April 13, 2015

Table of Contents

Filed Pursuant to Rule 424(b)(2)  
Registration Statement No. 333-198735

**The information in this preliminary pricing supplement is not complete and may be changed. This preliminary pricing supplement is not an offer to sell nor does it seek an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.**

Subject to Completion. Dated April 13, 2015.

## The Goldman Sachs Group, Inc.

\$

### Leveraged Buffered EURO STOXX 50<sup>®</sup> Index-Linked Notes due

**The notes will not bear interest.** The amount that you will be paid on your notes on the stated maturity date (expected to be the fifth scheduled business day after the determination date) is based on the performance of the EURO STOXX 50<sup>®</sup> Index as measured from the trade date to and including the determination date (expected to be approximately 60 months after the trade date). If the final index level on the determination date is greater than the initial index level (set on the trade date), the return on your notes will be positive. If the final index level declines by up to 25.00% from the initial index level, you will receive the face amount of your notes. **If the final index level declines by more than 25.00% from the initial index level, the return on your notes will be negative. You could lose your entire investment in the notes.**

To determine your payment at maturity, we will calculate the index return, which is the percentage increase or decrease in the final index level from the initial index level. On the stated maturity date, for each \$1,000 face amount of your notes, you will receive an amount in cash equal to:

if the index return is *positive* (the final index level is *greater than* the initial index level), the *sum* of (i) \$1,000 *plus* (ii) the *product* of (a) \$1,000 *times* (b) the participation rate (expected to be between 1.25 and 1.35) *times* (c) the index return;

if the index return is *zero* or *negative* but *not below* -25.00% (the final index level is *equal to* or *less than* the initial index level but not by more than 25.00%), \$1,000; or

if the index return is *negative* and is *below* -25.00% (the final index level is *less than* the initial index level by more than 25.00%), the *sum* of (i) \$1,000 *plus* (ii) the *product* of (a) approximately 1.3333 *times* (b) the *sum* of the index return *plus* 25.00% *times* (c) \$1,000.

**Your investment in the notes involves certain risks, including, among other things, our credit risk. See page PS-11.**

You should read the additional disclosure herein so that you may better understand the terms and risks of your investment.

*The estimated value of your notes at the time the terms of your notes are set on the trade date (as determined by reference to pricing models used by Goldman, Sachs & Co. (GS&Co.) and taking into account our credit spreads) is expected to be between \$955 and \$985 per \$1,000 face amount, which will be less than the original issue price. The value of your notes at any time will reflect many factors and cannot be predicted; however, the price (not including GS&Co.'s customary bid and ask spreads) at which GS&Co. would initially buy or sell notes (if it makes a market, which it is not obligated to do) and the value that GS&Co. will initially use for account statements and otherwise will equal approximately \$ per \$1,000 face amount, which will exceed the estimated value of your notes as determined by reference to these models. The amount of the excess will decline on a straight line basis over the period from the trade date through .*

## **Table of Contents**

The issue price, underwriting discount and net proceeds listed above relate to the notes we sell initially. We may decide to sell additional notes after the date of this pricing supplement, at issue prices and with underwriting discounts and net proceeds that differ from the amounts set forth above. The return (whether positive or negative) on your investment in notes will depend in part on the issue price you pay for such notes.

Goldman Sachs may use this prospectus in the initial sale of the notes. In addition, Goldman, Sachs & Co. or any other affiliate of Goldman Sachs may use this prospectus in a market-making transaction in a note after its initial sale. ***Unless Goldman Sachs or its agent informs the purchaser otherwise in the confirmation of sale, this prospectus is being used in a market-making transaction.***

## **About Your Prospectus**

The notes are part of the Medium-Term Notes, Series D program of The Goldman Sachs Group, Inc. This prospectus includes this pricing supplement and the accompanying documents listed below. This pricing supplement constitutes a supplement to the documents listed below and should be read in conjunction with such documents:

Product supplement no. 3136 dated September 15, 2014

General terms supplement dated September 26, 2014

Prospectus supplement dated September 15, 2014

Prospectus dated September 15, 2014

The information in this pricing supplement supersedes any conflicting information in the documents listed above. In addition, some of the terms or features described in the listed documents may not apply to your notes.

**Table of Contents****Leveraged Buffered EURO STOXX 50® Index-Linked Notes due  
INVESTMENT THESIS**

For investors willing to forgo interest payments and risk losing their entire investment for the potential to earn between 125.00% and 135.00% of any positive return of the underlier.

