The Group has set an aspiration of becoming one of the world's top five financial institutions by market capitalization by the end of fiscal 2008 and is pursuing the following strategy.

**1. Business strategy**

MUFG has defined Retail, Corporate and Trust Assets (asset management and administration) as its three core businesses and has established integrated business groups in the holding company for each core business. ## **3. Delivering value to customers and to society**

In the first article of its Management Philosophy the Group states, "We will respond promptly and accurately to the diverse needs of our customers around the world and seek to inspire their trust and confidence." This customer-focused management approach forms the basis of all our activities.

## **4. Strengthening of internal controls**

As a leading comprehensive financial services group comprising diverse Group companies and as the world's largest by assets, MUFG is pursuing a significant strengthening of its internal control framework. Specifically, to prevent inaccurate financial reporting and to ensure thorough compliance with the law throughout the Group, we will create an internal control framework based on the COSO\* framework. Furthermore, as a New York Stock Exchange listed company, the Group will comply with the U.S. Sarbanes-Oxley Act of 2002 and the standards of the SEC, and establish and maintain a sophisticated internal control and risk management framework that meets the criteria of the new BIS regulations. Furthermore the Balanced Score Card (BSC) will be introduced as a management administration tool in order to improve the monitoring of business strategy execution.

(\*) COSO is the abbreviation for the Committee of Sponsoring Organizations of the Treadway Commission, which was established in 1985 sponsored by the American Institute of Certified Public Accountants and other organizations. COSO also refers to the internal control framework proposed by the Committee of Sponsoring Organizations of the Treadway Commission. As a standard framework, it has had significant influence on the financial inspection methods of government entities in various countries. In September 2004, COSO expanded the structural elements of internal control systems (first announced in 1992) and also released a more refined COSO ERM (COSO Enterprise Risk Management Framework).

### 3. Results of Operations and Financial Condition

#### (1) Results of operations

With respect to the financial and economic environment for the fiscal year ended September 30, 2005, overseas economies generally remained strong. The US economy steadily expanded even though the rise in crude oil prices and the onslaught of the hurricane had some negative effects on the economy. The Chinese economy continued its high growth, mainly led by increases in investments and exports.

In Japan, our economy has taken steps towards recovery during the first part of the current fiscal year. This can be seen in the increase in capital expenditures, the steady rise in private consumption due to improvements in the job market and personal income, and the increase in exports due to worldwide advancement in inventory adjustment. Meanwhile, the level of decline in consumer prices was much smaller than previous periods.

Regarding the financial environment, in the EU, the European Central Bank's policy rate remained at 2%. In the United States, the target for the federal funds rate was raised from 2.75% to 3.75%. In Japan, the Bank of Japan continued its current easy monetary policy and kept short-term interest rates at near zero percent. On the other hand, the long-term interest rate in Japan declined temporarily before rising to new levels due to market expectations regarding an end to deflation and a change in the current easy monetary policy. In the foreign exchange markets, the yen depreciated against the US dollar due to the rising US interest rates environment during the fiscal year ended September 30, 2005.

Amidst this economic environment, net income for the six months ended September 30, 2005 was ¥300.6 billion, an increase of ¥129.0 billion from the six months ended September 30, 2004. This increase was primarily due to the following factors. The first factor was a ¥116.3 billion decrease in total credit costs, from ¥56.3 billion in total credit costs for the six months ended September 30, 2004 to ¥59.9 billion reversal of total credit costs for the six months ended September 30, 2005. The second factor was a ¥36.4 billion increase in net business profits before credit costs for trust accounts and provision for formula allowance for loan losses, from ¥388.9 billion for the six months ended September 30, 2004 to ¥425.3 billion for the six months ended September 30, 2005. The third factor was an increase in special gains of ¥95.6 billion due to the reversal of our allowance for credit losses, from ¥17.5 billion for the six months ended September 30, 2004 to ¥113.1 billion for the six months ended September 30, 2005.

Ordinary profit by business segment was ¥293.0 billion for the banking segment, ¥63.4 billion for the trust banking segment and ¥16.0 billion for the securities segment. Ordinary profit (loss) by geographic segment was ¥304.1 billion in Japan, ¥66.4 billion in North America, ¥1.8 billion in Europe and the Middle East, ¥17.3 billion in Asia and Oceania excluding Japan, and an ordinary loss of ¥0.6 billion in Latin America.

