FORWARD-LOOKING STATEMENTS

This annual report contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements state our intentions, beliefs, expectations or predictions for the future, in particular under Item 4. Information on the Company , Item 5. Operating and Financial Review and Prospects and Item 8. Financial Information Embedded Value .

The forward-looking statements include, without limitation, statements relating to:

future developments in the insurance industry in China;

changes in interest rates and other economic and business conditions in China;

the industry regulatory environment as well as the industry outlook generally;

the amount and nature of, and potential for, future development of our business;

the outcome of litigation and regulatory proceedings that we currently face or may face in the future;

our business strategy and plan of operations;

the prospective financial information regarding our business;

our dividend policy; and

information regarding our embedded value.

In some cases, we use words such as believe , intend , anticipate , estimate , project , forecast , plan , potential , should and expect and similar expressions to identify forward-looking statements. All statements other than statements of historical facts included in this annual report, including statements regarding our future financial position, strategy, projected costs and plans and objectives of management for future operations, are forward-looking statements. Although we believe that the expectations reflected in those forward-looking statements are reasonable, we can give no assurance that those expectations will prove to have been correct, and you are cautioned not to place undue reliance on such statements. Important factors that could cause actual results to differ materially from our expectations are disclosed under Item 3. Key Information Risk Factors and elsewhere in this annual report, including in conjunction with the forward-looking statements included in this annual report. We undertake no obligation to publicly update or revise any forward-looking statements contained in this annual report, whether as a result of new information, future events or otherwise, except as required by law. All forward-looking statements contained in this annual report are

qualified by reference to this cautionary statement.

Table of Contents

CERTAIN TERMS AND CONVENTIONS

References in this annual report to **we**, **us**, **our**, **the Company** or **China Life** mean China Life Insurance Company Limited and, as the context may require, its subsidiaries. References to **CLIC** mean China Life Insurance (Group) Company and, as the context may require, its subsidiaries, other than China Life. References in this annual report to **AMC** mean China Life Asset Management Company Limited, the asset management company established by us with CLIC on November 23, 2003. References to **CLPCIC** mean China Life Property and Casualty Insurance Company Limited, the property and casualty company established by us with CLIC on December 30, 2006. References to **China Life Pension** mean China Life Pension Company Limited established by us, CLIC and AMC on January 15, 2007.

The statistical and market share information contained in this annual report has been derived from government sources, including the China Insurance Yearbook 2015, the China Insurance Yearbook 2016, the China Insurance Yearbook 2017 and other public sources. The information has not been verified by us independently. Unless otherwise indicated, market share information set forth in this annual report is based on premium information as reported by the CIRC. The reported information includes premium information that is not determined in accordance with HKFRS, U.S. GAAP or IFRS.

References to **A shares** mean the RMB ordinary shares which have been listed on the Shanghai Stock Exchange since January 9, 2007.

References to the **CIRC** mean the China Insurance Regulatory Commission, which was established in 1998 and merged with the China Banking Regulatory Commission in April 2018. References to the **CBRC** mean the China Banking Regulatory Commission, which was established in 2003 and merged with the CIRC in April 2018. References to **CBIRC** mean the China Banking and Insurance Regulatory Commission, which was established in April 2018 as a result of the merger of CIRC and CBRC. In this annual report, references to the **CIRC** mean the China's insurance regulator prior to April 2018 and references to the **CBIRC** mean the China's insurance regulator after April 2018, as the context may require.

References to **China** or **PRC** mean the People's Republic of China, excluding, for purposes of this annual report, Hong Kong, Macau and Taiwan. References to the **central government** mean the government of the PRC. References to **State Council** mean the State Council of the PRC. References to **MOF** or **Ministry of Finance** mean the Ministry of Finance of the PRC. References to **Ministry of Commerce** mean the Ministry of Commerce of the PRC. References to **SAFE** mean the State Administration of Foreign Exchange of the PRC. References to **SAIC** mean the State Administration for Industry and Commerce of the PRC.

References to **HKSE** or **Hong Kong Stock Exchange** mean The Stock Exchange of Hong Kong Limited. References to **NYSE** or **New York Stock Exchange** mean the New York Stock Exchange. References to **SSE** or **Shanghai Stock Exchange** mean the Shanghai Stock Exchange.

References to **IFRS** mean the International Financial Reporting Standards as issued by the International Accounting Standards Board, references to **U.S. GAAP** mean the generally accepted accounting principles in the United States, references to **HKFRS** mean the Hong Kong Financial Reporting Standards, issued by the Hong Kong Institute of Certified Public Accountants, and references to **PRC GAAP** mean the PRC Accounting Standards for Business Enterprises applicable to companies listed in the PRC. Unless otherwise indicated, our financial information presented in this annual report has been prepared in accordance with IFRS.

Table of Contents

References to Renminbi or RMB in this annual report mean the currency of the PRC, references to U.S. dollars or US\$ mean the currency of the United States of America, and references to Hong Kong dollars , H.K. dollars or HK\$ mean the currency of the Hong Kong Special Administrative Region of the PRC.

Unless otherwise indicated, translations of RMB amounts into U.S. dollars for presentation only in this annual report have been made at the rate of US\$ 1.00 to RMB 6.5063, the noon buying rate in the City of New York for cable transfers payable in foreign currencies as certified for customs purposes by the Federal Reserve Bank of New York on December 29, 2017. No representation is made that Renminbi amounts could have been, or could be, converted into U.S. dollars at that rate on December 29, 2017 or at all. Translations of foreign currency amounts into RMB amounts for the purpose of preparing our audited consolidated financial statements included elsewhere in this annual report or our previous annual reports have been made at the exchange rates published by the PBOC.

Any discrepancies in any table between totals and sums of the amounts listed are due to rounding.

If there is any discrepancy or inconsistency between the Chinese names of the PRC entities in this annual report and their English translations, the Chinese version shall prevail.

Table of Contents**Exchange Rate Information**

We prepare our consolidated financial statements in Renminbi. This annual report contains translations of Renminbi amounts into U.S. dollars, and U.S. dollars into Renminbi, at RMB 6.5063 to US\$ 1.00, the noon buying rate on December 29, 2017 in the City of New York for cable transfers as certified for customs purposes by the Federal Reserve Bank of New York. You should not assume that Renminbi amounts could actually be converted into U.S. dollars at these rates or at all. Translations of foreign currency amounts into RMB amounts for the purpose of preparing our audited consolidated financial statements included elsewhere in this annual report or our previous annual reports have been made at the exchange rates published by the PBOC.

Since July 21, 2005, the PRC government has followed a managed floating exchange rate system to allow the value of the Renminbi to fluctuate within a regulated band based on market supply and demand and by reference to a basket of currencies. Under this system, the PBOC announces the closing price of a foreign currency traded against the Renminbi in the inter-bank foreign exchange market after the closing of the market on each working day, and makes it the central parity for the trading against the Renminbi on the following working day. On August 11, 2015, the PBOC adjusted the quotation mechanism of the Renminbi central parity to also consider demand and supply in foreign exchange markets and price movements of major currencies, in addition to the closing price on the previous working day. On May 26, 2017, the PBOC introduced a counter-cyclical factor into its formula that determines a central parity of Renminbi against the U.S. dollar. Under the current mechanism, the central parity of the Renminbi against the U.S. dollar is determined based on the closing rate, changes in a basket of currencies and the counter-cyclical factor. See

Item 3. Key Information Risk Factors Risks Relating to the People's Republic of China Government control of currency conversion and the fluctuation of the Renminbi may materially and adversely affect our operations and financial results. In 2017, the Renminbi appreciated by approximately 6.36% against the U.S. dollar. It remains unclear what further fluctuations may occur or what impact this will have on the value of the Renminbi.

Although PRC governmental policies were introduced in 1996 to reduce restrictions on the convertibility of Renminbi into foreign currency for current account items, conversion of Renminbi into foreign exchange for capital account items, such as foreign direct investments, loans or securities, requires the approval of the SAFE and other relevant authorities. Although experimental policies were recently introduced in certain pilot areas such as the Shanghai free trade zone to reduce foreign exchange control, restrictions on the convertibility of Renminbi into foreign currency are still in force in most parts of China.

The Hong Kong dollar is freely convertible into other currencies, including the U.S. dollar. Since October 17, 1983, the Hong Kong dollar has been linked to the U.S. dollar at the rate of HK\$ 7.80 to US\$ 1.00. The central element in the arrangements which give effect to the link is that by agreement between the Hong Kong government and the three Hong Kong banknote issuing banks, The Hongkong and Shanghai Banking Corporation Limited, Standard Chartered Bank (Hong Kong) Limited and the Bank of China (Hong Kong) Limited, certificates of debts, which are issued by the Hong Kong Government Exchange Fund to the banknote issuing banks to be held as cover for their banknote issues, are issued and redeemed only against payment in U.S. dollars, at the fixed exchange rate of HK\$ 7.80 to US\$ 1.00. When the banknotes are withdrawn from circulation, the banknote issuing banks surrender the certificates of debts to the Hong Kong Government Exchange Fund and are paid the equivalent U.S. dollars at the fixed rate.

The market exchange rate of the Hong Kong dollar against the U.S. dollar continues to be determined by the forces of supply and demand in the foreign exchange market. However, against the background of the fixed rate which applies to the issue of the Hong Kong currency in the form of banknotes, as described above, the market exchange rate has not deviated materially from the level of HK\$ 7.80 to US\$ 1.00 since the link was first established. The Hong Kong government has stated its intention to maintain the link at that rate, and it, acting through the Hong Kong Monetary Authority, has a number of means by which it may act to maintain exchange rate stability. Exchange rates between the

Hong Kong dollar and other currencies are influenced by the linked rate between the U.S. dollar and the Hong Kong dollar.

Table of Contents

The following tables set forth various information concerning exchange rates between Renminbi and U.S. dollars and between Hong Kong dollars and U.S. dollars for the periods indicated. These rates are provided solely for your convenience and are not necessarily the exchange rates we used in this annual report. The source of these rates is the H.10 statistical release of the Federal Reserve Board. On April 13, 2018, the exchange rates were US\$ 1.00 to RMB 6.2725 and US\$ 1.00 to HK\$ 7.8499, respectively. The following table sets forth the high and low rates between Renminbi and U.S. dollars and between Hong Kong dollars and U.S. dollars for each of the periods shown:

	RMB per US\$		HK\$ per US\$	
	High	Low	High	Low
October 2017	6.6533	6.5712	7.8106	7.7996
November 2017	6.6385	6.5967	7.8118	7.7955
December 2017	6.6210	6.5063	7.8228	7.8050
January 2018	6.5263	6.2841	7.8230	7.8161
February 2018	6.3471	6.2649	7.8267	7.8183
March 2018	6.3565	6.2685	7.8486	7.8275
April 2018 (through April 13, 2018)	6.3045	6.2655	7.8499	7.8482

The following table sets forth the period-end rates and the average rates between Renminbi and U.S. dollars and between Hong Kong dollars and U.S. dollars for each of 2013, 2014, 2015, 2016, 2017 and 2018 (through April 13, 2018) (calculated by averaging the rates on the last day of each month of the periods shown):

	Period-end rate		Average rate	
	RMB per		RMB per	
	US\$	HK\$ per US\$	US\$	HK\$ per US\$
2013	6.0537	7.7539	6.1412	7.7565
2014	6.2046	7.7531	6.1704	7.7554
2015	6.4778	7.7507	6.2869	7.7519
2016	6.9430	7.7534	6.6549	7.7618
2017	6.5063	7.8128	6.7350	7.7950
2018 (through April 13, 2018)	6.2725	7.8499	6.2893	7.8364

D. RISK FACTORS

Our business, financial condition and results of operations can be affected materially and adversely by any of the following risk factors. The risks and uncertainties described below may not be the only ones that we face. Additional risks and uncertainties that we are not aware of or that we currently believe are immaterial may also adversely affect our business, financial condition or results of operations.

Table of Contents**Risks Relating to Our Business**

Our investments are subject to risks.

We are exposed to potential investment losses if there is an economic downturn in China.

Until November 2006, we were only permitted to invest the premiums and other income we receive in investments in China. We obtained the approval to invest overseas with our foreign currency denominated funds in November 2006. See Item 4. Information on the Company Business Overview Regulatory and Related Matters Insurance Company Regulation Regulation of investments . However, we continued to make our investments mainly in China and, as of December 31, 2017, approximately 98.90% of our total investment assets were in China. In particular, as of December 31, 2017, approximately 48.43% of our total investment assets consisted of debt securities including Chinese government bonds, government agency bonds, corporate bonds, subordinated bonds and debt and other bonds and debts as approved by relevant government agencies; approximately 17.34% of our total investment assets consisted of term deposits with Chinese banks, of which 58.80% were placed with the five largest Chinese state-owned commercial banks; and approximately 14.80% of our total investment assets consisted of loans provided to Chinese entities and individuals, including policy loans, investment in debt investment plans and trust schemes. A serious downturn in the Chinese economy may lead to investment losses, which would reduce our earnings.

The PRC securities markets are still emerging markets, which may expose us to risks of loss from our investments there.

As of December 31, 2017, we had RMB 409,528 million (US\$ 62,943 million) invested in equity securities, among which RMB 132,826 million (US\$ 20,415 million) were invested in PRC securities markets, including securities investment funds and shares traded on the securities markets in China. These securities investment funds and shares are primarily invested in equity securities that are issued by Chinese companies and traded on China's stock exchanges. The PRC securities markets are still emerging markets and are characterized by evolving regulatory, accounting and disclosure requirements. This may from time to time result in significant price volatility, unexpected losses or lack of liquidity. These factors could cause us to incur losses on our publicly traded investments. Also, as one of the largest institutional investors in China, we may from time to time hold significant positions in many securities in which we invest, and any decision to sell or any perception in the market that we are a major seller of a security could adversely affect the liquidity and market price of that security.

Defaults on our debt investments may materially and adversely affect our profitability.

Approximately 48.43% of our investment assets as of December 31, 2017 were comprised of debt securities. The issuers whose debt securities we hold may fail to pay or otherwise default on their obligations due to bankruptcy, a lack of liquidity, a downturn in the economy, operational failures or other reasons. Losses due to these defaults could reduce our profitability.

Table of Contents

Defaults on our investments in loans may materially and adversely affect our profitability.

Approximately 14.80% of our investment assets as of December 31, 2017 were comprised of loans, including policy loans, investments in debt investment plans and trust schemes. The borrowers to whom we provided loans may fail to pay or otherwise default on their obligations due to bankruptcy, a lack of liquidity, a downturn in the economy, operational failures or other reasons. Losses due to these defaults could reduce our profitability.

Investments in new investment channels may not lead to improvements in our rate of investment return or we may incur losses.

The CIRC has in recent years significantly broadened the investment channels of Chinese life insurance companies. We have considered these alternative channels when making investments. For example, we made our first domestic private equity fund investment in 2011. In 2012, we made a direct equity investment in COFCO Futures Co., Ltd. by acquiring a 35% equity interest in it. In 2013, we began making investments in commercial real estate properties. In 2014, we made our first overseas real estate investment, first overseas private equity fund investment and first domestic preferred shares investment. In 2016, we made our first investment in shares traded on the Hong Kong Stock Exchange through the Shanghai-Hong Kong Stock Connect between China's mainland markets and the Hong Kong Stock Exchange, and we also made our first investment in interbank negotiable certificates of deposit. However, our experience with these new investment channels, especially overseas channels, is limited, and these new channels are still subject to evolving regulatory requirements, which may increase the risk exposure of our investments. For example, since January 2013, debt investment plans are no longer required to be filed with and reviewed by the CIRC, and in March 2014, the CIRC warned insurance companies of risks in debt investment plans. The CIRC noted, among other things, that issuers of some debt investment plans are not properly backed by their parent companies which are supposed to guarantee the payments if the plans face financial difficulties. Parent companies of some issuers do not engage in operating activities that can generate cash inflows and do not have effective control over their subsidiaries. As a result, the consolidated financial statements of these companies may not fully reflect their capacity to make payments when the plans face financial difficulties. As of December 31, 2017, the total amount of our investment in debt investment plans was RMB 73,668 million (US\$ 11,323 million). These factors could cause us to incur losses for our investments in these new investment channels or limit our ability to improve our rate of investment return.

We may incur foreign exchange and other losses for our investments denominated in foreign currencies.

A portion of our investment assets are held in foreign currencies. We are authorized by the CBIRC (formerly CIRC) to invest our assets held in foreign currencies in the overseas financial markets as permitted by the CBIRC (formerly CIRC). Thus, our investment results may be subject to foreign exchange gains and losses due to changes in exchange rates as well as the volatility and various other factors of overseas capital markets, including, among others, increase in interest rates. We recorded RMB 52 million (US\$ 8.0 million) in foreign exchange gains for the year ended December 31, 2017, resulting mainly from the increase in our assets held in foreign currencies and the fluctuation of the Renminbi exchange rate. However, it remains unclear what further fluctuations may occur or what impact this will have on the value of the Renminbi. Future movements in the exchange rate of RMB against the U.S. dollar and other foreign currencies may adversely affect our results of operations and financial condition.

Table of Contents

We are exposed to changes in interest rates.

Changes in interest rates may affect our profitability.

Our profitability is affected by changes in interest rates. Interest rates are highly sensitive to many factors, including economic growth rate, inflation, governmental monetary and tax policies, domestic and international economic and political conditions, financial regulatory requirements and other factors beyond our control. If interest rates were to increase significantly in the future, surrenders and withdrawals of life insurance and annuity policies and contracts may increase as policy holders may seek other investments with higher perceived returns. This process may result in cash outflows requiring that we sell investment assets at a time when the prices of those assets are adversely affected by the increase in market interest rates, which may result in realized investment losses. However, if interest rates were to decline in the future, the income we realize from our investments may decrease, affecting our profitability. In addition, as instruments in our investment portfolio mature, we might have to reinvest the funds we receive in investments bearing low interest rates, which may also affect our profitability. See Item 11 Quantitative and Qualitative Disclosures about Market Risk Interest Rate Risk .

For our long-term life insurance products including annuity products, we are obligated to pay contractual benefits to our policyholders or the beneficiaries based on a guaranteed interest rate, which is established when the product is priced. These products expose us to the risk that changes in interest rates may change our spread , or the difference between the amount of return that we are able to earn on our investments and the amount of return that we are required to pay based on a guaranteed interest rate under the policies.

On June 10, 1999, the CIRC set the maximum guaranteed interest rate which insurance companies could commit to pay on new policies at 2.50% (compounded annually) and, in response, we set the guaranteed interest rates on our products at a range of between 1.50% and 2.50%. In August 2013, February 2015 and September 2015, the CIRC removed the 2.50% cap on the guaranteed interest rates for traditional non-participating insurance policies, universal life insurance policies and participating life insurance policies, respectively. From October 1, 2015, the guaranteed interest rates of all long-term life insurance products are to be decided by insurance companies at their discretion in accordance with the principle of prudence, but CBIRC (formerly CIRC) approval is required for products with guaranteed interest rates above the maximum valuation rate set by the CIRC. This maximum valuation rate varies by product. Although the removal of the 2.50% cap has not resulted in any material impact on the profitability of our insurance policies in force, it could result in the increase of the guaranteed interest rates of our new products and the decrease of our spread. We cannot assure you that the removal of the 2.50% cap will not lead to a material adverse effect on our business, results of operations or financial condition.

As of December 31, 2017, the average guaranteed rate of return for all of our long-term insurance policies in force was 2.62%, while our investment yields for the years ended December 31, 2017, 2016 and 2015 were 5.16%, 4.61% and 6.47%, respectively. See Item 4. Information on the Company Business Overview Investments Investment Results . However, if the rates of return on our investments were to fall below the minimum rates we guarantee, our profitability would be materially and adversely affected.

Table of Contents

Because of the general lack of long-term fixed income securities in the Chinese capital markets, we are unable to match closely the duration of our assets and liabilities, which increases our exposure to interest rate risk.

Like other insurance companies, we seek to manage interest rate risk through managing, to the extent possible, the average duration of our investment assets and the insurance policy liabilities they support. Matching the duration of our assets to their related liabilities reduces our exposure to changes in interest rates, because the effect of the changes largely will be offset against each other. However, the limited availability of long-duration investment assets in the markets in which we invest, has resulted in, and in the future may result in, the duration of our assets being shorter than that of our liabilities, particularly with respect to liabilities with durations of more than 20 years. Furthermore, the Chinese financial markets currently do not provide adequate financial derivative products for us to hedge our interest rate risk. We believe that with the development of the Chinese capital markets and the gradual easing of the investment restrictions imposed on insurance companies in China, our ability to match the duration of our assets to that of our liabilities will improve. We also seek to manage the risk of duration mismatch by focusing on product offerings whose maturity profiles are in line with the duration of investments available to us in the prevailing investment environment. However, until we are able to match more closely the duration of our assets and liabilities, we will continue to be exposed to interest rate changes, which may materially and adversely affect our business and earnings.

Our growth is dependent on our ability to attract and retain productive agents.

A substantial portion of our business is conducted through our exclusive agents. Because of differences in productivity, some of our sales agents are responsible for a disproportionately high percentage of our sales of individual products. If we are unable to retain and build on this core group of highly productive agents, our business could be materially and adversely affected. Increasing competition for agents from other insurance companies and business institutions and increasing labor costs in China may also force us to increase the compensation of our agents, which would increase our operating costs and reduce our profitability. In addition, on January 6, 2013, the CIRC issued the Regulatory Rules on Insurance Sales Personnel, or the Sales Personnel Rules, which became effective on July 1, 2013. Among other things, the Sales Personnel Rules provide that exclusive agents must have at least a college degree, instead of a junior high school degree as previously required by the CIRC. See Item 4. Information on the Company Business Overview Regulatory and Related Matters Regulation of Insurance Agencies, Insurance Brokers and Other Intermediaries . The CIRC has authorized its local branches to set the education degree requirements for exclusive agents by considering local conditions. We believe that if more CBIRC (formerly CIRC) branches were to impose the requirement of having a college degree or above on new qualified exclusive agents, we cannot guarantee that we will not have difficulty in attracting and retaining productive agents in the future. In addition, as the market competition for qualified agents increases, our costs of attracting and retaining qualified agents may increase.

If we are unable to develop other distribution channels for our products, our growth may be materially and adversely affected.

Commercial banks are rapidly emerging as some of the fastest growing distribution channels in China. Many newly established domestic and foreign-invested life insurance companies have been focusing on commercial banks as one of their main distribution channels. In addition, with the relaxation of the regulatory restrictions of ownership by commercial banks in insurance companies, the number of insurance companies owned or controlled by commercial banks is increasing. Each of the five largest Chinese state-owned commercial banks has set up their own life insurance companies. These insurance companies are able to benefit from their holding relationships with these commercial banks to develop bancassurance as their main distribution channels. We do not have exclusive arrangements with any of the commercial banks through which we sell life insurance and annuity products, and thus our sales may be materially and adversely affected if one or more commercial banks choose to favor our competitors' products over our

own. In addition, as the bancassurance market becomes increasingly competitive, commercial banks may demand higher commission rates, which could increase our cost of sales and reduce our profitability. If we are unable to continue to develop our alternative distribution channels, our growth may be materially and adversely affected.

Table of Contents

Agent and employee misconduct is difficult to detect and deter and could harm our reputation or lead to regulatory sanctions or litigation costs.

Agent or employee misconduct could result in violations of law by us, regulatory sanctions, litigation or serious reputational or financial harm. Misconduct could include:

engaging in misrepresentation or fraudulent activities when marketing or selling insurance policies or annuity contracts to customers;

hiding unauthorized or unsuccessful activities, resulting in unknown and unmanaged risks or losses; or

otherwise not complying with laws or our control policies or procedures.

We cannot always deter agent or employee misconduct, and the precautions we take to prevent and detect these activities may not be effective in all cases. We have experienced agent and employee misconduct that has resulted in litigation and administrative actions against us and these agents and employees, and in some cases criminal proceedings and convictions against the agent or employee in question. None of these actions has resulted in material losses, damages, fines or other sanctions against us. We cannot assure you, however, that agent or employee misconduct will not lead to a material adverse effect on our business, results of operations, financial condition or prospects.

Our business is dependent on our ability to attract and retain key personnel, including senior management, underwriting personnel, actuaries, information technology specialists, investment managers and other professionals.

The success of our business is dependent to a large extent on our ability to attract and retain key personnel who have in-depth knowledge and understanding of the life insurance market in China, including members of our senior management, qualified underwriting personnel, actuaries, information technology specialists and experienced investment managers. As of the date of this annual report, we do not carry key personnel insurance for any of these personnel. We compete to attract and retain these key personnel with other life insurance companies and financial institutions, some of which may offer better compensation arrangements. Existing insurers are expanding their operations and the number of other financial institutions is growing. As the insurance and investment businesses continue to expand in China, we expect that competition for these personnel will increase in the future. Although we have not had difficulty in attracting and retaining qualified key personnel in the past, we cannot guarantee that this will continue to be the case. If we were unable to continue to attract and retain key personnel, our business and financial performance could be materially and adversely affected.

Differences in future actual operating results from the assumptions used in pricing and establishing reserves for our insurance and annuity products may materially affect our earnings.

Our earnings depend significantly upon the extent to which our actual operating results are consistent with the assumptions used in pricing and establishing the reserves for insurance contracts in our financial statements. Our assumptions include those for discount rate, mortality, morbidity, lapse rate and expenses. To the extent that trends in actual experiences are less favorable than our underlying assumptions used in establishing these reserves, and these trends are expected to continue in the future, we could be required to increase our reserves. Any such increase could

have a material adverse effect on our profitability and, if significant, our financial condition.

Table of Contents

We establish the reserves for insurance contracts based on the use of assumptions for discount rate, mortality, morbidity, lapse rate and expenses. These assumptions are based on our previous experience and the data published by other Chinese life insurers, as well as judgments made by the management. These assumptions may deviate from our actual experience, and, as a result, we cannot determine precisely the amounts which we will ultimately pay to fulfill our obligations under the insurance contracts or when these payments will need to be made. These amounts may vary from the estimated amounts, particularly when those payments may not occur until well into the future. The discount rate assumption is affected by certain factors, such as further macro-economy, monetary and exchange rate policies, capital market results and availability of investment channels to invest our insurance funds. We review and update the assumptions used to evaluate the reserves periodically, and establish the reserves for insurance contracts based on such assumptions. If the reserves originally established for future policy benefits prove inadequate, we must increase our reserves established for future policy benefits, which may have a material effect on our earnings and our financial condition.

We have data available for a shorter period of time than life insurance companies operating in some other countries do and, as a result, less claims experience on which to base some of the assumptions used in establishing our reserves. For a discussion of how we establish our assumptions for mortality, morbidity and lapse rate, see Item 5. Operating and Financial Review and Prospects Critical Accounting Policies . Given the limited nature of this experience, it is possible that our actual claims could vary significantly from the assumptions used.

Our risk management and internal reporting systems, policies and procedures may leave us exposed to unidentified or unanticipated risks, which could materially and adversely affect our businesses or result in losses.

Our policies and procedures to identify, monitor and manage risks may not be fully effective. Many of our current methods of managing risk and exposures are based upon our use of observed historical market behavior or statistics based on historical models. As a result, these methods may not fully predict future exposures, which could be significantly greater than what the historical measures indicate. In addition, risk management depends upon the evaluation of information regarding markets, customers or other matters that is publicly available or otherwise accessible to us, which may not always be accurate, complete, up-to-date or properly evaluated. In addition, a significant portion of business information needs to be centralized from our many branch offices. Management of operational, legal and regulatory risks requires, among other things, policies and procedures to record properly and verify a large number of transactions and events, and these policies and procedures may not be fully effective. Failure or the ineffectiveness of these systems could materially and adversely affect our business or result in losses.

We are likely to offer a broader and more diverse range of insurance and investment products in the future as the insurance market in China continues to develop. At the same time, we anticipate that we may invest in a significantly broader range of asset classes. The combination of these factors will require us to continue to enhance our risk management capabilities and is likely to increase the importance of our risk management policies and procedures to our results of operations and financial condition. If we fail to adapt our risk management policies and procedures to our changing business, our business, results of operations and financial condition could be materially and adversely affected.

Catastrophes could materially reduce our earnings and cash flow.

We could in the future experience catastrophic losses that may have an adverse impact on the business, results of operations and financial condition of our insurance business. Catastrophes can be caused by various events, including terrorist attacks, earthquakes, hurricanes, floods, fires and epidemics, such as severe acute respiratory syndrome, or SARS. For example, the snow disaster in South China and earthquake in Wen Chuan in 2008 increased our current claims payments.

Table of Contents

We establish liabilities for claims arising from a specific catastrophe after assessing the exposure and damages arising from the event. Although we have purchased catastrophe reinsurance in order to reduce our catastrophe exposure, we cannot assure you that any significant catastrophic event will not have a material adverse effect on us.

Current or future litigation, arbitration and regulatory proceedings could result in financial losses or harm our businesses.

We are involved in litigation and arbitration proceedings involving our insurance operations on an ongoing basis. In addition, the CBIRC (formerly CIRC), as well as other PRC governmental agencies, including tax, commerce and industrial administration and audit bureaus, from time to time make inquiries and conduct examinations or investigations concerning our compliance with PRC laws and regulations. These litigation, arbitration and administrative proceedings have in the past resulted in payments of insurance benefits, damage awards, settlements or administrative sanctions, including fines, which have not been material to us. We currently have control procedures in place to monitor our litigation, arbitration and regulatory exposure and take appropriate actions. See Item 8. Financial Information Consolidated Financial Statements and Other Financial Information Legal and Regulatory Proceedings . While we cannot predict the outcome of any pending or future litigation, arbitration, examination or investigation, we do not believe that any pending legal matter will have a material adverse effect on our business, financial condition or results of operations. However, we cannot assure you that any future litigation, arbitration or regulatory proceeding will not have an adverse outcome, which could have a material adverse effect on our operating results or cash flows. See Item 8. Financial Information Consolidated Financial Statements and Other Financial Information Legal and Regulatory Proceedings .

The embedded value information we present in this annual report is based on several assumptions and may vary significantly as those assumptions are changed.

In order to provide investors with an additional tool to understand our economic value and business results, we have disclosed information regarding our embedded value, as discussed in the section entitled Item 8. Financial Information Embedded Value . The embedded value is an estimate of our economic value (excluding the value attributed to new business after the valuation date) and is based on a discounted cash flow valuation determined using commonly applied actuarial methodologies. Standards with respect to the calculation of embedded value are still evolving, however, and there is no universal standard which defines the form, calculation method or presentation format of the embedded value of an insurance company. Assumptions used in embedded value calculations include rate of investment return, discount rate, mortality, morbidity, expenses and surrender rate, as well as certain macro factors, many of which are beyond our control. These assumptions may deviate significantly from our actual experience and therefore the embedded value is consequently not inherently predictive. Furthermore, since our actual market value is determined by investors based on a variety of information available to them, the embedded value should not be construed to be a direct reflection of our performance. The inclusion of the embedded value in this annual report should not be regarded as a representation by us, our management or any other person as to our future profitability. Because of the technical complexity involved in embedded value calculations and the fact that embedded value estimates vary materially as key assumptions are changed, you should read the discussion under the section entitled Item 8. Financial Information Embedded Value in its entirety. You should use special care when interpreting embedded value results and should not place undue reliance solely on them. See also Forward-Looking Statements .

Table of Contents***A computer system failure, cyber-attacks or other security breaches may disrupt our business, damage our reputation and adversely affect our results of operations and financial condition.***

We use computer systems to store, retrieve, evaluate and utilize customer and company data and information. Our business is highly dependent on our ability to access these systems to perform necessary business functions such as developing and selling insurance products, providing customer support, policy management, filing and paying claims, managing our investment portfolios and producing financial statements. Although we have designed and implemented a variety of security measures and backup plans to prevent or limit the effect of failure, our computer systems may be vulnerable to disruptions as a result of natural disasters, man-made disasters, criminal activities, pandemics or other events beyond our control. In addition, our computer systems may be subject to computer viruses or other malicious codes, unauthorized access, cyber-attacks or other computer-related penetrations. The failure of our computer systems for any reason could disrupt our operations and may adversely affect our business, results of operations and financial condition. Although we have not experienced such a computer system failure or security breach in the past, we cannot assure you that we will not encounter a failure or security breach in the future.

We retain confidential information on our computer systems, including customer information and proprietary business information. In addition, for business purposes, from time to time customer information is transmitted between our computer systems and those of third parties, such as third-party agents selling insurance products for us. Any compromise of the security or other errors of our computer systems or those arising during the information transmission process that result in the disclosure of personally identifiable customer information could damage our reputation, expose us to litigation, increase regulatory scrutiny and require us to incur significant technical, legal and other expenses.

United States Foreign Account Tax Compliance Act

The Foreign Account Tax Compliance Act, or FATCA, generally requires a foreign financial institution, or FFI, to enter into an FFI agreement under which it will agree to identify and provide the United States Internal Revenue Service, or the IRS, with information regarding accounts, including certain insurance policies, held by U.S. persons and U.S.-owned foreign entities, or be subject to a 30% withholding tax on withholdable payments, which include among other items, payments of U.S.-source interest and dividends and gross proceeds from the sale or other disposition of property that may produce U.S.-source interest or dividends. In addition, an FFI that has entered into an FFI agreement may be required to withhold on certain foreign passthru payments that it makes to FFIs that have not entered into their own FFI agreements or to account holders who do not respond to requests to confirm their U.S. person status and/or do not agree to allow the FFI to report certain account related information to the IRS. Withholding on foreign passthru payments will begin no earlier than 2019. Since existing guidance reserves on the definition of foreign passthru payment, the scope of any withholding on foreign passthru payments is uncertain at this time.

The United States and the PRC have agreed in substance on the terms of an intergovernmental agreement, or IGA, that is intended to facilitate the type of information reporting required under FATCA. Under the agreed terms, instead of reporting directly to the IRS, Chinese FFIs are required to report specified account information directly to the PRC tax authority, which will then pass that information to the IRS. While compliance with the IGA will not eliminate the risk of withholding described above, it is expected to reduce that risk for FFIs that are resident in China. Although the IGA has not yet been officially signed, the PRC and the United States have agreed to treat the IGA as in effect from June 26, 2014, provided that the PRC continues to demonstrate firm resolve to sign the IGA as soon as possible. If the United States and the PRC ultimately fail to reach a final agreement on the terms of the IGA, then the FATCA reporting and withholding regime described in the prior paragraph will apply to Chinese FFIs.

Table of Contents

We will closely monitor developments regarding FATCA and the IGA. If we are required to comply with the terms of the IGA or FATCA, as applicable, we expect that our compliance costs will increase. If we do not comply with the terms of the IGA or FATCA, as applicable, then certain payments to us will be subject to withholding under FATCA. However, since the text of the IGA has not been released, and regulations and other guidance remain under development, the future impact of this law on us is uncertain.

The auditors' reports included in this annual report are prepared by relying on audit work which is not inspected by the Public Company Accounting Oversight Board and, as such, investors may be deprived of the benefits of such inspection.

Auditors of companies that are registered with the SEC and traded publicly in the United States, including our independent registered public accounting firm, must be registered with the US Public Company Accounting Oversight Board (United States), or the PCAOB, and are required by the laws of the United States to undergo regular inspections by the PCAOB to assess their compliance with the laws of the United States and professional standards. Because we have substantial operations within China and our independent registered public accounting firm is based in China, the PCAOB is currently unable to conduct inspections of the work of our auditor as it relates to those operations without the approval of the Chinese authorities, and thus our auditor's work related to our operations in China is not currently inspected by the PCAOB.

This lack of PCAOB inspection of audit work performed in China prevents the PCAOB from regularly evaluating the audit work of any auditor that was performed in China including those performed by our auditor. As a result, investors may be deprived of the full benefits of PCAOB inspections.

The inability of the PCAOB to conduct inspections of audit work performed in China makes it more difficult to evaluate the effectiveness of our auditor's audit procedures as compared to auditors in other jurisdictions that are subject to PCAOB inspections on all of their work. Investors may lose confidence in our reported financial information and procedures and the quality of our consolidated financial statements.

We may be adversely affected if additional remedial measures are imposed on the four China-based accounting firms which reached settlement with the SEC in the administrative proceedings brought by the SEC against them.

In December 2012, the SEC initiated administrative proceedings against five accounting firms in China, alleging that they refused to produce audit work papers and other documents related to certain China-based companies under investigation by the SEC for potential accounting fraud. In January 2014, an SEC administrative law judge ruled in favor of the SEC, issuing an initial decision which censured each of the five accounting firms for failure to provide their audit work papers to the SEC and ordered a six-month suspension of the China-based affiliates of four of the five accounting firms' right to practice before the SEC. The accounting firms have appealed the decision of the administrative law judge to the SEC, and the decision will not come into force unless and until an order of finality is issued by the SEC. We are not subject to any SEC investigations, nor are we involved in the proceedings brought by the SEC against the accounting firms. However, the China affiliate of the independent registered public accounting firm that has issued the auditor's report included in our annual reports filed with the SEC for the 2013, 2014 and 2015 fiscal years, which is also our independent registered public accounting firm for the 2016 and 2017 fiscal years, is one of the five accounting firms named in the SEC's proceedings.

Table of Contents

In February 2015, four of the five accounting firms, including the China affiliate of the independent registered public accounting firm that has issued the auditor's report included in our annual report filed with the SEC for the 2013, 2014 and 2015 fiscal years, which is also our independent registered public accounting firm for the 2016 and 2017 fiscal years, each agreed to a censure and to pay a fine to the SEC to settle the dispute and avoid suspension of their ability to practice before the SEC. The settlement required the firms to follow detailed procedures and to seek to provide the SEC with access to audit documents of China-based companies via the CSRC. If future document productions fail to meet the specified criteria, the SEC retains authority to impose a variety of additional remedial measures on the firms depending on the nature of the failure, including an automatic six-month bar on the performance of certain audit work, commencement of a new proceeding or the resumption of the current proceeding by the SEC. While we cannot predict if the SEC will further review the four China-based accounting firms' compliance with specified criteria or if the results of such a review would result in the SEC imposing penalties, if they are subject to additional remedial measures, we may be adversely affected, along with other U.S.-listed companies in China audited by these accounting firms. If none of the China-based auditors are able to continue to perform audit work for China-based companies listed in the U.S., we will not be able to meet the reporting requirements under the Securities Exchange Act of 1934, as amended, or the Exchange Act, which may ultimately result in our deregistration by the SEC and delisting of our ADSs from the NYSE.

Risks Relating to the PRC Life Insurance Industry

We expect competition in the Chinese insurance industry to increase, which may materially and adversely affect the growth of our business.

We face competitive pressures from both domestic and foreign-invested life insurance companies operating in China, as well as from property and casualty insurance companies, which may compete with our accident and short-term health insurance businesses, and other financial institutions that sell other financial investment products in competition with ours. In addition, the establishment of other professional health insurance companies and pension annuities companies may also lead to greater competition in the health insurance business and commercial pension insurance business. If we are not able to adapt to these increasingly competitive pressures in the future, our growth rate may decline, which could materially and adversely affect our earnings.

Competition among domestic life insurance companies is increasing.

Our closest competitors are Ping An Life Insurance Company of China, Ltd., or Ping An Life, China Pacific Life Insurance Co., Ltd., or China Pacific Life, New China Life Insurance Co., Ltd., or New China Life, and Taikang Life Insurance Co. Ltd., or Taikang Life. According to statistical and unaudited market share information released by the CIRC on its website, together, Ping An Life, China Pacific Life, New China Life, Taikang Life and we accounted for approximately 49% of the life insurance premiums in China in 2017, with our market share in China decreasing from 19.9% in 2016 to 19.7% in 2017. Each of Ping An Life, China Pacific Life, New China Life and Taikang Life has operated in the Chinese insurance market for more than twenty years, and each has a recognized brand name. According to statistical and market share information derived from China Insurance Yearbook, in 2016, the last year for which the audited market information for separate business segments and geographic markets business is available, Ping An Life had a greater market share than we did in Beijing, Shanghai, Tianjin, Qingdao, Dalian, Shenzhen, Xiamen, Hainan and Ningbo, and New China Life had a greater market share than we did in Beijing. We also face competition from insurance companies owned or controlled by commercial banks.

Table of Contents

Each of the five largest Chinese state-owned commercial banks has set up their own life insurance companies. These insurance companies are able to benefit from their holding relationships with these commercial banks to develop bancassurance as their main distribution channels. In addition, we also face competition from smaller insurance companies, which may have competitive advantages in various regions in which we operate, and new entrants to the group life insurance market, including professional pension companies that are being established pursuant to a set of regulations promulgated by the Ministry of Human Resources and Social Security of the PRC, and new entrants to the health insurance industry, including newly approved and established professional health insurance companies, following Chinese government's adoption of policies that encourage the development of health insurance and improved health care in China.

Competition from foreign-invested life insurance companies is increasing, as restrictions on their operations in China are relaxed.

Foreign-invested life insurance companies are insurance companies in which foreign entities hold at least a 25% interest. Foreign-invested life insurers have been permitted to sell health, annuity and group life insurance products nationwide in China since December 2004. According to statistical and unaudited market share information released by the CIRC on its website, foreign-invested insurers had a life insurance market share of approximately 7.4% in 2017. On November 10, 2017, China announced that it will substantially relax foreign ownership limits in life insurance companies. On April 11, 2018, the Governor of the PBOC further clarified that regulations would be introduced within the next several months increasing the limit on foreign ownership in Chinese life insurance companies to 51% from the current 50%, with all foreign ownership restrictions in the Chinese life insurance sector removed in three years. Although detailed implementation rules have not yet been issued, we believe that the relaxation of the restrictions on foreign-invested insurers, once implemented, will continue to increase the competitive pressures we are facing.

We are likely to face increasing competition from property and casualty insurance companies and other companies offering products that compete with our own.

In addition to competition from life insurance companies, we face competition from other companies that may offer products that compete with our own, including:

Property and casualty companies. Beginning on January 1, 2003, property and casualty insurance companies have been permitted to sell short-term health insurance and accident products, but only with regulatory approval. There were 85 property and casualty insurers as of December 31, 2017. We believe property and casualty insurers have the competitive advantage of being able to bundle, or cross-sell, short-term health and accident products with the other non-life insurance products that they are currently selling to their existing and potential customers. We believe this will lead to greater competition in the accident and health insurance sectors. On December 30, 2006, we established a property and casualty company, CLPCIC, with CLIC. While this joint venture mainly focuses on property insurance business, it also develops short-term health insurance and accident business. Its operations may have a negative impact on sales of our short-term health insurance and accident products in the future.

Mutual fund companies, commercial banks and other financial services providers. We face increasing competition from other financial services providers, primarily licensed mutual fund companies, commercial banks providing personal banking services and offering various financial products, trust companies and

securities brokerage firms licensed to manage separate accounts. These financial service providers provide a variety of financial investment products that may prove to be attractive to the public and thereby adversely affect the sale of some products we offer, including traditional life insurance policies with a savings feature, participating life insurance policies and annuities.

Table of Contents

All of our institutional insurance agencies and brokers are required to obtain permits and be registered. If a substantial number of our institutional insurance agencies and brokers fail to meet these qualification and registration requirements or this failure results in policyholders canceling their policies, our business may be materially and adversely affected.

Institutional insurance agents and insurance brokers are required under the PRC insurance law to register with the administration of industry and commerce, and obtain business licenses with the permits issued by the CBIRC (formerly CIRC). It also requires non-dedicated institutional insurance agencies to obtain registrations with the administration of industry and commerce with the permits issued by the CBIRC (formerly CIRC). We cannot assure you that all of our institutional agents will obtain such licenses. The enforcement of this requirement could adversely affect the composition and productivity of our distribution channel, which could have a material adverse effect on our business.

Further development of regulations in China may impose additional costs or restrictions on our activities.

We operate in a highly regulated industry. The CBIRC (formerly CIRC) supervises and administers the insurance industry in China. In exercising its authority, it is given certain discretion to administer the law. China's insurance regulatory regime is undergoing significant changes toward a more transparent regulatory process and a convergent movement toward international standards. Some of these changes may result in additional costs or restrictions on our activities. For example, the CIRC issued notices in September 2016 and May 2017 to further reinforce the regulation of life insurance products by requiring insurance companies to revise or improve the design of a number of insurance products. For instance, insurance companies are required to (i) increase the death coverage for insurance products including individual term life insurance, individual endowment insurance and individual whole life insurance products, and (ii) seek CIRC approval for universal insurance products with a guaranteed interest rate above 3%. CIRC also required that (i) whole life insurance, annuity insurance and care insurance products must not be designed as short-to-medium term products, (ii) the first payment of survival insurance benefits for endowment products and annuity products must only occur after five years since the policy has become effective, and the annual payment or partial payment must not exceed 20% of the paid premiums, and (iii) insurance companies must not design universal insurance products or investment-linked insurance products in the form of riders. See Item 4. Information on the Company Business Overview Regulatory and Related Matters Insurance Company Regulation Regulation of products . These new requirements apply to a number of key products sold by us. Although these requirements are consistent with our long-term development strategy, revising the design of a number of products during a short period of time may increase our operating costs and may adversely affect our business, results of operations and financial condition.

In addition, because the terms of our products are subject to regulations, changes in regulations may affect our profitability on the policies and contracts we issue. For instance, under the guidelines issued by the CIRC, the dividends on our participating products must be no less than 70% of the distributable earnings from participating products in accordance with CIRC requirements. If this level were to be increased in the future, our profitability could be materially and adversely affected. Furthermore, in August 2013, February 2015 and September 2015, the CIRC removed the 2.50% cap on the guaranteed interest rates for traditional non-participating insurance policies, universal life insurance policies and participating life insurance policies, respectively. From October 1, 2015, the guaranteed interest rates of all long-term life insurance products are to be decided by insurance companies at their discretion in accordance with the principle of prudence, but CBIRC (formerly CIRC) approval is required for products with guaranteed interest rates above the maximum valuation rate set by the CIRC, which varies by product. Although the removal of the 2.50% cap has not resulted in any material impact on the profitability of our insurance policies in force, it could result in the increase of the guaranteed interest rates of our new products and the decrease of our spread, and therefore we cannot assure you that the removal of the 2.50% cap will not lead to a material adverse effect on our business, results of operations or financial condition.

Table of Contents

Our ability to comply with minimum solvency requirements is affected by a number of factors, and our compliance may force us to raise additional capital, which could increase our financing costs or be dilutive to our existing investors, or to reduce our growth.

In February 2015, the CIRC issued the major technical standards for a new set of solvency regulations, the China Risk Oriented Solvency System, or C-ROSS, with the aim of replacing the then current solvency requirements on Chinese insurance companies, or Solvency I. C-ROSS adopts the internationally accepted three-pillar regulatory system which includes quantitative capital requirements, qualitative regulatory requirements and market discipline mechanisms while its regulatory concept, models, methods and parameters are based on Chinese insurance market conditions. C-ROSS was officially implemented by the CIRC on January 1, 2016. See Item 4. Information on the Company Business Overview Regulatory and Related Matters Insurance Company Regulation Solvency requirements. Our core solvency adequacy ratio under C-ROSS as of December 31, 2017 was 277.61%, and our comprehensive solvency adequacy ratio under C-ROSS as of December 31, 2017 was 277.65%. While our solvency ratio is currently above the regulatory requirements, if we grow rapidly in the future, or if the required solvency level is raised in the future, we may need to raise additional capital to meet our solvency requirement, including through additional issuance of subordinated debt, which would increase our financing costs, or through additional issuance of shares, which would be dilutive to our existing investors. If we are not able to raise additional capital, we may be forced to reduce the growth of our business. Prior to the filing of this annual report, we became aware that, based on the latest comprehensive rating results regarding the solvency risks of insurers released by the CBIRC for the fourth quarter of 2017, we had been classified as a Category B insurer (i.e. an insurer whose solvency adequacy ratio meets the regulatory requirement and whose risk level is relatively low for operation risk, strategy risk, reputation risk and liquidity risk). Category B insurers may be subject to a range of regulatory actions by the CBIRC. See Item 4. Information on the Company Business Overview Regulatory and Related Matters Insurance Company Regulation Solvency requirements. Previously we were classified as a Category A insurer. It remains unclear whether the CBIRC will take any regulatory action with respect to our company or how these regulatory actions (if any) will affect our business or financial condition.

Furthermore, as we are exposed to potential insurance, market and investment risks, we cannot assure you that our solvency ratio under C-ROSS will always be above the required level. If our solvency ratio under C-ROSS is below the required solvency level, we may need to raise additional capital to meet our solvency requirement, including through additional issuance of subordinated debt, which would increase our financing costs, or through additional issuance of shares, which would be dilutive to our existing investors. If we are not able to raise additional capital, we may be forced to reduce the growth of our business. A failure to meet our Solvency requirement can also lead to various regulatory actions being taken by the CBIRC (formerly CIRC), which could have a material adverse effect on our business or financial condition. See Item 4. Information on the Company Business Overview Regulatory and Related Matters Insurance Company Regulation Solvency requirements.

Risks Relating to the Restructuring

CLIC has incurred substantial losses on the policies retained by it in the restructuring. If CLIC is unable to meet its obligations to its policyholders, it may seek to increase the level of dividends we pay, sell the China Life shares it owns or take other actions which may have a material adverse effect on the value of the shares our other existing investors own.

In connection with the restructuring, CLIC transferred to us (1) all long-term insurance policies (policies having a term of more than one year from the date of issuance) issued on or after June 10, 1999, having policy terms approved by or filed with the CIRC on or after June 10, 1999 and either (i) recorded as a long-term insurance policy as of June 30, 2003 in an actuarial database attached to the restructuring agreement as an annex or (ii) having policy terms

for group supplemental medical insurance (fund type), (2) stand-alone short-term policies (policies having a term of one year or less from the date of issuance) issued on or after June 10, 1999, and (3) all riders supplemental to the policies described in clauses (1) and (2) above, together with the reinsurance contracts specified in an annex to the restructuring agreement. See Item 4. Information on the Company History and Development of the Company Our Restructuring . CLIC has incurred substantial losses on these non-transferred policies, primarily because the guaranteed interest rates it had committed to pay on these policies are higher than the investment return it was able to generate on its investment assets. This negative spread on non-transferred policies created substantial losses for CLIC and a resulting negative net worth. The amount of accumulated undistributed profits of CLIC itself is expected to remain negative in the short term.

Table of Contents

In connection with the restructuring, CLIC established, together with the MOF, a special purpose fund for the purpose of paying claims under the non-transferred policies. The approval of the special purpose fund issued to CLIC provides that in the event there is any deficiency in the special purpose fund for so long as the fund is in existence, the MOF will provide support through the injection of funds to ensure the payments of benefits and claims to the policyholders of the non-transferred policies. See Item 4. Information on the Company History and Development of the Company Our Restructuring . In connection with the restructuring, we were advised by our PRC legal counsel, King & Wood, that (1) the MOF has the authority to issue this approval regarding the special purpose fund, (2) the approval is valid and effective, and (3) it has no reason to believe that the MOF will revoke the approval. We cannot assure you, however, that a court would decide in a manner consistent with King & Wood's conclusions.

We cannot predict the amount of funds that will be available to the special purpose fund from CLIC's own operations to satisfy its obligations to its policyholders as they become due. CLIC's cash requirements and available cash resources will be affected by several factors which are subject to uncertainty, including prevailing interest rates and the returns on investment generated by CLIC's assets, as well as the claims, expenses and persistency experience with respect to CLIC's insurance policies. The cash resources available to CLIC will also depend in part on our profitability, which will affect the amount of our tax payments and hence the amount of refund contributed to the fund (if CLIC's application for the extension of the period during which the income tax payments will be rebated is approved; see Item 4. Information on the Company History and Development of the Company Our Restructuring), the timing and amount of our dividend payments and the market prices of our shares and ADSs, which will affect the proceeds to CLIC from dispositions of our shares. If it is unable to satisfy its obligations to its policyholders from other sources, CLIC may seek, subject to our articles of association and applicable laws, to increase the amount of dividends we pay in order to satisfy its cash flow requirements. Any such increase in our dividend payments would reduce the funds available for reinvestment in our business. In addition, if we are unable to pay dividends in amounts sufficient to satisfy these requirements, CLIC may seek to sell its shareholdings in us or take other actions in order to satisfy these needs. The sale of these holdings or even the market perception of such a sale may materially and adversely affect the price of our shares.

The transfer of policies to us by CLIC and/or the separation of assets between CLIC and us may be subject to challenge.

We have been advised by our PRC legal counsel, King & Wood, that (1) the transferred policies have been legally and validly transferred to China Life and (2) following the restructuring, we will not have any continuing obligations to holders of the non-transferred policies who remain policyholders of CLIC and that there is no legal basis on which holders of the non-transferred policies can make a claim against China Life. We also have been advised by King & Wood that, although there is no specific law applicable to restructurings, these conclusions are supported by, among other things, the approval of the restructuring and various related matters by the State Council, the MOF and the CIRC; the support provided by the MOF with respect to the non-transferred policies as described above; and contract and other law. We cannot assure you that policyholders of CLIC, holders of transferred policies or other parties will not seek to challenge the transfer of the transferred policies or the separation of assets occurring as a consequence of the restructuring, or that a court would decide in a manner consistent with King & Wood's conclusions. If the transfer of policies to us or the separation of assets were challenged successfully, our financial condition and results of operations would likely be materially and adversely affected.

Table of Contents

We do not hold exclusive rights to the trademarks in the China Life name (in English and Chinese), the ball logos and other business related slogans and logos, and CLIC, which owns these trademarks, may take actions that would impair the benefits we derive from their use.

We conduct our business under the China Life brand name, the ball logos, the C mark and other business related slogans and logos. CLIC owns these trademarks and has registered them with the Trademark Office of the SAIC. CLIC has entered into a trademark license agreement with us, under which CLIC has agreed to grant us and our branches a royalty-free license to use the China Life brand name, the ball logos and the C mark.

Although CLIC has undertaken in a non-competition agreement with us not to compete with us in China, without our prior consent in writing, in any life, accident and health insurance and any other businesses in China which may compete with our insurance business, CLIC, its subsidiaries and affiliates are permitted to use the brand name and logo in their own businesses, including life insurance business outside China and any other businesses they may enter into in the future within China, including property and casualty (other than businesses that compete with our accident and health businesses) and asset management businesses. In addition, they are not precluded from taking actions that may impair the value of the brand name, which could harm our business. See Item 7. Major Shareholders and Related Party Transactions Related Party Transactions Continuing Related Party Transactions with CLIC . The China Life brand name and our reputation could be materially harmed if CLIC fails to make payments when due on outstanding policies retained by CLIC in the restructuring or new policies written by CLIC after the restructuring, if CLIC reduces the rates of return payable on policies retained by CLIC or if CLIC is placed into receivership.

As our controlling shareholder, CLIC will be able to exert influence on our affairs and could cause us to make decisions or enter into transactions that may not be in your best interests.

We are controlled by CLIC, whose interests may conflict with those of our other shareholders. As of the date of this annual report, CLIC holds approximately 68.37% of our share capital. As a result of these factors, CLIC, which is wholly-owned by the PRC government, will, so long as it holds the majority of our shares, effectively be able to control the composition of our board of directors and, through the board, exercise a significant influence over our management and policies. In addition, subject to our articles of association and applicable laws, CLIC may, so long as it holds the majority of our shares, effectively be able to determine the timing and amount of our dividend payments and approve increases or decreases of our share capital, the issuance of new securities, amendments of our articles of association, mergers and acquisitions and other major corporate transactions. CLIC may also be able to prevent us effectively from taking actions to enforce or exercise our rights under agreements to which we are a party, including the agreements we entered into with CLIC in connection with the restructuring. See Item 7. Major Shareholders and Related Party Transactions . As a majority shareholder, CLIC may be able to take these actions without your approval. In addition, CLIC's control could have the effect of deterring takeovers or delaying or preventing changes in control or changes in management that might be desirable to other shareholders.

CLIC may direct business opportunities elsewhere.

CLIC has other business interests, including the run-off of the insurance policies retained by it in the restructuring. Notwithstanding a general undertaking pursuant to a non-competition agreement with us not to compete with us in our principal areas of business in China, CLIC is permitted to sell riders to these retained policies and enter into other businesses, including life insurance businesses outside of China and property and casualty (other than businesses that compete with our accident and health businesses) and asset management businesses, both inside and outside of China. In 2006, we formed a property and casualty company with CLIC, in connection with which we granted a waiver to CLIC allowing it to engage in accident and short-term health businesses indirectly through the property and casualty company.

Table of Contents

CLIC engages in insurance businesses in Hong Kong, Macau and Singapore through China Life Insurance (Overseas) Co., Limited, or China Life Overseas, its wholly owned subsidiary. CLIC also may continue to engage in insurance business in other regions outside of China in the future. Although it is required under the non-competition agreement to give us a right of first refusal over business opportunities it develops in these areas, we may not be in a position to take advantage of these opportunities at that time, which could harm our business. See Item 7. Major Shareholders and Related Party Transactions Related Party Transactions Continuing Related Party Transactions with CLIC .

In addition, while we provide policy administration and other services to CLIC for the policies retained by CLIC in the restructuring, and provide investment management services to CLIC through our asset management subsidiary, these agreements can be terminated with notice or upon expiration. If CLIC were to terminate its policy administration and asset management arrangements with us and our asset management subsidiary, respectively, our loss of fees could materially and adversely affect us.

Risks Relating to the People's Republic of China

China's economic, political and social conditions, as well as government policies, could affect our business.

Substantially all of our assets are located in China and substantially all of our revenues are derived from our operations in China. Accordingly, our results of operations and prospects are subject, to a significant degree, to economic, political and legal developments in China. The economy of China differs from the economies of most developed countries in many respects, including, without limitation:

the extent of government involvement;

its level of development;

its growth rate; and

its control of foreign exchange.

The economy of China has been transitioning from a planned economy to a more market-oriented economy. Although in recent years the Chinese government has implemented measures emphasizing the utilization of market forces for economic reform, the reduction of state ownership of productive assets and the establishment of sound corporate governance in business enterprises, a substantial portion of productive assets in China is still owned by the Chinese government. In addition, the Chinese government continues to play a significant role in regulating industrial development. It also exercises significant control over China's economic growth through the allocation of resources, controlling payment of foreign currency-denominated obligations, setting monetary policy and providing preferential treatment to particular industries or companies.

