

GOLDMAN SACHS GROUP INC
Form 424B2
August 29, 2014
Table of Contents

Filed Pursuant to Rule 424(b)(2)
Registration Statement No. 333-176914

The Goldman Sachs Group, Inc.

\$2,720,000

Leveraged EURO STOXX 50® Index-Linked Notes due 2021

The notes do not bear interest. The amount that you will be paid on your notes on the stated maturity date (September 1, 2021) is based on the performance of the EURO STOXX 50® Index as measured from the trade date (August 27, 2014) to and including the determination date (August 27, 2021). If the final index level on the determination date is greater than the initial index level of 3,194.45, the return on your notes will be positive. **If the final index level is equal to or less than the initial index level, you will receive the face amount of your notes.**

To determine your payment at maturity, we will calculate the index return, which is the percentage increase or decrease in the final index level from the initial index level. On the stated maturity date, for each \$1,000 face amount of your notes you will receive an amount in cash equal to:

if the index return is *positive* (the final index level is *greater than* the initial index level), the *sum* of (i) \$1,000 *plus* (ii) the *product* of (a) \$1,000 *times* (b) 1.05 *times* (c) the index return; or

if the index return is *zero or negative* (the final index level is *equal to or less than* the initial index level), \$1,000.

Your investment in the notes involves certain risks, including, among other things, our credit risk. See page PS-11.

You should read the additional disclosure herein so that you may better understand the terms and risks of your investment.

The estimated value of your notes at the time the terms of your notes were set on the trade date (as determined by reference to pricing models used by Goldman, Sachs & Co. (GS&Co.) and taking into account our credit spreads) was equal to approximately \$923 per \$1,000 face amount, which is less than the original issue price. The value of your notes at any time will reflect many factors and cannot be predicted; however, the price (not including GS&Co.'s customary bid and ask spreads) at which GS&Co. would initially buy or sell notes (if it makes a market, which it is not obligated to do) and the value that GS&Co. will initially use for account statements and otherwise equals approximately \$960 per \$1,000 face amount, which exceeds the estimated value of your notes as determined by reference to these models. The amount of the excess will decline on a straight line basis over the period from the trade date through August 27, 2015.

Original issue date:	August 29, 2014	Original issue price:	100.00% of the face amount*
Underwriting discount:	4.40% of the face amount*	Net proceeds to the issuer:	95.60% of the face amount

* The original issue price will be 96.50% for certain investors; see Summary Information Supplemental plan of distribution on page PS-5. Neither the Securities and Exchange Commission nor any other regulatory body has approved or disapproved of these securities or passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense. The notes are not

bank deposits and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank.

Goldman, Sachs & Co.

Pricing Supplement No. 3046 dated August 27, 2014.

Table of Contents

The issue price, underwriting discount and net proceeds listed above relate to the notes we sell initially. We may decide to sell additional notes after the date of this pricing supplement, at issue prices and with underwriting discounts and net proceeds that differ from the amounts set forth above. The return (whether positive or negative) on your investment in notes will depend in part on the issue price you pay for such notes.

Goldman Sachs may use this prospectus in the initial sale of the notes. In addition, Goldman, Sachs & Co. or any other affiliate of Goldman Sachs may use this prospectus in a market-making transaction in a note after its initial sale. ***Unless Goldman Sachs or its agent informs the purchaser otherwise in the confirmation of sale, this prospectus is being used in a market-making transaction.***

About Your Prospectus

The notes are part of the Medium-Term Notes, Series D program of The Goldman Sachs Group, Inc. This prospectus includes this pricing supplement and the accompanying documents listed below. This pricing supplement constitutes a supplement to the documents listed below and should be read in conjunction with such documents:

Product supplement no. 1631 dated August 24, 2012

General terms supplement dated September 23, 2013

Prospectus supplement dated September 19, 2011

Prospectus dated September 19, 2011

The information in this pricing supplement supersedes any conflicting information in the documents listed above. In addition, some of the terms or features described in the listed documents may not apply to your notes.

Table of Contents**Leveraged EURO STOXX 50® Index-Linked Notes due 2021
INVESTMENT THESIS**

For investors willing to forgo interest payments for the potential to earn 105.00% of any positive return of the underlier
DETERMINING THE CASH SETTLEMENT AMOUNT

At maturity, for each \$1,000 face amount, the investor will receive (in each case as a percentage of the face amount):

If the final underlier level is above 100.00% of its initial level, 100.00% *plus* 105.00% *times* the underlier return

If the final underlier level is at or below its initial level, 100.00%

KEY TERMS

Issuer:	The Goldman Sachs Group, Inc.
Underlier:	The EURO STOXX 50® Index (Bloomberg symbol, SX5E Index)
Face Amount:	\$2,720,000 in the aggregate; each note will have a face amount equal to \$1,000
Trade Date:	August 27, 2014
Settlement Date:	August 29, 2014
Determination Date:	August 27, 2021
Stated Maturity Date:	September 1, 2021
Initial Underlier Level:	3,194.45
Final Underlier Level:	The closing level of the underlier on the determination date
Underlier Return:	The <i>quotient</i> of (i) the final underlier level <i>minus</i> the initial underlier level <i>divided by</i> (ii) the initial underlier level, expressed as a positive or negative percentage.
Upside Participation Rate:	105.00%
CUSIP/ISIN:	38147QDV5 / US38147QDV59

HYPOTHETICAL PAYMENT AT MATURITY

Table of Contents

SUMMARY INFORMATION

We refer to the notes we are offering by this pricing supplement as the offered notes or the notes. Each of the offered notes, including your notes, has the terms described below. Please note that in this pricing supplement, references to The Goldman Sachs Group, Inc., we, our and us mean only The Goldman Sachs Group, Inc. and do not include its consolidated subsidiaries. Also, references to the accompanying prospectus mean the accompanying prospectus, dated September 19, 2011, as supplemented by the accompanying prospectus supplement, dated September 19, 2011, of The Goldman Sachs Group, Inc. relating to the Medium-Term Notes, Series D program of The Goldman Sachs Group, Inc., references to the accompanying general terms supplement mean the accompanying general terms supplement, dated September 23, 2013, of The Goldman Sachs Group, Inc. and references to the accompanying product supplement no. 1631 mean the accompanying product supplement no. 1631, dated August 24, 2012, of The Goldman Sachs Group, Inc.

