**TERADATA CORPORATION**

(Exact name of registrant as specified in its charter)

Edgar Filing: TERADATA CORP /DE/ - Form 10-Q

**Delaware**  
(State or other jurisdiction of  
incorporation or organization)

**75-3236470**  
(I.R.S. Employer  
Identification No.)

**10000 Innovation Drive**  
**Dayton, Ohio 45342**

(Address of principal executive offices) (Zip Code)

**Registrant's telephone number, including area code: (866) 548-8348**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

At April 26, 2013, the registrant had approximately 163.4 million shares of common stock outstanding.

See Notes to Condensed Consolidated Financial Statements (Unaudited).

**Table of Contents****Notes to Condensed Consolidated Financial Statements (Unaudited)****1. Basis of Presentation**

These statements have been prepared pursuant to the rules and regulations of the U.S. Securities and Exchange Commission ( SEC ) and, in accordance with those rules and regulations, do not include all information and footnote disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America ( GAAP ). In the opinion of management, the condensed consolidated financial statements reflect all adjustments, consisting only of normal recurring adjustments, necessary to fairly state the results of operations, financial position and cash flows of Teradata Corporation ( Teradata or the Company ) for the interim periods presented herein. The year-end 2012 condensed consolidated balance sheet data was derived from audited financial statements, but does not include all disclosures required by GAAP. The preparation of condensed consolidated financial statements in conformity with GAAP requires management to make use of estimates and assumptions that affect the reported amounts and disclosures. Actual results may vary from these estimates.

These condensed consolidated interim financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in Teradata s most recent Annual Report on Form 10-K for the fiscal year ended December 31, 2012 (the 2012 Annual Report ). The results of operations for any interim period are not necessarily indicative of the results of operations to be expected for the full year.

**2. New Accounting Pronouncements**

**Comprehensive Income.** In February 2013, the FASB issued new guidance regarding the disclosure of comprehensive income. Under the new guidance, entities are required to provide information about the amounts reclassified out of accumulated other comprehensive income by component. In addition, entities are required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amount reclassified is required under GAAP to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required under GAAP to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures required under GAAP that provide additional detail about those amounts. The amendments in this update do not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. This new guidance was adopted by the Company as of January 1, 2013.

**3. Supplemental Financial Information**

In millions	March 31, 2013	As of December 31, 2012
<b>Inventories</b>		
Finished goods	\$ 44	\$ 26
Service parts	21	21
<b>Total inventories</b>	\$ 65	\$ 47
<b>Deferred revenue</b>		
Deferred revenue, current	\$ 457	\$ 375
Long-term deferred revenue	32	30
<b>Total deferred revenue</b>	\$ 489	\$ 405

**Table of Contents****4. Goodwill and Acquired Intangible Assets**

The following table identifies the activity relating to goodwill by operating segment:

In millions	Balance December 31, 2012	Additions	Currency Translation Adjustments	Balance March 31, 2013
<b>Goodwill</b>				
Americas	\$ 616	\$ 0	\$ 0	\$ 616
International	316	0	(11)	305
<b>Total goodwill</b>	\$ 932	\$ 0	(\$ 11)	\$ 921

The only changes in goodwill for the three months ended March 31, 2013 were due to changes in foreign currency exchange rates.

Acquired intangible assets were specifically identified when acquired, and are deemed to have finite lives. The gross carrying amount and accumulated amortization for Teradata's acquired intangible assets were as follows:

In millions	Original Amortization Life (in Years)	Gross Carrying Amount	March 31, 2013		December 31, 2012		
			Accumulated Amortization	Currency Translation Adjustment	Gross Carrying Amount	Accumulated Amortization	Currency Translation Adjustment
<b>Acquired intangible assets</b>							
Intellectual property/developed technology	1 to 7	148	(52)	1	153	(50)	2
Customer relationships	3 to 10	77	(18)	1	77	(15)	1
Trademarks/trade names	3.5 to 5	15	(4)	0	15	(2)	0
In-process research and development	5	5	0	0	5	0	0
Non-compete agreements	2 to 2.5	1	(1)	0	1	(1)	0
<b>Total</b>	<b>1 to 10</b>	<b>246</b>	<b>(75)</b>	<b>2</b>	<b>251</b>	<b>(68)</b>	<b>3</b>

The aggregate amortization expense (actual and estimated) for acquired intangible assets for the following periods is as follows:

In millions	Three Months Ended		For the year ended (estimated)			
	March 31, 2013	2013	2014	2015	2016	2017
Amortization expense	\$ 11	\$ 42	\$ 40	\$ 38	\$ 26	\$ 18

**5. Income Taxes**

Income tax provisions for interim periods are based on estimated annual income tax rates, adjusted to reflect the effects of any significant infrequent or unusual items which are required to be discretely recognized within the current interim period. The Company's intention is to permanently reinvest its foreign earnings outside of the United States. As a result, the effective tax rates in the periods presented are largely based upon the forecasted pre-tax earnings mix and allocation of certain expenses in various taxing jurisdictions where the Company conducts its business that apply a broad range of statutory income tax rates, certain of which are less than the U.S. statutory rate.

