**CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

**1. BASIS OF PRESENTATION**

The accompanying consolidated financial statements should be read in conjunction with the Annual Report on Form 10-K for the fiscal year ended December 31, 2012 for SBA Communications Corporation and its subsidiaries (the "Company"). These financial statements have been prepared in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X and, therefore, omit or condense certain footnotes and other information normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States. In the opinion of the Company's management, all adjustments (consisting of normal recurring accruals) considered necessary for fair financial statement presentation have been made. The results of operations for an interim period may not give an indication of the results for the year. Certain reclassifications have been made to prior year amounts or balances to conform to the presentation adopted in the current year.

The preparation of financial statements requires management to make estimates and assumptions that affect the amounts reported in consolidated financial statements and accompanying notes. While the Company believes that such estimates are reasonable when considered in conjunction with the consolidated financial statements and accompanying notes, the actual amount of such estimates, when known, will vary from these estimates.

**2. FAIR VALUE MEASUREMENTS**

**Items Measured at Fair Value on a Recurring Basis** The Company's earnouts related to acquisitions are measured at fair value on a recurring basis using Level 3 inputs. The Company determines the fair value of acquisition-related contingent consideration, and any subsequent changes in fair value, using a discounted probability-weighted approach using Level 3 inputs. The fair value of the earnouts is reviewed quarterly and is based on the payments the Company expects to make based on historical internal observations related to the anticipated performance of the underlying assets. The Company's estimate of the fair value of its obligation if the performance targets contained in various acquisition agreements were met was \$7.0 million and \$9.8 million as of June 30, 2013 and December 31, 2012, respectively, which the Company recorded in accrued expenses on its Consolidated Balance Sheets. The maximum potential obligation related to the performance targets was \$13.4 million as of June 30, 2013.

**Items Measured at Fair Value on a Nonrecurring Basis** The Company's long-lived assets, intangibles, and asset retirement obligations are measured at fair value on a nonrecurring basis using Level 3 inputs. Level 3 valuations rely on unobservable inputs for the asset or liability, and include situations where there is little, if any, market activity for the asset or liability. The Company considers many factors and makes certain assumptions when making this assessment, including but not limited to: general market and economic conditions, historical operating results, geographic location, lease-up potential and expected timing of lease-up. The fair value of the long-lived assets, intangibles, and asset retirement obligations is calculated using a discounted cash flow model. During the three and six months ended June 30, 2013, the Company recognized an impairment charge of \$6.5 million and \$10.2 million, respectively, including third party decommission costs, related to its long-lived assets and intangibles resulting from the Company's analysis that the future cash flows from certain tower sites would not recover the carrying value of the investment in those tower sites. During the three and six months ended June 30, 2012, the Company recognized an impairment charge of \$0.6 million and \$1.0 million, respectively. Impairment charges for all periods presented relate to the Company's site leasing operating segment.

**Fair Value of Financial Instruments** The carrying values of cash and cash equivalents, accounts receivable, restricted cash, accounts payable and short-term investments approximate their related estimated fair values due to the short maturity of those instruments. Short-term investments consisted of \$5.2 million and \$5.3 million in certificate of deposits, as of June 30, 2013 and December 31, 2012, respectively. The Company's estimate of the fair value of its held-to-maturity investments in treasury and corporate bonds, including current portion, are based primarily upon Level 1 reported market values. As of June 30, 2013, the carrying value and fair value of the held-to-maturity investments, including current portion, were \$1.3 million and \$1.5 million, respectively. As of December 31, 2012, the carrying value and fair value of the held-to-maturity investments, including current portion, was \$1.3 million and \$1.5 million, respectively.

**Table of Contents****SBA COMMUNICATIONS CORPORATION AND SUBSIDIARIES****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

The Company determines fair value of its debt instruments utilizing various Level 2 sources including quoted prices and indicative quotes (non-binding quotes) from brokers that require judgment to interpret market information including implied credit spreads for similar borrowings on recent trades or bid/ask prices. The fair value of the Revolving Credit Facility is considered to be equal to the carrying value because the interest payments are based on Eurodollar rates that reset every month. The Company does not believe its credit risk has changed materially from the date the applicable Eurodollar Rate plus 187.5 basis points was set for the Revolving Credit Facility. The following table reflects fair values, principal balances, and carrying values of the Company's debt instruments (see Note 9).

