolidated selling, general and administrative expense in the second quarter of 2005 increased \$253 million, or 5.1% and decreased \$208 million, or 1.9% for the six months ended June 30, 2005 compared to the similar periods in 2004. Increases in salary and benefits costs, sales commissions, advertising and promotion expenses in the second quarter of 2005 and for the six months ended June 30, 2005 were partially offset by lower non-income taxes and reduced bad debt costs. In addition, the second quarter of 2004 included the favorable resolution in the second quarter of 2004 of a 2003 TELPRI charge. Special and non-recurring charges in selling, general and administrative expense in the second quarter of 2004 and six months ended June 30, 2004 were \$(60) million and \$668 million, respectively. There were no special and non-recurring items in selling, general and administrative expense in 2005.

Special and non-recurring charges recorded during the second quarter of 2004 and six months ended June 30, 2004 included \$31 million and \$759 million, respectively, related to pension settlement losses incurred in connection with the voluntary separation of approximately 21,000 employees in the fourth quarter of 2003 who received lump-sum distributions during the 2004 periods. Special and non-recurring charges in the second quarter of 2004 also included an expense credit of \$204 million resulting from the favorable resolution of pre-bankruptcy amounts due from MCI, Inc., partially offset by a charge of \$113 million related to operating asset losses.

## **Depreciation and Amortization Expense**

Consolidated depreciation and amortization expense in the second quarter of 2005 increased \$59 million, or 1.7% and \$94 million, or 1.4% for the six months ended June 30, 2004 compared to the similar periods in 2004 primarily due to increased depreciation expense related to the increase in depreciable assets, partially offset by lower Domestic Telecom depreciation rates.

## **Sales of Businesses, Net**

During the second quarter of 2005, we sold our wireline and directory businesses in Hawaii and recorded a pretax gain of \$530 million.

**Other Consolidated Results**

**Equity in Earnings of Unconsolidated Businesses**

Equity in earnings of unconsolidated businesses decreased by \$33 million, or 15.6% in the second quarter of 2005 and by \$39 million, or 9.5% for the six months ended June 30, 2005 compared to the similar periods in 2004. The decreases were primarily driven by reduced equity income resulting from the sale of our 20.5% interest in TELUS Corporation in the fourth quarter of 2004.

**Income From Other Unconsolidated Businesses**

Income from other unconsolidated businesses decreased by \$16 million, or 22.2% for the six months ended June 30, 2005 compared to the similar period in 2004, primarily driven by a pretax gain of \$43 million recorded in connection with the sale of an investment in Iowa Telecom preferred stock, and Taiwan Cellular Corporation share sales in the

**Table of Contents**

first quarter of 2004, partially offset by a gain on the sale of a small international wireless investment in first quarter of 2005.

nm Not meaningful

The increases in other income and expense, net in the second quarter of 2005 and for the six months ended June 30, 2005 compared to the similar periods in 2004 were primarily due to other, net income in the current periods compared to other, net expenses in the prior year periods and foreign exchange losses in the prior year periods. Other, net income in the second quarter of 2005 includes gains on investments and the six months ended June 30, 2005 includes leased asset gains. Other, net expenses for the six months ended June 30, 2004 were driven by costs of \$43 million recorded in connection with the early retirement of debt.

**Interest Expense**

nm Not meaningful

Interest expense in the second quarter of 2005 decreased \$54 million, or 9.1% and \$131 million, or 10.6% for the six months ended June 30, 2005 compared to the similar periods in 2004 as a result of lower average debt levels and increased capitalization of interest, partially offset by higher average interest rates.

**Minority Interest**

| (Dollars in Millions) | Three Months Ended June 30, |        |          | Six Months Ended June 30, |          |          |
|-----------------------|-----------------------------|--------|----------|---------------------------|----------|----------|
|                       | 2005                        | 2004   | % Change | 2005                      | 2004     | % Change |
| Minority interest     | \$ 717                      | \$ 676 | 6.1%     | \$ 1,330                  | \$ 1,153 | 15.4%    |

The increase in minority interest expense in the second quarter of 2005 and for the six months ended June 30, 2005 compared to the similar periods in 2004 is primarily due to the higher earnings at Domestic Wireless, which has a significant minority interest attributable to Vodafone Group Plc (Vodafone), partially offset by lower earnings at Telecomunicaciones de Puerto Rico, Inc. (TELPRI).

**Provision for Income Taxes**

| (Dollars in Millions)      | Three Months Ended June 30, |        |          | Six Months Ended June 30, |          |          |
|----------------------------|-----------------------------|--------|----------|---------------------------|----------|----------|
|                            | 2005                        | 2004   | % Change | 2005                      | 2004     | % Change |
| Provision for income taxes | \$ 982                      | \$ 859 | 14.3%    | \$ 1,761                  | \$ 1,264 | 39.3%    |
| Effective income tax rate  | 31.7%                       | 32.5%  |          | 31.3%                     | 29.9%    |          |

The effective income tax rate is the provision for income taxes as a percentage of income from continuing operations before the provision for income taxes. Our effective income tax rates in the second quarter of 2005 and for the six months ended June 30, 2005 were impacted by higher state income tax rates and lower foreign-related tax benefits, offset by tax benefits related to tax settlements. In addition, as a result of the capital gain realized in the second quarter of 2005 in connection with the sale of our Hawaii businesses, we recorded a tax benefit of \$242 million related to prior year investments losses, which was largely offset by a net tax provision of \$232 million related to the repatriation of foreign earnings under the provisions of the American Jobs Creation Act of 2004. Our effective income tax rates in the second quarter of 2004 and six months ended June 30, 2004 were favorably impacted by tax

**Table of Contents**

benefits related to deferred tax balance adjustments and expense credits that were not taxable. In addition, we recorded a tax benefit resulting from an Internal Revenue Service audit settlement in the six months ended June 30, 2004.

**Discontinued Operations**

Discontinued operations represent the results of operations of Verizon Information Services Canada, Inc. prior to its sale in the fourth quarter of 2004. In accordance with Statement of Financial Accounting Standards (SFAS) No. 144 Accounting for the Impairment or Disposal of Long-Lived Assets, we classified the results of operations of Verizon Information Services Canada as discontinued operations.

**Segment Results of Operations**

We have four reportable segments, which we operate and manage as strategic business units and organize by products and services. Our segments are Domestic Telecom, Domestic Wireless, Information Services and International. You can find additional information about our segments in Note 11 to the unaudited condensed consolidated financial statements.

We measure and evaluate our reportable segments based on segment income. This segment income excludes unallocated corporate expenses and other adjustments arising during each period. The other adjustments include transactions that the chief operating decision makers exclude in assessing business unit performance due primarily to their non-recurring and/or non-operational nature. Although such transactions are excluded from business segment results, they are included in reported consolidated earnings. We previously highlighted the more significant of these transactions in the Consolidated Results of Operations section. Gains and losses that are not individually significant are included in all segment results, since these items are included in the chief operating decision makers' assessment of unit performance. These gains and losses are primarily contained in Information Services and International since they actively manage investment portfolios.

**Domestic Telecom**

Domestic Telecom provides local telephone services, including voice and data transport, enhanced and custom calling features, network access, directory assistance, private lines and public telephones in 28 states and Washington, D.C. As discussed earlier under Consolidated Results of Operations, we recently sold wireline properties in Hawaii representing approximately 700,000 access lines or 1% of the total Domestic Telecom switched access lines in service. For comparability purposes, the results of operations shown in the tables below exclude the Hawaii properties that have been sold. This segment also provides long distance services, customer premises equipment distribution, data solutions and systems integration, billing and collections, Internet access services and inventory management services.

**Operating Revenues**

|                | <u>\$ 9,445</u> | <u>\$ 9,492</u> | (.5) | <u>\$ 18,812</u> | <u>\$ 18,973</u> | (.8) |

*Local Services*

Local service revenues are earned by our telephone operations from the provision of local exchange, local private line, wire maintenance, voice messaging and value-added services. Value-added services are a family of services that expand the utilization of the network, including products such as Caller ID, Call Waiting and Return Call. The provision of local exchange services not only includes retail revenues but also includes local wholesale revenues from unbundled network elements (UNEs), interconnection revenues from competitive local exchange carriers (CLECs) and wireless carriers, and some data transport revenues.

## Table of Contents

The decline in local service revenues of \$165 million, or 3.6% in the second quarter of 2005 and \$362 million, or 3.9% for the six months ended June 30, 2005 compared to the similar periods in 2004 was mainly due to lower demand and usage of our basic local exchange and accompanying services, as reflected by a 5.5% decline in switched access lines in service from June 30, 2004. This revenue decline was mainly driven by the effects of competition and technology substitution. Technology substitution affected local service revenue growth in the quarter and six month periods, as indicated by declining demand for residential access lines of 6.8% at June 30, 2005 compared to June 30, 2004, as more customers substituted wireless services for traditional landline services. At the same time, basic business access lines have declined 3.0% at June 30, 2005 compared to June 30, 2004, primarily reflecting competition and a shift to high-speed, high-volume special access lines.