The effective tax rate for the three months ended March 31, 2013 and March 31, 2012 was 21.3% and 27.8%, respectively. The effective tax rate for the three months ended March 31, 2013 included the marginal rate benefit of

---

**Table of Contents**

the U.S. Federal Research and Development Tax Credit (the Federal R&D Tax Credit ) for 2013, as well as a one-time discrete \$4 million tax benefit associated with the Federal R&D Tax Credit for 2012, which was retroactively reinstated with the enactment of the American Taxpayer Relief Act of 2012 in January of 2013. There were no material discrete tax items, nor any tax benefit associated with the 2012 Federal R&D Tax Credit due to its expiration, reflected in the effective tax rate for the three months ended March 31, 2012.

**6. Derivative Instruments and Hedging Activities**

As a portion of the Company's operations is conducted outside the United States and in currencies other than the U.S. dollar, the Company is exposed to potential gains and losses from changes in foreign currency exchange rates. In an attempt to mitigate the impact of currency fluctuations, the Company uses foreign exchange forward contracts to hedge transactional exposures resulting predominantly from foreign currency denominated inter-company receivables and payables. The forward contracts are designated as fair value hedges of specified foreign currency denominated inter-company receivables and payables and generally mature in three months or less. The Company does not hold or issue derivative financial instruments for trading purposes, nor does it hold or issue leveraged derivative instruments. By using derivative financial instruments to hedge exposures to changes in exchange rates, the Company exposes itself to credit risk. The Company manages exposure to counterparty credit risk by entering into derivative financial instruments with highly rated institutions that can be expected to fully perform under the terms of the applicable contracts.

All derivatives are recognized in the Consolidated Balance Sheet at their fair value. The fair values of foreign exchange contracts are based on market spot and forward exchange rates and represent estimates of possible value that may not be realized in the future. Changes in the fair value of derivative financial instruments, along with the loss or gain on the hedged asset or liability, are recorded in current period earnings. The notional amounts represent agreed-upon amounts on which calculations of dollars to be exchanged are based, and are an indication of the extent of Teradata's involvement in such instruments. These notional amounts do not represent amounts exchanged by the parties and, therefore, are not a measure of the instruments. Across its portfolio of contracts, Teradata has both long and short positions relative to the U.S. dollar. As a result, Teradata's net involvement is less than the total contract notional amount of the Company's foreign exchange forward contracts.

The contract notional amount of the Company's foreign exchange forward contracts was \$95 million (\$26 million on a net basis) at March 31, 2013, and \$140 million (\$53 million on a net basis) at December 31, 2012. The fair value derivative assets and liabilities recorded in other current assets and accrued liabilities at March 31, 2013 and December 31, 2012, were not material.

Gains and losses from the Company's fair value hedges (foreign currency forward contracts and related hedged items) were immaterial for the three months ended March 31, 2013 and March 31, 2012. Gains and losses from foreign exchange forward contracts are fully recognized each period and reported along with the offsetting gain or loss of the related hedged item, either in cost of products or in other income, depending on the nature of the related hedged item.

**7. Commitments and Contingencies**

In the normal course of business, from time to time, the Company is involved in claims, lawsuits, investigations and proceedings incidental to its business operations which management expects will be resolved without a material impact on the Company's results of operations, cash flows or financial condition. No material amount of loss in excess of recorded amounts is believed to be reasonably possible as a result of such claims, lawsuits, investigations or proceedings.

As previously reported in our 2012 Annual Report on Form 10-K, in January 2013, the Company settled a litigation matter in federal district court filed under the qui tam provisions of the civil False Claims Act for the \$3 million previously accrued on the balance sheet as of December 31, 2012, and the court dismissed the action.

**Table of Contents**

**Guarantees and Product Warranties.** Guarantees associated with the Company's business activities are reviewed for appropriateness and impact to the Company's financial statements. Periodically, the Company's customers enter into various leasing arrangements coordinated with a leasing company. In some instances, the Company guarantees the leasing company a minimum value at the end of the lease term on the leased equipment. As of March 31, 2013, the maximum future payment obligation of this guaranteed value and the associated liability balance was \$3 million.

The Company provides its customers a standard manufacturer's warranty and records, at the time of the sale, a corresponding estimated liability for potential warranty costs. Estimated future obligations due to warranty claims are based upon historical factors such as labor rates, average repair time, travel time, number of service calls and cost of replacement parts. For each consummated sale, the Company recognizes the total customer revenue and records the associated warranty liability using pre-established warranty percentages for that product class.

The following table identifies the activity relating to the warranty reserve for the three months ended March 31:

In millions	2013	2012
<b>Warranty reserve liability</b>		
Beginning balance at January 1	\$ 8	\$ 6
Provisions for warranties issued	3	4
Settlements (in cash or in kind)	(4)	(3)
<b>Balance at March 31</b>	<b>\$ 7</b>	<b>\$ 7</b>

The Company also offers extended and/or enhanced coverage to its customers in the form of maintenance contracts. The Company accounts for these contracts by deferring the related maintenance revenue over the extended and/or enhanced coverage period. Costs associated with maintenance support are expensed as incurred. Amounts associated with these maintenance contracts are not included in the table above.