**DETERMINING THE CASH SETTLEMENT AMOUNT**

At maturity, for each \$1,000 face amount, the investor will receive (in each case as a percentage of the face amount):

If the final underlier level is above 100.00% of its initial level, 100.00% plus between 125.00% and 135.00% times the underlier return

If the final underlier level is between 75.00% and 100.00% of its initial level, 100.00%

If the final underlier level is below 75.00% of its initial level, 100.00% minus approximately 1.3333% for every 1.00% that the underlier has declined below 75.00% of its initial level

**If the final underlier level declines by more than 25.00% from the initial underlier level, the return on the notes will be negative and the investor could lose their entire investment in the notes.**

**KEY TERMS**

<b>Issuer:</b>	The Goldman Sachs Group, Inc.
<b>Underlier:</b>	The EURO STOXX 50® Index (Bloomberg symbol, SX5E Index )
<b>Face Amount:</b>	\$ in the aggregate; each note will have a face amount equal to \$1,000
<b>Trade Date:</b>	
<b>Settlement Date:</b>	Expected to be the fifth scheduled business day following the trade date
<b>Determination Date:</b>	Expected to be approximately 60 months after the trade date
<b>Stated Maturity Date:</b>	Expected to be the fifth scheduled business day after the determination date
<b>Initial Underlier Level:</b>	To be determined on the trade date
<b>Final Underlier Level:</b>	The closing level of the underlier on the determination date
<b>Underlier Return:</b>	The <i>quotient</i> of (i) the final underlier level <i>minus</i> the initial underlier level <i>divided by</i> (ii) the initial underlier level, expressed as a positive or negative percentage.
<b>Upside Participation Rate:</b>	Expected to be between 125.00% and 135.00%
<b>Buffer Level:</b>	75.00% of the initial underlier level (equal to a -25.00% underlier return)
<b>Buffer Amount:</b>	25.00%
<b>Buffer Rate:</b>	The <i>quotient</i> of the initial underlier level <i>divided by</i> the buffer level, which equals approximately 133.33%
<b>CUSIP/ISIN:</b>	38147QZ58 / US38147QZ586

**HYPOTHETICAL PAYMENT AT MATURITY\***

<b>Hypothetical Final</b>	<b>Hypothetical Cash</b>
<b>Underlier Level (as % of</b>	<b>Settlement Amount (as % of</b>
<b>Initial Underlier Level)</b>	<b>Face Amount)</b>
175.000%	193.750%
150.000%	162.500%
125.000%	131.250%
<b>100.000%</b>	<b>100.000%</b>
90.000%	100.000%
<b>75.000%</b>	<b>100.000%</b>

25.000%	33.333%
<b>0.000%</b>	<b>0.000%</b>

\* assumes the upside participation rate is set at the bottom of the upside participation range of between 125.00% and 135.00%

**RISKS**

Please read the section entitled "Additional Risk Factors Specific to Your Notes" of this pricing supplement as well as the risks and considerations described in the accompanying prospectus dated September 15, 2014, in the accompanying prospectus supplement dated September 15, 2014, under "Additional Risk Factors Specific to the Underlier-Linked Notes" in the accompanying product supplement no. 3136 dated September 15, 2014, and under "Additional Risk Factors Specific to the Notes" in the accompanying general terms supplement dated September 26, 2014.

**Table of Contents**

**SUMMARY INFORMATION**

*We refer to the notes we are offering by this pricing supplement as the offered notes or the notes. Each of the offered notes, including your notes, has the terms described below. Please note that in this pricing supplement, references to The Goldman Sachs Group, Inc., we, our and us mean only The Goldman Sachs Group, Inc. and do not include its consolidated subsidiaries. Also, references to the accompanying prospectus mean the accompanying prospectus, dated September 15, 2014, as supplemented by the accompanying prospectus supplement, dated September 15, 2014, of The Goldman Sachs Group, Inc. relating to the Medium-Term Notes, Series D program of The Goldman Sachs Group, Inc., references to the accompanying general terms supplement mean the accompanying general terms supplement, dated September 26, 2014, of The Goldman Sachs Group, Inc. and references to the accompanying product supplement no. 3136 mean the accompanying product supplement no. 3136, dated September 15, 2014, of The Goldman Sachs Group, Inc.*

*This section is meant as a summary and should be read in conjunction with the section entitled General Terms of the Underlier-Linked Notes on page S-35 of the accompanying product supplement no. 3136 and Supplemental Terms of the Notes on page S-13 of the accompanying general terms supplement. Please note that certain features, as noted below, described in the accompanying product supplement no. 3136 and general terms supplement are not applicable to the notes. This pricing supplement supersedes any conflicting provisions of the accompanying product supplement no. 3136 or the accompanying general terms supplement.*

**Key Terms**

**Issuer:** The Goldman Sachs Group, Inc.

**Underlier:** the EURO STOXX 50® Index (Bloomberg symbol, SX5E Index )

**Specified currency:** U.S. dollars ( \$ )

**Terms to be specified in accordance with the accompanying product supplement no. 3136:**

type of notes: notes linked to a single underlier

exchange rates: not applicable

averaging dates: not applicable

redemption right or price dependent redemption right: not applicable

cap level: not applicable

buffer level: yes, as described below

interest: not applicable

**Face amount:** each note will have a face amount of \$1,000; \$ in the aggregate for all the offered notes; the aggregate face amount of the offered notes may be increased if the issuer, at its sole option, decides to sell an additional amount of the offered notes on a date subsequent to

the date of this pricing supplement

**Purchase at amount other than face amount:** the amount we will pay you at the stated maturity date for your notes will not be adjusted based on the issue price you pay for your notes, so if you acquire notes at a premium (or discount) to face amount and hold them to the stated maturity date, it could affect your investment in a number of ways. The return on your investment in such notes will be lower (or higher) than it would have been had you purchased the notes at face amount. Also, the stated buffer level would not offer the same measure of protection to your investment as would be the case if you had purchased the notes at face amount. See *Additional Risk Factors Specific to Your Notes – If You Purchase Your Notes at a Premium to Face Amount, the Return on Your Investment Will Be Lower Than the Return on Notes Purchased at Face Amount and the Impact of Certain Key Terms of the Notes Will be Negatively Affected* on page PS-13 of this pricing supplement.

