Number of shares of Common Stock outstanding as of October 30, 2009: 112,270,330

DOCUMENTS INCORPORATED BY REFERENCE

List hereunder the following documents incorporated by reference and the Part of Form 10-K into which the document is incorporated:

(1) Portions of the Registrant's Annual Report to Stockholders for the fiscal year ended September 30, 2009, are incorporated into Part II, Items 5-8 and Part III, Item 12 of this Form 10-K.

(2) Portions of the Registrant's definitive proxy statement for its Annual Meeting of Stockholders to be held on January 20, 2010 are incorporated into Part III, Items 10-14 of this Form 10-K.

PART I

In addition to historical information, this Annual Report on Form 10-K includes certain forward-looking statements, as defined in the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended, based on current management expectations. Actual results could differ materially from those management expects. Such forward-looking statements include statements regarding Washington Federal's intentions, beliefs or current expectations as well as the assumptions on which such statements are based. Stockholders and potential stockholders are cautioned that any such forward-looking statements are not guarantees of future performance and involve risks and uncertainties, and that actual results may differ materially from those contemplated by such forward-looking statements. Factors that could cause future results to vary from current management expectations include, but are not limited to: general economic conditions; legislative and regulatory changes; monetary fiscal policies of the federal government; changes in tax policies; rates and regulations of federal, state and local tax authorities; changes in interest rates; deposit flows; cost of funds; demand for loan products; demand for financial services; competition; changes in the quality or composition of the Company's loan and investment portfolios; changes in accounting principles; policies or guidelines and other economic, competitive, governmental and technological factors affecting Washington Federal's operations, markets, products services and fees. Washington Federal undertakes no obligation to update or revise any forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or changes to future operating results over time.

Item 1. Business
General

Washington Federal, Inc., formed in November 1994, is a Washington corporation headquartered in Seattle, Washington. The Company is a non-diversified unitary savings and loan holding company within the meaning of the Home Owners' Loan Act (HOLA) that conducts its operations through a federally insured savings and loan association subsidiary, Washington Federal Savings. As used throughout this report, the terms "Washington Federal" or the "Company" refer to Washington Federal, Inc. and its consolidated subsidiaries.

The Company, doing business as Washington Federal Savings, is a federally-chartered savings and loan association that began operations in Washington as a state-chartered mutual company in 1917. In 1935, the Company converted to a federal charter and became a member of the Federal Home Loan Bank (FHLB) system. On November 9, 1982, Washington Federal Savings converted from a federal mutual to a federal capital stock company.

The Company's fiscal year end is September 30th. All references to 2009, 2008 and 2007 represent balances as of September 30, 2009, September 30, 2008 and September 30, 2007, or activity for the fiscal years then ended, respectively.

The business of Washington Federal consists primarily of attracting deposits from the general public and investing these funds in loans of various types, including first lien mortgages on single-family dwellings, construction loans, land acquisition and development loans, loans on multi-family and other income producing properties, home equity loans and business loans. It also invests in certain United States government and agency obligations and other investments permitted by applicable laws and regulations. Washington Federal has 150 full service branches located in Washington, Oregon, Idaho, Arizona, Utah, Nevada, New Mexico and Texas. Through its subsidiaries, the Company is engaged in real estate investment and insurance brokerage activities.

The principal sources of funds for the Company's activities are retained earnings, loan repayments (including prepayments), net deposit inflows, repayments and sales of investments and borrowings. Washington Federal's principal sources of revenue are interest on loans, interest and dividends on investments. Its principal expenses are interest paid on deposits, credit costs, general and administrative expenses, interest on borrowings and income taxes.

The Company's growth has been generated both internally and as a result of 14 mergers and four assumptions of deposits completed in the Company's history. In February 2008, the Company completed its acquisition of First Mutual Bancshares, Inc. First Mutual Bancshares was the holding company for First Mutual Bank, a Washington-chartered savings bank, headquartered in Bellevue, Washington.

The Company is subject to extensive regulation, supervision and examination by the Office of Thrift Supervision (OTS), as its chartering authority and primary federal regulator, and by the Federal Deposit Insurance Corporation (FDIC), which insures its deposits up to applicable limits. Such regulation and supervision establishes a comprehensive framework of activities in which an institution may engage and is intended primarily for the protection of the deposits and the Deposit Insurance Fund (DIF) administered by the FDIC. The regulatory structure also gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement activities. Any change in such regulation, whether by the OTS, the FDIC or the U.S. Congress, could have a significant impact on the Company and its operations. See Regulation.

Edgar Filing: WASHINGTON FEDERAL INC - Form 10-K

The average balance of loans includes nonaccruing loans, interest on which is recognized on a cash basis. It also includes net accretion of deferred loan fees and costs of \$18.1 million, \$12.7 million and \$11.5 million for years 2007, 2008 and 2009, respectively.

- (2) Includes cash equivalents and repurchase agreements.
- (3) Net interest income divided by average interest-earning assets.

Lending Activities

General. The Company's net portfolio of loans totaled \$9.0 billion at September 30, 2009, representing approximately 71% of its total assets. The Company concentrates its lending activities on the origination of conventional mortgage loans, which are loans that are neither insured nor guaranteed by agencies of the United States government.

Edgar Filing: WASHINGTON FEDERAL INC - Form 10-K

Washington Federal's lending activity is concentrated on the origination of loans secured by real estate, including long-term fixed-rate mortgage loans, adjustable-rate construction loans, adjustable-rate land development loans and fixed-rate multi-family loans.

Edgar Filing: WASHINGTON FEDERAL INC - Form 10-K

The following table sets forth the composition of the Company's gross loan portfolio, by loan type, as of September 30 for the years indicated.

Loans maturing after one year:				
Adjustable-rate	\$ 920,024			
Fixed-rate	7,488,793			
Total	\$ 8,408,817			

The original contractual loan payment period for residential mortgage loans originated by the Company normally ranges from 15 to 30 years. Experience during recent years has indicated that, because of prepayments in connection with refinancing and sales of property, residential loans remain outstanding an average of less than eight and one half years.

Lending Programs and Policies. The Company's principal lending activity is the origination of real estate mortgage loans to purchase or refinance single-family residences. The Company also originates a significant number of construction and land development loans, along with multi-family residential and commercial loans. At September 30, 2009, single-family residential loans totaled \$6.8 billion, or 72.3% of the Company's gross loan portfolio; construction-speculative loans totaled \$267 million, or 2.8% of the Company's gross loan portfolio; construction custom loans totaled \$259 million, or 2.8% of the Company's gross loan portfolio; land acquisition and development loans totaled \$519 million, or 5.5% of the Company's gross loan portfolio; land - consumer lot loans totaled \$196 million, or 2.1% of the Company's gross loan portfolio; multi-family loans totaled \$705 million, or 7.5% of the Company's gross loan portfolio; commercial real estate loans totaled \$294 million, or 3.1% of the Company's gross loan portfolio; commercial and industrial loans totaled \$119 million, or 1.3% of the Company's gross loan portfolio; HELOC loans totaled \$122 million, or 1.3% of the Company's gross loan portfolio and consumer loans totaled \$120 million, or 1.3% of the Company's gross loan portfolio.

Single-family residential loans. The Company primarily originates 30 year fixed-rate loans secured by single-family residences. Generally, these loans are made on terms, conditions and documentation that permit sale in the secondary market. Moreover, it is the Company's general policy to include in the documentation evidencing its conventional mortgage loans a due-on-sale clause, which facilitates adjustment of interest rates on such loans when the property securing the loan is sold or transferred.

All of the Company's mortgage lending is subject to written, nondiscriminatory underwriting standards, loan origination procedures and lending policies prescribed by the Company's Board of Directors. Property valuations are required on all real estate loans. Appraisals are prepared by independent appraisers approved by the Company's management, and reviewed by the Company's staff. Property evaluations are sometimes utilized in lieu of an appraisal on single-family real estate loans of \$250,000 or less and are prepared by the Company's staff. Detailed loan applications are obtained to

determine the borrower's ability to repay and the more significant items on these applications are verified through the use of credit reports, financial statements or written confirmations. Depending on the size of the loan involved, a varying number of officers of the Company must approve the application before the loan can be granted.

Federal guidelines limit the amount of a real estate loan made by a federally-chartered savings institution, such as Washington Federal Savings, to a specified percentage of the value of the property securing the loan as determined by an evaluation at the time the loan is originated, referred to as the loan-to-value ratio. The guidelines provide that at the time of origination a real estate loan may not exceed 100% of the value of the security property. Maximum loan-to-value ratios for each type of real estate loan are established by the Company's Board of Directors. When establishing general reserves for loans with loan-to-value ratios exceeding 80% that are not insured by private mortgage insurance, Washington Federal considers the additional risk inherent with these products, as well as their relative loan loss experience, and provides reserves when deemed appropriate. The total balance for loans with loan-to-value ratios exceeding 80% at September 30, 2009, was \$556 million, with allocated reserves of \$2.8 million.

Construction loans. The Company originates construction loans to finance construction of single-family and multi-family residences as well as commercial properties. These loans to builders are generally indexed to the Prime rate and normally have maturities of two years or less. Loans made to individuals for construction of their home generally are 30 year fixed rate loans. The Company's policies provide that construction loans may be made for 80% or less of the appraised value of the property upon completion for residential construction loans. As a result of activity over the past three decades, the Company believes that it is a construction lender of choice by builders of single-family residences in its market areas. Because of this history, the Company has developed a staff with in depth land development and construction experience and working relationships builders that have been selected based on their operating histories and financial stability.

Construction lending involves a higher level of risk than single-family residential lending due to the concentration of principal in a limited number of loans and borrowers, as well as the effects of general economic conditions in the homebuilding industry. Moreover, a construction loan can involve additional risks because of the inherent difficulty in estimating both a property's value at completion of the project and the estimated cost (including interest) of the project. These loans are generally more difficult to evaluate and monitor.

Land loans. The Company's land development loans are of a short-term nature and are generally made for 75% or less of the appraised value of the property. Funds are disbursed periodically at various stages of completion as authorized by the Company's personnel. The interest rate on these loans generally adjusts every 90 days in accordance with a designated index.

Land development loans involve a higher degree of credit risk than long-term financing on owner-occupied real estate. Mitigation of risk of loss on a land development loan is dependent largely upon the accuracy of the initial estimate of the property's value at completion of development compared to the estimated cost (including interest) of development and the financial strength of the borrower.