Pursuant to the terms of the Tower Securities (see Note 9), the Company is required to establish a securitization escrow account, held by the indenture trustee, into which all rents and other sums due on the towers that secure the Tower Securities are directly deposited by the lessees. These restricted cash amounts are used to fund reserve accounts for the payment of (1) debt service costs, (2) ground rents, real estate and personal property taxes, and insurance premiums related to tower sites, (3) trustee and servicing expenses, (4) management fees, and (5) to reserve a portion of advance rents received from tenants. The restricted cash in the controlled deposit account in excess of required reserve balances is subsequently released to the Borrowers (as defined in the Annual Report on Form 10-K) monthly, provided that the Borrowers are in compliance with their debt service coverage ratio and that no event of default has occurred. All monies held by the indenture trustee are classified as restricted cash on the Company's Consolidated Balance Sheets.

Payment and performance bonds relate primarily to collateral requirements for tower construction currently in process by the Company. Cash is pledged as collateral related to surety bonds issued for the benefit of the Company or its affiliates in the ordinary course of business and primarily related to the Company's tower removal obligations. As of June 30, 2013, the Company had \$38.6 million in surety, payment and performance bonds for which it was required to post \$10.5 million in collateral. As of December 31, 2012, the Company had \$35.1 million in surety, payment and performance bonds for which it was required to post \$10.5 million in collateral. The Company periodically evaluates the collateral posted for its bonds to ensure that it meets the minimum requirements. The Company had also pledged \$2.3 million as of each of June 30, 2013 and December 31, 2012, as collateral related to its workers compensation policy.

Total acquisition capital expenditures	\$ 47,177	\$ 900,243	\$ 256,719	\$ 951,391

The Company recorded these amounts in prepaid rent on its Consolidated Balance Sheet.

The estimates of the fair value of the assets acquired and liabilities assumed at the date of an acquisition are subject to adjustment during the measurement period (up to one year from the particular acquisition date). The primary areas of the preliminary purchase price allocations that are not yet finalized relate to the fair value of certain tangible and intangible assets acquired and liabilities assumed, including contingent consideration and any related tax impact. The fair values of these net assets acquired are based on management's estimates and assumptions, as well as other information compiled by management, including valuations that utilize customary valuation procedures and techniques. During the measurement period, the Company will adjust assets and/or liabilities if new information is obtained about facts and circumstances that existed as of the acquisition date that, if known, would have resulted in a revised estimated value of those assets and/or liabilities as of that date. The effect of material measurement period adjustments to the estimated fair values is reflected as if the adjustments had been completed on the acquisition date. The impact of all changes that do not qualify as measurement period adjustments are included in current period earnings. If the actual results differ from the estimates and judgments used in these fair values, the amounts recorded in the consolidated financial statements could be subject to a possible impairment of the intangible assets, or require acceleration of the amortization expense of intangible assets in subsequent periods.

During the three months ended June 30, 2013, the Company identified a purchase price allocation adjustment related to an acquisition that occurred in the fourth quarter of the prior year, and accordingly, has recorded an adjustment to reclassify \$54.0 million from Property and Equipment to Intangible Assets. The effect of this entry was not material to the Company's Statement of Operations and Consolidated Balance Sheet for the periods presented, and as such, has only been reflected in the Consolidated Statement of Operations and Consolidated Balance Sheet as of and for the period ended June 30, 2013.

**12. STOCK-BASED COMPENSATION*****Stock Options***

The Company records compensation expense for employee stock options based on the estimated fair value of the options on the date of grant using the Black-Scholes option-pricing model with the assumptions included in the table below. The Company uses a combination of historical data and historical volatility to establish the expected volatility. The following assumptions were used to estimate the fair value of options granted using the Black-Scholes option-pricing model:

The Company had U.S. taxable losses during the six months ended June 30, 2013 and 2012, and, as a result, federal and state net operating loss carry-forwards have been generated. The U.S. federal and state net operating loss carry-forwards of the Company have a full valuation allowance as management believes it is not more-likely-than-not that the Company will generate sufficient taxable income in future periods to recognize the losses. However, a foreign tax provision is recognized because certain international subsidiaries of the Company have profitable operations or a net deferred tax liability position.