**Supplemental discussion of U.S. federal income tax consequences:** you will be obligated pursuant to the terms of the notes in the absence of a change in law, an administrative determination or a judicial ruling to the contrary to characterize each note for all tax purposes as a pre-paid derivative contract in respect of the underlier, as described under *Supplemental Discussion of Federal Income Tax Consequences* on page S-42 of the accompanying product supplement no. 3136. Pursuant to this

PS-4

**Table of Contents**

approach, it is the opinion of Sidley Austin LLP that upon the sale, exchange or maturity of your notes, it would be reasonable for you to recognize capital gain or loss equal to the difference, if any, between the amount of cash you receive at such time and your tax basis in your notes. Pursuant to Treasury regulations, Foreign Account Tax Compliance Act (FATCA) withholding (as described in United States Taxation Taxation of Debt Securities Foreign Account Tax Compliance Act (FATCA) Withholding in the accompanying prospectus) will generally apply to obligations that are issued on or after July 1, 2014; therefore, the notes will generally be subject to FATCA withholding. However, according to final Treasury regulations, the withholding tax described above will not apply to payments of gross proceeds from the sale, exchange or other disposition of the notes made before January 1, 2017.

**Cash settlement amount (on the stated maturity date):** for each \$1,000 face amount of your notes, we will pay you on the stated maturity date an amount in cash equal to:

if the final underlier level is *greater than* the initial underlier level, the *sum* of (1) \$1,000 *plus* (2) the *product* of (i) \$1,000 *times* (ii) the upside participation rate *times* (iii) the underlier return;

if the final underlier level is *equal to* or *less than* the initial underlier level but *greater than* or *equal to* the buffer level, \$1,000; or

if the final underlier level is *less than* the buffer level, the *sum* of (1) \$1,000 *plus* (2) the product of (i) \$1,000 *times* (ii) the buffer rate *times* (iii) the *sum* of the underlier return *plus* the buffer amount

**Initial underlier level (to be set on the trade date):**

**Final underlier level:** the closing level of the underlier on the determination date, except in the limited circumstances described under Supplemental Terms of the Notes Consequences of a Market Disruption Event or a Non-Trading Day on page S-19 of the accompanying general terms supplement and subject to adjustment as provided under Supplemental Terms of the Notes Discontinuance or Modification of an Underlier on page S-23 of the accompanying general terms supplement

**Underlier return:** the *quotient* of (1) the final underlier level *minus* the initial underlier level *divided* by (2) the initial underlier level, expressed as a percentage

**Upside participation rate (to be set on the trade date):** expected to be between 125.00% and 135.00%

**Buffer level:** 75.00% of the initial underlier level

**Buffer amount:** 25.00%

**Buffer rate:** the *quotient* of the initial underlier level *divided* by the buffer level, which equals approximately 133.33%

**Trade date:**

**Original issue date (settlement date) (to be set on the trade date):** expected to be the fifth scheduled business day following the trade date

**Determination date (to be set on the trade date):** a specified date that is expected to be approximately 60 months after the trade date, subject to adjustment as described under Supplemental Terms of the Notes Determination Date on page S-14 of the accompanying general terms supplement

**Stated maturity date (to be set on the trade date):** a specified date that is expected to be the fifth scheduled business day after the determination date, subject to adjustment as described under Supplemental Terms of the Notes Stated Maturity Date on page S-13 of the accompanying general terms supplement

**No interest:** the offered notes will not bear interest

Edgar Filing: GOLDMAN SACHS GROUP INC - Form 424B2

**No listing:** the offered notes will not be listed on any securities exchange or interdealer quotation system

**No redemption:** the offered notes will not be subject to redemption right or price dependent redemption right

**Closing level:** as described under Supplemental Terms of the Notes Special Calculation Provisions Closing Level on page S-27 of the accompanying general terms supplement

**Business day:** as described under Supplemental Terms of the Notes Special Calculation Provisions Business Day on page S-27 of the accompanying general terms supplement

PS-5

**Table of Contents**

**Trading day:** as described under Supplemental Terms of the Notes Special Calculation Provisions Trading Day on page S-27 of the accompanying general terms supplement

**Use of proceeds and hedging:** as described under Use of Proceeds and Hedging on page S-40 of the accompanying product supplement no. 3136

**ERISA:** as described under Employee Retirement Income Security Act on page S-49 of the accompanying product supplement no. 3136

**Supplemental plan of distribution:** as described under Supplemental Plan of Distribution on page S-50 of the accompanying product supplement no. 3136; The Goldman Sachs Group, Inc. estimates that its share of the total offering expenses, excluding underwriting discounts and commissions, will be approximately \$ .