This section is meant as a summary and should be read in conjunction with the section entitled General Terms of the Underlier-Linked Notes on page S-27 of the accompanying product supplement no. 1631 and Supplemental Terms of the Notes on page S-13 of the accompanying general terms supplement. Please note that certain features, as noted below, described in the accompanying product supplement no. 1631 and general terms supplement are not applicable to the notes. This pricing supplement supersedes any conflicting provisions of the accompanying product supplement no. 1631 or the accompanying general terms supplement.

Key Terms

Issuer: The Goldman Sachs Group, Inc.

Underlier: the EURO STOXX 50® Index (Bloomberg symbol, SX5E Index)

Specified currency: U.S. dollars (\$)

Terms to be specified in accordance with the accompanying product supplement no. 1631:

type of notes: notes linked to a single underlier

exchange rates: not applicable

averaging dates: not applicable

redemption right or price dependent redemption right: not applicable

cap level: not applicable

downside participation percentage: not applicable

interest: not applicable

Face amount: each note will have a face amount of \$1,000; \$2,720,000 in the aggregate for all the offered notes; the aggregate face amount of the offered notes may be increased if the issuer, at its sole option, decides to sell an additional amount of the offered notes on a date subsequent to the date of this pricing supplement

Purchase at amount other than face amount: the amount we will pay you at the stated maturity date for your notes will not be adjusted based on the issue price you pay for your notes, so if you acquire notes at a premium (or discount) to face amount and hold them to the stated maturity date, it could affect your investment in a number of ways. The return on your investment in such notes will be lower (or higher) than it would have been had you purchased the notes at face amount. See **Additional Risk Factors Specific to Your Notes** **If You Purchase Your Notes at a Premium to Face Amount, the Return on Your Investment Will Be Lower Than the Return on Notes Purchased at Face Amount and the Impact of Certain Key Terms of the Notes Will be Negatively Affected** on page PS-13 of this pricing supplement.

Supplemental discussion of U.S. federal income tax consequences: The notes will be treated as debt instruments subject to the special rules governing contingent payment debt instruments for U.S. federal income tax purposes. Under this treatment, it is the opinion of Sidley Austin LLP that if you are a U.S. individual or taxable entity, you generally should be required to pay taxes on ordinary income from the notes over their term based on the comparable yield for the notes. In addition, any gain you may recognize on the sale, exchange or maturity of the notes will be taxed as ordinary interest income.

PS-4

Table of Contents

Cash settlement amount (on the stated maturity date): for each \$1,000 face amount of your notes, we will pay you on the stated maturity date an amount in cash equal to, the *greater* of:

\$1,000 *plus* the *product* of the underlier return *times* \$1,000 *times* the upside participation rate; or

the face amount

Initial underlier level: 3,194.45

Final underlier level: the closing level of the underlier on the determination date, except in the limited circumstances described under Supplemental Terms of the Notes Consequences of a Market Disruption Event or a Non-Trading Day on page S-19 of the accompanying general terms supplement and subject to adjustment as provided under Supplemental Terms of the Notes Discontinuance or Modification of an Underlier on page S-23 of the accompanying general terms supplement

Underlier return: the *quotient* of (1) the final underlier level *minus* the initial underlier level *divided* by (2) the initial underlier level, expressed as a percentage

Upside participation rate: 105.00%

Trade date: August 27, 2014

Original issue date (settlement date): August 29, 2014

Determination date: August 27, 2021, subject to adjustment as described under Supplemental Terms of the Notes Determination Date on page S-14 of the accompanying general terms supplement

Stated maturity date: September 1, 2021, subject to adjustment as described under Supplemental Terms of the Notes Stated Maturity Date on page S-13 of the accompanying general terms supplement

No interest: the offered notes do not bear interest

No listing: the offered notes will not be listed on any securities exchange or interdealer quotation system

No redemption: the offered notes will not be subject to redemption right or price dependent redemption right

Closing level: as described under Supplemental Terms of the Notes Special Calculation Provisions Closing Level on page S-27 of the accompanying general terms supplement

Business day: as described under Supplemental Terms of the Notes Special Calculation Provisions Business Day on page S-27 of the accompanying general terms supplement

Trading day: as described under Supplemental Terms of the Notes Special Calculation Provisions Trading Day on page S-27 of the accompanying general terms supplement

Use of proceeds and hedging: as described under Use of Proceeds and Hedging on page S-31 of the accompanying product supplement no. 1631

ERISA: as described under Employee Retirement Income Security Act on page S-42 of the accompanying product supplement no. 1631

Supplemental plan of distribution: as described under Supplemental Plan of Distribution on page S-43 of the accompanying product supplement no. 1631; The Goldman Sachs Group, Inc. estimates that its share of the total offering expenses, excluding underwriting discounts and commissions, will be approximately \$10,000.