In addition, the Company provides its customers with certain indemnification rights. In general, the Company agrees to indemnify the customer if a third party asserts patent or other infringement on the part of the customer for its use of the Company's products. The Company has entered into indemnification agreements with the officers and directors of its subsidiaries. From time to time, the Company also enters into agreements in connection with its acquisition and divestiture activities that include indemnification obligations by the Company. The fair value of these indemnification obligations is not readily determinable due to the conditional nature of the Company's potential obligations and the specific facts and circumstances involved with each particular agreement, and as such the Company has not recorded a liability in connection with these indemnification arrangements. Historically, payments made by the Company under these types of agreements have not had a material effect on the Company's consolidated financial condition, results of operations or cash flows.

**8. Fair Value Measurements**

GAAP has established a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets for identical assets or liabilities; Level 2, defined as significant other observable inputs, such as quoted prices in active markets for similar assets or liabilities, or quoted prices in less-active markets for identical assets; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

The Company's assets and liabilities measured at fair value on a recurring basis include money market funds and foreign currency exchange contracts. A portion of the Company's excess cash reserves are held in money market funds which generate interest income based on the prevailing market rates. Money market funds are included in cash and cash equivalents in the Company's balance sheet. Money market fund holdings are measured at fair value using quoted market prices and are classified within Level 1 of the valuation hierarchy. When deemed appropriate, the Company minimizes its exposure to changes in foreign currency exchange rates through the use of derivative

**Table of Contents**

financial instruments, specifically, forward foreign exchange contracts. The fair value of these contracts are measured at the end of each interim reporting period using observable inputs other than quoted prices, specifically market spot and forward exchange rates. As such, these derivative instruments are classified within Level 2 of the valuation hierarchy. Fair value gains for open contracts are recognized as assets and fair value losses are recognized as liabilities. The fair value derivative assets and liabilities recorded in other current assets and accrued liabilities at March 31, 2013 and December 31, 2012, were not material. Any realized gains or losses would be mitigated by corresponding gains or losses on the underlying exposures.

The Company's assets measured at fair value on a recurring basis and subject to fair value disclosure requirements at March 31, 2013 and December 31, 2012 were as follows:

In millions	Total	Fair Value Measurements at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
<b>Assets</b>				
Money market funds, March 31, 2013	\$ 450	\$ 450	\$ 0	\$ 0
Money market funds, December 31, 2012	\$ 260	\$ 260	\$ 0	\$ 0

**9. Debt**

On June 15, 2012, Teradata entered into a five-year revolving credit agreement (the Credit Facility), under which the Company may borrow up to \$300 million. The Credit Facility replaces a similar revolving credit agreement in the same maximum principal amount entered into by Teradata in 2007. The Credit Facility ends on June 15, 2017, at which point any remaining outstanding borrowings would be due for repayment unless extended by agreement of the parties for up to two additional one-year periods. The interest rate charged on borrowings pursuant to the Credit Facility can vary depending on the interest rate option the Company chooses to utilize and the Company's leverage ratio at the time of the borrowing. In the near term, Teradata would anticipate choosing a floating rate based on the London Interbank Offered Rate (LIBOR). The Credit Facility is unsecured and contains certain representations and warranties, conditions, affirmative, negative and financial covenants, and events of default customary for such facilities.

As of March 31, 2013, the Company had no borrowings outstanding under the Credit Facility, leaving \$300 million in additional borrowing capacity available under the Credit Facility.

Teradata's senior unsecured \$300 million five-year term loan is payable in quarterly installments, which commenced on June 30, 2012, with all remaining principal due in April 2016. The outstanding principal amount of the term loan agreement bears interest at a floating rate based upon a negotiated base rate or a Eurodollar rate plus in each case a margin based on the leverage ratio of the Company. As of March 31, 2013, the term loan principal outstanding was \$285 million, and carried an interest rate of 1.25%.

Teradata's term loan is recognized on the Company's balance sheet at its unpaid principal balance, and is not subject to fair value measurement. However, given that the loan carries a variable rate, the Company estimates that the unpaid principal balance of the term loan would approximate its fair value.

**10. Earnings Per Share**

Basic earnings per share is calculated by dividing net income by the weighted average number of shares outstanding during the reported period. The calculation of diluted earnings per share is similar to basic earnings per share, except that the weighted average number of shares outstanding includes the dilution from potential shares resulting from stock options and unvested restricted stock awards.

**Table of Contents**

The components of basic and diluted earnings per share are as follows:

<b>In millions, except per share amounts</b>	<b>Three Months Ended March 31,</b>	
	<b>2013</b>	<b>2012</b>
Net income available for common stockholders	\$ 59	\$ 91
Weighted average outstanding shares of common stock	165.4	167.9
Dilutive effect of employee stock options and restricted stock	3.1	3.7
Common stock and common stock equivalents	168.5	171.6
<b>Earnings per share:</b>		
Basic	\$ 0.36	\$ 0.54
Diluted	\$ 0.35	\$ 0.53

Because the average market price of common shares for the periods was greater than the exercise prices of outstanding awards, no stock options were excluded from the computation of diluted earnings per share for the three months ended March 31, 2013, and March 31, 2012.