The Company's permanent land loans (also called consumer lot loans) are generally made on improved land, with the intent of building a primary or secondary residence. These loans are limited to 80% or less of the appraised value of the property, up to a maximum loan amount of \$350,000. The interest rate on permanent land loans is generally fixed for 20 years.

Multi-family residential loans. Multi-family residential (five or more dwelling units) loans generally are secured by multi-family rental properties, such as apartment buildings. In underwriting multi-family residential loans, the Company considers a number of factors, which include the projected net cash flow to the loan's debt service requirement, the age and condition of the collateral, the financial resources and income level of the borrower and the borrower's experience in owning or managing similar properties. Multi-family residential loans are originated in amounts up to 75% of the appraised value of the property securing the loan.

Loans secured by multi-family residential real estate generally involve a greater degree of credit risk than single-family residential loans and carry larger loan balances. This increased credit risk is a result of several factors, including the concentration of principal in a limited number of loans and borrowers, the effects of general economic conditions on income-producing properties, and the increased difficulty of evaluating and monitoring these types of loans. Furthermore, the repayment of loans secured by multi-family mortgages typically depends upon the successful operation of the related real estate property. If the cash flow from the project is reduced, the borrower's ability to repay the loan may be impaired. The Company seeks to minimize these risks through its underwriting policies, which require such loans to be qualified at origination on the basis of the property's income and debt service ratio. The Company generally limits its multi-family residential loans to \$5.0 million on any one loan.

It is the Company's policy to obtain title insurance ensuring that the Company has a valid first lien on the mortgaged real estate serving as collateral. Borrowers must also obtain hazard insurance prior to closing and, when required by regulation, flood insurance. Borrowers may be required to advance funds on a monthly basis, together with each payment of principal and interest, to a mortgage escrow account from which the Company makes disbursements for items such as real estate taxes, hazard insurance premiums and private mortgage insurance premiums when due.

Commercial and industrial loans. The Company generally makes various types of secured owner occupied commercial real estate and business loans to customers in its market area for the purposes of acquiring real estate, equipment or other business purposes. The terms of these loans generally range from less than one year to a maximum of ten years. The loans are either negotiated on a fixed-rate basis or carry adjustable interest rates indexed to Prime or another market rate.

Commercial credit decisions are based upon the Company's assessment of the borrower's ability and willingness to repay along with an evaluation of the liquidity and marketability of collateral. Most such loans are extended to closely held businesses and the personal guaranty of the principals are usually obtained. Non real estate commercial loans have a relatively high risk of default, compared to residential real estate loans. Pricing of commercial loans is based on the credit risk of the borrower and the adequacy of collateral, with consideration given to the overall relationship of the borrower, including deposits. The acquisition of business deposits is an important focus of this business line. The cost of funds from businesses is usually lower than the cost of funds raised through CDs in our retail branches.

Consumer loans. Through its two most recent acquisitions, the Company obtained its portfolio of \$120 million of consumer loans. These loans are primarily home improvement loans made through third party originators that bear interest rates of 10% and higher. Due to the nature of these loans the average charge off rate has been 3 to 5% per year. After extensive review of this program, the Company decided in fiscal 2008 to cease origination of consumer loans, as the risk profile did not match with the Company's long term business plan. The Company will continue to service the portfolio until the balances are repaid.

Home equity loans. The company makes revolving line of credit loans to consumers that are secured by a first or second mortgage on a single family residence. The interest rates on these loans adjust monthly indexed to Prime. Loan-to-value rates is limited to 75%. Terms are a ten year draw period followed by a fifteen year amortization period

Origination and Purchase of Loans. The Company has general authority to lend anywhere in the United States; however, the primary lending areas are within the states of Washington, Oregon, Idaho, Arizona, Utah, Nevada, New Mexico and Texas.

Loan originations come from a number of sources. Residential loan originations result from referrals from real estate brokers, walk-in customers, purchasers of property in connection with builder projects financed by the Company, mortgage brokers and refinancings for existing customers. Construction loan originations are obtained primarily by direct solicitation of builders and continued business from builders who have previously borrowed from the Company.

The Company also purchases loans and mortgage-backed securities when lending rates and mortgage volume for new loan originations in its market area do not fulfill its needs. The table below shows total loan origination, purchase and repayment activities of the Company for the years indicated.

	2005	2006	2007 (In thousands)	2008	2009

(1) Includes undisbursed loan in process and does not include savings account loans, which were not material during the periods indicated.

(2) Includes loans acquired through acquisitions and whole loan purchases.

Interest Rates, Loan Fees and Service Charges. Interest rates charged by the Company on mortgage loans are primarily determined by the competitive loan rates offered in its lending areas and in the secondary market. Mortgage loan rates reflect factors such as general interest rates, the supply of money available to the savings and loan industry and the demand for such loans. These factors are in turn affected by general economic conditions, the regulatory programs and policies of federal and state agencies, changes in tax laws and governmental budgetary programs.

The Company receives fees for originating loans in addition to various fees and charges related to existing loans, which may include prepayment charges, late charges and assumption fees.

In making one-to-four family home mortgage loans, the Company does not normally charge a commitment fee. As part of the loan application, the borrower pays the Company for out-of-pocket costs, such as the appraisal fee, in reviewing the application, whether or not the borrower closes the loan. The interest rate charged is normally the prevailing rate at the time the loan application is approved. In the case of construction loans, the Company normally charges an origination fee. Loan origination fees and other terms of multi-family residential loans are individually negotiated.

Nonperforming Assets. When a borrower fails to make a required payment on a loan, the Company attempts to cure the deficiency by contacting the borrower. Contact is made after a payment is 30 days past due. In most cases, deficiencies are cured promptly. If the delinquency is not cured within 90 days, the Company may institute appropriate action to foreclose on the property. If foreclosed, the property will be sold at a public sale and may be purchased by the Company. There are circumstances under which the Company may choose to foreclose a deed of trust as mortgagee, and when this procedure is followed, certain redemption rights are involved.

Edgar Filing: WASHINGTON FEDERAL INC - Form 10-K

The company will consider modifying the interest rates and terms of a loan if it determines that a modification is a better alternative to foreclosure.

Loans are placed on nonaccrual status when, in the judgment of management, the probability of collection of interest is deemed to be insufficient to warrant further accrual. When a loan is placed on nonaccrual status, previously accrued but unpaid interest is deducted from interest income. The Company does not accrue interest on loans 90 days past due or more. See Note A to the Consolidated Financial Statements included in Item 8 hereof.

Real estate acquired by foreclosure or deed-in-lieu thereof (REO or Real Estate Owned) is either classified as real estate held for sale until it is sold or transferred to Real Estate Held for Investment(REHI). When property is acquired, it is recorded at the lower of carrying cost or fair value at the date of acquisition, and any writedown resulting therefrom is charged to the allowance for loan losses. Interest accrual ceases on the date of acquisition and all costs incurred in maintaining the property from that date forward are expensed as incurred. Costs incurred for the improvement or development of such property are capitalized. See Note A to the Consolidated Financial Statements included in Item 8 hereof.

The following table sets forth information regarding restructured and nonaccrual loans and REO held by the Company at the dates indicated.

	2005	2006	2007 (In thousands)	2008	2009
Restructured loans (1)	\$ 573	\$	\$ 250	\$ 6,210	\$ 136,894

Total nonperforming assets and restructured loans	\$ 7,917	\$ 7,660	\$ 16,181	\$ 170,401	\$ 694,014
Total nonperforming assets and restructured loans as a percent of total assets	0.09%	0.08%	0.16%	1.44%	5.52%

(1) Performing in accordance with restructured terms.

(2) The Company recognized interest income on nonaccrual loans of approximately \$326,000 in 2009. Had these loans performed according to their original contract terms, the Company would have recognized interest income of approximately \$13,099,000 in 2009.

In addition to the nonaccrual loans reflected in the above table, at September 30, 2009, the Company had \$305.9 million of loans that were less than 90 days delinquent but which were classified as substandard for one or more reasons. If these loans were deemed nonperforming, the Company's ratio of total nonperforming assets and restructured loans as a percent of total assets would have been 7.95% at September 30, 2009. For a discussion of the Company's policy for placing loans on nonaccrual status, see Note A to the Consolidated Financial Statements included in Item 8 hereof.

(3) Total REO includes real estate held for sale acquired in settlement of loans or acquired from purchased institutions in settlement of loans.

(4) Total REHI includes real estate held for investment acquired in settlement of loans.

(1) Represents the total amount of the loan category as a % of total loans outstanding.

The Company maintains an allowance for loan losses to absorb losses inherent in the loan portfolio. The allowance is based on ongoing, quarterly assessments of the probable and estimable losses inherent in the loan portfolio. The Company's methodology for assessing the appropriateness of the allowance consists of two components, which include the general allowance and specific allowance. As part of the process for determining the adequacy of the allowance for loan losses, management reviews the loan portfolio for specific weaknesses.

The general loan loss allowance is established by applying a loss percentage factor to the different loan types. The allowance is based on management's continuing evaluation of the pertinent factors underlying the quality of the loan portfolio, including changes in the size and composition of the loan portfolio, actual loan loss experience, current economic conditions, geographic concentrations, seasoning of the loan portfolio, specific industry conditions, and the duration of the current business cycle. The recovery of the carrying value of loans is susceptible to future market conditions beyond the Company's control, which may result in losses or recoveries differing from those provided. A portion of the allowance is then allocated to reflect the estimated loss exposure. Residential real estate loans are not individually analyzed for impairment and loss exposure because of the significant number of loans, their relatively small balances and their historically low level of losses. In determining the adequacy of reserves, management considers the above mentioned factors.

Specific allowances are established in cases where management has identified conditions or circumstances related to a loan that management believes indicate the probability that a loss has been incurred.

Investment Activities

As a federally-chartered savings institution, Washington Federal Savings is obligated to maintain adequate liquidity and does so by investing in securities. These investments may include, among other things, certain certificates of deposit, repurchase agreements, bankers' acceptances, loans to financial institutions whose deposits are federally-insured, federal funds, United States government and agency obligations and mortgage-backed securities.

The following table sets forth the composition of the Company's investment portfolio at the dates indicated.