According to data released by the National Bureau of Statistics of China, China's Gross Domestic Product, a key indicator of economic growth, was 6.9% in 2017. In an effort to bolster the economy, the Chinese government may take certain measures, including market-oriented financial reforms. Some of the measures taken by the Chinese government to improve China's economic performance may have a negative effect on our business. For example, our operating results and financial condition could be materially and adversely affected by government monetary policies

and changes in interest rate policies, tax regulations and policies and regulations affecting the capital markets and the asset management industry. A slowdown in Chinese growth rates could also adversely affect us by impacting sales of our products, reducing our investment returns, or otherwise.

Table of Contents

The PRC legal system has inherent uncertainties that could limit the legal protections available to you.

We are organized under the laws of China and are governed by our articles of association. The Chinese legal system is based on written statutes. Prior court decisions may be cited for reference but are not binding on subsequent cases and have limited precedential value. Since 1979, the Chinese legislative bodies have promulgated laws and regulations dealing with such economic matters as foreign investment, corporate organization and governance, commerce, taxation and trade. However, because these laws and regulations are relatively new, and because of the limited volume of published decisions, the interpretation and enforcement of these laws and regulations involve uncertainties.

Holders of H shares and ADSs generally are required to resolve disputes with us, our senior management and holders of our A shares only through arbitration in Hong Kong or China.

In accordance with the rules applicable to Chinese overseas listed companies, our articles of association provide that, with certain limited exceptions, all disputes or claims based on our articles of association, PRC company law or other relevant laws or administrative rules, and concerning matters between holders of H shares and ADSs and holders of A shares, us, or our directors, supervisors, president, vice presidents or other senior officers, must be submitted for arbitration at either the China International Economic and Trade Arbitration Commission or the Hong Kong International Arbitration Center. If an applicant chooses to have the dispute arbitrated at the Hong Kong International Arbitration Center, either party may request that the venue be changed to Shenzhen, a city in China near Hong Kong. The governing law for any such disputes or claims is Chinese law, unless Chinese law itself provides otherwise. Pursuant to an arrangement of mutual enforcement of arbitration awards between the PRC courts and the Hong Kong courts, Hong Kong arbitration awards are enforceable in China, subject to the satisfaction of certain legal requirements. However, due to the limited number of actions that have been brought in China by holders of shares issued by a Chinese company to enforce an arbitral award, we are uncertain as to the outcome of any action brought in China to enforce a Hong Kong arbitral award made in favor of holders of H shares and ADSs.

The laws in China differ from the laws in the United States and may afford less protection to our minority shareholders.

Although Chinese company law provides that shareholders of a Chinese company may, under certain circumstances, sue the company's directors, supervisors and senior management in the interests of the company, no detailed implementation rules or court interpretations have been issued in this regard. Also, class action lawsuits are generally uncommon in China. In addition, PRC company law imposes limited obligations on a controlling shareholder with respect to protection of the interests of minority shareholders, although overseas listed joint stock companies, such as ourselves, are required to adopt certain provisions in their articles of association that are designed to protect minority shareholder rights. These mandatory provisions provide, among other things, that the rights of any class of shares, including H shares, may not be varied without a resolution approved by holders of shares in the affected class holding no less than two-thirds of the shares of the affected class entitled to vote, and provide that in connection with a merger or division involving our company, a dissenting shareholder may require us to purchase the dissenters' shares at a fair price. Disputes arising from these protective provisions would likely have to be resolved by arbitration. See *Holders of H shares and ADSs generally are required to resolve disputes with us, our senior management and holders of our A shares only through arbitration in Hong Kong or China* .

Table of Contents

You may experience difficulties in effecting service of legal process, enforcing foreign judgments or bringing original actions in the PRC based on U.S. or other foreign laws against us, our management and some of the experts named in the annual report.

We are a company incorporated under the laws of China, and substantially all of our assets are located in China. In addition, most of our directors, supervisors, executive officers and some of the experts named in this annual report reside within China, and substantially all of the assets of these persons are located within China. As a result, it may not be possible to effect service of process within the United States or elsewhere outside China upon our directors, supervisors or executive officers or some of the experts named in this annual report, including with respect to matters arising under U.S. federal securities laws or applicable state securities laws. Our PRC legal counsel, King & Wood, has advised us that China does not have treaties providing for the reciprocal recognition and enforcement of judgments of courts with the United States, the United Kingdom, Japan or many other countries. Our Hong Kong legal adviser, Latham & Watkins, has also advised us that Hong Kong has no statutory arrangement for the reciprocal enforcement of judgments with the United States although it may be possible for a civil action to be brought in Hong Kong based on a monetary judgment of the courts of the United States. As a result, recognition and enforcement in China or Hong Kong of judgments of a court in the United States and any of the other jurisdictions mentioned above in relation to any matter may be difficult or impossible. Furthermore, an original action may be brought in the PRC against us, our directors, supervisors, executive officers or the experts named in this annual report only if the actions are not required to be arbitrated by PRC law and our articles of association, and only if the facts alleged in the complaint give rise to a cause of action under PRC law. In connection with any such original action, a PRC court may award civil liability, including monetary damages.

Holders of H shares may be subject to PRC taxation.

Under current PRC tax laws, regulations and rulings, dividends paid by us to individual holders of H shares outside of the PRC are subject to PRC individual income tax at rates ranging from 5% to 20% (usually 10%), depending on the applicable tax treaties between the home country of the individual holder of H shares and the PRC. When paying dividends to non-resident enterprise holders of H shares outside of the PRC, such dividends are subject to an enterprise income tax, which is currently levied at a rate of 10%. Such non-resident enterprise holders of H shares may be entitled to tax reductions or exemptions according to applicable tax treaties. In addition, to date, relevant tax authorities have not collected capital gains tax on the gains realized by individuals upon the sale or other disposition of H shares. If relevant tax authorities promulgate implementation rules on the taxation of capital gains realized by individuals upon the sale or other disposition of H shares, individual holders of H shares may be required to pay capital gains tax. See Item 10. Additional Information Taxation The People's Republic of China .

Government control of currency conversion and the fluctuation of the Renminbi may materially and adversely affect our operations and financial results.

We receive substantially all of our revenues in Renminbi, which currently is not a freely convertible currency. A portion of these revenues must be converted into other currencies to allow us to make payments on declared dividends, if any, on our H shares, and payments of interest and principal on our debt held in foreign currencies.

Under China's existing foreign exchange regulations, we are able to pay dividends and interest and principal in foreign currencies without prior approval from the SAFE by complying with various procedural requirements. The Chinese government, however, may, at its discretion, restrict access in the future to foreign currencies for current account transactions. If this were to occur, we may not be able to pay dividends in foreign currencies to our shareholders, including holders of our ADSs.

Table of Contents

The value of the Renminbi against the U.S. dollar and other currencies fluctuates and is affected by, among other things, changes in China's political and economic conditions. On July 21, 2005, the PRC government introduced a managed floating exchange rate system to allow the value of the Renminbi to fluctuate within a regulated band based on market supply and demand and by reference to a basket of currencies. Under this system, the PBOC announces the closing price of a foreign currency traded against the Renminbi in the inter-bank foreign exchange market after the closing of the market on each working day, and makes it the central parity for the trading against the Renminbi on the following working day. On August 11, 2015, the PBOC adjusted the quotation mechanism of the Renminbi central parity to also consider demand and supply in foreign exchange markets and price movements of major currencies, in addition to the closing price on the previous working day. On May 26, 2017, the PBOC introduced the counter-cyclical factor into its formula that determines a central parity of Renminbi against the U.S. dollar. Under the current mechanism, the central parity of the Renminbi against the U.S. dollar is determined based on the closing price, changes in a basket of currency exchange rates and the counter-cyclical factor. From July 21, 2005 to April 13, 2018, the Renminbi appreciated by approximately 28.9% against the U.S. dollar. In 2017, the Renminbi appreciated by 6.36% against the U.S. dollar. A portion of our assets and liabilities are held in foreign currencies and may be subject to foreign exchange gains and losses due to changes in exchange rates. We recorded RMB 520 million (US\$ 80 million) in foreign exchange gains for the year ended December 31, 2017, resulting mainly from the increase of our assets held in foreign currencies and the fluctuation of the Renminbi exchange rate. Any future appreciation of the Renminbi may materially and adversely affect the value of, and any dividends payable on, our H shares in foreign currency terms. Our financial condition and results of operations also may be affected by changes in the value of certain currencies other than the Renminbi.

Payment of dividends is subject to restrictions under Chinese law.

Under Chinese law, dividends may be paid only out of distributable profits. Any distributable profits that are not distributed in a given year are retained and available for distribution in subsequent years. However, ordinarily we will not pay any dividends in a year in which we do not have any distributable profits.

Payment of dividends by us is also regulated by the PRC insurance law. See Item 8. Financial Information Consolidated Financial Statements and Other Financial Information Policy on Dividend Distributions .

ITEM 4. INFORMATION ON THE COMPANY**A. HISTORY AND DEVELOPMENT OF THE COMPANY**

We were formed as a joint stock life insurance company pursuant to the PRC company law on June 30, 2003 under the corporate name of _____ in connection with the restructuring.

General Information

Our principal executive offices are located at 16 Financial Street, Xicheng District, Beijing 100033, China. Our telephone number is (86-10) 6363-3333. Our official website address is www.e-chinalife.com. The information on our website is not a part of this annual report. We have appointed CT Corporation System at 111 Eighth Avenue, New York, New York 10011 as our agent for service of process in the United States.

Table of Contents

Our Restructuring

Upon the approval of the State Council and the CIRC, we were formed on June 30, 2003 as a joint stock company in connection with the restructuring by CLIC, our controlling shareholder. The restructuring was effected through a plan of restructuring, which was approved by the CIRC on August 21, 2003, and a restructuring agreement we entered into with CLIC on September 30, 2003, with retroactive effect to June 30, 2003, which we refer to in this annual report as the effective date. Pursuant to PRC law and the restructuring agreement, we enjoyed the rights and benefits and assumed the obligations and liabilities arising from the restructuring from and after the effective date.

In connection with the restructuring:

CLIC transferred to us (1) all long-term insurance policies (policies having a term of more than one year from the date of issuance) issued on or after June 10, 1999, having policy terms approved by or filed with the CIRC on or after June 10, 1999 and either (i) recorded as a long-term insurance policy as of June 30, 2003 in an actuarial database attached to the restructuring agreement as an annex or (ii) having policy terms for group supplemental medical insurance (fund type), (2) stand-alone short-term policies (policies having a term of one year or less from the date of issuance) issued on or after June 10, 1999 and (3) all riders supplemental to the policies described in clauses (1) and (2) above, together with the applicable reinsurance contracts specified in an annex to the restructuring agreement. We refer to these policies in this annual report as the transferred policies. All other insurance policies were retained by CLIC. We refer to these policies as the non-transferred policies. We assumed all obligations and liabilities of CLIC under the transferred policies. CLIC continues to be responsible for its liabilities and obligations under the non-transferred policies following the effective date.

Cash, specified investment assets and various other assets were also transferred to us.

CLIC agreed not to, directly or indirectly through its subsidiaries and affiliates, participate, operate or engage in life, accident and health insurance businesses and any other business in China which may compete with our insurance business. CLIC also undertook (1) to refer to us any corporate business opportunity that falls within our business scope and which may directly or indirectly compete with our business and (2) to grant us a right of first refusal, on the same terms and conditions, to purchase any new business developed by CLIC. See Item 7. Major Shareholders and Related Party Transactions Related Party Transactions Continuing Related Party Transactions with CLIC.

Substantially all of the management personnel and employees who were employed by CLIC in connection with the transferred assets and business were transferred to us. Some management and personnel remained with CLIC.

CLIC retained the trademarks used in our business, including the China Life name in English and Chinese and the ball logos, and granted us and our branches a royalty-free license to use these trademarks. CLIC and its subsidiaries and affiliates will be entitled to use these trademarks, but CLIC may not license or transfer these trademarks to any other third parties. See Item 7. Major Shareholders and Related Party

Table of Contents

CLIC's contracts with its agents and other intermediaries were transferred to us.

We entered into various agreements under which we provide policy administration services to CLIC for the non-transferred policies, manage CLIC's investment assets and lease office space from CLIC for our branch and field offices. See Item 7. Major Shareholders and Related Party Transactions .

In connection with the restructuring, CLIC established, together with the MOF, a special purpose fund for the purpose of paying claims under the non-transferred policies. Under the administrative measures for the special purpose fund as amended in May 2012, the special purpose fund will be funded by renewal premiums paid on the non-transferred policies over time; tax rebates received by CLIC; proceeds from the investments of the special purpose fund; shareholder dividends paid in cash to CLIC by its subsidiaries and shareholding enterprises; proceeds from the disposition by CLIC of its shares in its subsidiaries and shareholding enterprises over time; cash income from the disposition of assets by CLIC; financial assets owned by CLIC; long-term equity investment held by CLIC; and funds injected by the MOF in the event of a deficiency in the special purpose fund. The special purpose fund is co-administered by CLIC and the MOF. The special purpose fund will be available to satisfy CLIC's operating expenses, including the payment of benefits and claims obligations arising from the non-transferred policies, as well as expenses incurred in operating the special purpose fund, including third-party management fees, professional fees and such other purposes as the management committee of the special purpose fund may agree, as well as capital expenses as approved by the MOF. A management committee of the special purpose fund comprised of four representatives from the MOF and three representatives from CLIC oversees the management of the fund, with specified material items subject to the approval of the MOF. The special purpose fund will be dissolved when all claims and benefits under the non-transferred policies have been paid, or sooner if the management committee so agrees.

The MOF's approval of the special purpose fund issued to CLIC provides that in the event there is any deficiency in the special purpose fund for so long as the fund is in existence as described above to meet any payment obligation arising out of the non-transferred policies, the MOF will provide support through the injection of funds to ensure the payments of benefits and claims to the policyholders of the non-transferred policies. We have been advised by our PRC legal counsel, King & Wood, that (1) the MOF has the authority to issue this approval regarding the special purpose fund, (2) the approval is valid and effective and (3) it has no reason to believe that the MOF will revoke the approval. We cannot assure you, however, that a court would decide in a manner consistent with King & Wood's conclusions.

In accordance with generally applicable tax laws and regulations, CLIC, AMC and ourselves will file income tax returns and pay our respective income taxes as separate and independent taxpayers. In accordance with a circular issued by the MOF, a portion of the income tax payments made by CLIC and us during the period of January 1, 2003 to December 31, 2010 is required to be rebated to CLIC. All of the income tax payments made by AMC may also be rebated to CLIC, if the current shareholding structure of AMC remains unchanged. In 2011 CLIC applied for the extension of the period during which the income tax payments will be rebated, but no substantive progress had been made as of the date of this annual report.

We have been advised by our PRC legal counsel, King & Wood, that following the restructuring we would not have any continuing obligations to holders of the non-transferred policies and that there is no legal basis on which holders of the non-transferred policies can make a claim against China Life. King & Wood based its conclusion on, among other things, the following factors: (1) after the restructuring, China Life was established as a separate legal entity and China Life's assets and liabilities should be regarded as distinct and separate from those of CLIC; (2) there is no contractual relationship, direct or indirect, between the holders of the non-transferred policies and China Life; (3) the restructuring (including the transfer of the transferred policies to China Life) has been approved by the CIRC and has

been conducted without infringing upon the rights of the holders of non-transferred policies; (4) the arrangements made under the restructuring agreement, in particular the MOF's support as described above, are expected to enable CLIC to satisfy its obligations under the non-transferred policies; and (5) PRC regulatory authorities have no legal power to direct China Life to assume CLIC's obligations under the non-transferred policies or to indemnify the holders of the non-transferred policies.

See Item 3. Key Information Risk Factors Risks Relating to the Restructuring .

Table of Contents

Developments After Restructuring

On November 23, 2003, we established an asset management company, AMC, with CLIC, in connection with the restructuring. AMC manages our investment assets and, separately, substantially all of those of CLIC. On December 30, 2006, we established a property and casualty company, CLPCIC, with CLIC. On January 15, 2007, we established a pension insurance company, China Life Pension, with CLIC and AMC.

In December 2003, we successfully completed our initial public offering of H shares, including H shares in the form of American depositary shares, or ADSs, and raised approximately RMB 24,707 million in aggregate net proceeds. Upon completion of our initial public offering, our H shares became listed on the Hong Kong Stock Exchange and ADSs each representing 40 of our H shares became listed on the New York Stock Exchange. The ratio of ADSs to H shares was reduced from 40 H shares to 15 H shares on December 29, 2006 and was further reduced from 15 H shares to 5 H shares on May 26, 2015.

In December 2006, we issued 1,500,000,000 new ordinary domestic shares through public offering on the SSE at the offering price of RMB 18.88 per share, raising RMB 28,320 million in aggregate gross proceeds. The A shares have been listed on the SSE since January 9, 2007. Prior to the offering, CLIC held 19,323,530,000 ordinary domestic shares, or CLIC A shares, which have been registered with the China Securities Depository and Clearing Corporation Limited as circulative A shares with restrictive trading following the A share offering. CLIC has undertaken that for a period of 36 months commencing on January 9, 2007 it will not transfer or put on trust the CLIC A shares held by it or allow such CLIC A shares to be repurchased by China Life. On January 11, 2010, 19,323,530,000 CLIC A shares were released from trading restrictions. Of this amount, 150,000,000 shares had remained frozen in accordance with relevant Chinese regulations until December 2010.

In July 2015, we issued Core Tier 2 Capital Securities of US\$ 1,280 million to qualified investors who meet applicable regulatory requirements at an initial distribution rate of 4.00%.

We incurred capital expenditures of RMB 17,055 million (US\$ 2,621 million), RMB 5,892 million and RMB 3,615 million in 2017, 2016 and 2015, respectively. These capital expenditures mainly comprised of the addition of properties for our own use.

B. BUSINESS OVERVIEW

We are the leading life insurance company in China. We provide a broad range of insurance products, including individual and group life insurance, annuity, health insurance and accident insurance products. We had nearly 268 million insurance policies in force as of December 31, 2017, including individual and group life insurance policies, annuity contracts, health insurance and accident insurance policies. As of December 31, 2017, the average guaranteed rate of return for all of our long-term insurance policies in force was 2.62%. For the financial year ended December 31, 2017, our lapse rate was approximately 4.13%. The policy persistency rates, which measure the ratio of the insurance policies that are still effective after a certain period, were 90.90% for 14 months after issuance and 85.70% for 26 months after issuance.

Table of Contents

Effective January 1, 2014, we realigned our previously reported individual life insurance, group life insurance, short term insurance, supplementary major medical insurance and other segments into four newly identified segments, namely life insurance, health insurance, accident insurance and other. Our management has conducted its analysis and evaluation of our operating results based on the new reporting segments. In connection with this realignment, segment operating results for the fiscal year ended December 31, 2013 have been revised to conform to current year segment operating results presentation. For a detailed discussion, see our consolidated financial statements included elsewhere in this annual report.

The information below is organized in accordance with our identified segments.

Life Insurance

We offer life insurance and annuity products to individuals and groups. We market our individual life insurance and annuity products primarily through a distribution force comprised of approximately 1,578,000 exclusive agents operating in approximately 17,100 field offices throughout China, as well as other non-dedicated agencies located at branch offices of banks and other organizations. We offer group life insurance and annuity products to the employees of companies and institutions through approximately 100,000 direct sales representatives, as well as insurance agencies and insurance brokerage companies. Gross written premiums generated by our life insurance and annuity products, totaled RMB 429,822 million (US\$ 66,062 million) for the year ended December 31, 2017, RMB 361,905 million for the year ended December 31, 2016 and RMB 308,169 million for the year ended December 31, 2015, constituting 83.96%, 84.07% and 84.67% of our total gross written premiums for those periods. The figure for 2017 represented a 18.77% increase from 2016.

The following table sets forth selected financial and other data regarding our life insurance and annuity business as of the dates or for the periods indicated.

	As of or for the year ended				Compound annual growth rate (2015-2017)
	2015	2016	2017	2017	
	RMB	RMB	RMB	US\$	
	<i>(in millions, except as otherwise indicated)</i>				
Gross written premiums	308,169	361,905	429,822	66,062	18.10%
Liabilities of insurance contracts	1,652,469	1,762,363	1,914,597	294,268	7.64%
Liabilities of investment contracts	74,046	183,773	218,436	33,573	71.76%

Products

We offer a wide variety of life insurance and annuity products to individuals, providing a wide range of coverage for the whole length of a policyholder's life. Our individual life insurance and annuity products consist of whole life and term life insurance, endowment insurance and annuities. We also offer group annuity products and group whole life and term life insurance products to enterprises and institutions. We market these products as an important part of our group customers' overall employee benefit plans. We believe we are the market leader in the development of group annuity products.

We offer both non-participating and participating products. There were approximately 212 million non-participating policies and 56 million participating policies as of December 31, 2017, among which approximately 107 million

non-participating policies and 39 million participating policies were sold to individuals.

Table of Contents

The following table sets forth selected financial information regarding our life insurance and annuity products.

	For the year ended December 31,				Compound annual growth rate (2015-2017)
	2015 RMB	2016 RMB	2017 RMB	2017 US\$	
<i>(in millions, except as otherwise indicated)</i>					
Gross written premiums					
Whole life and term life insurance	31,595	33,395	40,606	6,241	13.37%
Endowment	177,871	188,415	198,418	30,496	5.62%
Annuities	98,703	140,095	190,798	29,325	39.03%

Whole Life and Term Life Insurance*Non-participating whole life and term life insurance*

We offer non-participating whole life and term life insurance products.

Non-participating whole life insurance products provide a guaranteed benefit, pre-determined by the contract, upon the death of the insured, in return for the periodic payment of fixed premiums over a pre-determined period. Premium payments may be required for the length of the contract period, to a specified age or for a specified period, and are typically level throughout the period.

Non-participating term life insurance products provide a guaranteed benefit upon the death of the insured within a specified time period in return for the periodic payment of fixed premiums. Specified coverage periods generally range from 5 to 30 years or expire at specified ages. Death benefits may be level over the period or increasing. Premiums are typically at a level amount for the coverage period. Term life insurance products are sometimes referred to as pure protection products, in that there are normally little or no savings or investment elements. Unlike endowment products, term life insurance policies expire without maturity benefits.

Participating whole life insurance

We also offer participating whole life insurance products, which, in addition to the benefit payment of traditional whole life insurance policies, also provide a participation feature in the form of dividends. The policyholder is entitled to share a portion of the distributable earnings from participating products, as determined by us based on formulas prescribed by the CIRC. Under guidelines issued by the CIRC, the dividends must be no less than 70% of the distributable earnings from participating products. Policyholders may receive dividends in cash or apply them to increase death benefits or cash values available upon surrender. We offer participating whole life insurance products only to individual customers.

We have ceased offering participating whole life insurance since April 2017 in accordance with regulatory requirements. We continue to fulfill our obligations under the participating whole life insurance policies that are still in force.

Table of Contents

Endowment

Non-participating endowment products

Non-participating endowment products provide to the insured various guaranteed benefits if the insured survives specified maturity dates or periods stated in the policy, and provide to a beneficiary guaranteed benefits upon the death of the insured within the coverage period, in return for the periodic payment of premiums. Specified coverage periods generally range from 5 to 30 years or end at specified ages. Premiums are typically at a level amount for the coverage period.

Participating endowment products

We also offer participating endowment products, which are endowment policies that also provide a participation feature in the form of dividends. Policyholders are entitled to share a portion of the distributable earnings from participating products, as determined by us based on formulas prescribed by the CIRC. Under guidelines issued by the CIRC, the dividends must be no less than 70% of the distributable earnings from participating products. Policyholders may receive dividends in cash or apply them to increase benefits or cash values available upon surrender.

China Life Fu Lu Shuang Xi Participating Endowment and China Life Xin Fu Yi Sheng Participating Endowment generated the most income for participating endowment products in 2017. China Life Fu Lu Shuang Xi Participating Endowment had RMB 19,659 million (US\$ 3,022 million) of net premiums in 2017, representing 4.58% of the net premiums of our life insurance business. China Life Xin Fu Yi Sheng Participating Endowment had RMB 18,494 million (US\$ 2,842 million) of net premiums in 2017, representing 4.31% of the net premiums of our life insurance business. The net premiums earned from our participating endowment products decreased by RMB 14,168 million (US\$ 2,178 million), or 10.69%, to RMB 118,390 million (US\$ 18,196 million) in 2017 from RMB 132,558 million in 2016.

We offer endowment products only to individual customers.

Annuities

Annuities are used for both asset accumulation and asset distribution needs. Annuitants pay premiums into our accounts, and receive guaranteed level payments during the payoff period specified in the contracts. We offer both non-participating and participating annuities. For non-participating annuity products, risks associated with the investments are borne entirely by us. A significant portion of our non-participating annuity products imposes charges upon an early surrender or withdrawal of the contract.

Participating annuity products are annuities that provide a participation feature in the form of dividends in addition to the guaranteed annuity benefits. The dividends are determined by us in the same manner as our life insurance policies. Annuitants may receive dividends in cash or apply them to increase annuity benefits or reduce the premiums or deposits required to maintain the contract in force. Like non-participating annuities, a significant portion of our participating annuity products imposes charges upon an early surrender or withdrawal of the contract.

In our non-participating group annuities, interest accrued on an annuitant's deposits is credited to each participating employee's personal account.

We also offer participating group annuities. In our participating group annuities, interest accrued on an annuitant's deposits is either credited to the participating employee's personal account or credited to the participating employee's

personal account as well as the employer's group account. The annuitant is entitled to share a portion of our distributable earnings of our participating products, as determined by us in accordance with the requirements of the CIRC, in excess of the rate we guarantee to participating employees.

Table of Contents***Universal Life Products***

Universal life products are life insurance policies with flexible premium and sum insured as well as transparency on costs. For each universal life policy, we establish a separate account and determine the interest credit rate, mortality and expense charges specifically for such account. The benefits of universal life products are linked to the account value of each separate account.

Marketing and Distribution***Individual***

We have historically sold most of our individual life insurance and annuity products to the mass market and will continue to actively serve this market. However, we believe our core individual customer base will evolve as China's economy develops. We will seek to capitalize on the market opportunities in the growing affluent segment of China's population by focusing our marketing efforts on large and medium-sized cities with an aim to attract more medium- and high-end customers, as we believe that the demand for life insurance and annuity products in these areas is greater. In addition, we have been implementing a customer segmentation sales approach which targets different customers with different products with these products in many cases supplemented by our individual accident and health products.

We distribute our individual life and annuity products nationwide through multiple channels. Our primary distribution system is comprised of approximately 1,578,000 exclusive agents in approximately 17,100 field offices throughout China. In addition, we are implementing our customer-oriented market segmentation sales initiatives to all exclusive agents nationwide. While continuing to invest in our exclusive agent force, we have also expanded into other distribution channels, primarily non-dedicated agencies located in approximately 44,000 outlets of commercial banks, to diversify our distribution channels and to achieve higher growth. See [Distribution Channels](#) .

Group

We target our group life insurance and annuity products to large institutional customers in China, including branches of foreign companies, which we believe have a greater awareness of and need for group life insurance and annuity products. We have long-term customer relationships with many of China's largest companies and institutions. We provide large group customers with products having flexible fee and dividend structures, as well as convenient customer service. While continuing to focus on large institutional clients, we also target small- to medium-sized companies to supplement our growth and to increase our profits.

We market our group life insurance and annuity products primarily through our direct sales representatives. We also market our group life insurance and annuity products through commercial banks, insurance agency companies and insurance brokerage companies. See [Distribution Channels](#) .

Health Insurance

We offer a broad array of health insurance products and services to both individuals and groups, including disease-specific insurance, medical expense insurance and defined benefit insurance. Our health insurance gross written premiums totaled RMB 67,708 million (US\$ 10,407 million) for the year ended December 31, 2017, RMB 54,010 million for the year ended December 31, 2016 and RMB 42,041 million for the year ended December 31, 2015, constituting 13.23%, 12.55% and 11.55% of our total gross written premiums for those periods. The figure for 2017 represented a 25.36% increase from 2016.

Table of Contents

Our health insurance business shares our nationwide life insurance sales force and distribution network of exclusive agents. Our policy review and claim adjustment processes are facilitated through a team of supporting personnel with medical training.

The following table sets forth selected financial and other data regarding our health insurance as of the dates or for the periods indicated. The financial results of both our long-term health insurance and short-term health insurance are reflected in the following table.

	As of or for the year ended December 31,				Compound annual growth rate (2015-2017)
	2015 RMB	2016 RMB	2017 RMB	2017 US\$	
	<i>(in millions, except as otherwise indicated)</i>				
Gross written premiums	42,041	54,010	67,708	10,407	26.91%
Liabilities of insurance contracts	57,024	77,837	102,190	15,706	33.87%
Liabilities of investment contracts	10,060	11,933	14,064	2,162	18.24%

Products

We offer health insurance products to both individuals and groups. We classify our health insurance products as short-term products, having policy terms of less than or up to one year, and long-term products, having policy terms longer than one year. We offer both short-term and long-term defined health benefit plans, medical expense reimbursement plans, care insurance plans and disease-specific plans to individuals and groups.

Defined health benefit plans

These plans provide a fixed payment based on the number of days of hospitalization for specific diseases or surgical operation. Policyholders either pay premiums in a single payment or on a periodic basis.

Medical expense reimbursement plans

These plans provide for the reimbursement of a portion of the participant's outpatient or hospitalization treatment fees and expenses. Policyholders pay premiums either in a single payment or on a periodic basis or, for certain group medical expense reimbursement plans, irregularly as determined by the policyholder.

Since 2003, we also started providing medical agency services for the basic social insurance plans carried out by the Chinese government. The agency services include checking and reimbursement of medical expenses and medical service investigation. We do not collect premiums but only charge a specified amount of handling fees for these services. As of December 31, 2017, we have carried out more than 400 medical agency services projects in over 20 provinces, providing services to more than 90 million people.

Table of Contents

We also commenced our supplementary major medical insurance business in 2013. As part of the Chinese government's overall medical insurance scheme, supplementary major medical insurance reimburses policyholders for a specified percentage of their high medical expenses caused by major illnesses which are in excess of the maximum amounts covered by the basic social medical insurance and will otherwise be borne by the individuals. The Chinese government launched pilot supplementary major medical insurance programs beginning in 2013, and as of the date of this annual report, the Chinese government has implemented supplementary major medical insurance programs nationwide in China. Local governments use a portion of the basic medical insurance funds to purchase supplementary major medical insurance service from qualified insurance companies through a government tender. Supplementary major medical insurance offers protection to all the policyholders covered by the basic social medical insurance in the pilot areas and policyholders do not need to pay any extra premium for the supplementary major medical insurance. As of December 31, 2017, we had carried out over 260 supplementary major medical insurance projects, providing services to approximately 420 million people.

Care insurance plans

These plans provide to individuals who have disabilities covered by the insurance contracts with a fixed allowance and reimbursement of expenses for their daily living and medical care. Premium payments are paid either in a single payment or on a periodic basis.

We commenced our care insurance business in 2015. The Chinese government launched pilot long-term care insurance programs beginning in 2016. Under these programs, local governments in pilot areas raise funds through various channels to provide funds or protection services to people who have life disabilities for their daily living and medical care. Some local governments purchase long-term care insurance services from qualified insurance companies through government tender procedures. As of December 31, 2017, we had carried out nine long-term care insurance projects, providing services to over 5 million people.

Disease-specific plans

These plans provide a payment benefit for various diseases. Premium payments for disease-specific plans are paid either in a single payment or on a periodic basis.

Marketing and Distribution

We offer our health insurance products to both individuals and groups through the same distribution channels we use to market our life insurance products. We market our individual health insurance products through our exclusive agent sales force. We market our group health insurance products primarily through our direct sales representatives. See [Distribution Channels](#) .

We market our health insurance products either as primary products, as riders or as supplementary products packaged with our life, annuity or accident insurance products. We conduct extensive health insurance related training programs for our direct sales representatives and our exclusive agents.

Accident Insurance

We are the leading accident insurance provider in China. Our accident insurance gross written premiums totaled RMB 14,436 million (US\$ 2,219 million) for the year ended December 31, 2017, RMB 14,583 million for the year ended December 31, 2016 and RMB 13,761 million for the year ended December 31, 2015, constituting 2.82%, 3.39% and 3.78% of our total gross written premiums for those periods. The figure for 2017 represented a 1.01% decrease from

2016.

37

Table of Contents

The following table sets forth selected financial and other data regarding our accident insurance as of the dates or for the periods indicated. The financial results of both our long-term accident insurance and short-term accident insurance are reflected in the following table.

	As of or for the year ended				Compound annual growth rate (2015-2017)
	December 31,				
	2015 RMB	2016 RMB	2017 RMB	2017 US\$	
	<i>(in millions, except as otherwise indicated)</i>				
Gross written premiums	13,761	14,583	14,436	2,219	2.42%
Liabilities of insurance contracts	6,492	7,786	8,346	1,283	13.38%

Products

We offer a broad array of accident insurance products to both individuals and groups.

Individual accident insurance

Individual accident insurance products provide a benefit in the event of death or disability of the insured as a result of an accident, or a reimbursement of medical expenses to the insured in connection with an accident. Typically, a death benefit is paid if the insured dies as a result of the accident within 180 days of the accident, and a disability benefit is paid if the insured is disabled, with the benefit depending on the extent of the disability. If the insured receives medical treatment at a medical institution approved by us as a result of an accident, individual accident insurance products may also provide coverage for such medical expenses. We offer a broad array of individual accident insurance products, such as insurance for students and infants against death and disability resulting from accidental injury and comprehensive coverage against accidental injury. We also offer products to individuals requiring special protection, such as accidental death and disability insurance for commercial air travel passengers and automobile passengers and drivers.

Group accident insurance

We offer a number of group accident insurance products and services to businesses, government agencies and other organizations of various sizes. We also offer group accident products targeted at specific groups, such as small-value group accident injury insurance to low-income people in rural areas.

Marketing and Distribution

We market our individual accident insurance products through our direct sales force and our exclusive agent sales force, as well as intermediaries, such as non-dedicated agencies located at outlets of commercial banks, savings cooperatives, travel agencies, hotels and airline sales counters and insurance agency and insurance brokerage companies. We market our group accident insurance products primarily through our direct sales representatives and the same intermediaries we use to sell our individual accident products. See [Distribution Channels](#) .

We market our accident insurance products either as primary products, as riders or as supplementary products packaged with our life, annuity or health products. Our direct sales representatives market our individual accident products to employees of our institutional customers.

Table of Contents

Product Development

In 2017, in line with our general development strategy, we developed and introduced 101 new products, including 64 long-term insurance products consisting of 14 life insurance products, 26 annuity products, one accident insurance product and 23 health insurance products; and 37 short-term insurance products consisting of two life insurance products, 12 accident insurance products and 23 health insurance products.

With respect to long-term insurance products, we developed and introduced, among others:

for the individual insurance distribution channel, eight products including insurance packages of China Life Luck for Children (ultimate edition) and China Life Luck (ultimate edition); Kang Ning Regular (premium edition) illness insurance package, which optimizes and upgrades the product of Kang Ning Regular and is suitable for the general public; Sheng Shi Chuan Jia whole life insurance product, which enables us to generate more premiums and commissions and benefits the development of our protection-based products; Sheng Shi Yan Nian pension annuity insurance, which meets customer's needs for planning for their elderly years with commercial pension products; and Ji Xiang Care insurance package, through which we provide care liability coverage;

for the bancassurance distribution channel, several products including China Life Xin Xi Bao annuity insurance, China Life Additional Le Jian Bao critical illness insurance, China Life Xin Fu Wen Ying annuity insurance and China Life Xin Yuan Bao universal annuity insurance (preferential edition) sold in combination with other products, and the insurance package of China Life Guang You Life, which is exclusive to China Guangfa Bank, further improving the competitiveness of our product package and effectively promoting the business development of the bancassurance distribution channel;

for the group distribution channel, China Life Hui Xiang Yi Sheng whole life critical illness insurance, in response to the transformation and upgrade of the channel, which taps the resources of corporate customers;

for the telephone distribution channel, Hong Kang Jia Bao (Type A/B) products for existing Hong Kang customers, which are designed to expand coverage of diseases at a lower premium; Xin Fu E Sheng, a popular product for the channel, which has been upgraded and modified to meet new regulatory requirements; and two annuity insurance products, the Fu Man Jin Sheng (general) and Fu Man Jin Sheng (participating); and

for the online distribution channel, nine products including, among others, the Ru E Bei Bei insurance package, the Kang Ai E Sheng, E Shu Tie insurance package, Ru E Kang Yue (Type A/B/C) and Ru E Bao. With respect to short-term insurance products, we developed a series of insurance products for medical insurance accounts in some parts of the Yangtze River Delta region in order to improve the utilization efficiency of balances in personal basic medical insurance accounts and alleviate the pressure from self-paying medical expenses in some regions; developed seven products in the Fu Pin Bao series for registered poverty-stricken individuals based on the experiences of poverty relief work in Ningxia, which considers the needs for poverty relief and protections in various regions; developed two products including China Life Group Care Insurance to cater for care-related pilot policies

introduced by the local governments; developed China Life Quan Jia Fu medical insurance to meet the medical protection needs of family customers; and updated and developed several insurance products such as the Tong Tai series to cater for the needs of different segments in the market.

Table of Contents**Distribution Channels**

We believe we have the largest distribution force with the most extensive geographic reach compared with any of our competitors. Our distribution network reaches almost every county in China. Throughout China, we have approximately 1,578,000 exclusive agents operating in approximately 17,100 field offices for our individual products and approximately 100,000 direct sales representatives for group products. We have a multi-channel distribution network selling individual and group insurance products through intermediaries, primarily non-dedicated agencies located in approximately 44,000 outlets of commercial banks as of the end of 2017. Commission rates vary by product, based on such factors as the payment terms and period over which the premiums are paid for the product, as well as CIRC regulations. We support our agents and representatives through training programs, sales materials and information technology systems.

Exclusive agent force

Our exclusive agent force of approximately 1,578,000 agents is the primary distribution channel for our individual life, annuity, health and accident insurance products.

The following table sets forth information relating to our exclusive agent force as of the dates indicated.

	As of December 31,		
	2015	2016	2017
Number of exclusive agents (approximately)	979,000	1,495,000	1,578,000
Number of field offices	17,125	17,011	17,100

Our exclusive agent force is among our most valuable assets, allowing us to more effectively control our distribution and build and maintain long-term relationships with our individual customers. The number of our exclusive agents increased from 1,495,000 as of the end of 2016 to 1,578,000 as of the end of 2017. During 2017, we attracted more new qualified agents by expanding our recruitment program, making further efforts in training new qualified agents and strengthening sales support. At the same time, we have continued carrying out performance reviews in 2017, which have led to the departure of a number of exclusive agents with lower productivity. In addition, in August 2015, the CIRC canceled the qualification certificates requirements for the individual insurance agents, which helped to facilitate our recruitment process. However, we still adhere to our own standards for recruitment to ensure the quality and productivity of our exclusive agent force. See Item 4. Information on the Company Business Overview Regulatory and Related Matters Regulation of Insurance Agencies, Insurance Brokers and Other Intermediaries and Item 3. Key Information Risk Factors Risks Relating to Our business Our growth is dependent on our ability to attract and retain productive agents. We believe that our customers and prospective customers prefer the personal approach of our exclusive agents and, therefore, we believe our exclusive agent force will continue to serve as our core distribution channel.

We also have developed a special sales force targeting orphan policies (policies which were serviced by former exclusive agents who have since left the company) to improve our service for these policies.

We supervise and provide training to our exclusive agents through more than 2,053 full-time trainers and 169,684 part time trainers. We set product management and customer service standards, and have developed risk warning and credit rating systems, which we require all of our field offices and agents to meet, and conduct field tests with a view to ensuring quality. We also have an extensive training program.

Table of Contents

We compensate our exclusive agent force through a system of commissions and bonuses to reward performance. Our agents are compensated based on a commission rate that generally decreases over the premium period. For short-term insurance products, our exclusive agents are generally compensated with fixed agent fees. We provide group annuities, group commercial supplemental pension insurance, group life and medical insurance for our exclusive agents. We motivate our agents by rewarding them with performance-based bonuses and by organizing sales-related competitions among different field offices and sales units. We also try to increase the loyalty of our exclusive agents through other methods, such as through participation in sales conferences.

We believe we have the largest exclusive agent sales force in China. We intend to improve the quality and productivity of our individual exclusive agent force and reduce the attrition rate of our agents by taking the following actions:

improving the overall productivity of our exclusive agents by implementing our market segmentation sales approach, managing, supporting and incentivizing the exclusive agents through different levels, and providing standardized sales services to our customers;

motivating our exclusive agents with an improved performance-based evaluation and compensation scheme;

building a more professional exclusive agent force by improving our education and training system and programs, enhancing our training efforts and increasing the number of qualified exclusive agents;

improving the quality of our exclusive agent force and reducing turnover by expanding our recruitment program and strengthening the cultivation, training and performance support for our new exclusive agents;

improving the management of our exclusive agents by developing consistent standards for managing the conduct of our exclusive agents; and

improving the efficiency of our exclusive agents by providing sales support, including establishing a customer service platform and improving and expanding the China Life E-Home sales support system nationwide to further enhance their marketing, time management and customer service capabilities.

Group distribution channel

Our group distribution channel is comprised of our direct sales force and intermediaries.

Direct sales force

Our direct sales force, which consists of approximately 100,000 direct sales representatives, is our primary distribution system for our group life insurance and annuities, group accident insurance and group health insurance products, as well as our individual accident insurance and individual short-term health insurance products. The number of our direct sales representatives increased rapidly from 86,000 as of the end of 2016 to 104,000 as of the end of 2017. During 2017, we attracted more direct sales representatives by strengthening our recruitment program and

making active efforts in recruiting and training direct sales representatives.

Table of Contents

We believe maintaining our leading position in the group insurance market depends on a professional and qualified direct sales force. We set product management and customer service standards which we require all of our branch offices and direct sales representatives to meet.

We motivate our direct sales representatives by rewarding them with performance-based bonuses and by organizing sales and services-related competitions among different branch offices and sales units.

Intermediaries

We also offer individual and group products through intermediaries.

We market group products through dedicated insurance agencies and insurance brokerage companies. Dedicated insurance agencies and insurance brokerage companies work with companies primarily to select group insurance providers and group products and services in return for commission fees. Currently, the market of dedicated insurance agencies and insurance brokerage companies in China generally remains underdeveloped. However, we expect that the dedicated insurance agencies and insurance brokerage companies will play a more important role in sales of our group products in the future.

We also sell short-term insurance products through other non-dedicated agencies. Currently, we have non-dedicated agencies operating at outlets of commercial banks, travel agencies, credit cooperatives, small loan companies and airline sales counters. We expect non-dedicated agencies to become an increasingly important distribution channel for individual products.

Bancassurance channel

We have bancassurance arrangements with major commercial banks in China, and currently generate a significant portion of our total sales through bancassurance. Our distribution channels are primarily comprised of non-dedicated agencies located in approximately 44,000 outlets of commercial banks. We have established strategic alliances with many banks. We intend to improve the attractiveness of our products by providing new products and all-around services to each major bank and providing training and integrated systems support to our banking partners.

Other distribution channels

We also sell individual products through other newly developed distribution channels including telephone sales and internet-based sales.

The major products sold through our telephone sales channel are individual insurance and health insurance products. As a new sales channel developed in recent years, the sales generated by our telephone sales channel have been increasing and we believe that its growth will continue.

The sales volume and number of customers of our internet-based sales channel have been steadily increasing over the past several years due to the improvement of the process for internet-based sales business. We also sell products through the internet-based sales platforms of insurance brokerage companies and other qualified third-party websites.

Table of Contents***Gross written premiums attributable to each distribution channel***

The following table sets forth gross written premiums attributable to each distribution channel, as of the dates indicated.

	For the year ended December 31			
	2015	2016	2017	2017

Competition

Our nearest competitors are Ping An Life, China Pacific Life, New China Life and Taikang Life.

In the life insurance market, Ping An Life, China Pacific Life, New China Life, Taikang Life and we collectively represented approximately 46% of total life insurance premiums in 2016. We primarily compete based on the nationwide reach of our sales network, the largest distribution force and the level of services we

provide, as well as our strong brand name.

In the accident insurance market, Ping An Life, China Pacific Life, New China Life, Taikang Life and we collectively represented approximately 65% of total accident premiums in 2016. We primarily compete based on the nationwide reach of our sales network and the level of services we provide and our strong brand name, as well as our cooperative arrangements with other companies and institutions.

Table of Contents

In the health insurance market, Ping An Life, China Pacific Life, New China Life, Taikang and we collectively represented approximately 43% of total health premiums in 2016. We primarily compete based on the nationwide reach of our sales network, the level of services we provide, our multi-layered managed care scheme and systems of policy review and claim management, as well as our strong brand name.

The following table sets forth market share information for the year ended December 31, 2016, the most recent year for which official market information for separate business segments is available, in all segments of the life insurance market in which we do business.

	Life premiums market share	Accident premiums market share	Health premiums market share	Total premiums market share
China Life	20%	29%	14%	20%
Ping An Life Insurance Company of China, Ltd. ⁽¹⁾	11%	21%	15%	13%

(China).

Source: China Insurance Yearbook 2017

We face competition not only from domestic life insurance companies, but also from non-life insurance companies and foreign-invested life insurers. There were 75 licensed life insurers as of December 31, 2015, 77 as of December 31, 2016 and 85 as of December 31, 2017. Property and casualty insurers were allowed to sell accident and short-term health insurance products with regulatory approval starting from January 2003, which we believe will lead to greater competition in the accident and health insurance sectors, especially in the group accident and group health insurance products. In addition, we believe that China's commitment to accelerate the opening of its insurance sector to foreign investors, including the relaxation on market access requirements applicable to foreign-invested insurance companies and foreign ownership limits in its insurance sector, will further increase competition in China's life insurance market.

Table of Contents

See Item 3. Key Information Risk Factors Risks Relating to the PRC Life Insurance Industry We expect competition in the Chinese insurance industry to increase, which may materially and adversely affect the growth of our business .

We also face increasing competition from other financial services providers, primarily licensed mutual fund companies, commercial banks providing personal banking services and operating business of various financial products, trust companies and brokerage houses licensed to manage separate accounts. These financial services providers may be permitted to manage employer-sponsored defined contribution pension plans, which we believe will compete directly with our group annuity products. We also face competition in the sale of our traditional life insurance savings policies, individual participating policies and annuities from financial institutions which offer investment products to the public.

Business Management

Customer Support Management

We seek to provide quality services to our customers and potential customers and to be responsive to their needs, both before and after a sale, through an extensive customer support network. Our customer service network is managed by specialized customer service departments, which are responsible for setting uniform standards and procedures for providing policy-related services to customers, handling inquiries and complaints from customers and training customer services personnel.

We deliver customer services primarily through customer service units operating in our branch offices and in field offices throughout China and a sophisticated telephone call center network. We take advantage of alternative customer services channels, such as cell phone messages and the Internet, complementing the customer services provided by our customer service units and the call center network.

Customer service units

We provide customer support through approximately 2,600 customer service units nationwide. We provide several types of policy-related services to our customers, which include collecting regular premiums, renewing policies, purchasing riders, reinstating lapsed policies, processing termination of policies, increasing insured amounts, processing policy loans, paying benefits and updating information regarding the insureds and beneficiaries of policies. We require our customer service units to provide these policy-related services in accordance with procedures and standards that we implement on a nationwide basis, helping to ensure the quality of the services we provide. We also have uniform service standards for customer service units nationwide. We also have a specialized customer service department to further refine our customer services. The customer service department's role is to provide service to our customers and supervise the quality of service provided by our customer service units.

Contact centers

Our contact centers allow customers to make product and service inquiries, file suggestions and complaints, report claims and losses, make appointments and apply for conservations. Our contact centers also allow the customers to access self-services through a smart voice navigation system and an interactive voice response system. They also provide call-back, greeting message and reminder call services to customers. With our dedicated, nationwide inquiry line, 95519 , our customers can reach us on a 24 hours/7 days basis.

Table of Contents

We believe our contact centers have become popular with our customers because of the quality of services we provide. We received the awards of China's Best Customer Contact Center of Year 2016-2017, Best Customer Contact Center for Management Innovation, Best Customer Contact Center for Service Experience and China's Best Customer Contact Center for Smart Service Application from the Customer Relationship Management Committee of the China Federation of IT Promotion and Customer Contact Center Committee. We also received the Best Call Centers in the World award from the International Customer Management Institute in 2007, 2011 and 2015, respectively, and have obtained the authentication of Chinese national contact center operating performance standards. We will continue to ensure that we have a sufficient number of lines and staff to service the increasing use of our contact centers.

We have established system-wide standards for our contact centers, which we monitor periodically through regular call quality monitoring and customer satisfaction surveys on the contact centers.

Cell phone message services

We send messages to convey such information as renewal payment reminders, premium payment notices and premium payment confirmations.

Internet-based services

Our customers can utilize our Internet-based services for inquiries, complaints and service requests through our website (www.e-chinalife.com). We also use emails to send messages to our customers all over China, conveying such information as premium payment notices and premium payment confirmations.

We have developed the China Life E Bao application, which can be used on both computers and cell phones. China Life E Bao offers 63 services, including customizing products, receiving policies, obtaining policy loans, reporting claims, consulting doctors by phone, checking on protections and checking dividends. As of December 31, 2017, the number of registered users of China Life E Bao had exceeded 37.9 million. During 2017, 57% of policy loans, 86% of the receipt of policies, and 50% of customer reviews for all new policies were handled through China Life E Bao.

Supplementary services

To allow our customers to benefit from superior service and enhance their service experience, we provide several types of supplementary services while continuing to provide quality basic insurance services.

We have further promoted the global VIP care services, and improved the services including the international travel and medical emergency services, domestic medical emergency services, 12-hour health consultation hotlines and global VIP benefits. We also provide rescue platforms for approximately 70 million long-term customers. China Life global VIP care services are widely recognized by customers and sales personnel.

We have successfully held Hand-in-Hand customer service activities for 11 consecutive years. In 2017, our customer service activities included nearly 20,000 online and on-site activities with the themes of health, sports, and parent-child activities. We have always been concerned with the growth and development of children and adolescents and have held national painting activities for children and adolescents for seven consecutive years. On June 16, 2017, we held the China Life Customer Festival in order to promote the application of intelligent services and upgrade our customer experience. These activities have helped to maintain a good interaction with customers and to satisfy the demands of customers for multi-layered and personalized services.

Table of Contents

Underwriting and Pricing

Our individual and group insurance underwriting involves the evaluation of applications for life, accident and health insurance products by a professional staff of underwriters and actuaries, who determine the type and the amount of risk that we are willing to accept. We have established qualification requirements and review procedures for our underwriting professionals. We employ detailed underwriting policies, guidelines and procedures designed to assist our underwriters to assess and quantify risks before issuing a policy to qualified applicants.

We generally evaluate the risk characteristics of each prospective insured. Requests for coverage are reviewed on their merits, and a policy is not issued unless the particular risk or risk portfolio has been examined and approved for underwriting.

We have different authorization limits and procedures depending on the amount of the claim. We also have authorization limits for personnel depending on their qualifications.

In order to maintain high standards of underwriting quality and consistency, we engage in periodic internal underwriting audits.

Individual and group product pricing reflects our insurance underwriting standards. Product pricing on insurance products is based on the expected payout of benefits, calculated through the use of mortality table, morbidity, expenses and investment returns. Those assumptions and other assumptions for calculating expected profit margin are based on our own experience, third party consultation, the experience of reinsurance companies and published data from other institutions. For more information on regulation of insurance products, see [Regulatory and Related Matters Insurance Company Regulation](#) .

We primarily offer products denominated in Renminbi.

Claims Management

We manage the claims from policyholders through our claims verification staff at our headquarters and branch offices. Typically, upon receiving a claim, a staff person will verify preliminarily if all materials supporting the claim have been submitted; if so, the claim and its materials will be forwarded to the claim settlement department to confirm liability and to determine whether a claim investigation is needed. Upon confirming the validity of the claim and insurance liability, the amount payable to the insured will be calculated, and the claim will be paid upon completion of approval procedure.

We manage claims management risk through organizational controls and computer systems controls. Our organizational controls include specific limits on authorization for branches at different levels; periodic case inspection and special inspections in particular situations by risk management departments at all levels of our organization; expense mechanisms linking payout ratios of short-term insurance policies and expense ratios of branches. Except for some health insurance claims below a certain amount, verification of claims by two staff members is also required. We also periodically provide training to our claims verification personnel and conduct appraisals of their performance. Our claims management is strictly processed with computers to streamline claims verification and handling.

Reinsurance

We have entered into various reinsurance agreements with China Life Reinsurance Company Ltd., or China Life Re, formerly known as China Reinsurance Company, for the reinsurance of individual risks and group risks. In general, individual and group risks are primarily reinsured either on a surplus basis, whereby we are reinsured for risks above a specified amount, or on a quota share basis. Under our reinsurance policy, the specified amount above which the risks are reinsured varies among different types of insurance products. In general, our reinsurance agreements with China Life Re do not have a definite term, but may be terminated with respect to new business thereunder by either party on a date agreed by both parties with three to six months' notice.

Table of Contents

We have also entered into reinsurance agreements separately with other reinsurance companies including the Beijing branch of Munich Reinsurance Company, the Beijing Branch of SCOR, the Shanghai branch of Reinsurance Group of America, the Beijing branch of Swiss Reinsurance Company Limited, the Shanghai branch of Hannover Re, the Shanghai branch of General Re Corporation and Aetna Life & Casualty (Bermuda) Ltd.

In June 2017, we renewed our catastrophe reinsurance in order to reduce our catastrophe exposure.

These reinsurance agreements spread the risk and reduce the effect on us of potential losses. Under the terms of the reinsurance agreements, the reinsurer agrees to assume liabilities for the ceded business in the event the claim is paid. However, we remain liable to our policyholders if the reinsurer fails to meet the obligations assumed by it.

We also accept external auditing of the reinsurance business by our reinsurers.

Investments

As of December 31, 2017, we had RMB 2,591,652 million (US\$ 398,330 million) of investment assets. As provided by China's insurance laws and regulations, we may invest insurance premiums and other insurance funds in five categories of investment assets, including liquidity assets, fixed income assets, equity assets, real properties and other financial assets, all as defined by the CIRC and subject to various limitations. Each category of investment assets is also divided into domestic assets and overseas assets. See "Regulatory and Related Matters Insurance Company Regulation Regulation of investments". As of December 31, 2017, we have invested our insurance premiums and other insurance funds in term deposits, debt securities, loans, securities investment funds, stocks, resale agreements, investment properties, equity interests of non-listed enterprises and related financial products.

We direct and monitor our investment activities through the application of investment management guidelines and investment plans. Our investment management guidelines and investment plans include: (1) performance goals for the investment fund; (2) specified asset allocations and investment scope based on regulatory provisions, level of indebtedness and market forecasts; (3) specified goals for investment duration and asset-liability matching requirements based on asset-liability matching strategies; (4) specified authorization levels required for approval of significant investment projects; and (5) specified risk management policies and prohibitions. The investment management guidelines and investment plans are reviewed and approved by the board of directors annually.

Investment proposals typically originate from our investment management department, which is in charge of all of our investment assets except for investment in real properties used by us, which is separately managed by our own-use real property investment management department. Investment proposals are reviewed by the investment decision committee of our president office for final approval.

AMC, the asset management company that we established with CLIC, manages a substantial part of our Renminbi investments following the restructuring and, separately, substantially all of the investments retained by CLIC. See

Asset Management Business. IHC, a wholly owned subsidiary of CLIC, also manages our investments in unlisted equity interests, real estate and related financial products and securitization financial products. See Item 7. Major Shareholders and Related Party Transactions Related Party Transactions Continuing Related Party Transactions with IHC. As of December 31, 2017, we had also engaged 28 domestic investment managers to manage RMB 94,685 million (US\$ 14,553 million) for investment in Chinese open markets and 13 investment managers to manage US\$ 1,600 million for investment in overseas open markets.

Table of Contents

The following table summarizes information concerning our investment assets as of December 31, 2015, 2016 and 2017.

	2015		As of December 31, 2016		2017

Risk management

Our primary investment objective is to pursue optimal investment yields while considering macroeconomic factors, risk control and regulatory requirements. We are exposed to five primary sources of investment risk:

interest rate risk, relating to the market price and cash flow variability associated with changes in interest rates;

credit risk, relating to the uncertainty associated with the continued ability of a given obligor to make timely payments of principal and interest;

market valuation risk, relating to the changes in market value for our investments, particularly our securities investment fund holdings and shares listed on the Chinese securities exchanges, which are denominated and traded in Renminbi;

Table of Contents

liquidity risk, relating to the lack of liquidity in many of the debt securities markets we invest in, due to contractual restrictions on transfer or the size of our investments in relation to the overall market; and

currency exchange risk, relating to the impact of changes in the value of the Renminbi against the U.S. dollar and other currencies on the value of our investments.

Our investment assets are principally comprised of fixed income securities and term deposits, and therefore changes in interest rates have a significant impact on the rate of our investment return. We manage interest rate risk through adjustments to our portfolio mix and terms, and by managing, to the extent possible, the average duration and maturity of our assets and liabilities. However, because of the general lack of long-term fixed income securities in the Chinese financial markets, the duration of some of our assets is lower than our liabilities. We believe that with the development of China's financial markets and the gradual easing of our investment restrictions, our ability to match our assets to our liabilities will improve. Although we have been approved to enter into interest rate swaps, it is still not an effective means for us to hedge our interest rate risk as the Chinese interest rate swap market is still in the early stages of development.

We believe we have a relatively low credit risk, because we mainly invest in fixed income products with high credit ratings. We monitor our credit risk through in-house fundamental analysis of the Chinese economy and the underlying obligors and transaction structures.

We are subject to market valuation risk, particularly because of the relative lack of stability of China's bond and stock markets. We manage valuation risk through industry and issuer diversification and asset allocation.

Since substantially all of our investments are made in China, we are exposed to the effect of changes in the Chinese economy and other factors which affect the Chinese banking industry and securities markets.

We are also subject to market liquidity risk for many of the debt securities investments we make, due to the size of our investments in relation to the overall market. We manage liquidity risk through selection of liquid assets and through asset diversification. In addition, we view fundraising through repurchase agreements as a way of managing our short-term liquidity risk.

Our ability to manage our investment risks is limited by the investment restrictions placed on us and the lack of sophisticated investment vehicles for risk management in China's capital markets. The CBIRC (formerly CIRC) allows insurance companies to invest in financial derivative products with the aim to hedge and reduce investment risks. We are considering these alternative ways of investing to further improve our risk management.