**14. SEGMENT DATA**

The Company operates principally in two business segments: site leasing and site development. The Company's reportable segments are strategic business units that offer different services. They are managed separately based on the fundamental differences in their operations. The site leasing segment includes results of the managed and sublease businesses. The site development segment includes the results of both consulting and construction related activities. During the fourth quarter of 2012, the Company combined the reporting of its site development segments, as the nature of the services were complementary to one another. All prior periods presented have been restated to conform to the current year presentation.

### **ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

We are a leading independent owner and operator of wireless communications towers. Our principal operations are in the United States and its territories. In addition, we own and operate towers in Canada, Central America, and South America. Our primary business line is our site leasing business, which contributed approximately 96% of our total segment operating profit for the year-to-date period ended June 30, 2013. In our site leasing business, we lease antenna space to wireless service providers on towers and other structures that we own, manage, or lease from others. The towers that we own have been constructed by us at the request of a wireless service provider, constructed based on our own initiative or acquired. As of June 30, 2013, we owned 17,587 tower sites, the substantial majority of which have been built by us or built by other tower owners or operators who, like us, have built such towers to lease space to multiple wireless service providers. We also managed or leased 4,900 communications sites, approximately 500 of which were revenue producing as of June 30, 2013. Our other business line is our site development business, through which we assist wireless service providers in developing and maintaining their own wireless service networks.

#### **Site Leasing Services**

Our primary focus is the leasing of antenna space on our multi-tenant towers to a variety of wireless service providers under long-term lease contracts in the United States, Canada, Central America, and South America. Site leasing revenues are received primarily from wireless service provider tenants, including AT&T, Sprint, Verizon, T-Mobile, Digicel, Claro, and Telefonica. Wireless service providers enter into different tenant leases with us, each of which relates to the lease or use of space at an individual tower site. In the United States and Canada our tenant leases are generally for an initial term of five to ten years with five 5-year renewal periods at the option of the tenant. These tenant leases typically contain specific rent escalators, which average 3-4% per year, including the renewal option periods. Tenant leases in our Central and South America markets typically have an initial term of 10 years with 5-year renewal periods. In Central America, we have similar rent escalators to that of leases in the United States and Canada while our leases in South America typically escalate in accordance with a standard cost of living index.

Cost of site leasing revenue primarily consists of:

Rental payments on ground and other underlying property leases;

Straight-line rent adjustment for the difference between rental payments made and the expense recorded as if the payments had been made evenly throughout the minimum lease term (which typically include renewal terms) of the underlying property leases;

Property taxes;

Site maintenance and monitoring costs (exclusive of employee related costs);

Utilities;

Property insurance; and

Deferred lease origination cost amortization.

Ground leases are generally for an initial term of five years or more with multiple renewal terms of five year periods at our option and provide for rent escalators which typically average 2-3% annually. Of the 17,587 tower sites we owned as of June 30, 2013, approximately 72% were located on parcels of land that we own, land subject to

**Table of Contents**

perpetual easements, or parcels of land in which we have a leasehold interest that extends beyond 20 years. For any given tower, costs are relatively fixed over a monthly or an annual time period. As such, operating costs for owned towers do not generally increase as a result of adding additional customers to the tower. The amount of direct costs associated with operating a tower varies from site to site depending on the taxing jurisdiction and the height and age of the tower. The ongoing maintenance requirements are typically minimal and include replacing lighting systems, painting a tower or upgrading or repairing an access road or fencing.

As indicated in the table below, our site leasing business generates approximately 96% of our total segment operating profit. For information regarding our operating segments, please see Note 14 of our Condensed Notes to Consolidated Financial Statements included in this quarterly report.

<sup>(1)</sup> Site leasing segment operating profit and total segment operating profit are non-GAAP financial measures. We reconcile these measures and other Regulation G disclosures in this quarterly report in the section entitled Non-GAAP Financial Measures.