September 30,	2007		2008		2009	
	Amortized Cost	Fair Value	Amortized Cost (In thousands)	Fair Value	Amortized Cost	Fair Value
U.S. government and agency obligations	\$ 236,352	\$ 232,285	\$ 37,253	\$ 41,231	\$ 9,800	\$ 13,824
State and political subdivisions	8,107	8,646	7,770	8,306	7,435	7,980
Agency mortgage-backed securities	1,430,208	1,409,881	1,551,674	1,549,878	2,200,834	2,286,542
	\$ 1,674,667	\$ 1,650,812	\$ 1,596,697	\$ 1,599,415	\$ 2,218,069	\$ 2,308,346

The investment portfolio at September 30, 2009 was categorized by maturity as follows:

	Amortized Cost (In thousands)	Wtd Avg Yield
Due in less than one year	\$ 500	4.00%
Due after one year through five years	1,140	8.77
Due after five years through 10 years	9,300	10.38
Due after 10 years	2,207,129	5.76
	\$ 2,218,069	5.78%

Sources of Funds

General. Deposits are the primary source of the Company's funds for use in lending and other general business purposes. In addition to deposits, Washington Federal derives funds from loan repayments, advances from the FHLB and other borrowings and, to a lesser extent, from investment repayments and sales. Loan repayments are a relatively stable source of funds, while deposit inflows and outflows are significantly influenced by general interest rates and money market conditions. Borrowings may be used on a short-term basis to compensate for reductions in normal sources of funds, such as deposit inflows at less than projected levels. Borrowings may also be used on a longer-term basis to support expanded activities.

Deposits. The Company chooses to rely on term certificate accounts and other deposit alternatives that have no fixed term and pay interest rates that are more responsive to market interest rates than passbook accounts. This greater variety of deposits allows the Company to be more competitive in obtaining funds and to more effectively manage its liabilities.

Certificates with a maturity of one year or less have penalties for premature withdrawal equal to 90 days of interest. When the maturity is greater than one year but less than four years, the penalty is 180 days of interest. When the maturity is greater than 4 years, the penalty is 365 days interest. Early withdrawal penalties during 2007, 2008 and 2009 amounted to approximately \$1,005,000, \$859,000 and \$700,000, respectively.

The Company offers two checking account products; the accounts pay interest on monthly average balances over \$1,000 and \$10,000 respectively.

Edgar Filing: WASHINGTON FEDERAL INC - Form 10-K

The Company's deposits are obtained primarily from residents of Washington, Oregon, Idaho, Arizona, Utah, Nevada, New Mexico and Texas. The Company does not advertise for deposits outside of these states.

The following table sets forth certain information relating to the Company's savings deposits at the dates indicated.

	2007		September 30, 2008		2009	
	Amount	Rate	Amount	Rate	Amount	Rate

Historically, a significant number of certificate holders roll over their balances into new certificates of the same term at the Company's then current rate. To ensure a continuity of this trend, the Company expects to continue to offer market rates of interest. Its ability to retain maturing deposits in certificate accounts is difficult to project; however, the Company is confident that by competitively pricing these certificates, levels deemed appropriate by management can be achieved on a continuing basis.

At September 30, 2009, the Company had \$2.1 billion of certificates of deposit in amounts of \$100,000 or more outstanding, maturing as follows: \$1.1 billion within 3 months; \$344 million over 3 months through 6 months; \$311 million over 6 months through 12 months; and \$414 million thereafter.

The following table sets forth the customer account and customer repurchase activities of the Company for the years indicated.

	2007	September 30, 2008 (In thousands)	2009
Deposits	\$ 2,617,541	\$ 8,846,229	\$ 9,900,370
Acquired Deposits	379,090	744,182	
Withdrawals	(2,555,597)	(8,677,426)	(9,419,034)
Net increase in deposits before interest credited	441,034	912,985	481,336
Interest credited	244,025	259,769	191,435
Net increase in customer accounts	\$ 685,059	\$ 1,172,754	\$ 672,771

Borrowings. The Company obtains advances from the FHLB upon the security of the FHLB capital stock it owns and certain of its home mortgages, provided certain standards related to credit worthiness have been met. See Regulation Washington Federal Savings Federal Home Loan Bank System below. Such advances are made pursuant to several different credit programs. Each credit program has its own interest rate and range of maturities, and the FHLB prescribes acceptable uses to which the advances pursuant to each program may be put, as well as limitations on the size of such advances. Depending on the program, such limitations are based either on a fixed percentage of assets or the Company's creditworthiness. The FHLB is required to review its credit limitations and standards at least annually. FHLB advances have, from time to time, been available to meet seasonal and other withdrawals of savings accounts and to expand Washington Federal's lending program. The Company had \$2.1 billion of FHLB advances outstanding at September 30, 2009.

The Company also uses reverse repurchase agreements as a form of borrowing. Under reverse repurchase agreements, the Company sells an investment security to a dealer for a period of time and agrees to buy back that security at the end of the period and pay the dealer a stated interest rate for the use of the dealer's funds. The amount of securities sold under such agreements depends on many factors, including the terms available for such transactions, the perceived ability to apply the proceeds to investments yielding a higher return, the demand for the securities and management's perception of trends in interest rates. The Company had \$800 million of securities sold under such agreements at September 30, 2009. See Note I to the Consolidated Financial Statements included in Item 8 hereof for additional information.

The Company may need to borrow funds for short periods of time to meet day-to-day financing needs. In these instances, funds are borrowed from other financial institutions for periods generally ranging from 1 to 7 days at the then current borrowing rate. At September 30, 2009, the Company had only \$600,000 of such short-term borrowings.

The Company also offers two forms of repurchase agreements to its customers. One form has an interest rate that floats like a money market deposit account. The other form has a fixed rate and is offered in a minimum denomination of \$100,000. Both forms are fully collateralized by securities. These obligations are not insured by FDIC and are classified as borrowings for regulatory purposes. The Company had \$55.8 million of such agreements outstanding at September 30, 2009.

The following table presents certain information regarding borrowings of Washington Federal for the years indicated.

	2007	September 30, 2008 (In thousands)	2009
Federal funds and securities sold to dealers under agreements to repurchase:			
Average balance outstanding	\$ 873,692	\$ 1,100,354	\$ 991,989
Maximum amount outstanding at any month-end during the period	1,175,000	1,275,000	1,040,600

Dividend payout ratio (3)	53.90	118.31	43.48

(1) Net income divided by average total assets.

(2) Net income divided by average equity.

(3) Dividends declared per share divided by net income per share.

Rate/Volume Analysis

The table below sets forth certain information regarding changes in interest income and interest expense of the Company for the years indicated. For each category of interest-earning asset and interest-bearing liability, information is provided on changes attributable to: (1) changes in volume (changes in volume multiplied by old rate) and (2) changes in rate (changes in rate multiplied by old average volume). The change in interest income and interest expense attributable to changes in both volume and rate has been allocated proportionately to the change due to volume and the change due to rate.

(1) Includes interest on cash equivalents and dividends on stock of the FHLB of Seattle.

Interest Rate Risk

The Company accepts a high level of interest rate volatility as a result of its policy to originate fixed-rate single-family home loans that are longer-term in nature than the short-term characteristics of its liabilities of customer accounts and borrowed money. The strong capital position and low operating costs have allowed the Company to manage interest rate risk, within guidelines established by the Board of Directors, through all interest rate cycles. A significant increase in market interest rates could adversely affect net interest income of the Company. The Company's interest rate risk approach has never resulted in the recording of a monthly operating loss.

The following table shows the estimated repricing periods for earning assets and paying liabilities.

	Within One Year	Repricing Period After 1 year - before 4 Years	Thereafter	Total
(In thousands)				
As of 9/30/09				
Earning Assets *	\$ 2,929,902	\$ 4,247,528	\$ 4,753,808	\$ 11,931,238
Paying Liabilities	(7,068,190)	(3,652,513)	(1,137)	(10,721,840)
Excess (Liabilities) Assets	\$ (4,138,288)	\$ 595,015	\$ 4,752,671	
Excess as % of Total Assets	-32.9%			
Policy limit for one year excess	-60.0%			

* Asset repricing period includes estimated prepayments based on historical activity

At September 30, 2009, the Company had approximately \$4.1 billion more liabilities subject to repricing in the next year than assets, which amounted to a negative maturity gap of 33% of total assets. As of September 30, 2008, the amount of excess liabilities subject to repricing within one year was approximately \$4.0 billion or 34% of total assets. The increase of approximately \$150 million of liabilities in excess of assets repricing within one year was due to continued growth of long term assets, primarily 30 year mortgage backed securities, funded primarily through growth of short term customer deposits. Although the absolute dollar amount of the one year gap increased by approximately \$150 million, the negative maturity gap percentage actually decreased by 1%, due to the growth in the balance sheet. By having an excess of liabilities repricing within one year over assets, the Company is subject to decreasing net interest income should interest rates rise. However, if the size and/or mix of the balance sheet changes, rising rates may not cause a decrease in net interest income. The Company's interest rate risk approach has never resulted in the recording of a monthly operating loss.

The following table shows the potential impact of rising interest rates on net income for one year. We focus primarily on the impact of rising rates, given our negative gap position implies that generally when rates fall income should increase and when rates increase income is at risk to decrease (assuming no change in the size or composition of the balance sheet).

Potential Impact of Rising Rates on Net Income

Basis Point Increase	As of 9/30/09 (in thousands)	As of 9/30/08
100	(13,398)	(12,915)
200	(26,795)	(25,830)
300	(40,193)	(38,745)

The analysis presented assumes zero balance sheet growth and constant percentage composition of assets and liabilities. Actual results will differ from the assumptions used in this model, as Management adjusts both the size and composition of the balance sheet to respond to changing interest rates.

As of September 30, 2009 and 2008, the Company was in compliance with all of its interest rate risk guidelines.

Subsidiaries

Washington Federal, is a unitary thrift holding company that conducts its primary business through its only subsidiary, Washington Federal Savings. Washington Federal Savings has three active wholly owned subsidiaries which are discussed further below.

Washington Federal Savings is permitted by current federal regulations to invest an amount up to 2% of its assets in stock, paid-in surplus and unsecured loans in service corporations. Washington Federal Savings may invest an additional 1% of its assets when the additional funds are utilized for inner-city or community development purposes. In addition, federally-chartered savings institutions that are in compliance with regulatory capital requirements and other conditions may make loans to service corporations in an aggregate amount of up to 50% of the institution's capital as defined in federal regulations.