The Goldman Sachs Group, Inc. expects to agree to sell to Goldman, Sachs & Co., and Goldman, Sachs & Co. expects to agree to purchase from The Goldman Sachs Group, Inc., the aggregate face amount of the offered notes specified on the front cover of this pricing supplement. Goldman, Sachs & Co. proposes initially to offer the notes to the public at the original issue price set forth on the cover page of this pricing supplement, and to certain securities dealers at such price less a concession not in excess of % of the face amount.

We expect to deliver the notes against payment therefor in New York, New York on , 2015, which is expected to be the fifth scheduled business day following the date of this pricing supplement and of the pricing of the notes. Under Rule 15c6-1 of the Securities Exchange Act of 1934, trades in the secondary market generally are required to settle in three business days, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade notes on any date prior to three business days before delivery will be required, by virtue of the fact that the notes are initially expected to settle in five business days (T + 5), to specify alternative settlement arrangements to prevent a failed settlement.

We have been advised by Goldman, Sachs & Co. that it intends to make a market in the notes. However, neither Goldman, Sachs & Co. nor any of our other affiliates that makes a market is obligated to do so and any of them may stop doing so at any time without notice. No assurance can be given as to the liquidity or trading market for the notes.

**Calculation agent:** Goldman, Sachs & Co.

**CUSIP no.:** 38147QZ58

**ISIN no.:** US38147QZ586

**FDIC:** the notes are not bank deposits and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank

**Table of Contents**

**HYPOTHETICAL EXAMPLES**

The following table and chart are provided for purposes of illustration only. They should not be taken as an indication or prediction of future investment results and are intended merely to illustrate the impact that the various hypothetical underlier levels on the determination date could have on the cash settlement amount at maturity assuming all other variables remain constant.

The examples below are based on a range of final underlier levels that are entirely hypothetical; no one can predict what the underlier level will be on any day throughout the life of your notes, and no one can predict what the final underlier level will be on the determination date. The underlier has been highly volatile in the past meaning that the underlier level has changed considerably in relatively short periods and its performance cannot be predicted for any future period.

The information in the following examples reflects hypothetical rates of return on the offered notes assuming that they are purchased on the original issue date at the face amount and held to the stated maturity date. If you sell your notes in a secondary market prior to the stated maturity date, your return will depend upon the market value of your notes at the time of sale, which may be affected by a number of factors that are not reflected in the table below such as interest rates, the volatility of the underlier and our creditworthiness. In addition, the estimated value of your notes at the time the terms of your notes are set on the trade date (as determined by reference to pricing models used by Goldman, Sachs & Co.) will be less than the original issue price of your notes. For more information on the estimated value of your notes, see *Additional Risk Factors Specific to Your Notes – The Estimated Value of Your Notes At the Time the Terms of Your Notes Are Set On the Trade Date (as Determined By Reference to Pricing Models Used By Goldman, Sachs & Co.) Will Be Less Than the Original Issue Price Of Your Notes* on page PS-11 of this pricing supplement. The information in the table also reflects the key terms and assumptions in the box below.

**Key Terms and Assumptions**

Face amount	\$1,000
Upside participation rate	125.00%
Buffer level	75.00% of the initial underlier level
Buffer rate	approximately 133.33%
Buffer amount	25.00%

Neither a market disruption event nor a non-trading day occurs on the originally scheduled determination date

No change in or affecting any of the underlier stocks or the method by which the underlier sponsor calculates the underlier

Notes purchased on original issue date at the face amount and held to the stated maturity date

Moreover, we have not yet set the initial underlier level that will serve as the baseline for determining the underlier return and the amount that we will pay on your notes, if any, at maturity. We will not do so until the trade date. As a result, the actual initial underlier level may differ substantially from the underlier level prior to the trade date.

For these reasons, the actual performance of the underlier over the life of your notes, as well as the amount payable at maturity, if any, may bear little relation to the hypothetical examples shown below or to the historical underlier levels shown elsewhere in this pricing supplement. For information about the historical levels of the underlier during recent periods, see *The Underlier – Historical Closing Levels of the Underlier* below. Before investing in the offered notes, you should consult publicly available information to determine the levels of the underlier between the date of this pricing supplement and the date of your purchase of the offered notes.

**Table of Contents**

Also, the hypothetical examples shown below do not take into account the effects of applicable taxes. Because of the U.S. tax treatment applicable to your notes, tax liabilities could affect the after-tax rate of return on your notes to a comparatively greater extent than the after-tax return on the underlier stocks.

The levels in the left column of the table below represent hypothetical final underlier levels and are expressed as percentages of the initial underlier level. The amounts in the right column represent the hypothetical cash settlement amounts, based on the corresponding hypothetical final underlier level (expressed as a percentage of the initial underlier level), and are expressed as percentages of the face amount of a note (rounded to the nearest one-thousandth of a percent). Thus, a hypothetical cash settlement amount of 100.000% means that the value of the cash payment that we would deliver for each \$1,000 of the outstanding face amount of the offered notes on the stated maturity date would equal 100.000% of the face amount of a note, based on the corresponding hypothetical final underlier level (expressed as a percentage of the initial underlier level) and the assumptions noted above.