Our assets held in foreign currencies are subject to foreign exchange risks resulting from the fluctuations of the value of the Renminbi against the U.S. dollar and other foreign currencies. Our overseas investments are denominated in U.S. dollar, and we have hedged a portion of our investments held in non-US currencies to reduce our foreign exchange risks.

As we are approved by the CIRC to invest our assets held in foreign currencies in overseas financial markets, the return from overseas investments could, to certain extent, reduce the foreign exchange risks we are exposed to.

Table of Contents

For further information on our management of interest rate risk and market valuation risk, see Item 11. Quantitative and Qualitative Disclosures about Market Risk .

Investment results

Our investment yields for the years ended December 31, 2017, 2016 and 2015 were 5.16%, 4.61% and 6.47%, respectively. Beginning in 2017, the formula to calculate our investment yield has been revised to consider the impact of repurchase transactions on our investment yield, and therefore investment yields for the fiscal years ended December 31, 2016 and December 31, 2015 have also been revised to conform to the revised formula.

The following table sets forth the yields on average assets for each major component of our investment portfolios for the periods indicated.

(1) Yields for 2017, 2016 and 2015 are calculated by dividing the total investment income for that year by the average of the ending balances of that year and the previous year.

Term deposits

Term deposits consist principally of term deposits with Chinese commercial banking institutions and represented 17.3% of our total investment assets as of December 31, 2017, 21.9% of our total investment assets as of December 31, 2016 and 24.6% of our total investment assets as of December 31, 2015.

We generally make term deposits with state-owned commercial banks and large joint stock commercial banks. The terms of the term deposits vary. They typically allow us to renegotiate terms with the banks upon prepayment, including the methods for the calculation of accrued interest, if any. We make large term deposits to obtain higher yields than can ordinarily be obtained with regular deposits.

The following table sets forth term deposits by contractual maturity dates, as of the dates indicated.

	As of December 31,		
	2015	2016	2017
	Amortized cost	Amortized cost	Amortized cost

Table of Contents***Debt securities***

Debt securities in which we are permitted to invest mainly consist of the following categories:

Chinese government bonds;

government agency bonds (including local government bonds issued and repaid by the MOF as agent, central bank notes, financial bonds issued by state-owned policy banks of the Chinese government, and RMB-denominated bonds issued by international development institutions);

corporate bonds (including financial bonds issued by commercial banks, corporate bonds, convertible corporate bonds, short-term financing bonds and medium-term notes); and

subordinated bonds and debt (including subordinated bonds issued by state-owned policy banks of the Chinese government, subordinated bonds issued by commercial banks, subordinated debt with fixed terms issued by commercial banks and subordinated debt with fixed terms issued by insurance companies).

Debt securities represented 48.5% of our total investment assets as of December 31, 2017, 46.8% of our total investment assets as of December 31, 2016 and 43.8% of our total investment assets as of December 31, 2015.

Based on estimated fair value, Chinese government bonds, Chinese government agency bonds, corporate bonds, subordinated bonds and debt and other debt securities comprised 5.4%, 34.7%, 43.3%, 3.0% and 13.6% of our total available-for-sale debt securities as of December 31, 2017, 5.4%, 36.6%, 47.1%, 4.2% and 6.7% of our total available-for-sale debt securities as of December 31, 2016 and 6.4%, 36.2%, 51.4%, 4.8% and 1.2% of our total available-for-sale debt securities as of December 31, 2015. Except for a small number of debt securities, which collectively had a carrying value of RMB 45,352 million (US\$ 6,970 million) as of December 31, 2017, most of our debt securities are traded on security exchanges or in the unlisted interbank market in China.

We mainly invest in secured bonds and unsecured bonds rated AA or above by the rating agencies recognized by the CIRC, such as China Chengxin International Credit Rating Co., Ltd, or Chengxin International, and Dagong Global Credit Rating Agency, or Dagong. We also invest in short-term financing bonds rated A-2 or above.

Chengxin International is a member of Moody's Investors Service Inc., with Moody's owning 30% equity interest in Chengxin International. Chengxin International created its own rating structures by making reference to the rating structures and experience of Moody's and Fitch Ratings. AAA is the highest rating. Other approved rating agencies, such as Dagong, have similar rating structures. Ratings given by these entities are not directly comparable to ratings given by U.S. rating agencies.

The following table sets forth the amortized cost and estimated fair value of debt securities, as of the dates indicated.

Our investments in debt securities are subject to strict restrictions under relevant Chinese regulation. See [Regulatory and Related Matters](#) Regulation of investments . We diversify our corporate bonds by industry and issuer. Our corporate bond portfolio does not have significant exposure to a single industry or issuer.

Loans

We offer interest-bearing policy loans to our policyholders, who may borrow from us in amounts up to the total cash values of their policies. In general, the loans are secured by the policyholders' rights under the policies. As of December 31, 2017, the total amount of our policy loans was RMB 107,957 million (US\$ 16,593 million), and represented 4.17% of our total investment assets as of that date.

Table of Contents

In addition to policy loans, our other loans mainly consist of our investment in debt investment plans and trust schemes. As of and for the year ended December 31, 2015, the total amount of our investment in debt investment plans was RMB 65,118 million, and we had total investment proceeds from such plans of approximately RMB 3,572 million. As of and for the year ended December 31, 2016, the total amount of our investment in debt investment plans was RMB 63,028 million, and we had total investment proceeds from such plans of approximately RMB 3,532 million. As of and for the year ended December 31, 2017, the total amount of our investment in debt investment plans was RMB 73,668 million (US\$ 11,323 million), and we had total investment proceeds from such plans of approximately RMB 3,605 million (US\$ 554 million). As of and for the year ended December 31, 2015, the total amount of our investment in trust schemes was RMB 45,460 million, and we had total investment proceeds from such schemes of approximately RMB 2,692 million. As of and for the year ended December 31, 2016, the total amount of our investment in trust schemes was RMB 47,864 million, and we had total investment proceeds from such schemes of approximately RMB 3,066 million. As of and for the year ended December 31, 2017, the total amount of our investment in trust schemes was RMB 163,764 million (US\$ 25,170 million), and we had total investment proceeds from such schemes of approximately RMB 6,343 million (US\$ 975 million).

Securities investment funds

Securities investment funds consist of Chinese domestic investment funds and overseas investment funds that primarily invest in securities. As of December 31, 2017, our investment in securities investment funds was RMB 101,236 million (US\$ 15,560 million) and represented 3.91% of our total investment assets as of that date. Our investment in securities investment funds mainly consists of investment in Chinese domestic investment funds.

We invest in both closed-end securities investment funds, in which the number of shares is fixed and the share value depends on the trading prices, and open-end securities investment funds, in which the number of shares issued by the fund fluctuates and the share value is set by the value of the assets held by the fund. Our investments in securities investment funds are subject to strict restrictions under relevant Chinese regulations. See Regulatory and Related Matters Insurance Company Regulation Regulation of investments . Our holdings in securities investment funds comply with those restrictions.

The following table presents the carrying values of investments in open-end and closed-end securities investment funds as of the dates indicated.

	As of December 31,					
	2015		2016		2017	
	Carrying value	% of total	Carrying value	% of total	Carrying value	% of total
	<i>(RMB in millions, except as otherwise indicated)</i>

Closed-end	1,585	0.9%	2,946	2.5%	2,224	2.2%
Total	169,485	100.0%	119,973	100.0%	101,236	100.0%

Stocks

Investments in stocks consist of investment in publicly offered and listed equity securities that are denominated and traded in Renminbi and investment in stocks listed on specified overseas stock exchanges that are permitted by the CIRC. Our investments in stocks are subject to strict restrictions under relevant Chinese regulations. See Regulatory and Related Matters Insurance Company Regulation Regulation of investments . As of December 31, 2017, the total amount of our investment in common stocks was RMB 173,450 million (US\$ 26,659 million), and represented 6.7% of our total investment assets as of that date. As of December 31, 2016, the total amount of our investment in common stocks was RMB 140,166 million, and represented 5.7% of our total investment assets as of that date. As of December 31, 2015, the total amount of our investment in common stocks was RMB 111,516 million, and represented 4.9% of our total investment assets as of that date.

Table of Contents***Resale agreements***

We enter into resale agreements, which consist of securities resell activities in resell markets.

The securities purchased under agreements to resell were RMB 36,185 million (US\$ 5,562 million) as of December 31, 2017, RMB 43,538 million as of December 31, 2016 and RMB 21,503 million as of December 31, 2015.

Equity interests in non-listed enterprises and related financial products

Insurance companies are allowed to invest, directly or indirectly, in equity interests in non-listed enterprises. These investments are categorized either as direct investments, for investments by an insurance company in its name, or as indirect investments, for investments through equity investment funds and other related financial products sponsored and established by an investment management institution. Our investments in equity interests in non-listed enterprises and related financial products are subject to strict restrictions under relevant Chinese regulations. See Regulatory and Related Matters Insurance Company Regulation Regulation of investments.

We started to make investments in equity interests in non-listed enterprises in 2006. In November 2017, we entrusted IHC to invest in Ningbo Meishan Bonded Port Area Baishan Investment Management Partnership, or Baidu Fund Partnership. The total capital commitment in the Baidu Fund Partnership is RMB 7.011 billion, of which RMB 5.6 billion was subscribed by us and RMB 1.4 billion was subscribed by Ningbo Meishan Bonded Port Area Baidu Zhixin Asset Management Company, each as a limited partner. The Baidu Fund Partnership will primarily make middle-late-stage investments in the private equity deals in the Internet sector, including Internet, mobile Internet, artificial intelligence, Internet finance, consumption upgrade, and Internet+. As of the end of 2017, RMB 1.68 billion of our investment commitment had been paid by us.

The following table presents the carrying values of our major investments in equity interests in non-listed enterprises as of the dates indicated.

	As of December 31,

Asset Management Business

On November 23, 2003, we established an asset management company, AMC, with CLIC, in connection with the restructuring for the purpose of operating the asset management business more professionally in a separate entity and to better attract and retain qualified investment management professionals. AMC manages our investment assets and, separately, substantially all of those of CLIC. For a description of our investment assets, see Investments .

We own 60% and CLIC owns 40% of AMC. Directors of AMC are appointed by the shareholders at a general meeting. As the controlling shareholder, we effectively control the composition of AMC's board of directors. In 2014, the registered capital of AMC was increased from RMB 3 billion to RMB 4 billion. The proportionate shareholding between CLIC and us remains unchanged.

As of and for the year ended December 31, 2017, AMC had total assets of RMB 9,237 million (US\$ 1,420 million), net assets of RMB 8,339 million (US\$ 1,282 million) and net profit of RMB 1,126 million (US\$ 173 million).

Property and Casualty Business

In December 2006, we and CLIC established a property and casualty company, CLPCIC, with us owning 40% and CLIC owning the remaining 60%. In 2014, the registered capital of CLPCIC was increased from RMB 8 billion to RMB 15 billion, with us and CLIC contributing RMB 2.8 billion and 4.2 billion, respectively. The proportionate shareholding between CLIC and us remains unchanged.

As of and for the year ended December 31, 2017, CLPCIC had total assets of RMB 79,601 million (US\$ 12,234 million), net assets of RMB 20,463 million (US\$ 3,145 million) and net profit of RMB 820 million (US\$ 126 million).

Pension Insurance Business

In January 2007, we, CLIC and AMC established a pension insurance company, China Life Pension, with us owning 55%, CLIC owning 25% and AMC owning the remaining 20%. In January 2015, the registered capital of China Life Pension was increased from RMB 2.5 billion to RMB 3.4 billion. China Life Pension is currently held 70.74%, 4.41%, 3.53%, 1.33%, and 19.99% by us, CLIC, AMC, China Credit Trust Company Limited and AMP Life Limited, respectively.

China Life Pension has obtained qualifications to serve as investment manager, trustee and account manager of enterprise annuity funds.

As of and for the year ended December 31, 2017, China Life Pension had total assets of RMB 3,922 million (US\$ 603 million), net assets of RMB 3,086 million (US\$ 474 million) and net profit of RMB 14 million (US\$ 2 million).

Information Technology

Our computer systems provide support for many aspects of our businesses, including product development, sales and marketing, business management, cost control and risk control. We have approximately 2,000 experienced engineers, technicians and specialists providing professional and flexible support for our business operations in various aspects, including the design, research and development and operation of our computer systems.

Table of Contents

In 2017, we continued to develop a new generation comprehensive business management system and took the following steps:

we adopted an advanced three-tier cloud architecture, and believe we are among the first in the domestic financial industry to implement a hierarchical cloud computing practice to support the needs of business transformation and development;

we built a mobile-connected, secure and reliable network which provides convenient and fast services to customers, sales support personnel, employees and business partners;

we introduced technologies such as mobile connect, big data and artificial intelligence to make traditional businesses available online, support paperless purchase of insurances throughout the entire process and facilitate seamless integration among different sales and service channels; and

we built intelligent platforms such as smart voice, face recognition and deep learning, which support our intelligent services and operations and enhance customer experience.

We also continue to attach importance to financial data security and have implemented projects including separation of internal and external network, cloud desktops, providing different levels of protection fitting to the various application systems, intelligent security monitoring and supervision platforms and anti-intrusion system. We have built a security protection system to cover assessment, protection, detection, response, recovery and other aspects of data protection. We have a visualization system to provide real-time monitoring on cyber attacks. We also have internal rules on the procedures for reporting and handling material accidents, including cybersecurity incidents, occurring during business operations.

Trademarks

We conduct our business under the China Life brand name (in English and Chinese), the ball logos, the C mark and other business related slogans and logos. CLIC owns these trademarks and has registered them with the Trademark Office of the SAIC. CLIC has entered into a trademark license agreement with us, under which CLIC has agreed to grant us a royalty-free license to use the China Life brand name, the ball logos and the C mark. See Item 7. Major Shareholders and Related Party Transactions Related Party Transactions Continuing Related Party Transactions with CLIC .

Disclosure of Certain Activities Under Section 13(r) of the Securities Exchange Act of 1934

Under Section 13(r) of the Exchange Act, which was added by the Iran Threat Reduction and Syrian Human Rights Act of 2012, we are required to disclose in our annual report filed with the SEC if we or any of our affiliates knowingly engaged in certain Iran-related activities, including transactions or dealings with the Government of Iran or relating to Iran during the period covered by the annual report, no matter whether these activities are material or not. Disclosure is required even when the activities were conducted outside of the U.S. by non-U.S. entities and even when such activities were conducted in compliance with applicable law.

In June 2017, CLPCIC, a casualty and property insurance company in which we own 40% interest, provided marine hull insurance for a fleet of vessels managed by the National Iranian Tanker Company (NITC) as a co-insurer for the period from July 1, 2017 to June 30, 2018, and the lead insurer is Assuranceforeningen Skuld. These transactions were entered into in compliance with laws and regulations applicable to CLPCIC. We understand that NITC is affiliated with the Government of Iran and it is on the List of Persons Identified as Blocked Solely Pursuant to Executive Order 13599. The total premiums that CLPCIC received from these transactions are approximately RMB 530,000 (US\$ 81,460). We are unable to determine the net profits from these transactions prior to the expiration of the insurance coverage.

Table of Contents

CLPCIC does not intend to continue providing insurance coverage to NITC upon the expiration of the insurance coverage.

Regulatory and Related Matters

Overview

The insurance industry is heavily regulated in the PRC. The applicable laws and regulations governing insurance activities undertaken within the territories of the PRC consist principally of the PRC Insurance Law and rules and regulations promulgated under that law. The CBIRC (formerly CIRC) is the authority authorized by the PRC State Council to regulate and supervise the insurance industry in the PRC.

The PRC Insurance Law, which provided the initial framework for regulating the PRC insurance industry, was enacted in 1995, and significantly amended on October 28, 2002, February 28, 2009, August 31, 2014 and April 24, 2015. Among other things, the major provisions of the PRC Insurance Law include: (1) licensing of insurance companies and insurance intermediaries, such as agents and brokers; (2) separation of property and casualty business and life insurance business; (3) regulation of market conduct by participants; (4) substantive regulation of insurance products; (5) regulation of the financial condition and performance of insurance companies; and (6) supervisory and enforcement powers of the CIRC.

The CIRC was established in 1998. It has extensive supervisory authority over the PRC insurance industry, including: (1) promulgation of regulations applicable to the insurance industry; (2) approval for establishment of insurance companies and their subsidiaries; (3) review of qualifications of senior management of insurance companies; (4) supervision of insurance companies and their solvency and market activities; (5) establishment of investment regulations; (6) approving the policy terms and premium rates for certain insurance products; (7) setting standards for measuring the financial soundness of insurance companies; (8) requiring insurance companies to submit reports concerning their business operations and condition of assets; and (9) ordering the suspension of all or part of an insurance company's business. Since its establishment, the CIRC has promulgated a series of regulations indicating a gradual shift in the regulatory approach to a more transparent regulatory process and a convergent movement toward international standards.

In March 2018, the National People's Congress of the PRC approved the merger of China's long-existing regulatory commissions of banking and insurance into a new administration called the China Banking and Insurance Regulatory Commission, or CBIRC. On April 8, 2018, the official sign of CBIRC was unveiled at what was previously the site of CBRC, which we understand marked the merger of CIRC and CBRC. The official website of CBIRC was formally launched on the same day. Guo Shuqing, formerly the head of CBRC, has been appointed as the chairman of CBIRC. The CIRC and the CBRC no longer exist after the completion of the merger. Some of their authorities, including drafting certain regulations to govern the insurance and banking industries, have been ceded to PBOC, China's central bank. As of the date of this annual report, the regulations, rules and guidance previously issued by the CIRC still remain effective. This merger is intended to improve the efficiency and coordination of Chinese financial regulation.

Table of Contents

Insurance Company Regulation

Licensing requirements

An insurance company is required to obtain a license from the CBIRC (formerly CIRC) in order to engage in an insurance business. In general, a license will be granted only if the company can meet prescribed registered capital requirements and other specified requirements, including requirements relating to its form of organization, the qualifications of its senior management and actuarial staff, the adequacy of its information systems and specifications relating to the insurance products to be offered.

The CBIRC (formerly CIRC) may grant a life insurer a license to offer all or part of the following products: accident insurance, term life insurance, whole life insurance, annuities, short-term and long-term health insurance, endowment insurance (for individuals only) and other personal insurance approved by the CBIRC (formerly CIRC), as well as reinsurance relating to any of the foregoing.

An insurance company may seek approval for establishing branch offices to meet its business needs so long as it meets minimum capital and other requirements. Our headquarters and all of our branch offices have obtained the requisite insurance licenses.

Minimum capital requirements

The minimum paid-in capital for an insurance company is RMB 200 million. For an insurance company whose registered capital is RMB 200 million, the minimum incremental capital for each first branch office in a province other than the province where its headquarter is located is RMB 20 million. No additional capital will be required when the paid-in capital has reached RMB 500 million, and the insurer's solvency is sound.

Table of Contents***Restriction of ownership in joint stock insurance companies***

Any acquisition of shares which results in the acquirer owning 5% or more of the registered capital of a joint stock insurance company, whether or not listed, requires the approval of the CBIRC (formerly CIRC). A filing with the CBIRC (formerly CIRC) is required with respect to a change of equity interest of less than 5% in an insurance company, unless it is a listed insurance company. Equity interests held by a single shareholder, including its related parties and persons acting in concert, must not exceed one-third of the registered capital of a single insurance company. An exception to the one-third cap applies to insurance companies establishing or investing in other insurance companies for the purposes of innovation and specialization of their business, or consolidating their operations under a single group management. Equity interests held by a single domestic limited partnership must not exceed 5% of the registered capital of a single insurance company. The combined equity interests held by several domestic limited partnerships must not exceed 15% of the registered capital of a single insurance company, and the combined equity interests held by foreign investors may not exceed 50% of the total equity of a single life insurance company.

On November 10, 2017, China announced that it will substantially relax foreign ownership limits in life insurance companies. On April 11, 2018, the Governor of the PBOC further clarified that regulations would be introduced within the next several months increasing the limit on foreign ownership in Chinese life insurance companies to 51% from the current 50%, and all foreign ownership restrictions in the Chinese life insurance sector will be removed in three years. Detailed implementation rules have not yet been issued.

Fundamental changes

Prior approval must be obtained from the CBIRC (formerly CIRC) before specified fundamental changes relating to a Chinese insurance company may occur. These include: a change of company name, registered capital or address of executive offices of companies or their subsidiaries; an expansion of business scope; an amendment to articles of association; a merger or spin-off; a change in a shareholder whose capital contribution accounts for 5% or more of the total capital of the company or a change in shareholding of 5% or more of the shares of the company; and a termination of a branch office. In addition, certain other changes relating to the insurance company must be reviewed by or filed with the CBIRC (formerly CIRC).

Regulation of products

Regulation of ordinary personal insurance products. An ordinary personal insurance product is one whose insurance premiums and policy benefits are definite upon issuance of the insurance policy. Beginning from August 5, 2013, the CIRC removed the original 2.50% cap on the guaranteed interest rates of ordinary personal insurance products, and such guaranteed interest rates can be decided by insurance companies at their discretion in accordance with the principle of prudence. Meanwhile, the statutory valuation rates of ordinary personal insurance policies issued on and after August 5, 2013 have been increased from 2.50% to 3.50%. In addition, beginning from August 5, 2013, if the guaranteed interest rate of an ordinary personal insurance product developed by an insurance company is not higher than the maximum valuation rate set by the CIRC which varies depending on product, the insurance company must file the relevant information of the product with the CBIRC (formerly CIRC). If such rate is higher than the maximum valuation rate set by the CIRC, the insurance company is required to obtain the approval of the CBRIC (formerly CIRC) on the product in advance, and during the approval process, the insurance company is not allowed to submit new insurance clauses and premium rates to the CBIRC (formerly CIRC) for approval. On September 2, 2016, the CIRC further required that policy loans provided by an insurer may not exceed 80% of the cash value or account value of the policy. From October 1, 2017, the first payment of survival insurance benefits for the ordinary endowment products and annuity products must occur only after five years since the policy becomes effective and the annual

payment or partial payment must not exceed 20% of the paid premiums.

Table of Contents

Regulation of participating products. A participating product is one which the policyholder or annuitant is entitled to share in the distributable earnings of the insurer through policy dividends. The participation dividend may be in the form of a cash payment or an increase in the insured amount. At least 70% of the distributable earnings is required to be distributed as dividends. In September 2015, the CIRC removed the original 2.50% cap on the guaranteed interest rate of participating products. From October 1, 2015, the guaranteed interest rate is to be decided by insurance companies at their discretion in accordance with the principle of prudence. If the guaranteed interest rate of a participating product developed by an insurance company is not higher than 3.50%, the insurance company must file the specific information of such product with the CBIRC (formerly CIRC) for record. If such rate is higher than 3.50%, the insurance company is required to obtain the approval of the CBIRC (formerly CIRC) for the product. In addition, the valuation rate of unearned premium reserves of participating products equals to either the guaranteed interest rate or 3.00%, whichever is lower. Beginning from September 2, 2016, if the guaranteed interest rate of a life insurance product newly developed by an insurance company is lower than the maximum valuation rate set by the CIRC, which is 3.00% for participating products, the insurance company is only required to file specified information relating to the product with the CBIRC (formerly CIRC), and if such rates are higher than 3.00%, the insurance company is required to obtain the approval of the CBIRC (formerly CIRC) for such products. From October 1, 2017, the first payment of survival insurance benefits for the participating endowment products and annuity products must occur only after five years since the policy becomes effective and the annual payment or partial payment must not exceed 20% of the paid premiums.

Regulation of universal products. A universal product is one which offers the typical protection of life insurance with investment accounts providing a minimum yield. The premium payments and coverage of universal products are flexible, usually with a minimum guaranteed interest rate, and the investment yields are settled periodically. Beginning from February 16, 2015, the CIRC removed the original 2.50% cap on the minimum guaranteed interest rate of universal products, with the guaranteed interest rate to be decided by insurance companies at their discretion in accordance with the principle of prudence. Meanwhile, the maximum valuation rate of a universal product has been increased from a compound annual rate of 2.50% to a compound annual rate of 3.50%. Beginning from September 2, 2016, the CIRC changed the maximum valuation rate of a universal product from a compound annual rate of 3.50% to a compound annual rate of 3.00%. If the minimum guaranteed interest rate of a universal product developed by an insurance company is not higher than the maximum valuation rate set by the CIRC (i.e. a compound annual rate of 3.00%), the insurance company must file specified information relating to the product with the CBIRC (formerly CIRC). If such rate is higher than the maximum valuation rate set by the CIRC, the insurance company is required to obtain the approval of the CBIRC (formerly CIRC) for the product. Any amendment to the insurance clauses, premium rates, insurance liabilities, types of insurance or pricing methods of universal products must be filed with or approved by the CIRC. From October 1, 2017, universal products must be designed to allow the flexibility to pay additional premiums from time to time and to adjust the insured amount. Insurance companies may not design the universal products in the form of riders.

Regulation of investment-linked products. An investment-linked product is one which insures the policyholder or annuitant against one or more separate risks and at the same time gives the policyholder or annuitant an interest in one or more separate investment accounts. Insurance companies must complete the establishment of investment accounts before submitting the required information regarding their investment-linked products to the CBIRC (formerly CIRC) for approval or filing. Insurance companies must report on the establishment, change, consolidation, division, close or settlement of the investment accounts to the CBIRC (formerly CIRC) within 10 business days after occurrence of these events. Transactions between a separate investment account and any other account of the insurance company, other than a transfer of cash to establish the investment account, are prohibited. From October 1, 2017, investment-linked products must be designed to allow the flexibility to pay additional premiums from time to time and to adjust the insured amount. Insurance companies may not design investment-linked products in the form of riders. Other CIRC regulations govern the sale and disclosure terms of investment-linked products.

Table of Contents

Regulation of short-to-medium term products. Beginning from March 21, 2016, CIRC's new regulations on personal insurance products with short-to-medium terms became effective. Under the new CIRC regulations, personal insurance products with short-to-medium terms are defined as follows:

where the sum of the cash value of the insurance policy (account value) at the end of any policy year within the past four policy years and the cumulative survival insurance benefits exceeds the total amount of premiums paid; and

it is expected that 60% or more of the policies of such product have a duration of less than five years. Under the CIRC regulations, an insurer's annual premium income from personal insurance products with short-to-medium terms may not exceed two times the amount of capital invested by or the net assets of such insurer at the end of the latest quarter, whichever is larger. Insurers are also required to immediately cease developing and selling personal insurance products with a term of less than one year. An insurer's annual premium income from personal insurance products with a term more than one year but less than three years may not exceed 90% of the overall regulatory limitation in 2016, 70% of the overall regulatory limitation in 2017 and 50% of the overall regulatory limitation in 2018 and thereafter. Furthermore, the CIRC issued a new notice in September 2016, requiring that beginning from January 1, 2019, an insurer's annual premium income from personal insurance products with short-to-medium terms may not exceed 50% of its total premiums for 2019, 40% of its total premiums for 2020 and 30% of its total premiums for 2021 and thereafter.

Investment-linked products and variable annuity insurance must also be evaluated and reported according to the above requirements applicable to products with short-to-medium terms. Whole life insurance products, annuity products and healthcare insurance products may not be designed as products with short-to-medium terms. Supplementary insurance products, such as supplementary universal products and supplementary investment-linked products, must also be evaluated separately to determine whether they are products with short-to-medium terms.

Regulation of variable annuity insurance. Variable annuity insurance is a type of insurance where the policy benefits are associated with the price of the investment unit in the linked investment account, and a minimum amount of policy benefits is guaranteed as stipulated in the insurance agreement. Under variable annuity insurance, the insurance company is obliged to pay an annuity or offer an option for the conversion of the insurance proceeds to be annuitized upon maturity. Variable annuity products may not be sold or amended without the prior approval of the CBIRC (formerly CIRC). Variable annuity products must be sold and disclosed in accordance with the requirements of the CIRC.

Regulation of pension insurance. A life insurance company or a pension insurance company, as approved by the CIRC, may engage in individual and group pension insurance business. The pension insurance terms and premium rates determined by an insurance company must be filed with or approved by the CBIRC (formerly CIRC) in accordance with its regulatory provisions. Other CIRC regulations govern the sale and disclosure terms of pension insurance, as well as the investments by pension insurance funds.

Table of Contents

Regulation of enterprise annuity funds. Subject to the approval of the PRC Ministry of Human Resources and Social Security, insurance companies may serve as the trustee, account manager and investment manager for enterprise annuity funds. China Life Pension has obtained qualifications to serve as investment manager, trustee and account manager of enterprise annuity fund.

Regulation of health insurance. Subject to approval by the CBIRC (formerly CIRC), life insurance companies may engage in health insurance business. Other insurance companies may, subject to approval by the CBIRC (formerly CIRC), engage in short-term health insurance business. Insurance companies engaged in health insurance business are required to submit an actuarial report or reserves assessment report for the preceding year in accordance with the relevant provisions of the CIRC. Insurance companies must also submit a pricing review report to the CBIRC (formerly CIRC) before March 15 of each year regarding the short-term health insurance products. Beginning on January 1, 2016, insurance companies may sell health insurance products eligible for preferential individual income tax policies in accordance with the CIRC's relevant requirements in 31 pilot cities, including Beijing, Shanghai, Tianjin and Chongqing. The health insurance products may be offered to taxpayers who have reached the age of 16 but have not reached the statutory retirement age. The expenses incurred by individuals in the pilot cities for purchasing such health insurance products will be deductible from their individual income tax up to RMB 2,400 per year. From October 1, 2017, the survival benefits paid before the expiry of the policy term of a care insurance product may only be paid under the condition that the care required by the insured is caused by disability in activities of daily living as agreed in the insurance contract. Survival benefits paid before the expiry of the policy term of a disability income insurance product may only be paid under the condition that the loss of working ability of the insured is caused by a disease or an accidental injury as agreed in the insurance contract. All of the medical insurance premiums collected by insurance companies from their group medical insurance products must be used for the payment of insurance benefits under the medical insurance coverage, and the interest rates of products used for pricing must satisfy relevant regulatory requirements.

Regulation of short-term accidental injury insurance. Short-term accidental injury insurance is a type of insurance that uses death or disability caused by accidents or physical injuries stipulated in the insurance agreement as a condition for paying insurance proceeds. Short-term accidental injury insurance products must be developed and managed by the headquarters of the insurance company and filed with the CBIRC (formerly CIRC). Insurance companies must also submit a pricing review report to the CBIRC (formerly CIRC) before March 15 of each year regarding the short-term accident insurance products they offer.

Regulation of foreign exchange denominated insurance. Insurance companies may seek approval from the CBIRC (formerly CIRC) and the SAFE to engage in foreign exchange denominated insurance and reinsurance businesses, allowing them to offer products to non-Chinese policyholders or for non-Chinese beneficiaries, as well as policies covering accidents and illnesses which occur outside China, together with related reinsurance.

Regulation of supplementary major medical insurance. As part of the Chinese government's overall medical insurance scheme, supplementary major medical insurance reimburses policyholders for a specified percentage of their medical expenses which are in excess of the maximum amounts covered by the basic social medical insurance as long as such medical expenses are caused by the diseases covered by the basic social medical insurance. The Chinese government has launched pilot supplementary major medical insurance programs in China. Local governments in these pilot areas use a portion of the basic medical insurance funds to purchase supplementary major medical insurance service from qualified insurance companies through a government tender. Insurance companies are required to apply to the CBIRC (formerly CIRC) for the qualification to engage in such business. Supplementary major medical insurance products must be filed with the CBIRC (formerly CIRC).

Table of Contents***Regulation of investments***

Permitted investments. As a Chinese life insurance company, we are subject to restrictions under the PRC Insurance Law, the Measures for the Administration of the Utilization of Insurance Funds and other related rules and regulations on the asset categories and percentages in which we are permitted to invest. On January 23, 2014, the CIRC issued a notice classifying the assets that insurance companies may invest in five broad categories: current assets, fixed-income assets, equity assets, property assets and other financial assets. The notice further specifies the amounts in percentages that may be invested in each asset category, the percentages that correspond to concentration risks for investing in a single item and counter-party, and risk monitoring requirements and early warning mechanisms with respect to liquidity, financing scale and asset classes.

Asset categories, investment and concentration risk regulatory percentages. Currently, Chinese life insurance companies are allowed to invest their funds in the following asset categories, subject to the satisfaction of conditions prescribed for each form of investment.

Asset Category	Definition	Specific Items Included	Regulatory Percentage⁽¹⁾	
			Investment Regulatory Percentage	Concentration Risk Regulatory Percentage
Current assets	Current assets refer to cash reserves, deposits payable on demand, and highly-liquid assets with shorter terms and less risk of changes in value that can be readily converted into a definite amount of cash.	Domestic items mainly include cash, current deposits, bank call deposits, insurance asset management products on the monetary market, and government bonds, quasi-government bonds and reverse repurchase agreements with residual maturities of one year or less. Overseas items mainly include bank current deposits, monetary market funds, overnight lending, commercial bills, bank bills, negotiable certificates of deposit, reverse repurchase agreements, short-term government bonds, government-backed bonds, bonds of international financial organizations, corporate bonds and convertible bonds with residual maturities of one	None.	The total outstanding investments by an insurance company in a single legal person ⁽²⁾ must not exceed 20% of the total assets ⁽³⁾ of the insurance company as at the end of the last quarter (excluding, among others, investments in domestic central government bonds, quasi-government bonds, and equity investments in insurance enterprises with proprietary funds).

year or less, as well as other
tools or products recognized
by the CIRC in this category.

Other financial assets	Other financial assets refer to other kinds of assets that are distinctively different from all the foregoing categories of assets, including in terms of risk-return characteristics, liquidity and other characteristics, and cannot be classified into any of the foregoing categories.	Domestic items mainly include financial products by commercial banks, asset-backed securities offered by banking financial institutions, trust schemes of collective funds offered by trust companies, special asset management schemes offered by securities companies, project asset-backed schemes offered by insurance asset management companies and other insurance asset management products. Overseas items mainly include structured deposits without bank guaranteed commitments, as well as other tools or products recognized by the CIRC in this category.	The total book balance of investments by an insurance company in other financial assets must not exceed 25% of the total assets of the insurance company as at the end of the last quarter.	The book balance of investments by an insurance company in a single other financial asset must not exceed 5% of the total assets of the insurance company as at the end of the last quarter, excluding purchase of insurance asset management products within its group. The total outstanding investments by an insurance company in a single legal person must not exceed 20% of the total assets of the insurance company as at the end of the last quarter (excluding, among others, investments in domestic central government bonds, quasi-government bonds, and equity investments in insurance enterprises with proprietary funds).
Overseas investment	An insurance company is allowed to participate in overseas investments in 25 developed markets and 20 emerging markets in accordance with the relevant requirements of the CIRC.	As referred to in the investable overseas items listed in each of the above asset categories.	The total outstanding overseas investments by an insurance company must not exceed 15% of the total assets of the insurance company as at the end of	The total outstanding investments by an insurance company in a single legal person must not exceed 20% of the total assets of the insurance company as at the end of the last quarter (excluding, among others, equity investments in insurance enterprises with proprietary funds).

the last
quarter.

- (1) When calculating the regulatory percentages for each asset category, an insurance company is required to combine its domestic and overseas investments in assets of the category on a consolidated basis.
- (2) A single legal person refers to a single fund-raising party with legal person status that establishes a direct creditor-debtor or shareholder relationship with an insurance company due to the latter's investment therein.
- (3) Total assets exclude the balance of the funds raised from bond repurchases and the amount of assets under independent accounts (including investment-linked life insurance products, variable annuity products, health care entrusted management products, pension insurance entrusted management products and investment-oriented non-life insurance products without pre-agreed returns).
- (4) Single asset investments refer to the investments in a single specific item under any category of investment assets. Where an investment product is issued in several phases, the book balance of the investment in a single asset is the sum of the investments in each phase.
- (5) An insurance institution that has already taken advantage of relevant policies to increase its holdings of blue-chip stocks must adjust the percentage of investments within two years from January 24, 2017 or within the time limit otherwise provided by relevant regulatory authorities until the percentage requirements under applicable regulatory requirements are met, i.e. the total book balance of investments by an insurance company in equity assets must not exceed 30% of the total assets of the insurance company as at the end of the last quarter, and the book balance of investments by an insurance company in a single equity asset must not exceed 5% of the total assets of the insurance company as at the end of the last quarter.

Table of Contents

- (6) The CIRC classifies investments in stocks into three categories: (i) ordinary stock investment, which refers to investment in less than 20% of the total share capital of a listed company without control over the company, (ii) material stock investment, which refers to investment in 20% or more of the total share capital of a listed company without control over the company, and (iii) acquisition of a listed company, which refers to becoming the controlling shareholder or actual controller of a listed company or otherwise having control over a listed company. There is no regulatory restriction for ordinary stock investment that does not involve an acquisition in the secondary market of more than 5% of the share capital of a listed company. For ordinary stock investment that involves an acquisition in the secondary market of more than 5% of the share capital of a listed company, information disclosure and reporting after the investment are required. For a material stock investment, filing with the regulatory authorities after the investment is required. For acquisition of a listed company, prior regulatory approval is required.

Investment risk monitoring percentages. To alleviate the risks associated with liquidity and high volatility of assets, an insurance company that experiences any of the following circumstances is required to report to the CBIRC (formerly CIRC) in a timely manner, and the CBIRC (formerly CIRC) will closely monitor the operation of the insurance company and disclose the related information to the public when necessary:

Liquidity monitoring. The total book balance of investments by an insurance company in current assets and government bonds and quasi-government bonds with residual maturities of one year or longer is lower than 5% of the total assets of the insurance company as at the end of the last quarter.

Financing leverage monitoring. The total outstanding borrowings (including inter-industry lending and bond repurchases) of an insurance company exceed 20% of the total assets of the insurance company as at the end of the last quarter.

Monitoring of different categories of assets. The total book balance of investments by an insurance company in domestic bonds with a long-term credit rating of AA or lower as rated by domestic credit rating agencies exceeds 10% of the total assets of the insurance company as at the end of the last quarter, or the total book balance of investments in equity assets exceeds 20% of the total assets of the insurance company as at the end of the last quarter, or the total book balance of investments in property assets exceeds 20% of the total assets of the insurance company as at the end of the last quarter, or the total book balance of investments in other financial assets exceeds 15% of the total assets of the insurance company as at the end of the last quarter, or the total book balance of outstanding overseas investments exceeds 10% of the total assets of the insurance company as at the end of the last quarter.

The book balance of a single inter-group insurance asset management product purchased by an insurance company exceeds 5% of the total assets of such insurance company as at the end of the last quarter.

Risk Classification of Insurance Assets. An insurance company must evaluate, at least once every half year, the quality of its insurance assets falling within the categories of fixed-income assets, equity assets and property assets, and divide such assets into five categories based on risk, namely pass, special mention, substandard, doubtful and loss with the last three categories collectively referred to as non-performing assets. Insurance assets that require risk classification include assets invested by the insurance company other than those subject to fair value measurement and changes to these assets are counted as gains or losses for the period in question or owners' equity. An insurance company must establish and improve risk classification systems and working processes for its assets and file reports

on such systems and processes with the CBIRC (formerly CIRC). In addition, an insurance company is required to semiannually report to the CBIRC (formerly CIRC) the relevant information on the classification of its assets. An insurance company must also establish feasible plans for annual asset loss provisions and write-offs, as well as plans for the disposal of non-performing assets based on its actual operations and the quality of its assets. These plans must be approved by its board of directors and be filed with the CBIRC (formerly CIRC).

Table of Contents

Insurance private equity funds. Insurance companies are allowed to establish private equity funds that comply with the requirements of the CIRC, including growth funds, buyout funds, funds for strategic emerging industries, mezzanine funds, real estate funds, venture capital funds, and funds of funds (FoF) primarily investing in the aforementioned funds. Insurance companies must register the establishment of private equity funds with the CBIRC (formerly CIRC), and periodically submit quarterly reports, annual reports and other related information to the CBIRC (formerly CIRC) during the term of private equity funds.

Financial derivative products. Apart from the regulations on the five asset categories described above, the CIRC has separately issued a series of rules governing the operation of domestic and overseas trading of derivative products by an insurance company. Financial derivative products are financial contracts whose value is determined by one or more types of underlying assets, indices or certain events. Typical financial derivative products include forwards, futures, options and swaps.

Insurance companies may participate in derivatives transactions only for the purpose of hedging or averting risks, and not for the purpose of speculation. Legitimate purposes include hedging or averting risks of current assets and liabilities, or the company as a whole, and hedging the risk of assets scheduled to be bought within the next month, or locking in future transaction prices.

Assets scheduled to be bought , as used above, refers to assets that an insurance institution has decided to buy after going through its investment decision-making process. If the assets are not bought within one month of the decision date, or the plan was aborted within the aforementioned period, the insurance institution must terminate, liquidate or unwind the relevant derivative upon the expiration of the prescribed period or within five trading days of such decision.

For an insurer carrying out interest rate swaps, the notional principal may not exceed 10% of its fixed-income assets (including bank deposits, bonds and other debt instruments) as of the end of the previous quarter. The notional principal swapped with the same counterparty may not exceed 3% of such counterparty s fixed-income assets as of the end of the previous quarter.

Solvency requirements***Solvency I requirements***

From March 2003 to December 31, 2015, we were required to calculate and report our solvency ratio, a standard developed by the CIRC to measure the financial soundness of life insurance companies to provide better policyholder protection under a system of corrective regulatory action. The standard for calculation of solvency ratio was further revised by the CIRC in September 2008. The solvency ratio of an insurance company under this standard was a measure of capital adequacy calculated by dividing the actual capital of the company (which is the admitted assets less admitted liabilities, determined in accordance with relevant CIRC rules) by the minimum capital it is required to meet.

Under this standard, the minimum capital of a life insurance company was the sum of its minimum capital for its short-term business (policies having a term of one year or less from the date of issuance) and the minimum capital for its long-term business (policies having a term of more than one year from the date of issuance). The standard for calculation of the minimum capital was further revised by the CIRC in January 2010. In January 2013, the CIRC issued the standard for calculation of the minimum capital for supplementary major medical insurance. In August 2013, the standard for calculation of the minimum capital with respect to the total sums at risk under long term life insurance policies was revised by the CIRC. In April 2014, the CIRC issued the standard for calculation of the minimum capital for high cash value products.

Table of Contents

The minimum capital for a life insurance company's short-term business was the sum of the minimum capital for supplementary major medical insurance and the higher of:

18% of the portion of net premiums received in the most recent fiscal year net of business tax and other surcharges which is not in excess of RMB 100 million, plus 16% of the portion which is in excess of RMB 100 million; and

26% of the portion of the average annual claims payments during the most recent three fiscal years which is not in excess of RMB 70 million, plus 23% of the portion which is in excess of RMB 70 million.

The minimum capital for its long-term business was the sum of:

4% of the period-end reserves for insurance risks after unbundling of mixed insurance contracts;

4% (if the annual premium revenue from high cash value products is not more than the base amount) or 6% (if the annual premium revenue from high cash value products is more than the base amount) of the period-end reserves for insurance contracts of high cash value products;

4% of the period-end reserves for other insurance contracts;

1% of the liabilities for other risks after unbundling of investment-linked insurance contracts and variable annuity insurance contracts;

4% (if the annual premium revenue from high cash value products is not more than the base amount) or 6% (if the annual premium revenue from high cash value products is more than the base amount) of the liabilities for other risks after unbundling of hybrid insurance contracts for high cash value products;

4% of the liabilities for other risks after unbundling of other mixed insurance contracts;

4% of the liabilities for insurance policies which do not pass the tests for significant insurance risks;

0.15% of the total sums at risk under life insurance contracts;

0.24% of the total sums at risk under health insurance contracts;

0.06% of the total sums at risk under accident insurance contracts; and

0.3% of the total sums at risk under other insurance contracts.

An insurance company with a solvency ratio below 100% could be subject to a range of regulatory actions by the CBIRC (formerly CIRC). The CBIRC (formerly CIRC) may in such situations require the insurance company to, among other things, raise additional share capital, limit paying dividends on its shares, limit the remuneration and expense accounts of its directors and senior management, restrict its advertising activities, restrict the establishment of branch offices and business operations, cease any new business development, transfer its insurance business to others or seek reinsurance of its insurance obligations, sell its assets or restrict the acquisition of fixed assets, limit the channels for using its capital, change its management team or put the insurer into receivership.

Table of Contents

C-ROSS requirements

On January 1, 2016, the CIRC implemented a new set of solvency regulations, the China Risk Oriented Solvency System, or C-ROSS, which replaced Solvency I.

C-ROSS adopts the internationally accepted three-pillar regulatory system while its regulatory concept, models, methods and parameters are based on Chinese insurance market conditions. The three pillars are:

Pillar I: quantitative capital requirements which aim to prevent quantifiable risks, and include quantifying capital requirements, criteria for assessment and recognition of actual assets and liabilities, capital classification, stress tests and regulatory measures to be imposed on the insurers which fail to meet the quantitative capital requirements.

Pillar II: qualitative regulatory requirements which aim to prevent unquantifiable risks, and which include an integrated risk rating, requirements on assessment and management of risks by the insurers, and regulatory inspection and analysis and regulatory measures to be imposed on the insurers which fail to meet the qualitative regulatory requirements.

Pillar III: market discipline mechanisms which aim to involve, through sufficient information disclosure systems and other means, market players including the public, customers, rating agencies and industry analysts by introducing mechanisms through which they will play an important role in the solvency supervision process.

Under C-ROSS, the three indicators to measure the solvency ratio of an insurer include the following:

the core solvency adequacy ratio, which is calculated by dividing the core capital of an insurer by the minimum capital it is required to meet;

the comprehensive solvency adequacy ratio, which is calculated by dividing the sum of core capital and supplementary capital of an insurer by the minimum capital it is required to meet; and

an integrated risk rating, which is a comprehensive rating system that the CIRC uses to evaluate an insurer's overall solvency based on both quantitative assessments on quantifiable risks in Pillar I and qualitative risk assessments on unquantifiable risks in Pillar II.

The core solvency adequacy ratio and comprehensive solvency adequacy ratio of an insurer reflect the capital adequacy for quantifiable risks of such insurer, and the integrated risk rating reflects the overall solvency risks of such insurer.

Table of Contents

The actual capital of an insurer is admitted assets less admitted liabilities, determined in accordance with relevant rules under C-ROSS. The actual capital is classified into core capital and supplementary capital, depending on the loss absorbing capacity and features of such capital. The minimum capital of an insurer is the capital that the CIRC requires it to meet.

Under C-ROSS, solvency risks are classified into inherent risk and control risk. Inherent risk refers to the risks that are unavoidable in the writing of insurance business. Control risk refers to the risks of failure to identify, evaluate and manage control inherent risk timely due to imperfections in the internal management and control process. Inherent risk includes both quantifiable risks and unquantifiable risks.

Quantifiable risks include the following:

Insurance risk, which includes life insurance risk and non-life insurance risk;

Market risk, which includes interest rate risk, equity price risk, property price risk, overseas assets price risk and foreign exchange risk; and

Credit risk, which includes spread risk and default risk.

Unquantifiable risks include the following:

Operation risk;

Reputation risk;

Strategy risk; and

Liquidity risk.

The minimum capital requirement for quantifiable risks is determined using a value at risk approach. The minimum capital requirement for control risk is determined based on solvency aligned risk management requirements and assessment, or SARMRA.

The CIRC comprehensively evaluates the inherent risk and control risk of an insurer and determines an integrated risk rating of solvency risks. Insurers will then be classified into the following four supervision categories:

Category A: an insurer's solvency adequacy ratio meets the CIRC requirement, and its risk level is very low for the four unquantifiable risks;

Category B: an insurer's solvency adequacy ratio meets the CIRC requirement, and its risk level is low for the four unquantifiable risks;

Category C: an insurer's solvency adequacy ratio does not meet the CIRC requirement, or an insurer's solvency adequacy ratio meets the CIRC requirement but its risk level is high for one or more of the four unquantifiable risks; or

Category D: an insurer's solvency adequacy ratio does not meet the CIRC requirement, or an insurer's solvency adequacy ratio meets the CIRC requirement but its risk level is serious for one or more of the four unquantifiable risks.

Table of Contents

The CIRC applies different regulatory policies to each of the four supervision categories with respect to, among others, market access, product management, use of insurance funds and on-site inspection.

Category B insurer may be subject to a range of regulatory actions by the CBIRC (formerly CIRC), including, among others, risk alert, supervisory conversation, rectification of identified problems within a specified deadline, on-site inspection or request to submit and implement plans to prevent insolvency or improve risk management.

If a Category C insurer does not meet the solvency adequacy ratio required by the CBIRC (formerly CIRC), the CBIRC (formerly CIRC) may in such situations require the insurer to, in addition to the regulatory actions for category B, adjust its business structure, restrict business expansion and increase in assets, restrict the establishment of branch offices, restrict its commercial advertising activities, limit its business scope, transfer its insurance business to others or seek reinsurance of its insurance obligations, adjust investment portfolios or counterparties, limit its channels or percentages of investment, raise additional share capital, limit paying dividends on its shares, limit the remuneration of its directors and senior management or change its management team. If an insurer of category C meets the solvency adequacy ratio as required by the CBIRC (formerly CIRC) but its risk level is high for one or more of the four unquantifiable risks, the CBIRC (formerly CIRC) may take specific regulatory actions that target on the respective issues of each insurer.

For a Category D insurer the CBIRC (formerly CIRC) may, in addition to the regulatory actions for category C, require such insurer to rectify or cease part or all new business, put the insurer into receivership or take other regulatory actions as determined by the CBIRC (formerly CIRC).

Prior to the filing of this annual report, we became aware that, based on the latest comprehensive rating results regarding the solvency risks of insurers released by the CBIRC for the fourth quarter of 2017, we had been classified as a Category B insurer. Previously we were classified as a Category A insurer. It remains unclear whether the CBIRC will take any regulatory action with respect to our company or how these regulatory actions (if any) will affect our business or financial condition.

Our core solvency adequacy ratio as of December 31, 2017 was 277.61 %, and our comprehensive solvency adequacy ratio as of December 31, 2017 was 277.65%.

Statutory deposits

Insurance companies in China are required to deposit an amount equal to 20% of their registered capital with at least two qualified commercial banks, each of which must, among other things, have net assets of no less than RMB 20 billion as of the end of the previous year and have no affiliated relationship with the insurance company. These funds may not be used for any purpose other than to pay off debts during a liquidation proceeding. Insurance companies must choose more than two qualified commercial banks as statutory deposit banks and the statutory deposit period must be for a minimum of one year. In addition, when an insurance company deposits the statutory funds for a business opening or capital increase, renews the deposit upon maturity or transfers the deposit to another bank, changes the nature of the deposit upon maturity or withdraws the deposit before maturity, the insurance company must file with the CBIRC (formerly CIRC) within 10 business days after these funds are duly deposited.

Statutory insurance fund

Chinese life insurance companies are required to contribute to a statutory insurance fund 0.15% of the premiums for life insurance with guaranteed earnings and 0.05% of the premiums for life insurance without guaranteed benefits; 0.8% of insurance premiums for short-term health insurance and 0.15% of insurance premiums for long-term health

insurance; 0.8% of the premiums for non-investment accident insurance, 0.08% of the premiums for investment accident insurance with guaranteed benefits, and 0.05% of premiums for investment accident insurance without guaranteed benefits. Contributions are not required once the balance of the statutory insurance fund of a life insurance company reaches 1% of the company's total assets.

Table of Contents***Statutory reinsurance***

Insurance companies are required to reinsure, for any single risk, the excess of the maximum potential liability over an amount equal to 10% of the sum of paid-in capital and capital reserves.

Actuaries

Insurance companies are required to employ actuarial professionals and establish a system for actuarial reporting.

Regulation of corporate governance

Directors and senior management qualification and remuneration management requirements. Directors, supervisors and senior management of an insurance company are subject to qualification requirements implemented by the CBIRC (formerly CIRC). In addition, the cash benefits, subsidies and allowances that an insurance company pays to its directors, supervisors and senior management annually must not exceed 10% of their respective base remuneration. Where an insurance company has inadequate solvency, the CBIRC (formerly CIRC) will place restrictions on the remuneration of its directors, supervisors and senior management in accordance with relevant regulatory rules on solvency. The senior management of an insurance company receive in-office audits once every three years. If any member of the senior management leaves due to a job change, promotion or any other reasons, a departure audit must be conducted.

Risk management. Insurance companies must establish and adopt procedures, organizational structures, systems and measures to identify, evaluate and control the risks involved in its insurance operation. Insurance companies must report to the regulatory authorities in a timely manner any major risks, and submit an annual risk management report reviewed by the board of directors. In addition, as required by the CBIRC (formerly CIRC), an insurance company that conducts certain activities, such as direct share investments, equity investments, real estate investments, investments in unsecured bonds, development of infrastructure investment schemes and real estate investment schemes and use of derivatives, must have at least two qualified risk officers. Where an insurance company decides to change a risk officer, impose disciplinary sanctions on a risk officer, dismiss a risk officer or terminate the employment of a risk officer, the insurance company must replace such risk officer within 10 business days from the date of the decision, and report to the CBIRC (formerly CIRC) the reasons for such replacement.

Asset-liability management. On March 1, 2018, the CIRC issued a set of specific technical criteria and rules on the quantitative and competency assessments on insurers' asset-liability management, as well as requirements on preparing and submitting asset-liability management reports. The new rules have been implemented on a pilot basis since their date of issue. Under the new rules, insurance companies must file quarterly reports on asset-liability management with the CBIRC (formerly CIRC) within 30 days after the end of each quarter, and file annual reports on asset-liability management with the CBIRC (formerly CIRC) no later than May 31 of each year. Both the quarterly reports and the annual reports must be prepared in accordance with specified guidelines. In addition, insurance companies must complete asset-liability management competency assessments and file such assessments with the CBIRC (formerly CIRC) by August 31, 2018. During the pilot period, the CBIRC (formerly CIRC) will review the reports and assessment results submitted by the insurers but it will not take regulatory action.

Table of Contents

Compliance management. Insurance companies must prevent, identify, evaluate, report and manage compliance risks by taking measures such as setting up a compliance department, formulating and implementing compliance policies (which are required to be filed with the CBIRC (formerly CIRC)), exercising compliance monitoring and providing compliance trainings, so as to ensure compliance by the company, its staff and sales agents with the relevant laws and regulations, rules of regulatory authorities, industrial self-regulatory rules, internal management systems and codes of ethics. An annual compliance report must be submitted to the CBIRC (formerly CIRC) by April 30 each year. Each insurance company is required by the CBIRC (formerly CIRC) to appoint a compliance officer and establish a compliance management department in its head office. Starting from June 1, 2016, where the proposed compliance head of an insurance company for whom the insurance company has applied for approval of post-holding qualifications also serves in other senior management positions, the insurance company must submit a statement that the proposed compliance head will not also manage a business or financial department during his or her term of office. Beginning from July 1, 2017, the headquarter and provincial branches of an insurance company must each set up a compliance management department. Where the proposed compliance head of an insurance company for whom the insurance company has applied for approval of post-holding qualifications is to be served by a senior management person other than the general manager, the insurance company must submit a statement that the proposed compliance head will not also manage departments that may be in conflict with his or her responsibilities for compliance management, such as those for business, finance, fund use and internal audit during his or her term of office. As of the date of this annual report, we have set up a compliance management department, established compliance standards and appointed a compliance officer whose qualification has been approved by the CIRC.

Related party transactions. Insurance companies are required to establish a related party transaction control committee or designate their audit committee to be responsible for identifying related parties, managing, reviewing and approving related party transactions and controlling risks, and must update the records of related parties at least once every six months. According to applicable CIRC regulations, related party transactions between an insurance company and any of its related parties are classified as either material related party transactions or ordinary related party transactions. The term material related party transactions refers to any single transaction between an insurance company and a related party in which the trading volume accounts for 1% or more of the insurance company's net assets as of the end of the previous year or has a value of more than RMB 30 million, or transactions between an insurance company and a related party in which the accumulative trading volume within one fiscal year accounts for 5% or more of the insurance company's net assets as of the end of the previous year. The term ordinary related party transactions refers to all related party transactions other than material related party transactions. A material related party transaction is subject to approval by the insurer's board of directors (the related board resolutions must be adopted by at least two-thirds of all non-affiliated directors, except for any related party transactions between an insurance group (holding) company and its insurance subsidiaries, as well as between and among its insurance subsidiaries themselves) or shareholders, while an ordinary related party transaction is subject to review in accordance with the internal authorization process of the insurance company. An insurance company is required to maintain a system to manage related party transactions and file them with the CBIRC (formerly CIRC). Companies must take effective measures to prevent their shareholders, directors, supervisors, senior management and other related parties from taking advantage of their positions and acting against the interests of the company or the insured through related party transactions. In addition, an insurance company is required, within 10 business days after the conclusion of the transaction agreements (or within 10 business days from the occurrence of the relevant event if no transaction agreement is concluded), to report to the CBIRC (formerly CIRC) and make an announcement on its website and the website of the Insurance Association of China if it conducts certain related party transactions, including, among others, transactions relating to investments of insurance funds and related party transactions that involve transfers of assets or interests above a specified amount. In respect of any information that could not be publicly disclosed as it involves state secrets or due to other reasons, the insurance company must, at least five business days prior to the prescribed date of information disclosure, report this fact to the CBIRC (formerly CIRC) and refrain from disclosing such information as required by law.

Table of Contents

Internal audit. Insurance companies are required to establish an independent department for internal audit purposes, staffed with sufficient internal audit personnel (the number of full-time internal audit personnel generally must not be less than 5% of the total number of the company's employees), establish an audit committee, and designate an audit controller whose appointment and replacement must be filed with the CBIRC (formerly CIRC). An internal audit report must be submitted to the CBIRC (formerly CIRC) by April 30 of each year and any major risk identified during the internal audit process must be reported to the CBIRC (formerly CIRC) in a timely manner.

Reporting and disclosure requirements. An insurance company must submit to the CBIRC (formerly CIRC) an operating report, an actuarial report, its financial statements, a solvency report and a compliance report, each prepared in accordance with applicable rules. By April 30 of each year, an insurance company must disclose on its website and a newspaper designated by the CBIRC (formerly CIRC) an annual report including, among other things, financial statements and solvency data for the previous year. In addition, within 10 business days after the occurrence of a material related party transaction or other material events, an insurance company must disclose information about such transactions and events on its website.