Edgar Filing: GOLDMAN SACHS GROUP INC - Form 424B2

The Goldman Sachs Group, Inc. has agreed to sell to Goldman, Sachs & Co., and Goldman, Sachs & Co. has agreed to purchase from The Goldman Sachs Group, Inc., the aggregate face amount of the offered notes specified on the front cover of this pricing supplement. Goldman, Sachs & Co. proposes initially to offer the notes to the public at the original issue prices set forth on the cover page of this pricing supplement, and to certain securities dealers at such prices less a concession not in excess of 4.00% of the face amount. The original issue price for notes purchased by certain fee-based advisory accounts will be 96.50% of the face amount of the notes, which will reduce the underwriting discount specified on the cover of this pricing supplement with respect to such notes to 0.90%.

PS-5

Table of Contents

We will deliver the notes against payment therefor in New York, New York on August 29, 2014, which is the second scheduled business day following the date of this pricing supplement and of the pricing of the notes.

We have been advised by Goldman, Sachs & Co. that it intends to make a market in the notes. However, neither Goldman, Sachs & Co. nor any of our other affiliates that makes a market is obligated to do so and any of them may stop doing so at any time without notice. No assurance can be given as to the liquidity or trading market for the notes.

Calculation agent: Goldman, Sachs & Co.

CUSIP no.: 38147QDV5

ISIN no.: US38147QDV59

FDIC: the notes are not bank deposits and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank

PS-6

Table of Contents

HYPOTHETICAL EXAMPLES

The following table and chart are provided for purposes of illustration only. They should not be taken as an indication or prediction of future investment results and are intended merely to illustrate the impact that the various hypothetical underlier levels on the determination date could have on the cash settlement amount at maturity assuming all other variables remain constant.

The examples below are based on a range of final underlier levels that are entirely hypothetical; no one can predict what the underlier level will be on any day throughout the life of your notes, and no one can predict what the final underlier level will be on the determination date. The underlier has been highly volatile in the past meaning that the underlier level has changed considerably in relatively short periods and its performance cannot be predicted for any future period.

The information in the following examples reflects hypothetical rates of return on the offered notes assuming that they are purchased on the original issue date at the face amount and held to the stated maturity date. If you sell your notes in a secondary market prior to the stated maturity date, your return will depend upon the market value of your notes at the time of sale, which may be affected by a number of factors that are not reflected in the table below such as interest rates, the volatility of the underlier and our creditworthiness. In addition, the estimated value of your notes at the time the terms of your notes were set on the trade date (as determined by reference to pricing models used by Goldman, Sachs & Co.) was less than the original issue price of your notes. For more information on the estimated value of your notes, see **Additional Risk Factors Specific to Your Notes** **The Estimated Value of Your Notes At the Time the Terms of Your Notes Were Set On the Trade Date (as Determined By Reference to Pricing Models Used By Goldman, Sachs & Co.) Was Less Than the Original Issue Price Of Your Notes** on page PS-11 of this pricing supplement. The information in the table also reflects the key terms and assumptions in the box below.

Key Terms and Assumptions

Face amount	\$1,000
Upside participation rate	105.00%

Neither a market disruption event nor a non-trading day occurs on the originally scheduled determination date

No change in or affecting any of the underlier stocks or the method by which the underlier sponsor calculates the underlier

Notes purchased on original issue date at the face amount and held to the stated maturity date

For these reasons, the actual performance of the underlier over the life of your notes, as well as the amount payable at maturity may bear little relation to the hypothetical examples shown below or to the historical underlier levels shown elsewhere in this pricing supplement. For information about the historical levels of the underlier during recent periods, see **The Underlier** **Historical Closing Levels of the Underlier** below. Before investing in the offered notes, you should consult publicly available information to determine the levels of the underlier between the date of this pricing supplement and the date of your purchase of the offered notes.

Also, the hypothetical examples shown below do not take into account the effects of applicable taxes. Because of the U.S. tax treatment applicable to your notes, tax liabilities could affect the after-tax rate of return on your notes to a comparatively greater extent than the after-tax return on the underlier stocks.

The levels in the left column of the table below represent hypothetical final underlier levels and are expressed as percentages of the initial underlier level. The amounts in the right column represent the hypothetical cash settlement amounts, based on the corresponding hypothetical final underlier level (expressed as a percentage of the initial underlier level), and are expressed as percentages of the face amount of a note (rounded to the nearest one-thousandth of a percent). Thus, a hypothetical cash settlement amount of 100.000% means that the value of the cash payment that we would deliver for each

Table of Contents

\$1,000 of the outstanding face amount of the offered notes on the stated maturity date would equal 100.000% of the face amount of a note, based on the corresponding hypothetical final underlier level (expressed as a percentage of the initial underlier level) and the assumptions noted above.

Hypothetical Final Underlier Level	Hypothetical Cash Settlement Amount
(as Percentage of Initial Underlier Level)	(as Percentage of Face Amount)
150.000%	152.500%
140.000%	142.000%
130.000%	131.500%
120.000%	121.000%
110.000%	110.500%
100.000%	100.000%
75.000%	100.000%
50.000%	100.000%
25.000%	100.000%
0.000%	100.000%

If, for example, the final underlier level were determined to be 25.000% of the initial underlier level, the cash settlement amount that we would deliver on your notes at maturity would be 100.000% of the face amount of your notes, as shown in the table above. As a result, if you purchased your notes on the original issue date at the face amount and held them to the stated maturity date, you would receive no return on your investment.

The following chart also shows a graphical illustration of the hypothetical cash settlement amounts (expressed as a percentage of the face amount of your notes) that we would pay on your notes on the stated maturity date, if the final underlier level (expressed as a percentage of the initial underlier level) were any of the hypothetical levels shown on the horizontal axis. The chart shows that any hypothetical final underlier level (expressed as a percentage of the initial underlier level) of less than 100.000% (the section left of the 100.000% marker on the horizontal axis) would result in a hypothetical cash settlement amount of 100.000% of the face amount of your notes.