**11. Segment and Other Supplemental Information**

Effective January 1, 2013, Teradata combined the management of the Europe, Middle East and Africa, and the Asia Pacific and Japan regions into a new International region. This larger International region will have greater critical mass and leverage of resources for deployment of the Company's integrated marketing management, big data analytics, and data warehouse solutions, as well as possess more knowledge depth for our numerous consulting and support services offers.

As a result, Teradata now manages its business in two geographic regions, which are also the Company's operating segments: (1) the North America and Latin America (Americas) region; and (2) the International region. Management evaluates the performance of its segments based on revenue and segment margin, and does not include segment assets for management reporting purposes. Corporate-related costs are fully allocated to the segments.

The following table presents regional segment revenue and gross margin for the Company. For comparative purposes, prior-year amounts have been reclassified to conform to the current-year presentation:

<b>In millions</b>	<b>Three Months Ended March 31,</b>	
	<b>2013</b>	<b>2012</b>
<b>Revenue</b>		
Americas	\$ 355	\$ 388
International	232	225
<b>Total revenue</b>	<b>587</b>	<b>613</b>
<b>Gross margin</b>		
Americas	195	232
International	110	106
<b>Total gross margin</b>	<b>305</b>	<b>338</b>
Selling, general and administrative expenses	179	165
Research and development expenses	50	46

Edgar Filing: TERADATA CORP /DE/ - Form 10-Q

<b>Total income from operations</b>	76	127
Other expense, net	(1)	(1)
<b>Income before income taxes</b>	<b>\$ 75</b>	<b>\$ 126</b>

**Table of Contents**

The following table presents revenue by product and services for the Company:

<b>In millions</b>	<b>Three Months Ended</b>	
	<b>March 31,</b>	
	<b>2013</b>	<b>2012</b>
Products (software and hardware) <sup>(1)</sup>	\$ 249	\$ 308
Consulting services	186	165
Maintenance services	152	140
Total services	338	305
<b>Total revenue</b>	<b>\$ 587</b>	<b>\$ 613</b>

<sup>(1)</sup> Our data warehousing software and hardware products are often sold and delivered together in the form of a node of capacity as an integrated technology solution. Accordingly, it is impracticable to provide the breakdown of revenue from various types of software and hardware products.

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations ( MD&A )**

*You should read the following discussion in conjunction with the Condensed Consolidated Financial Statements and the notes to those statements included elsewhere in this Quarterly Report on Form 10-Q. This Quarterly Report on Form 10-Q contains certain statements that are forward-looking within the meaning of the Private Securities Litigation Reform Act of 1995. Certain statements contained in the MD&A are forward-looking statements that involve risks and uncertainties. The forward-looking statements are not historical facts, but rather are based on current expectations, estimates, assumptions and projections about our industry, business and future financial results. Our actual results could differ materially from the results contemplated by these forward-looking statements due to a number of factors, including those discussed in other sections of this Quarterly Report on Form 10-Q and in the 2012 Annual Report on Form 10-K.*

**First Quarter Financial Overview**

As more fully discussed in later sections of this MD&A, the following were significant financial items for the first quarter of 2013:

Total revenue was \$587 million for the first quarter of 2013, down 4% from the first quarter of 2012, with a 19% reduction in product revenue partially offset by an 11% increase in services revenue.

Gross margin decreased to 52.0% in the first quarter of 2013 from 55.1% in the first quarter of 2012, driven by lower product margins in the Americas region, as well as a higher proportion of lower-margin services revenue.

Operating income was \$76 million in the first quarter of 2013, compared to \$127 million in the first quarter of 2012, driven by lower product revenue and product margin, as well as an increase in Selling, General and Administrative ( SG&A ) expenses that was primarily due to the impact of our ongoing strategic initiative to add sales headcount.

The operational drivers outlined above led to a 35% reduction in net income in the first quarter of 2013, of \$59 million compared to \$91 million in the first quarter of 2012.

**Strategic Overview**

## Edgar Filing: TERADATA CORP /DE/ - Form 10-Q

Teradata is a leader in helping companies manage, integrate, and analyze growing data volumes and complexity, and transform it into actionable business insight for competitive advantage. Teradata's strategy focuses on three large and growing markets — data warehousing, big data analytics, and integrated marketing management including digital

## **Table of Contents**

marketing applications. Additionally, we continue to focus on four key initiatives to broaden our position in the market and take advantage of these market opportunities. These initiatives are to:

Invest to extend Teradata's core database technology and software application offerings, and expand our family of compatible data warehouse platforms and applications to address multiple market segments and solution offerings through internal development and targeted strategic acquisitions,

Differentiate Teradata technology and drive demand for our platform and solutions by delivering consulting services that enable customers to achieve business value through the use of best-in-class analytics,

Invest in partnerships to increase the number of solutions available on Teradata platforms, maximize customer value and increase our market coverage, and

Continue to seek opportunities to increase our market coverage through additional sales territories (hiring incremental sales account executives as well as technology and industry consultants).