Internal control assessment. In January 2006, the CIRC issued tentative rules on internal control assessment of life insurance companies to facilitate and supervise the companies and improve their awareness of, and strengthen their controls over, matters such as corporate governance in management, internal controls and regulatory compliance in operations and risk management. Life insurance companies are required to submit to the CBIRC (formerly CIRC) an internal control assessment form and an annual internal control assessment report each year. The CBIRC (formerly CIRC) assesses the internal control of life insurance companies at least every three years, covering at least one third of all life insurance companies each year. Under the Basic Guidelines for Internal Controls in Insurance Companies issued by the CIRC in August 2010 and the Measures for Compliance Management of Insurance Companies issued by the CIRC in December 2016, which are effective from July 1, 2017, an insurance company must establish an internal control evaluation system in various operations including sales, operation, basic management and fund use, and by April 30 of each year, submit to the CBIRC (formerly CIRC) an evaluation report on its internal control. In addition, where the CBIRC (formerly CIRC) deems necessary, the CBIRC (formerly CIRC) may collect information reflecting the corporate governance of insurance companies, establish an information database of insurance companies governance, and conduct governance ratings for insurance companies through on-site or off-site investigations, media reports, assessments of independent rating agencies and public disclosure by insurance companies. The CBIRC (formerly CIRC) may take regulatory measures against insurance companies based on the rating results, including interviews, a risk warning in writing and rectifications within a specified period.

Custody of insurance assets. In October 2014, the CIRC and CBRC jointly issued a notice on regulating the insurance assets custody business. Under this notice, insurance companies are required to establish and improve mechanisms for the custody of insurance assets, select qualified commercial banks and other professional institutions, place various assets generated by the investment of insurance funds under third-party custody and oversight, and ensure that the revenue and expenditure concerning the use of insurance funds (except for expenditure of daily expenses) are primarily processed through the custody fund accounts. Insurance companies are required to submit implementing plans relating to the custody of their insurance assets to the CBIRC (formerly CIRC).

Table of Contents

Market conduct

Insurance companies are required to take steps to ensure that sales promotional materials used by their sales representatives and agents are objective, true and correct, with no material omissions or misleading information, contain no forecasts of benefits that are not guaranteed under the insurance or annuity product and do not exaggerate the benefits provided under the insurance or annuity product. The sales promotional materials must also highlight in an appropriate fashion any exclusions of coverage or liability in their products, as well as terms providing for policy or annuity surrenders and return of premiums. If any insurance policy or consulting service is provided through telephone sales, requisite office space, staff, facilities and adequate supervising must be furnished. In addition, the telephone sale must be conducted directly by the insurance company, and the terms and rates of the premiums of the insurance policy and geographic business area must be submitted to the CBIRC (formerly CIRC) for approval.

Insurance companies are subject to extensive regulation against any anti-competitive behavior or unfair dealing conduct. They may not pay insurance agents, the insured or the beneficiary any rebates or other illegal payments, nor may they pay their agents commissions over and above the industry norm.

Insurance companies are required to establish internal rules and procedures to protect the personal data of policyholders and insureds. Insurance companies are prohibited from illegal obtaining, using or selling of the personal data of policyholders and insureds.

Insurance companies are also required to comply with anti-money laundering regulations and establish internal operational procedures and anti-money laundering control systems. No insurance activity can be conducted for the purpose of illegal fundraising.

Regulation of issuance of subordinated debt

Beginning in September 2004, insurance companies that meet a series of qualification tests and are approved by the CBIRC (formerly CIRC) may issue subordinated debt with a fixed term of at least five years to certain qualified Chinese legal persons and foreign investors. The audited net asset value of the issuer must be at least RMB 500 million as of the end of the prior year and the total amount of unpaid debt at any given point after the issuance, including both principal and interest, must not exceed the issuer's net asset value as of the end of the prior year. Proceeds from the issuance of subordinated debt may be recorded as supplementary capital of an insurance company, provided that the total amount that has been recorded as supplementary capital may not exceed 50% of the net assets of an insurance company. Proceeds from the issuance of subordinated debt may not be used to offset daily operating losses of an insurance company. The issuer must comply with certain disclosure obligations both at the time of the issuance and during the term of the debt. The issuer may repay the debt only if its solvency ratio would remain at least 100% after the repayment of both principal and the interest. Since March 15, 2013, a qualified insurance group (or holding) company is also allowed to issue subordinated debt in accordance with the relevant requirements of the CIRC.

Beginning in May 2012, publicly listed insurance companies that meet a series of qualification tests and are approved by the CBIRC (formerly CIRC) may issue subordinated convertible bonds. Subordinated convertible bonds refer to bonds issued by an insurance company in accordance with statutory procedures that satisfy the following conditions: the bonds have a maturity of five years or longer; the principal and interest of the bonds shall be repaid and paid after insurance policy liabilities and other general liabilities in the event of bankruptcy liquidation; and the bonds can be converted into shares of the insurance company in accordance with the agreed conditions within a certain period of time. An insurance company must submit an issuance application to the relevant securities regulatory authority within six months after the CBIRC (formerly CIRC) has approved the issuance of subordinated convertible bonds. An issuer

must report the issuance information to the CBIRC (formerly CIRC) within ten working days after completion of the issuance of subordinated convertible bonds.

Table of Contents***Regulation of merger and acquisition of insurance companies***

An insurance company may apply to the CBIRC (formerly CIRC) for approval of the acquisition of control of another insurance company through the acquisition of equity or shares of the other insurance company. Except under special circumstances, such as a transfer between affiliated parties under common control or risk disposition, the acquiring party is not allowed to transfer the acquired equity or shares in the target insurance company within three years from the completion of the acquisition. Upon approval by the CBIRC (formerly CIRC), the acquiring party may control two insurance companies engaging in the same type of business after the completion of acquisition. In addition, an insurance company may apply to the CBIRC (formerly CIRC) for approval for the merger with other insurance companies by absorption or establishing a new insurance company. The business scope of the insurance company subsequent to the merger is subject to the re-approval by the CBIRC (formerly CIRC). An insurance company must, during the twelve-month period after the completion of merger or acquisition, report the following information in writing to the CBIRC (formerly CIRC) within the first 30 days of each quarter: making investments in and purchases or sales of material assets, related party transactions, business transfers, notifications to insurance consumers, public announcements, changes of senior management personnel and employee placements.

Regulation of establishment and management of non-insurance subsidiaries

An insurance company may apply to the CBIRC (formerly CIRC) for approval for the direct or indirect establishment of domestic or overseas non-insurance subsidiaries (excluding insurance companies, insurance asset management institutions, dedicated insurance agencies, insurance brokerage institutions and insurance assessment institutions), primarily including: (1) financial institutions that engage in non-insurance financial services; (2) service firms that provide various supporting services to insurance companies; (3) investment platform companies with a strong connection with an insurance business, project companies established for managing the investment of insurance funds in real properties, and companies formed as a result of the investment of insurance funds in the upstream and downstream industry chain of an insurance business; and (4) other types of companies. Unless otherwise prescribed by laws, administrative regulations and the CBIRC (formerly CIRC), an insurance company is not allowed to guarantee the debts of its non-insurance subsidiaries, or lend funds to its non-insurance subsidiaries. An insurance company must build firewalls between its non-insurance subsidiaries in terms of personnel, capital, business and information to prevent risks spreading from its non-insurance subsidiaries. An insurance company must also cause its non-insurance subsidiaries to establish and improve their respective information disclosure systems, and submit to the CBIRC (formerly CIRC) an annual report on its non-insurance subsidiaries by April 30 of each year.

Regulation of establishment of overseas insurance institutions

An insurance company may apply to the CBIRC (formerly CIRC) for approval for the establishment of overseas branches, overseas insurance companies and overseas insurance intermediaries, or the acquisition of overseas insurance companies or intermediaries. In order to submit such an application, an insurance company must have an operating history of no less than two years, total assets of no less than RMB 5 billion as at the end of the prior year and foreign exchange funds of no less than US\$ 15 million or its equivalent in other freely convertible currencies as at the end of the preceding year. The applicant insurance company must also comply with applicable solvency, risk management and other requirements as stipulated by the CBIRC (formerly CIRC).

Table of Contents

Compliance with regulatory requirements

Our management confirms that we have complied in all material respects with all applicable regulatory requirements set out above.

Regulation of Foreign-Invested Insurance Companies

China acceded to the WTO on December 11, 2001. As a result of China's commitments in connection with the accession, the Chinese insurance market is gradually opening up to foreign insurers and insurance-related service providers. A foreign life insurer with total assets of no less than US\$ 5,000 million and 30 years of industry experience in any WTO member country, and which has had a representative office for two years in China, is permitted to form a life insurance joint venture with a domestic partner of its choice. Foreign life insurers may own up to one-half of the joint venture. In addition, the geographic limitation on foreign life insurers, which were permitted to operate only in specified cities, has been lifted since December 11, 2004. Accordingly, foreign life insurers have been permitted to provide group life insurance, health insurance and annuity and other pension-like products since December 11, 2004. In addition, since December 11, 2006, foreign insurance brokers have been permitted to set up wholly owned subsidiaries in China.

Foreign-invested insurance companies, including Sino-foreign equity joint ventures, wholly foreign-owned insurance companies and branches of foreign insurance companies, are generally regulated in the same manner as domestic insurance companies. Without the approval of the CBIRC (formerly CIRC), foreign-invested insurance companies may not engage in asset purchases and sales or other transactions with their affiliates, but may engage in outward and inward reinsurance with their affiliates. In addition, where the foreign-invested insurance company is a branch of a foreign insurance company, it is required to notify the CBIRC (formerly CIRC) of fundamental events relating to the foreign insurance company within ten days following the occurrence of the event. Reportable events include: (1) a change of name, senior management or jurisdiction of incorporation of the foreign insurance company, (2) a change in the foreign insurance company's share capital, (3) a change in any person beneficially owning 10% or more of the foreign insurance company's shares, (4) a change in business scope, (5) the imposition of administrative sanctions by any applicable regulatory authority, (6) a material loss incurred by the foreign insurance company, (7) a spin-off, merger, dissolution, revocation of corporate franchise or bankruptcy involving the foreign insurance company and (8) other events specified by the CBIRC (formerly CIRC). If the foreign insurance company is dissolved, or its corporate franchise is revoked or it is declared bankrupt, the Chinese branch of the foreign insurance company will be prohibited from conducting any new business.

Beginning in June 2012, the CIRC has delegated certain authorities with respect to foreign-invested insurance companies to its provincial and local branch offices: approving the change of place of business of branches and subsidiaries of foreign-invested insurance companies; approving the establishment of subsidiary agencies of foreign-invested insurance companies below the branch-office level; approving the opening of subsidiary agencies of foreign-invested insurance companies below the branch-office level; and approving the qualification of senior management personnel of subsidiary agencies of foreign-invested insurance companies below the branch-office level.

Regulation of Insurance Asset Management Companies

An insurance asset management company is a limited liability company or joint stock company that manages insurance funds on behalf of others. Insurance asset management companies are regulated by the CBIRC (formerly CIRC).

Table of Contents

Minimum capital requirements

The registered capital of an insurance asset management company may not be lower than RMB 100 million or the equivalent amount of other freely convertible currencies.

Business operations

An insurance asset management company may conduct the following businesses: (1) managing funds in Renminbi or other foreign currencies entrusted to it, including insurance funds, funds of pension, annuity and housing provident institutions, as well as funds of other qualified investors that are capable of identifying and undertaking corresponding risks; (2) managing and operating its own insurance funds in Renminbi or foreign currencies; (3) as trustee, carrying out asset management business appointed by and on behalf of the trustor, or developing asset management products for the interest of the beneficiary or for specific purposes and carrying out asset management business; (4) applying to relevant financial regulatory authorities to carry out publicly-raised asset management business in accordance with the law, provided that relevant conditions are met; (5) as approved by the CBIRC (formerly CIRC), issuing relevant asset management products to domestic insurance groups or holding companies, insurance companies, insurance asset management companies and other qualified investors capable of identifying and bearing the applicable risk; and (6) other businesses approved by the CBIRC (formerly CIRC) or other departments of the State Council.

The investments of the insurance funds by insurance asset management companies are subject to the same requirements and limitations applicable to the investments by the insurance companies themselves. With the regulatory expansion of insurance company investment channels, the investment channels of insurance asset management companies over their own funds have been expanded as well to cover subordinated bonds issued by banks and insurance companies, bank subordinated bonds and stock investments.

In connection with the funds being managed by an insurance asset management company, a custodian is required to be appointed. The custodian must be an independent commercial bank or financial institution satisfying applicable CIRC requirements.

Shareholding restrictions

At least 75% of the shares of an insurance asset management company must be owned by domestic insurance companies, and at least one of the shareholders of an insurance asset management company must be an insurance company or insurance holding company satisfying specified requirements.

Investment risk control

Both insurance companies and asset management companies must establish structures, arrangements and measures to recognize, assess, manage and control investment risks. Members of senior management may not be responsible for the management of departments in charge of investment decisions, investment transactions and risk controls at the same time. Branches of insurance companies may not manage insurance funds. Insurance asset management companies must arrange for separate investment managers to manage their own funds and the insurance funds from other insurance companies, as well as insurance funds from an insurance company that are of a different nature.

Table of Contents

Major emergency response management

An insurance asset management company is required to establish a monitoring and precaution mechanism for major emergencies.

Regulation of Insurance Agencies, Insurance Brokers and Other Intermediaries

Insurance agents are business entities or individuals which or who act on behalf of an insurance company in respect of insurance matters. An insurance company is responsible for the acts of its agents when the acts are within the scope of their agency. Licensed insurance agencies fall into two groups: dedicated agencies and non-dedicated agencies.

A dedicated agency is a company (and its branches) organized under the PRC company law whose principal business is to act as an agent of insurance companies. Dedicated agencies are subject to minimum capital and other requirements, and their business is generally limited to insurance-related activities.

A non-dedicated agency is a business entity whose principal business is other than as an insurance agency. To receive a license, the agency business must have a direct relationship with its principal business, which the CIRC has interpreted as permitting commercial banks to act as non-dedicated insurance agencies. Sales representatives of insurance companies are prohibited from selling insurance products at commercial bank outlets. The bancassurance management personnel of insurance companies are responsible for providing services (including training and the exchange of documents) to commercial banks and assisting commercial banks to provide related customer services, such as the payment of maturity benefits and handling of renewal fee after selling insurance products.

Prior to August 3, 2015, individual insurance agents, representatives of insurance agencies and insurance brokers were required to obtain qualification certificates issued by the CIRC. Under such CIRC regulations, we were subject to sanctions if we retained exclusive agents without CIRC qualification certificates, and policyholders who bought insurance policies through our unqualified agents were allowed to cancel the policies under some circumstances. On August 3, 2015, the CIRC issued a Notice on the Administration of Insurance Intermediary Personnel, effective on the same day. Under the new regulations, the CIRC canceled the requirements on qualification certificates or practice certificates for individual insurance agents, representatives of insurance agencies and insurance brokers, with the effect that insurance companies are now only required to complete registration for their individual insurance agents in the insurance intermediary regulatory information system maintained by the CIRC. In addition, insurance companies are required to take adequate measures to ensure the good conduct and professional competence of their individual insurance agents, representatives of insurance agencies and insurance brokers.

All insurance agencies and agents are required to enter into agency agreements that specify the duration of the agency; the amount of the agency fee and the method of payment; the scope of the agency, including the insurance products to be marketed; and other relevant matters. Absent specific CBIRC (formerly CIRC) approval, insurance agents are prohibited from signing insurance and annuity products on behalf of the insurance companies they represent. None of our agents is authorized to sign insurance policies or annuity contracts for us.

Insurance agencies are required to open special accounts for the handling of funds that they hold or collect for the insurance companies they represent. They may not engage in the following activities: dealing with unauthorized insurers or insurance intermediaries, engaging in activities beyond their authorized business scope or geographical area, causing injury to the rights of the insurance companies they represent, spreading rumors or otherwise injuring the reputation of others in the insurance industry, misappropriating the funds of the insurance companies they represent, defrauding insurance customers through false or misleading representations or material omissions, using undue influence to induce insurance customers to purchase insurance, or defrauding the insurance companies they represent

through collusion with the insured or the insurance beneficiary. In addition, dedicated insurance agencies are subject to various reporting requirements, including submission of annual financial reports, and are subject to supervision and examination by the CBIRC (formerly CIRC).

Table of Contents

Insurance brokers who represent individuals and companies purchasing insurance and other intermediaries are subject to similar regulatory requirements regarding their activities. Among other things, they are subject to supervision and examination by the CBIRC (formerly CIRC), and fundamental corporate changes must be approved by the CBIRC (formerly CIRC). Only companies organized under the PRC company law and meeting requirements set by the CBIRC (formerly CIRC) are authorized to act as insurance brokers. Insurance brokers are required to comply with standards prescribed by the CBIRC (formerly CIRC). Insurance brokerage agencies must provide training to their brokerage personnel regarding insurance laws and provide education on ethics and other matters.

Regulation of Internet Insurance Businesses

Insurance companies and intermediaries are allowed to carry out an Internet-based insurance business, including sales, underwriting, claims settlement, policy surrender, complaint handling, customer services and other insurance business activities, through proprietary network platforms or third-party network platforms that meet the relevant requirements prescribed by the CBIRC (formerly CIRC). Insurance companies and intermediaries that carry out an internet-based insurance business must set up an information disclosure column on their official websites, disclosing the related website names and addresses, internet insurance products, existing branches, customer services and ways for consumers to make complaints. The CBIRC (formerly CIRC) is required to carry out regulation and on-site inspection of an internet insurance business, and may take rectification measures against insurance companies and intermediaries that conduct operations in violation of the regulations. Insurance companies engaging in internet-based guaranteed insurance businesses, which use internet credit lending platforms as intermediaries to provide both the borrowers (i.e. insurance applicants) and the lenders (i.e. the insured) on such platforms with guaranteed insurance services, must comply with regulatory requirements on solvency, verify the qualifications of insurance applicants in a prudent manner, clarify the information disclosure obligations of the internet platforms, enhance product management and adhere to other compliance requirements stipulated by the CBIRC (formerly CIRC).

No.2 Interpretation of Accounting Standard for Business Enterprises

On August 7, 2008, the MOF issued the No.2 Interpretation of Accounting Standard for Business Enterprises, requiring listed companies which issue both H shares and A shares to adopt consistent accounting policies to recognize, calculate and report a particular transaction in their H share financial statements and A share financial statements, except for certain differences in relation to the reversal of impairment losses of long-term assets and disclosures in relation to related party transactions.

On January 5, 2009, the CIRC issued the Notification on the Implementation of the No.2 Interpretation of Accounting Standards for Business Enterprises in the Insurance Sector (No.1 [2009] of CIRC), which requires insurance companies to make appropriate changes to their accounting policies that cause differences between onshore and offshore financial statements when preparing their 2009 annual financial statements, such that the same accounting policies and estimates will apply to a particular transaction.

Table of Contents

On December 22, 2009, the MOF issued the Notification on the Promulgation of the Regulations regarding the Accounting Treatment of Insurance Contracts, which regulates issues relating to, among other things, the unbundling of mixed insurance contracts, tests for significant insurance risks and the calculation of reserves for insurance contracts, and requires insurance companies to comply with these requirements beginning with the preparation of their financial statements for the year ended December 31, 2009. The accounting treatment of any transaction item adopted in previous year which differs from those set out in the MOF's regulations must be retrospectively adjusted, unless any such adjustment is not practicable under the circumstances.

Implementation of VAT

Following the decision of the PRC State Council, the Value Added Tax, or VAT, has applied to the financial and insurance sector since May 1, 2016. Therefore, our primary business has been subject to 6% VAT from May 1, 2016 instead of the 5% business tax, or BT, which previously had applied to our business. The implementation of VAT has had an effect on our business and operations, including, among other things, our product development and pricing, finance management, management of receipts and IT systems. However, our management believes that the implementation of VAT has not had any known material impact on our overall operating results and financial conditions.

Audit by the PRC National Audit Office

In 2015, the National Audit Office of the People's Republic of China, or the NAO, conducted a routine audit on the assets, liabilities and profits and losses of CLIC and its subsidiaries (including China Life) for the year of 2014. On June 29, 2016, the NAO released on its website the audit results. We believe that the issues identified in the audit have no material impact on our overall operating results, financial statements and internal control over financial reporting. We disclosed the audit results on Form 6-K filed with the SEC on June 29, 2016.

(4) AMC, which is 60% owned by us, owns 85.03%

(5) AMC, which is 60% owned by us, owns 48%, and China Life AMP, which is 85.03% owned by AMC, owns 52%.

Table of Contents

D. PROPERTY, PLANTS AND EQUIPMENT

As of December 31, 2017, we owned and leased 4,096 and 13,194 properties, respectively, and had 305 properties under construction. Among the 4,096 properties owned by us, 2,390 properties are leased to third parties (including partial leasing) while the remaining properties are mainly occupied by us as office premises. Nine properties are recognized as investment properties.

On December 29, 2017, we entered into a new property leasing agreement with China Life Investment Holding Company Limited, or IHC. Under this property leasing agreement, which will expire on December 31, 2020, IHC agreed to lease to us 1,893 properties owned by it. The annual rent is determined by reference to market rent or, where there is no available comparison, by reference to the costs incurred by IHC in holding and maintaining the properties, plus a margin of approximately 5%.

ITEM 4A. UNRESOLVED STAFF COMMENTS.

None.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS.

You should read the following discussion and analysis in conjunction with the audited consolidated financial statements and accompanying notes included elsewhere in this annual report.

Overview of Our Business

We are the leading life insurance company in China. We provide a broad range of insurance products, including individual and group life insurance, annuity contracts, health insurance and accident insurance products. We had nearly 268 million insurance policies in force as of December 31, 2017, including individual and group life insurance policies, annuity contracts, health insurance and accident insurance policies.

We report our financial results according to the following three principal business segments:

Life insurance, which offers participating and non-participating life insurance and annuities to individuals and groups.

Health insurance, which offers short-term and long-term health insurance to individuals and groups. The financial results of our supplementary major medical insurance are also reflected in our health insurance business segment.

Accident insurance, which offers short-term and long-term accident insurance to individuals and groups. In addition, we have an other reporting segment, in which we primarily report the income and cost of the agency business in respect of transactions with CLIC and other companies, net share of profit of associates and joint ventures, income and expenses of subsidiaries, and unallocated income and expenditure of our company. See Note 5 to our consolidated financial statements included elsewhere in this annual report.

Table of Contents

Financial Overview of Our Business

We had total gross written premiums of RMB 511,966 million (US\$ 78,688 million) and net profit of RMB 32,752 million (US\$ 5,034 million) for the year ended December 31, 2017. Our principal business segments had the following results:

Life insurance had total gross written premiums of RMB 429,822 million (US\$ 66,062 million) in 2017.

Health insurance had total gross written premiums of RMB 67,708 million (US\$ 10,407 million) in 2017.

Accident insurance had total gross written premiums of RMB 14,436 million (US\$ 2,219 million) in 2017. Our business has been characterized by growth of premium income over the past several years, together with a move towards an improved business structure which has been evidenced by a rapid increase in first-year regular premiums, with the percentage of first-year regular premiums for products with regular premiums of ten years or more in first-year regular premiums being above 50% since 2013. At the same time, our business has also been affected by certain unfavorable factors, including the increasing cross-industry competition from companies in other financial industries, and the rapid development of the insurance companies owned or controlled by commercial banks and some other small and medium-sized insurance companies, which have secured an increasing market share, as well as the changing economic and investment environment within China, including slowing economic growth and fluctuations in interest rates.

Factors Affecting Our Results of Operations

Revenues, Expenses and Profitability

We earn our revenues primarily from:

insurance premiums from the sale of life insurance policies and annuity contracts, including participating and non-participating policies and annuity contracts with life contingencies, as well as accident and health insurance products. Net premiums earned accounted for 78.79% of total revenues in 2017.

investment income and net realized gains on financial assets, net fair value gains through profit or loss. Investment income and net realized gains on financial assets, net fair value gains through profit or loss accounted for 20.04% of total revenues in 2017.

In addition, following the restructuring, we receive service fees for policy management services we provide to CLIC. AMC also receives asset management fees for asset management services provided to CLIC. See Item 7. Major Shareholders and Related Party Transactions Related Party Transactions .

Our operating expenses primarily include:

insurance benefits provided to our policyholders, accident and health claims and claim adjustment expenses;

Table of Contents

increase in insurance contracts liabilities;

investment contract benefits;

policyholder dividends resulting from participation in profits;

underwriting and policy acquisition costs; and

administrative and other expenses.

We also pay rent to IHC on the properties we lease from it.

Our profitability depends principally on our ability to price and manage risk on insurance and annuity products, our ability to maximize the return on investment assets, our ability to attract and retain customers, and our ability to manage expenses. In particular, factors affecting our profitability include:

our ability to design and distribute products and services and to introduce new products which gain market acceptance on a timely basis;

our ability to price our insurance and investment products at levels that enable us to earn a margin over the costs of providing benefits and the expense of acquiring customers and administering those products;

our returns on investment assets;

our mortality and morbidity experience, which affects our insurance reserves;

our lapse experience, which affects our ability to recover the cost of acquiring new business over the lives of the contracts;

our cost of administering insurance contracts and providing customer services;

our ability to manage liquidity, market and credit risk in our investment portfolio and to manage duration risk in our asset and policy portfolios through asset-liability management; and

changes in regulations.

In addition, other factors, such as competition, securities market conditions, taxes and general economic conditions, affect our profitability.

Interest Rates

For our long-term life insurance products including annuity products, we are obligated to pay contractual benefits to our policyholders or the beneficiaries based on a guaranteed interest rate, which is established when the product is priced. These products expose us to the risk that changes in interest rates may change our spread, or the difference between the amount of return we are able to earn on our investments and the amount of return we are required to pay under the policies. In August 2013, February 2015 and September 2015, the CIRC removed the 2.50% cap on the guaranteed interest rates for the traditional participating insurance policies, universal life insurance policies, and participating life insurance policies, respectively. From October 1, 2015, the guaranteed interest rates of all long-term life insurance products are to be decided by insurance companies at their discretion in accordance with the principle of prudence, but CBIRC (formerly CIRC) approval is required for products with guaranteed interest rates above the maximum valuation rate set by the CIRC, which varies by product. If the rates of return on our investments fall below the rates we guarantee, our profitability would be adversely affected. In November 2014, the interest rate on one-year term deposits, a key benchmark rate, was reduced from 3.00% to 2.75%, and in 2015, the interest rate was further reduced five times from 2.75% to 1.50%. As of the date of this annual report, this interest rate remained unchanged. If economic conditions change in the future, the Chinese government may adjust the interest rates accordingly. As of December 31, 2017, the average guaranteed rate of return for all of our long-term insurance policies in force was 2.62%, while our investment yields for the years ended December 31, 2017, 2016 and 2015 were 5.16%, 4.61% and 6.47%, respectively. However, if the rates of return on our investments were to fall below the rates we guarantee, our profitability would be materially and adversely affected. If the interest rates were to be increased, but we did not raise the guaranteed rates of our products, sales of some of our products could be adversely impacted.

Table of Contents

Interest rates also affect our returns on investment assets, a large proportion of which is held in negotiated bank deposits and debt securities. In a declining interest rate environment, interest rate changes expose us to reinvestment risks. In a rising interest rate environment, higher rates may yield greater interest income but also may generate unrealized capital losses for debt securities designated as trading, causing us to incur realized capital losses for securities we reinvest or requiring us to take an impairment if the market value of debt securities declines for an extended period.

For further information on our exposure to interest rate risk, see Item 11 Quantitative and Qualitative Disclosure about Market Risk Interest Rate Risk and Note 4 to our consolidated financial statements included elsewhere in this annual report.

Investments

As an insurance company, we have been permitted to invest in five categories of investment assets, including liquidity assets, fixed income assets, equity assets, real properties and other financial assets. However, we are limited by Chinese laws and regulations in the maximum amount that we may invest in each type of assets. See Item 4. Information on the Company Business Overview Investments and Item 4. Information on the Company Business Overview Regulatory and Related Matters Insurance Company Regulation Regulation of investments . Our material concentration risks relate to our investments in bank deposits and Chinese government securities.

Our investments are subject to risks. Volatility or declines in Chinese and international financial markets may expose us to higher market and credit risks, such as when domestic and international economic conditions differ from market expectations. We may also invest in new investment channels, use new investment tools or engage new investment managers, which may expose us to new risks. These factors could affect our investment income and the book value of our investment assets. In addition, as a portion of our investment assets are held in foreign currencies, our investment results may also be subject to foreign exchange gains and losses due to changes in exchange rates. Furthermore, our investments in associates are also affected by the operational conditions, financial risks and volatility in profits of these associates, which, in turn, will affect our profitability. See Item 3. Key Information Risk Factors Risks Relating to Our Business Our investments are subject to risks .

Our results can be materially affected by investment impairments. The following table sets forth impairment charges and reversal of impairment charges, which are included in net realized gains on financial assets, for the years ended December 31, 2015, 2016 and 2017.

Table of Contents

Impairment	For the year ended			
	2015	2016	2017	2017
	(RMB in millions)			US\$
Debt securities		(143)	(114)	(17.52)
Equity securities	(321)	(2,513)	(2,643)	(406.22)
Total	(321)	(2,656)	(2,757)	(423.74)

During the year ended December 31, 2017, we recognized an impairment expense of RMB 2,643 million (US\$ 406 million) for available-for-sale equity securities for which we determined that objective evidence of impairment existed. During the year ended December 31, 2016, we recognized an impairment expense of RMB 2,513 million for available-for-sale equity securities for which we determined that objective evidence of impairment existed. During the year ended December 31, 2015, we recognized an impairment expense of RMB 321 million for available-for-sale equity securities for which we determined that objective evidence of impairment existed. Our rationale for the impairment is based on a severe or prolonged decline in value. These securities were not impaired due to company-specific events such as bankruptcies.

During the year ended December 31, 2017, we recognized an impairment expense of RMB 114 million (US\$ 18 million) in debt securities. During the year ended December 31, 2016, we recognized an impairment expense of RMB 143 million in debt securities. During the year ended December 31, 2015, we did not recognize any impairment expense in debt securities, and no previously recognized impairment losses in debt securities were reversed.

Available-for-sale securities comprised of the following asset classes as of December 31, 2015, 2016 and 2017.

We had gross unrealized gains of RMB 25,120 million (US\$ 3,861 million) and gross unrealized losses of RMB 26,837 million (US\$ 4,125 million) as of December 31, 2017. We had gross unrealized gains of RMB 31,391 million and gross unrealized losses of RMB 18,064 million as of December 31, 2016. We had gross unrealized gains of RMB 67,434 million and gross unrealized losses of RMB 3,559 million as of December 31, 2015. The unrealized losses as of December 31, 2017 related primarily to the unrealized losses of available-for-sale bonds.

The following tables set forth the length of time that each class of available-for-sale securities has continuously been in an unrealized loss position as of December 31, 2017, 2016 and 2015.

As of December 31, 2017	0-6 months	7-12 months	More than 12 months	Total

Table of Contents

Financial assets other than those accounted for as at fair value through profit or loss are adjusted for impairments, where these are declines in value that are considered to be other than temporary.

Our rationale for an other-than-temporary impairment is based on a severe or prolonged decline in value. We determine a severe or prolonged decline after considering both quantitative and qualitative factors.

The qualitative factors include specific information on the financial status and performance of the investee, including but not limited to:

loss of major contracts;

breach of debt covenants; and

bankruptcy.

The quantitative factors include the following:

The market price of the equity securities was more than 50% below its cost at the balance sheet date;

The market price of the equity securities was more than 20% below its cost for a period of at least six months at the balance sheet date; and

The market price of the equity securities was below its cost for a period of more than one year.

When the decline in value is considered an impairment, held-to-maturity debt securities are written down to their present value of estimated future cash flows discounted at the securities' effective interest rates, and available-for-sale debt securities and equity securities are written down to their fair value, and the change is recorded in net realized gains on financial assets in the period the impairment is recognized. The impairment loss is reversed through the net profit if in a subsequent period the fair value of a debt security increases and the increase can be objectively related to an event occurring after the impairment loss was recognized through net profit. The impairment losses recognized in net profit on equity investments are not reversed. See Critical Accounting Policies .

As of December 31, 2017, our total investment assets were RMB 2,591,652 million (US\$ 398,330 million) and the investment yield for the year ended December 31, 2017 was 5.16%. The investment yield primarily reflected the increase in interest income and fair value of stocks we have invested in. As of December 31, 2016, our total investment assets were RMB 2,453,283 million and the investment yield for the year ended December 31, 2016 was 4.61%. The investment yield primarily reflected the increase in interest income and the decrease in spread income. As of December 31, 2015, our total investment assets were RMB 2,287,639 million and the investment yield for the year ended December 31, 2015 was 6.47%. The investment yield primarily reflected the increase in spread income and interest income.

We calculate the investment yields for a given year by dividing the total investment income for that year by the average of the ending balance of investment assets of that year and the previous year. Beginning in 2017, the formula to calculate our investment yield has been revised to consider the impact of securities sold under agreements to repurchase on our investment yield, and therefore investment yields for the fiscal years ended December 31, 2016 and December 31, 2015 has also been revised to conform to the revised formula.

Table of Contents**Mix of Products**

The following table sets forth premium information as of or for the years ended December 31, 2017, 2016 and 2015 by type of product in our life insurance business, health insurance business and accident insurance business.

	As of or for the year ended				Compound annual growth rate (2015-2017)
	2015 RMB	2016 RMB	2017 RMB	2017 USD	
Life insurance business					
Whole life and term life insurance:					
Gross written premiums	31,595	33,395	40,606	6,241.03	13.37%
Endowment:					
Gross written premiums	177,871	188,415	198,418	30,496.29	5.62%
Annuities:

Health insurance business⁽¹⁾					
Gross written insurance premiums	42,041	54,010	67,708	10,406.53	26.91%
Accident insurance business⁽²⁾					
Gross written insurance premiums	13,761	14,583	14,436	2,218.77	2.42%

(1) Including long-term and short-term health products.

(2) Including long-term and short-term accident products.

Under the guidelines issued by the CIRC, we are required to pay to our participating policyholders dividends which are no less than 70% of the distributable earnings on participating products. Participating products tend to present us with less market risk, since we have more flexibility to set the level of dividends and participating products are subject to guaranteed interest rates which are generally lower than those of non-participating products. In addition, changes in interest rates have less of impact on their lapse rates than on those of non-participating policies. Conversely, participating products tend to be less profitable for us than non-participating products, largely because the terms of these contracts effectively commit us to sharing a portion of our earnings from participating products with our policyholders. However, participating products still provide us with attractive profit contributions given the growing level of sales volume they produce.

Products classified as investment contracts also affect our revenues, since only a portion of the payments we received under such products are recorded in our consolidated income statement as policy fees, and the majority of such payments are recorded as investment contracts under financial liabilities on our balance sheet.

Another factor affecting our revenue is the fact that a substantial amount of the premiums we receive on many individual and group life insurance products are made in single payments, rather than over the course of the policy. We believe that the popularity of single premium products is in line with purchasing patterns and demand in China. We have, however, adjusted our premium structure to focus more on sales of products with regular premiums,

especially products with regular premiums for ten years or more, which has reduced the proportion of single written premiums of our total first-year gross written premiums. We believe that this strategy could contribute to a more steady development of our business and enhance the loyalty of our customers and the retention rate of our sales agent force.

Table of Contents***Regulation***

We operate in a highly regulated industry. Changes in regulation can have a significant impact on our revenues, expenses and profitability. China's insurance regulatory regime is undergoing significant changes toward a more transparent regulatory process and a convergent movement toward international standards. Among other things, recent changes to permitted investment channels for insurance companies have impacted our investment portfolio and returns. See Item 4. Information on the Company Business Overview Regulatory and Related Matters .

Critical Accounting Policies

We prepared the consolidated financial statements under the historical cost convention, except for financial assets and financial liabilities at fair value through profit or loss, available-for-sale financial assets, insurance contract liabilities and certain property, plant and equipment at deemed cost during restructuring process. The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires our management to exercise its judgments in the process of applying our accounting policies. Many of these policies, estimates and related judgments are common in the insurance and financial services industries; others are specific to our businesses and operations. The following sections discuss the accounting policies applied in preparing our consolidated financial statements that we believe are most dependent on the application of these judgments and estimates. However, uncertainty about these judgments and estimates could result in outcomes that require a material adjustment to the carrying amounts of assets and liabilities in the future periods.

Liability for Long-term Insurance Contracts

Long-term insurance contracts include whole life insurance, term life insurance, endowment insurance and annuity policies with significant life contingency risk. Premiums are recognized as revenue when the insurance contracts are recognized and premiums are due from policyholders.

We use the discounted cash flow method to estimate the reserve of long-term insurance contracts. The reserve of long-term insurance contracts consists of a reasonable estimate of liability, a risk margin and a residual margin. The long-term insurance contracts liabilities are calculated using various assumptions, including assumptions on mortality rates, morbidity rates, lapse rates, discount rates and expense assumptions, and based on the following principles:

The reasonable estimate for liability of long-term insurance contracts is the present value of reasonable estimates of future cash outflows less future cash inflows. The expected future cash inflows include cash inflows of future premiums arising from the undertaking of insurance obligations, with consideration of decrement mostly from death and surrenders. The expected future cash outflows are cash outflows incurred to fulfill contractual obligations, consisting of the following:

- (i) Guaranteed benefits based on contractual terms, including payments for deaths, disabilities, diseases, survivals, maturities and surrenders;

Table of Contents

- (ii) Additional non-guaranteed benefits, such as policyholder dividends; and

- (iii) Reasonable expenses incurred to manage insurance contracts or to process claims, including maintenance expenses and claim settlement expenses. Future administration expenses are included in the maintenance expense. Expenses are determined based on expense analysis with consideration of future inflation and our expense management control.

On each reporting date, we review the assumptions for reasonable estimates of liability and risk margins, with consideration of all available information, taking into account our historical experience and expectation of future events. Changes in assumptions are recognized in net profit. Assumptions for the amortization of residual margin are locked in at policy issuance date and are not adjusted at each reporting date. We incorporate the potential impact of future risk factors on our operating results in the determination of assumptions. The sensitivity analysis disclosed in the Note 4.1.3 on page F-39 of this annual report provides a detailed analysis of impact of assumption changes on our operating results.

Margins have been taken into consideration while computing the reserves of insurance contracts, measured separately and recognized in net profit in each period over the life of the contracts. At the inception of the contracts, we do not recognize Day One gain, whereas on the other hand, Day One loss is recognized in profit immediately.

Margins comprise risk margin and residual margin. Risk margin is the reserve accrued to compensate for the uncertain amount and timing of future cash flows. At the inception of the contract, the residual margin is calculated net of certain acquisition costs, mainly consist of underwriting and policy acquisition costs, by us representing Day One gain and will be amortized over the life of contracts. For insurance contracts of which future returns are affected by investment yields of corresponding investment portfolios, their related residual margins are amortized based on estimated future participating dividends payable to the policyholders. For insurance contracts in which future returns are not affected by investment yields of corresponding investment portfolios, their related residual margins are amortized based on sum assured of outstanding policies. The subsequent measurement of residual margin is independent from the reasonable estimate of future discounted cash flows and risk margin. The assumption changes have no effect on the subsequent measurement of the residual margin.

We have considered the impact of time value on the reserve calculation for insurance contracts. We establish liabilities for long-term traditional insurance contracts based on the following assumptions:

For the insurance contracts of which future insurance benefits are affected by investment yields of corresponding investment portfolios, the discount rate assumption is based on expected investment returns of the asset portfolio backing these liabilities, considering the impact of time value on liabilities. In developing discount rate assumptions, we consider investment experience, current investment portfolio and trend of the relevant yield curve. The assumed discount rates reflect the future economic outlook as well as our investment strategy. The assumed discount rates with risk margin ranged from 4.80% to 5.00% as at December 31, 2015, from 4.45% to 4.85% as at December 31, 2016 and 4.85% as at December 31, 2017, respectively.

Table of Contents

For the insurance contracts of which the future insurance benefits are not affected by the investment yields of the corresponding investment portfolios, the discount rate assumption is based on the yield curve of reserve computation benchmark for insurance contracts, published on China Bond website, with consideration of liquidity spreads, taxation and other relevant factors. The assumed spot discount rates with risk margin ranged from 3.42% to 4.89% as at December 31, 2015, from 3.23% to 4.68% as at December 31, 2016, and from 3.31% to 4.86% as at December 31, 2017, respectively.

There is uncertainty on the discount rate assumption, which is affected by factors such as future macro-economy, monetary and foreign exchange policies, capital market and availability of investment channels of insurance funds. We determine the discount rate assumption based on the information obtained at the end of each reporting period, including consideration of risk margin.

The mortality and morbidity assumptions are based on the historical mortality and morbidity experience. The assumed mortality rates and morbidity rates vary by age of the insured and contract type.

We base our mortality assumptions on China Life Insurance Mortality Table (2000-2003), adjusted where appropriate to reflect our recent historical mortality experience. The main source of uncertainty with life insurance contracts is that epidemics and wide-ranging lifestyle changes could result in deterioration in future mortality experience, thus leading to an inadequate reserve. Similarly, improvements in longevity due to continuing advancements in medical care and social conditions could expose us to longevity risk.

We base our morbidity assumptions for critical illness products on analysis of historical experience and expectations of future developments. There are two main sources of uncertainty. First, wide-ranging lifestyle changes could result in future deterioration in morbidity experience. Second, future development of medical technologies and improved coverage of medical facilities available to the policyholders may bring forward the timing of diagnosing critical illness, which demands earlier payment of the critical illness benefits. Both could ultimately result in an inadequate reserving of liability if current morbidity assumptions do not properly reflect such trends.

Risk margin is considered in our mortality and morbidity assumptions.

The expense assumptions are based on expected unit costs with the consideration of previous expenses study and future trends. Our expense assumptions are affected by certain factors, such as future inflation and market competition which bring uncertainty to these assumptions. We consider risk margin for expense assumptions based on the information obtained at the end of each reporting period. Components of expense assumptions include cost per policy and percentage of premium. Our expense assumptions for the past three years are as follows: the percentage of premiums costs to be 0.85% to 0.90% of premiums for individual life products and 0.90% for group life products as at December 31, 2015, 0.85% to 0.90% of premiums for individual life products and 0.90% for group life products as at December 31, 2016 and 0.85% to 0.90% of premiums for individual life products and 0.90% for group life products as at December 31, 2017, respectively, in each case plus a fixed per-policy expense.

Table of Contents

The lapse rates and other assumptions are affected by certain factors, such as future macro economy, availability of financial substitutions and market competition, which bring uncertainty to lapse rates and other assumptions. The lapse rates and other assumptions are determined with reference to creditable past experience, current conditions, future expectations and other information.

The method used to determine risk margin has been consistently applied. We consider risk margin for each of the discount rate, mortality and morbidity and expense assumptions to compensate for the uncertain amount and timing of future cash flow. When determining risk margin, we consider historical experience, future expectations and other factors. Risk margin is determined by us and does not include any elements imposed by regulators.

We adopted a consistent process to determine assumptions for the insurance contracts, which are detailed in Note 14 to our consolidated financial statements included elsewhere in this annual report. On each reporting date, we review the assumptions for reasonable estimates of liability and risk margin, with consideration of all available information, and taking into account our historical experience and expectation of future events.

Universal Life Contracts and Unit-linked Contracts

Universal life contracts and unit-linked contracts are unbundled into the following components:

Insurance components; and

Non-insurance components.

The insurance components are accounted for as insurance contracts, and the non-insurance components are accounted for as investment contracts, which are stated in the investment contract liabilities.

Investment Contracts

Revenue from investment contracts with or without discretionary participating feature is recognized as policy fee income, which consists of various fee incomes including, among others, policy fees, handling fees and management fees, during the period. Policy fee income net of acquisition cost is deferred as unearned revenue and amortized over the expected life of the contracts.

Except for unit-linked contracts, of which the liabilities for transferred financial risks are carried at fair value, the liabilities of investment contracts are carried at amortized cost.

Valuation of Investments

We classify our financial assets into the following categories: securities at fair value through profit or loss, held-to-maturity securities, loans and receivables and available-for-sale securities. Management determines the classification of our financial assets at initial recognition which depends on the purpose for which the assets are acquired. The following are the policies used:

Table of Contents

Securities at fair value through profit or loss. This category has two sub-categories: securities held for trading and those designated as at fair value through profit or loss at inception. Securities are classified as held for trading at inception if acquired principally for the purpose of selling in the short-term or if they form part of a portfolio of financial assets in which there is evidence of short term profit-taking. Other financial assets are classified as at fair value through profit or loss if they meet the criteria in IAS 39 and designated as such at inception by us.

Held-to-maturity securities. Held-to-maturity securities are non-derivative financial assets with fixed or determinable payments and fixed maturities that we have the positive intention and ability to hold to maturity and do not meet the definition of loans and receivables nor designated as available-for-sale securities or securities at fair value through profit or loss. These investments are carried at amortized cost.

Loans and receivables. Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market other than those that we intend to sell in the short term or held as available-for-sale. Loans and receivables mainly comprise term deposits, loans, securities purchased under agreements to resell, accrued investment income and premium receivables as presented separately in the statement of financial position. These investments are carried at amortized cost.

Available-for-sale securities. Available-for-sale securities are non-derivative financial assets that are either designated in this category or not classified in any of the other categories.

Impairment of financial assets other than securities at fair value through profit or loss. Financial assets other than those accounted for as at fair value through profit or loss are adjusted for impairments, where there are declines in value that are considered to be impairment. In evaluating whether a decline in value is an impairment for these financial assets, we consider several factors including, but not limited to, the following:

significant financial difficulty of the issuer or debtor;

a breach of contract, such as a default or delinquency in payments;

it becomes probable that the issuer or debtor will enter into bankruptcy or other financial reorganization; and

the disappearance of an active market for that financial asset because of financial difficulties.

In evaluating whether a decline in value is impairment for equity securities, we also consider the extent or the duration of the decline. The quantitative factors include the following:

the market price of the equity securities was more than 50% below their cost at the reporting date;

the market price of the equity securities was more than 20% below their cost for a period of at least six months at the reporting date; and

the market price of the equity securities was below their cost for a period of more than one year (including one year) at the reporting date.

Table of Contents

When the decline in value is considered impairment, held-to-maturity debt securities are written down to their present value of estimated future cash flows discounted at the securities effective interest rates; available-for-sale debt securities and equity securities are written down to their fair value, and the change is recorded in net realized gains on financial assets in the period the impairment is recognized. The impairment loss is reversed through net profit if in a subsequent period the fair value of a debt security increases and the increase can be objectively related to an event occurring after the impairment loss was recognized through net profit. The impairment losses recognized in net profit on equity instruments are not reversed through net profit.

As of December 31, 2017, debt securities of RMB 219,285 million (US\$ 33,703 million) contain guarantees issued by third parties and, of those, 85.05% were guaranteed by either the Chinese government or a Chinese government controlled financial institution. Of the guarantees issued by government or government controlled financial institutions, 88.26% relates to debt securities issued by a government railway infrastructure entity. We monitor the credit worthiness of the third parties which have issued these guarantees using local Chinese credit ratings which are generally only utilized within China.

The methods and assumptions used by us in measuring the fair value of the financial instruments are as follows:

Debt securities. The fair values of debt securities are generally based on current bid prices. Where current bid prices are not readily available, fair values are estimated using either prices observed in recent transactions, values obtained from current bid prices of comparable investments or valuation techniques when the market is not active.

Equity securities. The fair values of equity securities are generally based on current bid prices. Where current bid prices are not readily available, fair values are estimated using either prices observed in recent transactions or commonly used market pricing model. Equity securities, for which fair values cannot be measured reliably, are recognized at cost less impairment.

Securities purchased under agreements to resell, policy loans, term deposits, interest-bearing loans and borrowings, and securities sold under agreements to repurchase. The carrying amounts of these assets in the consolidated statement of financial position approximate fair value. Fair values of other loans are obtained from valuation techniques.

Valuations are generally obtained from third party pricing services for identical or comparable assets, or through the use of valuation methodologies using observable market inputs, or recent quoted market prices. Valuation service providers typically gather, analyze and interpret information related to market transactions and other key valuation model inputs from multiple sources, and, through the use of widely accepted valuation models, provide a theoretical quote on various securities.

We utilize one pricing service for substantially all of our Chinese domestic debt securities. This pricing service provider is the only publicly-recognized pricing service provider in China, and its pricing information is used by the mutual fund industry and almost all companies in China. We utilize international pricing services for our overseas debt securities. These pricing service providers are internationally-recognized, and their pricing information is commonly used by international companies. The prices obtained from the pricing service are non-binding. Our review and testing have shown the prices obtained from our pricing service to be appropriate. As such, during the year ended December 31, 2017, we did not consider it necessary to adjust the prices obtained from our pricing service.

As at December 31, 2017, RMB 695,420 million of RMB 764,573 million debt securities with prices obtained from our pricing service were issued by the Chinese government and government controlled organizations. This pricing service utilized a discounted cash flow valuation model using market observable inputs, mainly interest rates, to

determine a fair value. There are no other significant market inputs. As such, we have classified these debt securities as Level 2 in the fair value hierarchy.

Table of Contents

Management subjects the fair values provided by valuation service providers to a number of validation procedures. These procedures include a review of the valuation models utilized, as well as our own test recalculation of the prices obtained from the pricing service at each reporting date.

We consider a combination of many factors in determining whether we believe a market for a financial instrument is active or inactive. Among these factors include:

whether there has been any trades within past 30 days of the reporting date;

the volume of the trades within this 30 day period; and

the degree which the implied yields for a debt security for observed transactions differs from our understanding of the current relevant market rates and information.

Revenue Recognition

Premiums. Premiums from long-term insurance contracts are recognized as revenue when due from the policyholders.

Premiums from the sale of short-term accident and health insurance contracts are recorded when written and are accreted to earnings on a pro-rata basis over the term of the related policy coverage.

Policy fee income. Revenue from investment contracts is recognized as policy fee income, which consists of various fee income (including handling fees and management fees) over the period during which service is provided. Policy fee income net of acquisition cost is deferred as unearned revenue and amortized over the expected life of the contracts. Policy fee income is presented as other income.

Investment income. Investment income is comprised of interest income from term deposits, cash and cash equivalents, debt securities, securities purchased under agreements to resell, loans and dividend income from equity securities. Interest income is recorded on an accrual basis using the effective interest rate method. Dividend income is recognized when the right to receive a dividend payment is established.

Deferred taxation

Deferred income tax is recognized, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. Substantively enacted tax rates are used in the determination of deferred income tax.

Deferred income tax assets are recognized to the extent that it is probable that future taxable profit will be available against which the reversal of temporary differences can be recognized.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, associates and joint ventures except where the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

Table of Contents**Recently Issued Accounting Standards**

The following standards and amendments are adopted by us for the first time for the financial year beginning on January 1, 2017.

Standards/Amendments	Content	Effective for annual periods beginning on or after
IAS 7 Amendments	<i>Disclosure Initiative</i>	1 January 2017
IAS 12 Amendments	<i>Recognition of Deferred Tax Assets for Unrealized Losses</i>	1 January 2017
IFRS 12 Amendments included in Annual Improvements to IFRSs	<i>Disclosure of Interests in Other Entities</i>	1 January 2017
2014-2016 Cycle		
<i>IAS 7 Amendments</i>	<i>Disclosure Initiative</i>	

The amendments to IAS 7 Statement of Cash Flows require an entity to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes.

IAS 12 Amendments Recognition of Deferred Tax Assets for Unrealized Losses

The amendments to IAS 12 clarify that an entity, when assessing whether taxable profits will be available against which it can utilize a deductible temporary difference, needs to consider whether tax law restricts the sources of taxable profits against which it may make deductions on the reversal of that deductible temporary difference. Furthermore, the amendments provide guidance on how an entity should determine future taxable profits and explain the circumstances in which taxable profit may include the recovery of some assets for more than their carrying amount. The Group applied the amendments retrospectively. However, their application has no impact on the Group's financial position and performance, as the accounting treatment of the Group for the previous period was consistent with the clarification in these amendments.

IFRS 12 Amendments Disclosure of Interests in Other Entities

The amendments to IFRS 12 clarify that the disclosure requirements in IFRS 12, other than those disclosure requirements in paragraphs B10 to B16 of IFRS 12, apply to an entity's interest in a subsidiary, a joint venture or an associate, or a portion of its interest in a joint venture or an associate that is classified as held for sale or included in a disposal group classified as held for sale. The amendments have had no impact on the Group's consolidated financial statements as the Group has no interest in a subsidiary, a joint venture or an associate that is classified as held for sale.

Table of Contents

The following standards and amendments are not yet effective and have not been early adopted by the Group for the financial year beginning on January 1, 2017.

Total	540,781	643,355

Table of Contents***Net Premiums Earned***

Net premiums earned increased by RMB 80,680 million, or 18.9%, to RMB 506,910 million in 2017 from RMB 426,230 million in 2016.

Life Insurance Business

Net premiums earned from life insurance business increased by RMB 67,618 million, or 18.7%, to RMB 429,267 in 2017 from RMB 361,649 million in 2016. This was primarily due to a rapid increase in renewals and first-year regular premiums.

Health Insurance Business

Net premiums earned from health insurance business increased by RMB 12,733 million, or 25.2 %, to RMB 63,323 million in 2017 from RMB 50,590 million in 2016. This was primarily due to rapid development in protection-oriented businesses.

Accident Insurance Business

Net premiums earned from accident insurance business increased by RMB 329 million, or 2.4%, to RMB 14,320 million in 2017 from RMB 13,991 million in 2016.

Investment Income

Investment income increased by RMB 13,580 million, or 12.4%, from RMB 109,147 million in 2016 to RMB 122,727 million in 2017.

Investment Income from Securities at Fair Value through Profit or Loss

Investment income from securities at fair value through profit or loss decreased by RMB 1,672 million, or 26.9%, to RMB 4,538 million in 2017 from RMB 6,210 million in 2016. This was primarily due to a decrease in interest income resulting from a decrease in investments in commercial papers in bonds at fair value through profit or loss.

Investment Income from Available-for-Sale Securities

Investment income from available-for-sale securities increased by RMB 9,384million, or 25.2%, to RMB 46,627 million in 2017 from RMB 37,243 million in 2016. This was primarily due to an increase in dividend income from available-for-sale equity investments.

Investment Income from Held-to-Maturity Securities

Investment income from held-to-maturity securities increased by RMB 5,815 million, or 23.4%, to RMB 30,669 million in 2017 from RMB 24,854million in 2016. This was primarily due to an increase in interest income resulting from the increase in the allocation in financial bonds.

Table of Contents***Investment Income from Bank Deposits***

Investment income from bank deposits decreased by RMB 4,024 million, or 14.4%, to RMB 23,827 million in 2017 from RMB 27,851 million in 2016. This was primarily due to a decrease in interest income resulting from the decrease in the allocation in deposits.

Investment Income from Loans

Investment income from loans increased by RMB 4,302 million, or 35.8%, to RMB 16,320 million in 2017 from RMB 12,018 million in 2016. This was primarily due to an increase in interest income from the increase in the allocation in trust schemes.

Net Realized Gains on Financial Assets

Net realized gains on financial assets decreased by RMB 5,996 million, or 99.3%, to gains of RMB 42 million in 2017 from gains of RMB 6,038 million in 2016. This was primarily due to a decrease in spread income of stocks and funds in available-for-sale securities.

Net Fair Value Gains through Profit or Loss

Net fair value gains through profit or loss increased by RMB 13,277 million to gains of RMB 6,183 million in 2017 from losses of RMB 7,094 million in 2016. This was primarily due to an increase in spread income and fair value of stocks in securities at fair value through profit or loss.

Other Income

Other income increased by RMB 1,033million, or 16.0%, to RMB 7,493million in 2017 from RMB 6,460million in 2016. This was primarily due to an increase in the commission fees earned from CLPCIC.

Benefits, Claims and Expenses	For the year ended December 31,

Accident insurance business	5,610	6,009
Total	407,045	466,043

Table of Contents***Insurance Benefits and Claims Expenses***

Insurance benefits and claims, net of amounts ceded through reinsurance, increased by RMB 58,998 million, or 14.5%, to RMB 466,043 million in 2017 from RMB 407,045 million in 2016.

Life insurance death and other benefits payouts increased by RMB 6,551 million, or 2.6%, to RMB 259,708 million in 2017 from RMB 253,157 million in 2016. This was primarily due to an increase in surrenders. Accident and health claims and claim adjustment expenses increased by RMB 6,549 million, or 24.0%, to RMB 33,818 million in 2017 from RMB 27,269 million in 2016. This was primarily due to an increase in the volume of short-term health insurance and accident insurance business. Increase in insurance contracts liabilities increased by RMB 45,898 million, or 36.2%, to RMB 172,517 million in 2017 from RMB 126,619 million in 2016. This was primarily due to an increase in the scale of insurance business.

Life Insurance Business

Insurance benefits and claims expenses attributable to life insurance business increased by RMB 48,488 million, or 13.4%, to RMB 409,410 million in 2017 from RMB 360,922 million in 2016. This was primarily due to an increase in the scale of life insurance business.

Health Insurance Business

Insurance benefits and claims expenses attributable to health insurance business increased by RMB 10,111 million, or 25.0%, to RMB 50,624 million in 2017 from RMB 40,513 million in 2016. This was primarily due to an increase in the scale of health insurance business.

Accident Insurance Business

Insurance benefits and claims expenses attributable to accident insurance business increased by RMB 399 million, or 7.1%, to RMB 6,009 million in 2017 from RMB 5,610 million in 2016. This was primarily due to fluctuation in claims expenses of certain businesses.

Investment Contract Benefits

Investment contract benefits increased by RMB 2,760 million, or 51.9%, to RMB 8,076 million in 2017 from RMB 5,316 million in 2016. This was primarily due to an increase in the scale of investment contracts.

Policyholder Dividends Resulting from Participation in Profits

Policyholder dividends resulting from participation in profits increased by RMB 5,988 million, or 37.7%, to RMB 21,871 million in 2017 to RMB 15,883 million in 2016. This was primarily due to an increase in investment yields from participating accounts.

Underwriting and Policy Acquisition Costs

Underwriting and policy acquisition costs increased by RMB 12,767 million, or 24.5%, to RMB 64,789 million in 2017 from RMB 52,022 million in 2016. This was primarily due to an increase in underwriting costs for regular premium business due to the growth of our business and the optimization of our business structure.