In the first quarter of 2005, the FCC adopted significant new unbundling rules which eliminated the requirement to unbundle mass market local switching on a nationwide basis. See *Other Factors That May Affect Future Results* *FCC Regulation and Interstate Rates* for additional information on FCC rulemakings concerning UNEs. Due to a decision by two major competitors to deemphasize their local market initiatives, wholesale voice connections (commercial local wholesale arrangements, UNE platform and resale lines) declined 204,000 in the second quarter of 2005, and 404,000 for the six months ended June 30, 2005, to 6.2 million as of June 30, 2005, which reflected a 6.4% decrease compared to June 30, 2004.

We continue to seek opportunities to retain and win-back customers. Our Freedom service plans offer local services with various combinations of long distance, wireless and Internet access services in a discounted bundle available on one bill. Since 2003, we have introduced our Freedom service plans in nearly all of our key markets. As of June 30, 2005, approximately 60% of Verizon's residential customers have purchased local services in combination with either Verizon long distance or Verizon DSL, or both. For small businesses, we have also rolled out Verizon Freedom for Business in eleven markets, covering approximately 86% of business access lines.

### *Network Access Services*

Network access services revenues are earned from end-user customers and long distance and other competing carriers who use our local exchange facilities to provide usage services to their customers. Switched access revenues are derived from fixed and usage-based charges paid by carriers for access to our local network. Special access revenues originate from carriers and end-users that buy dedicated local exchange capacity to support their private networks. End-user access revenues are earned from our customers and from resellers who purchase dial-tone services. Further, network access revenues include our DSL services.

Network access services revenues increased by \$14 million, or 0.5% in the second quarter of 2005 and by \$19 million, or 0.3% for the six months ended June 30, 2005 compared to the similar periods in 2004. These increases were principally due to increased DSL and special access revenues offsetting the impact of decreasing switched MOUs and access lines, and mandated price reductions associated with federal and state price cap filings and other regulatory decisions. We added 657,000 new broadband connections in the six months ended June 30, 2005, including 278,000 in the second quarter, for a total of 4.1 million lines at June 30, 2005, representing a 43.7% increase from June 30, 2004. Customer demand for high capacity and digital data services grew 10.9% in the second quarter of 2005 and 11.2% for the six months ended June 30, 2005 compared to the similar periods in 2004. Special access revenue growth reflects continuing demand in the business market for high-capacity, high-speed digital services, partially offset by lessening demand for older, low-speed data products and services. Switched MOUs declined 6.9% in the second quarter of 2005 and 8.1% for the six months ended June 30, 2005 from the prior year periods, reflecting the impact of access line loss and wireless substitution.

The FCC regulates the rates that we charge long distance carriers and end-user customers for interstate access services. See *Other Factors That May Affect Future Results* *FCC Regulation and Interstate Rates* for additional information on FCC rulemakings concerning federal access rates, universal service and unbundling of network elements and broadband services.

*Long Distance Services*

Long distance service revenues include both intraLATA toll services and interLATA long distance voice and data services.

Long distance service revenues increased \$69 million, or 6.7% in the second quarter of 2005 and \$153 million, or 7.6% for the six months ended June 30, 2005 compared to the similar periods in 2004, principally as a result of customer growth from our interLATA long distance services. We added 223,000 long distance lines in the second

**Table of Contents**

quarter of 2005 and 597,000 long distance lines in the six months ended June 30, 2005, for a total of 18.0 million long distance lines nationwide, representing an 8.8% increase in long distance lines from June 30, 2004. The introduction of our Freedom service plans continues to stimulate growth in long distance services. As of June 30, 2005, approximately 50% of our local wireline residential customers have chosen Verizon as their long distance carrier.

*Other Services*

Our other services include such services as billing and collections for long distance carriers, public (coin) telephone and customer premises equipment and supply sales. Other services revenues also include services provided by our non-regulated subsidiaries such as data solutions and systems integration businesses.

Revenues from other services increased by \$35 million, or 4.0% in the second quarter, and \$29 million, or 1.7% for the six months ended June 30, 2005 compared to the similar periods in 2004. Revenue increases resulting from higher sales of voice and data customer premises equipment services exceeded declines associated with the sale of non-strategic businesses and reduced business volumes related to billing and collection services and public telephone services.

**Operating Expenses**

|   | <u>\$ 8,245</u>             | <u>\$ 8,116</u> | 1.6      | <u>\$ 16,358</u>          | <u>\$ 16,126</u> | 1.4      |

*Cost of Services and Sales*

Cost of services and sales includes the following costs directly attributable to a service or product: salaries and wages, benefits, materials and supplies, contracted services, network access and transport costs, customer provisioning costs, computer systems support and cost of products sold. Aggregate customer care costs, which include billing and service provisioning, are allocated between cost of services and sales and selling, general and administrative expense.

Cost of services and sales increased by \$251 million, or 7.0% in the second quarter of 2005 and \$427 million, or 5.9% for the six months ended June 30, 2005 compared to the similar periods in 2004. Both periods in 2005 were impacted by increased pension and other postretirement benefit costs. As of December 31, 2004, Verizon evaluated key employee benefit plan assumptions in response to conditions in the securities markets. The expected rate of return on pension plan assets has been maintained at 8.50%. However, the discount rate assumption has been lowered from 6.25% in 2004 to 5.75% in 2005, consistent with interest rate levels at the end of 2004. Further, there was an increase in the retiree

health care cost trend rates. The overall impact of these assumption changes, combined with the impact of lower than expected actual asset returns over the past few years, resulted in net pension and other postretirement benefit expense (primarily in cost of services and sales) of \$315 million in the second quarter of 2005 and \$619 million for the six months ended June 30, 2005, compared to net pension and postretirement benefit expense of \$224 million and \$442 million in the second quarter of 2004 and six months ended June 30, 2004, respectively. Also contributing to expense increases in cost of services and sales were higher costs associated with our growth businesses, including a 2,400, or 1.7% increase in the number of employees as of June 30, 2005 compared to June 30, 2004. Further, both the quarter and year-to-date comparisons were affected by a favorable adjustment to our interconnection expense in connection with the MCI settlement in the second quarter of 2004.

*Selling, General and Administrative Expense*

Selling, general and administrative expense includes salaries and wages and benefits not directly attributable to a service or product, bad debt charges, taxes other than income, advertising and sales commission costs, customer billing, call center and information technology costs, professional service fees and rent for administrative space.

Selling, general and administrative expense decreased by \$111 million, or 4.8% in the second quarter of 2005 and \$143 million, or 3.2% for the six months ended June 30, 2005 compared to the similar periods in 2004. These decreases included lower non-income taxes principally related to gross receipts and property, and reduced bad debt costs, partially offset by a gain on the sale of a small business unit during the six months ended June 30, 2004.

**Table of Contents***Depreciation and Amortization Expense*

The decrease in depreciation and amortization expense of \$11 million, or 0.5% in the second quarter of 2005 and \$52 million, or 1.2% for the six months ended June 30, 2005 compared to the similar periods in 2004, was mainly driven by lower rates of depreciation.

**Segment Income**

| (Dollars in Millions) | Three Months Ended June 30, |        |          | Six Months Ended June 30, |          |          |
|-----------------------|-----------------------------|--------|----------|---------------------------|----------|----------|
|                       | 2005                        | 2004   | % Change | 2005                      | 2004     | % Change |
| Segment Income        | \$ 459                      | \$ 636 | (27.8)%  | \$ 963                    | \$ 1,326 | (27.4)%  |

Segment income decreased by \$177 million, or 27.8% in the second quarter of 2005 and by \$363 million, or 27.4% for the six months ended June 30, 2005 compared to the similar periods in 2004, primarily as a result of the after-tax impact of operating revenues and operating expenses described above and favorable deferred tax balance adjustments in the prior year periods.

Special and non-recurring items in all periods include the results of operations of the Hawaii wireline operations sold in the second quarter of 2005 (See Consolidated Results of Operations ). Special and non-recurring items not included in Domestic Telecom s segment income totaled \$(199) million and \$(57) million in the second quarter of 2005 and 2004, respectively. Special and non-recurring items in the second quarter of 2005 included Hawaii results of operations and a gain of \$191 million on the sale of the Hawaii wireline operations. Special and non-recurring items in the second quarter of 2004 included Hawaii results of operations and an expense credit resulting from the favorable resolution of pre-bankruptcy amounts due from MCI, partially offset by operating asset losses pertaining to our international long distance and data network, pension settlement losses and costs associated with the early retirement of debt. Special and non-recurring items during the six months ended June 30, 2005 of \$(223) million related to the Hawaii results of operations and gain on sale. Special and non-recurring items totaling \$354 million for the six months ended June 30, 2004 included additional pension settlement losses and early retirement of debt costs as well as a gain on the sale of an investment and Hawaii results of operations.

**Domestic Wireless**

Our Domestic Wireless segment provides wireless voice and data services and equipment sales across the United States. This segment primarily represents the operations of the Verizon Wireless joint venture.