For claims to debtors who are legally bankrupt (due to bankruptcy, special liquidation, the suspension of transactions with banks by the rules of clearing houses, etc.) or virtually bankrupt, an allowance is provided based on the amount of claims, after charge-offs as stated below, and net of amounts expected to be collected through the disposal of collateral or the execution of guarantees.

For claims to debtors who are likely to become bankrupt and for which future cash flows could not be reasonably estimated, an allowance is provided for the amount considered to be necessary based on an overall solvency assessment performed for the amount of the claim, net of amounts expected to be collected through the disposal of collateral or execution of guarantees.

## Edgar Filing: MITSUBISHI UFJ FINANCIAL GROUP INC - Form 6-K

For claims to debtors who are likely to become bankrupt or are to be closely watched and for which future cash flows could be reasonably estimated, an allowance is provided for the difference between the present value of the expected future cash flows discounted at the contracted interest rate and the carrying value of the claim.

For other claims, an allowance is provided based on historical loan loss experience.

An allowance for loans to specific foreign borrowers is provided based on the amount of expected losses due to the political and economic situation of their respective countries.

All claims are assessed by the branches and credit supervision divisions based on the internal rules for self-assessment of asset quality. The credit examination divisions, which are independent from branches and credit supervision divisions, subsequently conduct audits of their assessments, and an allowance is provided based on audit results.

For collateralized or guaranteed claims to debtors who are legally bankrupt or virtually bankrupt, the amount of claims exceeding the estimated value of the collateral or guarantees, which is deemed uncollectible, has been charged-off. The amount was ¥419,959 million.

An allowance for loan losses of other consolidated subsidiaries is provided based on historical loan loss experience or estimated collectibility of specific claims.

#### **11. Allowance for Losses on Investment Securities**

An allowance for losses on investment securities is provided based on the estimated losses on non-marketable debt securities.

#### **12. Reserve for Employees' Bonuses**

A reserve for employees' bonuses is provided for the payment of employees' bonuses based on the estimated amounts of the future payments attributed to the current interim fiscal year.

#### **13. Reserve for Employees' Retirement Benefits**

A reserve for employees' retirement benefits is provided for the payment of employees' retirement benefits based on the estimated amount of the actuarial retirement benefit obligation and the related pension assets. Prior service cost is amortized using the straight-line method over 10 years. Net actuarial gain (loss) is amortized using the straight-line method over 10 years commencing from the next fiscal year of incurrence.

#### **14. Equipment Used under Finance Lease Agreements**

Equipment used under finance lease agreements is accounted for as equipment leased under operating leases, except for those leases which transfer ownership of leased equipment to the lessee, in which case the equipment is capitalized.

#### **15. Hedge Accounting for Interest Rate Risks**

With respect to hedge accounting for interest rate risks arising from financial assets and liabilities, MTFG's domestic banking subsidiary and trust banking subsidiary, have principally adopted portfolio hedges or individual hedges as prescribed in Industry Audit Committee Report No. 24, "Treatment of Accounting and Auditing of Application of Accounting Standard for Financial Instruments in the Banking Industry", issued by the Japanese Institute of Certified Public Accountants (the JICPA) on February 13, 2002 and Accounting Committee Report No. 14, "Practical Guidelines for Accounting for Financial Instruments", issued by the JICPA on January 31, 2000. The method of hedge accounting is the deferral method.

With respect to hedging activities to offset changes in the fair value of fixed rate deposits and loans etc., MTFG's domestic banking subsidiary and trust banking subsidiary distinguish hedged items by grouping the hedged items by their maturities and designate interest rate swap transactions etc. as hedging instruments individually or in accordance with the Industry Audit Committee Report No. 24. With respect to hedging activities offsetting changes in the fair value of fixed rate bonds, they distinguish hedged items by the individual bond or identical types of bonds and designate interest rate swap transactions etc. as hedging instruments. Since material terms related to the hedged items and hedging instruments are substantially identical, the hedge relationship is deemed to be highly effective and hedge effectiveness testing is substituted by the identicalness.