Table of Contents

The cash settlement amounts shown above are entirely hypothetical; they are based on market prices for the underlier stocks that may not be achieved on the determination date and on assumptions that may prove to be erroneous. The actual market value of your notes on the stated maturity date or at any other time, including any time you may wish to sell your notes, may bear little relation to the hypothetical cash settlement amounts shown above, and these amounts should not be viewed as an indication of the financial return on an investment in the offered notes. The hypothetical cash settlement amounts on notes held to the stated maturity date in the examples above assume you purchased your notes at their face amount and have not been adjusted to reflect the actual issue price you pay for your notes. The return on your investment (whether positive or negative) in your notes will be affected by the amount you pay for your notes. If you purchase your notes for a price other than the face amount, the return on your investment will differ from, and may be significantly lower than, the hypothetical returns suggested by the above examples. Please read **Additional Risk Factors Specific to the Underlier-Linked Notes The Market Value of Your Notes May Be Influenced by Many Unpredictable Factors** on page S-25 of the accompanying product supplement no. 1631.

Payments on the notes are economically equivalent to the amounts that would be paid on a combination of other instruments. For example, payments on the notes are economically equivalent to a combination of an interest-bearing bond bought by the holder and one or more options entered into between the holder and us (with one or more implicit option premiums paid over time). The discussion in this paragraph does not modify or affect the terms of the notes or the U.S. federal income tax treatment of the notes, as described elsewhere in this pricing supplement.

PS-9

Table of Contents

We cannot predict the actual final underlier level or what the market value of your notes will be on any particular trading day, nor can we predict the relationship between the underlier level and the market value of your notes at any time prior to the stated maturity date. The actual amount that you will receive at maturity and the rate of return on the offered notes will depend on the actual final underlier level determined by the calculation agent as described above. Moreover, the assumptions on which the hypothetical returns are based may turn out to be inaccurate. Consequently, the amount of cash to be paid in respect of your notes on the stated maturity date may be very different from the information reflected in the table and chart above.

PS-10

Table of Contents

ADDITIONAL RISK FACTORS SPECIFIC TO YOUR NOTES

An investment in your notes is subject to the risks described below, as well as the risks described under "Considerations Relating to Indexed Securities" in the accompanying prospectus dated September 19, 2011, "Additional Risk Factors Specific to the Notes" in the accompanying general terms supplement, and "Additional Risk Factors Specific to the Underlier-Linked Notes" in the accompanying product supplement no. 1631. You should carefully review these risks as well as the terms of the notes described herein and in the accompanying prospectus, dated September 19, 2011, as supplemented by the accompanying prospectus supplement, dated September 19, 2011, the accompanying general terms supplement, dated September 23, 2013, and the accompanying product supplement no. 1631, dated August 24, 2012, of The Goldman Sachs Group, Inc. Your notes are a riskier investment than ordinary debt securities. Also, your notes are not equivalent to investing directly in the underlier stocks, i.e., the stocks comprising the underlier to which your notes are linked. You should carefully consider whether the offered notes are suited to your particular circumstances.

The Estimated Value of Your Notes At the Time the Terms of Your Notes Were Set On the Trade Date (as Determined By Reference to Pricing Models Used By Goldman, Sachs & Co.) Was Less Than the Original Issue Price Of Your Notes

The original issue price for your notes exceeds the estimated value of your notes as of the time the terms of your notes were set on the trade date, as determined by reference to Goldman, Sachs & Co.'s pricing models and taking into account our credit spreads. Such estimated value on the trade date is set forth on the cover of this pricing supplement; after the trade date, the estimated value as determined by reference to these models will be affected by changes in market conditions, our creditworthiness and other relevant factors. The price at which Goldman, Sachs & Co. would initially buy or sell your notes (if Goldman, Sachs & Co. makes a market, which it is not obligated to do), and the value that Goldman, Sachs & Co. will initially use for account statements and otherwise, also exceeds the estimated value of your notes as determined by reference to these models. As agreed by Goldman, Sachs & Co. and the distribution participants, the amount of this excess will decline on a straight line basis over the period from the date hereof through the applicable date set forth on the cover. Thereafter, if Goldman, Sachs & Co. buys or sells your notes it will do so at prices that reflect the estimated value determined by reference to such pricing models at that time. The price at which Goldman, Sachs & Co. will buy or sell your notes at any time also will reflect its then current bid and ask spread for similar sized trades of structured notes.

In estimating the value of your notes as of the time the terms of your notes were set on the trade date, as disclosed on the front cover of this pricing supplement, Goldman, Sachs & Co.'s pricing models consider certain variables, including principally our credit spreads, interest rates (forecasted, current and historical rates), volatility, price-sensitivity analysis and the time to maturity of the notes. These pricing models are proprietary and rely in part on certain assumptions about future events, which may prove to be incorrect. As a result, the actual value you would receive if you sold your notes in the secondary market, if any, to others may differ, perhaps materially, from the estimated value of your notes determined by reference to our models due to, among other things, any differences in pricing models or assumptions used by others. See

Additional Risk Factors Specific to the Underlier-Linked Notes – The Market Value of Your Notes May Be Influenced by Many Unpredictable Factors on page S-25 of the accompanying product supplement no. 1631.

The difference between the estimated value of your notes as of the time the terms of your notes were set on the trade date and the original issue price is a result of certain factors, including principally the underwriting discount and commissions, the expenses incurred in creating, documenting and marketing the notes, and an estimate of the difference between the amounts we pay to Goldman, Sachs & Co. and the amounts Goldman, Sachs & Co. pays to us in connection with your notes. We pay to Goldman, Sachs & Co. amounts based on what we would pay to holders of a non-structured note with a similar maturity. In return for such payment, Goldman, Sachs & Co. pays to us the amounts we owe under your notes.