We believe that over the long-term, site leasing revenues will continue to grow as wireless service providers lease additional antenna space on our towers due to increasing minutes of network use and data transfer, network expansion and network coverage requirements. We believe our site leasing business is characterized by stable and long-term recurring revenues, predictable operating costs and minimal non-discretionary capital expenditures. Due to the relatively young age and mix of our tower portfolio, we expect future expenditures required to maintain these towers to be minimal. Consequently, we expect to grow our cash flows by (1) adding tenants to our towers at minimal incremental costs by using existing tower capacity or requiring wireless service providers to bear all or a portion of the cost of tower modifications and (2) executing monetary amendments as wireless service providers upgrade their equipment. Furthermore, because our towers are strategically positioned and our customers typically do not relocate, we have historically experienced low tenant lease terminations as a percentage of revenue.

**Site Development Services**

Our site development business, which we conducted in the United States only, is complementary to our site leasing business and provides us the ability to keep in close contact with the wireless service providers who generate substantially all of our site leasing revenue and to capture ancillary revenues that are generated by our site leasing activities, such as antenna and equipment installation at our tower locations. Site development services revenues are

## **Table of Contents**

earned primarily from providing a full range of end to end services to wireless service providers or companies providing development or project management services to wireless service providers. Our services include: (1) network pre-design; (2) site audits; (3) identification of potential locations for towers and antennas; (4) support in buying or leasing of the location; (5) assistance in obtaining zoning approvals and permits; (6) tower and related site construction; (7) antenna installation; and (8) radio equipment installation, commissioning, and maintenance.

For information regarding our operating segments, see Note 14 of our Condensed Notes to Consolidated Financial Statements included in this quarterly report.

## **International Operations**

As of June 30, 2013, we had operations in Canada, Costa Rica, El Salvador, Guatemala, Nicaragua, Panama, and Brazil. Our operations in these countries are solely in the site leasing business, and we expect to expand operations through new builds and acquisitions. Tenant leases in the Canadian market typically have similar terms and conditions as those in the United States, with an initial term of five years, and specific rent escalators. Tenant leases in Central America and Brazil typically have a ten year initial term. Tenant leases in Central America typically have similar renewal terms and rent escalators as those in the United States and Canada while those in Brazil are based on a standard cost of living index.

In our Central American markets, significantly all of our revenue, expenses, and capital expenditures arising from our new build activities are denominated in U.S. dollars. Specifically, our ground leases, our tenant leases and most of our tower related expenses are due, and paid, in U.S. dollars. In our Central American markets, our local currency obligations are principally limited to (1) permitting and other local fees, (2) utilities, and (3) taxes. In our Canadian and Brazilian operations, significantly all of our revenue, expenses and capital expenditures, including tenant leases, ground leases and other tower-related expenses, are denominated in local currency.

## **CRITICAL ACCOUNTING POLICIES**

We have identified the policies and significant estimation processes listed in the Annual Report on Form 10-K as critical to our business operations and the understanding of our results of operations. The listing is not intended to be a comprehensive list. In many cases, the accounting treatment of a particular transaction is specifically dictated by accounting principles generally accepted in the United States, with no need for management's judgment in their application. In other cases, management is required to exercise judgment in the application of accounting principles with respect to particular transactions. The impact and any associated risks related to these policies on our business operations is discussed throughout Management's Discussion and Analysis of Financial Condition and Results of Operations where such policies affect reported and expected financial results. For a detailed discussion on the application of these and other accounting policies, see Note 2 of our Consolidated Financial Statements contained in our Annual Report on Form 10-K for the year ended December 31, 2012. Our preparation of our financial statements requires us to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of our financial statements, and the reported amounts of revenue and expenses during the reporting periods. Management bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. There can be no assurance that actual results will not differ from those estimates and such differences could be significant.

**Table of Contents****KEY PERFORMANCE INDICATORS****Non-GAAP Financial Measures**

This report contains certain non-GAAP measures, including Segment operating profit and Adjusted EBITDA information. We have provided below a description and reconciliation of such non-GAAP measures to their most directly comparable GAAP measures, and an explanation as to why management utilizes these measures.

**Segment Operating Profit:**

We believe that Segment operating profit is an indicator of the operating performance of our site leasing and site development segments and is used to provide management with the ability to monitor the operating results and margin of each segment, while excluding the impact of depreciation, accretion and amortization, which is largely fixed and non-cash in nature. Segment operating profit is not intended to be an alternative measure of revenue or segment gross profit as determined in accordance with GAAP.