Hypothetical Final Underlier Level	Hypothetical Cash Settlement Amount
(as Percentage of Initial Underlier Level)	(as Percentage of Face Amount)
200.000%	225.000%
175.000%	193.750%
150.000%	162.500%
125.000%	131.250%
<b>100.000%</b>	<b>100.000%</b>
95.000%	100.000%
85.000%	100.000%
<b>75.000%</b>	<b>100.000%</b>
50.000%	66.667%
25.000%	33.333%
<b>0.000%</b>	<b>0.000%</b>

If, for example, the final underlier level were determined to be 25.000% of the initial underlier level, the cash settlement amount that we would deliver on your notes at maturity would be approximately 33.333% of the face amount of your notes, as shown in the table above. As a result, if you purchased your notes on the original issue date at the face amount and held them to the stated maturity date, you would lose approximately 66.667% of your investment (if you purchased your notes at a premium to face amount you would lose a correspondingly higher percentage of your investment).

The following chart also shows a graphical illustration of the hypothetical cash settlement amounts (expressed as a percentage of the face amount of your notes) that we would pay on your notes on the stated maturity date, if the final underlier level (expressed as a percentage of the initial underlier level) were any of the hypothetical levels shown on the horizontal axis. The chart shows that any hypothetical final underlier level (expressed as a percentage of the initial underlier level) of less than 75.000% (the section left of the 75.000% marker on the horizontal axis) would result in a hypothetical cash settlement amount of less than 100.000% of the face amount of your notes (the section below the 100.000% marker on the vertical axis) and, accordingly, in a loss of principal to the holder of the notes.

**Table of Contents**

The cash settlement amounts shown above are entirely hypothetical; they are based on market prices for the underlier stocks that may not be achieved on the determination date and on assumptions that may prove to be erroneous. The actual market value of your notes on the stated maturity date or at any other time, including any time you may wish to sell your notes, may bear little relation to the hypothetical cash settlement amounts shown above, and these amounts should not be viewed as an indication of the financial return on an investment in the offered notes. The hypothetical cash settlement amounts on notes held to the stated maturity date in the examples above assume you purchased your notes at their face amount and have not been adjusted to reflect the actual issue price you pay for your notes. The return on your investment (whether positive or negative) in your notes will be affected by the amount you pay for your notes. If you purchase your notes for a price other than the face amount, the return on your investment will differ from, and may be significantly lower than, the hypothetical returns suggested by the above examples. Please read *Additional Risk Factors Specific to the Underlier-Linked Notes – The Market Value of Your Notes May Be Influenced by Many Unpredictable Factors* on page S-32 of the accompanying product supplement no. 3136.

Payments on the notes are economically equivalent to the amounts that would be paid on a combination of other instruments. For example, payments on the notes are economically equivalent to a combination of an interest-bearing bond bought by the holder and one or more options entered into between the holder and us (with one or more implicit option premiums paid over time). The discussion in this paragraph does not modify or affect the terms of the notes or the U.S. federal income tax treatment of the notes, as described elsewhere in this pricing supplement.

PS-9

**Table of Contents**

*We cannot predict the actual final underlier level or what the market value of your notes will be on any particular trading day, nor can we predict the relationship between the underlier level and the market value of your notes at any time prior to the stated maturity date. The actual amount that you will receive, if any, at maturity and the rate of return on the offered notes will depend on the actual initial underlier level and the upside participation rate, which we will set on the trade date, and the actual final underlier level determined by the calculation agent as described above. Moreover, the assumptions on which the hypothetical returns are based may turn out to be inaccurate. Consequently, the amount of cash to be paid in respect of your notes, if any, on the stated maturity date may be very different from the information reflected in the table and chart above.*

PS-10

**Table of Contents**

**ADDITIONAL RISK FACTORS SPECIFIC TO YOUR NOTES**

*An investment in your notes is subject to the risks described below, as well as the risks and considerations described in the accompanying prospectus dated September 15, 2014, in the accompanying prospectus supplement dated September 15, 2014, under Additional Risk Factors Specific to the Notes in the accompanying general terms supplement, and under Additional Risk Factors Specific to the Underlier-Linked Notes in the accompanying product supplement no. 3136. You should carefully review these risks and considerations as well as the terms of the notes described herein and in the accompanying prospectus, dated September 15, 2014, as supplemented by the accompanying prospectus supplement, dated September 15, 2014, the accompanying general terms supplement, dated September 26, 2014, and the accompanying product supplement no. 3136, dated September 15, 2014, of The Goldman Sachs Group, Inc. Your notes are a riskier investment than ordinary debt securities. Also, your notes are not equivalent to investing directly in the underlier stocks, i.e., the stocks comprising the underlier to which your notes are linked. You should carefully consider whether the offered notes are suited to your particular circumstances.*

**The Estimated Value of Your Notes At the Time the Terms of Your Notes Are Set On the Trade Date (as Determined By Reference to Pricing Models Used By Goldman, Sachs & Co.) Will Be Less Than the Original Issue Price Of Your Notes**

The original issue price for your notes will exceed the estimated value of your notes as of the time the terms of your notes are set on the trade date, as determined by reference to Goldman, Sachs & Co.'s pricing models and taking into account our credit spreads. Such expected estimated value on the trade date is set forth on the cover of this pricing supplement; after the trade date, the estimated value as determined by reference to these models will be affected by changes in market conditions, our creditworthiness and other relevant factors. The price at which Goldman, Sachs & Co. would initially buy or sell your notes (if Goldman, Sachs & Co. makes a market, which it is not obligated to do), and the value that Goldman, Sachs & Co. will initially use for account statements and otherwise, will also exceed the estimated value of your notes as determined by reference to these models. As agreed by Goldman, Sachs & Co. and the distribution participants, the amount of this excess will decline on a straight line basis over the period from the date hereof through the applicable date set forth on the cover. Thereafter, if Goldman, Sachs & Co. buys or sells your notes it will do so at prices that reflect the estimated value determined by reference to such pricing models at that time. The price at which Goldman, Sachs & Co. will buy or sell your notes at any time also will reflect its then current bid and ask spread for similar sized trades of structured notes.