Table of Contents***Finance Costs***

Finance costs decreased by RMB 166 million, or 3.5%, to RMB 4,601 million in 2017 from RMB 4,767 million in 2016. This was primarily due to a decrease in interest paid due to redemptions of subordinated debts.

Administrative Expenses

Administrative expenses include employees' remuneration and other administrative expenses. Administrative expenses increased by RMB 4,099 million, or 12.9%, to RMB 35,953 million in 2017 from RMB 31,854 million in 2016. This was primarily due to the growth of our business.

Other Expenses

Other expenses increased by RMB 1,567 million, or 32.2%, to RMB 6,426 million in 2017 from RMB 4,859 million in 2016. This was primarily due to payables to third party holders of consolidated structured entities and the change of foreign exchange rates applicable to the currency for foreign assets and liabilities.

Profit	For the year ended December 31,	
	2016	2017
	RMB	RMB
	(in millions)	
Profit before income tax	23,842	41,671
Life insurance business	14,732	29,315
Health insurance business	2,093	3,246
Accident insurance business	852	528
Other businesses	6,165	8,582
Income tax	4,257	8,919
Net profit attributable to equity holders of the company	19,127	32,253

Profit before Income Tax

Our profit before income tax increased by RMB 17,829 million, or 74.8%, to RMB 41,671 million in 2017 from RMB 23,842 million in 2016.

Life Insurance Business

Profit before income tax in the life insurance business increased by RMB 14,583 million, or 99.0%, to RMB 29,315 million in 2017 from RMB 14,732 million in 2016. This was primarily due to a relatively rapid increase in investment income and the impact of the update of discount rate assumptions for reserves for traditional insurance contracts.

Health Insurance Business

Profit before income tax in the health insurance business increased by RMB 1,153 million, or 55.1%, to RMB 3,246 million in 2017 from RMB 2,093 million in 2016. This was primarily due to an increase in investment income.

Table of Contents***Accident Insurance Business***

Profit before income tax in the accident insurance business decreased by RMB 324 million, or 38.0%, to RMB 528 million in 2017 from RMB 852 million in 2016. This was primarily due to fluctuation in claims expenses of certain businesses.

Other Business

Profit before income tax in other business increased by RMB 2,417 million, or 39.2%, to RMB 8,582 million in 2017 from RMB 6,165 million in 2016. This was primarily due to an increase in net share of profit of associates and joint ventures.

Income Tax

We pay income tax according to applicable Chinese enterprise income tax regulations and rules. Income tax increased by RMB 4,662 million or 109.5%, to RMB 8,919 million in 2017 from RMB 4,257 million in 2016. This was primarily due to the combined impact of taxable income and deferred tax.

Net Profit Attributable to Equity Holders of the Company

For the reasons set forth above, net profit attributable to equity holders of the Company increased by RMB 13,126 million, or 68.6%, to RMB 32,253 million in 2017 from RMB 19,127 million in 2016. This was primarily due to an increase in the investment income and the impact of the update of discount rate assumptions for reserves of traditional insurance contracts.

Major Assets	As of December 31,

Other assets	123,902	144,467
Total	2,696,951	2,897,591

Investment Assets

Our total investment assets increased by RMB 138,369 million, or 5.6%, to RMB 2,591,652 million as of December 31, 2017 from RMB 2,453,283 million as of December 31, 2016.

Term Deposits

Term deposits decreased by RMB 88,925 million, or 16.5%, to RMB 449,400 million as of December 31, 2017 from RMB 538,325 million as of December 31, 2016. This was primarily due to the maturity of certain term deposits.

Table of Contents***Held-to-Maturity Securities***

Held-to-maturity securities increased by RMB 122,307 million, or 20.6%, to RMB 717,037 million as of December 31, 2017 from RMB 594,730 million as of December 31, 2016. This was primarily due to an increase in the allocation in financial bonds.

Available-for-Sale Securities

Available-for-sale securities increased by RMB 44,311 million, or 5.8%, to RMB 810,734 million as of December 31, 2017 from RMB 766,423 million as of December 31, 2016. This was primarily due to an increase in the allocation in stocks in available-for-sale securities.

Securities at Fair Value Through Profit or Loss

Securities at fair value through profit or loss decreased by RMB 72,315 million, or 34.6%, to RMB 136,809 million as of December 31, 2017 from RMB 209,124 million as of December 31, 2016. This was primarily due to a decrease in the allocation in commercial papers in bonds at fair value through profit or loss.

Cash and Cash Equivalents

Cash and cash equivalents decreased by RMB 18,460 million, or 27.5%, to RMB 48,586 million as of December 31, 2017 from RMB 67,046 million as of December 31, 2016. This was primarily due to the needs for liquidity management.

Loans

Loans increased by RMB 156,931 million, or 69.3%, to RMB 383,504 million as of December 31, 2017 from RMB 226,573 million as of December 31, 2016. This was primarily due to an increase in the allocation in trust schemes in loans.

Investment Properties

Investment properties increased by RMB 1,873 million, or 157.3%, to RMB 3,064 million as of December 31, 2017 from RMB 1,191 million as of December 31, 2016. This was primarily due to an increase in investment properties.

Investments in associates and joint ventures

Our investments in associates and joint ventures increased by RMB 41,706 million, or 34.8%, to RMB 161,472 million as of December 31, 2017 from RMB 119,766 million as of December 31, 2016. This primarily reflected our new investments in associates and joint ventures.

Major Liabilities

As of December 31,
2016 2017
RMB RMB
(in millions)

Liabilities

Edgar Filing: CHINA LIFE INSURANCE CO LTD - Form 20-F

Insurance contracts	1,847,986	2,025,133
Investment contracts	195,706	232,500
Securities sold under agreements to repurchase	81,088	87,309
Policyholder dividends payable	87,725	83,910

Interest-bearing loans and borrowings	16,170	18,794
Bonds payable	37,998	
Deferred tax liabilities	7,768	4,871
Other liabilities	75,824	74,944
Total	2,389,303	2,572,281

Table of Contents***Liabilities***

Our total liabilities increased by RMB 182,978 million, or 7.7%, to RMB 2,572,281 million as of December 31, 2017 from RMB 2,389,303 million as of December 31, 2016.

Insurance Contracts

Liabilities of insurance contracts increased by RMB 177,147 million, or 9.6%, to RMB 2,025,133 million as of December 31, 2017 from RMB 1,847,986 million as of December 31, 2016. This was primarily due to the accumulation of insurance liabilities from new insurance business and renewal business. As at the date of the statement of financial position, our insurance contracts reserves passed liability adequacy testing.

Investment Contracts

The account balance of investment contracts increased by RMB 36,794 million, or 18.8%, to RMB 232,500 million as of December 31, 2017 from RMB 195,706 million as of December 31, 2016. This was primarily due to an increase in the scale of certain investment contracts.

Securities Sold under Agreements to Repurchase

Securities sold under agreements to repurchase increased by RMB 6,221 million, or 7.7%, to RMB 87,309 million as of December 31, 2017 from RMB 81,088 million as of December 31, 2016. This was primarily due to the needs for liquidity management.

Policyholder Dividends Payable

Policyholder dividends payable decreased by RMB 3,815 million, or 4.3%, to RMB 83,910 million as of December 31, 2017 from RMB 87,725 million as of December 31, 2016. This was primarily due to dividends paid to policyholders.

Annuity and Other Insurance Balances Payable

Annuity and other insurance balances payable increased by RMB 5,782 million, or 14.8%, to RMB 44,820 million as of December 31, 2017 from RMB 39,038 million as of December 31, 2016. This was primarily due to an increase in maturities payable.

Interest-bearing Loans and Borrowings

Our borrowings in foreign currency increased in 2017. Interest-bearing loans and other borrowings include a five-year bank loan of GBP275 million with a maturity date on June 17, 2019, a three-year bank loan of US\$ 970 million with a maturity date on September 27, 2019, a three-year bank loan of US\$ 940 million with a maturity date on September 30, 2019 and a one-month bank loan of EUR100 million with a maturity date on January 11, 2018, all of which are fixed rate loans, and a three-year loan of EUR400 million with a maturity date on December 6, 2020, which is a floating rate loan.

Table of Contents***Bonds Payable***

Bonds payable as of December 31, 2016 were RMB 37,998 million, and there were no bonds payable as of December 31, 2017. The reduction in bonds payable was primarily due to redemption of subordinated debts.

Deferred Tax Liabilities

Deferred tax liabilities decreased by RMB 2,897 million, or 37.3%, to RMB 4,871 million as of December 31, 2017 from RMB 7,768 million as of December 31, 2016. This was primarily due to the decrease in the fair value of available-for-sale securities.

Equity Attributable to Equity Holders of the Company

As of December 31, 2017, equity attributable to our equity holders was RMB 320,933 million, an increase of RMB 17,312 million, or 5.7%, from RMB 303,621 million as of December 31, 2016. This was primarily due to the combined effect of an increase in total comprehensive income and profit distributions during 2017.

Year Ended December 31, 2016 Compared with Year Ended December 31, 2015

Other income	5,060	6,460
Total	507,449	540,781

Net Premiums Earned

Net premiums earned increased by RMB 63,929 million, or 17.6%, to RMB 426,230 million in 2016 from RMB 362,301 million in 2015.

Table of Contents

Life Insurance Business

Net premiums earned from life insurance business increased by RMB 53,568 million, or 17.4%, to RMB 361,649 million in 2016 from RMB 308,081 million in 2015. This was primarily due to an increase in first-year regular premiums and renewals.

Health Insurance Business

Net premiums earned from health insurance business increased by RMB 9,735 million, or 23.8 %, to RMB 50,590 million in 2016 from RMB 40,855 million in 2015. This was primarily due to our increased efforts in developing the health insurance business to meet market demand.

Accident Insurance Business

Net premiums earned from accident insurance business increased by RMB 626 million, or 4.7%, to RMB 13,991 million in 2016 from RMB 13,365 million in 2015. This was primarily due to further optimization of our business structure and a decrease in sales of certain products with high claim settlement ratios.

Investment Income

Investment income increased by RMB 11,565 million, or 11.9%, to RMB 109,147 million in 2016 from RMB 97,582 million in 2015.

Investment Income from Securities at Fair Value through Profit or Loss

Investment income from securities at fair value through profit or loss increased by RMB 4,502 million, or 263.6%, to RMB 6,210 million in 2016 from RMB 1,708 million in 2015. This was primarily due to an increase in interest income resulting from increased investments in trading bonds, principally commercial paper and corporate bonds.

Investment Income from Available-for-Sale Securities

Investment income from available-for-sale securities increased by RMB 9,767 million, or 35.5%, to RMB 37,243 million in 2016 from RMB 27,476 million in 2015. This was primarily due to an increase in dividend income from available-for-sale equity investments.

Investment Income from Held-to-Maturity Securities

Investment income from held-to-maturity securities increased by RMB 313 million, or 1.3%, to RMB 24,854 million in 2016 from RMB 24,541 million in 2015. This was primarily due to an increase in the allocation in bonds offset in part by a decrease in the rate of return on reinvested funds and new investments in the low interest rate environment.

Investment Income from Bank Deposits

Investment income from bank deposits decreased by RMB 4,434 million, or 13.7%, to RMB 27,851 million in 2016 from RMB 32,285 million in 2015. This was primarily due to a decrease in the allocation of negotiated deposits, and a decrease in the rate of return for new investments in the low interest rate environment.

Table of Contents***Investment Income from Loans***

Investment income from loans increased by RMB 903 million, or 8.1%, to RMB 12,018 million in 2016 from RMB 11,115 million in 2015. This was primarily due to an increase in investments in other loans, which mainly consist of our investments in different types of asset management products.

Net Realized Gains on Financial Assets

Net realized gains on financial assets decreased by RMB 26,259 million, or 81.3%, to gains of RMB 6,038 million in 2016 from gains of RMB 32,297 million in 2015. This was primarily due to a significant decrease in spread income of stocks and securities investment funds resulting from fluctuations in the capital markets.

Net Fair Value Gains through Profit or Loss

Net fair value gains through profit or loss decreased by RMB 17,303 million to losses of RMB 7,094 million in 2016 from gains of RMB 10,209 million in 2015. This was primarily due to a significant decrease in spread income of stocks resulting from fluctuations in the capital markets.

Other Income

Other income increased by RMB 1,400 million, or 27.7%, to RMB 6,460 million in 2016 from RMB 5,060 million in 2015. This was primarily due to an increase in the commission fees earned from CLPCIC.

Edgar Filing: CHINA LIFE INSURANCE CO LTD - Form 20-F

Life insurance business	313,612	360,922
Health insurance business	34,398	40,513
Accident insurance business	4,209	5,610
Total	352,219	407,045

Table of Contents***Insurance Benefits and Claims Expenses***

Insurance benefits and claims, net of amounts ceded through reinsurance, increased by RMB 54,826 million, or 15.6%, to RMB 407,045 million in 2016 from RMB 352,219 million in 2015.

Life insurance death and other benefits payouts increased by RMB 31,456 million, or 14.2%, to RMB 253,157 million in 2016 from RMB 221,701 million in 2015. This was primarily due to an increase in maturities payable of life insurance business and annuity benefits. Accident and health claims and claim adjustment expenses increased by RMB 6,260 million, or 29.8%, to RMB 27,269 million in 2016 from RMB 21,009 million in 2015. This was primarily due to an increase in the volume of short-term health insurance and accident insurance business. Increase in insurance contracts liabilities increased by RMB 17,110 million, or 15.6%, to RMB 126,619 million in 2016 from RMB 109,509 million in 2015. This was primarily due to an increase in the scale of insurance business.

Life Insurance Business

Insurance benefits and claims expenses attributable to life insurance business increased by RMB 47,310 million, or 15.1%, to 360,922 million in 2016 from RMB 313,612 million in 2015. This was primarily due to an increase in maturities payable and annuity payments in our life insurance business.

Health Insurance Business

Insurance benefits and claims expenses attributable to health insurance business increased by RMB 6,115 million, or 17.8%, to RMB 40,513 million in 2016 from RMB 34,398 million in 2015. This was primarily due to an increase in the scale of health insurance business.

Accident Insurance Business

Insurance benefits and claims expenses attributable to accident insurance business increased by RMB 1,401 million, or 33.3%, to RMB 5,610 million in 2016 from RMB 4,209 million in 2015. This was primarily due to the increase of claims expenses for certain businesses.

Investment Contract Benefits

Investment contract benefits increased by RMB 3,052 million, or 134.8%, to RMB 5,316 million in 2016 from RMB 2,264 million in 2015. This was primarily due to an increase in the scale of investment contracts.

Policyholder Dividends Resulting from Participation in Profits

Policyholder dividends resulting from participation in profits decreased by RMB 17,608 million, or 52.6%, to RMB 15,883 million in 2016 to RMB 33,491 million in 2015. This was primarily due to a decrease in investment yields for participating products.

Underwriting and Policy Acquisition Costs

Underwriting and policy acquisition costs increased by RMB 16,453 million, or 46.3%, to RMB 52,022 million in 2016 from RMB 35,569 million in 2015. This was primarily due to an increase in underwriting costs for first-year regular premium business resulting from the growth of our business and the optimization of our business structure.

Table of Contents***Finance Costs***

Finance costs increased by RMB 447 million, or 10.3%, to RMB 4,767 million in 2016 from RMB 4,320 million in 2015. This was primarily due to an increase in interest income from securities sold under agreements to repurchase.

Administrative Expenses

Administrative expenses include employees' remuneration and other administrative expenses. Administrative expenses increased by RMB 4,396 million, or 16%, to RMB 31,854 million in 2016 from RMB 27,458 million in 2015. This was primarily due to the growth of our business.

Other Expenses

Other expenses decreased by RMB 2,569 million, or 34.6%, to RMB 4,859 million in 2016 from RMB 7,428 million in 2015. This was primarily due to the fact that our income from financial and insurance services has been subject to value-added tax instead of business taxes since May 1, 2016.

Profit	For the year ended December 31,	
	2015	2016
	RMB	RMB
	(in millions)	
Profit before income tax	45,931	23,842
Life insurance business	40,921	14,732
Health insurance business	557	2,093
Accident insurance business	1,753	852
Other businesses	2,700	6,165
Income tax	10,744	4,257
Net profit attributable to equity holders of the company	34,699	19,127

Profit before Income Tax

Our profit before income tax decreased by RMB 22,089 million, or 48.1%, to RMB 23,842 million in 2016 from RMB 45,931 million in 2015.

Life Insurance Business

Profit before income tax in the life insurance business decreased by RMB 26,189 million, or 64.0%, to RMB 14,732 million in 2016 from RMB 40,921 million in 2015. This was primarily due to a decrease in gross investment income and the impact of the update of discount rate assumptions for reserves for traditional insurance contracts.

Health Insurance Business

Profit before income tax in the health insurance business increased by RMB 1,536 million, or 275.8%, to RMB 2,093 million in 2016 from RMB 557 million in 2015. This was primarily due to the improvement of the business structure of our health insurance.

Table of Contents***Accident Insurance Business***

Profit before income tax in the accident insurance business decreased by RMB 901 million, or 51.4%, to RMB 852 million in 2016 from RMB 1,753 million in 2015. This was primarily due to an increase in claims expenses.

Other Business

Profit before income tax in other business increased by RMB 3,465 million, or 128.3%, to RMB 6,165 million in 2016 from RMB 2,700 million in 2015. This was primarily due to an increase in net share of profit of associates and joint ventures.

Income Tax

We pay income tax according to applicable Chinese enterprise income tax regulations and rules. Income tax decreased by RMB 6,487 million or 60.4%, to RMB 4,257 million in 2016 from RMB 10,744 million in 2015. This was primarily due to the combined impact of taxable income and deferred tax.

Net Profit Attributable to Equity Holders of the Company

For the reasons set forth above, net profit attributable to equity holders of the Company decreased by RMB 15,572 million, or 44.9%, to RMB 19,127 million in 2016 from RMB 34,699 million in 2015. This was primarily due to the decrease in gross investment income and the impact of the update of discount rate assumptions for reserves for traditional insurance contracts.

Major Assets	As of December 31,	
	2015	2016
	RMB	RMB
	(in millions)	
Investment assets	2,287,639	2,453,283
Term deposits	562,622	538,325

Other assets	113,501	123,902
Total	2,448,315	2,696,951

Investment Assets

Our total investment assets increased by RMB 165,644 million, or 7.2%, to RMB 2,453,283 million as of December 31, 2016 from RMB 2,287,639 million as of December 31, 2015.

Table of Contents***Term Deposits***

Term deposits decreased by RMB 24,297 million, or 4.3%, to RMB 538,325 million as of December 31, 2016 from RMB 562,622 million as of December 31, 2015. This was primarily due to a decrease in the scale of negotiated deposits.

Held-to-Maturity Securities

Held-to-maturity securities increased by RMB 90,655 million, or 18.0%, to RMB 594,730 million as of December 31, 2016 from RMB 504,075 million as of December 31, 2015. This was primarily due to an increase in the allocation in bonds.

Available-for-Sale Securities

Available-for-sale securities decreased by RMB 4,093 million, or 0.5%, to RMB 766,423 million as of December 31, 2016 from RMB 770,516 million as of December 31, 2015.

Securities at Fair Value Through Profit or Loss

Securities at fair value through profit or loss increased by RMB 71,134 million, or 51.6%, to RMB 209,124 million as of December 31, 2016 from RMB 137,990 million as of December 31, 2015. This was primarily due to increased investments in listed bonds, principally commercial paper and corporate bonds.

Cash and Cash Equivalents

Cash and cash equivalents decreased by RMB 9,050 million, or 11.9%, to RMB 67,046 million as of December 31, 2016 from RMB 76,096 million as of December 31, 2015. This was primarily due to the needs for liquidity management.

Loans

Loans increased by RMB 19,306 million, or 9.3%, to RMB 226,573 million as of December 31, 2016 from RMB 207,267 million as of December 31, 2015. This was primarily due to an increase in investments in policy loans and other loans, which mainly consist of our investments in different types of asset management products.

Investment Properties

Investment properties decreased by RMB 46 million, or 3.7%, to RMB 1,191 million as of December 31, 2016 from RMB 1,237 million as of December 31, 2015. This was primarily due to depreciation of investment properties.

Investments in associates and joint ventures

Our investments in associates and joint ventures increased by RMB 72,591 million, or 153.9%, to RMB 119,766 million as of December 31, 2016 from RMB 47,175 million as of December 31, 2015. This primarily reflected our new investments in associates and joint ventures and an increase in interests in associates.

Table of Contents

Major Liabilities	As of December 31,	
	2015	2016
	RMB	RMB
	(in millions)	
Liabilities		
Insurance contracts	1,715,985	1,847,986
Investment contracts	84,106	195,706
Securities sold under agreements to repurchase	31,354	81,088
Policyholder dividends payable	107,774	87,725
Annuity and other insurance balances payable	30,092	39,038
Interest-bearing loans and borrowings	2,643	16,170
Bonds payable	67,994	37,998
Deferred tax liabilities	16,953	7,768
Other liabilities	65,200	75,824
Total	2,122,101	2,389,303

Liabilities

Our total liabilities increased by RMB 267,202 million, or 12.6%, to RMB 2,389,303 million as of December 31, 2016 from RMB 2,122,101 million as of December 31, 2015.

Insurance Contracts

Liabilities of insurance contracts increased by RMB 132,001 million, or 7.7%, to RMB 1,847,986 million as of December 31, 2016 from RMB 1,715,985 million as of December 31, 2015. This was primarily due to the accumulation of insurance liabilities from new insurance business and renewal business. As at the date of the statement of financial position, our insurance contracts reserves passed liability adequacy testing.

Investment Contracts

The account balance of investment contracts increased by RMB 111,600 million, or 132.7%, to RMB 195,706 million as of December 31, 2016 from RMB 84,106 million as of December 31, 2015. This was primarily due to an increase in the scale of certain investment contracts.

Securities Sold under Agreements to Repurchase

Securities sold under agreements to repurchase increased by RMB 49,734 million, or 158.6%, to RMB 81,088 million as of December 31, 2016 from RMB 31,354 million as of December 31, 2015. This was primarily due to the needs for liquidity management.

Policyholder Dividends Payable

Policyholder dividends payable decreased by RMB 20,049 million, or 18.6%, to RMB 87,725 million as of December 31, 2016 from RMB 107,774 million as of December 31, 2015. This was primarily due to a decrease in investment yields of participating products.

Annuity and Other Insurance Balances Payable

Annuity and other insurance balances payable increased by RMB 8,946 million, or 29.7%, to RMB 39,038 million as of December 31, 2016 from RMB 30,092 million as of December 31, 2015. This was primarily due to an increase in maturities payable.

Table of Contents***Interest-bearing Loans and Borrowings***

Our borrowings in foreign currency increased in 2016. Interest-bearing loans and other borrowings include a five-year bank loan of GBP 275 million with a maturity date of June 17, 2019, a three-year bank loan of US\$ 948 million with a maturity date of September 27, 2019, a three-year bank loan of US\$ 940 million with a maturity date of September 30, 2019 and a six-month bank loan of EUR100 million with a maturity date of June 9, 2017. All these loans are fixed rate loans.

Bonds Payable

Bonds payable decreased by RMB 29,996 million, or 44.1%, to RMB 37,998 million as of December 31, 2016 from RMB 67,994 million as of December 31, 2015. This was primarily due to redemption of some of our subordinated term debts.

Deferred Tax Liabilities

Deferred tax liabilities decreased by RMB 9,185 million, or 54.2%, to RMB 7,768 million as of December 31, 2016 from RMB 16,953 million as of December 31, 2015. This was primarily due to the decrease in the fair value of available-for-sale securities.

Equity Attributable to Equity Holders of the Company

As of December 31, 2016, equity attributable to our equity holders was RMB 303,621 million, a decrease of RMB 18,871 million, or 5.9%, from RMB 322,492 million as of December 31, 2015. This was primarily due to profit distributions and the decrease in total comprehensive income during 2016.

B. LIQUIDITY AND CAPITAL RESOURCES**Liquidity Sources**

Our principal cash inflows come from insurance premiums, deposits from investment contracts, proceeds from sales and maturity of investment assets and investment income. The primary liquidity risks with respect to these cash inflows are the risk of surrenders by contract holders and policyholders, as well as the risks of default by debtors, interest rate changes and other market volatilities. We closely monitor and manage these risks. See Item 4. Information on the Company Business Overview Investments .

Our cash and bank deposits provide us with a source of liquidity to meet normal cash outflows. As of December 31, 2017, the amount of cash and cash equivalents was RMB 48,586 million. In addition, substantially all of our term deposits with banks allow us to withdraw funds on deposit, subject to a penalty interest charge. As of December 31, 2017, the amount of term deposits was RMB 449,400 million.

Our investment portfolio also provides us with a source of liquidity to meet unexpected cash outflows. We are also subject to market liquidity risk due to the large size of our investments in some of the markets in which we invest. In some circumstances, some of our holdings of investment securities may be large enough to have an influence on the market value. These factors may adversely affect our ability to sell these investments at an adequate price, or at all.

Table of Contents

Liquidity Uses

Our principal cash outflows primarily relate to the payables for the liabilities associated with our various life insurance, annuity, accident insurance and health insurance products, operating expenses, income taxes and dividends that may be declared and paid to our shareholders. Cash outflows arising from our insurance activities primarily relate to benefit payments under these insurance products, as well as payments for policy surrenders, policy withdrawals and policy loans.

We believe that our sources of liquidity are sufficient to meet our current cash requirements.

Consolidated Cash Flows

We have established a cash flow testing system and conduct regular tests to monitor the cash inflows and outflows under various changing circumstances and adjust accordingly the asset portfolio to ensure sufficient sources of liquidity.

Net cash flow from operating activities amounted to a net inflow of RMB 200,990 million (US\$ 30,892 million) in 2017. Net cash flow from operating activities amounted to a net inflow of RMB 89,098 million in 2016. The change was primarily due to the change in the scale of securities at fair value through profit or loss.

Net cash flow from investing activities amounted to a net outflow of RMB 173,676 million (US\$ 26,694 million) in 2017. Net cash flow from investing activities amounted to a net outflow of RMB 104,703 million in 2016. This change was primarily due to the adjustment of investment asset structure and an increase in the allocation of bonds with long duration and debt-type financial products.

Net cash flow from financing activities amounted to net outflow of RMB 45,595 million (US\$ 7,008 million) in 2017. Net cash flow from financing activities amounted to a net inflow of RMB 6,270 million in 2016. This change was primarily due to the change in account balance of securities sold under agreements to repurchase from time to time as a result of liquidity management activities.

Our global share offering in December 2003 provided cash proceeds of approximately RMB 24,707 million (US\$ 3,062 million). As of the date of this annual report, a part of the cash proceeds from our global offering was held in bank deposit accounts denominated in foreign currencies in China, and part of the cash proceeds was invested in securities listed on overseas stock exchanges, multi-asset portfolios and private equity funds. We invested approximately US\$ 433 million, in addition to RMB 2,282 million, in Guangdong Development Bank in December 2006. We used a total of approximately HK\$ 12 billion for investments in Sino-Ocean Land Holdings Limited in 2009, 2010 and 2013. As of December 31, 2017, we had engaged 13 investment managers to manage US\$ 1,600 million for investment in overseas public markets.

Our A share offering in December 2006 provided cash proceeds of approximately RMB 27,810 million. As at the end of 2017, the cash proceeds from our A share offering were used to increase our share capital.

Our issuance of Core Tier 2 Capital Securities in July 2015 provided cash proceeds of approximately US\$ 1,274 million. As at the end of 2017, cash proceeds from the issuance of Core Tier 2 Capital Securities were used to replenish our capital and raise our solvency ratio in accordance with applicable laws and approvals by regulatory authorities.

Table of Contents**Ratio of Assets and Liabilities**

Our ratio of assets and liabilities (total liabilities divided by total assets) as at December 31, 2017, 2016 and 2015 are as follows:

As at December 31, 2017 As at December 31, 2016 As at December 31, 2015

Ratio of assets and liabilities	86.68%	88.59%	88.77%
---------------------------------	--------	--------	--------

Insurance Solvency Requirements

We are required by CIRC regulation to maintain our solvency at a level in excess of minimum solvency levels. On January 1, 2016, the CIRC implemented a new set of solvency regulations, or C-ROSS, which replaced Solvency I. Under C-ROSS, the core solvency adequacy ratio of an insurer is calculated by dividing the core capital of an insurer by the minimum capital it is required to meet, and the comprehensive solvency adequacy ratio of an insurer is calculated by dividing the sum of core capital and supplementary capital of an insurer by the minimum capital it is required to meet. See Item 4. Information on the Company Business Overview Regulatory and Related Matters Insurance Company Regulation Solvency requirements . The following table shows our solvency as of December 31, 2015, 2016 and 2017:

As of December 31, 2017 As of December 31, 2016 As of December 31, 2015
(RMB in millions,
except percentage data)

Core capital	706,516	639,396	
Actual capital	706,623	677,768	282,820 ⁽¹⁾
Minimum capital	254,503	228,080	85,676 ⁽¹⁾
Core solvency ratio	277.61%	280.34%	
Comprehensive solvency ratio	277.65%	297.16%	330.10% ⁽²⁾

(1) Calculated under Solvency I.

(2) Refers to solvency ratio under Solvency I.

The decrease in our solvency ratio in 2017 was primarily due to the growth of our insurance business and the redemptions of our subordinated debts.

In the second half of 2016, the CIRC conducted a regulatory review under the new Solvency Aligned Risk Management Requirements and Assessment framework, or SARMRA, on the solvency and risk positions of life insurers and non-life insurers in China. We understand we received one of the highest scores among life insurers in China. In 2017, we were exempted from this regulatory review by the CIRC. The SARMRA score links the risk management practices of insurers with capital requirements.

We issued Core Tier 2 Capital Securities of US\$ 1,280 million in July 2015 by taking advantage of favorable market opportunities, which effectively improved our solvency ratio. The Core Tier 2 Capital Securities were issued to qualified investors who meet applicable regulatory requirements and have an initial distribution rate of 4.00%.

Table of Contents**Contractual Obligations and Commitments**

The following table sets out our contractual obligations and commitments as of December 31, 2017.

As of December 31, 2017	Not later than 1 year	Later than 1 year but not later than 3 years	Later than 3 years but not later than 5 years	Later than 5 years	Total
	<i>(RMB in millions)</i>				
Securities sold under agreements to repurchase	87,309				87,309
Bonds payable					
Annuity and other insurance balances payable	44,820				44,820
Insurance contracts	(16,319)	(221,905)	(47,109)	3,807,542	3,522,209
Investment contracts	15,308	29,981	26,892	388,320	460,501
Off balance sheet operating leases	784	855	246	44	1,929
Capital commitments	64,731	20,878	5,694	481	91,784
Total	196,633	(170,191)	(14,277)	4,196,387	4,208,552

Capital commitments mainly represent our commitments with respect to the acquisition of property, plant and equipment, and our investments.

The amounts set forth in the table above for insurance contracts and investment contracts in each column represent expected future cash inflows and outflows on policies in force as at December 31, 2017. The estimate is affected by numerous assumptions, including assumptions related to mortality, morbidity, surrenders and other expense assumptions. Many of these estimates are inherently uncertain and the actual experience may differ from our estimates.

Furthermore, as the expected future cashflows reported in the table above are not discounted from the date of payment back to December 31, 2017, the sum of the expected future cashflows are different from the amount of corresponding liabilities in our consolidated balance sheet as of December 31, 2017. Policyholder dividends will not become a contractual obligation until the applicable policy anniversary is reached and the dividend amount is credited to the policy benefit liability or paid to the policyholder, and hence are not included in the table above. Reinsurance recoveries have not been taken into account.

Other than as set forth under capital commitments, we had no material, individually or in the aggregate, purchase obligations as of December 31, 2017.

C. RESEARCH AND DEVELOPMENT, PATENTS AND LICENSES

None.

D. TREND INFORMATION

Please refer to our discussion in each section under Overview of Our Business , Factors Affecting Our Results of Operations , Critical Accounting Policies and Operating Results .

We review assumptions used in establishing reserves for long term insurance contracts and the impact of changes in these assumptions on our net profit. Changes in these assumptions might have a significant impact on our operating results. Changes in these assumptions resulted in a decrease of RMB 9,023 million in profit before income tax in 2017, a decrease of RMB 14,736 million in profit before income tax in 2016 and a decrease of RMB 9,497 million in profit before income tax in 2015. The sensitivity analysis of these assumptions is as follows:

holding all other variables constant, if mortality rates and morbidity rates were to increase or decrease from the current best estimate by 10%, pre-tax profit for the year would have been RMB 19,731 million lower or RMB 20,559 million higher, respectively.

Table of Contents

holding all other variables constant, if lapse rates were to increase or decrease from the current best estimate by 10%, pre-tax profit for the year would have been RMB 1,940 million lower or RMB 1,989 million higher, respectively.

holding all other variables constant, if the discount rates were 50 basis points higher or lower than the current best estimate, pre-tax profit for the year would have been RMB 70,732 million higher or RMB 80,152 million lower, respectively.

(3) Resigned as board secretary on April 27, 2017.

(4) Appointed as marketing director on August 24, 2017.

The aggregate amount of compensation we paid to our five highest paid individual employees, including one director and four supervisors during the year ended December 31, 2017, was approximately RMB 7.5676 million (US\$ 1.16 million). The amount of compensation we paid to our highest paid individual employee, during the year ended December 31, 2017, was approximately RMB 1.6558 million.

Senior Management Compensation

Our senior management's compensation consists of four components, including basic salaries, performance-based salaries, fringe benefits and mid to long-term incentive compensation.

We have set up a comprehensive performance management system. A performance appraisal method for our officers is used to appraise the performance of the officers annually. Measures for such appraisal include a business

performance index based on our budget and targets as approved by our board of directors; as well as a management performance index based on the duties and functions of the office position, establishing a connection between the achievement of our major business targets and the office performance appraisal.

Table of Contents

In accordance with relevant policies of the PRC government, no stock appreciation rights of our company were granted or exercised in 2017. For other details of the stock appreciation rights which were previously granted by us, please refer to Note 30 to our consolidated financial statements included elsewhere in this annual report.

C. BOARD PRACTICES

General

Our board of directors consists of eleven members. Our directors are elected to serve a term of three years, which is renewable upon re-election. Our directors are elected at meetings of our shareholders, and, unless they resign at an earlier date, are deceased or removed, will serve three-year terms. The current term for our board of directors began in May 2015. Our directors are not currently entitled to severance benefits other than benefits provided by law upon termination of employment. In the event our Company is acquired, including an acquisition of control by another person, and a director leaves employment or retires following the acquisition, the director may receive severance and other payments upon approval by the shareholders in general meeting.

We have identified various board members as being independent, in accordance with Hong Kong laws and regulations. These requirements vary in certain respects from independence requirements under U.S. law. The members of our audit committee are independent as defined by the rules of the Securities and Exchange Act and the New York Stock Exchange which are applicable to us.

The PRC company law requires a joint stock company with limited liability to establish a board of supervisors. Our board of supervisors is responsible for monitoring our financial matters and supervising the actions of our board of directors and our management personnel. Our board of supervisors consists of five members. At least one-third of our board of supervisors must be elected by our employees. The remaining members must be elected by our shareholders in a general meeting. One member of our board of supervisors is designated as the chairman. Members of our board of supervisors may not serve as director or member of senior management. The term of office for our supervisors is three years, which is renewable upon re-election. The current term for our board of supervisors began in May 2015.

Board Committees

We have established standing audit, nomination and remuneration, risk management and strategy and investment decision committees.

The primary duties of the audit committee are to review and supervise the financial reporting process, to assess the effectiveness of our internal control system, to supervise our internal audit system and its implementation and to implement and recommend the engagement or replacement of external auditors. Our audit committee is also responsible for communications between our internal and external auditors and our internal reporting system. Our audit committee is currently comprised of Robinson Drake Pike, Chang Tso Tung Stephen and Tang Xin. Mr. Robinson Drake Pike serves as the chairman.

The primary duties of the nomination and remuneration committee are to review the structure and components of our board of directors, to formulate the appointment and successors to our board of directors and senior management, to review and recommend the nomination of our directors and senior officers, as well as to propose to our board of directors the remuneration policy for our directors, supervisors and senior management. Our nomination and remuneration committee is currently comprised of Chang Tso Tung Stephen, Robinson Drake Pike and Yuan Changqing. Mr. Chang Tso Tung Stephen serves as the chairman.

Table of Contents

The primary duties of the risk management committee are to formulate our risk control benchmark system, to assist the management in establishing and improving our risk management and internal control system, to review our risk preference and tolerance policy, to formulate our risk management policy, to review the assessment reports with respect to our risk management and internal control, to conduct research on important findings from internal investigations with respect to risk management and internal control and management's responses to such findings and to coordinate and handle disagreements on risk management and sudden and significant risks or crises. Our risk management committee is currently comprised of Leung Oi-Sie Elsie, Xu Hengping, Yin Zhaojun and Liu Huimin. Ms. Leung-Oi-Sie Elsie serves as the chairman.

The primary duties of the strategy and investment decision committee are to formulate our long-term development strategies and significant investment and financing plans, to propose significant projects of capital operation and assets management, and to conduct research and make recommendations on other important matters that affect our development. Our strategy and investment decision committee is currently comprised of Tang Xin, Lin Dairen, Xu Haifeng and Leung Oi-Sie Elsie. Mr. Tang Xin serves as the chairman.

D. EMPLOYEES

As of December 31, 2015, 2016 and 2017 we had approximately 98,823, 99,739 and 102,297 employees, respectively. The following table sets forth the number of our employees by their functions as of December 31, 2015, 2016 and 2017.

	2015		As of December 31 2016		2017	
	Number of employees	% of total	Number of employees	% of total	Number of employees	% of total
Management and administrative staff	23,941	24.23%	21,868	21.93%	22,307	21.81%
Financial and auditing staff	5,373	5.44%	5,225	5.24%	5,122	5.01%
Sales and sales management staff	33,036	33.43%	36,091	36.19%	38,859	37.99%
Underwriters, claim specialists and customer service staff	29,330	29.68%	28,420	28.49%	27,960	27.33%
Other professional and technical staff ⁽¹⁾	2,674	2.71%	3,488	3.50%	4,106	4.01%
Other	4,469	4.52%	4,647	4.66%	3,943	3.85%
Total⁽²⁾	98,823	100%	99,739	100%	102,297	100%

(1) Includes actuaries, product development personnel, investment management personnel and information technology specialists.

(2) Includes employees of our subsidiaries.

As of December 31, 2015, 2016 and 2017, we had approximately 979,000, and 1,495,000 and 1,578,000 exclusive agents, respectively. During 2017, we attracted more new qualified agents by expanding our recruitment program,

making further efforts in training new qualified agents and strengthening sales support. In addition, in August 2015, the CIRC cancelled the qualification certificates requirements for the individual insurance agents, which helped to facilitate our recruitment process. However, we still adhered to our own standards for recruitment to ensure the quality and productivity of our exclusive agent force. See Item 4. Information on the Company Business Overview Regulatory and Related Matters Regulation of Insurance Agencies, Insurance Brokers and Other Intermediaries and Item 3. Key Information Risk Factors Risks Relating to Our Business Our growth is dependent on our ability to attract and retain productive agents .

Table of Contents

None of our employees is subject to collective bargaining agreements governing employment with us. We believe that our employee relations are satisfactory.

E. SHARE OWNERSHIP

As of the date of this annual report, none of our directors, supervisors or senior managers is a legal or beneficial owner of any shares of our share capital.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS.**A. MAJOR SHAREHOLDERS**

The table below sets forth information regarding the ownership of our share capital as of April 6, 2018 by all persons who are known to us to be the beneficial owners of 5% or more of each class of our share capital.

Title of Class	Identity of Person or Group	Amount Owned	Percentage of	
			Percentage of Class	Total Share Capital
A Shares	China Life Insurance (Group) Company	19,323,530,000 (Long position)	92.80%	68.37%
H Shares	BlackRock, Inc ⁽¹⁾	586,490,460 (Long position)	7.88%	2.07%
		4,751,000 (Short position)	0.06%	0.02%
H Shares	JPMorgan Chase & Co. ⁽²⁾	448,626,351 (Long position)	6.02%	1.59%
		257,389,776 (Short position)	3.45%	0.91%
		226,631,193 (Lending pool)	3.04%	0.80%

Note (1): BlackRock, Inc. was interested in a total of 586,490,460 H Shares in accordance with the provisions of Part XV of the SFO. Of these shares, BlackRock Investment Management, LLC, BlackRock Financial Management, Inc., BlackRock Institutional Trust Company, National Association, BlackRock Fund Advisors, BlackRock Advisors, LLC, BlackRock Japan Co., Ltd., BlackRock Asset Management Canada Limited, BlackRock Investment Management (Australia) Limited, BlackRock Asset Management North Asia Limited, BlackRock (Netherlands) B.V., BlackRock Advisors (UK) Limited, BlackRock International Limited, BlackRock Asset Management Ireland Limited, BLACKROCK (Luxembourg) S.A., BlackRock Investment Management (UK) Limited, BlackRock Asset Management Deutschland AG, BlackRock Fund Managers Limited, BlackRock Life Limited and BlackRock Asset Management (Schweiz) AG were interested in 3,612,000 H Shares, 7,646,000 H Shares, 151,500,414 H Shares, 208,387,000 H Shares, 1,237,000 H Shares, 33,634,819 H Shares, 1,145,000 H Shares, 2,214,000 H Shares, 24,789,271 H Shares, 1,074,000 H Shares, 5,370,492 H Shares, 2,932,700 H Shares, 57,047,918 H Shares, 21,537,555 H Shares, 26,650,053 H Shares, 494,000 H Shares, 11,012,339 H Shares, 26,163,899 H Shares and 42,000 H Shares respectively. All of these entities are either controlled or indirectly controlled subsidiaries of BlackRock, Inc. Of these 586,490,460 H Shares, 352,775 H Shares were cash

settled unlisted derivatives.

BlackRock, Inc. held by way of attribution a short position as defined under Part XV of the SFO in 4,751,000 H Shares

(0.06%). Of these 4,751,000 H Shares, 1,679,000 H Shares were cash settled unlisted derivatives.

Note (2): JPMorgan Chase & Co. was interested in a total of 448,626,351 H Shares in accordance with the provisions of Part XV of the SFO. Of these shares, J.P. Morgan Securities LLC, JF Asset Management Limited, JPMorgan Asset Management (Taiwan) Limited, J.P. Morgan Investment Management Inc., J.P. Morgan GT Corporation, J.P. Morgan Whitefriars LLC, J.P. Morgan Securities plc, JPMorgan Chase Bank, N.A., J.P. Morgan Chase Bank Berhad and JPMorgan Asset Management (UK) Limited were interested in 5,902,610 H Shares, 21,812,000 H Shares, 916,000 H Shares, 30,105,000 H Shares, 3,000,000 H Shares, 11,315 H Shares, 149,219,129 H Shares, 227,346,428 H Shares, 2,565,508 H Shares and 7,748,361 H Shares respectively. All of these entities are either controlled or indirectly controlled subsidiaries of JPMorgan Chase & Co.

Table of Contents

Included in the 448,626,351 H Shares are 226,631,193 H Shares (3.04%) which are held in the lending pool, as defined under Section 5(4) of the Securities and Futures (Disclosure of Interests Securities Borrowing and Lending) Rules. Of these 448,626,351 H Shares, 39,118,015 H Shares were physically settled listed derivatives, 218,000 H Shares were cash settled listed derivatives, 5,123,850 H Shares were physically settled unlisted derivatives and 4,318,508 H Shares were cash settled unlisted derivatives.

JPMorgan Chase & Co. held a short position as defined under Part XV of the SFO in 257,389,776 H Shares (3.45%). Of these 257,389,776 H Shares, 15,353,005 H Shares were physically settled listed derivatives, 54,151,700 H Shares were cash settled listed derivatives, 3,554,183 H Shares were physically settled unlisted derivatives and 183,282,388 H Shares were cash settled unlisted derivatives.

Our A shares and H shares generally vote together as a single class, including in the election of directors. Each A share and each H share is entitled to one vote. In addition, in certain matters which affect the rights of the holders of H shares or A shares, the H shares or A shares, as the case may be, are entitled to vote as a separate class.

CLIC converted and sold 676,470,000 domestic shares in the form of H shares or ADSs in connection with our global offering in December 2003.

Based on the information provided by Deutsche Bank Trust Company Americas, our depository bank, as of December 31, 2017 and April 6, 2018, there were, respectively, 28,125,962 ADRs representing 140,629,810 H shares, with 58 registered holders, and 27,632,340 ADRs representing 138,161,700 H shares, with 58 registered holders. Since certain of the ADSs are held by nominees, the above number may not be representative of the actual number of U.S. beneficial holders of ADSs or number of ADSs beneficially held by U.S. persons.

CLIC, our controlling shareholder, is a wholly state-owned enterprise controlled by the PRC government. See Item 4. Information on the Company History and Development of the Company. None of our major shareholders has voting rights that differ from the voting rights of other shareholders, except that in certain matters which affect the rights of the holders of H shares or A shares, holders of H shares or A shares, as the case may be, are entitled to vote as a separate class. We are not aware of any arrangement which may at a subsequent date result in a change of control of our company.

B. RELATED PARTY TRANSACTIONS

As at the date of this annual report, CLIC owns approximately 68.37% of our issued share capital, a 40% equity interest in AMC, a 60% equity interest in CLPCIC, a 100% equity interest in China Life Overseas, a 100% equity interest in China Life Investment Holding Company Limited, or IHC, and a 100% equity interest in China Life E-commerce Company Limited, or China Life E-commerce. CLIC, AMC, CLPCIC, China Life Overseas, IHC and China Life E-commerce are therefore considered as our connected persons under the HKSE Listing Rules. AMC owns a direct 48% equity interest and an indirect 52% equity interest in China Life Wealth Management Company Limited, or China Life Wealth, and approximately 85.03% equity interest in China Life AMP Asset Management Co., Ltd., or AMP. China Life Wealth and AMP are therefore also considered as our connected persons under the HKSE Listing Rules. Each of AMC, China Life Wealth and AMP is also a subsidiary of the Company. Chongqing International Trust Inc., or Chongqing Trust, is an associate of CLIC and CLPCIC by virtue of its acting as the trustee of a trust scheme of which CLPCIC is a beneficiary, and is therefore also a connected person of the Company under the HKSE Listing Rules. During the reporting period, we engaged in the following related party transactions with these

companies:

On June 21, 2017, we and Chongqing Trust entered into a framework agreement in relation to the subscription and redemption of trust products and other daily transactions;

Table of Contents

On June 30, 2017, we and IHC entered into a new asset management agreement;

On December 20, 2017, AMP and IHC entered into a framework agreement for the subscription and redemption of fund products, asset management for specific clients and other daily transactions;

On December 26, 2017, we and CLIC entered into a new policy management agreement;

On December 28, 2017, December 27, 2017, December 29, 2017, March 26, 2018, December 29, 2017 and December 20, 2017, we, CLIC, CLPCIC, China Life Pension, China Life E-commerce and IHC each entered into a framework agreement with China Life Wealth in relation to certain daily transactions;

On December 29, 2017, we entered into a new property leasing agreement with IHC;

On December 29, 2017, China Life Wealth and Chongqing Trust entered into a framework agreement in relation to certain daily transactions; and

On January 31, 2018, we and CLPCIC entered into a new insurance sales framework agreement. We also continued to carry out certain other continuing related party transactions with CLIC, AMC and AMP in the reporting period. These transactions constitute connected transactions for us under the HKSE Listing Rules. Details of these transactions are set forth below.

As at the date of this annual report, we own a 43.686% equity interest in CGB and have become the largest shareholder of CGB. Our chairman and executive director, Yang Mingsheng, serves as the chairman of CGB. CGB is therefore considered as our related party under applicable PRC laws and regulations. On January 12, 2017, we entered into a new framework agreement with CGB for daily related party transactions. We also continued to carry out continuing related party transactions with CGB in the reporting period. These transactions are not regarded as connected transactions for us under the HKSE Listing Rules. Details of these transactions are set forth below.

As at the date of this annual report, we own a 70.74% equity interest in China Life Pension. China Life Pension is not considered as our related party under the HKSE Listing Rules or applicable PRC laws and regulations. As our subsidiary, China Life Pension also continued to carry out continuing related party transactions with CLIC, AMC, AMP and China Life Wealth in the reporting period. These transactions are regarded as connected transactions for us under the HKSE Listing Rules. Details of these transactions are set forth below.

Continuing Related Party Transactions with CLIC

During the reporting period, we engaged in continuing related party transactions with CLIC. These transactions are governed by several agreements between CLIC and us, including a restructuring agreement, a policy management agreement, a trademark license agreement and a non-competition agreement. A detailed discussion of these agreements is set forth in Note 32 to our consolidated financial statements included elsewhere in this annual report and under the heading **Item 7. Major Shareholders and Related Party Transactions** **Related Party Transactions** in our annual report on Form 20-F filed with the Securities and Exchange Commission on April 28, 2009.

Table of Contents

On December 29, 2014, we and CLIC entered into a policy management agreement for a term of three years. Pursuant to this policy management agreement, we accepted CLIC's entrustment to provide policy administration services relating to non-transferred policies, and CLIC will pay a service fee to us in cash on a semi-annual basis, which, for each semi-annual payment period, equals the sum of (1) the number of non-transferred policies in force as of the last day of the period, multiplied by RMB 8.00; and (2) 2.5% of the actual premiums in respect of the non-transferred policies collected during the period. The service fee paid by CLIC to us under policy management agreement for the year ended on December 31, 2017 was RMB 739.56 million (US\$ 113.7 million). This agreement expired on December 31, 2017.

On December 26, 2017, we and CLIC entered into a new policy management agreement for a term of three years ending on December 31, 2020. During its term, this new agreement may be terminated by either party giving to the other party not less than 90 days' prior written notice. Pursuant to this new policy management agreement, we will continue to accept CLIC's entrustment to provide policy administration services relating to non-transferred policies, and CLIC will pay a service fee to us in cash on a semi-annual basis. The terms on the determination of services fees remain the same as in the previous policy management agreement discussed above. The annual cap in respect of the service fees to be paid by CLIC to us under the new policy management agreement for each of the three years ending on December 31, 2020 is RMB 708 million.

Continuing Related Party Transactions with AMC***Asset Management Agreement between AMC and Us***

On December 29, 2015, we and AMC entered into an asset management agreement for a three-year term expiring on December 31, 2018. Under the asset management agreement, AMC agreed to invest and manage assets entrusted to it by us, on a discretionary basis, within the scope granted by us and in accordance with our investment guidelines. We retain the title of the entrusted assets and AMC is authorized to operate the accounts associated with the entrusted assets for and on behalf of us. We may add to or withdraw from the assets managed by AMC pursuant to the agreement. We have the right to establish, amend and change the investment guidelines and also have the right to monitor the investment management activities of AMC.

In consideration of AMC's service in respect of investing and managing assets entrusted to it by us under the agreement, we agreed to pay service fees to AMC in cash, comprised of a fixed service fee and a variable service fee. The fixed service fee is payable monthly and is calculated according to the net asset value of the assets under management and a fixed management fee rate of 0.05% per annum. The variable service fee is payable annually and is determined after an appraisal has been conducted by us with respect to the assets under management and the relevant services provided by AMC each year. The variable service fee is calculated on the basis of 20% of the fixed service fee per annum, by multiplying a payment ratio determined by us based on the results of its annual appraisal of AMC. The services fees under the agreement were determined by us and AMC based on an analysis of the cost of service, market practice and the size and composition of the asset pool to be managed. The annual cap in respect of the service fees to be paid by us to AMC under the asset management agreement for each of the three years ending on December 31, 2018 is RMB 1,500 million.

The service fees paid by us to AMC under the asset management agreement for the year ended December 31, 2017 were RMB 1,153.58 million (US\$ 177.3 million).

Table of Contents***Asset Management Agreement between AMC and CLIC***

On December 30, 2015, AMC and CLIC entered into an asset management agreement for a three-year term expiring on December 31, 2018, subject to a right of the parties to negotiate a renewal of this new agreement within 90 business days prior to its expiry. Under the asset management agreement, AMC agreed to invest and manage assets entrusted to it by CLIC, on a discretionary basis, subject to the investment guidelines and instructions given by CLIC. CLIC retains the title of the entrusted assets and AMC is authorized to operate the accounts associated with the entrusted assets for and on behalf of CLIC. CLIC may add to or withdraw from the assets managed by AMC pursuant to the agreement. CLIC has the right to establish, amend and change the investment guidelines and also has the right to monitor the investment management activities of AMC.

In consideration of AMC's service in respect of investing and managing assets entrusted to it by CLIC under the agreement, CLIC agreed to pay AMC a base service fee for asset management in cash at the rate of 0.05% per annum. Such service fee is calculated and payable on a monthly basis, by multiplying the average of book balance of the assets under management (after deducting the funds obtained and interests accrued from repurchase transactions, the principal and interest of debt investment plans, equity investment plans, project asset-backed plans and customized non-standard products) at the beginning and at the end of any given month by the rate of 0.05%, divided by 12. After the end of each fiscal year, CLIC will evaluate the investment performance with respect to the assets entrusted to AMC in the previous year, and adjust the base service fee for asset management by reference to the actual and targeted investment returns. The service fees for debt investment plans, equity investment plans, project asset-backed plans and customized non-standard products will be determined separately by the parties. The services fees under the agreement were determined by CLIC and AMC based on an analysis of the cost of service, market practice and the size and composition of the asset pool to be managed. The annual cap in respect of the service fees to be paid by CLIC to AMC under the asset management agreement for the three years ending on December 31, 2018 is RMB 320 million, RMB 310 million and RMB 300 million, respectively.

The service fees paid by CLIC to AMC under the asset management agreement for the year ended on December 31, 2017 were RMB 106.79 million (US\$ 16.4 million).

Continuing Related Party Transactions with IHC***Property Leasing Agreement with IHC***

During the reporting period, we engaged in continuing related party transactions with IHC under a property leasing agreement between IHC and us. The property leasing agreement expired on December 31, 2017. A detailed discussion of the terms of this agreement is set forth in Note 32 to our consolidated financial statements included elsewhere in this annual report and under the heading "Item 7. Major Shareholders and Related Party Transactions - Related Party Transactions" in our annual report on Form 20-F filed with the Securities and Exchange Commission on April 24, 2015. On December 29, 2017, we entered into a new property leasing agreement with IHC under substantially the same terms for a term from January 1, 2018 to December 31, 2020. Under the new property leasing agreement, IHC agreed to lease to us 1,893 properties owned by it. The annual rent is determined by reference to market rent or, where there is no available comparison, by reference to the costs incurred by IHC in holding and maintaining the properties, plus a margin of approximately 5%.

The rent paid by us to IHC under the property leasing agreement for the year ended December 31, 2017 was RMB 78 million (US\$ 11.988 million).

Table of Contents***Asset Management Agreement with IHC***

On February 3, 2016, we entered into an asset management agreement with IHC for a term starting from January 1, 2016 and ending on June 30, 2017. On June 30, 2017, we entered into a new asset management agreement with IHC. The new agreement took effect from January 1, 2017 retrospectively and will remain effective until December 31, 2018. Pursuant to the asset management agreement, IHC continued to invest, operate and manage the assets entrusted to it by us for investment in real property, equity interests of companies, related financial products and securitization financial products on a discretionary basis, subject to the investment guidelines and instructions given by us.

In consideration of the services provided by IHC under the asset management agreement, we agreed to pay IHC fees based on fixed return projects and non-fixed return projects, respectively. With respect to the fixed return projects, we agreed to pay IHC a basic service fee which is determined based on the investment rate of return of the projects. With respect to the non-fixed return projects, we agreed to pay IHC a basic service fee and also pay a performance-based fee at the time of exit from the projects with reference to the comprehensive rate of return of the projects. In addition, we will make adjustments to the basic service fee for fixed return projects and non-fixed return projects based on the result of our annual business evaluation on IHC (such adjusted amount is referred to as floating management fee). The basic service fee is paid on a quarterly basis, calculated separately for the projects invested prior to the execution of the agreement and those newly invested during the term of the agreement. With respect to the projects invested prior to the execution of the agreement, the basic service fee is calculated by multiplying the total amount of assets invested by the applicable management fee rate (which is set forth in the relevant entrusted investment and management agreements for alternative investments with insurance funds then in force when such projects were entrusted). With respect to the projects newly invested during the term of the agreement, the basic service fee is calculated by multiplying the total annual amount of assets newly invested by the applicable management fee rate stipulated in the new agreement and our investment guidelines (the management fee rate ranges from 0.05% to 0.6% for the fixed return projects; and the management fee rate is 0.3% for the non-fixed return projects). The floating management fee and the performance-based fee are calculated and confirmed by both parties annually, and then paid by us to IHC upon confirmation. In addition, the assets entrusted by us to IHC will also be partially used for the subscription of the related financial products established and issued by IHC or of which IHC has participated in the establishment and issuance, and such related financial products will be limited to infrastructure investment schemes and project asset-backed schemes. For each of the two years ending December 31, 2018, the annual cap on the amount of the basic service fee, floating management fee and performance-based fee payable by us to IHC is RMB 630 million and RMB 990 million, respectively. The contractual amount of assets entrusted by us to IHC for investment and management may not exceed RMB 550 billion or its equivalent in foreign currency as at the expiry of this agreement. For each of the two years ending December 31, 2018, the annual cap on the contractual amount of assets newly entrusted by us to IHC for investment and management is RMB 200 billion and RMB 200 billion, respectively. The basic service fee, floating management fee and performance-based fee paid by us to IHC under this new asset management agreement for the year ended December 31, 2017 was RMB 395.82 million (US\$ 60.8 million). As at December 31, 2017, the contractual amount of the assets entrusted by us to IHC for investment and management was RMB 246,193.00 million (US\$ 37,839.2 million), among which, for the year of 2017, the contractual amount of the assets newly entrusted by us was RMB 112,267.00 million (US\$ 17,255.1 million).

Each of CLIC and CLPCIC has also entrusted IHC to invest and manage its assets, which may result in CLIC, CLPCIC and us investing in the same project. Pursuant to the asset management agreement, the targeted assets for co-investments to be made by IHC and on behalf of us, CLIC and CLPCIC are limited to newly launched related financial products and securitization financial products, excluding any products acquired from the secondary market. The contractual amount of the co-investment by us to be entrusted during the term of this agreement will not exceed RMB 100 billion or its equivalent in foreign currency.