**Operating Revenues**

Three Months Ended June 30,

Six Months Ended June 30,

## Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

| (Dollars in Millions)       | 2005     | 2004     | % Change | 2005      | 2004      | % Change |
|-----------------------------|----------|----------|----------|-----------|-----------|----------|
| Wireless sales and services | \$ 7,846 | \$ 6,847 | 14.6%    | \$ 15,264 | \$ 13,009 | 17.3%    |

Revenues earned from our consolidated wireless segment grew by \$999 million, or 14.6% in the second quarter of 2005 and \$2,255 million, or 17.3% for the six months ended June 30, 2005 compared to the similar periods in 2004. Service revenue of \$6,874 million in the second quarter of 2005 was \$831 million, or 13.8% higher than the similar period in 2004, and service revenue of \$13,431 million for the six months ended June 30, 2005 was \$1,887 million, or 16.3% higher than the similar period in 2004. The service revenue increases were primarily due to a 17.1% increase in customers as of June 30, 2005 compared to June 30, 2004, partially offset by decreases in ARPU. Equipment and other revenue increased \$168 million, or 20.9% in the second quarter of 2005 and \$368 million, or 25.1% for the six months ended June 30, 2005 compared to the similar periods in 2004 principally as a result of increases in wireless devices sold.

We ended the second quarter of 2005 with approximately 47.4 million customers, compared to 40.4 million customers at the end of the second quarter of 2004. More than 1.9 million net customers were added during the second quarter of 2005 compared to 1.5 million during the second quarter of 2004. We added 3.6 million net customers during the six months ended June 30, 2005 compared to 2.9 million during the similar period in 2004. Retail net additions accounted for more than 99% of the total net additions. The overall composition of our customer base as of June 30, 2005 was 93% retail postpaid, 3% retail prepaid and 4% resellers. As of June 30, 2005, approximately 46.3 million, or 98% of our customers subscribe to digital service compared to 95% at June 30, 2004. In addition, our average monthly churn rate, the rate at which customers disconnect service, decreased to 1.2% in the second quarter of 2005 and decreased to 1.3% for the six months ended June 30, 2005 compared to 1.4% in the second quarter of 2004 and 1.5% for the six months ended June 30, 2004. Retail postpaid churn decreased to 1.0% in

**Table of Contents**

the second quarter of 2005 and decreased to 1.1% for the six months ended June 30, 2005 compared to 1.2% in the second quarter of 2004 and 1.3% for the six months ended June 30, 2004.

ARPU decreased 2.7% to \$49.42 in the second quarter of 2005 and by 0.4% to \$49.23 for the six months ended June 30, 2005 compared to the similar periods in 2004, primarily due to pricing changes to our America's Choice and Family Share plans earlier this year. Partially offsetting these decreases was a 62% increase in data revenue per customer in the second quarter of 2005 and a 69% increase for the six months ended June 30, 2005 compared to the similar periods in 2004, driven by increased use of our messaging and other data services. Data revenues of \$483 million, or 7% of service revenues in the second quarter of 2005 increased by \$228 million, or 89% compared to the similar period in 2004. Data revenues of \$898 million, or 6.7% of service revenues for the six months ended June 30, 2005 increased \$444 million, or 98% compared to the similar period in 2004. Data revenue represented 4.2% and 3.9% of service revenues in the second quarter of 2004 and for the six months ended June 30, 2004, respectively.

The increases in equipment revenue were attributed to an increase in wireless devices sold in the second quarter of 2005 and the six months ended June 30, 2005 compared to the similar periods in 2004. The increases in units sold were driven by an increase in gross retail customer additions as well as equipment upgrades in the second quarter of 2005 and the six months ended June 30, 2005, compared to the similar periods in 2004.

|   | <u>\$ 6,064</u>             | <u>\$ 5,232</u> | 15.9     | <u>\$ 11,942</u>          | <u>\$ 10,192</u> | 17.2     |

*Cost of Services and Sales*

Cost of services and sales, which are costs to operate the wireless network as well as the cost of roaming, long distance and equipment sales, grew by \$428 million, or 23.1% for the second quarter of 2005 and \$868 million, or 24.7% for the six months ended June 30, 2005 compared to the similar periods in 2004. These increases were primarily due to higher wireless network costs in the current year periods caused by increased MOUs on the wireless network, partially offset by lower roaming, local interconnection and long distance rates. Cost of equipment sales grew by 29.6% in the second quarter of 2005 and 31.6% for the six months ended June 30, 2005 compared to the similar periods in 2004. The increases were primarily attributed to an increase in wireless devices sold, driven by higher gross retail activations and equipment upgrades for the second quarter of 2005 and the six months ended June 30, 2005, compared to the similar periods in 2004.

*Selling, General and Administrative Expense*

## Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

Selling, general and administrative expenses grew by \$332 million, or 14.6% in the second quarter of 2005 and \$715 million, or 15.8% for the six months ended June 30, 2005 compared to the similar periods in 2004. These increases were primarily due to an increase in salary and benefits expense of \$97 million for the second quarter of 2005 and \$259 million for the six months ended June 30, 2005, compared to the similar periods in 2004. The salary and benefits expense increase was the result of higher per employee salary and benefit costs and an increase in employees, primarily in the sales and customer care areas. The increase in the per employee salary and benefits cost was principally driven by an increase in costs in the first six months of 2005 of approximately \$120 million related to our long term incentive program. Also contributing to the increases was a \$88 million aggregate increase in sales commissions in our direct and indirect channels for the second quarter of 2005 and a \$131 million increase for the six months ended June 30, 2005, compared to the similar periods in 2004, primarily related to the increase in gross customer additions and customer renewals in the current year periods. Advertising and promotion expenses increased by \$57 million in the second quarter of 2005 and \$154 million for the six months ended June 30, 2005, compared to the similar periods in 2004.

### *Depreciation and Amortization Expense*

Depreciation and amortization increased by \$72 million, or 6.5% in the second quarter of 2005 and \$167 million, or 7.7% for the six months ended June 30, 2005 compared to the similar periods in 2004. These increases were primarily due to increased depreciation expense related to the increase in depreciable assets.

**Table of Contents****Segment Income**

| (Dollars in Millions) | Three Months Ended June 30, |        |          | Six Months Ended June 30, |        |          |
|-----------------------|-----------------------------|--------|----------|---------------------------|--------|----------|
|                       | 2005                        | 2004   | % Change | 2005                      | 2004   | % Change |
| Segment Income        | \$ 517                      | \$ 453 | 14.1%    | \$ 950                    | \$ 771 | 23.2%    |

Segment income increased by \$64 million, or 14.1% in the second quarter of 2005 and by \$179 million, or 23.2% for the six months ended June 30, 2005 compared to the similar periods in 2004 primarily as a result of the after-tax impact of operating revenues and operating expenses described above, partially offset by an increase in minority interest. Increases in minority interest were principally due to the increased earnings of the Domestic Wireless segment, which has a significant minority interest attributable to Vodafone.

**Information Services**

Information Services multi-platform business comprises print yellow pages directories, SuperPages.com, our online directory and search services, and SuperPages On the Go, our directory and information services on wireless telephones.

In connection with the sale of Verizon's wireline properties in Hawaii discussed earlier under Consolidated Results of Operations, we recently sold our directory operations in Hawaii. For comparability purposes, the results of operations shown in the tables below exclude the Hawaii operations that have been sold. In 2004, Verizon sold Verizon Information Services Canada, its directory operations in Canada, to an affiliate of Bain Capital, a private investment firm, for \$1.6 billion. Prior years' results of operations for this business unit are classified as discontinued operations in accordance with SFAS No. 144, and are excluded from Information Services segment results.

**Operating Revenues**

| (Dollars in Millions) | Three Months Ended June 30, |        |          | Six Months Ended June 30, |          |          |
|-----------------------|-----------------------------|--------|----------|---------------------------|----------|----------|
|                       | 2005                        | 2004   | % Change | 2005                      | 2004     | % Change |
| Operating Revenues    | \$ 870                      | \$ 889 | (2.1)%   | \$ 1,751                  | \$ 1,792 | (2.3)%   |

Operating revenues decreased \$19 million, or 2.1% in the second quarter of 2005, and \$41 million, or 2.3% for the six months ended June 30, 2005 compared to the similar periods in 2004. These decreases were primarily due to reduced domestic print advertising revenue. SuperPages.com continues to achieve strong growth as demonstrated by an increase in revenue of 28.6% in the second quarter of 2005 and 26.9% for the six months ended June 30, 2005.

**Operating Expenses**

| Selling, general and administrative expense | 293           | 341           | (14.1) | 574           | 659           | (12.9) |
| Depreciation and amortization expense       | 23            | 21            | 9.5    | 46            | 42            | 9.5    |
|   | <u>\$ 464</u> | <u>\$ 497</u> | (6.6)  | <u>\$ 923</u> | <u>\$ 969</u> | (4.7)  |

Cost of services and sales increased \$13 million, or 9.6% in the second quarter of 2005 and \$35 million, or 13.1% for the six months ended June 30, 2005 compared to the similar periods in 2004. These increases were primarily due to higher printing and distribution costs and higher costs associated with SuperPages.com. Selling, general and administrative expenses decreased \$48 million, or 14.1% in the second quarter of 2005 and \$85 million, or 12.9% for the six months ended June 30, 2005 compared to the similar periods in 2004. These decreases were primarily due to cost reductions and reduced bad debt, partially offset by higher costs associated with pension and benefits.