With respect to hedging activities to fix forecasted cash flows on variable rate or short-term fixed rate deposits and loans etc., MTFG's domestic banking subsidiary and trust banking subsidiary distinguish hedged items by grouping the hedged items by their index interest rates and repricing terms and designate interest rate swap transactions etc. as hedging instruments in accordance with the Industry Audit Committee Report No. 24. Since material terms related to the hedged items and hedging instruments are substantially identical, the hedge relationship is deemed to be highly effective and the hedge effectiveness testing is substituted by the identicalness. Hedge effectiveness is also tested by correlation of fluctuation factors in interest rates.

Deferred hedge losses and deferred hedge gains recorded on the balance sheet as of March 31, 2003 as a result of the macro hedge accounting are realized as expenses or income over the remaining lives of the hedging instruments (at most 15 years from 2003). Deferred hedge losses and deferred hedge gains attributable to the macro hedge accounting as of September 30, 2005 were ¥89,824 million and ¥120,254 million, respectively.

## **16. Hedge Accounting for Foreign Exchange Risks**

With respect to hedge accounting for foreign exchange risks attributable to foreign currency denominated financial assets and liabilities, MTFG's domestic banking subsidiary and trust banking subsidiary have applied the deferral hedge accounting. They have distinguished hedged items by grouping the foreign currency denominated financial assets and liabilities by currencies and designating currency swap transactions and forward exchange contracts (funds swap transactions) as hedging instruments, pursuant to Industry Audit Committee Report No. 25, "Treatment of Accounting and Auditing concerning Accounting for Foreign Currency Transactions in the Banking Industry", issued by the JICPA on July 29, 2002.

They also engage in portfolio hedge to hedge foreign exchange risk attributable to foreign-currency-denominated investments in affiliated companies and foreign-currency-denominated securities available for sale (other than bonds), using foreign-currency-denominated liabilities and forward exchange contracts as hedging instruments. They apply the deferral hedge method to foreign currency denominated investments in affiliated companies and the fair value hedge method to foreign-currency-denominated securities available for sale (other than bonds).

## **17. Intercompany and Intracompany Swap Transactions**

With respect to the intercompany and intracompany derivative transactions, realized gains (losses) or valuation gains (losses) on interest rate swap transactions and currency swap transactions are reported in current earnings or deferred as assets or liabilities without elimination, if mirror transactions with the third parties against these swap transactions are designated as hedging instruments, and are appropriately conducted in conformity with the non-arbitrary and strict hedging policy in accordance with the Industry Audit Committee Report No. 24 and No. 25.

## **18. Consumption Taxes**

The National Consumption Tax and the Local Consumption Tax are excluded from transaction amounts. The portion of the National Consumption Tax and the Local Consumption Tax, which were paid on the purchase of premises and equipment and which are not deductible as a tax credit, are charged to expenses when incurred.

#### **A. Business strategy**

MUFG has defined Retail, Corporate and Trust Assets (asset management and administration) as its three core businesses and has established integrated business groups in the holding company for each core business. In this way MUFG aims to transcend the boundaries between business types and fully meet customer needs in a timely manner.

### **C. Delivering value to customers and to society**

In the first article of its Management Philosophy the Group states, "We will respond promptly and accurately to the diverse needs of our customers around the world and seek to inspire their trust and confidence." This customer-focused management approach forms the basis of all our activities.

### **D. Strengthening of internal controls**

As a leading comprehensive financial services group comprising diverse Group companies and as the world's largest by assets, MUFG is pursuing a significant strengthening of its internal control framework. Specifically, to prevent inaccurate financial reporting and to ensure thorough compliance with the law throughout the Group, we will create an internal control framework based on the COSO\* framework. Furthermore, as a New York Stock Exchange listed company, the Group will comply with the U.S. Sarbanes-Oxley Act of 2002 and the standards of the SEC, and establish and maintain a sophisticated internal control and risk management framework that meets the criteria of the new BIS regulations. Furthermore the Balanced Score Card (BSC) will be introduced as a management administration tool in order to improve the monitoring of business strategy execution.