## **Future Trends**

We believe that demand for our solutions will continue to increase due to the continued increase in data volumes and types of data, the scale and complexity of business requirements, and the growing use of new data elements and more near real-time analytics over time. The adoption by customers of more near real-time analysis for enterprise intelligence is driving more applications, usage and capacity.

As a portion of the Company's operations and revenue occur outside the United States, and in currencies other than the U.S. dollar, the Company is exposed to fluctuations in foreign currency exchange rates. In 2013, Teradata is expecting approximately one percentage point of adverse impact from currency translation on its reported revenue and a corresponding currency impact on operating income, based on currency rates as of May 2, 2013.

Beginning in the second half of 2012, Teradata encountered a change in customers' buying patterns with respect to large capital investments, particularly in the Americas. This budget conscious environment has led to companies becoming more cautious with respect to commitments for large capital purchases, particularly in the United States. We have seen these budget challenges with respect to large capital investments from the second half of 2012 continue in the first quarter of 2013, but anticipate an improvement in customer purchase activity as 2013 continues. Despite the sensitive budget environment in the short-term, and the resulting effect on larger customer purchases, particularly in the U.S., customers continue to have a strategic focus and need for responsive business intelligence. We remain confident in our ability to leverage our product and service offerings, and the continued demand for data analytics, and we believe that Teradata is well positioned to take advantage of these market opportunities. As a result, we continue to expect overall revenue growth for the full-year 2013, driven by improved customer confidence, and that larger capital investment purchases will increase as compared to the first quarter of the year. However, even in a strong economic environment, the size, timing and contracted terms of large customer orders for our products and services can impact, both positively and negatively, our operating results.

We did not experience significant changes in the first quarter of 2013 due to competitive and/or pricing trends for our data warehouse or appliance solutions, although there is always a risk that pricing pressure for our solutions could occur in the future. We continue to be committed to new product development and achieving a responsive yield from our research and development spending and resources, which are intended to drive future demand. We also continue to evaluate opportunities to increase our market coverage and are committed to continuing to increase our number of sales territories, among other things, to drive future revenue growth. Given the length of sales cycles, for new customers in the data warehouse market, new sales account territories typically take more than two years, on average, to become fully productive.

**Table of Contents****Results of Operations for the Three Months Ended March 31, 2013****Compared to the Three Months Ended March 31, 2012**

In millions	2013	% of Revenue	2012	% of Revenue
Product revenue	\$ 249	42.4%	\$ 308	50.2%
Service revenue	338	57.6%	305	49.8%
<b>Total revenue</b>	<b>587</b>	<b>100%</b>	<b>613</b>	<b>100%</b>
Gross margin				
Product gross margin	156	62.7%	205	66.6%
Service gross margin	149	44.1%	133	43.6%
<b>Total gross margin</b>	<b>305</b>	<b>52.0%</b>	<b>338</b>	<b>55.1%</b>
Operating expenses				
Selling, general and administrative expenses	179	30.5%	165	26.9%
Research and development expenses	50	8.5%	46	7.5%
<b>Total operating expenses</b>	<b>229</b>	<b>39.0%</b>	<b>211</b>	<b>34.4%</b>
Operating income	\$ 76	12.9%	\$ 127	20.7%

**Revenue**

Teradata revenue decreased 4% in the first quarter of 2013 compared to the first quarter of 2012. The revenue decrease included a 1% adverse impact from foreign currency fluctuations. Product revenue decreased 19% in the first quarter of 2013 from the prior-year period, due primarily to a reduction in larger customer orders in the current quarter. Service revenue in the first quarter of 2013 increased 11% from the prior-year period, with an underlying 13% increase in consulting services revenue, and 9% increase in maintenance services revenue, as compared to the prior-year period.

**Gross Margin**

Gross margin for the first quarter of 2013 was 52.0% compared to 55.1% in the first quarter of 2012. Product gross margin decreased to 62.7% in the first quarter of 2013, compared to 66.6% in the prior-year period. The decrease in product margin was largely a result of adverse product mix in the Americas region, when compared to the prior period, including an increase in lower-margin appliance product revenue. Service gross margin increased to 44.1% in the first quarter of 2013 compared to 43.6% in the prior-year period. The increase in services margins was driven primarily by improved consulting services margins in the International region.

**Operating Expenses**

Total operating expenses, characterized as SG&A and Research and Development ( R&D ) expenses, were \$229 million in the first quarter of 2013 compared to \$211 million in the first quarter of 2012. The \$14 million increase in SG&A expenses was driven by higher selling expense, due primarily to our strategic initiative to add sales headcount. The \$4 million increase in R&D expenses was driven by higher engineering headcount expenses, which included additional headcount from the eCircle acquisition, which was closed in the second quarter of 2012.