**Segment Income**

| (Dollars in Millions) | Three Months Ended June 30, |        |          | Six Months Ended June 30, |        |          |
|-----------------------|-----------------------------|--------|----------|---------------------------|--------|----------|
|                       | 2005                        | 2004   | % Change | 2005                      | 2004   | % Change |
| Segment Income        | \$ 255                      | \$ 236 | 8.1%     | \$ 519                    | \$ 499 | 4.0%     |

Segment income increased \$19 million, or 8.1% in the second quarter of 2005 and \$20 million, or 4.0% for the six months ended June 30, 2005 compared to the similar periods in 2004. These increases are primarily the result of the after-tax impact of operating revenues and operating expenses described above and lower interest expense.

**Table of Contents**

Special and non-recurring items in all periods include the results of operations of the Hawaii directory operations sold in the second quarter of 2005 and the results of operations of Verizon Information Services Canada (See Consolidated Results of Operations ). Special and non-recurring items not included in Information Services segment income were \$(2) million and \$(22) million in the second quarter of 2005 and 2004, respectively. Special and non-recurring items not included in Information Services segment income were \$(10) million and \$(38) million for the six months ended June 30, 2005 and 2004, respectively. The special and non-recurring items in the six months ended June 30, 2004 also include pension settlement losses for employees that received lump-sum distributions during the first quarter of 2004 under a voluntary separation plan.

**International**

Our International segment includes investments in international wireline and wireless telecommunication operations primarily in the Americas and Europe. Our consolidated international investments as of June 30, 2005 included Verizon Dominicana, C. por A. (Verizon Dominicana) in the Dominican Republic, TELPRI in Puerto Rico, and Micronesian Telecommunications Corporation in the Northern Mariana Islands. Either the cost or the equity method is applied to those investments in which we have less than a controlling interest.

**Operating Revenues**

| (Dollars in Millions) | Three Months Ended June 30, |        |          | Six Months Ended June 30, |        |          |
|-----------------------|-----------------------------|--------|----------|---------------------------|--------|----------|
|                       | 2005                        | 2004   | % Change | 2005                      | 2004   | % Change |
| Operating Revenues    | \$ 537                      | \$ 506 | 6.1%     | \$ 1,054                  | \$ 974 | 8.2%     |

Revenues generated by our international businesses increased by \$31 million, or 6.1% in the second quarter of 2005 and \$80 million, or 8.2% for the six months ended June 30, 2005 compared to the similar periods in 2004. These increases are primarily due to the appreciation of the Dominican Republic peso and operational growth at Verizon Dominicana, partially offset by a favorable adjustment to carrier access revenues at TELPRI in the second quarter of 2004.

**Operating Expenses**

| (Dollars in Millions)                       | Three Months Ended June 30, |               |          | Six Months Ended June 30, |               |          |
|---|-----------------------------|---------------|----------|---------------------------|---------------|----------|
|   | 2005                        | 2004          | % Change | 2005                      | 2004          | % Change |
| Cost of services and sales                  | \$ 186                      | \$ 156        | 19.2%    | \$ 363                    | \$ 303        | 19.8%    |
| Selling, general and administrative expense | 161                         | 87            | 85.1     | 318                       | 215           | 47.9     |
| Depreciation and amortization expense       | 86                          | 80            | 7.5      | 170                       | 157           | 8.3      |
|   | <u>\$ 433</u>               | <u>\$ 323</u> | 34.1     | <u>\$ 851</u>             | <u>\$ 675</u> | 26.1     |

*Cost of Services and Sales*

## Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

Cost of services and sales increased \$30 million, or 19.2% in the second quarter of 2005 and \$60 million, or 19.8% for the six months ended June 30, 2005 compared to the similar periods in 2004. These increases primarily reflect higher variable costs at TELPRI and Verizon Dominicana as well as the appreciation of the Dominican Republic peso.

### *Selling, General and Administrative Expense*

Selling, general and administrative expenses increased \$74 million, or 85.1% in the second quarter of 2005 and \$103 million, or 47.9% for the six months ended June 30, 2005 compared to the similar periods in 2004. These increases reflect the favorable resolution in the second quarter of 2004 of a 2003 TELPRI charge recorded as a result of an adverse Puerto Rico Circuit Court of Appeals ruling on intra-island long distance access rates and the appreciation of the Dominican Republic peso.

### *Depreciation and Amortization Expense*

Depreciation and amortization expense increased \$6 million, or 7.5% in the second quarter of 2005 and \$13 million, or 8.3% for the six months ended June 30, 2005 compared to the similar periods in 2004. These increases primarily reflect the appreciation of the Dominican Republic peso.

**Table of Contents****Segment Income**

| (Dollars in Millions) | Three Months Ended June 30, |        |          | Six Months Ended June 30, |        |          |
|-----------------------|-----------------------------|--------|----------|---------------------------|--------|----------|
|                       | 2005                        | 2004   | % Change | 2005                      | 2004   | % Change |
| Segment Income        | \$ 271                      | \$ 287 | (5.6)%   | \$ 622                    | \$ 568 | 9.5%     |

Segment income decreased \$16 million, or 5.6% in the second quarter of 2005 and increased \$54 million, or 9.5% for the six months ended June 30, 2005 compared to the similar periods in 2004. The decrease in the second quarter of 2005 reflects Verizon's share (after minority interest) of the after-tax impact of operating revenues and operating expenses previously described and the decrease in equity in earnings of unconsolidated businesses, partially offset by lower income taxes and an increase in interest income and foreign exchange gains. The increase for the six months ended June 30, 2005 reflects an increase in income from other unconsolidated businesses, lower income taxes and an increase in interest income and foreign exchange gains, partially offset by Verizon's share (after minority interest) of the after-tax impact of operating revenues and operating expenses previously described as well as lower equity in earnings of unconsolidated businesses.

Equity in earnings of unconsolidated businesses decreased \$41 million, or 16.5% in the second quarter of 2005 and \$55 million, or 11.3% for the six months ended June 30, 2005 compared to similar periods in 2004. These decreases reflect lower equity income due to the sale of our equity investment in TELUS in 2004.

Income from other unconsolidated businesses increased \$27 million, or 93.1% for the six months ended June 30, 2005 compared to the similar period in 2004. The increase reflects higher gains realized in the six months ending June 30, 2005 from the sale of investments compared to the similar period in 2004.

Special and non-recurring items not included in International's segment income totaled \$(10) million for the second quarter of 2005 and six months ended June 30, 2005 related to tax benefits realized in connection with prior years' investment losses of \$(242) million, largely offset by a net tax provision of \$232 million on the repatriation of foreign earnings. Special and non-recurring item not included in International's segment income totaled \$1 million for the six months ended June 30, 2004 related to pension settlement losses for employees that received lump-sum distributions during the first quarter of 2004 under a voluntary separation plan.

**Special Items****Sales of Businesses and Investment, Net****Sales of Businesses, Net**

During the second quarter of 2005, we sold our wireline and directory businesses in Hawaii, including Verizon Hawaii Inc. which operates approximately 700,000 switched access lines, as well as the services and assets of Verizon Long Distance, Verizon Online, Verizon Information Services and Verizon Select Services Inc. in Hawaii, to an affiliate of The Carlyle Group for \$1,326 million in cash proceeds. In connection with this sale, we recorded a pretax gain of \$530 million (\$336 million after-tax, or \$.12 per diluted share).

**Sale of Investment**

During the first quarter of 2004, we sold all of our investment in Iowa Telecom preferred stock, which resulted in a pretax gain of \$43 million (\$43 million after-tax, or \$.02 per diluted share) included in Income From Other Unconsolidated Businesses in the unaudited condensed consolidated statements of income.

**Tax Matters**

As a result of the capital gain realized in the second quarter of 2005 in connection with the sale of our Hawaii businesses, we recorded a tax benefit of \$242 million (\$.09 per diluted share) related to prior year investment losses. The investment losses pertain to Grupo Iusacell, S.A. de C.V., CTI Holdings, S.A. and TelecomAsia.

Also during the second quarter of 2005, we recorded a net tax provision of \$232 million (\$.08 per diluted share) related to the repatriation of foreign earnings under the provisions of the American Jobs Creation Act of 2004, which provides for a favorable federal income tax rate in connection with the repatriation of foreign earnings, provided the criteria described in the law is met. Two of Verizon's foreign investments repatriated earnings resulting in income taxes of \$355 million, partially offset by a tax benefit of \$123 million.