Table of Contents**Continuing Related Party Transaction with China Life Pension**

On July 27, 2009, we, CLIC and AMC entered into an agreement for the entrustment of enterprise annuity funds and account management with China Life Pension. The agreement expired on December 1, 2012. On February 26, 2013, we, CLIC and AMC entered into a memorandum of understanding, which became effective retroactively on December 2, 2012, with China Life Pension to renew the agreement for a successive one-year term ended on December 1, 2013. On March 22, 2014, we, CLIC and AMC entered into a new agreement for the entrustment of enterprise annuity funds and account management with China Life Pension, which became effective retroactively to December 2, 2013. The agreement expired on December 31, 2016 and has been renewed for a successive three-year term. Under the agreement, China Life Pension was entrusted to serve as the trustee and account manager and to provide entrusted management services and account management services for the enterprise annuity funds of the Company, CLIC and AMC. China Life Pension was further entrusted to serve as the investment manager and to provide investment management service for the enterprise annuity funds of the Company, CLIC and AMC. In consideration of the services provided by China Life Pension, we, CLIC and AMC agreed to pay China Life Pension entrusted management fee, account management fees and investment management fee.

Continuing Related Party Transactions with CLPCIC

On March 8, 2015, we entered into an insurance sales framework agreement with CLPCIC. This agreement expired on March 7, 2018. The service fees paid to us for the year ended December 31, 2017 was RMB 3,030.41 million (US\$ 465.8 million).

On January 31, 2018, we entered into a new insurance sales framework agreement with CLPCIC for a term of three years from March 8, 2018 to March 7, 2021. Under the new insurance sales framework agreement, CLPCIC continued to entrust us to act as its agent to sell selected insurance products within authorized regions, and agreed to pay us an agency service fee in cash on a monthly basis, which, includes sales management fee and sales service fee. The sales management fee will be calculated by the parties on the basis of the principles of equality and fairness. The sales service fee will be determined according to the standard of service fees for specific insurance products as agreed by the branches of the parties based on market principles. The annual caps in respect of the agency service fees to be paid by CLPCIC to us under the new insurance sales framework agreement for the three years ending December 31, 2020 are RMB 4,260 million, RMB 5,540 million and RMB 7,050 million, respectively.

Continuing Related Party Transactions with CGB

During the reporting period, we engaged in continuing related party transactions with CGB pursuant to several negotiated deposit agreements between CGB and us. A detailed discussion of these agreements is set forth under the heading "Item 7. Major Shareholders and Related Party Transactions - Related Party Transactions" in our annual reports on Form 20-F filed with the Securities and Exchange Commission on April 26, 2012 and April 26, 2013, respectively.

On August 12, 2016, we entered into an insurance products cooperation agreement with CGB, pursuant to which CGB will sell our individual insurance products suitable for sale through banks, as jointly selected by CGB and us. Under this agreement, CGB will act as an intermediary to sell such products and will also act on our behalf to receive premiums. In return, we will pay CGB a commission fee for each such product sold by it, calculated and paid on a monthly basis, by multiplying (a) total new premiums received in such month minus the premiums for the policies cancelled during the cooling-off period in such month and (b) a fixed commission rate, which ranges from 1.5% to 30%. This agreement has a term of two years. Upon expiration of the two-year term, this agreement will be automatically renewed for successive one-year terms, provided that no objection has been raised by CGB or us.

On June 14, 2013, we entered into a related party transaction framework agreement with CGB. Under this agreement, which has a term of three years ending on December 31, 2015, we and CGB will carry out various deposit and non-deposit related party transactions. On July 25, 2014, we entered into a revised agreement with CGB, which further increased the daily cap of deposits in respect of all the deposit transactions, increased the annual cap in respect of all the non-deposit related party transactions and expanded the scope of non-deposit transactions. This agreement expired on December 31, 2016. A detailed discussion of this related party transaction framework agreement is set forth under the heading "Item 7. Major Shareholders and Related Party Transactions - Related Party Transactions" in our annual report on Form 20-F filed with the Securities and Exchange Commission on April 25, 2014 and April 22, 2016, respectively. On January 12, 2017, we entered into a new framework agreement with CGB for daily related party transactions, for a term starting from January 1, 2017 and ending on December 31, 2019. Compared to the original agreement, the new framework agreement adjusted the scope of transactions and the classification of transaction types, and also increased the cap of the transaction amounts. A detailed discussion of this new agreement is set forth in our report on Form 6-K filed with the Securities and Exchange Commission on November 10, 2016.

Table of Contents

As at December 31, 2017, the amount of our deposit balance at CGB for deposit related party transactions was RMB 33,583.74 million and the interest incomes arising from these transactions were RMB 1,381.51 million, and the amount of the balance for financial market and peer related party transactions was RMB 0 million and the relevant fees or incomes arising from these transactions were RMB 101.00 million. For the year ended December 31, 2017, the amount of the financing related party transactions was RMB 0 million, the amount of investment and wealth management related party transactions was RMB 4,330.00 million, the amount of the co-investment related party transactions was RMB 0 million, the scale of entrusted funds under enterprise annuity related party transactions was RMB 0 million and the amount of transaction fees related to enterprise annuity related party transactions (including management fee, entrustment fee, account management fee and performance-based fee) incurred was RMB 0 million, the amount of transaction fees related to asset management related party transactions (including management fee, service fee and handling fee) incurred was RMB 0 million, the amount of transactions fees related to entrustment related party transactions (including entrustment fee, service fee and handling fee) incurred was RMB 0 million, the amount of transaction fees related to agency related party transactions (including agency fee, service fee and handling fee) incurred was RMB 91.96 million and the amount of other daily related party transactions was RMB 56.92 million.

Legal and Regulatory Proceedings

We are involved in litigation and arbitration proceedings involving our insurance operations on an ongoing basis. In addition, the CBIRC (formerly CIRC), as well as other PRC governmental agencies, including tax, commerce and industrial administration and audit bureaus, from time to time make inquiries and conduct examinations, audits or investigations concerning our compliance with PRC laws and regulations. These litigation, arbitration and administrative proceedings have in the past resulted in damage awards, settlements or administrative sanctions, including fines, which have not been material to us. While we cannot predict the outcome of any pending or future litigation, arbitration, examination or investigation, we do not believe that any pending legal matter will have a material adverse effect on our business, financial condition or results of operations. However, we cannot assure you that any future litigation, arbitration or regulatory proceeding will not have an adverse outcome, which could have a material adverse effect on our operating results or cash flows.

We currently have control procedures in place to monitor our litigation, arbitration and regulatory exposure. We have established a systematic prevention system whereby our management at each corporate level is responsible for compliance with laws, regulations and internal codes of conduct within their individual territories or departments. Our branches at the provincial level are required to report material litigation, arbitration and regulatory matters to our corporate headquarters on a timely basis. We plan to continue to improve our control and compliance policies in the future.

Table of Contents

We may penalize or punish our employees or exclusive agents who commit misconduct or fraud, breach the terms of their employment or agency agreements, exceed their authorization limits or fail to follow prescribed procedures in delivering insurance policies and premium payments, in each case having regard to the severity of the offense. Employees or exclusive agents are required to reimburse us for any losses suffered by us resulting from their misconduct or fraud. In serious cases, we may terminate their employment or agency agreements. We report criminal offenses to the PRC authorities and may also bring concurrent civil actions against employees or exclusive agents. We have experienced agent and employee misconduct that has resulted in litigation, arbitration and administrative actions against us and these agents and employees, and in some cases criminal proceedings and convictions against the agent or employee in question. None of these actions has resulted in material losses, damages, fines or other sanctions against us. We cannot assure you, however, that agent or employee misconduct will not lead to a material adverse effect on our business, results of operations or financial condition.

Policy on Dividend Distributions

Our board of directors has passed a resolution on March 22, 2018 to propose for approval at the annual general meeting of the declaration of final dividends of RMB 0.40 per share, totaling approximately RMB 11,306 million (US\$ 1,738 million), for the year ended December 31, 2017. The proposed dividends have not been provided in our consolidated financial statements for the year ended December 31, 2017.

The payment of any dividend by us must be approved by shareholders in a shareholders' meeting. Our board of directors intends to make its recommendations regarding the declaration of cash dividends to the shareholders in general meeting. The decision to make a recommendation for the payment of any dividend and the amount of the dividend will depend on:

our results of operations and cash flows;

our financial position;

statutory solvency requirements as determined under CBIRC (formerly CIRC) rules;

our shareholders' interests;

general business conditions;

our future prospects;

statutory and regulatory restrictions on the payment of dividends by us; and

other factors that our board of directors deems relevant.

We will pay dividends out of our after-tax profits only after we have made the following allowances and allocations:

recovery of accumulated losses, if any;

Table of Contents

allocations to the statutory common reserve fund equivalent to 10% of our after-tax profits, as determined under PRC GAAP;

allocations to the general risks reserve fund equivalent to 10% of our after-tax profits, as determined under PRC GAAP; and

allocations to a discretionary common reserve fund as approved by the shareholders in a shareholders meeting.

When the statutory common reserve fund reaches and is maintained at or above 50% of our registered capital, as determined under PRC GAAP, no further allocations to this fund will be required.

Under Chinese law, dividends may be paid only out of distributable profits. Any distributable profits that are not distributed in a given year are retained and available for distribution in subsequent years. However, ordinarily we will not pay any dividends in a year in which we do not have any distributable profits.

Payment of dividends by us is also regulated by the PRC insurance law. If we do not meet the minimum solvency margin required by the CBIRC (formerly CIRC), we may be prohibited from paying dividends. See Item 4. Information on the Company Business Overview Regulatory and Related Matters Insurance Company Regulation Solvency requirements .

We paid dividends of RMB 0.30 per share in respect of 2013, RMB 0.40 per share in respect of 2014, RMB 0.42 per share in respect of 2015 and RMB 0.24 per share in respect of 2016. Our board of directors has recommended the declaration of final dividends of RMB 0.40 per share in respect of 2017. We expect to continue to pay dividends in line with our financial performance thereafter. We will declare dividends, if any, in Renminbi with respect to the H shares on a per share basis and will pay such dividends in Hong Kong dollars.

B. SIGNIFICANT CHANGES

As of the date of this annual report, there was no significant change since the date of the financial statements filed as part of this annual report that has or is reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

C. EMBEDDED VALUE

Background

China Life prepares financial statements to public investors in accordance with the relevant accounting standards. An alternative measure of the value and profitability of a life insurance company can be provided by the embedded value method. Embedded value is an actuarially determined estimate of the economic value of the life insurance business of an insurance company based on a particular set of assumptions about future experience, excluding the economic value of future new business. In addition, the value of one year's sales represents an actuarially determined estimate of the economic value arising from new life insurance business issued in one year based on a particular set of assumptions about future experience.

Table of Contents

China Life believes that reporting our embedded value and value of one year's sales provides useful information to investors in two respects. First, the value of our in-force business represents the total amount of shareholders' interest in distributable earnings, in present value terms, which can be expected to emerge over time, in accordance with the assumptions used. Second, the value of one year's sales provides an indication of the value created for investors by new business activity based on the assumptions used and hence the potential of the business. However, the information on embedded value and value of one year's sales should not be viewed as a substitute of financial measures under the relevant accounting basis. Investors should not make investment decisions based solely on embedded value information and the value of one year's sales.

It is important to note that actuarial standards with respect to the calculation of embedded value are still evolving. There is still no universal standard which defines the form, calculation methodology or presentation format of the embedded value of an insurance company. Hence, differences in definition, methodology, assumptions, accounting basis and disclosures may cause inconsistency when comparing the results of different companies.

Also, the calculation of embedded value and value of one year's sales involves substantial technical complexity and estimates can vary materially as key assumptions are changed. Therefore, special care is advised when interpreting embedded value results.

The values shown below do not consider the future financial impact of transactions between China Life and CLIC, IHC, AMC, China Life Pension, CLPCIC, and etc.

Definitions of Embedded Value and Value of One year's sales

The embedded value of a life insurer is defined as the sum of the adjusted net worth and the value of in-force business allowing for the cost of required capital

Adjusted net worth is equal to the sum of:

Net assets, defined as assets less corresponding policy liabilities and other liabilities valued; and

Net-of-tax adjustments for relevant differences between the market value and the book value of assets, together with relevant net-of-tax adjustments to certain liabilities.

The market value of assets can fluctuate significantly over time due to the impact of the prevailing market environment. Hence the adjusted net worth can fluctuate significantly between valuation dates.

The value of in-force business and the value of one year's sales are defined here as the discounted value of the projected stream of future shareholders' interest in distributable earnings for existing in-force business at the valuation date and for one year's sales in the 12 months immediately preceding the valuation date.

The value of in-force business and the value of one year's sales have been determined using a traditional deterministic discounted cash flow methodology. This methodology makes implicit allowance for the cost of investment guarantees and policyholder options, asset/liability mismatch risk, credit risk, the risk of operating experience's fluctuation and the economic cost of capital through the use of a risk-adjusted discount rate.

Table of Contents**Preparation and Review**

The embedded value and the value of one year's sales were prepared by China Life in accordance with the CAA Standards of Actuarial Practice: Appraisal of Embedded Value issued by the China Association of Actuaries (CAA) in November 2016. Willis Towers Watson, an international firm of consultants, performed a review of China Life's embedded value. The review statement from Willis Towers Watson is contained in the Willis Towers Watson's review opinion report on embedded value section.

Assumptions

Economic assumptions: The calculations are based upon assumed corporate tax rate of 25% for all years. The investment return is assumed to be 5%. 13% grading to 17% (remaining level thereafter) of the investment return is assumed to be exempt from income tax. These investment return and tax exempt assumptions are based on our strategic asset mix and expected future returns. The risk-adjusted discount rate used is 10%.

Other operating assumptions such as mortality, morbidity, lapses and expenses are based on our recent operating experience and expected future outlook.

Summary of Results

The embedded value as at 31 December 2017 and the value of one year's sales for the 12 months ended 31 December 2017, the corresponding results as at 31 December 2016 are shown below:

Table 1

Components of Embedded Value and Value of One Year's Sales		RMB million	
		31 December, 2017	31 December, 2016
ITEM			
A	Adjusted Net Worth	370,500	349,528
B	Value of In-Force Business before Cost of Required Capital	398,723	332,317
C	Cost of Required Capital	(35,050)	(29,787)
D	Value of In-Force Business after Cost of Required Capital (B+C)	363,673	302,530
E	Embedded Value (A + D)	734,172	652,057
F	Value of One Year's Sales before Cost of Required Capital	64,627	53,952
G	Cost of Required Capital	(4,510)	(4,641)
H	Value of One Year's Sales after Cost of Required Capital (F + G)	60,117	49,311

Note: Numbers may not be additive due to rounding.

Value of One Year's Sales by Channel

The value of one year's sales for the 12 months ended 31 December 2017 by channel is shown below:

Table of Contents**Table 2**

Channel	RMB million	
	31 December, 2017	31 December, 2016
Exclusive Individual Agent Channel	53,170	46,326
Bancassurance Channel	6,536	2,610
Group Insurance Channel	410	375
Total	60,117	49,311

Note: Numbers may not be additive due to rounding.

The new business margin of one year's sales for the 12 months ended 31 December 2017 by channel is shown below:

Table 3

Channel	By FYP		By APE	
	31 December, 2017	31 December, 2016	31 December, 2017	31 December, 2016
Exclusive Individual Agent Channel	47.2%	51.1%	47.3%	51.2%
Bancassurance Channel	8.0%	3.0%	23.2%	10.2%
Group Insurance Channel	1.1%	1.0%	1.1%	1.1%

Note: FYP (First Year Premium) is the written premium used for calculation of the value of one year's sales and APE (Annual Premium Equivalent) is calculated as the sum of 100 percent of first year regular premiums and 10 percent of single premiums.

Movement analysis

The following analysis tracks the movement of the embedded value from the start to the end of the reporting period:

Table 4

Analysis of Embedded Value Movement in 2017		RMB million
ITEM		
A	Embedded Value at the Start of Year	652,057
B	Expected Return on Embedded Value	52,472
C	Value of New Business in the Period	60,117
D	Operating Experience Variance	529
E	Investment Experience Variance	(4,280)
F	Methodology, Model and Assumption Changes	(5,926)

G	Market Value and Other Adjustments	(11,549)
H	Exchange Gains or Losses	(459)
I	Shareholder Dividend Distribution and Capital Injection	(7,164)
J	Other	(1,625)
K	Embedded Value as at 31 December 2017 (sum A through J)	734,172

Table of Contents

Notes:

- 1) Numbers may not be additive due to rounding.
- 2) Items B through J are explained below:

- B Reflects expected impact of covered business, and the expected return on investments supporting the 2017 opening net worth.
- C Value of one year's sales for the 12 months ended 31 December 2017.
- D Reflects the difference between actual operating experience in 2017 (including mortality, morbidity, lapse, and expenses etc.) and the assumptions.
- E Compares actual with expected investment returns during 2017.
- F Reflects the effects of appraisal methodology and model enhancement, and assumption changes.
- G Change in the market value adjustment from the beginning of year 2017 to 31 December 2017 and other adjustments.
- H Reflects the gains or losses due to changes in exchange rate.
- I Reflects dividends distributed to shareholders during 2017.
- J Other miscellaneous items.

Sensitivity Results

Sensitivity tests were performed using a range of alternative assumptions. In each of the sensitivity tests, only the assumption referred to was changed, with all other assumptions remaining unchanged. The results are summarized below:

Table 5

Sensitivity Results		RMB million	
		Value of In-Force Business after Cost of Required Capital	Value of One Year's Sales after Cost of Required Capital
	Base case scenario	363,673	60,117
1.	Risk discount rate +50bps	347,884	57,470
2.	Risk discount rate -50bps	380,622	62,964
3.	Investment return +50bps	425,453	68,690
4.	Investment return -50bps	302,186	51,558
5.	10% increase in expenses	358,884	56,878
6.	10% decrease in expenses	368,460	63,356
7.	10% increase in mortality rate for non-annuity products		
	and 10% decrease in mortality rate for annuity products	361,113	59,400
8.		366,227	60,835

	10% decrease in mortality rate for non-annuity products		
	and 10% increase in mortality rate for annuity products		
9.	10% increase in lapse rates	363,021	59,149
10.	10% decrease in lapse rates	364,137	61,030
11.	10% increase in morbidity rates	358,936	58,997
12.	10% decrease in morbidity rates	368,448	61,235

Willis Towers Watson's Review Opinion Report on Embedded Value

To The Directors of China Life Insurance Company Limited

China Life Insurance Company Limited (China Life) has prepared embedded value results as at 31 December 2017 (EV Results). The disclosure of these EV Results, together with a description of the methodology and assumptions that have been used, are shown in the Embedded Value section.

China Life has engaged Towers Watson Management Consulting (Shenzhen) Co. Ltd. Beijing Branch (Willis Towers Watson) to review its EV Results. This report is addressed solely to China Life in accordance with the terms of our engagement letter, and sets out the scope of our work and our conclusions. To the fullest extent permitted by applicable law, we do not accept or assume any responsibility, duty of care or liability to anyone other than China Life for or in connection with our review work, the opinions we have formed, or for any statement set forth in this report.

Scope of work

Our scope of work covered:

a review of the methodology used to develop the embedded value and value of one year's sales as at 31 December 2017, in accordance with the CAA Standards of Actuarial Practice: Appraisal of Embedded Value issued by the China Association of Actuaries (CAA) in November 2016;

a review of the economic and operating assumptions used to develop the embedded value and value of one year's sales as at 31 December 2017;

a review of the results of China Life's calculation of the EV Results.

In carrying out our review, we have relied on the accuracy of audited and unaudited data and information provided by China Life.

Opinion

Based on the scope of work above, we have concluded that:

the embedded value methodology used by China Life is in accordance with the CAA Standards of Actuarial Practice: Appraisal of Embedded Value issued by the CAA;

the economic assumptions used by China Life are internally consistent, have been set with regard to current economic conditions, and have made allowance for the company's current and expected future asset mix and investment strategy;

the operating assumptions used by China Life have been set with appropriate regard to past, current and expected future experience; and

the EV Results have been prepared, in all material respects, in accordance with the methodology and assumptions set out in the Embedded Value section.

ITEM 9. THE OFFER AND LISTING.

In connection with our initial public offering, our American depositary shares, or ADSs, each representing 40 H shares, were listed and commenced trading on New York Stock Exchange on December 17, 2003 under the symbol LFC . Our H shares were listed and commenced trading on the Hong Kong Stock Exchange on December 18, 2003 under the stock code 2628 . Prior to these listings, there was no public market for our equity securities. The New York Stock Exchange and the Hong Kong Stock Exchange are the principal trading markets for our ADSs and H shares, which are not listed on any other exchanges in or outside the United States.

On December 29, 2006, the ratio of ADSs to H shares was reduced from 40 H shares to 15 H shares. On May 26, 2015, the ratio of ADSs to H shares was further reduced from 15 H shares to 5 H shares. Our A shares were listed and commenced trading on the Shanghai Stock Exchange on January 9, 2007 under the stock code 601628 .

The high and low closing sale prices of the H shares on the HKSE, the ADSs on the NYSE and the A shares on the SSE for the periods indicated are as follows⁽¹⁾:

	Price per H Share (HK\$)		Price per ADS ⁽²⁾ (US\$)		Price per A share (RMB)	
	High	Low	High	Low	High	Low
Annual						
2013	27.2000	17.5000	52.62	34.27	21.9200	12.9100

ITEM 10. ADDITIONAL INFORMATION.

A. SHARE CAPITAL

Not applicable.

B. ARTICLES OF ASSOCIATION

The following is a brief summary of certain provisions of our current articles of association, the PRC company law and certain other laws and regulations applicable to us. Such summary is not purported to be complete. For further information, you should refer to the full text of our articles of association and to the texts of applicable laws and regulations.

Objects and Purposes

We are organized under the PRC company law as a joint stock company. We are registered with the SAIC in Beijing, China and our business license carries the registration number 100000000037965.

Our business scope, set forth in Article 10 of our articles of association, is to engage in life, accident and health insurance businesses; reinsurance business relating to the foregoing; fund investment businesses authorized by laws, regulations or the State Council; agency business, consulting business and provision of services, in each case relating to life insurance; fund sales business; and other business as approved by the insurance regulatory authority of the PRC.

Sources of Shareholders' Rights

The primary sources of shareholders' rights are the PRC company law, our articles of association, Special Rules applicable to overseas listed joint stock companies promulgated by the State Council, or Special Rules, relevant CSRC regulations, the Shanghai Stock Exchange Listing Rules, and the Hong Kong Stock Exchange Listing Rules that, among other things, impose certain standards of conduct, fairness and disclosure on us, our directors and CLIC, our controlling shareholder. The PRC company law was enacted in December 1993 and serves as the primary body of law regulating corporate actions of companies organized in the PRC and its directors and shareholders.

Our articles of association have incorporated the provisions set forth in the Mandatory Provisions for the Articles of Association of Companies Listed Overseas, or the Mandatory Provisions, adopted in 1994 pursuant to the requirements of the CSRC and the provisions set forth in the Guidelines on the Articles of Association of Listed Companies, or the Guidelines, as amended in 2014 by the CSRC. Any amendment to the relevant mandatory provisions will only become effective after approval by the relevant governmental departments authorized by the State Council and the CSRC. The Hong Kong Stock Exchange Listing Rules require a number of provisions in addition to the Mandatory Provisions to be included in our articles of association.

According to the HKSE Listing Rules, we may not amend certain provisions of our articles of association that have been mandated by the Hong Kong Stock Exchange. These provisions include, among others:

varying the rights of existing classes of shares;

voting rights;

159

Table of Contents

our power to purchase our own shares;

rights of minority shareholders; and

liquidation procedures.

In addition, upon the listing of the H shares and for so long as the H shares are listed on the Hong Kong Stock Exchange, we are subject to the relevant ordinances, rules and regulations applicable to companies listed on the Hong Kong Stock Exchange, including, among other things, the Hong Kong Stock Exchange Listing Rules, the Securities and Futures Ordinance and the Hong Kong Codes on Takeovers and Mergers and Share Repurchases.

Unless otherwise specified, all rights, obligations and protections discussed below are derived from our articles of association and the PRC company law.

Enforceability of Shareholders' Rights

Enforceability of our shareholders' rights may be limited.

In accordance with the rules applicable to Chinese overseas listed companies, our articles of association provide that, with certain limited exceptions, all disputes or claims based on our articles of association, the PRC company law or other relevant laws or administrative rules, and concerning matters between holders of H shares and holders of A shares, us, or our directors, supervisors, president, vice presidents or other senior officers, must be submitted for arbitration at either the China International Economic and Trade Arbitration Commission or the Hong Kong International Arbitration Center. If an applicant chooses to have the dispute arbitrated at the Hong Kong International Arbitration Center, either party may request that venue be changed to Shenzhen, a city in mainland China near Hong Kong. The governing law for the above-mentioned disputes or claims is Chinese law unless otherwise provided by Chinese law. Any such arbitration will be final and conclusive.

In June 1999, an arrangement was made between the People's Courts of the PRC and the courts of Hong Kong for mutual enforcement of arbitration awards rendered in the PRC and Hong Kong according to their respective laws. This arrangement was approved by the Supreme Court of the PRC and the Hong Kong Legislative Council and became effective on February 1, 2000.

There has not been any published report of judicial enforcement in the PRC by H shareholders of their rights under charter documents of PRC joint stock companies or the PRC company law or in the application or interpretation of the PRC or Hong Kong regulatory provisions applicable to PRC joint stock companies.

The PRC company law allows shareholders to sue, on behalf of the corporation, against persons, including corporate officers, directors, who have allegedly wronged the corporation, where the corporation itself has failed to enforce such claim against such persons directly. Class action lawsuits based on violations of securities laws are generally not available.

We are subject to the Hong Kong Exchange Listing Rules, the Hong Kong Securities and Futures Ordinance, or Securities and Futures Ordinance, and the Hong Kong Codes on Takeovers and Mergers and Share Repurchases. However, holders of H shares will not be able to bring actions on the basis of violations of the Hong Kong Stock Exchange Listing Rules and must instead rely on the Hong Kong Stock Exchange to enforce its rules. The Hong Kong Codes on Takeovers and Mergers and Share Repurchases do not have the force of law and are only standards of

commercial conduct considered acceptable for takeover and merger transactions and share repurchases in Hong Kong as established by the Securities and Futures Commission of Hong Kong and the securities and futures industry in Hong Kong. The Securities and Futures Ordinance establishes various obligations in relation to disclosure of shareholders' interests in Hong Kong listed companies, the violation of which is subject to prosecution by the Securities and Futures Commission of Hong Kong.

Table of Contents

See Item 3. Key Information Risk Factors Risks Relating to the People's Republic of China The laws in China differ from the laws in the United States and may afford less protection to our minority shareholders and Item 3. Key Information Risk Factors Risks Relating to the People's Republic of China You may experience difficulties in effecting service of legal process, enforcing foreign judgments or bringing original actions in the PRC based on U.S. or other foreign laws against us, our management and some of the experts named in the annual report .

Dividends

Our board of directors may propose dividend distributions. A distribution of dividends for any fiscal year is subject to shareholders' approval. Dividends may be distributed in the form of cash or shares or a combination of both. The H shares rank equally with A shares with regard to dividend rights. A distribution of shares must be approved by special resolution of the shareholders' meeting.

We may only distribute dividends after allowance has been made for:

recovery of accumulated losses, if any;

allocations to the statutory common reserve fund equivalent to 10% of our after-tax profits;

allocations to the general risks reserve fund equivalent to 10% of our after-tax profits, as determined under PRC GAAP; and

allocations to a discretionary common reserve fund as approved by the shareholders in a shareholders meeting.

Under Chinese law, dividends may be paid only out of distributable profits. Any distributable profits that are not distributed in a given year are retained and available for distribution in subsequent years. However, we will ordinarily not pay any dividends in a year when we do not have any distributable profits.

Payment of dividends by us is also regulated by the PRC insurance law. If we do not meet the solvency margin required by the CBIRC (formerly CIRC), we will be prohibited from paying dividends. See Item 4. Information on the Company Business Overview Regulation and Related Matters Insurance Company Regulation Solvency requirements .

Our articles of association require us to appoint, on behalf of the holders of H shares, a receiving agent that is registered as a trust corporation under the Trustee Ordinance of Hong Kong to receive dividends declared by us in respect of the H shares on behalf of such shareholders. Our articles of association require that cash dividends in respect of H shares be declared in Renminbi and paid by us in Hong Kong dollars. The depositary will convert these proceeds into U.S. dollars and will remit the converted proceeds to holders of our ADSs.

Table of Contents

Subject to the requirements under applicable PRC laws and rules of the securities regulatory authorities of the PRC, Hong Kong and United States, we may exercise the power to forfeit unclaimed dividends, provided that such power cannot be exercised until after the expiration of applicable limitation period.

We anticipate that our controlling shareholder, CLIC, may incur future operating losses arising in part from the runoff of policies retained by it in connection with the restructuring. Dividends received from us may become one of CLIC's principal means of funding these losses. Although we believe that the reserves held by CLIC and other financial resources available to it will fund substantially all of any future operating shortfalls arising out of these policies, which should reduce CLIC's reliance on dividends from us, subject to the relevant provisions of the PRC company law and our articles of association as described above and in Item 8. Financial Information Consolidated Financial Statements and Other Financial Information Policy on Dividend Distributions, CLIC may seek to increase the amount of dividends we pay in order to satisfy its cash flow requirements. See Item 3. Key Information Risk Factors Risks Relating to the Restructuring.

Dividend payments may be subject to Chinese withholding tax. See Taxation The People's Republic of China Taxation of Dividends.

Voting Rights and Shareholders Meetings

Our board of directors will convene a shareholders' annual general meeting once every year within six months from the end of the preceding fiscal year. Our board of directors must convene an interim meeting within two months of the occurrence of any of the following events:

where the number of directors is less than the number stipulated in the PRC company law or two-thirds of the number specified in our articles of association;

where our unrecovered losses reach one-third of the total amount of our share capital;

where shareholders, individually or jointly, holding 10% or more of our issued and outstanding voting shares so request in writing;

whenever our board of directors deems necessary, or more than half of directors (including at least two independent directors) or our board of supervisors so requests; or

any other event as maybe provided by applicable laws, rules, regulations or our articles of association.

All shareholders' meetings must be convened by our board of directors by written notice given to shareholders no less than 45 days before the meeting. Shareholders holding at least one-half of our total voting shares will constitute a quorum for a shareholders' meeting. If a quorum is not reached, we are required to notify our shareholders within five days by public announcement of the agenda, the date and the venue of the adjourned meeting. After the notice, we may conduct the shareholders' meeting. The accidental omission by us to give notice of a meeting to, or the non-receipt of notice of a meeting by, a shareholder will not invalidate the proceedings at that shareholders' meeting.

Shareholders at meetings have the power, among other matters, to approve or reject our profit distribution plans, annual budget, financial statements, increases or decreases in share capital, issuances of debentures, mergers, liquidation, any equity-based incentive plan and any amendment to our articles of association. In addition, the rights of a class of shareholders may not be modified or abrogated, unless approved by a special resolution of shareholders at a general shareholders meeting and by a special resolution of shareholders of that class of shares at a separate meeting. Our articles of association enumerate various amendments which would be deemed to be a modification or abrogation of the rights of a class of shareholders, including, among others, increasing or decreasing the number of shares of a class disproportionate to increases or decreases of other classes of shares, removing or reducing rights to receive dividends in a particular currency or creating shares with voting or equity rights superior to those of shares of that class. There are no restrictions under PRC law or our articles of association on the ability of investors that are not Chinese residents to hold H shares and exercise voting rights, except that holders of H shares are unable to vote online and the prior approval of the CBIRC (formerly CIRC) is required in respect of any acquisition which results in the acquirer holding more than 5% of the outstanding share capital of our company and the other restrictions set out under Item 4. Information on the Company Business Overview Regulatory and Related Matters Insurance Company Regulation Restriction of ownership in joint stock insurance companies .

Table of Contents

Each of our ordinary shares, whether it be an A share or an H share, is entitled to one vote on all matters submitted for vote at all shareholders meetings, except for meetings of a special class of shareholders where only holders of shares of the affected class are entitled to vote on the basis of one vote per share of the affected class.

Shareholders are entitled to attend and vote at meetings either in person or by proxy. Proxies must be in writing and deposited at our legal address or such other place as is specified in the meeting notice, no less than 24 hours before the time for holding the meeting at which the proxy proposes to vote or the time appointed for the passing of the relevant resolution.

Resolutions on any of the following matters must be approved by more than two-thirds of the voting rights held by shareholders who are present in person or by proxy:

an increase or decrease in our share capital or the issuance of shares, warrants, debentures and other similar securities;

our division, merger, dissolution or liquidation (shareholders who object to a proposed merger are entitled to demand that either we or the shareholders who approved the merger purchase their shares at a fair price);

amendments to our articles of association;

purchase or sale within any single year of any material assets exceeding 30% of our latest audited total assets;

any equity-based incentive plan; and

any other matters as provided under applicable laws or regulations or determined by a majority of shareholders at a general meeting to have a material impact on us and should be approved by two-thirds of the voting rights.

An amendment of shareholders rights of any class of shares must be approved by more than two-thirds of the voting rights held by holders of shares in the affected class who are present in person or by proxy.

All other actions taken by the shareholders will be approved by a majority of the voting rights held by shareholders who are present in person or by proxy at the shareholders meeting.

Any shareholder resolution that is in violation of any laws or regulations of China or the articles of association will be null and void.

Table of Contents

Liquidation Rights

We are organized as a joint stock company with limited liability of indefinite duration, but must pass the annual inspection with the SAIC. In the event of our liquidation, the H shares will rank equally with the A shares, and payment of debts out of our remaining assets is required to be made in the order of priority prescribed by applicable laws and regulations or, if no such standards exist, in accordance with such procedures as the liquidation committee that has been appointed either by us or the People's Courts of China may consider to be fair and reasonable. After payment of debts, we are required to distribute the remaining property to shareholders in proportion to the number of shares they hold.

Information Rights

Our shareholders may, subject to reasonable fees and costs, obtain a copy of our articles of association and inspect and copy all parts of our register of shareholders, personal particulars of the directors, supervisors, president and other senior officers, reports on the state of our share capital, reports showing the aggregate par value, highest and lowest price paid in respect of each class of shares repurchased by us since the end of the last accounting year and the aggregate amount paid by us for this purpose, minutes of shareholders' general meetings, and counterfoils of company debt securities, resolutions of board meetings, resolutions of board of supervisors.

Our fiscal year is the calendar year ending December 31. We must send to holders of H shares, no more than four months after the end of the relevant financial year, our annual report (including our annual accounts, together with a copy of the auditors' report thereon). Further, we must publish a preliminary results announcement no later than three months after the end of the relevant fiscal year. The results announcement in respect of the relevant financial year is required to be published on the HKSE's website no later than the time that is 30 minutes before the earlier of the commencement of the morning trading session or any pre-opening session on the next business day after approval by or on behalf of our board of directors. These and any interim financial statements must be prepared in accordance with HKFRS, IFRS or PRC GAAP in the case of a PRC issuer that has adopted PRC GAAP for the preparation of its annual financial statements. The annual financial statements must be approved by a majority of our shareholders who are present in person or by proxy at the annual general meeting.

The HKSE Listing Rules also require us to send to holders of H shares an interim report no later than three months after the end of the first six months of each fiscal year. Further, we must publish a preliminary results announcement no later than two months after the end of the six-month period. The results announcement in respect of the relevant six-month period is required to be published on the HKSE's website no later than the time that is 30 minutes before the earlier of the commencement of the morning trading session or any pre-opening session on the next business day after approval by or on behalf of our board of directors.

According to the HKSE Listing Rules, where in the view of the HKSE there is or there is likely to be a false market in our securities, we must, as soon as reasonably practicable after consultation with the HKSE, announce the information necessary to avoid a false market in our securities. In addition, according to the provisions of inside information under the Securities and Futures Ordinance of Hong Kong, we must, as soon as reasonably practicable after any inside information has come to our knowledge, disclose the information to the public. Inside information, in relation to a listed corporation, means specific information that

Table of Contents

is about the corporation, a shareholder or officer of the corporation, or the listed securities of the corporation or their derivatives; and

is not generally known to the persons who are accustomed or would be likely to deal in the listed securities of the corporation but would if generally known to them be likely to materially affect the price of the listed securities. Depending on the size of the transaction, we may also be required to disclose to our shareholders details of various acquisitions or disposals of assets and other transactions (including transactions with controlling shareholders).

Restrictions on Transferability and the Share Register

Unless otherwise permitted by relevant PRC rules or regulations or approved by relevant PRC authorities, H shares may be traded only among investors who are legal or natural persons resident outside of China, and may not be sold to investors resident within the PRC. There are no restrictions under PRC law or our articles of association on the ability of investors who are not PRC residents to hold H shares. However, under relevant PRC law, a legal person resident outside of China is only allowed to hold not more than 20% of our issued share capital and legal persons resident outside of China are only allowed to hold in aggregate not more than 25% of our issued share capital, unless otherwise approved by competent authorities.

We are required to keep a register of our shareholders comprised of various parts, including one part which is to be maintained in Hong Kong in relation to holders of H shares. Shareholders have the right to inspect and, for a reasonable charge, to copy the share register. No transfers of ordinary shares will be recorded in our share register within thirty days prior to the date of a shareholders' general meeting or within five days prior to the record date established for the purpose of distributing a dividend.

We have appointed Computershare Hong Kong Investor Services Limited to act as the registrar of our H shares. This registrar maintains our register of holders of H shares and enters transfers of H shares in such register upon the presentation of the documents described above.

Increases in Share Capital

Under our articles of association, issuance of new securities, including ordinary shares, securities convertible into ordinary shares, options, warrants or similar rights to subscribe for any ordinary shares or convertible securities, must be approved by at least two-thirds of the shareholders who attend the shareholders meeting in person or by proxy. In addition, the issuance of A shares or H shares must be approved by two-thirds of the class of domestic shares or H shares, as the case may be, unless the number of shares to be issued shall not exceed 20% of the number of shares of the same class then outstanding in any 12-month period.

A special resolution was passed at the shareholders' annual general meeting held on May 31, 2017 to authorize our board of directors to issue additional shares, and amend the articles of association accordingly, in a nominal amount of no more than 20% of the aggregate nominal amount of our H shares in issue as at the date of such resolution, by the conclusion of next shareholders' annual general meeting, or the expiration of the 12-month period following the passing of this resolution, or the date on which the resolution is otherwise revised or revoked by a special resolution of our shareholders, whichever is the earliest.

Table of Contents

Shareholders are not liable to make any further contribution to the share capital other than according to the terms that were agreed upon by the subscriber of the relevant shares at the time of subscription. New issues of shares must also be approved by relevant Chinese authorities.

Decreases in Share Capital and Repurchases

We may reduce our registered share capital only upon obtaining the approval of at least two-thirds of the shareholders who attend the shareholders meeting in person or by proxy and, in certain circumstances, of relevant Chinese authorities. The number of H shares that may be repurchased is subject to the Hong Kong Codes on Takeovers and Mergers and Share Repurchases.

Restrictions on Ownership

Equity interests held by a single shareholder, including its related parties and persons acting in concert, must not exceed one-third of the registered capital of a single insurance company. An exception to the one-third cap applies to insurance companies establishing or investing in other insurance companies for the purposes of innovation and specialization of their business, or consolidating their operations under a single group management. See Item 4. Information on the Company Business Overview Regulation and Related Matters Insurance Company Regulation Restriction of ownership in joint stock insurance companies .

Restrictions on Large or Controlling Shareholders

Our articles of association define a controlling shareholder as any person who acting alone or in concert with others:

is in a position to elect more than one-half of the board of directors;

has the power to exercise, or to control the exercise of, 30% or more of our voting rights;

holds 30% or more of our issued and outstanding shares; or

has de facto control of us in any other way.

As of the date of this annual report, CLIC, a wholly state-owned enterprise, is our only controlling shareholder.

Our articles of association provide that, in addition to any obligation imposed by laws and administrative regulations or required by the Hong Kong Stock Exchange Listing Rules, a controlling shareholder shall not exercise its voting rights in a manner prejudicial to the interests of other shareholders:

to relieve a director or supervisor from his or her duty to act honestly in our best interests;

to approve the appropriation by a director or supervisor, for his or her own benefit or for the benefit of any other person, of our assets in any way, including without limitation opportunities which may be advantageous to us; or

to approve the appropriation by a director or supervisor, for his or her own benefit or for the benefit of another person, of the individual rights of other shareholders, including without limitation rights to distributions and voting rights (except in accordance with a restructuring of our company which has been approved by the shareholders at a general meeting in accordance with our articles of association).

Table of Contents

Our articles of association also provide that a controlling shareholder or an actual controlling person shall not exploit its affiliated relation in a manner prejudicial to the interest of our company, and shall be liable for any losses suffered by us as a result thereof. The controlling shareholder or actual controlling person shall have fiduciary duties to both our company and our public shareholders. The controlling shareholder shall exercise its rights as a capital contributor of our company in strict compliance with the law. The controlling shareholder shall not cause any damage to the lawful rights and interest of our company and our public shareholders through, among others, any connected transactions, profit distribution, asset restructuring, external investment, fund appropriation and loan guarantee, or impair the interest of our company and our public shareholders through its controlling position.

Board of Directors

Our non-employee directors are elected by our shareholders at shareholders' general meetings, and employee directors are elected by our employees or other democratic means at the employee representative conference. Directors are elected for a term of three years and may serve consecutive terms if re-elected.

Article 23 of Special Regulations on the Overseas Offering and Listing of Shares by Joint Stock Limited Companies provides that directors, supervisors, and senior officers of a company owe duties of honesty, care and diligence to their company.

Our articles of association provide that, in exercising their duties and powers, our directors, supervisors and senior officers will act with the care, diligence and skills that are expected of a reasonable person under similar circumstances, observe fiduciary principles and not place themselves in a situation where their interests conflict with the duties they are charged with performing. In addition to these fiduciary duties to our company, each director, supervisor and officer is obligated to each shareholder:

to act honestly in our company's best interests;

not to exploit corporate assets for personal gains; and

not to expropriate the rights of our shareholders.

If directors, supervisors or officers are found to have misappropriated our company's assets or misused their position for personal gain, the PRC company law provides that any misappropriated or misused property be returned and any illegal proceeds received by such director, supervisor or officer be confiscated, and allows us to impose punishment on them. In serious cases, criminal liability may also be imposed. According to our articles of association, our shareholders may bring a derivative suit against any director, supervisor or officer who has breached his fiduciary duties. Most disputes between H shareholders and directors, supervisors and officers are required to be resolved by final and binding arbitration.

Moreover, our articles of association provide that our directors, supervisors and senior officers must not enter into transactions or contracts with us or agree to make corporate loans to any persons or provide guarantees for loans of any shareholder or any other person with corporate assets. In particular, our directors, supervisors and senior officers have obligations to disclose to the board of directors any direct or indirect material interest they may have in any contracts or transactions with us. They may not vote on any contracts, transactions or arrangements in which they have any material interest. Further, we may not make loans or provide guarantees to directors, supervisors or senior

officers, unless such loans or guarantees are approved at a shareholders meeting or made in the ordinary course of business and to the extent permitted by applicable laws. All decisions relating to the compensation of directors are made at shareholders meetings.

Table of Contents

There are no provisions under our articles of association or PRC law which relate to:

the retirement or non-retirement of directors under any age limit requirement;

directors' borrowing power; or

number of shares required for directors' qualification.

Subject to all relevant laws and administrative regulations, the shareholders may remove any director before the expiration of his or her term of office by a majority vote of the shareholders present in person or by proxy at shareholders' general meetings. A director, supervisor, president, vice president or other senior officer may be relieved of liability for a specific breach of his or her duties by the consent of shareholders so long as specified conditions are met.

Board of Supervisors

Our board of supervisors consists of five supervisors. At least one-third of our board of supervisors must be employee representatives elected by our employees. The remaining members must be elected by our shareholders in a general meeting. One member of our board of supervisors is designated as the chairman. Members of the board of supervisors may not serve as director, president, vice president or other senior management of our company. The term of office for our supervisors is three years, which is renewable upon re-election.

The primary duty of the board of supervisors is to monitor our financial matters and management. The board of supervisors' powers are generally limited to carrying out investigations and reporting to shareholders, the China Securities Regulatory Commission and other relevant governmental authorities having jurisdiction over our affairs and to convening shareholders' interim meetings. Reasonable expenses incurred by the board of supervisors in carrying out its duties will be paid by us.

Our supervisors owe fiduciary duties to our company and our shareholders. Please see the discussion of the duties and the nature of recourse our shareholders may have against supervisors in breach of these duties in the subsection entitled "Board of Directors".

The board of supervisors is accountable, and will report, to the shareholders at the shareholders' general meetings.

Certain Differences Between PRC Company Law and Delaware Corporate Law

The PRC company law and other laws applicable to us differ in a number of respects from laws generally applicable to United States corporations and their shareholders. The description set forth below includes a summary of certain provisions of the PRC company law, Special Rules, Mandatory Provisions and the Guidelines applicable to companies listed both in the PRC and overseas, such as us, which differ from provisions of the corporate law of the State of Delaware.

Table of Contents***General***

We are a PRC joint stock company, which is a corporate entity organized under the PRC company law. Under the PRC company law, the registered capital of a joint stock company is divided into shares of equal par value. These shares are commonly called domestic ordinary shares. Each share of a joint stock company ranks equally with all other shares in its class as to voting rights (except for specified class voting rights) and rights to dividends and other distributions. Upon receiving approval from the relevant authorities, a joint stock company may offer its shares for sale to the public and seek to be listed on a stock exchange. The State Council may formulate separate regulations for the issuance of other classes of shares, including H shares. All of our issued shares are fully paid and nonassessable. Holders of H shares may transfer their shares without the approval of other shareholders. Among other things, a joint stock company must have (1) a board of directors of not fewer than five and not more than 19 members, and (2) a board of supervisors of not fewer than three members.

The shareholders' meeting of a joint stock company is the highest authority of the company and exercises the powers of the company with respect to significant matters, subject to applicable law and the articles of association of the company. The business of a joint stock company is under the overall management of a board of directors, subject to the PRC company law, other applicable laws and regulations (which in our case include the PRC insurance law and regulations), the company's articles of association and duly adopted resolutions of its shareholders. The day-to-day operations of a joint stock company are under the direction of its general manager or president, subject to applicable laws and regulations, the company's articles of association and duly adopted resolutions of the directors and shareholders. In addition, the PRC company law provides for the establishment of a board of supervisors for each joint stock company. The supervisors perform and exercise the functions and powers described below, including examination of the joint stock company's affairs and monitoring the actions of the directors and officers of the company. The directors, supervisors and officers are not required to hold any qualifying shares in the joint stock company.

A joint stock company may be liquidated involuntarily due to insolvency or voluntarily in accordance with the terms of its articles of association or duly adopted shareholders' resolutions. The property of a joint stock company remaining after full payment of its liquidation expenses, wages, labor insurance premiums of its employees and statutory compensations, outstanding taxes and debts, is distributed in proportion to the holdings of its shareholders.

Meetings of shareholders

Under PRC law, shareholders are given the power to approve specified matters. See [Voting Rights and Shareholders Meetings](#) . In addition, the Mandatory Provisions provide that at shareholders' meetings shareholders are entitled to consider any proposals made by shareholders holding in the aggregate at least 3% of voting power over the company's shares. These proposals must fall within the scope of powers of the shareholder's meeting, have a clear agenda and specific matters and comply with laws, administrative regulations and articles of association of the company.

Under Delaware law, the business and affairs of a Delaware corporation are, in general, managed by or under the direction of its board of directors. Only certain fundamental matters regarding the corporation are reserved by statute to be exercised by the shareholders. These matters include, in general, election or removal of directors, retention or dismissal of the corporation's independent auditors, mergers or other business combinations involving the corporation, amendment of the corporation's certificate of incorporation and liquidation or dissolution of the corporation.

Table of Contents

Shareholders approval by written consent

PRC law does not provide shareholders of overseas listed joint stock companies with rights to approve corporate matters by written consent. Under Delaware law, unless otherwise provided in the certificate of incorporation, any action which is required or permitted to be taken at any shareholders meeting may be taken without a meeting, subject to various conditions.

Amendments of articles of association

Under PRC law, an amendment of the articles of association must be approved by an affirmative vote of two-thirds of shareholders attending a shareholders meeting. Amendments with respect to the Mandatory Provisions only become effective after approval by the relevant governmental department authorized by the State Council and the China Securities Regulatory Commission.

Under Delaware law, with certain exceptions, shareholder approvals must be obtained for any amendment to the certificate of incorporation. Board approvals are also required for any amendment to the certificate of incorporation, but no governmental approval is generally required.

Powers and responsibilities of directors

Under PRC law, the board of directors is responsible for specified actions, including the following functions and powers of a joint stock company:

convening shareholders meetings and reporting its work to shareholders at these meetings;

implementing shareholders resolutions;

determining the company's business plans and investment proposals;

formulating the company's annual financial budgets and final accounts;

formulating the company's profit distribution plans and loss recovery plans;

formulating proposals for the increase or decrease in the company's registered capital and the issue of debentures;

formulating major acquisition and disposal plans and plans for the merger, division or dissolution of the company;

to the extent authorized by the shareholders' meeting, deciding on such matters as external investments, purchase or sale of assets, assets pledge and connected transactions of the company;

deciding on the company's internal management structure and formulating its basic management system; and

appointing or removing the company's principal executive officers; appointing and removing other senior officers based on the recommendation of the principal executive officer and deciding on the remuneration of the senior officers.

Table of Contents

In addition, the Mandatory Provisions provide that the board has the authority to formulate any proposal to amend the articles of association and to exercise any other power conferred by a decision of the shareholders' meeting.

Under Delaware law, the business and affairs of a Delaware corporation are managed by or under the direction of its board of directors. Their powers include fixing the remuneration of directors, except as otherwise provided by statute or in the certificate of incorporation or by-laws of the corporation.

Powers and responsibilities of supervisors

Under PRC law, a PRC joint stock company must have a board of supervisors consisting of shareholder representatives and one or more employee representatives. Supervisors attend board meetings as non-voting observers. Directors, officers and company personnel in charge of financial matters may not serve as supervisors. The supervisors perform and exercise the following functions and powers:

examining the company's financial affairs;

monitoring compliance with laws, regulations, the articles of association of the company and the shareholders' resolutions by the directors and officers of the company; and suggesting removing the directors and officers who violate these laws and regulations;

requiring corrective action from directors and officers whose actions are contrary to the interests of the company;

examining the financial information, including financial statements, operation reports and plans for profit distribution, to be submitted by the board of directors to the shareholders' meetings; and authorizing, in the company's name, public certified accountants or licensed auditors to assist in the re-examination of such information, should any doubt arise in respect thereof;

proposing the holding of extraordinary shareholders' meetings;

proposing new items to be inserted in the agenda of the shareholders' meeting;

bringing lawsuits against directors or members of senior management, if they violate laws, regulations or articles of association of the company; and

exercising and performing other powers and functions provided for in the company's articles of association. In addition, the Mandatory Provisions provide that supervisors of overseas listed joint stock companies are entitled to retain auditors in the name of the company to examine any financial or business reports or profit distribution proposals to be submitted by the directors to a meeting of the shareholders which the supervisors consider questionable, and

negotiate or take legal action against any director or the directors in the name of the company. The fees and expenses of attorneys and other professionals incurred by the supervisors in connection with the discharge of their duties are to be paid by the company.

Delaware law makes no provision for a comparable corporate institution.

Table of Contents

Duties of directors, supervisors and officers

Under PRC law, directors, supervisors and officers of a joint stock company are required to comply with relevant laws and regulations and the company's articles of association. A director, supervisor or officer who contravenes any law, regulation or the company's articles of association in the performance of his duties shall be personally liable to the company for any loss incurred by the company. Directors, supervisors and officers are required to carry out their duties honestly and diligently, and protect the interests of the company. They are also under a duty of confidentiality to the company and prohibited from divulging confidential information concerning the company, except as permitted by relevant laws and regulations or by a decision of a shareholders' meeting. They may not use their position and authority in the company to seek personal gain. Directors and officers may not directly or indirectly engage in the same business as the company or in any other business detrimental to the interests of the company, and they are required to forfeit any profits from these activities to the company.

Under Delaware law, the business and affairs of a corporation are managed by or under the direction of its board of directors. In exercising their powers, directors are charged with a fiduciary duty of care to protect the interests of the corporation and a fiduciary duty of loyalty to act in the best interests of its shareholders.

Limitations on transactions with interested directors, supervisors and officers

Under PRC law, directors and officers of a joint stock company may not enter into any contracts or transactions with the company unless permitted by the articles of association or approved by the shareholders. A company may not provide any guarantees to shareholders or any de facto control person of the company unless such guarantees are approved by a majority of shareholders present at the shareholders' meeting, excluding the shareholder who will be provided such guarantees. Under the Mandatory Provisions, a director, supervisor or officer is required to disclose to the board any transaction with the company in which he has a direct or indirect interest or in which there is a material conflict of interest between the company and himself. A director is not entitled to vote or be counted for quorum purposes in any board decision on any such transaction. A company may set aside any interested transaction which did not comply with these requirements, unless the other party to such transaction was honestly unaware of the breach of obligations by the interested director, supervisor or officer. A company may not loan or provide any guarantees to directors, supervisors or officers (including persons related to them), except for the loans made in accordance with employment contracts approved by the shareholders, or unless the company's business scope allows for the provision of loans and guarantees and such loans or guarantees are made under regular commercial terms.

Under Delaware law, an interested transaction is not voidable if (1) the material facts as to the interested director's relationship or interests are disclosed or are known to the board of directors and the board in good faith authorizes the transaction by the affirmative vote of a majority of the disinterested directors, (2) such material facts are disclosed or are known to the shareholders entitled to vote on such transaction and the transaction is specifically approved in good faith by vote of the majority of shares entitled to vote thereon or (3) the transaction is fair as to the corporation as of the time it is authorized, approved or ratified. Under Delaware law, the interested director could be held liable for a transaction in which such a director derived an improper personal benefit.

Election and removal of directors

Under PRC law, the term of office of directors of a joint stock company must be specified in the articles of association, but may not exceed three years. Directors may be re-elected. No director may be removed from office without cause by shareholders prior to the expiration of the director's term. PRC law does not contemplate a classified board of directors.

Table of Contents

Under Delaware law, directors of a Delaware corporation can be removed from office with or without cause by the holders of a majority of shares then entitled to vote at an election of directors, provided that except where the certificate of incorporation of the Delaware corporation otherwise provides, a member of a classified board may be removed by shareholders only for cause, and in a corporation with cumulative voting, if less than all of the directors are removed, no director may be removed if the votes cast against the director's removal is sufficient to elect the director if cumulatively voted at an election of directors. The Court of Chancery may remove a director who has been convicted of a felony or found by a court to have committed a breach of the duty of loyalty in connection with his or her duties to the corporation following application by the corporation or derivatively in the right of the corporation by any shareholder. The court may order the removal only if it determines that the director did not act in good faith in performing the acts resulting in the prior conviction or judgment and that removal is necessary to avoid irreparable harm to the corporation.

Dividend payments

Under PRC law, proposals for distribution of profits are formulated by the board of directors and submitted for shareholder approval at a shareholders' meeting. Dividends may be distributed in the form of cash or shares.

Under Delaware law, the board of directors of a Delaware corporation may declare dividends out of distributable earnings and profits without the approval of the shareholders.

Amalgamations and business combinations; appraisal rights

Under PRC law, amalgamations and divisions involving joint stock companies are required to be approved by shareholders voting at a shareholders' meeting. The Mandatory Provisions require an amalgamation or division involving the company to be approved by an affirmative vote of two-thirds of the votes present at the shareholders' meeting called to consider the transaction. Any opposing shareholder may request the company or the consenting shareholders to purchase its shares at a fair price. In addition, a sale of fixed assets having a value exceeding 33% of the fixed assets as shown on the company's latest balance sheet most recently reviewed by the shareholders' meeting requires the approval of at least one third of the shareholders' meeting.

Under Delaware law, with certain exceptions, a merger, consolidation or sale of all or substantially all the assets of a corporation must be approved by the board of directors and holders of a majority of the outstanding shares entitled to vote. A shareholder objecting to the merger is entitled to appraisal rights pursuant to which the shareholder may receive cash in the amount of the fair value of the shares held by such shareholder (as determined by a court) in lieu of the consideration the shareholder would otherwise receive in the transaction.

Transactions with significant shareholders

Under Delaware law, a business combination between a Delaware corporation and an interested shareholder which takes place at any time during a period of three years commencing with the date the interested shareholder became an interested shareholder would need prior approval from the board of directors or a supermajority of the shareholders of the corporation, unless the corporation opted out of the relevant Delaware business combination statute. Under Delaware law, an interested shareholder of a corporation is someone who, together with its affiliates and associates, owns more than 15% of the outstanding common shares of the corporation. No such business combination statute or regulation applies to PRC joint stock companies.

Table of Contents

Shareholders lawsuits

The PRC law provides that most disputes involving an H shareholder are to be resolved by final and binding arbitration.

Class actions and derivative actions generally are available to shareholders under Delaware law for, among other things, breach of fiduciary duty, corporate waste and actions not taken in accordance with applicable law.

Limitations on liability and indemnification of directors and officers

PRC law does not provide for any specific limitations on liability or indemnification of directors and officers.

Under Delaware law, a corporation may indemnify a current director or officer of the corporation against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred in defense of an action, suit or proceeding by reason of such position if (1) the director or officer acted in good faith and in a manner he reasonably believed to be in or not opposed to the best interests of the corporation and (2) with respect to any criminal action or proceeding, the director or officer had no reasonable cause to believe that his conduct was unlawful. Persons serving at the request of the corporation as directors, officers, employees or agents of another entity such as a subsidiary or an employee stock trust may receive advancement of expenses from the corporation. A corporation may not retroactively impair or eliminate indemnification or advancement rights by amending the corporation's certificate of incorporation or bylaws after the occurrence of the act or omission that gives rise to indemnification or advancement rights, unless the provision contains, at the time of the act or omission, an explicit authorization of such elimination or limitation.

Shareholders' rights of inspection of corporate records

Under PRC law, shareholders are entitled to inspect the articles of association, register of shareholders, corporate bond counter foils, minutes of shareholders' meetings and board meetings and reports of the financial accounts of the company. In addition, the Mandatory Provisions provide that, after paying reasonable fees, shareholders are entitled to inspect the company's shareholder list, certain personal information on the directors, supervisors and officers, the company's capital position and certain information regarding share repurchases conducted by the company during the most recent fiscal year.