**Revenue and Gross Margin by Operating Segment**

As described in Note 11 of Notes to Condensed Consolidated Financial Statements (Unaudited), effective January 1, 2013, Teradata combined the management of the Europe, Middle East and Africa, and the Asia Pacific and Japan regions into a new International region. This larger International region will have greater critical mass and leverage of resources for deployment of the Company's integrated marketing

management, big data analytics, and data warehouse solutions, as well as possess more knowledge depth for our numerous consulting and support services offers.

**Table of Contents**

As a result, Teradata now manages its business in two geographic regions, which are also the Company's operating segments: (1) the North America and Latin America (Americas) region; and (2) the International region. Teradata believes this format is useful to investors because it allows analysis and comparability of operating trends by operating segment. It also includes the same information that is used by Teradata management to make decisions regarding the segments and to assess our financial performance. The discussion of our segment results describes the changes in results as compared to the prior-year period.

The following table presents revenue and operating performance by segment for the three months ended March 31. For comparative purposes, prior-year amounts have been reclassified to conform to the current-year presentation:

In millions	2013	% of Revenue	2012	% of Revenue
<b>Revenue</b>				
Americas	355	60%	388	63%
International	232	40%	225	37%
Total revenue	587	100%	613	100%
<b>Gross margin</b>				
Americas	195	54.9%	232	59.8%
International	110	47.4%	106	47.1%
Total gross margin	\$ 305	52.0%	\$ 338	55.1%

**Americas:** Revenue decreased 9% in the first quarter of 2013 from the first quarter of 2012, led by a 20% decrease in product revenue. The revenue decrease includes 1% adverse impact from foreign currency fluctuations. Gross margins were 54.9% for the first quarter of 2013, down from 59.8% in the first quarter of 2012, driven primarily by lower product margins due to adverse product mix, as well as lower consulting services margins.

**International:** Revenue increased 3% in the first quarter of 2013 from the first quarter of 2012, as a 28% increase in consulting services revenue was largely offset by a 17% reduction in product revenue. The revenue increase is net of a 2% adverse impact from foreign currency fluctuations. Gross margins increased to 47.4% for the first quarter of 2013, from 47.1% in the first quarter of 2012, as improved consulting services margins were largely offset by the adverse impact of a greater proportion of services revenue (in relation to product revenue), compared to the prior-year period.

**Other Expense**

The Company recognized \$1 million of other expense in the first quarter of 2013, the same as in the first quarter of 2012.

**Provision for Income Taxes**

Income tax provisions for interim periods are based on estimated annual income tax rates, adjusted to reflect the effects of any significant infrequent or unusual items which are required to be discretely recognized within the current interim period. The Company's intention is to permanently reinvest its foreign earnings outside of the United States. As a result, the effective tax rates in the periods presented are largely based upon the forecasted pre-tax earnings mix between the United States and other foreign taxing jurisdictions where the Company conducts its business. The Company estimates its full-year forecasted global effective tax rate for the year ended December 31, 2013 to be approximately 25%. This estimate is based on the forecasted overseas profits being taxed at an overall effective tax rate of approximately 10%, as compared to the statutory tax rate of 35% in the United States.

The effective tax rate in the first quarter of 2013 was 21.3%, compared to 27.8% in the first quarter of 2012. The effective tax rate for the three months ended March 31, 2013 included the marginal rate benefit of the U.S. Federal Research and Development Tax Credit (the Federal R&D Tax Credit) for 2013, as well as a one-time discrete \$4

**Table of Contents**

million tax benefit associated with the Federal R&D Tax Credit for 2012, which was retroactively reinstated with the enactment of the American Taxpayer Relief Act of 2012 in January of 2013. There were no material discrete tax items, nor any benefit associated with the 2012 Federal R&D Tax Credit due to its expiration, reflected in the effective tax rate for the three months ended March 31, 2012.

**Financial Condition, Liquidity and Capital Resources**

Cash provided by operating activities increased by \$51 million in the first three months of 2013. In comparison to the prior-year period, the increase in cash provided by operating activities in the three months ended March 31, 2013 was principally due to a reduction in receivables in the first quarter of 2013, which was driven by the higher accounts receivables balance at December 31, 2012, as compared to December 31, 2011. This impact was offset in part by a greater decrease in payables during the first quarter of 2013, as well as a smaller increase in deferred revenue, and lower net income (adjusted for non-cash items such as depreciation and amortization, share-based compensation expense and deferred income taxes), compared to the first three months of 2012.

Teradata's management uses a non-GAAP measure called free cash flow, which we define as net cash provided by operating activities less capital expenditures for property and equipment, and additions to capitalized software, as one measure of assessing the financial performance of the Company. Free cash flow does not have a uniform definition under GAAP; therefore, Teradata's definition of this measure may differ from the definition used by other companies. The components that are used to calculate free cash flow are GAAP measures taken directly from the Condensed Consolidated Statements of Cash Flows (Unaudited). We believe that free cash flow information is useful for investors because it relates the operating cash flow of the Company to the capital that is spent to continue and improve business operations. In particular, free cash flow indicates the amount of cash available after certain capital expenditures, for among other things, investments in the Company's existing businesses, strategic acquisitions and repurchase of Teradata common stock. Free cash flow does not represent the residual cash flow available for discretionary expenditures since there may be other non-discretionary expenditures that are not deducted from the measure. This non-GAAP measure should not be considered a substitute for, or superior to, cash flows from operating activities under GAAP.