In estimating the value of your notes as of the time the terms of your notes are set on the trade date, as disclosed on the front cover of this pricing supplement, Goldman, Sachs & Co.'s pricing models consider certain variables, including principally our credit spreads, interest rates (forecasted, current and historical rates), volatility, price-sensitivity analysis and the time to maturity of the notes. These pricing models are proprietary and rely in part on certain assumptions about future events, which may prove to be incorrect. As a result, the actual value you would receive if you sold your notes in the secondary market, if any, to others may differ, perhaps materially, from the estimated value of your notes determined by reference to our models due to, among other things, any differences in pricing models or assumptions used by others. See

Additional Risk Factors Specific to the Underlier-Linked Notes The Market Value of Your Notes May Be Influenced by Many Unpredictable Factors on page S-32 of the accompanying product supplement no. 3136.

The difference between the estimated value of your notes as of the time the terms of your notes are set on the trade date and the original issue price is a result of certain factors, including principally the underwriting discount and commissions, the expenses incurred in creating, documenting and marketing the notes, and an estimate of the difference between the amounts we pay to Goldman, Sachs & Co. and the amounts Goldman, Sachs & Co. pays to us in connection with your notes. We pay to Goldman, Sachs & Co. amounts based on what we would pay to holders of a non-structured note with a similar maturity. In return for such payment, Goldman, Sachs & Co. pays to us the amounts we owe under your notes.

In addition to the factors discussed above, the value and quoted price of your notes at any time will reflect many factors and cannot be predicted. If Goldman, Sachs & Co. makes a market in the notes, the price

---

## **Table of Contents**

quoted by Goldman, Sachs & Co. would reflect any changes in market conditions and other relevant factors, including any deterioration in our creditworthiness or perceived creditworthiness. These changes may adversely affect the value of your notes, including the price you may receive for your notes in any market making transaction. To the extent that Goldman, Sachs & Co. makes a market in the notes, the quoted price will reflect the estimated value determined by reference to Goldman, Sachs & Co.'s pricing models at that time, plus or minus its then current bid and ask spread for similar sized trades of structured notes (and subject to the declining excess amount described above).

Furthermore, if you sell your notes, you will likely be charged a commission for secondary market transactions, or the price will likely reflect a dealer discount. This commission or discount will further reduce the proceeds you would receive for your notes in a secondary market sale.

There is no assurance that Goldman, Sachs & Co. or any other party will be willing to purchase your notes at any price and, in this regard, Goldman, Sachs & Co. is not obligated to make a market in the notes. See "Additional Risk Factors Specific to the Underlier-Linked Notes" "Your Notes May Not Have an Active Trading Market" on page S-31 of the accompanying product supplement no. 3136.

### **The Notes Are Subject to the Credit Risk of the Issuer**

Although the return on the notes will be based on the performance of the underlier, the payment of any amount due on the notes is subject to our credit risk. The notes are our unsecured obligations. Investors are dependent on our ability to pay all amounts due on the notes, and therefore investors are subject to our credit risk and to changes in the market's view of our creditworthiness. See "Description of the Notes We May Offer Information About Our Medium-Term Notes, Series D Program" "How the Notes Rank Against Other Debt" on page S-4 of the accompanying prospectus supplement.

### **The Amount Payable on Your Notes Is Not Linked to the Level of the Underlier at Any Time Other than the Determination Date**

The final underlier level will be based on the closing level of the underlier on the determination date (subject to adjustment as described elsewhere in this pricing supplement). Therefore, if the closing level of the underlier dropped precipitously on the determination date, the cash settlement amount for your notes may be significantly less than it would have been had the cash settlement amount been linked to the closing level of the underlier prior to such drop in the level of the underlier. Although the actual level of the underlier on the stated maturity date or at other times during the life of your notes may be higher than the final underlier level, you will not benefit from the closing level of the underlier at any time other than on the determination date.

### **You May Lose Your Entire Investment in the Notes**

You can lose your entire investment in the notes. The cash payment on your notes, if any, on the stated maturity date will be based on the performance of the EURO STOXX 50<sup>®</sup> Index as measured from the initial underlier level set on the trade date to the closing level on the determination date. If the final underlier level is *less than* the buffer level, you will have a loss for each \$1,000 of the face amount of your notes equal to the *product* of the buffer rate *times* the *sum* of the underlier return *plus* the buffer amount *times* \$1,000. Thus, you may lose your entire investment in the notes, which would include any premium to face amount you paid when you purchased the notes.