At September 30, 2009, Washington Federal Savings was authorized under the current regulations to have a maximum investment of \$251.6 million in its service corporations, exclusive of the additional 1% of investment assets permitted for inner-city or community development purposes but inclusive of the ability to make loans to its subsidiaries. On September 30, 2009, Washington Federal Savings' investment in, and unsecured loans to, its wholly owned service corporations amounted to \$57.3 million.

Washington Services, Inc., a wholly owned subsidiary of Washington Federal Savings, is continuing its investment in developable land zoned light industrial in the technology corridor of South Snohomish County, Washington. Based upon the sales history of this development, the Company believes the net realizable value from the sale of the remaining properties exceeds the subsidiary's basis in these properties.

First Insurance Agency, Inc., a wholly owned subsidiary of Washington Federal Savings, is an insurance agency that offers a full line of individual and business insurance products to customers of the Company, as well as to others.

Statewide Mortgage Services, Inc., a wholly owned subsidiary of Washington Federal Savings, is incorporated under the laws of the state of Washington for the purpose holding and marketing real estate held for sale (REHI). As of September 30, 2009, Statewide Mortgage Services held \$56,758,000 of REHI.

First Mutual Sales Finance, Inc., a wholly owned subsidiary of Washington Federal Savings, is incorporated under the laws of the state of Delaware for the purpose of originating and servicing consumer loans.

A savings institution is required to deduct the amount of the investment in, and extensions of credit to, a subsidiary engaged in any activities not permissible for national banks. Because the acquisition and development of real estate is not a permissible activity for national banks, the investments in, and loans to, the subsidiary of the institution which is engaged in such activities are subject to exclusion from the capital calculation. See Regulation Washington Federal Savings Regulatory Capital Requirements below.

Employees

As of September 30, 2009, the Company had approximately 1,105 employees, including the full-time equivalent of 47 part-time employees and its service corporation employees. None of these employees are represented by a collective bargaining agreement, and the Company has enjoyed harmonious relations with its personnel.

Regulation

Set forth below is a brief description of certain laws and regulations that relate to the regulation of the Company and Washington Federal Savings. The description of these laws and regulations, as well as descriptions of laws and regulations contained elsewhere herein, does not purport to be complete and is qualified in its entirety by reference to applicable laws and regulations. Certain federal banking laws have been recently amended. See Regulation The Company Financial Modernization below.

The Company

General. The Company is registered as a savings and loan holding company under the HOLA and is subject to OTS regulation, examination, supervision and reporting requirements.

Activities Restrictions. Under current federal law, no company may acquire control of a savings and loan holding company after May 4, 1999, unless the company is engaged only in activities traditionally permitted to a multiple savings and loan holding company or newly permitted to a financial holding company under Section 4(k) of the Bank Holding Company Act. Existing savings and loan holding companies, and those formed pursuant to an application filed with the OTS before May 4, 1999, may engage in any activity, including non-financial or commercial activities, provided such companies control only one savings and loan association that meets the Qualified Thrift Lender (QTL) test. Corporate reorganizations are permitted, but the transfer of grandfathered unitary thrift holding company status through acquisition is not permitted. The Company has grandfathered unitary thrift holding company status.

There are generally no restrictions on the activities of a grandfathered savings and loan holding company that holds only one subsidiary savings institution; however, if the savings institution subsidiary of such a holding company fails to meet a QTL test, then such unitary holding company also shall become subject to the activities restrictions applicable to multiple savings and loan holding companies and, unless the savings institution requalifies as a QTL within one year thereafter, shall register as, and become subject to the restrictions applicable to, a bank holding company. See Washington Federal Savings Qualified Thrift Lender Test below.

If the Company were to acquire control of another savings institution, other than through a merger or other business combination with Washington Federal Savings, the Company would thereupon become a multiple savings and loan holding company. Except where such acquisition is pursuant to regulatory authority to approve emergency thrift acquisitions, and where each subsidiary savings institution meets the QTL test, the activities of the Company and any of its subsidiaries (other than the Washington Federal Savings or other subsidiary savings institutions) would thereafter be subject to further restrictions. After becoming a multiple savings and loan holding company, or subsidiary thereof, that is not a savings institution may commence or continue a business activity, without prior notice to and with no objection by the OTS, other than: (i) furnishing or performing management services for a subsidiary savings institution; (ii) conducting an insurance agency or escrow business; (iii) holding, managing or liquidating assets owned by or acquired from a subsidiary savings institution; (iv) holding or managing properties used or occupied by a subsidiary savings institution; (v) acting as trustee under deeds of trust; (vi) performing activities authorized by regulation as of March 5, 1987, to be engaged in by multiple savings and loan holding companies; or (vii) unless the Director of the OTS by regulation prohibits or limits such activities for savings and loan holding companies, those activities authorized by the Federal Reserve Board as permissible for bank holding companies. Those activities described in (vii) above also must be approved by the Director of the OTS prior to being engaged in by a multiple savings and loan holding company.

Restrictions on Acquisitions. Except under limited circumstances, savings and loan holding companies are prohibited from acquiring, without prior approval of the Director of the OTS: (i) control of any other savings institution or savings and loan holding company, or substantially all the assets thereof, or (ii) more than 5% of the voting shares of a savings institution or holding company thereof that is not a subsidiary. Except with the prior approval of the Director of the OTS, no director or officer of a savings and loan holding company, or person owning or controlling by proxy or otherwise more than 25% of such company's stock, may acquire control of any savings institution, other than a subsidiary savings institution, or of any other savings and loan holding company.

Control of Company or Bank. Under the HOLA and the Change in Bank Control Act, individuals, corporations or other entities acquiring Company equity interests may, alone or together with other investors, be deemed to control a savings and loan holding company or savings institution. If deemed to control the holding company or institution, such person or group will be required to obtain OTS approval to acquire ownership interests in the company or institution and could be subject to certain ongoing reporting procedures and restrictions under federal laws and regulations as a control person or savings and loan holding company. Ownership of more than 10% of the voting equity or 25% or more of the total equity of a savings and loan holding company or savings institution may be deemed to constitute control, subject to rebuttal of that control presumption. Rebuttable control may also be found if certain other facts and indicia of control are present. Individuals, corporations or other entities deemed in rebuttable control may rebut such presumption with the OTS by entering into a rebuttal of control agreement, which places restrictions on the ability for such an individual, corporation or other entity to exercise any influence or control over the savings and loan holding company or savings institution.

Washington Federal Savings

General. Washington Federal Savings is a federally-chartered savings association, the deposits of which are federally insured and backed by the full faith and credit of the United States government. Accordingly, Washington Federal Savings is subject to broad federal regulation and oversight by the OTS and the FDIC extending to all aspects of its operations. Washington Federal Savings is a member of the FHLB of Seattle and is subject to certain limited regulations by the Board of Governors of the Federal Reserve System. Washington Federal Savings is a member of the FDIC and its deposits are insured up to applicable limits by the FDIC. As a result, the FDIC has certain regulatory and examination authority over Washington Federal Savings.

Federal Savings Institution Regulations. The OTS has extensive authority over the operations of savings institutions. As part of this authority, savings institutions are required to file periodic reports with the OTS and are subject to periodic examinations by the OTS and the FDIC. Such regulation and supervision is primarily intended for the protection of depositors and the DIF.

The investment and lending authority of Washington Federal Savings is prescribed by federal laws and regulations, and Washington Federal Savings is prohibited from engaging in any activities not permitted by such laws and regulations. In particular, many types of lending authority for federal savings associations, such as non-residential mortgage loans, are limited to a specified percentage of the institution's capital or assets. Separate from the qualified thrift lender test, the law limits a savings institution to a maximum of 20% of its total assets in commercial loans not secured by real estate; however, only 10% can be commercial loans not secured by real estate (defined as loans in excess of \$2 million), with another 10% of assets permissible in small business loans, as defined by the Small Business Administration Act. Commercial loans secured by real estate may not be held in an amount exceeding four times an institution's total risk-based capital. An institution can also hold commercial leases, in addition to the above items, up to 10% of its assets. Commercial paper, corporate bonds, and consumer loans taken together cannot exceed 35% of an institution's assets. For this purpose, however, residential mortgage loans and credit card loans are not considered consumer loans, and are both unlimited in amount. The foregoing limitations are established by statute, and cannot be waived by the OTS.

Interstate Branching. As a federal savings association, Washington Federal Savings, subject to OTS oversight and approval, is permitted by Section 5(r) of HOLA to establish branches in any State or the District of Columbia without regard to State interstate branching laws, provided that it remains in compliance with the QTL Test or a similar test under the U.S. Internal Revenue Code on a state-by-state basis.

Insurance of Deposit Accounts. Under current law, the maximum amount of federal deposit insurance coverage has been temporarily increased from \$100,000 to \$250,000 per depositor, per institution. The basic deposit insurance limit may return to \$100,000 after December 31, 2013 if not extended by Congress. Due to the significant number of bank failures and the current balance of the DIF, the Company anticipates continued increases in its FDIC premiums going forward.

Because the Company and Washington Federal Savings have enrolled in the FDIC's Transaction Account Guarantee Program for non-interest bearing deposit accounts, FDIC insurance coverage of these deposits is unlimited until June 30, 2010.

The Federal Deposit Insurance Reform Act of 2005 (Reform Act), among other things, provided for the merger of the Bank Insurance Fund with the Savings Association Insurance Fund to form the Deposit Insurance Fund and increased the coverage limit for retirement accounts to \$250,000. In addition, the Reform Act allows the FDIC to adjust the ratio of FDIC reserves to the total amount of insured deposits, within the range of 1.15% to 1.50%, depending on projected losses, economic changes and assessment ratios at the end of a calendar year. The Reform Act also required the FDIC to provide eligible insured depository institutions that were in existence on and paid deposit insurance assessments prior to December 31, 1996 with a one-time assessment credit against future premiums based on their share of the aggregate 1996 assessment base. The Bank received notification from the FDIC that its one-time assessment credit was \$1.9 million. The one-time assessment credit will expire in 2009.