**Table of Contents****Severance, Pension and Benefit Charges**

During the second quarter of 2004, we recorded pretax pension settlement losses of \$31 million (\$19 million after-tax, or \$.01 per diluted share). In addition, during the first quarter of 2004, we recorded pretax pension settlement losses of \$728 million (\$446 million after-tax, or \$.16 per diluted share). These settlement losses related to employees that received lump-sum distributions in connection with the 2003 voluntary separation plan under which more than 21,000 employees accepted the separation offer in the fourth quarter of 2003. These charges were recorded in accordance with SFAS No. 88, Employers Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits which requires that settlement losses be recorded once prescribed payment thresholds have been reached.

**Other Special Items**

In the second quarter of 2004, we recorded an expense credit of \$204 million (\$123 million after-tax, or \$.04 per diluted share) resulting from the favorable resolution of pre-bankruptcy amounts due from MCI. Previously reached settlement agreements became fully effective when MCI emerged from bankruptcy proceedings in the second quarter of 2004.

Also during the second quarter of 2004, we recorded a charge of \$113 million (\$87 million after-tax, or \$.03 per diluted share) related to operating asset losses pertaining to our international long distance and data network. In addition, we recorded pretax charges of \$12 million (\$7 million after-tax, or less than \$.01 per diluted share) during the second quarter of 2004 in connection with the early retirement of debt. During the first quarter of 2004, we also recorded pretax charges of \$43 million (\$27 million after-tax, or \$.01 per diluted share) resulting from the early retirement of debt.

**Consolidated Financial Condition**

| (Dollars in Millions)                        | Six Months Ended June 30, |                |                 |

| <b>Decrease in Cash and Cash Equivalents</b> | <b>\$ (885)</b>           | <b>\$ (86)</b> | <b>\$ (799)</b> |

We use the net cash generated from our operations to fund network expansion and modernization, repay external financing, pay dividends and invest in new businesses. Additional external financing is utilized when necessary. While our current liabilities typically exceed current assets, our sources of funds, primarily from operations and, to the extent necessary, from readily available external financing arrangements, are sufficient to meet ongoing operating and investing requirements. We expect that capital spending requirements will continue to be financed primarily through internally generated funds. Additional debt or equity financing may be needed to fund additional development activities or to maintain our capital structure to ensure our financial flexibility.

**Cash Flows Provided By Operating Activities**

## Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

Our primary source of funds continues to be cash generated from operations. Our cash from operating activities for the six months ended June 30, 2005 increased slightly compared to the similar period of 2004. During the six months ended June 30, 2005, we made significant cash payments related to higher pension fund contributions, minority interest dividends paid and income taxes, including taxes paid in the first quarter of 2005 related to fourth quarter 2004 sales of Verizon Information Services Canada and TELUS shares, partially offset by significant repatriations of foreign earnings of unconsolidated businesses. The six months ended June 30, 2004 includes significant severance payments in the first quarter of 2004 related to the 2003 voluntary separation plan.

### **Cash Flows Used In Investing Activities**

Capital expenditures continue to be our primary use of capital resources and facilitate the introduction of new products and services, enhance responsiveness to competitive challenges and increase the operating efficiency and productivity of our networks. Total capital expenditures, including capitalized software, were \$7,655 million for the six months ended June 30, 2005 compared to \$5,824 million for the six months ended June 30, 2004. We invested

## **Table of Contents**

\$4,044 million in our Domestic Telecom business during the six months ended June 30, 2005 compared to \$2,942 million in the similar period in 2004. We also invested \$3,339 million in our Domestic Wireless business during the six months ended June 30, 2005 compared to \$2,747 million in the similar period in 2004. The increase in capital spending of both Domestic Telecom and Domestic Wireless represents our continuing effort to invest in high growth areas including wireless, long distance, DSL and other wireline data initiatives.

Capital spending, including capitalized software, is expected to increase by 15% in 2005.

We invested \$4,438 million in acquisitions and investments in businesses during the six months ended June 30, 2005, including \$3,003 million to acquire NextWave's personal communications services licenses, \$677 million primarily to acquire 63 broadband wireless licenses in connection with FCC auction 58, \$418 million to purchase Qwest Wireless, LLC's spectrum licenses and wireless network assets in several existing and new markets, \$230 million to purchase spectrum from MetroPCS, Inc. and \$49 million for other wireless properties. During the six months ended June 30, 2004, we invested \$55 million in acquisitions and investments in businesses primarily related to Verizon's limited partnership investments in entities that invest in affordable housing projects. During the six months ended June 30, 2005, we received cash proceeds of \$1,326 million in connection with the sale of Verizon's wireline and directory operations in Hawaii. During the six months ended June 30, 2004, we received cash proceeds of \$117 million from the sale of a small business unit.

Other, net investing activities during the six months ended June 30, 2005 includes \$1,121 million for the purchase of 43.4 million shares of MCI stock from eight entities affiliated with Carlos Slim Helu, partially offset by cash proceeds of \$276 million from leasing activities and \$102 million from the sale of a small international investment. Other, net investing activities for the six months ended June 30, 2004 includes net cash proceeds received in connection with the sale of investments, including Iowa Telecom preferred stock.

Under the terms of an investment agreement, Vodafone may require Verizon Wireless to purchase up to an aggregate of \$20 billion worth of Vodafone's interest in Verizon Wireless at designated times at its then fair market value. In the event Vodafone exercises its put rights, we have the right, exercisable at our sole discretion, to purchase up to \$12.5 billion of Vodafone's interest instead of Verizon Wireless for cash or Verizon stock at our option. Vodafone had the right to require the purchase of up to \$10 billion during a 61-day period opening on June 10 and closing on August 9 in 2004, and did not exercise that right. As a result, Vodafone still has the right to require the purchase of up to \$20 billion worth of its interest, not to exceed \$10 billion in any one year, during a 61-day period opening on June 10 and closing on August 9 in 2005 through 2007. Vodafone also may require that Verizon Wireless pay for up to \$7.5 billion of the required repurchase through the assumption or incurrence of debt.

## **Cash Flows Used In Financing Activities**

The net cash proceeds of \$2,435 million from the increase in our total debt during the six months ended June 30, 2005 was primarily due to an increase in our short-term borrowings of \$4,374 million, partially offset by repayments of long-term debt at Verizon Wireless and Domestic Telecom of \$1,533 million and \$379 million, respectively.

Cash of \$3,011 million was used to reduce our total debt during the six months ended June 30, 2004. We repaid \$2,259 million and \$2,459 million of Domestic Telecom and corporate long-term debt, respectively. The Domestic Telecom debt repayment included the early retirement of \$1,275 million of long-term debt. The corporate debt repayment included \$1,984 million of zero-coupon convertible notes redeemed by Verizon Global Funding Corp. Also during the six months ended June 30, 2004 we increased our short-term borrowings by \$1,254 million and Verizon Global Funding issued \$500 million of long-term debt.

## Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

Our ratio of debt to debt combined with shareowners' equity was 52.0% at June 30, 2005 compared to 55.1% at June 30, 2004.

As of June 30, 2005, we had \$93 million in bank borrowings outstanding. In addition, we had approximately \$6.8 billion of unused bank lines of credit and our financing subsidiary had shelf registrations for the issuance of up to \$10.5 billion of unsecured debt securities. The debt securities of our telephone and financing subsidiaries continue to be accorded high ratings by primary rating agencies. In September 2004, Standard & Poor's affirmed the long term debt rating of Verizon and related entities, including Verizon Wireless at A+, and changed our credit rating outlook to negative from stable. The short-term debt rating of Verizon Network Funding Corp. was lowered to A-1 from A-1+. In December 2004, Moody's Investors Service (Moody's) affirmed the A2 rating of Verizon Global Funding and the P-1 short-term rating of Verizon Network Funding. In February 2005, both Standard & Poor's and Moody's indicated that the proposed acquisition of MCI (see Other Factors That May Affect Future Results - Recent

---

## **Table of Contents**

Developments ) may result in downgrades in Verizon's debt ratings. Moody's placed the long- and short-term debt of Verizon and its telephone subsidiaries on review for possible downgrade, while simultaneously changing the outlook on the A3-rated Verizon Wireless debt to stable from positive. Standard & Poor's placed the long-term debt of Verizon and affiliates (including Verizon Wireless) on credit watch with negative implications. Fitch Ratings also placed the A+ rating of Verizon, along with the ratings of its affiliates, on ratings watch negative as a result of the proposed acquisition of MCI.

Verizon and its consolidated subsidiaries are in compliance with all of their debt covenants.

As in prior quarters, dividend payments were a significant use of capital resources. We determine the appropriateness of the level of our dividend payments on a periodic basis by considering such factors as long-term growth opportunities, internal cash requirements and the expectations of our shareowners. In the first quarter of 2005, Verizon increased its dividend by \$.02 per share, or 5.2% to \$.405 per share compared to \$.385 per share declared in the first quarter of 2004. In the second quarter of 2005, we announced quarterly cash dividends of \$.405 per share, compared to \$.385 per share declared in the second quarter of 2004.