Also, the market price of your notes prior to the stated maturity date may be significantly lower than the purchase price you pay for your notes. Consequently, if you sell your notes before the stated maturity date, you may receive far less than the amount of your investment in the notes.

### **Your Notes Will Not Bear Interest**

You will not receive any interest payments on your notes. As a result, even if the cash settlement amount payable for your notes on the stated maturity date exceeds the face amount of your notes, the overall return you earn on your notes may be less than you would have earned by investing in a non-indexed debt security of comparable maturity that bears interest at a prevailing market rate.

### **You Have No Shareholder Rights or Rights to Receive Any Underlier Stock**

Investing in your notes will not make you a holder of any of the underlier stocks. Neither you nor any other holder or owner of your notes will have any voting rights, any right to receive dividends or other distributions, any rights to make a claim against the underlier stocks or any other rights with respect to the

## **Table of Contents**

underlier stocks. Your notes will be paid in cash and you will have no right to receive delivery of any underlier stocks.

### **We May Sell an Additional Aggregate Face Amount of the Notes at a Different Issue Price**

At our sole option, we may decide to sell an additional aggregate face amount of the notes subsequent to the date of this pricing supplement. The issue price of the notes in the subsequent sale may differ substantially (higher or lower) from the original issue price you paid as provided on the cover of this pricing supplement.

### **If You Purchase Your Notes at a Premium to Face Amount, the Return on Your Investment Will Be Lower Than the Return on Notes Purchased at Face Amount and the Impact of Certain Key Terms of the Notes Will be Negatively Affected**

The cash settlement amount will not be adjusted based on the issue price you pay for the notes. If you purchase notes at a price that differs from the face amount of the notes, then the return on your investment in such notes held to the stated maturity date will differ from, and may be substantially less than, the return on notes purchased at face amount. If you purchase your notes at a premium to face amount and hold them to the stated maturity date the return on your investment in the notes will be lower than it would have been had you purchased the notes at face amount or a discount to face amount. In addition, the impact of the buffer level on the return on your investment will depend upon the price you pay for your notes relative to face amount. For example, if you purchase your notes at a premium to face amount, the buffer level, while still providing some protection for the return on the notes, will allow a greater percentage decrease in your investment in the notes than would have been the case for notes purchased at face amount or a discount to face amount.

### **An Investment in the Offered Notes Is Subject to Risks Associated with Foreign Securities**

You should be aware that investments in securities linked to the value of foreign equity securities involve particular risks. The foreign securities markets whose stocks comprise the underlier may have less liquidity and may be more volatile than U.S. or other securities markets and market developments may affect foreign markets differently from U.S. or other securities markets. Direct or indirect government intervention to stabilize the foreign securities markets, as well as cross-shareholdings in foreign companies, may affect trading prices and volumes in those markets. Also, there is generally less publicly available information about foreign companies than about those U.S. companies that are subject to the reporting requirements of the U.S. Securities and Exchange Commission, and foreign companies are subject to accounting, auditing and financial reporting standards and requirements that differ from those applicable to U.S. reporting companies.

Securities prices in foreign countries are subject to political, economic, financial and social factors that apply in those geographical regions. These factors, which could negatively affect those securities markets, include the possibility of recent or future changes in a foreign government's economic and fiscal policies, the possible imposition of, or changes in, currency exchange laws or other laws or restrictions applicable to foreign companies or investments in foreign equity securities and the possibility of fluctuations in the rate of exchange between currencies, the possibility of outbreaks of hostility and political instability and the possibility of natural disaster or adverse public health development in the region. Moreover, foreign economies may differ favorably or unfavorably from the U.S. economy in important respects such as growth of gross national product, rate of inflation, capital reinvestment, resources and self-sufficiency.

### **Your Notes May Be Subject to an Adverse Change in Tax Treatment in the Future**

The Internal Revenue Service announced on December 7, 2007 that it is considering issuing guidance regarding the proper U.S. federal income tax treatment of an instrument such as your notes that are currently characterized as pre-paid derivative contracts, and any such guidance could adversely affect the tax treatment and the value of your notes. Among other things, the Internal Revenue Service may decide to require the holders to accrue ordinary income on a current basis and recognize ordinary income on payment at maturity, and could subject non-U.S. investors to withholding tax. Furthermore, in 2007, legislation was introduced in Congress that, if enacted, would have required holders that acquired instruments such as your notes after the bill was enacted to accrue interest income over the term of such notes even though there may be no interest payments over the term of such notes. It is not possible to

**Table of Contents**

predict whether a similar or identical bill will be enacted in the future, or whether any such bill would affect the tax treatment of such notes. We describe these developments in more detail under Supplemental Discussion of Federal Income Tax Consequences on page S-42 of the accompanying product supplement no. 3136. You should consult your tax advisor about this matter. Except to the extent otherwise provided by law, The Goldman Sachs Group, Inc. intends to continue treating the notes for U.S. federal income tax purposes in accordance with the treatment described under Supplemental Discussion of Federal Income Tax Consequences on page S-42 of the accompanying product supplement no. 3136 unless and until such time as Congress, the Treasury Department or the Internal Revenue Service determine that some other treatment is more appropriate.