In addition to the factors discussed above, the value and quoted price of your notes at any time will reflect many factors and cannot be predicted. If Goldman, Sachs & Co. makes a market in the notes, the price quoted by Goldman, Sachs & Co. would reflect any changes in market conditions and other relevant factors, including any deterioration in our creditworthiness or perceived creditworthiness. These changes

Table of Contents

may adversely affect the value of your notes, including the price you may receive for your notes in any market making transaction. To the extent that Goldman, Sachs & Co. makes a market in the notes, the quoted price will reflect the estimated value determined by reference to Goldman, Sachs & Co.'s pricing models at that time, plus or minus its then current bid and ask spread for similar sized trades of structured notes (and subject to the declining excess amount described above).

Furthermore, if you sell your notes, you will likely be charged a commission for secondary market transactions, or the price will likely reflect a dealer discount. This commission or discount will further reduce the proceeds you would receive for your notes in a secondary market sale.

There is no assurance that Goldman, Sachs & Co. or any other party will be willing to purchase your notes at any price and, in this regard, Goldman, Sachs & Co. is not obligated to make a market in the notes. See **Additional Risk Factors Specific to the Underlier-Linked Notes** **Your Notes May Not Have an Active Trading Market** on page S-25 of the accompanying product supplement no. 1631.

The Notes Are Subject to the Credit Risk of the Issuer

Although the return on the notes will be based on the performance of the underlier, the payment of any amount due on the notes is subject to our credit risk. The notes are our unsecured obligations. Investors are dependent on our ability to pay all amounts due on the notes, and therefore investors are subject to our credit risk and to changes in the market's view of our creditworthiness. See **Description of the Notes We May Offer** **Information About Our Medium-Term Notes, Series D Program** **How the Notes Rank Against Other Debt** on page S-4 of the accompanying prospectus supplement.

The Amount Payable on Your Notes Is Not Linked to the Level of the Underlier at Any Time Other than the Determination Date

The final underlier level will be based on the closing level of the underlier on the determination date (subject to adjustment as described elsewhere in this pricing supplement). Therefore, if the closing level of the underlier dropped precipitously on the determination date, the cash settlement amount for your notes may be significantly less than it would have been had the cash settlement amount been linked to the closing level of the underlier prior to such drop in the level of the underlier. Although the actual level of the underlier on the stated maturity date or at other times during the life of your notes may be higher than the final underlier level, you will not benefit from the closing level of the underlier at any time other than on the determination date.

Also, the market price of your notes prior to the stated maturity date may be significantly lower than the purchase price you pay for your notes. Consequently, if you sell your notes before the stated maturity date, you may receive far less than the amount of your investment in the notes.

Your Notes Do Not Bear Interest

You will not receive any interest payments on your notes. As a result, even if the cash settlement amount payable for your notes on the stated maturity date exceeds the face amount of your notes, the overall return you earn on your notes may be less than you would have earned by investing in a non-indexed debt security of comparable maturity that bears interest at a prevailing market rate.

You Have No Shareholder Rights or Rights to Receive Any Underlier Stock

Investing in your notes will not make you a holder of any of the underlier stocks. Neither you nor any other holder or owner of your notes will have any voting rights, any right to receive dividends or other distributions, any rights to make a claim against the underlier stocks or any other rights with respect to the underlier stocks. Your notes will be paid in cash and you will have no right to receive delivery of any underlier stocks.

We May Sell an Additional Aggregate Face Amount of the Notes at a Different Issue Price

At our sole option, we may decide to sell an additional aggregate face amount of the notes subsequent to the date of this pricing supplement. The issue price of the notes in the subsequent sale may differ substantially (higher or lower) from the original issue price you paid as provided on the cover of this pricing supplement.

Table of Contents

If You Purchase Your Notes at a Premium to Face Amount, the Return on Your Investment Will Be Lower Than the Return on Notes Purchased at Face Amount and the Impact of Certain Key Terms of the Notes Will be Negatively Affected

The cash settlement amount will not be adjusted based on the issue price you pay for the notes. If you purchase notes at a price that differs from the face amount of the notes, then the return on your investment in such notes held to the stated maturity date will differ from, and may be substantially less than, the return on notes purchased at face amount. If you purchase your notes at a premium to face amount and hold them to the stated maturity date the return on your investment in the notes will be lower than it would have been had you purchased the notes at face amount or a discount to face amount.

An Investment in the Offered Notes Is Subject to Risks Associated with Foreign Securities

You should be aware that investments in securities linked to the value of foreign equity securities involve particular risks. The foreign securities markets whose stocks comprise the underlier may have less liquidity and may be more volatile than U.S. or other securities markets and market developments may affect foreign markets differently from U.S. or other securities markets. Direct or indirect government intervention to stabilize the foreign securities markets, as well as cross-shareholdings in foreign companies, may affect trading prices and volumes in those markets. Also, there is generally less publicly available information about foreign companies than about those U.S. companies that are subject to the reporting requirements of the U.S. Securities and Exchange Commission, and foreign companies are subject to accounting, auditing and financial reporting standards and requirements that differ from those applicable to U.S. reporting companies.

Securities prices in foreign countries are subject to political, economic, financial and social factors that apply in those geographical regions. These factors, which could negatively affect those securities markets, include the possibility of recent or future changes in a foreign government's economic and fiscal policies, the possible imposition of, or changes in, currency exchange laws or other laws or restrictions applicable to foreign companies or investments in foreign equity securities and the possibility of fluctuations in the rate of exchange between currencies, the possibility of outbreaks of hostility and political instability and the possibility of natural disaster or adverse public health development in the region. Moreover, foreign economies may differ favorably or unfavorably from the U.S. economy in important respects such as growth of gross national product, rate of inflation, capital reinvestment, resources and self-sufficiency.