The FDIC Board of Directors has established a reserve ratio target percentage of 1.25%. This means that their target balance for the reserves is 1.25% of estimated insured deposits. Due to recent bank failures, the reserve ratio is currently significantly below its target balance. On February 27, 2009, the FDIC adopted a Final Rule on Assessments, under which the quarterly initial base assessment rates increased substantially beginning in the second quarter of 2009. The FDIC then adopted a Final Rule on Special Assessment on May 22, 2009, which imposed a 5 basis point special assessment on each institution's assets minus Tier 1 capital as reported on the report of condition as of June 30, 2009 but capped the special assessment at 10 basis points times the institution's assessment base for the second quarter 2009 risk-based assessment. On

September 29, 2009, the FDIC Board of Directors adopted a notice of proposed rulemaking that would require insured depository institutions to prepay, on December 30, 2009, their estimated quarterly risk-based assessments for the fourth quarter of 2009 and for all of 2010, 2011 and 2012, along with their quarterly risk-based assessment for the third quarter of 2009. Given the continued decline in the Deposit Insurance Fund balance, the Company anticipates that the FDIC will impose additional special emergency assessments in the future that will impact the Bank's capital levels and earnings. Washington Federal Savings may be able to pass part or all of this cost on to its customers, including in the form of lower interest rates on deposits, or fees to some depositors, depending on market conditions.

In addition, all insured institutions are required to pay assessments to the FDIC at an annual Financing Corporation rate (as of the fourth quarter of 2009, 0.0102% of insured deposits) to fund interest payments on bonds issued by the Financing Corporation, an agency of the federal government established to recapitalize the predecessor to the Savings Association Insurance Fund. These assessments will continue until the Financing Corporation bonds mature in 2017 through 2019.

Regulatory Capital Requirements. Federally insured savings institutions are required to maintain minimum levels of regulatory capital. Pursuant to federal law, the OTS has established capital standards applicable to all savings institutions. These standards generally must be as stringent as the comparable capital requirements imposed on national banks. The OTS also is authorized to impose capital requirements in excess of these standards on individual institutions on a case-by-case basis.

The capital regulations create three capital requirements: a tangible capital requirement, a leverage or core capital requirement and a risk-based capital requirement. All savings institutions must have tangible capital of at least 1.5% of adjusted total assets, as defined by regulation. For purposes of this requirement, tangible capital is core capital less all intangibles other than certain purchased mortgage servicing rights.

Core capital includes common stockholders' equity, non-cumulative perpetual preferred stock and related surplus and minority interests in consolidated subsidiaries, less intangibles (unless included under certain limited conditions, but in no event exceeding 25% of core capital), plus purchased mortgage servicing rights in an amount not to exceed 50% of core capital. The current leverage or core capital requirement is at least 3.0% of adjusted total assets.

The risk-based capital standard requires savings institutions to maintain a minimum ratio of total capital to risk-weighted assets of 8.0%. Total capital consists of core capital (defined above) and supplementary capital. Supplementary capital consists of certain capital instruments that do not qualify as core capital and general valuation loan and lease loss allowances up to a maximum of 1.25% of risk-weighted assets. Supplementary capital may be used to satisfy the risk-based requirement only in an amount equal to the amount of core capital. In determining the required amount of risk-based capital, total assets, including certain off-balance-sheet items, are multiplied by a risk-weight factor based on the risks inherent in the type of assets held by an institution. The risk categories range from 0% for low-risk assets such as U.S. Treasury securities and GNMA securities to 100% for various types of loans and other assets deemed to be of higher risk. Single-family residential loans having loan-to-value ratios not exceeding 80% and meeting certain additional criteria, as well as certain multi-family residential loans, qualify for a 50% risk-weight treatment. The book value of each asset is multiplied by the risk factor applicable to the asset category, and the sum of the products of this calculation equals total risk-weighted assets.

OTS regulations impose special capitalization standards for savings institutions that own service corporations and other subsidiaries. In addition, certain exclusions from capital and assets are required when calculating total capital in addition to the adjustments for calculating core capital. These adjustments do not materially affect the regulatory capital of Washington Federal Savings.

For information regarding Washington Federal Savings' compliance with each of these three capital requirements at September 30, 2009, see Note M to the Consolidated Financial Statements included in Item 8 hereof.

Any savings institution that fails any of the capital requirements is subject to possible enforcement actions by the OTS or the FDIC. Such actions could include a capital directive, a cease and desist order, civil money penalties, the establishment of restrictions on an institution's operations and/or the appointment of a conservator or receiver. OTS capital regulations provide that such supervisory actions, through enforcement proceedings or otherwise, could require one or more of a variety of corrective actions.

Prompt Corrective Action. Under federal law, each federal banking agency has implemented a system of prompt corrective action for institutions that it regulates. Under OTS regulations, an institution shall be deemed to be: (i) well capitalized if it has total risk-based capital of 10.0% or more, a Tier 1 risk-based capital ratio of 6.0% or more, a Tier 1 leverage capital ratio of 5.0% or more and is not subject to any written agreement, order or capital directive to meet and maintain a specific capital level for any capital measure; (ii) adequately capitalized if it has a total risk-based capital ratio of

8.0% or more, a Tier 1 risk-based capital ratio of 4.0% or more, a Tier 1 leverage capital ratio of 4.0% or more (3.0% under certain circumstances) and does not meet the definition of well capitalized; (iii) undercapitalized if it has total risk-based capital ratio that is less than 8.0%, a Tier 1 risk-based capital ratio that is less than 4.0% or a Tier 1 leverage capital ratio that is less than 4.0% (3.0% under certain circumstances); (iv) significantly undercapitalized if it has total risk-based capital ratio that is less than 6.0%, a Tier 1 risk-based capital ratio that is less than 3.0% or a Tier 1 leverage capital ratio that is less than 3.0%; and (v) critically undercapitalized if it has a ratio of tangible equity to total assets that is equal to or less than 2.0%. Federal law authorizes the OTS to reclassify a well capitalized institution as adequately capitalized and may require an adequately capitalized institution or an undercapitalized institution to comply with supervisory actions as if it were in the next lower category. (The FDIC may not reclassify a significantly undercapitalized institution as critically undercapitalized). As of September 30, 2009, Washington Federal Savings exceeded the requirements of a well capitalized institution.

Qualified Thrift Lender Test. Under current legislation and applicable regulations, any savings institution is a QTL if: (i) it qualifies as a domestic building and loan association under Section 7701(a)(19) of the Internal Revenue Code (which generally requires that at least 60% of the institution's assets constitute housing-related and other qualifying assets) or (ii) at least 65% of the institution's portfolio assets (as defined) consist of certain housing and consumer-related assets on a monthly average basis in at least nine out of every 12 months. A savings institution that does not meet a QTL test set forth in the HOLA and implementing regulations must either convert to a bank charter or comply with the following restrictions on its operations: (i) the institution may not engage in any new activity or make any new investment, directly or indirectly, unless such activity or investment is permissible for a national bank; (ii) the branching powers of the institution shall be restricted to those of a national bank; (iii) the institution shall not be eligible to obtain any advances from its FHLB; and (iv) payment of dividends by the institution shall be subject to the rules regarding payment of dividends by a national bank. Upon the expiration of three years from the date the institution ceases to be a QTL, it must cease any activity, not retain any investment not permissible for a national bank and immediately repay any outstanding FHLB advances (subject to safety and soundness considerations).

At September 30, 2009, Washington Federal Savings was in compliance with the QTL test set forth in the HOLA.

Transactions with Affiliates. Under federal law, all transactions between and among a savings institution and its affiliates, which include holding companies, are subject to Sections 23A and 23B of the Federal Reserve Act and Regulation W promulgated thereunder as interpreted by the OTS. Generally, these requirements limit these transactions to a percentage of the institution's capital and require all of them to be on terms at least as favorable to the institution as transactions with non-affiliates. In addition, a savings institution may not lend to any affiliate engaged in non-banking activities not permissible for a bank holding company or acquire shares of any affiliate that is not a subsidiary. The OTS is authorized to impose additional restrictions on transactions with affiliates if necessary to protect the safety and soundness of a savings institution. The OTS regulations also set forth various reporting requirements relating to transactions with affiliates.

Extensions of credit by a savings institution to executive officers, directors and principal shareholders are subject to Section 22(h) of the Federal Reserve Act, which, among other things, generally prohibits loans to any such individual where the aggregate amount exceeds an amount equal to 15% of an institution's unimpaired capital and surplus plus an additional 10% of unimpaired capital and surplus in the case of loans that are fully secured by readily marketable collateral. Section 22(h) permits loans to directors, executive officers and principal stockholders made pursuant to a benefit or compensation program that is widely available to employees of a subject savings institution provided that no preference is given to any officer, director or principal stockholder, or related interest thereto, over any other employee. In addition, the aggregate amount of extensions of credit by a savings institution to all insiders cannot exceed the institution's unimpaired capital and surplus. Furthermore, Section 22(g) places additional restrictions on loans to executive officers.

Restrictions on Capital Distributions. OTS regulations govern capital distributions by a federal savings association, which include cash dividends, stock repurchases and other transactions charged to the capital account. A savings association must file an application for approval of a capital distribution if:

the total capital distributions for the applicable calendar year exceed the sum of the savings association's net income for that year to date plus the savings association's retained net income for the preceding two years;

the savings association would not be at least adequately capitalized following the distribution;

the distribution would violate any applicable statute, regulation, agreement or OTS-imposed condition; or

Edgar Filing: WASHINGTON FEDERAL INC - Form 10-K

the savings association is not eligible for expedited treatment of its filings.

Even if an application is not otherwise required, every savings association that is a subsidiary of a holding company, such as Washington Federal Savings, must still file a notice with the OTS at least 30 days before the Board of Directors declares a dividend or approves a capital distribution.

The OTS may disapprove a notice or application if:

the savings association would be undercapitalized following the distribution;

the proposed capital distribution raises safety and soundness concerns; or

the capital distribution would violate a prohibition contained in any statute, regulation or agreement.

In addition, the Federal Deposit Insurance Act provides that an insured depository institution, such as Washington Federal Savings, may not make any capital distribution, if after making such distribution the institution would be undercapitalized. Additionally, because the Company had participated in the Capital Purchase Program (CPP) of the United States Department of the Treasury (Treasury), it was subject to restrictions on common stock dividend payments until it exited the CPP. Effective May 27, 2009, the Company fully redeemed the Preferred Stock that it had issued to the Treasury pursuant to the CPP, thereby exiting the CPP and terminating the associated dividend restrictions.

