Net addition of fixed-line broadband subscribers (Million)	1.353	0.186
Fixed-line local access subscribers (Million)	64.938	66.649
Net loss of fixed-line local access subscribers (Million)	(1.711)	(2.378)

In the first quarter of 2017, the Group's operation progressed steadily as planned. The Group focused on 4G business and stepped up the transformation of its marketing model. It accelerated migration of 2G/3G subscribers to 4G. Meanwhile, the Group also actively propelled the 2I2C business by collaborating with Internet companies on targeted marketing in order to expand the reach of customer touch points, strengthen market segmentation and data traffic operation, differentiate our products and development models, and drive 4G business development and revenue growth with low incremental costs. In the first quarter of 2017, the Group's mobile billing subscribers registered a net addition of 2.443 million, reaching a total of 266.265 million. Mobile billing subscriber ARPU was RMB 46.7, up slightly as compared to the full-year average of last year. Within that, 4G subscribers registered a net addition of 18.175 million, reaching a total of 122.726 million. 4G subscriber ARPU was RMB 73.9. Mobile service revenue amounted to RMB 37,197 million, up by 2.8% year-on-year and 5.1% quarter-on-quarter.

In the first quarter of 2017, the Group's fixed-line business maintained steady growth. Fast growth in innovative businesses like IDC/cloud computing, ICT, video and IoT, etc. effectively offset the decline in fixed-line voice revenue. Faced with fierce market competition in fixed-line broadband, the Group actively promoted subscriber consumption upgrade and integrated development leveraging high-bandwidth products and video applications. The number of fixed-line broadband subscribers reached 76.589 million, representing a net addition of 1.353 million as compared to the end of last year, but the fixed-line broadband access ARPU decreased compared with the same period of last year. Fixed-line service revenue was RMB 23,813 million, up by 2.5% year-on-year and 7.5% quarter-on-quarter. Overall service revenue amounted to RMB 61,426 million, up by 2.4% year-on-year and 6.6% quarter-on-quarter.

## **Table of Contents**

In the first quarter of 2017, the Group fully promoted the transformation of its marketing model to accelerate scale and profitable development. Selling and marketing expenses amounted to RMB 8,307 million in the period, down by 4.2% year-on-year. Tower-related expenses (including electricity charges) amounted to RMB 5,643 million, up by 17.6% year-on-year mainly due to the increase in tower-related expenses associated with a larger network scale. However, due to effective control of other network, operation and support expenses, overall network, operation and support expenses decreased by 0.4% year-on-year. Employee benefit expenses increased by 8.3% year-on-year mainly because the Group deepened the reform in employment and distribution systems, and at the same time appropriately increased the compensation for front-line staff. During the period, costs of telecommunications products sold decreased substantially by 30.7% year-on-year mainly due to the significant year-on-year decrease in sales of telecommunication products. Finance costs increased by 15.5% year-on-year during the period as a result of the increase in interest-bearing debts. EBITDA amounted to RMB 20,975 million, up by 5.0% year-on-year and 18.2% quarter-on-quarter. EBITDA as a percentage of service revenue was 34.1%. In the first quarter of 2017, the profit attributable to the equity shareholders of the Company amounted to RMB 862 million, up by 79.3% year-on-year and showing significant improvement from the loss attributable to the equity shareholders of the Company of RMB 963 million in the fourth quarter of last year.

Going forward, the Group will grab development opportunities, deepen the implementation of Focus Strategy, persistently uphold scale and profitable development as the centre, promote growth, control costs and reform mechanism, thus pushing the Company to step onto the healthy development path. The Group will unswervingly promote the innovation and transformation of operating model and manage innovative use of resources, so as to deliver sustainable growth in revenue and gradual economic improvement. The Group is determined to improve quality and enhance efficiency, eliminate excess capacity and destock based on the practical situation. It will promote frequency band and capacity reduction of 2G/3G networks in an orderly manner to improve management, cost effectiveness and operational efficiency. The Group will also accelerate reform in various fields and build a more market-oriented mechanism in an effort to enhance corporate vibrancy and operating efficiency as well as striving to enhance profitability.