Segment operating profit	\$ 8,863	\$ 4,120	\$ 4,743	\$ 15,837	\$ 6,901	\$ 8,936

Site leasing segment operating profit increased \$52.9 million for the three months ended June 30, 2013, as compared to the same period in the prior year, primarily due to additional profit generated by (1) the towers we acquired in the TowerCo and Vivo acquisitions in the fourth quarter of 2012 and from towers constructed subsequent to June 30, 2012, (2) organic site leasing growth from new leases, (3) contractual rent escalators, and (4) lease amendments with current tenants which increased the related rent to reflect additional equipment added to our towers.

Site leasing segment operating profit increased \$120.8 million for the six months ended June 30, 2013, as compared to the same period in the prior year, primarily due to additional profit generated by (1) the towers we acquired in the Mobilitie acquisition in the second quarter of 2012 and the TowerCo and Vivo acquisitions in the fourth quarter of 2012 and from towers constructed subsequent to June 30, 2012, (2) organic site leasing growth from new leases, (3) contractual rent escalators, and (4) lease amendments with current tenants which increased the related rent to reflect additional equipment added to our towers.

The increase in site development segment operating profit of \$4.7 and \$9.0 million for the three and six months ended June 30, 2013, respectively, is primarily due to the higher volume of work performed compared to the prior year associated with the deployment of next generation networks by wireless carriers, in particular, the Sprint Network Vision initiative.

## Table of Contents

### Adjusted EBITDA:

We define Adjusted EBITDA as net loss excluding the impact of net interest expenses, provision for taxes, depreciation, accretion, and amortization, asset impairment and decommission costs, non-cash compensation, net loss from extinguishment of debt, other income and expenses, acquisition related expenses, non-cash straight-line leasing revenue, and non-cash straight-line ground lease expense.

We believe that Adjusted EBITDA is an indicator of the financial performance of our core businesses. Adjusted EBITDA is a component of the calculation that has been used by our lenders to determine compliance with certain covenants under our Senior Credit Agreement, 8.25% Notes, 5.625% Notes, and 5.75% Notes. Adjusted EBITDA is not intended to be an alternative measure of operating income or gross profit margin as determined in accordance with GAAP.

The reconciliation of Adjusted EBITDA is as follows:

<sup>(2)</sup> Includes \$210 and \$450 of franchise taxes for the three and six months ended June 30, 2013, respectively, and \$308 and \$741 in the same periods from prior year, respectively, reflected in selling, general, and administrative expenses in the Consolidated Statement of Operations.

Adjusted EBITDA was \$196.4 million and \$384.1 million for the three and six months ended June 30, 2013 compared to \$142.9 million and \$264.4 million for the same period in the prior year, primarily due to increased segment operating profit from our site leasing and site development segments partially offset by an increase in selling, general and administrative costs.

## Edgar Filing: SBA COMMUNICATIONS CORP - Form 10-Q

Site leasing revenues increased \$75.9 million for the three months ended June 30, 2013, as compared to the same period in the prior year, due largely to (i) revenues from the towers that we acquired, including the towers acquired in the fourth quarter of 2012 related to TowerCo and Vivo, and towers that we constructed subsequent to June 30, 2012, and (ii) organic site leasing growth from new leases, contractual rent escalators and lease amendments which increased the related rent to reflect additional equipment added to our towers.

Site development revenues increased \$19.2 million for the three months ended June 30, 2013, as compared to the same period in the prior year, as a result of a higher volume of work performed during the quarter as compared to the same period last year associated with the deployment of next generation networks by wireless carriers, in particular, Sprint's Network Vision initiative.

## **Table of Contents**

### **Operating Expenses:**

Site leasing cost of revenues increased \$23.0 million for the three months ended June 30, 2013, as compared to the same period in the prior year, largely as a result of the growth in the number of tower sites owned by us, primarily driven by the TowerCo and Vivo towers acquired during the fourth quarter of 2012, partially offset by the positive impact of our ground lease purchase program.

Site development cost of revenues increased \$14.5 million for the three months ended June 30, 2013, as compared to the same period in the prior year, as a result of a higher volume of work associated with the deployment of next generation networks by wireless carriers.

Selling, general, and administrative expenses increased \$3.8 million for the three months ended June 30, 2013, as compared to the same period in the prior year, primarily as a result of an increase in personnel, salaries, and benefits and non-cash compensation due in part to our continued portfolio expansion.