Your Notes Will Be Treated as Debt Instruments Subject to Special Rules Governing Contingent Payment Debt Instruments for U.S. Federal Income Tax Purposes

The notes will be treated as debt instruments subject to special rules governing contingent payment debt instruments for U.S. federal income tax purposes. If you are a U.S. individual or taxable entity, you generally will be required to pay taxes on ordinary income from the notes over their term based on the comparable yield for the notes, even though you will not receive any payments from us until maturity. This comparable yield is determined solely to calculate the amount on which you will be taxed prior to maturity and is neither a prediction nor a guarantee of what the actual yield will be. In addition, any gain you may recognize on the sale, exchange or maturity of the notes will be taxed as ordinary interest income. If you are a secondary purchaser of the notes, the tax consequences to you may be different. Please see Supplemental Discussion of Federal Income Tax Consequences below for a more detailed discussion. Please also consult your tax advisor concerning the U.S. federal income tax and any other applicable tax consequences to you of owning your notes in your particular circumstances.

Foreign Account Tax Compliance Act (FATCA) Withholding May Apply to Payments on Your Notes, Including as a Result of the Failure of the Bank or Broker Through Which You Hold the Notes to Provide Information to Tax Authorities

Your notes could be subject to a U.S. withholding tax of 30% under FATCA. This tax could apply if you or any non-U.S. person or entity that receives a payment (directly or indirectly) on your behalf (including a bank, custodian, broker or other payee, at any point in the series of payments made on your notes) does not comply with the U.S. information reporting, withholding, identification, certification, and related requirements imposed by FATCA. The payments potentially subject to this withholding tax include

Table of Contents

interest (including original issue discount) and other periodic payments as well as payments made upon the sale, exchange or maturity of your notes.

You should consult your tax advisor regarding the relevant U.S. law and other official guidance on FATCA. You could be affected by this withholding if, for example, your bank or broker through which you hold the notes is subject to withholding because it fails to comply with these requirements. This might be the case even if you would not otherwise have been directly subject to withholding. Accordingly, you should consult your bank or broker about the likelihood that payments to it (for credit to you) will become subject to withholding in the payment chain.

The withholding tax described above could currently apply to all interest (including original issue discount) and other periodic payments made on the notes. In addition, the withholding tax described above could apply to payments made upon the sale, exchange or maturity of the notes on or after January 1, 2017.

We will not pay any additional amounts in respect of this withholding tax, so if this withholding applies, you will receive significantly less than the amount that you would have otherwise received with respect to your notes. Depending on your circumstances, you may be entitled to a refund or credit in respect of some or all of this withholding. However, even if you are entitled to have any such withholding refunded, the required procedures could be cumbersome and significantly delay your receipt of any withheld amounts. For more information, see

Supplemental Discussion of Federal Income Tax Consequences Foreign Account Tax Compliance Act (FATCA) Withholding on page PS-20 of this pricing supplement.

In addition, your notes may also be subject to other U.S. withholding tax as described in United States Taxation in the accompanying prospectus.

THE UNDERLIER

The EURO STOXX 50® Index, which we refer to as the EURO STOXX 50 Index, is a capitalization-weighted index of 50 European blue-chip stocks and was created by STOXX Limited, a joint venture among Deutsche Boerse AG, Dow Jones & Company, Inc. and SWX Swiss Exchange. Publication of the EURO STOXX 50 Index began on February 26, 1998, based on an initial index value of 1,000 at December 31, 1991. The level of the EURO STOXX 50 Index is disseminated on, and additional information about the index is published on, the STOXX Limited website: <http://www.stoxx.com>. We are not incorporating by reference the website or any material it includes in this pricing supplement. STOXX Limited is under no obligation to continue to publish the EURO STOXX 50 Index and may discontinue publication of the EURO STOXX 50 Index at any time.

The top ten constituent stocks of the EURO STOXX 50 Index as of August 15, 2014, by weight, are: Total S.A. (5.94%), Sanofi (4.96%), Banco Santander S.A. (4.48%), Bayer AG (4.17%), Siemens AG (3.98%), BASF SE (3.63%), Anheuser-Busch InBev N.V. (3.30%), Daimler AG (3.10%), Allianz SE (3.01%) and BNP Paribas S.A. (2.87%); constituent weights may be found at http://www.stoxx.com/download/indices/factsheets/sx5e_fs.pdf under Factsheets and Methodologies and are updated periodically.

As of August 15, 2014, the sixteen industry sectors which comprise the EURO STOXX 50 Index represent the following weights in the index: Automobiles & Parts (5.82%), Banks (18.46%), Chemicals (9.50%), Construction & Materials (2.92%), Food & Beverage (7.47%), Health Care (5.79%), Industrial Goods & Services (9.51%), Insurance (7.26%), Media (1.29%), Oil & Gas (9.46%), Personal & Household Goods (3.36%), Real Estate (1.01%), Retail (2.05%), Technology (4.21%), Telecommunications (5.38%) and Utilities (6.53%); industry weightings may be found at http://www.stoxx.com/download/indices/factsheets/sx5e_fs.pdf under Factsheets and Methodologies and are updated periodically. Percentages may not sum to 100% due to rounding. Sector designations are determined by the underlier sponsor using criteria it has selected or developed. Index sponsors may use very different standards for determining sector designations. In addition, many companies operate in a number of sectors, but are listed in only one sector and the basis on which that sector is selected may also differ. As a result, sector comparisons between indices with different index sponsors may reflect differences in methodology as well as actual differences in the sector composition of the indices.

As of August 15, 2014, the seven countries which comprise the EURO STOXX 50 Index represent the following weights in the index: Belgium (3.30%), France (36.06%), Germany (31.47%), Ireland (0.69%), Italy (8.16%), Netherlands (7.05%) and Spain (13.28%); country weightings may be found at http://www.stoxx.com/download/indices/factsheets/sx5e_fs.pdf under Factsheets and Methodologies and are updated periodically.