(\* ) COSO is the abbreviation for the Committee of Sponsoring Organizations of the Treadway Commission, which was established in 1985 sponsored by the American Institute of Certified Public Accountants and other organizations. COSO also refers to the internal control framework proposed by the Committee of Sponsoring Organizations of the Treadway Commission. As a standard framework, it has had significant influence on the financial inspection methods of government entities in various countries. In September 2004, COSO expanded the structural elements of internal control systems (first announced in 1992) and also released a more refined COSO ERM (COSO Enterprise Risk Management Framework).

By mobilizing the comprehensive strengths of the Group to execute the strategy described above, we will seek to realize our aspiration. We aim to create new value, and thus maximize corporate value, by delivering high quality and diverse comprehensive financial services to customers faster and in a more integrated way.

### 3. Results of Operations and Financial Condition

#### (1) Results of operations

With respect to the financial and economic environment for the fiscal year ended September 30, 2005, overseas economies generally remained strong. The US economy steadily expanded even though the rise in crude oil prices and the onslaught of the hurricane had some negative effects on the economy. The Chinese economy continued its high growth, mainly led by increases in investments and exports. In Japan, our economy has taken steps towards recovery during the first part of the current fiscal year. This can be seen in the increase in capital expenditures, the steady rise in private consumption due to improvements in the job market and personal income, and the increase in exports due to worldwide advancement in inventory adjustment. Meanwhile, the level of decline in consumer prices was much smaller than previous periods.

Regarding the financial environment, in the EU, the European Central Bank's policy rate remained at 2%. In the United States, the target for the federal funds rate was raised from 2.75% to 3.75%. In Japan, the Bank of Japan continued its current easy monetary policy and kept short-term interest rates at near zero percent. On the other hand, the long-term interest rate in Japan declined temporarily before rising to new levels due to market expectations regarding an end to deflation and a change in the current easy monetary policy. In the foreign exchange markets, the yen depreciated against the US dollar due to the rising US interest rates environment during the fiscal year ended September 30, 2005.

Amidst this economic environment, consolidated net income for the six months ended September 30, 2005 was ¥411.0 billion, an increase of ¥1,085.3 billion compared to the six months ended September 30, 2004. This increase was primarily due to the following factors. Consolidated gross profit was ¥750.9 billion, a decrease of ¥50.8 billion. This was primarily caused by a decrease of ¥37.6 billion in net interest income and a decrease of ¥28.8 billion in net gains on debt securities. General and administrative expenses (excluding non-recurring expenses) were ¥363.2 billion, an increase of ¥12.6 billion. Net profit and loss on equity securities was ¥15.4 billion, an increase of ¥51.4 billion compared to the previous interim term. This increase was caused by a decrease in losses on equity securities from ¥152.2 billion for the six months ended September 30, 2004 to ¥7.0 billion for the six months ended September 30, 2005.

Total credit related costs (excluding gains on loans charged-off) for the six months ended September 30, 2005 decreased by ¥912.4 billion compared to the six months ended September 30, 2004 and resulted in a profit of ¥214.6 billion due to a reversal of provision for allowance for loan losses (formula allowance and specific allowance for loan losses, and allowance for losses on specific foreign borrowers). This reversal was primarily attributable to a large decrease in allowance for loan losses, reflecting a remarkable decrease in formula allowance for loan losses due to an improvement in credit ratings of debtors as their business conditions improved. The profit from reversal of provision for allowance for loan losses is posted in special gains. An amount of ¥31.0 billion for losses on impairment of fixed assets and an amount of ¥55.0 billion for expenses for the preparation of planned management integration with Mitsubishi Tokyo Financial Group, Inc. are included in special losses.

The factors mentioned above contributed to a consolidated ordinary profit of ¥355.2 billion, an increase of ¥830.1 billion and consolidated net income of ¥411.0 billion, an increase of ¥1,085.3 billion.

## **(2) Financial Condition**

### **(a) Condition of Assets, Liabilities, Minority Interest and Shareholders' Equity**

Total assets as of September 30, 2005 amounted to ¥78,074.5 billion, decreasing by ¥4,479.1 billion from the end of March 2005. Although a balance of loans and bills discounted increased by ¥820.6 billion, total assets decreased mainly due to decreases in receivables under resale agreements and trading assets, by ¥1,768.6 billion and ¥3,646.8 billion, respectively.