Delaware law permits any shareholder of a Delaware corporation to examine or obtain copies of or extracts from the corporation's shareholder list and its other books and records for any purpose reasonably related to such person's interest as a shareholder.

C. MATERIAL CONTRACTS

See Item 7. Major Shareholders and Related Party Transactions - Related Party Transactions for certain arrangements we have entered into with CLIC, AMC, China Life Pension, CLPCIC, IHC, China Life Wealth, CGB, AMP and Chongqing Trust.

Table of Contents**D. EXCHANGE CONTROLS**

The Renminbi currently is not a freely convertible currency. The SAFE, under the authority of the PBOC, controls the conversion of Renminbi into foreign currency. Until July 20, 2005, the PBOC had been setting and publishing daily a base exchange rate with reference primarily to the supply and demand of Renminbi against the U.S. dollar in the market during the prior day. The PBOC also took into account other factors, such as the general conditions existing in the international foreign exchange markets. From 1994 to July 20, 2005, the official exchange rate for the conversion of Renminbi to U.S. dollars was generally stable. On July 21, 2005, the PRC government introduced a managed floating exchange rate system to allow the value of the Renminbi to fluctuate within a regulated band based on market supply and demand and by reference to a basket of currencies. Under this system, the PBOC announces the closing price of a foreign currency traded against the Renminbi in the inter-bank foreign exchange market after the closing of the market on each working day, and makes it the central parity for the trading against the Renminbi on the following working day. On August 11, 2015, the PBOC adjusted the quotation mechanism of the Renminbi central parity to also consider demand and supply in foreign exchange markets and price movements of major currencies, in addition to the closing price on the previous working day. On May 26, 2017, the PBOC introduced the counter-cyclical factor into its formula that determines a central parity of the Renminbi against the U.S. dollar. Under the current mechanism, the central parity of the Renminbi against the U.S. dollar is determined based on the closing price, changes in a basket of currencies and the counter-cyclical factor. See Item 3. Key Information Risk Factors Risks Relating to the People's Republic of China Government control of currency conversion and the fluctuation of the Renminbi may materially and adversely affect our operations and financial results .

Although PRC governmental policies were introduced in 1996 to reduce restrictions on the convertibility of Renminbi into foreign currency for current account items, conversion of Renminbi into foreign exchange for capital items, such as foreign direct investment, loans or securities, requires the approval of the SAFE and other relevant authorities. Although experimental policies were recently introduced in certain pilot areas such as the Shanghai free trade zone to reduce foreign exchange control, restrictions on the convertibility of Renminbi into foreign currency still remain in force in most parts of China.

In the event of shortages of foreign currencies, we may be unable to convert sufficient Renminbi into foreign currency to meet our foreign currency obligations or to pay dividends in foreign currency.

Our H shares are traded on the Hong Kong Stock Exchange. There are no limitations on the right of non-resident or foreign owners to remit dividends or capital including capital gains imposed by Hong Kong law.

E. TAXATION

The taxation of income and capital gains of holders of H shares or ADSs is subject to the laws and practices of China and of jurisdictions in which holders of H shares or ADSs are resident or otherwise subject to tax. The following summary of certain relevant taxation provisions is based on current law and practice, is subject to change and does not constitute legal or tax advice. The discussion does not deal with all possible tax consequences relating to an investment in the H shares or ADSs. In particular, the discussion does not address the tax consequences under state, local and other laws, such as non-U.S. federal laws other than the laws of the PRC and Hong Kong. Accordingly, you should consult your own tax adviser regarding the tax consequences of an investment in the H shares and ADSs. The discussion is based upon laws and relevant interpretations in effect as of the date of this annual report, all of which are subject to change.

Table of Contents**The People's Republic of China**

The following is a discussion of the material Chinese tax provisions relating to the ownership and disposition of H shares or ADSs held by the investors as capital assets. This discussion does not address all of the tax considerations that may be relevant to specific investors in light of their particular circumstances or to other investors subject to special treatment under the tax laws of the PRC. This discussion is based on the tax laws of China as in effect as of the date of this annual report, as well as on the Agreement between the United States of America and the People's Republic of China for the Avoidance of Double Taxation, or the China-U.S. Tax Treaty, all of which are subject to change (or changes in interpretation), possibly with retroactive effect.

This discussion does not address any aspects of Chinese taxation other than income taxation, capital taxation, stamp taxation and estate taxation. Prospective investors are urged to consult their tax advisers regarding Chinese and other tax consequences of owning and disposing of H shares.

Taxation of Dividends

Individual investors. According to the PRC Individual Income Tax Law, as amended, dividends paid by Chinese companies are ordinarily subject to a Chinese withholding tax levied at a flat rate of 20%. For a foreign individual who is not a resident of China, the receipt of dividends from a company in China is normally subject to a withholding tax of 20% unless reduced pursuant to an applicable tax treaty. According to a notice issued by the Chinese State Administration of Taxation, or the SAT, on June 28, 2011, if the withholding tax rate under applicable tax treaties is 10% or less, the receipt of dividends will be subject to 10% withholding tax; and if the withholding tax rate under applicable tax treaties is between 10% and 20%, the receipt of dividends will be subject to the actual tax rate as agreed under such tax treaties.

Enterprises. According to the PRC Enterprise Income Tax Law and its implementation rules, effective on January 1, 2008, and the Circular on Issues Relating to the Withholding of Enterprise Income Tax for Dividends Distributed by Resident Enterprises in China to Non-resident Enterprises Holding H-shares of the Enterprises, issued by the SAT on November 6, 2008, resident enterprises in China are required to, in distributing dividends for 2008 or any year hereafter to non-resident enterprises holding Overseas Shares including H-shares and ADSs of the enterprises, withhold enterprise income tax for such dividends at a tax rate of 10%. Non-resident enterprises holding H shares of any resident enterprise can, after receiving dividends due to them, apply for preferential tax treatment with competent tax authorities in accordance with tax treaties.

Tax treaties. Investors who do not reside in China and reside in countries that have entered into treaties for the avoidance of double-taxation with China may be entitled to a reduction of the withholding tax imposed on the payment of dividends to our investors who do not reside in China. China currently has treaties for the avoidance of double-taxation with a number of other countries, which include Australia, Canada, France, Germany, Japan, Malaysia, the Netherlands, Singapore, the United Kingdom and the United States.

Under the China-U.S. Tax Treaty, China may tax a dividend paid by us to an Eligible U.S. Holder up to a maximum of 10% of the gross amount of the dividend. For the purposes of this discussion, an Eligible U.S. Holder is a U.S. holder that (i) is a resident of the United States for the purposes of the China-U.S. Tax Treaty, (ii) does not maintain a permanent establishment or fixed base in China to which H shares are attributable and through which the beneficial owner carries on or has carried on business (or, in the case of an individual, performs or has performed independent personal services) and (iii) is not otherwise ineligible for benefits under the China-U.S. Tax Treaty with respect to income and gains derived in connection with the H shares.

Table of Contents***Taxation of Capital Gains***

According to the PRC Enterprise Income Tax Law and its implementation rules, effective on January 1, 2008, capital gains realized by foreign enterprises which have no establishment or residence in China or whose capital gains from China do not relate to their establishment or residence in China, are ordinarily subject to enterprise income tax at the rate of 10% with respect to the gains realized within China, unless reduced pursuant to an applicable tax treaty.

According to the Interim Administrative Measures on the Source Withholding of Income Tax of Non-resident Enterprise issued by the SAT on January 9, 2009, where both parties to an equity transfer transaction are non-resident enterprises and where the transfer occurs outside of China, the non-resident enterprise receiving income shall pay taxes to the tax authority in the locality of the resident enterprise whose equity was transferred, either directly or by a representative. The resident enterprise whose equity was transferred shall assist the tax authority with the collection of taxes from the non-resident enterprise.

According to the PRC Individual Income Tax Law, as amended, capital gains realized by individuals upon the transfer of shares, including Overseas Shares, are subject to capital gains tax levied at a flat rate of 20%; and relevant tax authorities are authorized to promulgate implementation rules in this regard. To date, the relevant tax authorities have not promulgated any implementation rules on the taxation of capital gains realized by individuals upon the transfer of shares, including Overseas Shares. If the relevant tax authorities promulgate such implementation rules in the future, a 20% tax may be levied on capital gains realized by foreign individuals in accordance with the PRC Individual Income Tax Law, as amended, unless reduced pursuant to an applicable tax treaty. To date, the relevant tax authorities have not collected capital gains tax on the income from the transfer of shares.

Additional Chinese Tax Considerations

Chinese stamp duty. Chinese stamp duty imposed on the transfer of shares of Chinese publicly traded companies under the Provisional Regulations of China Concerning Stamp Duty should not apply to the acquisition and disposal by non-Chinese investors of H shares or ADSs outside of China by virtue of the Provisional Regulations of China Concerning Stamp Duty, which became effective on October 1, 1988 and which provide that Chinese stamp duty is imposed only on documents executed or received within China that are legally binding in China and are protected under Chinese law.

Estate tax. No liability for estate tax under Chinese law will arise from non-Chinese nationals holding H shares.

Investors under the Shanghai-Hong Kong Stock Connect Program. According to the Notice on Tax Policies for the Shanghai-Hong Kong Stock Connect Pilot Program, jointly issued by the MOF, SAT and CSRC which became effective on November 17, 2014, between November 17, 2014 to November 16, 2017, gains realized by Chinese individual investors upon a transfer of H shares through the Shanghai-Hong Kong Stock Connect program were exempted from individual income tax. Gains realized by Chinese enterprise investors upon a transfer of H shares through the Shanghai-Hong Kong Stock Connect program must be included in their gross income and subject to enterprise income tax. For dividends received by Chinese individual investors and securities investment funds from investing in H shares through the Shanghai-Hong Kong Stock Connect program, the Chinese issuer of such H shares must withhold income tax at a tax rate of 20%. Dividends received by Chinese enterprise investors from investing in H shares through the Shanghai-Hong Kong Stock Connect program must be included in their gross income and subject to enterprise income tax, and the Chinese issuer of such H shares will not withhold income tax for the dividends. The enterprise investors in these circumstances must make tax filings by themselves. According to the Notice on Continuation of the Tax Policies for the Shanghai-Hong Kong Stock Connect Pilot Program, which was jointly issued by the MOF, SAT and CSRC and became effective on November 17, 2017, gains realized by Chinese

individual investors upon a transfer of H shares through the Shanghai-Hong Kong Stock Connect Program are further exempted from individual income tax for the period from November 17, 2017 to December 4, 2019.

Table of Contents**Hong Kong**

The following is a discussion of the material Hong Kong tax provisions relating to the ownership and disposition of H shares or ADSs held by the investors as capital assets. This discussion does not address all of the tax considerations that may be relevant to specific investors in light of their particular circumstances or to investors subject to special treatment under the tax laws of Hong Kong. This discussion is based on the tax laws of Hong Kong as in effect on the date of this annual report, which are subject to change (or changes in interpretation), possibly with retroactive effect. This discussion does not address any aspects of Hong Kong taxation other than income taxation, capital taxation, stamp taxation and estate taxation. Prospective investors are urged to consult their tax advisers regarding Hong Kong and other tax consequences of owning and disposing of H shares.

Tax on Dividends

Under current practice, no tax is payable in Hong Kong in respect of dividends paid by us.

Tax on Gains from Sale

No tax is imposed in Hong Kong in respect of capital gains from the sale of property. However, trading gains from the sale of property by persons carrying on a trade, profession or business in Hong Kong where the gains are derived from or arise in Hong Kong from such trade, profession or business will be chargeable to Hong Kong profits tax, which is imposed at the rate of 16.5% on corporations and at a rate of 15% on unincorporated businesses for the year of assessment 2008/09 onwards. Commencing from the year of assessment 2018/19 (i.e. on or after 1 April 2018), the profits tax rate for the first HK\$2,000,000 of profits of corporations will be lowered to 8.25% while the remaining profits will continue to be taxed at the rate of 16.5%; and the profits tax rate for the first HK\$2,000,000 of profits of unincorporated businesses will be lowered to 7.5%, while the remaining profits will continue to be taxed at the rate of 15%.

Trading gains from sales of H shares effected on the Hong Kong Stock Exchange will be considered to be derived from or arise in Hong Kong. Liability for Hong Kong profits tax would thus arise in respect of trading gains from sales of H shares effected on the Hong Kong Stock Exchange realized by persons carrying on a business of trading or dealing in securities in Hong Kong.

There will be no liability for Hong Kong profits tax in respect of profits from the sale of ADSs, where purchases and sales of ADSs are effected outside Hong Kong, for example, on the New York Stock Exchange.

Stamp Duty

Hong Kong stamp duty, currently charged at the *ad valorem* rate of 0.1% on the higher of the consideration for, or the market value of, the H shares, will be payable by the purchaser on every purchase and by the seller on every sale of H shares (in other words, a total of 0.2% is currently payable on a typical sale and purchase transaction involving H shares). In addition, a fixed duty of HK\$ 5.00 is currently payable on any instrument of transfer of H shares. If stamp duty is not paid on or before the due date, a penalty of up to ten times the duty payable may be imposed.

Table of Contents

The withdrawal of H shares upon the surrender of ADRs, and the issuance of ADRs upon the deposit of H shares, will also attract stamp duty at the rate described above for sale and purchase transactions unless such withdrawal or deposit does not result in a passing of the beneficial interest in the H shares under Hong Kong law. The issuance of the ADRs upon the deposit of H shares issued directly to the depository of the ADSs, or for the account of the depository, will not be subject to any stamp duty. No Hong Kong stamp duty is payable upon the transfer of ADSs outside Hong Kong.

Estate Duty

The Revenue (Abolition of Estate Duty) Ordinance 2005 came into effect on February 11, 2006 in Hong Kong. No Hong Kong estate duty is payable and no estate duty clearance papers are needed for an application for a grant of representation in respect of holders of H shares whose deaths occur on or after February 11, 2006.

United States of America

The following is a discussion of the material United States federal income tax consequences relating to the purchase, ownership and disposition of H shares or ADSs by U.S. Holders (as defined below) that acquire H shares or ADSs for cash and hold them as capital assets. This discussion is based on the Internal Revenue Code of 1986, as amended, or the Code, Treasury regulations promulgated thereunder, and administrative and judicial interpretations thereof, all as in effect on the date hereof and all of which are subject to change, possibly with retroactive effect. This discussion does not address all of the tax considerations that may be relevant to specific U.S. Holders in light of their particular circumstances or to U.S. Holders subject to special treatment under U.S. federal income tax law (such as banks, insurance companies, tax-exempt entities, retirement plans, regulated investment companies, real estate investment trusts, partnerships, dealers in securities, or other U.S. Holders that generally mark their securities to market for U.S. federal income tax purposes, certain former citizens or residents of the United States, persons who have acquired our H shares or ADSs as part of a straddle, hedge, conversion, or other integrated investment, persons who own, directly or by attribution, 10% or more of the combined voting power or value of all classes of stock of China Life or persons that have a functional currency other than the U.S. dollar). This discussion does not address any U.S. state or local or any U.S. federal estate, gift or alternative minimum tax considerations.

As used in this discussion, the term U.S. Holder means a beneficial owner of H shares or ADSs that is, for U.S. federal income tax purposes, (i) an individual who is a citizen or resident of the United States, (ii) a corporation created or organized in or under the laws of the United States or of any state or political subdivision thereof, or therein, including the District of Columbia or (iii) an estate or trust the income of which is subject to U.S. federal income tax regardless of the source thereof.

Investors are urged to consult their own tax advisers as to the particular tax considerations applicable to them relating to the purchase, ownership and disposition of H shares or ADSs in their individual circumstances, including the applicability of U.S. federal, state and local tax laws, any changes in applicable tax laws and any pending or proposed legislation or regulations.

Table of Contents***Taxation of Dividends***

Subject to the discussion below under **Special Rules**, cash distributions with respect to the H shares or ADSs owned by a U.S. Holder will, upon receipt, be includible in the gross income of such U.S. Holder as ordinary dividend income to the extent of our current and accumulated earnings and profits, as determined under U.S. federal income tax principles. To the extent that the amount of any such cash distribution exceeds our current and accumulated earnings and profits as so computed, it will be treated first as a non-taxable return of capital to the extent of the U.S. Holder's adjusted tax basis in such H shares or ADSs and, to the extent the amount of such cash distribution exceeds adjusted tax basis, will be treated as gain from the sale of such H shares or ADSs. Dividends paid by us generally will constitute income from sources outside the United States for foreign tax credit limitation purposes and will not be eligible for the dividends received deduction.

Dividends received by individuals from qualified foreign corporations are generally subject to a maximum U.S. federal income tax rate of 20%, so long as certain holding period requirements are met. A non-U.S. corporation (other than a passive foreign investment company) generally will be considered to be a qualified foreign corporation (i) if it is eligible for the benefits of a comprehensive income tax treaty with the United States which the Secretary of the Treasury determines is satisfactory for purposes of the relevant provision and which includes an exchange of information program or (ii) with respect to any dividend it pays on stock which is readily tradable on an established securities market in the United States. The Treasury Department has determined that the China-U.S. Tax Treaty as currently in effect meets the requirements described in clause (i) above. In addition, the ADSs are readily tradable on the New York Stock Exchange, an established securities market in the United States. Each U.S. Holder that is an individual is urged to consult his or her tax adviser regarding the applicability of this reduced rate to dividends received with respect to the H shares or ADSs in his particular circumstance.

The U.S. dollar value of any distribution made by us in Hong Kong dollars (or other currency that is not the U.S. dollar, or a foreign currency), should be calculated by reference to the exchange rate in effect on the date of receipt of such distribution by Deutsche Bank Trust Company Americas, as depository, in the case of ADSs, or by the U.S. Holder, in the case of H shares held directly by such U.S. Holder regardless of whether the Hong Kong dollars (or such other foreign currency) so received are converted into U.S. dollars on the date of receipt. If the Hong Kong dollars (or such other foreign currency) so received are converted into U.S. dollars on the date of receipt, such U.S. Holder generally should not recognize foreign currency gain or loss on such conversion. If the Hong Kong dollars (or such other foreign currency) are not converted into U.S. dollars on the date of receipt, such U.S. Holder will have a basis in the Hong Kong dollars (or such other foreign currency) equal to their U.S. dollar value on the date of receipt. Any gain or loss on a subsequent conversion or other disposition of the Hong Kong dollars (or such other foreign currency) generally will be treated as ordinary income or loss from sources within the United States for foreign tax credit limitation purposes.

Subject to certain limitations, the Chinese tax withheld from dividends paid with respect to H shares or ADSs and paid over to China, as described above under **The People's Republic of China Taxation of Dividends**, may be creditable against a U.S. Holder's U.S. federal income tax liability. Special rules apply in determining the foreign tax credit limitation with respect to dividends that are subject to the maximum 20% U.S. federal income tax rate. A U.S. Holder of H shares or ADSs that does not elect to claim a U.S. foreign tax credit may instead claim a deduction for such withheld tax, but only for a taxable year in which the U.S. Holder elects to do so with respect to all non-U.S. income taxes paid or accrued in such taxable year. The availability of the foreign tax credit and the application of the limitations on the credit are fact specific and U.S. Holders are urged to consult their own U.S. tax advisers with respect to foreign tax credit considerations in their individual circumstances.

Table of Contents
Sale or other Disposition of H Shares or ADSs

Subject to the discussion below under **Special Rules**, a U.S. Holder generally will recognize gain or loss for U.S. federal income tax purposes upon a sale or other disposition of H shares or ADSs that it owns in an amount equal to the difference, if any, between the amount realized from the sale or disposition and such U.S. Holder's adjusted tax basis in such H shares or ADSs. The gain or loss generally will be a capital gain or loss and will be long-term capital gain (taxable at a reduced rate for individuals) or loss if, on the date of sale or disposition, such H shares or ADSs were held by the U.S. Holder for more than one year and will generally be U.S. source gain or loss. The claim of a deduction in respect of a capital loss may be subject to limitations.

A U.S. Holder that receives Hong Kong dollars (or other foreign currency) from the sale or disposition generally will realize an amount equal to the U.S. dollar value of the Hong Kong dollars (or such other foreign currency) on the settlement date of the sale or disposition if (i) the U.S. Holder is a cash basis or electing accrual basis taxpayer and our H shares or ADSs, as the case may be, are treated as being traded on an established securities market for this purpose or (ii) the settlement date is the date of the sale or disposition. If the Hong Kong dollars (or such other foreign currency) so received are converted into U.S. dollars on the settlement date, the U.S. Holder should not recognize foreign currency gain or loss on the conversion. If the Hong Kong dollars (or such other foreign currency) so received are not converted into U.S. dollars on the settlement date, the U.S. Holder will have a basis in the Hong Kong dollars (or such other foreign currency) equal to the U.S. dollar value on the settlement date. Any gain or loss on a subsequent conversion or other disposition of the Hong Kong dollars (or such other foreign currency) generally will be treated as ordinary income or loss from sources within the United States for foreign tax credit limitation purposes. A U.S. Holder should consult its own tax adviser regarding the U.S. federal income tax consequences of receiving Hong Kong dollars (or other currency) from a sale or disposition of the H shares or ADSs in cases not described in this paragraph.

A U.S. Holder that is a non-resident enterprise may be subject to Chinese tax on the gain realized upon the sale or other disposition of H shares or ADS. See **The People's Republic of China Taxation of Capital Gains** above. Holders should consult their own tax advisers concerning their ability to credit such Chinese taxes against their U.S. federal income tax liability in their particular situation.

Special Rules

Related Person Insurance Income. Certain adverse U.S. income and tax reporting rules may apply to U.S. shareholders who, directly or indirectly, own stock of a non-U.S. corporation that earns related person insurance income (RPII), if 25% or more of the non-U.S. corporation's direct or indirect shareholders are U.S. persons. RPII is generally defined as insurance income derived from the insurance (or reinsurance) of insureds who are U.S. shareholders in the non-U.S. corporation or who are related to such U.S. shareholders. If applicable, these rules would require U.S. Holders to include in taxable income each year their pro rata share of any RPII incurred by us for the year, regardless of whether such income is distributed, and also to file IRS Form 5471, disclosing certain information regarding their direct or indirect ownership of China Life. Special rules apply for purposes of determining each U.S. shareholder's pro rata share of any RPII. For organizations that are otherwise exempt from U.S. federal income tax under section 501(a) of the Code, any such income would constitute unrelated business taxable income. These rules could also apply to convert some or all of the gain recognized from the sale or disposition of H shares or ADSs from capital gain to ordinary income and to require such gain to be reported on IRS Form 5471.

Under a statutory exception, these rules do not apply if less than 20% of the non-U.S. corporation's insurance income is RPII or if less than 25% of the non-U.S. corporation's stock is owned by U.S. shareholders. Because CLIC holds approximately 68.37% of our share capital, and because we do not offer or intend to offer our products and services in

the United States, it is highly unlikely that the RPII rules will apply. If more of our shares are sold to the public in the future, it is possible that such rules could apply at a later date.

Table of Contents

Passive Foreign Investment Company. In general, a non-U.S. corporation will be a passive foreign investment company, or a PFIC, if 75% or more of its gross income constitutes passive income or 50% or more of its assets produce passive income or are held for the production of passive income. In determining whether we are a PFIC, we will be treated as if we directly owned our proportionate share of the assets and received our proportionate share of the income of any other corporation in which we own 25% or more of the shares by value.

For the purpose of determining whether a non-U.S. corporation is a PFIC, passive income is defined to include income of the kind which would be foreign personal holding company income under section 954(c) of the Code, and generally includes interest, dividends, annuities and other investment income. Passive income does not include interest income or dividends received from controlled subsidiaries or certain other related persons, to the extent properly allocable to income of such related person that is not passive income. The PFIC provisions specifically exclude from the definition of passive income any income derived in the active conduct of an insurance business by a corporation which is predominantly engaged in an insurance business and which would be subject to tax under subchapter L if it were a domestic corporation (the active insurance business exception). The active insurance business exception is intended to ensure that income derived by a bona fide insurance company is not treated as passive income. Thus, to the extent that income is attributable to financial reserves in excess of the reasonable needs of the insurance business, it may be treated as passive income. The PFIC provisions also exclude from the definition of passive income any income derived in the active conduct of a banking trade or business. We believe that we were not classified as a PFIC in 2017. However, there is little guidance on the circumstances under which a non-U.S. company will be treated as predominantly engaged in an insurance business or engaged in the active conduct of a banking trade or business for purposes of determining PFIC status. Accordingly, there is no assurance that the IRS will not take a contrary position and assert that we are a PFIC. Furthermore, an actual determination of PFIC status is inherently factual in nature and cannot be made until the close of each applicable tax year and, accordingly, no assurances can be given that we will not become a PFIC at some point in the future. The IRS has issued proposed regulations regarding the application of the PFIC provisions to insurance companies and banks, and final regulations or pronouncements interpreting or clarifying these rules may be forthcoming. We cannot predict what impact, if any, such guidance would have on the determination of our status as a PFIC. In addition, the recently enacted Tax Cuts and Jobs Act, or the TCJA, modifies the active insurance business exception for taxable years beginning after December 31, 2017, such that it applies only to a foreign corporation if (i) loss and loss adjustment expenses and certain reserves constitute more than 25% of the foreign corporation's gross assets for the relevant year or (ii) a U.S. Holder makes an election to apply an alternative facts and circumstances test that applies only in certain runoff-related or ratings-related circumstances involving the insurance business. There is significant uncertainty as to the interpretation of the active insurance business exception as modified by the TCJA. As a result, China Life cannot presently determine whether it will be a PFIC for taxable years beginning after December 31, 2017.

In general, a U.S. shareholder of a PFIC is subject to a special tax and an interest charge at the time of the sale of (or receipt of an excess distribution with respect to) its shares in the PFIC. In general, a shareholder is treated as having received an excess distribution if the amount of the distribution was more than 125% of the average distribution with respect to its shares during the three preceding taxable years (or shorter period during which the taxpayer held the shares). The special tax is computed by assuming that the excess distribution or, in the case of a sale, the gain with respect to the shares was earned in equal portions throughout the holder's period of ownership. The portion allocable to each year prior to the year of sale is taxed at the maximum marginal tax rate applicable for each such period. The interest charge is determined based on the applicable rate imposed on underpayments of U.S. federal income tax for the period. The special tax and the interest charge generally will not apply to a U.S. shareholder that validly makes a qualified electing fund election under section 1295 of the Code with respect to the shares of the PFIC. We do not intend to comply with the requirements necessary to permit a U.S. Holder to make such an election with respect to H shares or ADSs.

Table of Contents

The above results may also be avoided if a mark-to-market election is available and a U.S. Holder validly makes such an election. If the election is made, such U.S. Holder generally will be required to take into account the difference, if any, between the fair market value of, and its adjusted tax basis in, its H shares or ADSs at the end of each taxable year as ordinary income or ordinary loss (to the extent of any net mark-to-market gain previously included in income), and to make corresponding adjustments to the tax basis of such H shares or ADSs. In addition, any gain from a sale or other disposition of H shares or ADSs will be treated as ordinary income, and any loss will be treated as ordinary loss (to the extent of any net mark-to-market gain previously included in income). A mark-to-market election is available to a U.S. Holder only if our H shares or ADSs are considered marketable stock for these purposes. Generally, stock will be considered marketable stock if it is regularly traded on a qualified exchange within the meaning of applicable U.S. Treasury regulations. A class of stock is regularly traded during any calendar year during which such class of stock is traded, other than in *de minimis* quantities, on at least 15 days during each calendar quarter. A non-U.S. securities exchange will constitute a qualified exchange if it is regulated or supervised by a governmental authority of the country in which the market is located and meets certain trading, listing, financial disclosure and other requirements set forth in the Treasury Regulations. We do not know whether our H shares or ADSs will be treated as marketable stock for these purposes.

If we are a PFIC in any taxable year during which a U.S. Holder owns H Shares or ADSs, such U.S. Holder (i) may also suffer adverse tax consequences under the PFIC rules described above with respect to any other PFIC in which we have a direct or indirect equity interest and (ii) generally will be required to file annually a statement with its U.S. federal income tax returns. U.S. Holders should consult their own tax advisers regarding the U.S. federal income tax consequences of a direct or indirect investment in a PFIC.

Medicare Taxes

Certain U.S. Holders that are individuals, estates or trusts are subject to an additional tax at the rate of 3.8% on all or a portion of their net investment income, which may include all or a portion of their income arising from a distribution with respect to an ADS or an H Share and gain upon the sale, exchange or other disposition of such ADS or H Share.

Information Reporting and Backup Withholding

Under certain circumstances, information reporting and/or backup withholding may apply to U.S. Holders with respect to payments made on or proceeds from the sale, exchange or other disposition of ADSs or H Shares, unless an applicable exemption is satisfied. Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules generally will be allowed as a refund or a credit against a U.S. Holder's U.S. federal income tax liability if the required information is furnished by the U.S. Holder on a timely basis to the IRS.

Reportable Transactions

U.S. Holders that participate in reportable transactions (as defined in Treasury Regulations) must attach to their federal income tax returns a disclosure statement on Form 8886. We urge U.S. Holders to consult their own tax advisers as to the possible obligation to file Form 8886 with respect to the ownership or disposition of any Hong Kong dollars (or other foreign currency) received as a dividend or as proceeds from the sale of H shares or ADSs, or any other aspect of the purchase, ownership or disposition of H shares or ADSs.

Table of Contents

Disclosure Requirements for Specified Foreign Financial Assets

Individual U.S. Holders (and certain U.S. entities to the extent specified in future IRS guidance) who, during any taxable year, hold any interest in any specified foreign financial asset generally will be required to file with their U.S. federal income tax returns Form 8938, setting forth certain information with respect to such asset, if the aggregate value of all such assets exceeds the applicable reporting threshold. Specified foreign financial asset generally includes any financial account maintained with a non-U.S. financial institution and may also include H Shares or ADSs if they are not held in an account maintained with a U.S. financial institution. Substantial penalties may be imposed for a failure to comply. U.S. Holders should consult their own tax advisers as to the possible application to them of these filing requirements.

H. DOCUMENTS ON DISPLAY

You may read and copy documents referred to in this annual report on Form 20-F that have been filed with the U.S. Securities and Exchange Commission, or SEC, at its public reference room located at 100 F Street, NE, Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the public reference rooms and their copy charges. The SEC also maintains a website at <http://www.sec.gov> that contains reports, proxy statements and other information regarding the registrations that file electronically with the SEC.

The SEC allows us to incorporate by reference the information we filed with the SEC. This means that we can disclose important information to you by referring you to another document filed separately with the SEC. The information incorporated by reference is considered to be part of this annual report on Form 20-F.

I. SUBSIDIARY INFORMATION

Not applicable.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Our exposure to financial market risks relates primarily to changes in interest rates, equity prices and exchange rates.

The following discussions and tables, which constitute forward-looking statements that involve risks and uncertainties, summarize our market-sensitive financial instruments including fair value and maturity. Such discussions address market risk only and do not present other risks which we face in the normal course of business.

Table of Contents

For further information on our management of market risk, including the objectives and general strategies of risk management, see Item 4 Information on the Company Business Overview Investments Risk Management and Note 4 to our consolidated financial statements included elsewhere in this annual report.

Interest Rate Risk

Our profitability is affected by changes in interest rates. Interest rates are highly sensitive to many factors, including economic growth rate, inflation, governmental monetary and tax policies, domestic and international economic and political conditions, financial regulatory requirements and other factors beyond our control. If interest rates were to increase in the future, surrenders and withdrawals of life insurance and annuity policies and contracts may increase as policy holders may seek other investments with higher perceived returns. This process may result in cash outflows requiring that we sell investment assets at a time when the prices of those assets are adversely affected by the increase in market interest rates, which may result in realized investment losses. However, if interest rates were to decline in the future, the income we realize from our investments may decrease, affecting our profitability. In addition, as instruments in our investment portfolio mature, we might have to reinvest the funds we receive in investments bearing low interest rates, which may also affect our profitability.

For the years ended December 31, 2017, 2016 and 2015, our investment yield was 5.16%, 4.61% and 6.47%, respectively. Investment contracts are generally priced with guaranteed interest rates. Dividends on participating policies are required to be at least 70% of distributable earnings attributable to such policies.

Table of Contents

The following tables set forth selected assets and liabilities with exposure to interest rates as of December 31, 2017, 2016 and 2015.

As of December 31, 2017	Expected Maturity Date						Total	Fair value

Table of Contents**Equity Price Risk**

Our investments in securities investment funds or equity securities expose us to changes in equity prices. We manage this risk on an integrated basis with other risks through our asset-liability management strategies. We also manage equity price risk through industry and issuer diversification and asset allocation techniques.

The following table sets forth our exposure to equity securities as of December 31, 2017, 2016 and 2015.

	As of December 31,					
	2015		2016		2017	
	Carrying amount	Fair value	Carrying amount	Fair value	Carrying amount	Fair value
<i>(RMB in millions)</i>						
Equity securities	411,623	411,623	421,383	421,383	409,528	409,528
Securities at fair value through profit or loss	43,006	43,006	54,718	54,718	53,918	53,918
Available-for-sale	368,617	368,617	366,665	366,665	355,610	355,610

A hypothetical 10% decline in the December 31, 2017, 2016 and 2015 value of the securities at fair value through profit or loss equity securities would result in an unrealized loss charged to the income statement of approximately RMB 5,392 million, RMB 5,472 million and RMB 4,301 million, respectively.

A hypothetical 10% decline in the December 31, 2017, 2016 and 2015 value of the available-for-sale equity securities would result in an unrealized loss charged to the income statement of approximately RMB 35,561 million, RMB 36,667 million and RMB 36,862 million, respectively.

The selection of a 10% immediate change in the value of equity securities should not be construed as a prediction by us of future market events but rather as an illustration of the potential impact of such an event.

Foreign Exchange Risk

Our exposure to fluctuations in foreign currency exchange rates against RMB results primarily from our holdings in non-RMB denominated term deposits and our foreign currency-denominated loans. Our debts and capital expenditures are predominantly in RMB and the principal currencies which create foreign currency exchange rate risk in our deposits are the U.S. dollar and Hong Kong dollar. The principal currencies which expose us to foreign currency exchange risk in our loans are the British pound, U.S. dollar and Euro. Our borrowings in foreign currencies include a five-year bank loan of GBP275 million with a maturity date on June 17, 2019, a three-year bank loan of US\$ 970 million with a maturity date on September 27, 2019, a three-year bank loan of US\$ 940 million with a maturity date on September 30, 2019 and a one-month bank loan of EUR100 million with a maturity date on January 11, 2018, all of which are fixed rate loans, and a three-year loan of EUR400 million with a maturity date on December 6, 2020, which is a floating rate loan. We recorded RMB 52 million (US\$ 8 million) in foreign exchange gains for the year ended December 31, 2017, resulting mainly from an increase in our allocation in assets held in foreign currencies and the fluctuation of the Renminbi exchange rate. Future movements in the exchange rate of RMB against the U.S. dollar and other foreign currencies may adversely affect our results of operations and financial condition.

D. AMERICAN DEPOSITARY SHARES

The table below sets forth all fees and charges that a holder of our ADRs may have to pay to the depository bank of our ADR program, either directly or indirectly.

Category	Depository Actions	Associated Fee
(a) Depositing or substituting the underlying shares	Each person to whom ADRs are issued against deposits of shares, including deposits and issuances in respect of: share distributions, rights, merger exchange of securities or any other transaction or event or other distribution affecting the ADSs or the deposited securities	US\$ 5.00 for each 100 ADSs (or portion thereof) evidenced by the new ADRs delivered
(b) Receiving or distributing dividends	Distribution of dividends	US\$ 0.02 or less per ADS
(c) Selling or exercising rights	Distribution or sale of securities, the fee being in an amount equal to the fee for the execution and delivery of ADSs which would have been charged as a result of the deposit of such securities	US\$ 5.00 for each 100 ADSs (or portion thereof)
(d) Withdrawing an underlying security	Acceptance of ADRs surrendered for withdrawal of deposited securities	US\$ 5.00 for each 100 ADSs (or portion thereof) evidenced by the ADRs surrendered

(e) Transferring, splitting or grouping receipts	Transfers, combining or grouping of depositary receipts	US\$ 1.50 per ADS
(f) Expenses of the depositary	<p>Expenses incurred on behalf of ADR holders in connection with:</p> <p>compliance with foreign exchange control regulations or any law or regulation relating to foreign investment;</p> <p>the depositary's or its custodian's compliance with applicable law, rule or regulation;</p> <p>stock transfer or other taxes and other governmental charges;</p> <p>cable, telex, facsimile transmission and delivery;</p> <p>expenses of the depositary in connection with the conversion of foreign currency into U.S. dollars (which are paid out of such foreign currency); and</p> <p>any other charge payable by depositary or its agents.</p>	<p>Expenses payable at the sole discretion of the depositary by billing ADR holders or by deducting charges from one or more cash dividends or other cash distributions.</p>

Table of Contents

Deutsche Bank Trust Company Americas, or Deutsche Bank, has served as the depository bank of our ADR program since January 4, 2010. Deutsche Bank has agreed to reimburse certain reasonable company expenses related to our ADR program and incurred by us in connection with our ADR program. The table below sets forth the amounts reimbursed from January 1, 2017 to April 6, 2018.

Category of Expenses	Amount Reimbursed from January 1, 2017 to April 6, 2018
NYSE listing fees	US\$ 124,500
Legal fees	US\$ 0
Investor relations ⁽¹⁾	US\$ 1,379,083.27
Broker reimbursements ⁽²⁾	US\$ 78,637.20
Total	US\$ 1,582,220.47

- (1) Includes expenses related to announcement of results, ADR training programs, non-deal roadshows and investor relations activities.
- (2) Broker reimbursements are fees payable to Broadridge and other service providers for the distribution of hard copy material to beneficial ADR holders holding in the Depository Trust Company. Corporate material includes information related to shareholders meetings and related voting instruction cards. These fees are SEC approved.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS.**A. MATERIAL MODIFICATION TO THE RIGHTS OF SECURITY HOLDERS**

See Item 10. Additional Information Articles of Association .

B. USE OF PROCEEDS

The following use of proceeds information relates to our registration statement on Form F-1 (File No. 333-110615), filed by us in connection with our initial public offering of H shares in the United States. In connection with the registration of the H shares, a registration statement on Form F-6 (File No.333-110622) was also filed for ADSs representing such H shares. Each of these two registration statements was declared effective by the SEC on December 11, 2003. Our H shares commenced trading on the Hong Kong Stock Exchange on December 18, 2003 and the ADSs on the New York Stock Exchange on December 17, 2003.

The net proceeds from the initial public offering of our shares, after deduction of fees and expenses, amounted to RMB 24,707 million and were held in either H.K. dollars or U.S. dollars. As of the date of this annual report, a part of

the cash proceeds from our global offering was held in bank deposit accounts denominated in foreign currencies in China, and part of the cash proceeds was invested in securities listed on overseas stock exchanges, multi-asset portfolios and private equity funds. We invested approximately US\$ 433 million, in addition to 2,282 million in Renminbi, in Guangdong Development Bank in December 2006. We used approximately HK\$ 12 billion for investments in Sino-Ocean Land Holdings Limited in 2009, 2010 and 2013. As of December 31, 2017, we had engaged 13 investment managers to manage US\$ 1,600 million for investment in overseas public markets.

Table of Contents

ITEM 15. CONTROLS AND PROCEDURES.

Disclosure Controls and Procedures

As required by Rule 13a-15(b) of the Securities Exchange Act of 1934, we have carried out an evaluation, under the supervision and with the participation of our management, including our chief executive officer and our chief financial officer, of the effectiveness of our disclosure controls and procedures as of December 31, 2017, the end of the period covered by this annual report. Based on that evaluation, our chief executive officer and our chief financial officer concluded that our disclosure controls and procedures were effective at a reasonable assurance level as of December 31, 2017.

Management's Report on Internal Control over Financial Reporting

Management of China Life Insurance Company Limited (together with its consolidated subsidiaries, the Company) is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended. The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with applicable generally accepted accounting principles. The Company's internal control over financial reporting includes those policies and procedures that:

pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets and liabilities of the Company;

provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with the applicable generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and

provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2017. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control - Integrated Framework (2013 framework). Based on this assessment, management determined that the Company's internal control over financial reporting was effective as of December 31, 2017.

The Company's internal control over financial reporting as of December 31, 2017 has been audited by Ernst & Young Hua Ming LLP, an independent registered public accounting firm, as stated in their report which is on pages F-3 and

F-4 of this annual report, which expresses an unqualified opinion on the effectiveness of the Company's internal control over financial reporting as of December 31, 2017.

Table of Contents**Changes in Internal Control over Financial Reporting**

There were no changes to the Company's internal control over financial reporting as defined in Exchange Act Rule 13a-15(f) during the year ended December 31, 2017 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT.

Our board of directors has determined that Mr. Chang Tso Tung Stephen qualifies as an audit committee financial expert as defined in Item 16A of Form 20-F. Mr. Chang Tso Tung Stephen is independent in accordance with the applicable requirements of Rule 10A-3 of the Securities Exchange Act of 1934. Mr. Chang was appointed as an independent non-executive director and a member of the audit committee of our Company in October 2014. For Mr. Chang's biographical information, see Item 6. Directors, Senior Management and Employees.

ITEM 16B. CODE OF ETHICS.

At the board of directors meeting held on June 29, 2004, we adopted a code of business conduct and ethics that applies to our chief executive officer, chief financial officer, controller and other senior officers of our company. We have filed the adopted code of business conduct and ethics as an exhibit to our annual report on Form 20-F for the fiscal year ended December 31, 2004, as filed on May 27, 2005.

ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

The following table sets forth the aggregate audit fees, audit-related fees, tax fees and all other fees paid to our principal accountants for the fiscal years of 2017 and 2016.

	Audit Fees ⁽¹⁾	Audit-Related Fees	Tax Fees	All Other Fees ⁽²⁾
	<i>(RMB in millions)</i>			
2017	59			1
2016	58			2

(1) Audit fees include fees billed for professional services rendered for audits of the consolidated financial statements and review of interim financial statements of China Life and fees billed for performing agreed-upon procedures.

(2) All other fees include fees billed for advisory services which do not affect the independence of our principal accountants.

According to our current internal rules, before our principal accountants are engaged by us to render audit or non-audit services, the engagement must be approved by our audit committee.

ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES.

Not applicable.

ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS.

As of December 31, 2017, China Life and its subsidiaries had not purchased, sold or redeemed any of China Life's shares.

Table of Contents

ITEM 16F. CHANGE IN REGISTRANT'S CERTIFYING ACCOUNTANT.

Not Applicable.

ITEM 16G. CORPORATE GOVERNANCE.

As a Chinese company with H shares, ADSs and A shares publicly traded on the HKSE, the NYSE and the SSE, respectively, we must comply with the corporate governance standards provided by PRC company law and other laws, as well as the securities laws and regulations in Hong Kong, United States and the listing requirements of the HKSE, the NYSE and the SSE that are applicable to us. The description set forth below includes, for purpose of Section 303A.11 of the NYSE Listed Company Manual, a summary of the significant ways in which our corporate governance practices differ from those followed by U.S. domestic companies under NYSE rules.

Board Independence

We identify our independent non-executive directors in accordance with the qualifications provided by relevant PRC and Hong Kong regulations, which prohibit independent directors from having, among other things, specified interests in our securities or business, relationships with the management and financial dependence on us. These tests vary in certain respects with those set forth under Section 303A.02 of the NYSE Listed Company Manual.

Section 303A.02 of the NYSE Listed Company Manual also requires the board of directors to affirmatively determine that the director has no material relationship with the company (either directly or as a partner, shareholder or officer of an organization that has a relationship with the company). Under the HKSE Listing Rules, each independent non-executive director must provide an annual confirmation of his independence to the listed company. Under the Tentative Guidelines on Corporate Governance of Insurance Companies issued by the CIRC in 2006 (the Chinese Insurance Company Corporate Governance Guidelines), each independent director must make a public announcement of the director's independence and commitment to duties.

Section 303A.01 of the NYSE Listed Company Manual provides that a U.S. domestic issuer must have a majority of independent directors, unless more than 50% of such issuer's voting power for the election of directors is controlled by an individual, a group or another company (a controlled company). Because more than 60% of our voting power is controlled by CLIC, we, as with controlled U.S. domestic companies, would not be required to comply with this independent board requirement. As of the date of this annual report, our board of directors comprised eleven directors, including four executive directors, three non-executive directors and four independent non-executive directors.

Section 303A.03 of the NYSE Listed Company Manual requires a U.S. domestic company to have its non-management directors meet at regularly scheduled executive sessions without management and hold an executive session including only independent directors at least once a year, or hold regular executive sessions of independent directors. Under the HKSE corporate governance rules effective since April 1, 2012, the chairman of our board of directors is required to have a meeting with non-executive directors (including independent non-executive directors) only without the executive directors present at least once a year.

Table of Contents**Nominating/Corporate Governance Committee and Compensation Committee**

Under Section 303A.04 of the NYSE Listed Company Manual, a U.S. domestic company must have a nominating/corporate governance committee composed entirely of independent directors with a written charter that addresses certain specified responsibilities, unless it is a controlled company. Section 303A.05 of the NYSE Listed Company Manual requires a U.S. domestic company to have a compensation committee composed entirely of independent directors with a written charter that addresses certain specified duties, unless it is a controlled company. We, as with controlled U.S. domestic companies, are not required under NYSE rules to have such a nominating/corporate governance committee or compensation committee. We have established a nominating and remuneration committee in accordance with the HKSE Listing Rules, comprised of a majority of independent non-executive directors as required under those rules. The primary duties of the nomination and remuneration committee are to review the structure and components of our board of directors, to formulate the appointment and successors to our board of directors and senior management, to review and recommend the nomination of our directors and senior officers, as well as to propose to our board of directors the remuneration policy for our directors, supervisors and senior management.

The Guiding Opinions on Regulating Governance Structure of Insurance Companies require that nominating and remuneration committees of Chinese insurance companies be comprised entirely of non-executive directors with the independent directors as the Chairmen. In 2017, our nominating and remuneration committee comprised two independent non-executive directors and one non-executive director with one of the independent non-executive directors serving as the chairman. We have complied with the composition requirements of the nomination and remuneration committee as prescribed under the Chinese Insurance Company Corporate Governance Guidelines.

Audit Committee

The NYSE rules set forth two levels of audit committee standards for U.S. domestic companies and foreign private issuers. As a foreign private issuer, we are required to comply with the audit committee requirements under Section 303A.06 of the NYSE Listed Company Manual, such as audit committee independence and certain functions and powers, but are not subject to the additional qualifications, independence, function and other requirements for U.S. domestic companies provided under Section 303A.07 of the NYSE Listed Company Manual.

We have established an audit committee in accordance with the requirements of Section 303A.06 of the NYSE Listed Company Manual, the HKSE Listing Rules and the Chinese Insurance Company Corporate Governance Guidelines. In 2017, our audit committee comprised three independent non-executive directors with one of them serving as the chairman. The primary duties of the audit committee are to review and supervise the financial reporting process, to assess the effectiveness of our risk management and internal control system, to supervise our internal audit system and its implementation and to implement and recommend the engagement or replacement of external auditors. Our audit committee is also responsible for communications between our internal and external auditors and our internal reporting system.

Corporate Governance Guidelines

Under Section 303A.09 of the NYSE Listed Company Manual, a U.S. domestic company must adopt and disclose corporate governance guidelines that address specified key subjects. We are not required by Chinese or Hong Kong laws or requirements to, and currently do not, have such corporate governance guidelines. However, we address several of the key subjects required by the NYSE Listed Company Manual to be included in the corporate governance guidelines in our articles of association, Rules of Procedures for Board of Directors, Rules of Internal Control and other internal corporate documents.

Table of Contents

In addition, under the HKSE Listing Rules, we are expected to comply with, but may choose to deviate from, the provisions of the Corporate Governance Code in the HKSE Listing Rules, which sets out the principles of good corporate governance for issuers. However, we are required to disclose the reasons for deviation, if any, in our interim and annual reports.

We are required by the CSRC to disclose in our annual report filed with the Shanghai Stock Exchange our actual corporate governance practice as compared with CSRC's rules on corporate governance of listed companies. Under such rules, we are required to disclose whether there is any material difference between our actual practices and the requirements under such rules, and explain the details and reasons for such differences, if any. Accordingly, we have disclosed in our annual report for the year of 2017 filed with the Shanghai Stock Exchange that we had established a corporate governance structure with well-defined duties and responsibilities strictly in accordance with the PRC Company Law and PRC Securities Law as well as relevant rules and regulations, and that our actual corporate governance practices are generally in compliance with the applicable regulatory rules and requirements of the jurisdictions where we are listed.

Code of Business Conduct and Ethics

Section 303A.10 of the NYSE Listed Company Manual requires U.S. domestic companies to adopt and disclose a code of business conduct and ethics for directors, officers and employees, and promptly disclose any waivers of the code for directors or executive officers. We have adopted a Code of Business Conduct and Ethics for Directors and Senior Officers and Code of Conduct for Employees. We have disclosed the Code of Business Conduct and Ethics for Directors and Senior Officers in our annual report under Form 20-F for fiscal year ended December 31, 2004 and are required to disclose in the annual report under Form 20-F any waivers of the code for directors or executive officers. In addition, according to the HKSE Listing Rules, all of our directors must comply with the Model Code for Securities Transactions by Directors of Listed Companies that sets forth the required standards with which the directors of a listed company must comply in securities transactions of the listed company. Under the Listing Rules of the Shanghai Stock Exchange, any of the directors, supervisors or senior management of the listed company may not transfer any shares of such company held by him/her within one year of the listing of the company or six months after leaving the company. During his/her tenure at the company, the number of shares transferred each year must not exceed 25% of the total number of shares of the company held by him/her, provided, however, if the directors, supervisors or senior management leave the company before the expiration of his/her tenure, during the term of his/her original tenure determined at the time of his/her appointment, the number of shares transferred each year must not exceed 25% of the total number of shares of the company held by him/her and may not transfer any shares within half a year after the expiration of the term of his/her original tenure determined at the time of his/her appointment. During his/her tenure at the company, he/she must file with the Shanghai Stock Exchange for record in advance any proposed transaction in the shares of the company in accordance with the relevant rules and regulations. In case of changes in shareholdings in the company, he/she shall report the changes on a timely basis to the company, which must then make relevant announcements on the website of the Shanghai Stock Exchange.

Certification Requirements

Under Section 303A.12(a) of the NYSE Listed Company Manual, each U.S. domestic company Chief Executive Officer must certify to the NYSE each year that he or she is not aware of any violation by the listed company of NYSE corporate governance listing standards. There are no similar requirements under PRC or Hong Kong laws or requirements.

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of China Life Insurance Company Limited

Opinion on the Financial Statements

We have audited the accompanying consolidated statements of financial position of China Life Insurance Company Limited (the Company) as of December 31, 2017 and 2016, the related consolidated statements of comprehensive income, changes in equity and cash flows for each of the two years in the period ended December 31, 2017, and the related notes (collectively referred to as the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2017 and 2016, and the results of its operations and its cash flows for each of the two years in the period ended December 31, 2017, in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), and our report dated April 25, 2018 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of China Life Insurance Company Limited

Opinion on Internal Control over Financial Reporting

We have audited China Life Insurance Company Limited's internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, China Life Insurance Company Limited (the Company) maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated statements of financial position of the Company as of December 31, 2017 and 2016, the related consolidated statements of comprehensive income, changes in equity and cash flows for each of the two years in the period ended December 31, 2017, and the related notes, and our report dated April 25, 2018 expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Table of Contents

Report of Independent Registered Public Accounting Firm (continued)

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of China Life Insurance Company Limited

We have audited the consolidated statements of comprehensive income, changes in equity and cash flows of China Life Insurance Company Limited (the Company) for the year ended December 31, 2015. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated results of its operations and its cash flows for the year ended December 31, 2015, in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

1 ORGANIZATION AND PRINCIPAL ACTIVITIES

China Life Insurance Company Limited (the Company) was established in the People's Republic of China (China or the PRC) on 30 June 2003 as a joint stock company with limited liability as part of a group restructuring of China Life Insurance (Group) Company (CLIC, formerly China Life Insurance Company) and its subsidiaries (the Restructuring). The Company and its subsidiaries are hereinafter collectively referred to as the Group. The Group's principal activities are the writing of life, health, accident and other types of personal insurance business; reinsurance business for personal insurance business; fund management business permitted by national laws and regulations or approved by the State Council of the People's Republic of China, etc.

The Company is a joint stock company incorporated in the PRC with limited liability. The address of its registered office is 16 Financial Street, Xicheng District, Beijing, the PRC. The Company is listed on the New York Stock Exchange, the Stock Exchange of Hong Kong Limited, and the Shanghai Stock Exchange.

These consolidated financial statements are presented in millions of Renminbi (RMB million) unless otherwise stated. These consolidated financial statements have been approved and authorised for issue by the Board of Directors on 22 March 2018.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Basis of preparation

The Group has prepared these consolidated financial statements in accordance with International Financial Reporting Standards (IFRSs), amendments to IFRSs and interpretations issued by the International Accounting Standards Board (IASB). These consolidated financial statements also comply with the applicable disclosure provisions of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the Listing Rules) and the applicable disclosure requirements of the Hong Kong Companies Ordinance. The Group has prepared the consolidated financial statements under the historical cost convention, except for financial assets and liabilities at fair value through profit or loss, available-for-sale securities, insurance contract liabilities and certain property, plant and equipment at deemed cost as part of the Restructuring process. The preparation of financial statements in compliance with IFRSs requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 3.

2.1.1 New accounting standards and amendments adopted by the Group for the first time for the financial year beginning on 1 January 2017

Standards/Amendments	Content	Effective for annual periods beginning on or after
IAS 7 Amendments	<i>Disclosure Initiative</i>	1 January 2017
IAS 12 Amendments	<i>Recognition of Deferred Tax Assets for Unrealised Losses</i>	1 January 2017
IFRS 12 Amendments	<i>Disclosure of Interests in Other Entities</i>	1 January 2017

included in *Annual Improvements to*

IFRSs 2014-2016 Cycle

IAS 7 Amendments *Disclosure Initiative*

Amendments to IAS 7 *Statement of Cash Flows* require an entity to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes. Disclosure of the changes in liabilities arising from financing activities is provided in Note 36 to the financial statements.

Table of Contents**CHINA LIFE INSURANCE COMPANY LIMITED****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****FOR THE YEAR ENDED 31 DECEMBER 2017****2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****2.1 Basis of preparation (continued)****2.1.1 New accounting standards and amendments adopted by the Group for the first time for the financial year beginning on 1 January 2017 (continued)****IAS 12 Amendments** *Recognition of Deferred Tax Assets for Unrealised Losses*

Amendments to IAS 12 clarify that an entity, when assessing whether taxable profits will be available against which it can utilise a deductible temporary difference, needs to consider whether tax law restricts the sources of taxable profits against which it may make deductions on the reversal of that deductible temporary difference. Furthermore, the amendments provide guidance on how an entity should determine future taxable profits and explain the circumstances in which taxable profit may include the recovery of some assets for more than their carrying amount. The Group applied the amendments retrospectively. However, their application has no impact on the Group's financial position and performance, as the accounting treatment of the Group for the previous period was consistent with the clarification in these amendments.

IFRS 12 Amendments *Disclosure of Interests in Other Entities*

Amendments to IFRS 12 clarify that the disclosure requirements in IFRS 12, other than those disclosure requirements in paragraphs B10 to B16 of IFRS 12, apply to an entity's interest in a subsidiary, a joint venture or an associate, or a portion of its interest in a joint venture or an associate that is classified as held for sale or included in a disposal group classified as held for sale. The amendments have had no impact on the Group's consolidated financial statements as the Group has no interest in a subsidiary, a joint venture or an associate that is classified as held for sale.

2.1.2 New accounting standards and amendments that are not yet effective and have not been early adopted by the Group for the financial year beginning on 1 January 2017

Standards/Amendments	Content	Effective for annual period beginning on or after
IFRS 2 Amendments	<i>Classification and Measurement of Share-based Payment Transactions</i>	1 January 2018
IFRS 9	<i>Financial Instruments</i>	1 January 2018

IFRS 4 Amendments	<i>Applying IFRS 9 Financial Instruments with IFRS 4 Insurance Contracts</i>	1 January 2018
IFRS 15	<i>Revenue from Contracts with Customers</i>	1 January 2018
IFRS 15 Amendments	<i>Clarifications to IFRS 15 Revenue from Contracts with Customers</i>	1 January 2018
IAS 40 Amendments	<i>Transfers of Investment Property</i>	1 January 2018
IFRS 16	<i>Leases</i>	1 January 2019
IFRS 17	<i>Insurance Contracts</i>	1 January 2021
IFRS 10 and IAS 28 Amendments	<i>Sale or Contribution of Assets between an Investor and its Associate or Joint Venture</i>	No mandatory effective date yet determined but available for adoption

The Group has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective.

Table of Contents**CHINA LIFE INSURANCE COMPANY LIMITED****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****FOR THE YEAR ENDED 31 DECEMBER 2017****2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****2.1 Basis of preparation (continued)****2.1.2 New accounting standards and amendments that are not yet effective and have not been early adopted by the Group for the financial year beginning on 1 January 2017 (continued)****IFRS 2 Amendments** *Classification and Measurement of Share-based Payment Transactions*

In June 2016, the IASB issued amendments to IFRS 2 *Share-based Payment* that address three main areas: the effects of vesting conditions on the measurement of a cash-settled share-based payment transaction; the classification of a share-based payment transaction with net settlement features for withholding a certain amount in order to meet an employee's tax obligation associated with the share-based payment; and accounting where a modification to the terms and conditions of a share-based payment transaction changes its classification from cash-settled to equity-settled. The amendments clarify that the approach used to account for vesting conditions when measuring equity-settled share-based payments also applies to cash-settled share-based payments. The amendments introduce an exception so that a share-based payment transaction with net share settlement features for withholding a certain amount in order to meet the employee's tax obligation is classified in its entirety as an equity-settled share-based payment transaction when certain conditions are met. Furthermore, the amendments clarify that if the terms and conditions of a cash-settled share-based payment transaction are modified, with the result that it becomes an equity-settled share-based payment transaction, the transaction is accounted for as an equity-settled transaction from the date of the modification. On adoption, entities are required to apply the amendments without restating prior periods, but retrospective application is permitted if they elect to adopt for all three amendments and other criteria are met. The Group will adopt the amendments from 1 January 2018. The amendments are not expected to have any significant impact on the Group's consolidated financial statements.