**Foreign Account Tax Compliance Act (FATCA) Withholding May Apply to Payments on Your Notes, Including as a Result of the Failure of the Bank or Broker Through Which You Hold the Notes to Provide Information to Tax Authorities**

Please see the discussion under United States Taxation Taxation of Debt Securities Foreign Account Tax Compliance Act (FATCA) Withholding in the accompanying prospectus for a description of the applicability of FATCA to payments made on your notes.

**Table of Contents****THE UNDERLIER**

The EURO STOXX 50<sup>®</sup> Index is a capitalization-weighted index of 50 European blue-chip stocks and was created by and is sponsored and maintained by STOXX Limited. Publication of the EURO STOXX 50 Index began on February 26, 1998, based on an initial index value of 1,000 at December 31, 1991. The level of the EURO STOXX 50<sup>®</sup> Index is disseminated on the STOXX Limited website. STOXX Limited is under no obligation to continue to publish the index and may discontinue publication of it at any time. Additional information regarding the EURO STOXX 50<sup>®</sup> Index may be obtained from the STOXX Limited website: <http://www.stoxx.com>. We are not incorporating by reference the website or any material it includes in this pricing supplement.

The top ten constituent stocks of the EURO STOXX 50<sup>®</sup> Index as of April 9, 2015, by weight, are: Sanofi (4.88%), Bayer AG (4.87%), Total S.A. (4.74%), Banco Santander S.A. (4.13%), Anheuser-Busch InBev N.V. (3.75%), BASF SE (3.63%), Daimler AG (3.61%), Siemens AG (3.32%), Allianz SE (3.15%) and SAP SE (2.69%); constituent weights may be found at <http://www.stoxx.com/download/indices/factsheets/SX5GT.pdf> under Factsheets and Methodologies and are updated periodically.

As of April 9, 2015, the sixteen industry sectors which comprise the EURO STOXX 50<sup>®</sup> Index represent the following weights in the index: Automobiles & Parts (6.76%), Banks (18.28%), Chemicals (10.25%), Construction & Materials (2.09%), Food & Beverage (5.37%), Health Care (5.87%), Industrial Goods & Services (8.82%), Insurance (7.61%), Media (1.27%), Oil & Gas (7.40%), Personal & Household Goods (6.35%), Real Estate (1.04%), Retail (2.17%), Technology (5.25%), Telecommunications (5.84%) and Utilities (5.63%); industry weightings may be found at <http://www.stoxx.com/download/indices/factsheets/SX5GT.pdf> under Factsheets and Methodologies and are updated periodically. Percentages may not sum to 100% due to rounding. Sector designations are determined by the underlier sponsor using criteria it has selected or developed. Index sponsors may use very different standards for determining sector designations. In addition, many companies operate in a number of sectors, but are listed in only one sector and the basis on which that sector is selected may also differ. As a result, sector comparisons between indices with different index sponsors may reflect differences in methodology as well as actual differences in the sector composition of the indices.

As of April 9, 2015, the seven countries which comprise the EURO STOXX 50<sup>®</sup> Index represent the following weights in the index: Belgium (3.75%), Finland (1.10%), France (35.09%), Germany (32.61%), Italy (7.50%), Netherlands (7.39%) and Spain (12.56%); country weightings may be found at <http://www.stoxx.com/download/indices/factsheets/SX5GT.pdf> under Factsheets and Methodologies and are updated periodically.

The above information supplements the description of the EURO STOXX 50<sup>®</sup> Index found in the accompanying general terms supplement. This information was derived from information prepared by the underlier sponsor, however, the percentages we have listed above are approximate and may not match the information available on the underlier sponsor's website due to subsequent corporation actions or other activity relating to a particular stock. For more details about the EURO STOXX 50<sup>®</sup> Index, the underlier sponsor and license agreement between the underlier sponsor and the issuer, see The Underliers EURO STOXX 50<sup>®</sup> Index on page S-67 of the accompanying general terms supplement.

The EURO STOXX 50<sup>®</sup> is the intellectual property of STOXX Limited, Zurich, Switzerland and/or its licensors (Licensors), which is used under license. The securities or other financial instruments based on the index are in no way sponsored, endorsed, sold or promoted by STOXX and its Licensors and neither STOXX nor its Licensors shall have any liability with respect thereto.

**Historical Closing Levels of the Underlier**

The closing level of the underlier has fluctuated in the past and may, in the future, experience significant fluctuations. Any historical upward or downward trend in the closing level of the underlier during the period shown below is not an indication that the underlier is more or less likely to increase or decrease at any time during the life of your notes.

**You should not take the historical levels of the underlier as an indication of the future performance of the underlier.** We cannot give you any assurance that the future performance of the

**Table of Contents**

underlier or the underlier stocks will result in your receiving an amount greater than the outstanding face amount of your notes on the stated maturity date.

Neither we nor any of our affiliates make any representation to you as to the performance of the underlier. The actual performance of the underlier over the life of the offered notes, as well as the cash settlement amount, may bear little relation to the historical levels shown below.

The graph below shows the daily historical closing levels of the underlier from April 10, 2005 through April 10, 2015. We obtained the closing levels in the graph below from Bloomberg Financial Services, without independent verification.