Federal Home Loan Bank System. Washington Federal Savings is a member of the FHLB of Seattle, which is one of 12 regional FHLBs that provide funding to their members for making home mortgage loans, as well as for affordable housing and community development lending. Each FHLB serves members within its assigned region. It is funded primarily from proceeds derived from the sale of consolidated obligations of the FHLB system. It makes loans to members (i.e., advances) in accordance with policies and procedures established by the Board of Directors of the FHLB. At September 30, 2009, the Company's advances from the FHLB amounted to \$2.1 billion.

As a member, the Company is required to purchase and maintain stock in the FHLB of Seattle in an amount equal to 3.50% of FHLB advances outstanding and .75% of mortgage loans and pass-through securities. At September 30, 2009, the Company had \$144.5 million in FHLB Seattle stock, which was in compliance with this requirement.

Federal law requires the FHLB to provide funds for the resolution of troubled savings institutions and to contribute to affordable housing programs through direct loans or interest subsidies on advances targeted for community investment and low- and moderate-income housing projects. These contributions have adversely affected the level of FHLB dividends paid and could continue to do so in the future. These contributions also could have an adverse effect on the value of FHLB stock in the future.

Community Reinvestment Act and Fair Lending Laws. Savings institutions have a responsibility under the Community Reinvestment Act (CRA) and related regulations of the OTS to help meet the credit needs of their communities, including low- and moderate-income neighborhoods. In addition, the Equal Credit Opportunity Act and the Fair Housing Act (together, the Fair Lending Laws) prohibit lenders from discriminating in their lending practices on the basis of characteristics specified in those statutes. An institution's failure to comply with the provisions of the CRA could, at a minimum, result in regulatory restrictions on its activities. Failure to comply with the Fair Lending Laws could result in enforcement actions by the OTS, as well as other federal regulatory agencies and the U.S. Department of Justice.

USA Patriot Act of 2001. A major focus of governmental policy on financial institutions in recent years has been aimed at combating money laundering and terrorist financing. The USA PATRIOT Act of 2001 (the Patriot Act) substantially broadened the scope of United States anti-money laundering laws and regulations by imposing significant new compliance and due diligence obligations, creating new crimes and penalties and expanding the extra-territorial scope of United States jurisdiction. The United States Treasury Department has issued a number of regulations under the Patriot Act which apply to financial institutions such as Washington Federal Savings. These regulations impose obligations on financial institutions to maintain appropriate policies, procedures and controls to detect, prevent and report money laundering and terrorist financing and to verify the identity of their customers. Failure of a financial institution to maintain and implement adequate programs to combat money laundering and terrorist financing, or to comply satisfactorily with all relevant Patriot Act requirements, could have serious legal and reputational consequences for the institution.

Taxation

Federal Taxation. For federal and state income tax purposes, the Company reports its income and expenses on the accrual basis method of accounting and files its federal and state income tax returns on a September 30 fiscal year basis. The Company files consolidated federal and state income tax returns with its wholly-owned subsidiaries.

The Company has been examined by the Internal Revenue Service through the year ended September 30, 1990. There were no material changes made to the Company's originally reported taxable income as a result of this examination.

State Taxation. The states of Washington and Nevada do not have an income tax. A business and occupation tax based on a percentage of gross receipts is assessed against businesses in Washington state; however, interest received on loans secured by mortgages or deeds of trust on residential properties is not subject to this tax.

The state of Idaho has a corporate income tax with a statutory rate of 7.6% of apportionable income.

The state of Oregon has a corporate excise tax with a statutory rate of 6.6% of apportionable income.

The state of Utah has a corporate franchise tax with a statutory rate of 5.0% of apportionable income.

The state of Arizona has a corporate income tax with a statutory rate of 7.0% of apportionable income.

The state of Texas has a corporate franchise tax with a statutory rate of 1.0% of marginal apportionable income.

The state of New Mexico has a corporate income tax with statutory rates ranging from 4.8% to 7.6% over \$1 million of apportionable income.

Availability of Financial Data

Under the Securities Exchange Act of 1934, Washington Federal is required to file annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission (SEC). You may read and copy any document Washington Federal files with the SEC at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information about the public reference room. The SEC maintains a website at www.sec.gov that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. Washington Federal files electronically with the SEC.

Washington Federal makes available, free of charge through its website, its reports on Forms 10-K, 10-Q and 8-K, and amendments to those reports, as soon as reasonably practicable after such reports are filed with or furnished to the SEC. Additionally, the Company has adopted and posted on its website a code of ethics that applies to its senior financial officers. The Company's website also includes the charters for its audit committee and nominating committee. The address for the Company's website is www.washingtonfederal.com. The Company will provide a printed copy of any of the aforementioned documents to any requesting shareholder.

Current Risk Factors

Item 1A. Risk Factors

Ownership of the Company's common stock involves risk. Investors should carefully consider, in addition to the other information set forth herein, the following risk factors.

The current economic environment poses significant challenges for us and could adversely affect our financial condition and results of operations.

We are operating in a challenging and uncertain economic environment, including generally uncertain national and local conditions. Financial institutions continue to be affected by sharp declines in the real estate market and constrained financial markets. Dramatic declines in the housing market over the past two years, with falling home prices and increasing foreclosures and unemployment, have resulted in significant write-downs of asset values by financial institutions. Continued declines in real estate values, home sales volumes and financial stress on borrowers as a result of the uncertain economic environment will have an adverse effect on our borrowers and their customers, which could adversely affect our financial condition and results of operations. A worsening of these conditions would likely exacerbate the adverse effects on us. A further deterioration in local economic conditions in our markets could drive losses beyond that which is provided for in our allowance for loan losses. We may also face the following risks in connection with these events:

Economic conditions that negatively affect housing prices and demand, the job market and the demand for other goods and services have resulted, and may continue to cause the credit quality of the Company's loan portfolios to deteriorate, and such deterioration in credit quality has had, and could continue to have, a negative impact on the Company's business.

Market developments may affect consumer confidence levels and may cause adverse changes in payment patterns, causing increases in delinquencies and default rates on loans and other credit facilities.

The processes we use to estimate allowance for loan losses and reserves may no longer be reliable because they rely on complex judgments, including forecasts of economic conditions, which may no longer be capable of accurate estimation.

Our ability to assess the creditworthiness of our customers may be impaired if the models and approaches we use to select, manage, and underwrite our customers become less predictive of future charge-offs.

We expect to face increased regulation of our industry, and compliance with such regulation may increase our costs, limit our ability to pursue business opportunities and increase compliance challenges.

As these conditions or similar ones continue to exist or worsen, we could experience continuing or increased adverse effects on our financial condition.

The effects of the current economic recession have been particularly severe in our primary market areas.

Substantially all of our loans are to individuals, businesses and real estate developers in the Pacific Northwest, Arizona, Utah and Nevada and our business depends significantly on general economic conditions in these market areas. The Pacific Northwest has one of the nation's highest unemployment rates and major employers in Oregon and Washington have recently implemented substantial employee layoffs or scaled back growth plans. Severe declines in housing prices and property values have been particularly acute in our primary market areas. A further deterioration in economic conditions or a prolonged delay in economic recovery in our primary market areas could result in the following consequences, any of which could have a material adverse effect on our business:

Loan delinquencies may increase;

Problem assets and foreclosures may increase;

Demand for our products and services may decline;

Collateral for loans made by us, especially real estate, may decline in value, in turn reducing a customer's borrowing power, and reducing the value of assets and collateral associated with our loans; and

Investments in mortgage-backed securities may decline in value as a result of performance of the underlying loans or the diminution of the value of the underlying real estate collateral.

The Company's business is subject to interest rate risk and changes in market interest rates may negatively affect its results of operations and financial condition. Management is unable to predict fluctuations of market interest rates, which are affected by many factors, including:

Our primary source of income is net interest income, which is the difference between the interest income generated by our interest-earning assets (consisting primarily of single-family residential loans) and the interest expense generated by our interest-bearing liabilities (consisting primarily of deposits).

The level of net interest income is primarily a function of the average balance of our interest-earning assets, the average balance of our interest-bearing liabilities, and the spread between the yield on such assets and the cost of such liabilities. These factors are influenced by both the pricing and mix of our interest-earning assets and our interest-bearing liabilities which, in turn, are impacted by such external factors as the local economy, competition for loans and deposits, the monetary policy of the Federal Open Market Committee of the Federal Reserve Board of

Edgar Filing: WASHINGTON FEDERAL INC - Form 10-K

Governors (the FOMC), and market interest rates.

The cost of our deposits is largely based on short-term interest rates, the level of which is driven by the FOMC. However, the yields generated by our loans and securities are typically driven by long term (30-year) interest rates, which are set by the market and generally vary from day to day. The level of net interest income is therefore influenced by movements in such interest rates, the pace at which such movements occur, and the volume and mix of our interest-bearing assets and liabilities. If the interest rates on our interest-bearing liabilities increase at a faster pace than the interest rates on our interest-earning assets, the result could be a reduction in net interest income and with it, a reduction in our earnings. Our net interest income and earnings would be similarly impacted were the interest rates on our interest-earning assets to decline more quickly than the interest rates on our interest-bearing liabilities.

In addition, such changes in interest rates could affect our ability to originate loans and attract and retain deposits; the fair values of our securities and other financial assets; the fair values of our liabilities; and the average lives of our loan and securities portfolios.

Decreases in interest rates could lead to increased loan refinancing activity which, in turn, would alter the balance of our interest-earning assets and impact net interest income.

We are unable to predict fluctuations of market interest rates, which are affected by many factors, including:

Inflation;

Recession;

Unemployment;

Monetary policy;

Domestic and international disorder and instability in domestic and foreign financial markets; and

Investor and consumer demand.

The matching of assets and liabilities may be analyzed by examining the extent to which such assets and liabilities are interest rate sensitive and by monitoring a bank's interest rate sensitivity gap. An asset or liability is said to be interest rate sensitive within a specific time frame if it will mature or reprice within that period of time. The interest rate sensitivity gap is defined as the difference between the amount of interest-earning assets estimated to mature or reprice within a specific time frame and the amount of interest-bearing liabilities estimated to mature or reprice within that same period of time. In a rising interest rate environment, an institution with a negative gap would generally be expected, absent the effects of other factors, to experience a greater increase in the cost of its interest-bearing liabilities than it would in the yield on its interest-earning assets, thus producing a decline in its net interest income. Conversely, in a declining rate environment, an institution with a negative gap would generally be expected to experience a lesser reduction in the yield on its interest-earning assets than it would in the cost of its interest-bearing liabilities, thus producing an increase in its net interest income. At September 30, 2009, the Company had a negative one-year gap of 32.9%, as compared to a negative one-year gap of 33.8% at September 30, 2008.