Total liabilities as of September 30, 2005 amounted to ¥74,866.9 billion, decreasing by ¥4,994.2 billion from the end of March 2005. Primary factors of the decrease were a decrease of ¥1,130.7 billion in payables under repurchase agreements and a decrease of ¥2,872.5 billion in trading liabilities. Deposits amounted to ¥50,315.4 billion, decreasing by ¥410.2 billion.

Total shareholders' equity amounted to ¥1,687.6 billion, increasing by ¥507.5 billion due to an increase in retained earnings with the profit of this term and an increase in unrealized gains on equity securities under the favorable market condition.

**(b) Cash Flows**

Cash and cash equivalents as of September 30, 2005 were ¥5,499.1 billion, increasing by ¥621.2 billion from the end of March 2005. Breakdown is as follows. Net cash provided by operating activities for the six months ended September 30, 2005 amounted to ¥200.4 billion, a decrease of ¥1,300.0 billion compared to the six months ended September 30, 2004 primarily due to an increase in loan balance. Net cash provided by investing activities amounted to ¥573.2 billion, a decrease of ¥1,789.3 billion primarily due to a decrease in sales of investment securities. Net cash used in financing activities amounted to ¥154.0 billion, an increase of ¥780.0 billion primarily due to redemption of subordinated debts.

**(c) Risk-Adjusted Capital Ratio**

Consolidated risk-adjusted capital ratio was 11.67% (preliminary figure) at the end of September, 2005. The following table shows a history of the ratio.

	At September 30, 2004	At March 31, 2005	At September 30, 2005

**Notes to Consolidated Financial Statements**

The accompanying Consolidated Financial Statements of UFJ Holdings, Inc. and its subsidiaries are compiled as required by the Banking Law of Japan and in conformity with Japan, which are different in certain respects as compared to the application and disclosure accounting principles generally accepted in requirements of International Accounting Standards. For the convenience of readers, the presentation is modified in certain respects from the original Japanese report. The amounts are presented in millions of yen and amounts less than one million yen are omitted.

Notes related to the Consolidated Balance Sheets as of September 30, 2005 are as follows:

- (1) Transactions for trading purposes are those seeking to capture gains arising from short-term market changes or from differences between markets for interest rates, currency exchange rates or securities. Such transactions are reported as Trading Assets and Trading Liabilities in the consolidated balance sheets as of September 30, 2005, on a trade date basis. Trading account securities and monetary receivables, etc. held for trading purposes are stated at market value at the end of the fiscal term. Trading-related financial derivatives such as swaps, futures and options are valued on the assumption that they were settled at the end of the fiscal term.
- (2) Held-to-maturity Debt Securities are carried at amortized cost, as determined by the moving average method (straight line method). Investments in Non-consolidated Subsidiaries and Affiliates which are not accounted for by the equity method are carried at the moving average cost. - (3) Special Gains for the fiscal term ended September 30, 2005 includes Reversal of Reserve for Possible Losses Related to Land Trust of 2,345 million yen.
- (4) Special Losses for the fiscal term ended September 30, 2005 includes Expenses for the preparation of planned management integration.
- (5) Losses on Impairment of Fixed Assets in this fiscal year were as follows.

Area	Principal purpose of use	Type	Impairment loss (in millions of yen)
Tokyo Metropolitan Area	Branch premises, Company housing, etc. (7 items)	Land and premises, etc.	18,840
	Idle assets and assets to be disposed (103 items)		3,923
Other	Branch premises, Company housing, etc. (7 items)	Land and premises, etc.	3,204
	Idle assets and assets to be disposed (89 items)		5,119

For the purposes of identifying impaired assets, assets of an individual branch are grouped as a minimum unit in case of consolidated domestic banking subsidiaries, because individual branches generate cash flow independently. In case of idle assets and assets to be disposed, each asset is regarded as a minimum unit. In case of main office, headquarters, computer center, company housing, and etc., these assets are identified as common assets and regarded as one unit because these assets do not generate cash flow independently.

Also, a certain consolidated domestic subsidiary which leases branches, company housing, and etc., to a certain consolidated domestic banking subsidiary treats each premise as a minimum unit, because individual lease premise generates cash flow independently. For a certain consolidated domestic subsidiary, the sum of the undiscounted future cash flows of certain premises were exceeded by the carrying amount of the premises and the difference was recognized as an impairment loss. The recoverable amount used for the measurement of the impairment loss was the higher of the net realizable value or the value of use. The net realizable value is determined based on the real estate appraisal or the expected amount for sale, etc. The value of use is calculated by discounting the future cash flow with a discount rate of 8%.