The above information supplements the description of the EURO STOXX 50® Index found in the accompanying general terms supplement. This information was derived from information prepared by the underlier sponsor, however, the percentages we have listed above are approximate and may not match the information available on the underlier sponsor's website due to subsequent corporation actions or other activity relating to a particular stock. For more details about the EURO STOXX 50® Index, the underlier sponsor and license agreement between the underlier sponsor and the issuer, see The Underliers' EURO STOXX 50 Index on page S-64 of the accompanying general terms supplement.

The EURO STOXX 50® is the intellectual property of STOXX Limited, Zurich, Switzerland and/or its licensors (Licensors), which is used under license. The securities or other financial instruments based on the index are in no way sponsored, endorsed, sold or promoted by STOXX and its Licensors and neither STOXX nor its Licensors shall have any liability with respect thereto.

Historical Closing Levels of the Underlier

The closing level of the underlier has fluctuated in the past and may, in the future, experience significant fluctuations. Any historical upward or downward trend in the closing level of the underlier during the period shown below is not an indication that the underlier is more or less likely to increase or decrease at any time during the life of your notes.

You should not take the historical levels of the underlier as an indication of the future performance of the underlier. We cannot give you any assurance that the future performance of the

Table of Contents

underlier or the underlier stocks will result in your receiving an amount greater than the outstanding face amount of your notes on the stated maturity date.

Neither we nor any of our affiliates make any representation to you as to the performance of the underlier. The actual performance of the underlier over the life of the offered notes, as well as the cash settlement amount, may bear little relation to the historical levels shown below.

The graph below shows the daily historical closing levels of the underlier from August 27, 2004 through August 27, 2014. We obtained the closing levels in the graph below from Bloomberg Financial Services, without independent verification.

SUPPLEMENTAL DISCUSSION OF FEDERAL INCOME TAX CONSEQUENCES

The following section supplements the discussion of U.S. federal income taxation in the accompanying product supplement.

The following section is the opinion of Sidley Austin LLP, counsel to The Goldman Sachs Group, Inc. It applies to you only if you hold your notes as a capital asset for tax purposes. This section does not apply to you if you are a member of a class of holders subject to special rules, such as:

a dealer in securities or currencies;

a trader in securities that elects to use a mark-to-market method of accounting for your securities holdings;

a bank;

a regulated investment company;

a life insurance company;

a tax-exempt organization;

a partnership;

a person that owns the notes as a hedge or that is hedged against interest rate risks;

a person that purchases or sells the notes as part of a wash-sale for tax purposes;

a person that owns the notes as part of a straddle or conversion transaction for tax purposes; or

a United States holder whose functional currency for tax purposes is not the U.S. dollar.

This section is based on the U.S. Internal Revenue Code of 1986, as amended, its legislative history, existing and proposed regulations under the Internal Revenue Code, published rulings and court decisions, all as currently in effect. These laws are subject to change, possibly on a retroactive basis.

You should consult your tax advisor concerning the U.S. federal income tax and other tax consequences of your investment in the notes, including the application of state, local or other tax laws and the possible effects of changes in federal or other tax laws.

United States Holders

This subsection describes the tax consequences to a United States holder. You are a United States holder if you are a beneficial owner of notes and you are:

a citizen or resident of the United States;

a domestic corporation;

an estate whose income is subject to U.S. federal income tax regardless of its source; or

a trust if a United States court can exercise primary supervision over the trust's administration and one or more United States persons are authorized to control all substantial decisions of the trust.

If you are not a United States holder, this section does not apply to you and you should refer to United States Alien Holders below.

Your notes will be treated as debt instruments subject to special rules governing contingent payment debt instruments for U.S. federal income tax purposes. Under those rules, the amount of interest you are required to take into account for each accrual period will be determined by constructing a projected payment schedule for your notes and applying rules similar to those for accruing original issue discount on a hypothetical noncontingent debt instrument with that projected payment schedule. This method is applied by first determining the yield at which we would issue a noncontingent fixed rate debt instrument with terms and conditions similar to your notes (the comparable yield) and then determining as of the issue date a payment schedule that would produce the comparable yield. These rules will generally have the effect of requiring you to include amounts in income in respect of your notes prior to your receipt of cash attributable to such income.

We have determined that the comparable yield for the notes is equal to 3.00% per annum, compounded semi-annually, with a projected payment at maturity of \$1,231.97 based on an investment of \$1,000. Based on this comparable yield, if you are an initial holder that holds a note until maturity and you pay

PS-18

Table of Contents

your taxes on a calendar year basis, we have determined that you would be required to report the following amounts as ordinary income, not taking into account any positive or negative adjustments you may be required to take into account based on the actual payments on the notes, from the note each year:

Accrual Period	Interest Deemed to Accrue During Accrual Period (per \$1,000 note)		Total Interest Deemed to Have Accrued from Original Issue Date as of End of Accrual Period	
August 29, 2014 through December 31, 2014	\$	10.17	\$	10.17
January 1, 2015 through December 31, 2015	\$	30.53	\$	40.70
January 1, 2016 through December 31, 2016	\$	31.46	\$	72.16
January 1, 2017 through December 31, 2017	\$	32.41	\$	104.57
January 1, 2018 through December 31, 2018	\$	33.39	\$	137.96
January 1, 2019 through December 31, 2019	\$	34.39	\$	172.35
January 1, 2020 through December 31, 2020	\$	35.43	\$	207.78
January 1, 2021 through September 1, 2021	\$	24.19	\$	231.97

You are required to use the comparable yield and projected payment schedule that we compute in determining your interest accruals in respect of your notes, unless you timely disclose and justify on your U.S. federal income tax return the use of a different comparable yield and projected payment schedule.