Asset impairment and decommission costs increased \$5.8 million for the three months ended June 30, 2013, as compared to the same period in the prior year, primarily as a result of the write-off of assets and related costs associated with the decommissioning of 76 towers during the three months ended June 30, 2013.

Acquisition related expenses decreased \$13.9 million for the three months ended June 30, 2013, as compared to the same period in the prior year, primarily as a result of our acquisition of Mobilitie in the second quarter of 2012.

Depreciation, accretion, and amortization expense increased \$47.1 million for the three months ended June 30, 2013, as compared to the same period in the prior year, due to an increase in the number of tower sites built and acquired by us, primarily driven by the TowerCo and Vivo towers acquired during the fourth quarter of 2012.

### **Operating Income:**

Operating income increased \$14.8 million for the three months ended June 30, 2013 from the three months ended June 30, 2012, primarily due to higher segment operating profit in both the site leasing and site development segments and a reduction in acquisition related expenses partially offset by increases in asset impairment and decommission costs, depreciation, accretion, and amortization expense, and selling, general, and administrative expenses.

### **Other Income (Expense):**

Interest expense increased \$19.2 million due to the higher weighted average principal amount of cash-interest bearing debt outstanding for the three months ended June 30, 2013 compared to the three months ended June 30, 2012, primarily resulting from the issuance of the 2012-2 Term Loan, 2012-1 Tower Securities, 2013 Tower Securities, 5.75% Notes, and 5.625% Notes. These increases were partially offset by the maturity of the 1.875% Notes, full repayment of \$400.0 million on the Mobilitie Bridge Loan and \$375.0 million on the 8.0% Senior Notes, as well as, partial prepayments of \$310.7 million on the 2011 Term Loan, \$189.3 million on the 2012-2 Term Loan, and \$131.3 million on the 8.25% Senior Notes.

Non-cash interest expense decreased \$5.3 million for the three months ended June 30, 2013, compared to the same period in the prior year. This decrease primarily reflects the full repayment on the 1.875% Notes.

## **Table of Contents**

### **Loss from Extinguishment of Debt**

Loss from extinguishment of debt decreased \$21.5 million for the three months ended June 30, 2013, compared to the same period in the prior year primarily due to the premium paid on the 8.0% and 8.25% Senior Notes during the second quarter of 2012 and the write off of the related debt discount and deferred financing fees compared to the write off of the debt discount and deferred financing fees associated with the partial prepayment of \$500.0 million on the Term Loans during the second quarter of 2013.

### **Net Loss**

Net loss decreased \$17.6 million for the three months ended June 30, 2013 compared to the same period in the prior year, primarily due to an increase in our site leasing and site development segments operating profit and decreases in acquisition related expenses and loss from extinguishment of debt as compared to the same period in the prior year. These items were partially offset by increases in selling, general, and administrative expenses, asset impairment and decommission costs, depreciation, amortization, and accretion, interest expense, and other expenses.

### **Other Income (Expense):**

Interest expense increased \$36.4 million due to the higher weighted average principal amount of cash-interest bearing debt outstanding for the three months ended June 30, 2013 compared to the six months ended June 30, 2012, primarily resulting from the issuance of the 2012-2 Term Loan, 2012-1 Tower Securities, 2013 Tower Securities, 5.75% Notes, and 5.625% Notes. These increases were partially offset by the maturity of the 1.875% Notes, the full repayment of \$400.0 million on the Mobilitie Bridge Loan, and \$375.0 million on the 8.0% Senior Notes, as well as partial prepayments of \$310.7 million on the 2011 Term Loan, \$189.3 million on the 2012-2 Term Loan, and \$131.3 million on the 8.25% Senior Notes.

Non-cash interest expense decreased \$4.9 million from the six months ended June 30, 2013, compared to the same period in the prior year. This decrease primarily reflects the full repayment on the 1.875% Notes.

Amortization of deferred financing fees increased \$1.4 million for the six months ended June 30, 2013 compared to the same period in the prior year, primarily resulting from the issuance of the 2012-1 Term Loan, 2012-2 Term

Loan, 2012-1 Tower Securities, 2013 Tower Securities, 5.75% Notes, and 5.625% Notes. These increases were offset by the full redemption of \$375.0 million of principal balance of the 8.0% Notes and the redemption of \$131.3 million in aggregate principal balance of the 8.25% Notes.