Unlike some lenders, we have chosen not to hedge our exposure to interest rates through the use of derivatives or other methods. Moreover, from time to time our risk position is not balanced, which may expose us to interest rate risk with movements in market rates to a degree not experienced by other financial institutions. We have implemented asset and liability management policies that seek to manage this risk, but those policies may not be successful.

The Company relies, in part, on external financing to fund its operations and the unavailability of such funds in the future could adversely impact its growth and prospects.

The Company relies on deposits (primarily certificates of deposit), advances from the Federal Home Loan Bank of Seattle and other borrowings to fund its operations. Management has historically been able to replace maturing deposits if desired; however the Company may not be able to replace such funds at any given point in time if its financial condition or market conditions were to change or the cost of doing so might adversely affect our financial condition or results of operations.

Although the Company considers its sources of funds adequate for its liquidity needs, it may seek additional debt in the future to achieve its long-term business objectives. Such borrowings, if sought, may not be available to the Company or, if available, may not be on favorable terms. If additional financing sources are unavailable or are not available on reasonable terms, the Company's growth and future prospects could be adversely affected.

The Company's ability to pay dividends is subject to regulatory limitations and other limitations which may affect its ability to pay dividends to its shareholders. Washington Federal is a separate legal entity from its subsidiary, Washington Federal Savings, and does not have significant operations of its own. The availability of dividends from Washington Federal Savings is limited by various statutes and regulations. It is possible, depending upon the financial condition of Washington Federal Savings and other factors, that the OTS, Washington Federal Savings primary regulator, could assert that payment of dividends or other payments may result in an unsafe or unsound practice. If Washington Federal Savings is unable to pay dividends to the Company, the Company may not be able to pay dividends on its common stock. Consequently, the inability to receive dividends from Washington Federal Savings could adversely affect the Company's financial condition, results of operations and prospects.

The market price for our common stock may be volatile.

The market price of our common stock could fluctuate substantially in the future in response to a number of factors, including those discussed below. The market price of our common stock has in the past fluctuated significantly and is likely to continue to fluctuate significantly. Some of the factors that may cause the price of our common stock to fluctuate include:

variations in our and our competitors' operating results;

changes in securities analysts' estimates of our future performance and the future performance of our competitors;

announcements by us or our competitors of mergers, acquisitions and strategic partnerships;

additions or departure of key personnel;

events affecting other companies that the market deems comparable to us;

general conditions in the financial markets and real estate markets;

general conditions in the United States;

the presence or absence of short selling of our common stock; and

future sales of our common stock or debt securities.

The stock markets in general have experienced substantial price and trading fluctuations. These fluctuations have resulted in volatility in the market prices of securities that often has been unrelated or disproportionate to changes in operating performance. These broad market fluctuations may adversely affect the trading price of our common stock.

Persons holding our common stock could have the voting power of their shares of common stock on all matters significantly reduced under Washington's anti-takeover statutes, if the person holds in excess of 10% of the voting power in the election of directors.

We are incorporated in the state of Washington and subject to Washington state law. Some provisions of Washington state law could interfere with or restrict takeover bids or other change-in-control events affecting us. For example, Chapter 23B.19 of the Washington Business Corporation Act, with limited exceptions, prohibits a target corporation from engaging in specified significant business transactions for a period of five years after the share acquisition by an acquiring person, unless:

Edgar Filing: WASHINGTON FEDERAL INC - Form 10-K

the prohibited transaction or the acquiring person's purchase of shares was approved by a majority of the members of the target corporation's board of directors prior to the acquiring person's share acquisition; or

the prohibited transaction was both approved by the majority of the members of the target corporation's board and authorized at a shareholder meeting by at least two-thirds of the outstanding voting shares (excluding the acquiring person's shares) at or subsequent to the acquiring person's share acquisition.

An acquiring person is defined as a person or group of persons that beneficially own 10% or more of the voting securities of the target corporation. Such prohibited transactions include, among other things:

certain mergers, or consolidations with, disposition of assets to, or issuances of stock to or redemption of stock from, the acquiring person;

termination of 5% or more of the employees of the target corporation as a result of the acquiring person's acquisition of 10% or more of the shares;

allowing the acquiring person to receive any disproportionate benefit as a shareholder; and

liquidating or dissolving the target corporation.

After the five-year period, certain significant business transactions are only permitted, if they comply with certain fair price provisions of the statute or are approved by a majority of the outstanding shares other than those of which the acquiring person has beneficial ownership. As a Washington corporation, we are not permitted to opt out of this statute.

The Company may need to continue to increase its allowance for loan losses in material amounts. We have also experienced and may continue to experience increases in net charge-offs.

Our customers may not repay their loans according to the original terms, and the collateral securing the payment of those loans may be insufficient to pay any remaining loan balance. While we maintain an allowance for loan losses to provide for loan defaults and non-performance, losses may exceed the value of the collateral securing the loans and the allowance may not fully cover any excess loss.

We make various assumptions and judgments about the collectability of our loan portfolio, including the creditworthiness of our borrowers and the value of the real estate and other assets serving as collateral for the repayment of loans. Our allowance for loan losses is based on these judgments, as well as historical loss experience and an evaluation of the other risks associated with our loan portfolio, including but not limited to, the size and composition of the loan portfolio, current economic conditions and geographic concentrations within the portfolio. Federal regulatory agencies, as part of their examination process, review our loans and allowance for loan losses. If our assumptions or judgments used to determine the allowance prove to be incorrect, if the value of the collateral securing the loans decreases substantially or if our regulators disagree with our judgments, we may need to increase the allowance in amounts that exceed our expectations. Material additions to the allowance would adversely affect our results of operations and financial condition.

We recorded a \$193million provision for loan losses during the year ended September 30, 2009, compared to a \$60.5million provision for the year ended September 30, 2008. Our non-performing assets amounted to \$557million or 4.43% of total assets at September 30, 2009, compared to \$164million or 1.39% of total assets one year ago. We had net charge-offs of \$111million for the year ended September 30, 2009 compared with \$15million of net charge-offs for the year ended September 30, 2008.

This significant increase in the provision for loan losses is in response to three primary factors: first, the overall deterioration in the housing market in general in our eight western state territory; second, the significant increase in the combined balance of non-performing assets in our land acquisition and development and speculative construction portfolios; and finally, the material increase in net charge-offs for the year. We expect our loan loss provision to remain at elevated levels until non-performing assets and charge-offs improve.

The Company's business is subject to various lending and other economic risks that could adversely impact its operating results and financial condition. Further deterioration in economic conditions, particularly in the Pacific Northwest, could hurt our business. The Company's business is directly affected by political and market conditions, broad trends in industry and finance, legislative and regulatory changes, changes in governmental monetary and fiscal policies and inflation, all of which are beyond its control. Investments in U.S. government sponsored entities, such as Fannie Mae and Freddie Mac, declined significantly in value, after the U.S Government placed both companies into conservatorship in September 2008. A deterioration in economic conditions could result in the following consequences, any of which could have a material adverse effect on the Company's business:

Loan delinquencies may increase;

Problem assets and foreclosures may increase;

Demand for its products and services may decline;

Collateral for loans made by us, especially real estate, may decline in value, in turn reducing a customer's borrowing power, and reducing the value of assets and collateral associated with its loans; and

Investments in mortgage-backed securities may decline in value as a result of the diminution of the value of the underlying real estate collateral.

A downturn in the real estate market has hurt the Company's business. Actions by other lenders or bank regulators could further depress the value of our real estate holdings. The Company's business activities and credit exposure are concentrated in real estate lending. During fiscal 2009, the market for residential housing has experienced dramatic declines, with falling home prices and increasing foreclosures. The Company significantly increased its provision for loan losses in fiscal 2009. A downturn in the real estate market hurts the Company's business because the vast majority of its loans are secured by real estate. If the significant decline in market values continues, the collateral for the Company's loans will provide increasingly less security. As a result, the Company's ability to recover the principal amount due on defaulted loans by selling the

underlying real estate will be diminished, and the Company will be more likely to suffer losses on defaulted loans.

In fiscal year 2009, we increased the amount of real estate we own as a result of foreclosures relating to non-performing loans. We believe that it may prove less expensive to hold land or finished lots on which we foreclose until market conditions improve, rather than sell at current market prices. If other lenders or borrowers liquidate significant amounts of real estate in a rapid or disorderly fashion or if the FDIC elects to dispose of significant amounts of real estate from failed financial institutions in a similar fashion, it could have an adverse effect on the values of the properties we own. In such case, we may incur further write-downs and charge-offs, which could, in turn, adversely affect our results of operations and financial condition

The Company may suffer losses in its loan portfolio despite its underwriting practices. The Company seeks to mitigate the risks inherent in its loan portfolio by adhering to specific underwriting practices. These practices often include analysis of a borrower's prior credit history, financial statements, tax returns and cash flow projections; valuation of collateral; obtaining personal guarantees of loans to businesses; and verification of liquid assets. If the underwriting process fails to capture accurate information or proves to be inadequate, we may incur losses on loans that meet our underwriting criteria, and those losses may exceed the amounts set aside as reserves in the allowance for loan losses.

The Company operates in a highly regulated industry, which limits the manner and scope of our business activities. The Company is subjected to extensive supervision, regulation and examination by the Office of Thrift Supervision and by the FDIC. As a result and due to restrictions on our activities as a result of the thrift charter, we are limited in the manner in which we conduct our business, undertake new investments and activities and obtain financing. This regulatory structure is designed primarily for the protection of the deposit insurance funds and our depositors, and not to benefit our stockholders. This regulatory structure also gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement activities and examination policies to address not only compliance with applicable laws and regulations (including laws and regulations governing consumer credit, and anti-money laundering and anti-terrorism laws), but also capital adequacy, asset quality and risk, management ability and performance, earnings, liquidity, and various other factors. As part of this regulatory structure, we are subject to policies and other guidance developed by the regulatory agencies with respect to capital levels, the timing and amount of dividend payments, the classification of assets and the establishment of adequate loan loss reserves for regulatory purposes. Under this structure the OTS and the FDIC have broad discretion to impose restrictions and limitations on our operations if they determine, among other things, that our operations are unsafe or unsound, fail to comply with applicable law or are otherwise inconsistent with laws and regulations or with the supervisory policies of these agencies. This supervisory framework could materially impact the conduct, growth and profitability of our operations.