### **Decrease in Cash and Cash Equivalents**

Our cash and cash equivalents at June 30, 2005 totaled \$1,405 million, an \$885 million decrease from cash and cash equivalents at December 31, 2004 of \$2,290 million. The decrease in cash and cash equivalents was primarily driven by increased capital spending and higher acquisitions and investments, partially offset by higher short-term borrowings.

## **Market Risk**

We are exposed to various types of market risk in the normal course of our business, including the impact of interest rate changes, foreign currency exchange rate fluctuations, changes in equity investment prices and changes in corporate tax rates. We employ risk management strategies using a variety of derivatives, including interest rate swap agreements, interest rate locks, foreign currency forwards and collars and equity options. We do not hold derivatives for trading purposes.

It is our general policy to enter into interest rate, foreign currency and other derivative transactions only to the extent necessary to achieve our desired objectives in limiting our exposures to the various market risks. Our objectives include maintaining a mix of fixed and variable rate debt to lower borrowing costs within reasonable risk parameters and to protect against earnings and cash flow volatility resulting from changes in market conditions. We do not hedge our market risk exposure in a manner that would completely eliminate the effect of changes in interest rates, equity prices and foreign exchange rates on our earnings. We do not expect that our net income, liquidity and cash flows will be materially affected by these risk management strategies.

### **Foreign Currency Translation**

The functional currency for our foreign operations is the local currency. At June 30, 2005, our primary translation exposure was to the Venezuelan bolivar, Dominican Republic peso and the euro. The translation of income statement and balance sheet amounts of our foreign operations into U.S. dollars are recorded as cumulative translation adjustments, which are included in Accumulated Other Comprehensive Loss in our unaudited condensed consolidated balance sheets. We also periodically hold cash balances in foreign currencies, and at June 30, 2005, we held 450 million euros. As of August 4, 2005, we held 330 million euros. The translation of foreign currency cash balances is recorded in the

## Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

condensed consolidated statements of income in Other Income and (Expense), Net. During the second quarter of 2005, the translation of these cash balances were not material. During the second quarter of 2005, we entered into a zero cost euro collar to hedge a portion of our net investment in Vodafone Omnitel N.V. In accordance with the provisions of SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities and related amendments and interpretations, changes in the fair value of this contract due to exchange rate fluctuations are recognized in Accumulated Other Comprehensive Loss and offset the impact of foreign currency changes on the value of our net investment in the operation being hedged. We have not hedged our accounting translation exposure to foreign currency fluctuations relative to the carrying value of our other investments. The table that follows summarizes the fair values of cash balances in euros and the zero cost euro collar as of June 30, 2005 and provides a sensitivity analysis of their estimated fair values assuming a 10% decrease and increase in the value of the U.S. dollar against the euro.

**Table of Contents**

| At June 30, 2005                                  | Fair Value | (dollars in millions)                         |   |
|---|------------|---|---|
|   |            | Fair Value assuming 10% decrease in US\$/euro | Fair Value assuming 10% increase in US\$/euro |
| Foreign currency and foreign currency derivatives | \$ 549     | \$ 530  | \$ 576  |

Our earnings were affected by foreign currency gains or losses associated with the U. S. dollar denominated assets and liabilities at Verizon Dominicana.

**Equity Risk**

On May 17, 2005, we purchased 43.4 million shares of MCI common stock under a stock purchase agreement that contained a provision for the payment of an additional cash amount determined immediately prior to April 9, 2006 based on the market price of Verizon's common stock (see Other Factors That May Affect Future Results Recent Developments MCI Acquisition ). Under SFAS No. 133, this additional cash payment is an embedded derivative which we carry at fair value and is subject to changes in the market price of Verizon stock. Since this derivative does not qualify for hedge accounting under SFAS No. 133, changes in its fair value are recorded in the condensed consolidated statements of income in Other Income and (Expense), Net. During the second quarter of 2005, we recorded pretax income of \$20 million in connection with this embedded derivative. The table that follows summarizes the fair values of our MCI shares and the embedded derivative as of June 30, 2005 and provides a sensitivity analysis of the estimated fair values of these financial instruments assuming a 10% increase or decrease in equity prices.

| At June 30, 2005  | Fair Value | (dollars in millions)                            |  |
|---|------------|--|--|
|   |            | Fair Value assuming 10% decrease in equity price | Fair Value assuming 10% increase in equity price |
| Equity price sensitive cost investments,<br>at fair value and derivatives | \$ 1,080   | \$ 998   | \$ 1,134   |

**Other Factors That May Affect Future Results****Recent Developments****MCI Acquisition**

On February 14, 2005, Verizon announced that it had agreed to acquire MCI for a combination of Verizon common shares and cash (including MCI dividends). On May 2, 2005, Verizon announced that it agreed with MCI to further amend its agreement to acquire MCI for cash and stock of at least \$26.00 per share, consisting of cash of \$5.60, which is expected to be paid as a special dividend by MCI soon after the approval of the transaction by MCI shareholders, plus the greater of .5743 Verizon shares for each MCI common share or a sufficient number of Verizon shares to deliver to shareholders \$20.40 of value. Under this price protection feature, Verizon may elect to pay additional cash instead of issuing

## Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

additional shares over the .5743 exchange ratio. This consideration is subject to adjustment at closing and may be decreased based on MCI's bankruptcy claims-related experience and international tax liabilities. The MCI board of directors has unanimously agreed to recommend approval of the amended agreement to its shareholders. In addition to MCI shareholder approval, the acquisition requires regulatory approvals, which the companies are targeting to obtain by year-end 2005.

Separately, on April 9, 2005, Verizon entered into a stock purchase agreement with eight entities affiliated with Carlos Slim Helu to purchase 43.4 million shares of MCI common stock for \$25.72 per share in cash plus an additional cash amount of 3% per annum from April 9, 2005 until the closing of the purchase of those shares. The transaction closed on May 17, 2005 and the additional cash payment was made through May 13, 2005. The total cash payment was \$1,121 million. Under the stock purchase agreement, Verizon will pay the Slim entities an adjustment at the end of one year in an amount per MCI share calculated by multiplying (i) 0.7241 by (ii) the amount, if any, by which the price of Verizon's common stock exceeds \$35.52 per share (measured over a 20-day period), subject to a maximum excess amount per Verizon share of \$26.98. After the closing of the stock purchase agreement, Verizon

## **Table of Contents**

transferred the shares of MCI common stock it had purchased to a trust established pursuant to an agreement between Verizon and the Department of Justice.

### **Spectrum Purchases**

On February 24, 2005, we signed an agreement with MetroPCS to purchase 10 MHz of personal communications services spectrum covering the San Francisco area for a purchase price of \$230 million. The transaction closed on May 11, 2005.

On February 15, 2005, the FCC's auction of broadband personal communications services licenses ended and Verizon Wireless and Vista PCS, LLC were the highest bidders for 63 licenses totaling approximately \$697 million. On May 13, 2005, the licenses won by Verizon Wireless were granted by the FCC. The licenses won by Vista PCS are not expected to be granted until the third quarter of 2005.

### **Sales of Businesses and Investments**

#### *Telephone Access Lines*

From time to time, Verizon considers plans for a reduction in the size of our access line business, including through a spin-off mechanism or otherwise, so that we may pursue our strategy of placing greater focus on the higher growth businesses of broadband and wireless. Consideration of these plans have been delayed until the outcome of the MCI acquisition process has been resolved.

During the second quarter of 2004, we entered into an agreement to sell our wireline-related businesses in Hawaii, which operates approximately 700,000 switched access lines, for \$1,650 million in cash, less debt, to an entity controlled by The Carlyle Group. In connection with obtaining approval of the Hawaii Public Utilities Commission, The Carlyle Group agreed to contribute additional equity to facilitate the acquisition of the Hawaii businesses. Consequently, Verizon agreed to reduce the selling price to \$1,600 million, less debt. The transaction closed on May 2, 2005.

### **Environmental Matters**

During 2003, under a government-approved plan, remediation commenced at the site of a former facility in Hicksville, New York that processed nuclear fuel rods in the 1950s and 1960s. Remediation beyond original expectations proved to be necessary, and a reassessment of the anticipated remediation costs was conducted. In addition, a reassessment of costs related to remediation efforts at several other former facilities was undertaken. As a result, an additional environmental remediation expense of \$240 million was recorded in 2003.

### **New York Recovery Funding**

## Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

In August 2002, President Bush signed the Supplemental Appropriations bill that included \$5.5 billion in New York recovery funding. Of that amount, approximately \$750 million has been allocated to cover utility restoration and infrastructure rebuilding as a result of the September 11th terrorist attacks. These funds will be distributed through the Lower Manhattan Development Corporation following an application and audit process. As of September 30, 2004, we have applied for reimbursement of approximately \$266 million. We received an advance of \$11 million in December 2003 and an additional advance of \$77 million in June 2004. We are awaiting the results of an audit relating to the total amount that we have applied for reimbursement, including funds already received. On December 22, 2004, we applied for reimbursement of an additional \$136 million of category 2 losses, and on March 29, 2005 we amended our application seeking an additional \$3 million. Category 2 funding is for permanent restoration and infrastructure improvement. According to the plan, permanent restoration is reimbursed up to 75% of the loss. Our application is pending.