### **Loss from Extinguishment of Debt**

Loss from extinguishment of debt decreased \$21.4 million for the six months ended June 30, 2013, compared to the same period in the prior year primarily due to the premium paid on the 8.0% and 8.25% Senior Notes during the second quarter of 2012 and the write off of the related debt discount and deferred financing fees compared to the write off of the debt discount and deferred financing fees associated with the partial prepayment of \$500.0 million on the Term Loans during the second quarter of 2013.

### **Net Loss**

Net loss decreased \$17.8 million for the six months ended June 30, 2013 compared to the same period in the prior year, primarily due to an increase in our site leasing and site development segments operating profit and decreases in acquisition related expenses and loss from extinguishment of debt as compared to the same period in the prior year. These items were partially offset by increases in selling, general, and administrative expenses, asset impairment and decommission costs, depreciation, amortization, and accretion, interest expense, and other expenses.

**Table of Contents****LIQUIDITY AND CAPITAL RESOURCES**

SBA Communications Corporation is a holding company with no business operations of its own. SBA Communications' only significant asset is the outstanding capital stock of SBA Telecommunications, LLC (formerly known as SBA Telecommunications, Inc.) (Telecommunications), which is also a holding company that owns equity interests in entities that directly or indirectly own all of our domestic and international towers and assets. We conduct all of our business operations through Telecommunications' subsidiaries. Accordingly, our only source of cash to pay our obligations, other than financings, is distributions with respect to our ownership interest in our subsidiaries from the net earnings and cash flow generated by these subsidiaries.

We believe that our principal use of liquidity will be to fund tower portfolio growth and, secondarily, to fund our stock repurchase program. In the future, we may repurchase, for cash or equity, our outstanding indebtedness in privately-negotiated or open market transactions in order to optimize our liquidity and leverage and take advantage of market opportunities. If we undertake debt repurchases or exchanges, these actions could materially impact the amount and composition of indebtedness outstanding or dilute our existing shareholders.

We fund our growth, including our tower portfolio growth, through cash flows from operations, long-term indebtedness and equity issuances. We have issued secured and unsecured debt instruments at various levels of our organizational structure to minimize our financing costs while maximizing our operational flexibility.

A summary of our cash flows is as follows:

	For the six months ended	
	June 30, 2013	June 30, 2012
	(in thousands)	
Summary cash flow information:		
Cash provided by operating activities	\$ 228,159	\$ 148,769

Cash provided by financing activities	54,308	890,232

Cash and cash equivalents, beginning of the period	233,099	47,316
Cash and cash equivalents, end of the period	\$ 189,442	\$ 86,739

*Operating Activities*

Cash provided by operating activities was \$228.2 million for the six months ended June 30, 2013 as compared to \$148.8 million for the six months ended June 30, 2012. This increase was primarily due to an increase in segment operating profit from the site leasing and site development operating segments partially offset by increased selling, general, and administrative expenses, as well as, increased cash interest payments relating to the higher average amount of cash-interest bearing debt outstanding for the six months ended June 30, 2013 compared to the six months ended June 30, 2012.

(2) Excludes \$4.9 and \$3.6 million spent to extend ground lease terms for the six months ended June 30, 2013 and 2012.

During the remainder of 2013, we expect to incur non-discretionary cash capital expenditures associated with tower maintenance and general corporate expenditures of \$6.0 million to \$10.0 million and discretionary cash capital expenditures, based on current obligations, of \$478.0 million to \$518.0 million primarily associated with new tower construction, additional tower acquisitions, tower augmentations and ground lease purchases. We expect to fund these additional cash capital expenditures from cash on hand, cash flow from operations, and borrowings under the Revolving Credit Facility. The exact amount of our future cash capital expenditures will depend on a number of factors including amounts necessary to support our tower portfolio, our new tower build and tower acquisition programs, and our ground lease purchase program.

Subsequent to June 30, 2013, we acquired 5 towers and related assets and liabilities and the rights to manage 3 additional communication sites for an aggregate consideration of \$5.4 million in cash.