The comparable yield and projected payment schedule are not provided to you for any purpose other than the determination of your interest accruals in respect of your notes, and we make no representation regarding the amount of contingent payments with respect to your notes.

You will recognize income or loss upon the sale, exchange or maturity of your notes in an amount equal to the difference, if any, between the cash amount you receive at such time and your adjusted basis in your notes. In general, your adjusted basis in your notes will equal the amount you paid for your notes, increased by the amount of interest you previously accrued with respect to your notes (in accordance with the comparable yield and the projected payment schedule for your notes), increased or decreased by the amount of any positive or negative adjustment, respectively, that you are required to make if you purchase your notes at a price other than the adjusted issue price determined for tax purposes (as described in the accompanying product supplement).

Any income you recognize upon the sale, exchange or maturity of your notes will be ordinary interest income. Any loss you recognize at such time will be ordinary loss to the extent of interest you included as income in the current or previous taxable years in respect of your notes, and thereafter, capital loss. If you are a noncorporate holder, you would generally be able to use such ordinary loss to offset your income only in the taxable year in which you recognize the ordinary loss and would generally not be able to carry such ordinary loss forward or back to offset income in other taxable years.

United States Alien Holders

If you are a United States alien holder, please see the discussion under **United States Taxation** **Taxation of Debt Securities** **United States Alien Holders** in the accompanying prospectus for a description of the tax consequences relevant to you. You are a United States alien holder if you are the beneficial owner of the notes and are, for U.S. federal income tax purposes:

a nonresident alien individual;

a foreign corporation; or

Table of Contents

an estate or trust that in either case is not subject to U.S. federal income tax on a net income basis on income or gain from the notes.

Foreign Account Tax Compliance Act (FATCA) Withholding

FATCA could impose a withholding tax of 30% on interest income (including original issue discount) and other periodic payments on the notes paid to you or any non-U.S. person or entity that receives such income (a non-U.S. payee) on your behalf, unless you and each such non-U.S. payee in the payment chain comply with the applicable information reporting, account identification, withholding, certification and other FATCA-related requirements. This withholding tax could also apply to all payments made upon the sale, exchange or maturity of the notes by a non-compliant payee. In the case of a payee that is a non-U.S. financial institution (for example, a clearing system, custodian, nominee or broker), withholding generally will not be imposed if the financial institution complies with the requirements imposed by FATCA to collect and report (to the U.S. or another relevant taxing authority) substantial information regarding such institution's U.S. account holders (which would include some account holders that are non-U.S. entities but have U.S. owners). Other payees, including individuals, may be required to provide proof of tax residence or waivers of confidentiality laws and/or, in the case of non-U.S. entities, certification or information relating to their U.S. ownership.

Withholding may be imposed at any point in a chain of payments if the payee is not compliant. A chain may work as follows, for example: The payment is transferred through a paying agent to a clearing system, the clearing system makes a payment to each of the clearing system's participants, and finally the clearing system participant makes a payment to a non-U.S. bank or broker through which you hold the notes, who credits the payment to your account. Accordingly, if you receive payments through a chain that includes one or more non-U.S. payees, such as a non-U.S. bank or broker, the payment could be subject to withholding if, for example, your non-U.S. bank or broker through which you hold the notes fails to comply with the FATCA requirements and is subject to withholding. This would be the case even if you would not otherwise have been directly subject to withholding.

A number of countries have entered into, and other countries are expected to enter into, agreements with the U.S. to facilitate the type of information reporting required under FATCA. While the existence of such agreements will not eliminate the risk that notes will be subject to the withholding described above, these agreements are expected to reduce the risk of the withholding for investors in (or investors that indirectly hold notes through financial institutions in) those countries.

The withholding tax described above could currently apply to all interest (including original issue discount) and other periodic payments made on the notes. In addition, the withholding tax described above could apply to payments made upon the sale, exchange or maturity of the notes on or after January 1, 2017. We will not pay any additional amounts in respect of this withholding tax, so if this withholding applies, you will receive less than the amount that you would have otherwise received.

Depending on your circumstances, you may be entitled to a refund or credit in respect of some or all of this withholding. However, even if you are entitled to have any such withholding refunded, the required procedures could be cumbersome and significantly delay your receipt of any withheld amounts. You should consult your tax advisor regarding FATCA. You should also consult your bank or broker through which you would hold the notes about the likelihood that payments to it (for credit to you) may become subject to withholding in the payment chain.

In addition, your notes may also be subject to other U.S. withholding tax as described in "United States Taxation" in the accompanying prospectus.

Table of Contents

VALIDITY OF THE NOTES

In the opinion of Sidley Austin LLP, as counsel to The Goldman Sachs Group, Inc., when the notes offered by this pricing supplement have been executed and issued by The Goldman Sachs Group, Inc. and authenticated by the trustee pursuant to the indenture, and delivered against payment as contemplated herein, such notes will be valid and binding obligations of The Goldman Sachs Group, Inc., enforceable in accordance with their terms, subject to applicable bankruptcy, insolvency and similar laws affecting creditors' rights generally, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith, fair dealing and the lack of bad faith), provided that such counsel expresses no opinion as to the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law on the conclusions expressed above. This opinion is given as of the date hereof and is limited to the Federal laws of the United States, the laws of the State of New York and the General Corporation Law of the State of Delaware as in effect on the date hereof. In addition, this opinion is subject to customary assumptions about the trustee's authorization, execution and delivery of the indenture and the genuineness of signatures and certain factual matters, all as stated in the letter of such counsel dated September 19, 2011, which has been filed as Exhibit 5.5 to The Goldman Sachs Group, Inc.'s registration statement on Form S-3 filed with the Securities and Exchange Commission on September 19, 2011.