### **Regulatory and Competitive Trends**

#### **Competition and the Telecommunications Act of 1996**

We face increasing competition in all areas of our business. The Telecommunications Act of 1996 (1996 Act), regulatory and judicial actions and the development of new technologies, products and services have created opportunities for alternative telecommunication service providers, many of which are subject to fewer regulatory constraints. Current and potential competitors in telecommunications services include long distance companies, other local telephone companies, cable companies, wireless service providers, foreign telecommunications providers, electric utilities, Internet service providers, providers of voice over the Internet, or VoIP services and other

## **Table of Contents**

companies that offer network services. Many of these companies have a strong market presence, brand recognition and existing customer relationships, all of which contribute to intensifying competition and may affect our future revenue growth.

We are unable to predict definitively the impact that the ongoing changes in the telecommunications industry will ultimately have on our business, results of operations or financial condition. The financial impact will depend on several factors, including the timing, extent and success of competition in our markets, the timing and outcome of various regulatory proceedings and any appeals, and the timing, extent and success of our pursuit of new opportunities resulting from the 1996 Act and technological advances.

## **FCC Regulation and Interstate Rates**

Our telephone operations are subject to the jurisdiction of the FCC with respect to interstate services and related matters.

### *Access Charges and Universal Service*

On May 31, 2000, the FCC adopted the Coalition for Affordable Local and Long Distance Services (CALLS) plan as a comprehensive five-year plan for regulation of interstate access charges. The CALLS plan has three main components. First, it establishes portable interstate access universal service support of \$650 million for the industry that replaces implicit support previously embedded in interstate access charges. Second, the plan simplifies the patchwork of common line charges into one subscriber line charge (SLC) and provides for de-averaging of the SLC by zones and class of customers. Third, the plan set into place a mechanism to transition to a set target of \$.0055 per minute for switched access services. Once that target rate is reached, local exchange carriers are no longer required to make further annual price cap reductions to their switched access prices. The annual reductions leading to the target rate, as well as annual reductions for the subset of special access services that remain subject to price cap regulation was set at 6.5% per year.

As a result of tariff adjustments which became effective in July 2003, virtually all of our switched access lines reached the \$.0055 benchmark. On June 29, 2004, the U.S. Court of Appeals for the D.C. Circuit upheld the FCC's prior approval of an increase in the SLC cap. The current cap is \$6.50.

The FCC previously initiated investigations of the interstate access rates charged by Verizon's local telephone companies during the 1993 to 1996 tariff years. One issue in that investigation was resolved in an order dated July 30, 2004, where the FCC concluded that some of Verizon's local telephone companies had incorrectly calculated one aspect of their price cap rates. The remaining issues were dismissed in an FCC order on March 30, 2005. That dismissal is the subject of an appeal to the U.S. Court of Appeals for the D.C. Circuit.

The FCC has adopted rules for special access services that provide for pricing flexibility and ultimately the removal of services from price regulation when prescribed competitive thresholds are met. More than half of special access revenues are now removed from price regulation.

The FCC also has established a mechanism to provide universal service support to high-cost areas served by larger, non-rural local telephone companies. This funding mechanism provides additional support for local telephone services in several states served by our telephone

## Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

operations. This system has been supplemented by the new FCC access charge plan described above. On October 16, 2003, in response to a previous court decision, the FCC announced a decision providing additional justification for its non-rural high-cost universal support mechanism and modifying it in part. That decision has been reversed by the U.S. Court of Appeals for the Tenth Circuit and remanded to the FCC on the grounds that the FCC has still not adequately justified its decision. The FCC's rules remain in effect pending the completion of any remand proceedings. The FCC also has proceedings underway to evaluate possible changes to its current rules for assessing contributions to the universal service fund. Any change in the current assessment mechanism could result in a change in the contribution that local telephone companies, wireless carriers or others must make and that would have to be collected from customers.

### *Unbundling of Network Elements*

On February 20, 2003, the FCC announced a decision adopting new rules defining the obligations of incumbent local exchange carriers to provide competing carriers with access to elements of their local networks on an unbundled basis, known as UNEs. The decision was the culmination of an FCC rulemaking referred to as its triennial review of

## **Table of Contents**

its UNE rules, and also was in response to a decision by the U.S. Court of Appeals for the D.C. Circuit that had overturned the FCC's previous unbundling rules.

The text of the order and accompanying rules were released on August 21, 2003. With respect to broadband facilities, such as mass market fiber to the premises loops and packet switching, that order generally removed unbundling obligations under Section 251 of the 1996 Act. With respect to narrowband services, the order generally left unbundling obligations in place, with certain limited exceptions, and delegated to state regulatory proceedings a further review. The order also provided a new set of criteria relating to when carriers may purchase a combination of unbundled loops and transport elements known as enhanced extended loops (EELs) that increased arbitrage opportunities by making it easier for carriers to use EELs purchased at artificially low regulated UNE rates rather than competitive special access prices.

Multiple parties, including Verizon, appealed various aspects of the decision. On March 2, 2004, the U.S. Court of Appeals for the D.C. Circuit issued an order upholding the FCC in part, and overturning its order in part. The court upheld the FCC with respect to broadband facilities. On the narrowband unbundling requirements, the court reversed and vacated key aspects of the FCC decision that had required unbundled access to mass market switching and high capacity transmission facilities. The court's order vacating those aspects of the FCC's rules went into effect on June 16, 2004, and petitions by various parties to obtain a stay or U.S. Supreme Court review were denied.

On August 20, 2004, the FCC issued interim narrowband unbundling rules and a Notice of Proposed Rulemaking to establish new unbundling rules. In the interim rules order, the FCC required incumbent carriers to continue providing, for six months from the effective date of its order, unbundled mass market switching and high capacity transmission facilities on the same terms that they were available under interconnection agreements as of June 15, 2004.

On February 4, 2005, the FCC released a decision on new unbundling rules. The FCC eliminated the requirement to unbundle mass market local switching on a nationwide basis, with the obligation to accept new orders ending as of the effective date of the order (March 11, 2005). The FCC also established a one year transition for existing UNE switching arrangements. For high capacity transmission facilities, the FCC established criteria for determining whether high capacity loops, transport or dark fiber transport must be unbundled in individual wire centers, and stated that these standards were only expected to affect a small number of wire centers. The FCC also eliminated the obligation to provide dark fiber loops and found that there is no obligation to provide UNEs exclusively for wireless or long distance service. In any instance where a particular high capacity facility no longer has to be made available as a UNE, the FCC established a similar one year transition for any existing high capacity loop or transport UNEs, and an 18 month transition for any existing dark fiber UNEs. Verizon and other parties have challenged various aspects of the new FCC rules on appeal.

Separately, the FCC has taken steps to clarify its rules for broadband facilities in response to requests of various parties. Verizon petitioned the FCC to make clear that any broadband facilities that do not have to be unbundled under Section 251 of the 1996 Act also do not have to be unbundled under another provision of the 1996 Act, specifically Section 271. On October 22, 2004, the FCC granted that petition, and the FCC's decision has been appealed by various parties. In addition, the FCC has clarified that mass market fiber to the curb loops qualify for the same regulatory treatment as mass market fiber to the premises loops, that fiber loops to serve customers in multiple unit buildings also qualify for that same regulatory treatment as long as the building is predominantly residential, and that carriers that deploy new broadband network facilities are not required to equip those facilities with legacy capabilities that could render them subject to unbundling.

### *Intercarrier Compensation*

## Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

In March 2005, the FCC released a further notice of proposed rulemaking on intercarrier compensation including, but not limited to, access charges, compensation for Internet traffic, and reciprocal compensation for local traffic. The notice seeks comments about intercarrier compensation in general, and requests input on seven specific reform proposals.

The FCC also has pending before it issues relating to intercarrier compensation for dial-up Internet-bound traffic. The FCC previously found this traffic is not subject to reciprocal compensation under Section 251(b)(5) of the 1996 Act. Instead, the FCC established federal rates per minute for this traffic that declined from \$.0015 to \$.0007 over a three-year period, established caps on the total minutes of this traffic subject to compensation in a state, and required incumbent local exchange carriers to offer to both bill and pay reciprocal compensation for local traffic at the same rate as they are required to pay on Internet-bound traffic. On May 3, 2002, the U.S. Court of Appeals for the D.C.

## **Table of Contents**

Circuit rejected part of the FCC's rationale, but declined to vacate the order while it is on remand. As a result, pending further action by the FCC, the FCC's underlying order remains in effect. On October 8, 2004, the FCC announced that it had denied a petition to discontinue the \$.0007 rate cap on this traffic, but had decided to remove the caps on the total minutes of Internet-bound traffic subject to compensation. That decision is the subject of an appeal by several parties. Disputes also remain pending in a number of forums relating to the appropriate compensation for Internet-bound traffic during previous periods under the terms of our interconnection agreements with other carriers.