Consolidated domestic banking subsidiaries and certain consolidated domestic subsidiaries recognized impairment losses on idle assets and premises to be closed or disposed for the difference of the carrying amount of the premises and the recoverable amount. The recoverable amount used for the measurement of the impairment loss was the net realizable value. The net realizable value is determined based on the real estate appraisal or the expected amount for sale, etc.

(4) Classification Based on Prior Year Operating Results as Provided in the JICPA Audit Committee Report No.66

Although we recorded taxable income for the six months ended September 30, 2005, we are classified as 4 described above since we have material net operating loss carryforwards. However since we believe the net operating loss carryforwards are attributable to extraordinary factors such as changes in laws and regulations, we apply the exception to classification 4. (Five years future taxable income is estimable.)

[Extraordinary Factors Such as Changes in Laws and Regulations]

Our net operating loss carryforwards were incurred due to, among other things, the followings : (i) we accelerated the final disposal of nonperforming loans in response to both the Emerging Economic Package , which provided guidance to major banks to remove from their balance sheets claims to debtors classified as likely to become bankrupt or below, and the Program for Financial Revival , which urged major banks to reduce the ratio of disclosed claims to total claims by about half; and (ii) we reduced our holdings of strategic equity investments under the Law Concerning Restriction, etc. of Banks Shareholdings etc .

(Five years future taxable income is estimable.)

[Extraordinary Factors Such as Changes in Laws and Regulations]

Our net operating loss carryforwards were incurred due to, among other things, the followings : (i) we accelerated the final disposal of nonperforming loans in response to both the Emerging Economic Package , which provided guidance to major banks to remove from their balance sheets claims to debtors classified as likely to become bankrupt or below, and the Program for Financial Revival , which urged major banks to reduce the ratio of disclosed claims to total claims by about half; and (ii) we reduced our holdings of strategic equity investments under the Law Concerning Restriction, etc. of Banks Shareholdings etc .

(4) Classification Based on Prior Year Operating Results as Provided in the JICPA Audit Committee Report No.66

Although we recorded taxable income for the six months ended September 30, 2005, we are classified as 4 described above since we have material net operating loss carryforwards. However since we believe the net operating loss carryforwards are attributable to extraordinary factors such as changes in laws and regulations, we apply the exception to classification 4. (Five years future taxable income is estimable.)

[Extraordinary Factors Such as Changes in Laws and Regulations]

Our net operating loss carryforwards were incurred due to, among other things, the followings : (i) we accelerated the final disposal of nonperforming loans in response to both the Emerging Economic Package , which provided guidance to major banks to remove from their balance sheets claims to debtors classified as likely to become bankrupt or below, and the Program for Financial Revival , which urged major banks to reduce the ratio of disclosed claims to total claims by about half; and (ii) we reduced our holdings of strategic equity investments under the Law Concerning Restriction, etc. of Banks Shareholdings etc .

(4) Classification Based on Prior Year Operating Results as Provided in the JICPA Audit Committee Report No.66

Since we have material net operating loss carryforwards as of September 30, 2005, we are classified as 4 described above. However since we believe the net operating loss carryforwards are attributable to extraordinary factors such as changes in laws and regulations or restructuring of business, we apply the exception to classification 4. (Five years future taxable income is estimable.)

[Extraordinary Factors Such as Changes in Laws and Regulations or Restructuring of Business]

Our net operating loss carryforwards were incurred due to, among other things, the followings : (i) we accelerated the final disposal of nonperforming loans in response to both the Emerging Economic Package , which provided guidance to major banks to remove from their balance sheets claims to debtors classified as likely to become bankrupt or below, and the Program for Financial Revival , which urged major banks to reduce the ratio of disclosed claims to total claims by about half; (ii) we reduced our holdings of strategic equity investments under the Law Concerning Restriction, etc. of Banks Shareholdings etc ; and (iii) we restructured the business due to the merger with The Mitsubishi Trust and Banking Corporation.