The table below shows net cash provided by operating activities and capital expenditures for the following periods:

<b>In millions</b>	<b>Three Months Ended March 31,</b>	
	<b>2013</b>	<b>2012</b>
Net cash provided by operating activities	\$ 243	\$ 192
Less:		
Expenditures for property and equipment	(10)	(12)
Additions to capitalized software	(17)	(18)
<b>Free cash flow</b>	<b>\$ 216</b>	<b>\$ 162</b>

Financing activities and certain other investing activities are not included in our calculation of free cash flow. There were no other investing activities in the first quarter of 2013 or 2012. Teradata's financing activities for the three months ended March 31, 2013 included purchases of the Company's common stock. The Company purchased 1.6 million shares of its common stock at an average price per share of \$58.43 in the first three months of 2013. Share repurchases were made under two share repurchase programs initially authorized by our Board of Directors in 2008. The first program (the dilution offset program) authorizes the Company to repurchase Teradata common stock to the extent of cash received from the exercise of stock options and the Teradata Employee Stock Purchase Plan (ESPP) to offset dilution from shares issued pursuant to these plans. On February 6, 2012, the board approved a new \$300 million share repurchase authorization to replace the prior \$300 million authorization under the Company's second share repurchase program (the general share repurchase program) that was to expire on February 10, 2012. On December 10, 2012, Teradata announced that the board approved an additional \$300 million increase in the share repurchase authorization under the Company's general share repurchase program. As of March 31, 2013, the Company had \$289 million of authorization remaining on the general share repurchase program to

---

**Table of Contents**

repurchase outstanding shares of Teradata common stock. Share repurchases made by the Company are reported on a trade date basis. Our share repurchase activity depends on factors such as our working capital needs, our cash uses for capital investment opportunities, our stock price, and economic and market conditions.

Proceeds from the ESPP and the exercise of stock options were \$7 million in the first quarter of 2013 and \$24 million in the first quarter of 2012. These proceeds are included in Other financing activities, net in the Condensed Consolidated Statement of Cash Flows (Unaudited). Additionally, during the first quarter of 2013 the Company repaid \$4 million against its outstanding term loan, which is discussed further below.

Our total in cash and cash equivalents held outside the United States in various foreign subsidiaries was \$605 million as of March 31, 2013 and \$497 million as of December 31, 2012. The remaining balance held in the United States was \$248 million as of March 31, 2013 and \$232 million as of December 31, 2012. Under current tax laws and regulations, if cash and cash equivalents and short-term investments held outside the United States are distributed to the United States in the form of dividends or otherwise, we would be subject to additional U.S. income taxes (subject to an adjustment for foreign tax credits) and possible foreign withholding taxes. As of March 31, 2013, we have not provided for the U.S. federal tax liability on approximately \$930 million of foreign earnings that are considered permanently reinvested outside of the United States.

On June 15, 2012, Teradata entered into a five-year revolving credit agreement (the Credit Facility ), under which the Company may borrow up to \$300 million. The Credit Facility replaces a similar revolving credit agreement in the same maximum principal amount entered into by Teradata in 2007, which was terminated as of June 15, 2012. The new Credit Facility ends on June 15, 2017, at which point any remaining outstanding borrowings would be due for repayment unless extended by agreement of the parties for up to two additional one-year periods. The interest rate charged on borrowings pursuant to the Credit Facility can vary depending on the interest rate option the Company chooses to utilize and the Company's leverage ratio at the time of the borrowing. In the near term, Teradata would anticipate choosing a floating rate based on the London Interbank Offered Rate ( LIBOR ). The Credit Facility is unsecured and contains certain representations and warranties, conditions, affirmative, negative and financial covenants, and events of default customary for such facilities. As of March 31, 2013, the Company had no outstanding borrowings on the Credit Facility, and was in compliance with all covenants.

In April 2011, Teradata entered into a \$300 million five-year, unsecured term loan. The outstanding principal amount of the term loan agreement bears interest at a floating rate based upon a negotiated base rate or a Eurodollar rate plus in each case a margin based on the leverage ratio of the Company. As of March 31, 2013, the term loan principal outstanding was \$285 million, and carried an interest rate of 1.25%.

Management believes current cash and short-term investment resources, Company cash flows from operations and its \$300 million Credit Facility will be sufficient to satisfy future working capital, research and development activities, capital expenditures, pension contributions, and other financing requirements for at least the next twelve months. The Company principally holds its cash, cash equivalents and short-term investments in bank deposits and highly-rated money market funds.

The Company's ability to generate positive cash flows from operations is dependent on general economic conditions, competitive pressures, and other business and risk factors described in the Company's 2012 Annual Report on Form 10-K (the 2012 Annual Report ), and elsewhere in this Quarterly Report. If the Company is unable to generate sufficient cash flows from operations, or otherwise to comply with the terms of the credit facility and term loan agreement, the Company may be required to seek additional financing alternatives.