On March 10, 2004, the FCC initiated a rulemaking proceeding to address the regulation of services that use Internet protocol, including voice services. The FCC also considered several petitions asking whether, and under what circumstances, services that employ Internet protocol are subject to access charges. The FCC concluded in response to one such petition that one provider's peer-to-peer Internet protocol service that does not use the public switched network is an interstate information service and is not subject to access charges. The FCC issued an order in connection with another such petition that stated that the petitioning company's service that utilizes Internet protocol for only one intermediate part of a call's transmission is a telecommunications service subject to access charges. A third petition asking the FCC to forbear from applying access charges to voice over Internet protocol services that are terminated on switched local exchange networks was withdrawn by the carrier that filed that petition. In addition, the FCC granted a petition filed by one provider of a voice over Internet protocol service and declared its service to be jurisdictionally interstate in nature on the grounds that it was impossible to separate that carrier's Internet protocol service into interstate and intrastate components. The FCC also stated that its conclusion would apply to other services with similar characteristics. That order has been appealed.

### *Broadband Services*

The FCC has several ongoing rulemakings considering the regulatory treatment of broadband services. Among the questions at issue are whether to require local telephone companies like Verizon to offer such services as a common carrier or whether such services may be offered under a less regulated private carriage arrangement, under what circumstances high speed Internet access services should be classified as largely deregulated information services, and whether to declare broadband services offered by local telephone companies as non-dominant and what the effect should be of any such classification. On June 27, 2005, the U.S. Supreme Court overturned a decision of the U.S. Court of Appeals for the Ninth Circuit and upheld an FCC decision that cable modem service is classified as an information service that is free of traditional common carrier regulation. This decision did not address the appropriate regulatory classification of broadband services offered by telephone companies but it did confirm the FCC's authority to classify broadband services as non-common carrier services, which is one of the issues in the ongoing FCC rulemaking proceedings.

### **Recent Accounting Pronouncement**

In March 2005, the Financial Accounting Standards Board (FASB) issued FASB Interpretation (FIN) No. 47, *Accounting for Conditional Asset Retirement Obligations*—an interpretation of FASB Statement No. 143. FIN No. 47 clarifies SFAS No. 143, *Accounting for Asset Retirement Obligations*, such that conditional asset retirement obligations require recognition at fair value if they can be reasonably estimated. These rules are effective December 31, 2005; we are currently evaluating the impact, if any, on our results of operations and financial position.

---

**Cautionary Statement Concerning Forward-Looking Statements**

In this Management's Discussion and Analysis of Results of Operations and Financial Condition, and elsewhere in this Quarterly Report, we have made forward-looking statements. These statements are based on our estimates and assumptions and are subject to risks and uncertainties. Forward-looking statements include the information concerning our possible or assumed future results of operations. Forward-looking statements also include those preceded or followed by the words anticipates, believes, estimates, hopes or similar expressions. For those statements, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

The following important factors, along with those discussed elsewhere in this Quarterly Report, could affect future results and could cause those results to differ materially from those expressed in the forward-looking statements:

materially adverse changes in economic and industry conditions and labor matters, including workforce levels and labor negotiations, and any resulting financial and/or operational impact, in the markets served by us or by companies in which we have substantial investments;

material changes in available technology;

technology substitution;

an adverse change in the ratings afforded our debt securities by nationally accredited ratings organizations;

the final results of federal and state regulatory proceedings concerning our provision of retail and wholesale services and judicial review of those results;

the effects of competition in our markets;

the timing, scope and financial impacts of our deployment of fiber-to-the-premises broadband technology;

the ability of Verizon Wireless to continue to obtain sufficient spectrum resources;

changes in our accounting assumptions that regulatory agencies, including the SEC, may require or that result from changes in the accounting rules or their application, which could result in an impact on earnings;

a significant change in the timing of, or the imposition of any government conditions to, the closing of our business combination transaction with MCI, Inc., if consummated;

actual and contingent liabilities in connection with the MCI transaction; and

the extent and timing of our ability to obtain revenue enhancements and cost savings following the MCI transaction.

**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

---

Information relating to market risk is included in Item 2, Management's Discussion and Analysis of Results of Operations and Financial Condition in the section under the caption Market Risk.

**Table of Contents**

**Item 4. Controls and Procedures**

---

Our chief executive officer and chief financial officer have evaluated the effectiveness of the registrant's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934), as of the end of the period covered by this quarterly report, that ensure that information relating to the registrant which is required to be disclosed in this report is recorded, processed, summarized and reported, within required time periods. Based on this evaluation, our chief executive officer and chief financial officer have concluded that the registrant's disclosure controls and procedures were adequate and effective to ensure that material information relating to the registrant and its consolidated subsidiaries would be accumulated and communicated to them by others within those entities, particularly during the period in which this quarterly report was being prepared, to allow timely decisions regarding required disclosure. There were no changes in the registrant's internal control over financial reporting during the period covered by this quarterly report that have materially affected, or are reasonably likely to materially affect, internal control over financial reporting.

**Table of Contents****Part II Other Information****Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

The following table provides information about Verizon's common stock repurchases during the second quarter of 2005.

| Period     | Total Number of Shares Purchased | Average Price  | Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1) | Maximum Number of Shares                                  |
|------------|----------------------------------|----------------|--|---|
|            |                                  | Paid per Share |  | that May Yet Be Purchased Under the Plans or Programs (2) |
| April 2005 | 625,000                          | \$ 35.41       | 625,000  | 66,560,200  |
| May 2005   | 718,500                          | 34.85          | 718,500  | 65,841,700  |
| June 2005  | 811,220                          | 35.08          | 811,220  | 65,030,480  |
|            | <u>2,154,720</u>                 | 35.10          | <u>2,154,720</u>   | 65,030,480  |

(1) On January 22, 2004, Verizon's Board of Directors authorized a common stock repurchase program.

(2) The program authorizes total repurchases of up to 80 million common shares and expires no later than the close of business on February 28, 2006. Under the plan, Verizon has the option to repurchase shares for the corporation over time, with the amount and timing of repurchases depending on market conditions and corporate needs.

**Table of Contents****Item 4. Submission of Matters to a Vote of Security Holders**

Our 2005 Annual Meeting of Shareholders was held on May 5, 2005. At the meeting, the following items were submitted to a vote of shareholders.

The number of common shares present at the Annual Meeting of Shareholders of Verizon Communications Inc. voting and withholding authority to vote in the election of Directors (the Total Vote ) was 2,334,899,533 or 84.34% of the common shares outstanding on March 7, 2005, the record date for said meeting.

- (a) The following nominees were elected to serve on the Board of Directors:

| Name of Nominee    | Votes Cast For | Votes Withheld |
|--------------------|----------------|----------------|
| James R. Barker    | 2,241,925,582  | 92,973,951     |
| Richard L. Carrión | 2,132,254,133  | 202,645,400    |
| Robert W. Lane     | 2,245,481,691  | 89,417,842     |
| Sandra O. Moose    | 2,138,780,939  | 196,118,594    |
| Joseph Neubauer    | 1,579,895,069  | 755,004,464    |
| Thomas H. O'Brien  | 2,223,408,699  | 111,490,834    |
| Hugh B. Price      | 2,253,239,235  | 81,660,298     |
| Ivan G. Seidenberg | 2,230,407,555  | 104,491,978    |
| Walter V. Shipley  | 2,252,463,467  | 82,436,066     |
| John R. Stafford   | 2,253,267,707  | 81,631,826     |
| Robert D. Storey   | 2,251,586,274  | 83,313,259     |

- (b) The appointment of Ernst & Young LLP as independent registered public accounting firm for 2005 was ratified with 2,252,971,623 votes for, 51,075,414 votes against, and 30,852,496 abstentions.
- (c) A shareholder proposal regarding Cumulative Voting was defeated with 699,074,580 votes for, 1,078,648,218 votes against, 163,350,143 abstentions and 393,826,592 broker non-votes.
- (d) A shareholder proposal regarding Composition of the Board of Directors was defeated with 465,126,093 votes for, 1,428,274,665 votes against, 47,672,183 abstentions and 393,826,592 broker non-votes.
- (e) A shareholder proposal regarding Separate Chairman and CEO was defeated with 686,150,985 votes for, 1,211,171,729 votes against, 43,750,227 abstentions and 393,826,592 broker non-votes.
- (f) A shareholder proposal regarding Majority Vote for Election of Directors was defeated with 819,454,576 votes for, 1,076,469,380 votes against, 45,148,985 abstentions and 393,826,592 broker non-votes.
- (g) A shareholder proposal regarding Directors Liability was defeated with 334,454,404 votes for, 1,557,890,231 votes against, 48,728,306 abstentions and 393,826,592 broker non-votes.

Edgar Filing: VERIZON COMMUNICATIONS INC - Form 10-Q

- (h) A shareholder proposal regarding Report on Political Contributions was defeated with 264,339,952 votes for, 1,500,069,883 votes against, 176,663,106 abstentions and 393,826,592 broker non-votes.