Failure to comply with applicable laws and regulations also could result in a range of sanctions and enforcement actions, including the imposition of civil money penalties, formal agreements and cease and desist orders. In addition, the OTS and the FDIC have specific authority to take prompt corrective action, depending on our capital level. Currently, we are considered well-capitalized for prompt corrective action purposes. If we were to drop to the adequately capitalized level, the OTS could restrict our ability to take brokered deposits. If we were to fall to the lower capital levels undercapitalized, significantly undercapitalized and critically undercapitalized we would be required to raise additional capital and also would be subject to progressively more severe restrictions on our operations, management and capital distributions; replacement of senior executive officers and directors; and, if we became critically undercapitalized, to the appointment of a conservator or receiver.

We expect to face increased regulation and supervision of our industry as a result of the current financial crisis, and there will be additional requirements and conditions imposed on us to the extent that we participate in any of the programs established or to be established by the Treasury under the Emergency Economic Stabilization Act of 2008 (the EESA) or by the federal bank regulatory agencies. Such additional regulation and supervision may increase our costs and limit our ability to pursue business opportunities.

Recent legislative and regulatory initiatives to support the financial services industry have been coupled with numerous restrictions and requirements that could detrimentally affect the Company's business and require us to raise additional capital.

In addition to the U.S. Treasury's Capital Purchase Program (CPP) under the Troubled Asset Relief Program (TARP) announced in the fall of 2008, the U.S. Treasury and the FDIC have taken further steps to support and regulate the financial services industry, that include enhancing the liquidity support available to financial institutions, establishing a commercial paper funding facility, temporarily guaranteeing money market funds and certain types of debt issuances, and increasing insurance on bank deposits. Also, the U.S. Congress, through the EESA and the American Recovery and Reinvestment Act of 2009, have imposed a number of restrictions and limitations on the operations of financial services firms participating in the federal programs. These programs subject us and other financial institutions who participate in them to

(1) additional restrictions, oversight, reporting obligations and costs; and (2) compensation restrictions that limit our ability to attract and retain executives, each of which could have an adverse impact on our business, financial condition, results of operations or the price of our common stock. In addition, new proposals for legislation continue to be introduced in the U.S. Congress that could further substantially increase regulation of the financial services industry and impose restrictions on the ability of firms within the industry to conduct business consistent with historical practices, including aspects such as compensation, interest rates, new and inconsistent consumer protection regulations and mortgage regulation, among others. Federal and state regulatory agencies also frequently adopt changes to their regulations or change the manner in which existing regulations are applied. We cannot predict the substance or impact of pending or future legislation or regulation, or the application thereof. Compliance with such current and potential regulation and scrutiny may significantly increase our costs, impede the efficiency of our internal business processes, require us to increase our regulatory capital and limit our ability to pursue business opportunities in an efficient manner.

The Company faces strong competition from other financial institutions, offering services similar to those offered by us. Many competitors offer the types of loans and deposit services that the Company offers. These competitors include other savings associations, community banks, credit unions and other financial intermediaries. In particular, the Company's competitors include national banks and major financial companies whose greater resources may afford them a marketplace advantage by enabling them to maintain numerous banking locations and mount extensive promotional and advertising campaigns. Increased competition within the Company's market area may result in reduced loan originations and deposits. Ultimately, the Company may not be able to compete as successfully against current and future competitors.

Difficulties in integrating the operations of acquired companies with Washington Federal Savings' own operations may prevent it from achieving the expected benefits from its acquisitions. Washington Federal Savings has historically expanded its business through mergers with competitors and acquisitions of particular thrift assets. We intend to continue to consider additional growth opportunities, including purchases of failed thrifts and banks or their assets from the FDIC. We may not be able to fully realize the strategic and operating efficiencies in an acquisition. Inherent uncertainties exist in the operations of an acquired entity. Although the Company seeks merger or acquisition partners that are culturally similar and have experienced management, it is possible that Washington Federal may lose customers or key personnel of acquired entities as a result of an acquisition. In addition, the market conditions where Washington Federal and its potential acquisition targets operate are highly competitive. These factors could contribute to Washington Federal not achieving the expected benefits from its acquisitions within desired time frames, if at all.

Failure to successfully implement a new core operating system may adversely affect Washington Federal Savings' business operations. Our future success will depend, in part, upon our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands for convenience, as well as to create additional efficiencies and provide improved security in our operations. In order to meet these needs, Washington Federal Savings is in the process of implementing substantial changes to its core operating system. We may not be able to successfully implement the new core operating system in an effective manner or integrate the system with the operations of recently acquired institutions. In addition, we may incur significant increases in costs and encounter extensive delays in the implementation and rollout of our new operating system. Failure to effectively implement our new operating system may adversely affect Washington Federal Savings' operations as well as customer perceptions.

Increases in FDIC insurance premiums may cause our earnings to decrease.

The Emergency Economic Stabilization Act of 2008 temporarily increased the limit on FDIC coverage to \$250,000 for all accounts through December 31, 2013. We have also enrolled in the Temporary Liquidity Guarantee Program for noninterest-bearing transaction deposit accounts. In addition, in May 2009, the Board of Directors of the FDIC approved a further increase in deposit insurance premiums, including a one-time special assessment on deposits as of June 30, 2009 and allows the FDIC to impose additional special assessments on the expanded assessment base for the third and fourth quarters of calendar year 2009. In addition, the substantial number of bank failures as a result of the current financial crisis has led to a rapid depletion of the FDIC's insurance fund. We anticipate that the premiums assessed by the FDIC to increase meaningfully in the near future. These actions will significantly increase our noninterest expense in our fiscal year 2010 and in future years as long as the increased premiums remain in place.

There may be future sales or other dilution of our equity, which may adversely affect the market price of our common stock.

We are not restricted from issuing additional shares of common stock, including any securities that are convertible into or exchangeable for, or that represent the right to receive, common stock. The issuance of any additional shares of common or of preferred stock or convertible securities or the exercise of such securities could be substantially dilutive to stockholders of our common stock. For instance, exercise of the warrant issued to the U.S. Treasury in connection with our participation in the Capital Purchase Program would dilute the value of our common shares. Holders of our shares of common stock have no preemptive rights that entitle holders to purchase their pro rata share of any offering of shares of any class or series and, therefore, such sales or offerings could result in increased dilution to our stockholders.

Item 1B. Unresolved Staff Comments

Not applicable.

Item 2. Properties

The Company owns the building in which its principal executive offices are located in Seattle, Washington. The following table sets forth certain information concerning the Company's offices:

Location	Number of Offices	Building		Net Book Value at September 30, 2009 (2)
		Owned	Leased (1) (In thousands)	
Washington	54	41	13	\$ 84,533
Idaho	16	16		6,107
Oregon	28	18	10	8,368
Utah	10	6	4	2,691
Arizona	21	15	6	15,029
Texas	6	3	3	4,266
New Mexico	11	9	2	10,897
Nevada	4	1	3	1,586
Total	150	109	41	\$ 133,477

(1) The leases have varying terms expiring from 2009 through 2070, including renewal options.

(2) Amount represents the net book value of all land, property and equipment owned by the Company and the book value of leasehold improvements, where applicable.

Washington Federal evaluates on a continuing basis the suitability and adequacy of its offices, both branches and administrative centers, and has opened, relocated, remodeled or closed them as necessary to maintain efficient and attractive premises.

Washington Federal's net investment in premises, equipment and leaseholds was \$133.5 million at September 30, 2009.

Item 3. Legal Proceedings

The Company is involved in legal proceedings occurring in the ordinary course of business that in the aggregate are believed by management to be immaterial to the financial statements of the Company. The effects of legal proceedings did not have a material impact on the statements of operations for any of the three years ended September 30, 2009.

Item 4. Submission of Matters to a Vote of Security Holders

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

The information required herein is incorporated by reference from page 41 of the Company's Annual Report to Stockholders for 2009 (Annual Report), which is included herein as Exhibit 13.

The Company's stock repurchase program was publicly announced by the board of directors on February 3, 1995 and has no expiration date. Under this program, a total of 21,956,264 shares of the Company's common stock have been authorized for repurchase. There were no repurchases of the Company's common stock made by or on behalf of the Company during the three months or year ended September 30, 2009.

Item 6. Selected Financial Data

The information required herein is incorporated by reference from page 12 of the Annual Report.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The information required herein is incorporated by reference on pages 5 through 11 of the Annual Report.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

The information required herein is incorporated by reference to Interest Rate Risk commencing on page 17 of this Form 10-K.

Item 8. Financial Statements and Supplementary Data

The financial statements and supplementary data required herein are incorporated by reference from pages 13 through 37 of the Annual Report.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's President and Chief Executive Officer along with the Company's Executive Vice President and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to the Securities Exchange Act of 1934 (Exchange Act) Rule 13a-15. Based upon that evaluation, the Company's President and Chief Executive Officer, along with the Company's Executive Vice President and Chief Financial Officer, concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company (including its consolidated subsidiaries) required to be included in the Company's periodic SEC filings.

Disclosure controls and procedures are Company controls and other procedures that are designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by the Company in the reports that it files under the Exchange Act is accumulated and communicated to the Company's management, including its President and Chief Executive Officer and Executive Vice President and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Edgar Filing: WASHINGTON FEDERAL INC - Form 10-K

There have been no changes in the Company's internal control over financial reporting that occurred during the Company's most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

The annual Management's Report on Internal Control over Financial Reporting and the Attestation reports of the Company's Registered Public Accounting Firm required herein is incorporated by reference on pages 38 and 39 of the Annual Report.

Item 9B. Other Information

Not applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required herein is incorporated by reference to the Proxy Statement which is expected to be dated December 11, 2009, for the Company's annual meeting of stockholders to be held on January 20, 2010 (Proxy Statement).

The Company has adopted a code of ethics that applies to all senior financial officers, including its Chief Executive Officer and Chief Financial Officer. The code of ethics is publicly available on the Company's website at www.washingtonfederal.com. If the Company makes any substantive amendments to the code of ethics or grants any waiver from a provision of the code, it will disclose the nature of such amendment or waiver on its website or in a report on Form 8-K.

Item 11. Executive Compensation

The information required herein is incorporated by reference the Proxy Statement.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required herein is incorporated by reference to the Proxy Statement.