**Contractual and Other Commercial Commitments.** There has been no significant change in our contractual and other commercial commitments as described in the 2012 Annual Report. Our guarantees and product warranties are discussed in Note 7 of Notes to Condensed Consolidated Financial Statements (Unaudited).

---

**Table of Contents**

**Critical Accounting Policies and Estimates**

Our financial statements are prepared in accordance with GAAP. In connection with the preparation of these financial statements, we are required to make assumptions, estimates and judgments that affect the reported amounts of assets, liabilities, revenues, expenses and the related disclosure of contingent liabilities. These assumptions, estimates and judgments are based on historical experience and assumptions that are believed to be reasonable at the time. However, because future events and their effects cannot be determined with certainty, the determination of estimates requires the exercise of judgment. Our critical accounting policies are those that require assumptions to be made about matters that are highly uncertain. Different estimates could have a material impact on our financial results. Judgments and uncertainties affecting the application of these policies and estimates may result in materially different amounts being reported under different conditions or circumstances. Our management periodically reviews these estimates and assumptions to ensure that our financial statements are presented fairly and are materially correct.

In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP and does not require significant management judgment in its application. There are also areas in which management's judgment in selecting among available alternatives would not produce a materially different result. The significant accounting policies and estimates that we believe are the most critical to aid in fully understanding and evaluating our reported financial results are discussed in the 2012 Annual Report. Teradata's senior management has reviewed these critical accounting policies and related disclosures and determined that there were no significant changes in our critical accounting policies in the three months ended March 31, 2013. Also, there were no significant changes in our estimates associated with those policies.

**New Accounting Pronouncements**

See discussion in Note 2 of Notes to Condensed Consolidated Financial Statements (Unaudited) for new accounting pronouncements.

**Item 3. Quantitative and Qualitative Disclosures About Market Risk.**

There have not been any material changes to the market risk factors previously disclosed in Part II, Item 7A of the Company's 2012 Annual Report on Form 10-K.

**Item 4. Controls and Procedures.**

**Evaluation of Disclosure Controls and Procedures**

Teradata maintains a system of disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 (the Exchange Act)) that are designed to provide reasonable assurance that information required to be disclosed in its reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including, as appropriate, the Chief Executive Officer and the Chief Financial Officer, to allow timely decisions regarding required disclosures. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Based on their evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective to provide reasonable assurance as of March 31, 2013.

**Changes in Internal Control over Financial Reporting**

There have been no changes in our internal control over financial reporting that occurred during the last fiscal quarter ended March 31, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**Table of Contents****Part II OTHER INFORMATION****Item 1. Legal Proceedings.**

The information required by this item is included in the material under Note 7 of Notes to Condensed Consolidated Financial Statements (Unaudited) of this Quarterly Report on Form 10-Q and is incorporated herein by reference.

**Item 1A. Risk Factors.**

There have not been any material changes to the risk factors previously disclosed in Part I, Item IA of the Company's 2012 Annual Report on Form 10-K.

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.****Purchase of Company Common Stock**

During the first quarter of 2013, the Company executed purchases for 1.6 million shares of its common stock at an average price per share of \$58.43 under the two share repurchase programs that were authorized by our Board of Directors in 2008. The first program (the "dilution offset program") authorizes the Company to purchase Teradata common stock to the extent of cash received from the exercise of stock options and the Teradata Employee Stock Purchase Plan ("ESPP") to offset dilution from shares issued pursuant to these plans. On February 6, 2012, the board approved a new \$300 million share repurchase authorization to replace the prior \$300 million authorization under the Company's second share repurchase program (the "general share repurchase program"), that was to expire on February 10, 2012. On December 10, 2012, Teradata announced that board approved an additional \$300 million increase in the share repurchase authorization under the Company's general share repurchase program. As of March 31, 2013, the Company had \$289 million of authorization remaining under the general share repurchase program to repurchase outstanding shares of Teradata common stock. Share repurchases made by the Company are reported on a trade date basis.

Section 16 officers occasionally sell vested shares of restricted stock to the Company at the current market price to cover their withholding taxes. For the three months ended March 31, 2013, the total of these purchases was 53,204 shares at an average price of \$62.17 per share.

The following table provides information relating to the Company's share repurchase programs for the three months ended March 31, 2013:

Month	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Dilution Offset Program	Total Number of Shares Purchased as Part of Publicly Announced General Share Repurchase Program	Maximum Dollar Value that May Yet Be Purchased Under the Dilution Offset Program	Maximum Dollar Value that May Yet Be Purchased Under the General Share Repurchase Program
January 2013	4,300	\$ 60.92	4,300		\$ 2,090,359	\$ 376,301,977
February 2013	668,653	\$ 58.94	19,680	648,973	\$ 4,724,133	\$ 338,083,197
March 2013	938,300	\$ 58.06	89,842	848,458	\$ 3,101,443	\$ 288,814,961
<b>First Quarter Total</b>	<b>1,611,253</b>	<b>\$ 58.43</b>	<b>113,822</b>	<b>1,497,431</b>	<b>\$ 3,101,443</b>	<b>\$ 288,814,961</b>