IFRS 9 *Financial Instruments*

In July 2014, the IASB issued the final version of IFRS 9, bringing together all phases of the financial instruments project to replace IAS 39 and all previous versions of IFRS 9. The standard introduces new requirements for classification and measurement, impairment, and hedge accounting. IFRS 9 is effective for annual periods beginning on or after 1 January 2018, with early adoption permitted. Based on the current assessment, the Group expects the adoption of IFRS 9 will have a material impact on the Group's consolidated financial statements.

Classification and measurement

IFRS 9 requires that the Group classifies debt instruments based on the combined effect of application of business model (hold to collect contractual cash flows, hold to collect contractual cash flows and sell financial assets or other business models) and contractual cash flow characteristics (sole payments of principal and interest on the principal amount outstanding or not). Debt instruments not giving rise to cash flows that are sole payments of principal and interest on the principal amount outstanding would be measured at fair value through profit and loss. Other debt instruments giving rise to cash flows that are sole payments of principal and interest on the principal amount outstanding would be measured at amortised cost, fair value through other comprehensive income (FVOCI) or fair value through profit or loss (FVTPL), based on their respective business model. The Group is in the process of analysing the contractual cash flow characteristics of financial assets and assessing the application of the business model.

Equity instruments would generally be measured at fair value through profit or loss unless the Group elects to measure at FVOCI for certain equity investments not held for trading. This will result in unrealised gains and losses on equity instruments currently classified as available-for-sale securities being recorded in income going forward. Currently, these unrealised gains and losses are recognised in other comprehensive income (OCI). If the Group elect to record equity investments at FVOCI, gains and losses would never be recognised in income except for the received dividends which do not represent a recovery of part of the investment cost.

Impairment

IFRS 9 replaces the incurred loss model with the expected credit loss model which is designed to include forward-looking information. The Group is in the process of developing and testing the key models required under IFRS 9 and analysing the impact on the expected loss provision; the Group believed the provision for debt instruments of the Group under the expected credit loss model would be larger than that under the previous incurred loss model.

Hedge accounting

The Group does not apply the hedge accounting currently, so the new hedge accounting model under IFRS 9 has no impact on the Group's consolidated financial statements.

Table of Contents

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.1 Basis of preparation (continued)

2.1.2 New accounting standards and amendments that are not yet effective and have not been early adopted by the Group for the financial year beginning on 1 January 2017 (continued)

IFRS 4 Amendments *Applying IFRS 9 Financial Instruments with IFRS 4 Insurance Contracts*

Amendments to IFRS 4 address issues arising from the different effective dates of IFRS 9 and IFRS 17. The amendments introduce two alternative options that allow entities issuing contracts within the scope of IFRS 4 for the adoption of IFRS 9, notably a temporary exemption and an overlay approach. The temporary exemption enables eligible entities to defer the implementation date of IFRS 9 until the effective date of IFRS 17. The amendments clarify that an insurer may apply the temporary exemption from IFRS 9 if: (i) it has not previously applied any version of IFRS 9, other than only the requirements for the presentation of gains and losses on financial liabilities designated as FVTPL; and (ii) its activities are predominantly connected with insurance on its annual reporting date that immediately precedes 1 April 2016. The overlay approach allows entities applying IFRS 9 from 2018 onwards to remove from profit or loss the effects arising from the adoption of IFRS 9 and reclassify the amounts to OCI for designated financial assets. An entity can apply the temporary exemption from IFRS 9 for annual periods beginning on or after 1 January 2018, or apply the overlay approach when it applies IFRS 9 for the first time.

During 2016, the Group performed an assessment of the amendments and reached the conclusion that its activities are predominantly connected with insurance as at 31 December 2015. There had been no significant change in the activities of the Group since then that requires reassessment, and the Group considered that it continues to meet the criteria of applying the temporary exemption. The Group decides to apply the temporary exemption from IFRS 9 and, therefore, continue to apply IAS 39 to its financial assets and liabilities in its reporting period starting on 1 January 2018.

IFRS 15 *Revenue from Contracts with Customers* and IFRS 15 Amendments

IFRS 15, issued in May 2014, establishes a new five-step model to account for revenue arising from contracts with customers. Under IFRS 15, revenue is recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer. The principles in IFRS 15 provide a more structured approach for measuring and recognising revenue. The standard also introduces extensive qualitative and quantitative disclosure requirements, including disaggregation of total revenue, information about performance obligations, changes in contract asset and liability account balances between periods and key judgements and estimates. The standard will supersede all current revenue recognition requirements under IFRSs. Either a full

retrospective application or a modified retrospective adoption is required on the initial application of the standard. In April 2016, the IASB issued amendments to IFRS 15 to address the implementation issues on identifying performance obligations, application guidance on principal-versus-agent consideration, licences of intellectual property, and transition. The amendments are also intended to help ensure a more consistent application when entities adopt IFRS 15 and decrease the cost and complexity of applying the standard. IFRS 15 and the amendments are effective for annual periods beginning on or after 1 January 2018, and early adoption is permitted.

The Group will adopt IFRS 15 from 1 January 2018 and plans to adopt the modified retrospective approach. Given insurance contracts are scoped out of IFRS 15, the main impact of the new standard is on the accounting treatment of income from administrative and investment management services. The Group does not expect any significant impact on the Group's consolidated financial statement.

IAS 40 Amendments *Transfers of Investment Property*

Amendments to IAS 40, issued in December 2016, clarify when an entity should transfer property, including property under construction or development into, or out of investment property. The amendments state that a change in use occurs when the property meets, or ceases to meet, the definition of investment property and there is evidence of the change in use. A mere change in management's intentions for the use of a property does not provide evidence of a change in use. The amendments are to be applied prospectively, and shall be applied to the changes that occurred, during or after the financial year when it applies amendments for the first time. An entity should reassess the classification of property held at the date that it first applies the amendments and, if applicable, reclassify property to reflect the conditions that exist at that date. Retrospective application is only permitted if it is possible without the use of hindsight. The Group expects to adopt the amendments from 1 January 2018. The amendments are not expected to have any significant impact on the Group's consolidated financial statements.

Table of Contents**CHINA LIFE INSURANCE COMPANY LIMITED****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****FOR THE YEAR ENDED 31 DECEMBER 2017****2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****2.1 Basis of preparation (continued)****2.1.2 New accounting standards and amendments that are not yet effective and have not been early adopted by the Group for the financial year beginning on 1 January 2017 (continued)****IFRS 16 *Leases***

IFRS 16 was issued in January 2016 and it replaces IAS 17 *Leases*, IFRS Interpretations Committee Interpretation No.4 *Determining whether an Arrangement contains a Lease*, Standing Interpretations Committee (SIC) Interpretation No.15 *Operating Leases-Incentives* and SIC-27 *Evaluating the Substance of Transactions Involving the Legal Form of a Lease*. IFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under IAS 17. The standard includes two recognition exemptions for lessees- leases of low-value assets and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognise a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset). The right-of-use asset is subsequently measured at cost less accumulated depreciation and any impairment losses unless the right-of-use asset meets the definition of investment property in IAS 40, or relates to a class of property, plant and equipment to which the revaluation model is applied. The lease liability is subsequently increased to reflect the interest on the lease liability and reduced for the lease payments. Lessees will be required to separately recognise the interest expense on the lease liability and the depreciation expense on the right-of-use asset. Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments). The lessee will generally recognise the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset. Lessor accounting under IFRS 16 is substantially unchanged from today's accounting under IAS 17. Lessors will continue to classify all leases using the same classification principle as in IAS 17 and distinguish between two types of leases: operating and finance leases. IFRS 16 also requires lessees and lessors to make more extensive disclosures than under IAS 17. IFRS 16 is effective for annual periods beginning on or after 1 January 2019. Early application is permitted, but not before an entity applies IFRS 15. A lessee can choose to apply the standard using either a full retrospective or a modified retrospective approach. The standard's transition provisions permit certain reliefs. The Group is assessing the impact of IFRS 16 on its consolidated financial statements.

IFRS 17 *Insurance Contracts*

In May 2017, the IASB issued IFRS 17 *Insurance Contracts*, a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure, which replaces IFRS 4 *Insurance Contracts*.

In contrast to the requirements in IFRS 4, which are largely based on grandfathering previous local accounting policies for measurement purposes, IFRS 17 provides a comprehensive model (the general model) for insurance contracts, supplemented by the variable fee approach for contracts with direct participation features and the premium allocation approach mainly for short-duration which typically applies to certain non-life insurance contracts.

The main features of the new accounting model for insurance contracts are, as follows:

The fulfilment cash flows including the expected present value of future cash flows and explicit risk adjustment, remeasured every reporting period;

A Contractual Service Margin (CSM) represents the unearned profitability of the insurance contracts and is recognised in profit or loss over the coverage period;

Certain changes in the expected present value of future cash flows are adjusted against the CSM and thereby recognised in profit or loss over the remaining coverage period;

The effect of changes in discount rates will be reported in either profit or loss or other comprehensive income, determined by an accounting policy choice;

The recognition of insurance revenue and insurance service expenses in the statement of comprehensive income based on the concept of services provided during the period;

Amounts that the policyholder will always receive, regardless of whether an insured event happens (non-distinct investment components) are not presented in the income statement, but are recognised directly on the balance sheet;

Insurance services results are presented separately from the insurance finance income or expense;

Extensive disclosures to provide information on the recognised amounts from insurance contracts and the nature and extent of risks arising from these contracts.

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.1 Basis of preparation (continued)

2.1.2 New accounting standards and amendments that are not yet effective and have not been early adopted by the Group for the financial year beginning on 1 January 2017 (continued)

IFRS 17 *Insurance Contracts* (continued)

IFRS 17 is effective for annual reporting periods beginning on or after 1 January 2021, with comparative figures required. Early application is permitted, provided the entity also applies IFRS 9 and IFRS 15 on or before the date it first applies IFRS 17. Retrospective application is required. However, if full retrospective application for a group of insurance contracts is impracticable, then the entity is required to choose either a modified retrospective approach or a fair value approach. The Group is currently assessing the impact of the standard upon adoption.

IFRS 10 and IAS 28 Amendments *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

Amendments to IFRS 10 and IAS 28 address an inconsistency between the requirements in IFRS 10 and IAS 28 in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The amendments require a full recognition of a gain or loss when the sale or contribution of assets between an investor and its associate or joint venture constitutes a business. For a transaction involving assets that do not constitute a business, a gain or loss resulting from the transaction is recognised in the investor's profit or loss only to the extent of the unrelated investor's interest in that associate or joint venture. The amendments are to be applied prospectively. The previous mandatory effective date of amendments to IFRS 10 and IAS 28 was removed and a new mandatory effective date will be determined after the completion of a broader review of accounting for associates and joint ventures. However, the amendments are available for adoption now.

In addition, besides the amendments to IFRS 12, which are effective for annual periods beginning on or after 1 January 2017, the *Annual Improvements 2014-2016 Cycle* issued in December 2016 set out amendments to IFRS 1 and IAS 28, which are effective for annual periods beginning on or after 1 January 2018. The *Annual Improvements 2015-2017 Cycle* issued in December 2017 set out amendments to IFRS 3, IFRS 11, IAS 12 and IAS 23, which are effective for annual periods beginning on or after 1 January 2019. There is no material impact on the accounting policies of the Group as a result of these amendments.

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries for the year ended 31 December 2017. Subsidiaries are those entities which are controlled by the Group (including the structured entities controlled by the Group). Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee);

exposure, or rights, to variable returns from its involvement with the investee; and

the ability to use its power over the investee to affect its returns.

When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

the contractual arrangement with the other vote holders of the investee;

rights arising from other contractual arrangements; and

the Group's voting rights and potential voting rights.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary.

Profit or loss and each component of OCI are attributed to the equity holders of the Company and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to

transactions between members of the Group are eliminated in full upon consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

derecognises the assets (including goodwill) and liabilities of the subsidiary;

derecognises the carrying amount of any non-controlling interests;

derecognises the cumulative translation differences recorded in equity;

recognises the fair value of the consideration received;

recognises the fair value of any investment retained;

recognises any surplus or deficit in profit or loss; and

reclassifies the Group's share of components previously recognised in OCI to profit or loss or retained earnings, as appropriate, as if the Group had directly disposed of the related assets or liabilities

Table of Contents

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.2 Consolidation (continued)

The Group uses the acquisition method of accounting to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair value of the assets transferred, the liabilities incurred and the equity interest issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred. Identifiable assets acquired, and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair value at the acquisition date. On an acquisition-by-acquisition basis, the Group recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net assets.

The excess of the aggregate of the consideration transferred, the fair value of any non-controlling interest in the acquiree, and the fair value of any previous equity interest in the acquiree at the acquisition date over the fair value of the net identifiable assets acquired and liabilities assumed is recorded as goodwill. If this is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed, and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the re-assessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in profit or loss. Goodwill is tested annually for impairment and carried at cost less accumulated impairment losses. If there is any indication that goodwill is impaired, recoverable amount is estimated and the difference between carrying amount and recoverable amount is recognised as an impairment charge. Impairment losses on goodwill are not reversed in subsequent periods. Gains or losses on the disposal of an entity take into consideration the carrying amount of goodwill relating to the entity sold.

The investments in subsidiaries are accounted for only in the Company's statement of financial position at cost less impairment. Cost is adjusted to reflect changes in consideration arising from contingent consideration amendments. Cost also includes direct attributable costs of investment. The results of subsidiaries are accounted for by the Company on the basis of dividends received and receivable.

Transactions with non-controlling interests

The Group treats transactions with non-controlling interests that do not result in loss of controls as equity transactions. For shares purchased from non-controlling interests, the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposal of shares to non-controlling interests are also recorded in equity.

When the Group ceases to have control or significant influence, any retained interest in the entity is re-measured to its fair value, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in OCI in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in OCI are reclassified to profit or loss.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in OCI is reclassified to profit or loss as appropriate.

Table of Contents

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.3 Associates and joint ventures

Associates are entities over which the Group has significant influence, generally accompanying a shareholding of between 20% and 50% of the voting rights of the investee. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

Joint ventures are the type of joint arrangements whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.

Investments in associates and joint ventures are accounted for using the equity method of accounting and are initially recognised at cost.

The Group's share of post-acquisition profit or loss of its associates and joint ventures is recognised in net profit, and its share of post-acquisition movements in OCI is recognised in the consolidated statement of comprehensive income. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Group's share of losses in an associate or joint venture equals or exceeds its interest in the associate or joint venture, including any other unsecured receivables, the Group does not recognise further losses unless it has obligations to make payments on behalf of the associate or joint venture.

Unrealised gains on transactions between the Group and its associates or joint ventures are eliminated to the extent of the Group's interests in the associates or joint ventures. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Associates and joint ventures' accounting policies have been changed where necessary to ensure consistency with the policies adopted by the Group.

Goodwill represents the excess of the cost of an acquisition over the fair value of the Group's share of the net identifiable assets of acquired associates or joint ventures at the date of acquisition. Goodwill on acquisitions of associates and joint ventures is included in investments in associates and joint ventures and is tested annually for impairment as part of the overall balance. Impairment losses on goodwill are not reversed. Gains or losses on the disposal of an entity take into consideration the carrying amount of goodwill relating to the entity sold.

The Group determines at each reporting date whether there is any objective evidence that the investments in associates and joint ventures are impaired. If this is the case, an impairment loss is recognised for the amount by which the investment's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of the investment's fair value less costs of disposal and value in use. The impairment of investments in the associates and joint ventures is reviewed for possible reversal at each reporting date.

The investments in associates and joint ventures are stated at cost less impairment in the Company's statement of financial position. The results of associates and joint ventures are accounted for by the Company on the basis of dividends received and receivable.

2.4 Segment reporting

The Group's operating segments are presented in a manner consistent with the internal management reporting provided to the operating decision maker - president office for deciding how to allocate resources and for assessing performance.

Operating segment refers to the segment within the Group that satisfies the following conditions: i) the segment generates income and incurs costs from daily operating activities; ii) management evaluates the operating results of the segment to make resource allocation decision and to evaluate the business performance; and iii) the Group can obtain relevant financial information of the segment, including financial condition, operating results, cash flows and other financial performance indicators.

Table of Contents**CHINA LIFE INSURANCE COMPANY LIMITED****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****FOR THE YEAR ENDED 31 DECEMBER 2017****2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****2.5 Foreign currency translation**

The Company's functional currency is RMB. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. The reporting currency of the consolidated financial statements of the Group is RMB. Transactions in foreign currencies are translated at the exchange rates ruling at the transaction dates. Monetary assets and liabilities denominated in foreign currencies are translated at the exchange rates ruling at the end of the reporting period. Exchange differences arising in these cases are recognised in net profit.

2.6 Property, plant and equipment

Property, plant and equipment, are stated at historical costs less accumulated depreciation and any accumulated impairment losses, except for those acquired prior to 30 June 2003, which are stated at deemed cost less accumulated depreciation and any accumulated impairment losses.

The historical costs of property, plant and equipment comprise its purchase price, including import duties and non-refundable purchase taxes, and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Expenditure incurred after terms of property, plant and equipment have been put into operation, such as repairs and maintenance, is normally charged to the statement of comprehensive income in the period in which it is incurred. In situations where the recognition criteria are satisfied, the expenditure for a major inspection is capitalised in the carrying amount of the assets as a replacement. Where significant parts of property, plant and equipment are required to be replaced at intervals, the Group recognises such parts as individual assets with specific useful lives and depreciates them accordingly.

Depreciation

Depreciation is computed on a straight-line basis to write down the cost of each asset to its residual value over its estimated useful lives as follows:

	Estimated useful lives
Buildings	15 to 35 years
Office equipment, furniture and fixtures	3 to 11 years
Motor vehicles	4 to 8 years
Leasehold improvements	Over the shorter of the remaining term of

the lease and the useful lives

The residual values, depreciation method and useful lives are reviewed periodically to ensure that the method and period of depreciation are consistent with the expected pattern of economic benefits from items of property, plant and equipment.

Assets under construction mainly represent buildings under construction, which are stated at cost less any impairment losses and are not depreciated, except for those acquired prior to 30 June 2003, which are stated at deemed cost less any accumulated impairment losses. Cost comprises the direct costs of construction and capitalised borrowing costs on related borrowed funds during the period of construction. Assets under construction are reclassified to the appropriate category of property, plant and equipment, investment properties or other assets when completed and ready for use.

Impairment and gains or losses on disposals

Property, plant and equipment are reviewed for impairment losses whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised in net profit for the amount by which the carrying amount of the asset exceeds its recoverable amount, which is the higher of an asset's net selling price and value in use.

The gain or loss on disposal of an item of property, plant and equipment is the difference between the net sales proceeds and the carrying amount of the relevant asset, and is recognised in net profit.

Table of Contents

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.7 Investment properties

Investment properties are interests in land and buildings that are held to earn rental income and/or for capital appreciation, rather than for the supply of services or for administrative purposes.

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and any impairment loss.

Depreciation is computed on the straight-line basis over the estimated useful lives. The estimated useful lives of investment properties are 15 to 35 years.

Overseas investment properties that are held by the Group in the form of property ownership, equity investment, or other forms, have expected useful lives not longer than 50 years, determined based on the usage in their locations.

The useful lives and depreciation method are reviewed periodically to ensure that the method and period of depreciation are consistent with the expected pattern of economic benefits from the individual investment properties.

An investment property is derecognised when either it has been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognised in the statement of comprehensive income in the year of retirement or disposal. A transfer to, or from, an investment property is made when, and only when, there is evidence of a change in use.

2.8 Financial assets

2.8.a Classification

The Group classifies its financial assets into the following categories: securities at fair value through profit or loss, held-to-maturity securities, loans and receivables and available-for-sale securities. Management determines the classification of its financial assets at initial recognition which depends on the purpose for which the assets are acquired. The Group's investments in securities fall into the following four categories:

- (i) Securities at fair value through profit or loss

This category has two sub-categories: securities held for trading and those designated as at fair value through profit or loss at inception. Securities are classified as held for trading at inception if acquired principally for the purpose of selling in the short-term or if they form part of a portfolio of financial assets in which there is evidence of taking short-term profit. The Group may classify other financial assets as at fair value through profit or loss if they meet the criteria in IAS 39 and designated as such at inception.

(ii) Held-to-maturity securities

Held-to-maturity securities are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Group has the positive intention and ability to hold to maturity and do not meet the definition of loans and receivables nor designated as available-for-sale securities or securities at fair value through profit or loss.

(iii) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market other than those that the Group intends to sell in the short-term or held as available-for-sale. Loans and receivables mainly comprise term deposits, loans, securities purchased under agreements to resell, accrued investment income and premium receivables as presented separately in the statement of financial position.

(iv) Available-for-sale securities

Available-for-sale securities are non-derivative financial assets that are either designated in this category or not classified in any of the other categories.

Table of Contents

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.8 Financial assets (continued)

2.8.b Recognition and measurement

Purchase and sale of investments are recognised on the trade date, when the Group commits to purchase or sell assets. Investments are initially recognised at fair value plus, in the case of all financial assets not carried at fair value through profit or loss, transaction costs that are directly attributable to their acquisition. Investments are derecognised when the rights to receive cash flows from the investments have expired or when they have been transferred and the Group has also transferred substantially all risks and rewards of ownership.

Securities at fair value through profit or loss and available-for-sale securities are carried at fair value. Equity investments that do not have a quoted price in an active market and whose fair value cannot be reliably measured are carried at cost, net of allowance for impairments. Held-to-maturity securities are carried at amortised cost using the effective interest method. Investment gains and losses on sales of securities are determined principally by specific identification. Realised and unrealised gains and losses arising from changes in the fair value of the securities at fair value through profit or loss category, and the change of fair value of available-for-sale debt securities due to foreign exchange impact on the amortised cost are included in net profit in the period in which they arise. The remaining unrealised gains and losses arising from changes in the fair value of available-for-sale securities are recognised in OCI. When securities classified as available-for-sale securities are sold or impaired, the accumulated fair value adjustments are included in net profit as realised gains on financial assets.

Term deposits primarily represent traditional bank deposits which have fixed maturity dates and are stated at amortised cost.

Loans are carried at amortised cost, net of allowance for impairment.

The Group purchases securities under agreements to resell substantially identical securities. These agreements are classified as secured loans and are recorded at amortised cost, i.e., their costs plus accrued interests at the end of the reporting period, which approximates fair value. The amounts advanced under these agreements are reflected as assets in the consolidated statement of financial position. The Group does not take physical possession of securities purchased under agreements to resell. Sale or transfer of the securities is not permitted by the respective clearing house on which they are registered while the lent money is outstanding. In the event of default by the counterparty, the Group has the right to the underlying securities held by the clearing house.

2.8.c Impairment of financial assets other than securities at fair value through profit or loss

Financial assets other than those accounted for as at fair value through profit or loss are adjusted for impairment, where there are declines in value that are considered to be impairment. In evaluating whether a decline in value is an impairment for these financial assets, the Group considers several factors including, but not limited to, the following:

significant financial difficulty of the issuer or debtor;

a breach of contract, such as a default or delinquency in payments;

it becomes probable that the issuer or debtor will enter into bankruptcy or other financial reorganisation; and

the disappearance of an active market for that financial asset because of financial difficulties.

In evaluating whether a decline in value is impairment for equity securities, the Group also considers the extent or the duration of the decline. The quantitative factors include the following:

the market price of the equity securities was more than 50% below their cost at the reporting date;

the market price of the equity securities was more than 20% below their cost for a period of at least six months at the reporting date; and

the market price of the equity securities was below their cost for a period of more than one year (including one year) at the reporting date.

Table of Contents

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.8 Financial assets (continued)

2.8.c Impairment of financial assets other than securities at fair value through profit or loss (continued)

When the decline in value is considered impairment, held-to-maturity debt securities are written down to their present value of estimated future cash flows discounted at the securities' effective interest rates; available-for-sale debt securities and equity securities are written down to their fair value, and the change is recorded in net realised gains on financial assets in the period the impairment is recognised. The impairment loss is reversed through net profit if in a subsequent period the fair value of a debt security increases and the increase can be objectively related to an event occurring after the impairment loss was recognised through net profit. The impairment losses recognised in net profit on equity instruments are not reversed through net profit.

2.9 Fair value measurement

The Group measures financial instruments, such as securities at fair value through profit or loss and available-for-sale securities, at fair value at each reporting date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement of assets and liabilities is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

in the principal market for the asset or liability, or

in the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to by the Group at the measurement date.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorised within the fair value hierarchy, described in Notes 4.3, 7, and 10 based on the lowest level input that is significant to the fair value measurement as a whole.

For assets and liabilities that are measured at fair value on a recurring basis, the Group determines whether transfers have occurred between each level in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Table of Contents

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.10 Cash and cash equivalents

Cash amounts represent cash on hand and demand deposits. Cash equivalents are short-term, highly liquid investments with original maturities of 90 days or less, whose carrying value approximates fair value.

2.11 Insurance contracts and investment contracts

2.11.1 Classification

The Group issues contracts that transfer insurance risk or financial risk or both. The contracts issued by the Group are classified as insurance contracts and investment contracts. Insurance contracts are those contracts that transfer significant insurance risk. They may also transfer financial risk. Investment contracts are those contracts that transfer financial risk without significant insurance risk. A number of insurance and investment contracts contain a discretionary participating feature (DPF). This feature entitles the policyholders to receive additional benefits or bonuses that are, at least in part, at the discretion of the Group.

2.11.2 Insurance contracts

2.11.2.a Recognition and measurement

(i) Short-term insurance contracts

Premiums from the sale of short duration accident and health insurance products are recorded when written and are accreted to earnings on a pro-rata basis over the term of the related policy coverage. Reserves for short duration insurance products consist of unearned premium reserve and expected claims and claim adjustment expenses reserve. Actual claims and claim adjustment expenses are charged to net profit as incurred.

The unearned premium reserve represents the portion of the premiums written net of certain acquisition costs relating to the unexpired terms of coverage.

Reserves for claims and claim adjustment expenses consist of the reserves for reported and unreported claims and reserves for claims expenses with respect to insured events. In developing these reserves, the Group considers the nature and distribution of the risks, claims cost development, and experiences in deriving the reasonable estimated

amount and the applicable margins. The methods used for reported and unreported claims include the case-by-case estimation method, average cost per claim method, chain ladder method, etc. The Group calculates the reserves for claims expenses based on the reasonable estimates of the future payments for claims expenses.

(ii) Long-term insurance contracts

Long-term insurance contracts include whole life insurance, term life insurance, endowment insurance and annuity policies with significant life contingency risk. Premiums are recognised as revenue when due from policyholders.

The Group uses the discounted cash flow method to estimate the reserve of long-term insurance contracts. The reserve of long-term insurance contracts consists of a reasonable estimate of liability, a risk margin and a residual margin. The long-term insurance contract liabilities are calculated using various assumptions, including assumptions on mortality rates, morbidity rates, lapse rates, discount rates, and expense assumptions, and based on the following principles:

Table of Contents

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.11 Insurance contracts and investment contracts (continued)

2.11.2 Insurance contracts (continued)

2.11.2.a Recognition and measurement (continued)

(ii) Long-term insurance contracts (continued)

- (a) The reasonable estimate of liability for long-term insurance contracts is the present value of reasonable estimates of future cash outflows less future cash inflows. The expected future cash inflows include cash inflows of future premiums arising from the undertaking of insurance obligations, with consideration of decrement mostly from death and surrenders. The expected future cash outflows are cash outflows incurred to fulfil contractual obligations, consisting of the following:

guaranteed benefits based on contractual terms, including payments for deaths, disabilities, diseases, survivals, maturities and surrenders;

additional non-guaranteed benefits, such as policyholder dividends; and

reasonable expenses incurred to manage insurance contracts or to process claims, including maintenance expenses and claim settlement expenses. Future administration expenses are included in the maintenance expenses. Expenses are determined based on expense analysis with consideration of future inflation and the Group's expense management control.

On each reporting date, the Group reviews the assumptions for reasonable estimates of liability and risk margins, with consideration of all available information, taking into account the Group's historical experience and expectation of future events. Changes in assumptions are recognised in net profit. Assumptions for the amortisation of residual margin are locked in at policy issuance and are not adjusted at each reporting date.

- (b) Margin has been taken into consideration while computing the reserve of insurance contracts, measured separately and recognised in net profit in each period over the life of the contracts. At the inception of the contracts, the Group does not recognise Day 1 gain, whereas on the other hand, Day 1 loss is recognised in net profit immediately.

Margin comprises risk margin and residual margin. Risk margin is the reserve accrued to compensate for the uncertain amount and timing of future cash flows. At the inception of the contract, the residual margin is calculated net of certain acquisition costs, mainly consist of underwriting and policy acquisition costs, by the Group representing Day 1 gain and will be amortised over the life of the contracts. For insurance contracts of which future returns are affected by investment yields of corresponding investment portfolios, their related residual margins are amortised based on estimated future participating dividends payable to policyholders. For insurance contracts of which future returns are not affected by investment yields of corresponding investment portfolios, their related residual margins are amortised based on sum assured of outstanding policies. The subsequent measurement of the residual margin is independent from the reasonable estimate of future discounted cash flows and risk margin. The assumption changes have no effect on the subsequent measurement of the residual margin.

- (c) The Group has considered the impact of time value on the reserve calculation for insurance contracts.

Table of Contents

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.11 Insurance contracts and investment contracts (continued)

2.11.2 Insurance contracts (continued)

2.11.2.a Recognition and measurement (continued)

(iii) Universal life contracts and unit-linked contracts

Universal life contracts and unit-linked contracts are unbundled into the following components:

insurance components

non-insurance components

The insurance components are accounted for as insurance contracts; and the non-insurance components are accounted for as investment contracts (Note 2.11.3), which are stated in the investment contract liabilities.

2.11.2.b Liability adequacy test

The Group assesses the adequacy of insurance contract reserves using the current estimate of future cash flows with available information at the end of each reporting period. If that assessment shows that the carrying amount of its insurance liabilities (less related intangible assets, if applicable) is inadequate in light of the estimated future cash flows, the insurance contract reserves will be adjusted accordingly, and any changes of the insurance contract liabilities will be recognised in net profit.

2.11.2.c Reinsurance contracts held

Contracts with reinsurers under which the Group is compensated for losses on one or more contracts issued by the Group and that meet the classification requirements for insurance contracts are classified as reinsurance contracts held. Contracts with reinsurers that do not meet these classification requirements are classified as financial assets. Insurance contracts entered into by the Group under which the contract holder is another insurer (inwards reinsurance) are

included with insurance contracts.

The benefits to which the Group is entitled under its reinsurance contracts held are recognised as reinsurance assets. Amounts recoverable from or due to reinsurers are measured consistently with the amounts associated with the reinsured insurance contracts and in accordance with the terms of each reinsurance contract. Reinsurance liabilities are primarily premiums payable for reinsurance contracts and are recognised as expenses when due.

The Group assesses its reinsurance assets for impairment as at the end of reporting period. If there is objective evidence that the reinsurance asset is impaired, the Group reduces the carrying amount of the reinsurance asset to its recoverable amount and recognises that impairment loss in net profit.

Table of Contents

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.11 Insurance contracts and investment contracts (continued)

2.11.3 Investment contracts

Revenue from investment contracts with or without DPF is recognised as policy fee income, which consists of various fee incomes (policy fees, handling fees and management fees, etc.) during the period. Policy fee income net of acquisition cost is deferred as unearned revenue and amortised over the expected life of the contracts.

Except for unit-linked contracts, of which the liabilities are carried at fair value, the liabilities of investment contracts are carried at amortised cost.

2.11.4 DPF in long-term insurance contracts and investment contracts

DPF is contained in certain long-term insurance contracts and investment contracts. These contracts are collectively called participating contracts. The Group is obligated to pay to the policyholders of participating contracts as a group at the higher of 70% of accumulated surplus available and the rate specified in the contracts. The accumulated surplus available mainly arises from net investment income and gains and losses arising from the assets supporting these contracts. To the extent unrealised gains or losses from available-for-sale securities are attributable to policyholders, shadow adjustments are recognised in OCI. The surplus owed to policyholders is recognised as policyholder dividend payable whether it is declared or not. The amount and timing of distribution to individual policyholders of participating contracts are subject to future declarations by the Group.

2.12 Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss are the portions owned by the external investors in the consolidated structured entities (open-ended funds). Such financial liabilities are designated at fair value upon initial recognition, and all realised or unrealised gains or losses are recognised in net profit.

2.13 Securities sold under agreements to repurchase

The Group retains substantially all the risk and rewards of ownership of securities sold under agreements to repurchase which generally mature within 180 days from the transaction date. Therefore, securities sold under agreements to repurchase are classified as secured borrowings. The Group may be required to provide additional collateral based on the fair value of the underlying securities. Securities sold under agreements to repurchase are

recorded at amortised cost, i.e., their cost plus accrued interest at the end of the reporting period. It is the Group's policy to maintain effective control over securities sold under agreements to repurchase which includes maintaining physical possession of the securities. Accordingly, such securities continue to be carried on the consolidated statement of financial position.

2.14 Bonds payable

Bonds payable primarily include subordinated debts. Subordinated debts are initially recognised at fair value and subsequently measured at amortised cost using the effective interest rate method. Amortised cost is calculated by taking into account any discount or premium at acquisition and transaction costs.

2.15 Derivative instruments

Derivatives are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at their fair value. The resulting gain or loss of derivative financial instruments is recognised in net profit. Fair values are obtained from quoted market prices in active market, taking into consideration of recent market transactions or valuation techniques, including discounted cash flow models and option pricing models, as appropriate. All derivatives are carried as assets when fair value is positive and as liabilities when fair value is negative.

Embedded derivatives that are not closely related to their host contracts and meet the definition of a derivative are separated and fair valued through profit or loss. The Group does not separately measure embedded derivatives that meet the definition of an insurance contract or embedded derivatives that are closely related to host insurance contracts including embedded options to surrender insurance contracts for a fixed amount (or an amount based on a fixed amount and an interest rate).

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.16 Employee benefits

Pension benefits

Full-time employees of the Group are covered by various government-sponsored pension plans under which the employees are entitled to a monthly pension based on certain formulae. These government agencies are responsible for the pension liability to these employees upon retirement. The Group contributes on a monthly basis to these pension plans. In addition to the government-sponsored pension plans, the Group established an employee annuity fund pursuant to the relevant laws and regulations in the PRC, whereby the Group is required to contribute to the schemes at fixed rates of the employees' salary costs. Contributions to these plans are expensed as incurred. Under these plans, the Group has no legal or constructive obligation for retirement benefit beyond the contributions made.

Housing benefits

All full-time employees of the Group are entitled to participate in various government-sponsored housing funds. The Group contributes on a monthly basis to these funds based on certain percentages of the salaries of the employees. The Group's liability in respect of these funds is limited to the contributions payable in each year.

Stock appreciation rights

Compensation under the stock appreciation rights is measured based on the fair value of the liabilities incurred and is expensed over the vesting period. Valuation techniques including option pricing models are used to estimate fair value of relevant liabilities. The liability is re-measured at the end of each reporting period to its fair value until settlement. Fair value changes in the vesting period is included in administrative expenses and changes after the vesting period is included in net fair value gains through profit or loss in net profit. The related liability is included in other liabilities.

2.17 Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of equity instruments are shown in equity as a deduction, net of tax, from the proceeds.

2.18 Other equity instruments

Other equity instruments are Core Tier 2 Capital Securities issued by the Group. These securities contain no contractual obligation to deliver cash or another financial asset; or to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Group; or to be settled in the Group's own

equity instruments. Therefore, the Group classifies these securities as other equity instruments. Fees, commissions and other transaction costs of these securities issuance are deducted from equity. The distributions of the securities are recognised as profit distribution at the time of declaration.

2.19 Revenue recognition

Turnover of the Group represents the total revenues which include the following:

Premiums

Premiums from long-term insurance contracts are recognised as revenue when due from the policyholders.

Premiums from the sale of short duration accident and health insurance products are recorded when written and are accreted to earnings on a pro-rata basis over the term of the related policy coverage.

Policy fee income

Revenue from investment contracts is recognised as policy fee income, which consists of various fee incomes (policy fees, handling fees and management fees, etc.) over the period of which the service is provided. Policy fee income net of certain acquisition costs is deferred as unearned revenue and amortised over the expected life of the contracts.

Policy fee income is recognised in revenue as part of other income.

Investment income

Investment income comprises interest income from term deposits, cash and cash equivalents, debt securities, securities purchased under agreements to resell, loans and dividend income from equity securities. Interest income is recorded on an accrual basis using the effective interest rate method. Dividend income is recognised when the right to receive dividend payment is established.

Table of Contents

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.20 Finance costs

Interest expenses for bonds payable, securities sold under agreements to repurchase and interest-bearing loans and borrowings are recognised within finance costs in net profit using the effective interest rate method.

2.21 Current and deferred income taxation

Income tax expense for the period comprises current and deferred tax. Income tax is recognised in net profit, except to the extent that it relates to items recognised directly in OCI where the income tax is recognised in OCI.

Current income tax assets and liabilities for the current period are calculated on the basis of the tax laws enacted or substantively enacted at the end of each reporting period in the jurisdictions where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken with respect to situations in which applicable tax regulations are subject to interpretation.

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. Substantively enacted tax rates are used in the determination of deferred income tax.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, associates and joint ventures except where the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not be reversed in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Conversely, previously unrecognised deferred tax assets are reassessed by the end of each reporting period and are recognised to the extent that it is probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the end of the reporting period.

Deferred tax assets and deferred tax liabilities are offset if and only if the Group has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income tax levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities

simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

2.22 Operating leases

Leases where substantially all the risks and rewards of ownership of assets remain with the lessor company are accounted for as operating leases.

Where the Group is the lessor, assets leased by the Group under operating leases are included in investment properties and rentals receivable under such operating leases are credited to the consolidated statement of comprehensive income on the straight-line basis over the lease terms.

Where the Group is the lessee, rentals payable under operating leases are charged to the consolidated statement of comprehensive income on the straight-line basis over the lease terms. The aggregate benefit of incentives provided by the lessor is recognised as a reduction in rental expenses over the lease terms on the straight-line basis.

Table of Contents

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

2.23 Provisions and contingencies

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognised for future operating losses.

A contingent liability is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group. It can also be a present obligation arising from past events that is not recognised because it is not probable that outflow of economic resources will be required or the amount of obligation cannot be measured reliably.

A contingent liability is not recognised in the consolidated statement of financial position but is disclosed in the notes to the consolidated financial statements. When a change in the probability of an outflow occurs so that such outflow is probable and can be reliably measured, it will then be recognised as a provision.

2.24 Dividend distribution

Dividend distribution to the Company's equity holders is recognised as a liability in the Group's consolidated financial statements in the year in which the dividends are approved by the Company's equity holders.

3 CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The Group makes estimates and assumptions that affect the reported amounts of assets and liabilities. Estimates and judgements are continually evaluated and based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The Group exercises significant judgement in making appropriate assumptions.

Areas susceptible to changes in critical estimates and judgements, which affect the carrying value of assets and liabilities, are set out below. It is possible that actual results may be different from the estimates and judgements referred to below.

3.1 Estimate of future benefit payments and premiums arising from long-term insurance contracts

The determination of the liabilities under long-term insurance contracts is based on estimates of future benefit payments, premiums and relevant expenses made by the Group and the margins. Assumptions about mortality rates,

morbidity rates, lapse rates, discount rates, and expense assumptions are made based on the most recent historical analysis and current and future economic conditions. The liability uncertainty arising from uncertain future benefit payments, premiums and relevant expenses is reflected in the risk margin.

The residual margin relating to the long-term insurance contracts is amortised over the expected life of the contracts, based on the assumptions (mortality rates, morbidity rates, lapse rates, discount rates, and expenses assumption) that are determined at inception of the contracts and remain unchanged for the duration of the contracts.

The judgements exercised in the valuation of insurance contract liabilities (including contracts with DPF) affect the amounts recognised in the consolidated financial statements as insurance contract benefits and insurance contract liabilities.

The impact of the various assumptions and their changes are described in Note 14.

Table of Contents

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

3 CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (CONTINUED)

3.2 Financial instruments

The Group's principal investments are debt securities, equity securities, term deposits and loans. The critical estimates and judgements are those associated with the recognition of impairment and the measurement of fair value.

The Group considers a wide range of factors in the impairment assessment as described in Note 2.8.c.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When the fair values of financial assets and liabilities recorded in the consolidated statement of financial position cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques which require a degree of judgements. The methods and assumptions used by the Group in measuring the fair value of financial instruments are as follows:

debt securities: fair values are generally based upon current bid prices. Where current bid prices are not readily available, fair values are estimated using either prices observed in recent transactions, values obtained from current bid prices of comparable investments or valuation techniques when the market is not active.

equity securities: fair values are generally based upon current bid prices. Where current bid prices are not readily available, fair values are estimated using either prices observed in recent transactions or commonly used market pricing models. Equity securities, for which fair values cannot be measured reliably, are recognised at cost less impairment.

securities purchased under agreements to resell, policy loans, term deposits, interest-bearing loans and borrowings, and securities sold under agreements to repurchase: the carrying amounts of these assets in the consolidated statement of financial position approximate fair value.

fair value of other loans are obtained from valuation techniques.

For the description of valuation techniques, please refer to Note 4.3. Using different valuation techniques and parameter assumptions may lead to some differences of fair value estimations.

3.3 Impairment of investments in associates and joint ventures

The Group assesses whether there are any indicators of impairment for investments in associates and joint ventures at the end of each reporting period. Investments in associates and joint ventures are tested for impairment when there are indicators that the carrying amounts may not be recoverable. An impairment exists when the carrying value of investments in associates and joint ventures exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The calculation of the fair value less costs of disposal is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of investments in associates and joint ventures. When value in use calculations are undertaken, the Group must estimate the expected future cash flows from investments in associates and joint ventures and choose a suitable discount rate in order to calculate the present value of those cash flows.

3.4 Income tax

The Group is subject to income tax in numerous jurisdictions. During the normal course of business, certain transactions and activities for which the ultimate tax determination is uncertain, the Group needs to exercise significant judgement when determining the income tax. If the final settlement results of the tax matters are different from the amounts recorded, these differences will impact the final income tax expense and deferred tax for the period.

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

3 CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (CONTINUED)

3.5 Determination of control over investee

The Group applies its judgement to determine whether the control indicators set out in Note 2.2 indicate that the Group controls structured entities such as funds and asset management products.

The Group issues certain structured entities (e.g. funds and asset management plans), and acts as a manager for such entities according to the contracts. In addition, the Group may be exposed to variability of returns as a result of holding shares of the structured entities. Determining whether the Group controls such structured entities usually focuses on the assessment of the aggregate economic interests of the Group in the entities (including any carried interests and expected management fees) and the decision-making rights on the entity. As at 31 December 2017, the Group has consolidated some fund products issued and managed by the Company's subsidiary, China Life AMP Asset Management Company (CL AMP), some debt investment schemes issued and managed by the Company's subsidiary, China Life Asset Management Company Limited (CL AMC) and some trust schemes and debt investment schemes issued and managed by third parties in the consolidated financial statements.

4 RISK MANAGEMENT

Risk management is carried out by the Company's Risk Management Committee under policies approved by the Company's Board of Directors.

The Group issues contracts that transfer insurance risk or financial risk or both. This section summarises these risks and the way the Group manages them.

4.1 Insurance risk

4.1.1 Types of insurance risks

The risk under any one insurance contract is the possibility that an insured event occurs and the uncertainty about the amount of the resulting claim. By the very nature of an insurance contract, this risk is random and therefore unpredictable. For a portfolio of insurance contracts where the theory of probability is applied to the pricing and provisioning, the principal risk that the Group faces under its insurance contracts is that the actual claims and benefit payments are less favourable than the underlying assumptions used in establishing the insurance liabilities. This occurs when the frequency or severity of claims and benefits exceeds the estimates. Insurance events are random, and the actual number of claims and the amount of benefits paid will vary each year from estimates established using statistical techniques.

Experience shows that the larger the portfolio of similar insurance contracts, the smaller the relative variability of the expected outcome will be. In addition, a more diversified portfolio is less likely to be affected across the board by a change in any subset of the portfolio. The Group has developed its insurance underwriting strategy to diversify the types of insurance risks accepted and within each of these categories to achieve a sufficiently large population to reduce the variability of the expected outcome. The Group manages insurance risk through underwriting strategies, reinsurance arrangements and claims handling.

The Group manages insurance risks through two types of reinsurance agreements, ceding on a quota share basis or a surplus basis, to cover insurance liability risk. Reinsurance contracts cover almost all products, which contain risk liabilities. The products reinsured include: life insurance, accident and health insurance or death, disability, accident, illness and assistance in terms of product category or function, respectively. These reinsurance agreements spread insured risk to a certain extent and reduce the effect of potential losses to the Group. However, the Group's direct insurance liabilities to the policyholder are not eliminated because of the credit risk associated with the failure of reinsurance companies to fulfil their responsibilities.

4.1.2 Concentration of insurance risks

All insurance operations of the Group are located in the PRC. There are no significant differences among the regions where the Group underwrites insurance contracts.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

4 RISK MANAGEMENT (CONTINUED)

4.1 Insurance risk (continued)

4.1.2 Concentration of insurance risks (continued)

- (a) New Xin Feng is an endowment insurance contract with single premium. Its insured period is 5 years. This product is applicable to healthy policyholders between 18-year-old and 70-year-old. Both maturity and death benefits are paid at the basic sum insured. Accident death benefit is paid at 300% of the basic sum insured.

- (b) Xin Fu Ying Jia Annuity is an annuity insurance contract with the options for regular premium of 3 years, 5 years or 10 years. Its insured period extends from the effective date of Xin Fu Ying Jia Annuity to the corresponding date when policyholders reach the age of 88. This product is applicable to healthy policyholders between 28-day-old and 70-year-old. From the effective date to the contractual date starting to claim of Xin Fu Ying Jia Annuity, the annuity payment of first policy year is paid at 20% of the first premium of the product, the following annuity payments are paid at 20% of the basic sum insured by Xin Fu Ying Jia Annuity. From the first corresponding date after the contractual date starting to claim of annuity, to the corresponding date when the policyholders reach the age of 88-year-old, annuity is paid at 3% of the basic sum insured during the insured period if policyholders live to the annual corresponding effective date; annuity is paid at the premium received (without interest) during the insured period if policyholders live to the contractual date starting to claim of annuity; the contract terminates and death benefit is paid at the premium received (without interest) or the cash value of the contract, whichever greater when death incurred before the contractual date starting to claim of annuity; the contract terminates and death benefit is paid at the cash value of the contract when death incurred after contractual date starting to claim of annuity; the contract terminates and accidental death benefit is paid at the premium received (without interest) less any death benefit paid when accidents occurred and due to which death incurred within 180 days.

- (c) Kang Ning is a whole life insurance contract with the options for single premium or regular premium of 10 years or 20 years. This product is applicable to healthy policyholders under 70-year-old. The critical illness benefit is paid at 200% of the basic sum insured. Both death and disability benefits are paid at 300% of the basic sum insured less any critical illness benefits paid.

- (d) Hong Ying is a participating endowment insurance contract with the options for single premium or regular premium of 3 years, 5 years or 10 years. Its insured period can be 6 years, 10 years or 15 years. This product is applicable to healthy policyholders between 30-day-old and 70-year-old. Maturity benefit of a single premium policy is paid at the basic sum insured, while that of a regular premium policy is paid at the basic sum insured multiplied by the number of years of the premium payments. Disease death benefit incurred within the first policy year is paid at the premium received (without interest). Disease death benefit incurred after the first policy year is paid at the basic sum insured for a single premium policy or the basic sum insured multiplied by the number of years of premium payments for a regular premium policy. When accidents occurred during taking a train, a ship or a flight period, death benefit is paid at 300% of the basic sum insured for a single premium policy or 300% of the basic sum insured multiplied by the number of years of premium payments for a regular premium policy. When accidents occurred out of the period of taking a train, a ship or a flight, death benefit is paid at 200% of the basic sum insured for a single premium policy or 200% of the basic sum insured multiplied by the number of years of premium payments for a regular premium policy.

- (e) Hong Tai is long-term individual participating endowment insurance contract with options for single premium or regular premium of 10 years, designed for healthy policyholders of age between 30-day-old and 75-year-old. Insured period can be 5 years, 6 years or 10 years. Maturity benefit for single premium is paid at 100% of basic sum insured. Maturity benefit for regular premium is paid at basic sum insured multiplied by number of year of premium payments. Disease death benefit incurred within first year is paid at premium received (without interest). All other death benefits incurred are paid at basic sum insured or basic sum insured multiplied by the number of year of premium payments for single premium and regular premium, respectively.

- (f) Others consist of various long-term insurance contracts with no significant concentration.

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

4 RISK MANAGEMENT (CONTINUED)

4.1 Insurance risk (continued)

4.1.3 Sensitivity analysis

Sensitivity analysis of long-term insurance contracts

Liabilities for long-term insurance contracts and liabilities unbundled from universal life insurance contracts and unit-linked insurance contracts with insurance risk are calculated based on the assumptions on mortality rates, morbidity rates, lapse rates and discount rates. Changes in insurance contract reserve assumptions reflect the Company's actual operating results and changes in its expectation of future events. The Company considers the potential impact of future risk factors on its operating results and incorporates such potential impact in the determination of assumptions.

Holding all other variables constant, if mortality rates and morbidity rates were to increase or decrease from the current best estimate by 10%, pre-tax profit for the year would have been RMB19,731 million or RMB20,559 million (as at 31 December 2016: RMB16,746 million or RMB17,492 million) lower or higher, respectively.

Holding all other variables constant, if lapse rates were to increase or decrease from the current best estimate by 10%, pre-tax profit for the year would have been RMB1,940 million or RMB1,989 million (as at 31 December 2016: RMB2,823 million or RMB2,953 million) lower or higher, respectively.

Holding all other variables constant, if the discount rates were 50 basis points higher or lower than the current best estimate, pre-tax profit for the year would have been RMB70,732 million or RMB80,152 million (as at 31 December 2016: RMB57,591 million or RMB65,427 million) higher or lower, respectively.

Sensitivity analysis of short-term insurance contracts

The assumptions of reserves for claims and claim adjustment expenses may be affected by other variables such as claims payment of short-term insurance contracts, which may result in the synchronous changes to reserves for claims and claim adjustment expenses.

Holding all other variables constant, if claim ratios are 100 basis points higher or lower than the current assumption, pre-tax profit is expected to be RMB445 million (as at 31 December 2016: RMB372 million) lower or higher, respectively.

The following table indicates the claim development for short-term insurance contracts without taking into account the impacts of ceded business:

	Short-term insurance contracts (accident year)					
Estimated claims expenses	2013	2014	2015	2016	2017	Total
Year end	11,476	16,499	20,497	27,120	33,926

4.2 Financial risk

The Group's activities are exposed to a variety of financial risks. The key financial risk is that proceeds from the sale of financial assets will not be sufficient to fund the obligations arising from the Group's insurance and investment contracts. The most important components of financial risk are market risk, credit risk and liquidity risk.

The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Group. Risk management is carried out by a designated department under policies approved by management. The responsible department identifies, evaluates and manages financial risks in close cooperation with the Group's operating units. The Group provides written principles for overall risk management, as well as written policies covering specific areas, such as managing market risk, credit risk, and liquidity risk.

The Group manages financial risk by holding an appropriately diversified investment portfolio as permitted by laws and regulations designed to reduce the risk of concentration in any one specific industry or issuer. The structure of the investment portfolio held by the Group is disclosed in Note 9.

The sensitivity analyses below are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur, and changes in some of the assumptions may be correlated, such as change in interest rate and change in market price.

Table of Contents

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

4 RISK MANAGEMENT (CONTINUED)

4.2 Financial risk (continued)

4.2.1 Market risk

(i) Interest rate risk

Interest rate risk is the risk that the value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates. The Group's financial assets are principally composed of term deposits, debt securities and loans which are exposed to interest rate risk. Changes in the level of interest rates could have a significant impact on the Group's overall investment return. Many of the Group's insurance policies offer guaranteed returns to policyholders. These guarantees expose the Group to interest rate risk.

The Group manages interest rate risk through adjustments to portfolio structure and duration, and, to the extent possible, by monitoring the mean duration of its assets and liabilities.

The sensitivity analysis for interest rate risk illustrates how changes in interest income and the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates at the end of the reporting period.

As at 31 December 2017, if market interest rates were 50 basis points higher or lower with all other variables held constant, pre-tax profit for the year would have been RMB35 million lower or higher (as at 31 December 2016: RMB160 million higher or lower), respectively, mainly as a result of higher or lower interest income on floating rate cash and cash equivalents, term deposits, statutory deposits - restricted, debt securities and loans and the fair value losses or gains on debt securities assets at fair value through profit or loss. Pre-tax available-for-sale reserve in equity would have been RMB11,463 million or RMB8,306 million (as at 31 December 2016: RMB6,948 million or RMB6,948 million) lower or higher, as a result of a decrease or increase in the fair value of available-for-sale securities.

(ii) Price risk

Price risk arises mainly from the volatility of prices of equity securities held by the Group. Prices of equity securities are determined by market forces. The Group is subject to increased price risk largely because China's capital markets are relatively volatile.

The Group manages price risk by holding an appropriately diversified investment portfolio as permitted by laws and regulations designed to reduce the risk of concentration in any one specific industry or issuer.

As at 31 December 2017, if the prices of all the Group's equity securities had increased or decreased by 10% with all other variables held constant, pre-tax profit for the year would have been RMB3,341 million or RMB5,393 million (as at 31 December 2016: RMB3,263 million or RMB3,400 million) higher or lower, respectively, mainly as a result of an increase or decrease in fair value of equity securities excluding available-for-sale securities. Pre-tax available-for-sale reserve in equity would have been RMB23,423 million or RMB32,651 million (as at 31 December 2016: RMB24,999 million or RMB28,153 million) higher or lower, respectively, as a result of an increase or decrease in fair value of available-for-sale equity securities. If prices decreased to the extent that the impairment criteria were met, a portion of such decrease of the available-for-sale equity securities would reduce pre-tax profit through impairment.

(iii) Currency risk

Currency risk is the volatility of fair value or future cash flows of financial instruments resulted from changes in foreign currency exchange rates. The Group's currency risk exposure mainly arises from cash and cash equivalents, term deposits, debt investments, equity investments, interest-bearing loans and borrowings denominated in currencies other than the functional currency, such as US dollar, HK dollar, GB pound and EUR, etc.

Table of Contents**CHINA LIFE INSURANCE COMPANY LIMITED****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****FOR THE YEAR ENDED 31 DECEMBER 2017****4 RISK MANAGEMENT (CONTINUED)****4.2 Financial risk (continued)****4.2.1 Market risk (continued)****(iii) Currency risk (continued)**

The following table summarises financial assets and financial liabilities denominated in currencies other than RMB as at 31 December 2017 and 2016, expressed in RMB equivalent:

As at 31 December 2017	US dollar	HK dollar	GB pound	EUR	Others	Total
Financial assets						
Equity securities						
- Available-for-sale securities	8,697	28,859				37,556
- Securities at fair value through profit or loss	4,707	146	1,088	2,690	1,198	9,829
Debt securities						
- Held-to-maturity securities	155					155
- Loans	952					952
- Available-for-sale securities	1,229					1,229
- Securities at fair value through profit or loss	435		18	5	5	463
Term deposits	7,744					7,744
Cash and cash equivalents	1,246	185	282	128	3	1,844
Total	25,165	29,190	1,388	2,823	1,206	59,772
Financial liabilities						
Interest-bearing loans and other borrowings	12,480		2,413	3,901		18,794
Total	12,480		2,413	3,901		18,794

As at 31 December 2016	US dollar	HK dollar	GB pound	EUR	Others	Total
-------------------------------	------------------	------------------	-----------------	------------	---------------	--------------

Financial assets						
Equity securities						
- Available-for-sale securities	6,968	12,791			148	19,907
- Securities at fair value through profit or loss	3,906	128	1,115	2,475	1,135	8,759
Debt securities						
- Held-to-maturity securities	164					164
- Securities at fair value through profit or loss	348		14	3	13	378
Term deposits	6,106					6,106
Cash and cash equivalents	2,685	2,083	145	39	9	4,961
Total	20,177	15,002	1,274	2,517	1,305	40,275

Interest-bearing loans and other borrowings	13,100		2,339	731		16,170
Total	13,100		2,339	731		16,170

As at 31 December 2017, if RMB had strengthened or weakened by 10% against US dollar, HK dollar, GB pound, EUR and other foreign currencies, with all other variables held constant, pre-tax profit for the year would have been RMB308 million (as at 31 December 2016: RMB420 million) lower or higher, respectively, mainly as a result of foreign exchange losses or gains on translation of US dollar, HK dollar, GB pound, EUR and other foreign currencies denominated financial assets and financial liabilities other than the available-for-sale equity securities included in the table above. Pre-tax available-for-sale reserve in equity would have been RMB3,541 million (as at 31 December 2016: RMB1,743 million) lower or higher, respectively, as a result of foreign exchange losses or gains on translation of the available-for-sale equity securities at fair value. The actual exchange gains in 2017 were RMB52 million (2016: exchange gains of RMB582 million).

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

4 RISK MANAGEMENT (CONTINUED)

4.2 Financial risk (continued)

4.2.2 Credit risk

Credit risk is the risk that one party of a financial transaction or the issuer of a financial instrument will fail to discharge its obligation and cause another party to incur a financial loss. Because the Group's investment portfolio is restricted to the types of investments as permitted by the China Banking and Insurance Regulatory Commission (CBIRC) which was merged of China Insurance Regulatory Commission (CIRC) and China Banking Regulatory Commission, and a significant portion of the portfolio is in government bonds, government agency bonds and term deposits with the state-owned commercial banks, the Group's overall exposure to credit risk is relatively low.

Credit risk is controlled by the application of credit approvals, limits and monitoring procedures. The Group manages credit risk through in-house research and analysis of the Chinese economy and the underlying obligors and transaction structures. Where appropriate, the Group obtains collateral in the form of rights to cash, securities, property and equipment to lower the credit risk.

Credit risk exposure

The carrying amount of financial assets included on the consolidated statement of financial position represents the maximum credit risk exposure at the reporting date without taking account of any collateral held or other credit enhancements attached. The Group has no credit risk exposure relating to off-balance sheet items as at 31 December 2017 and 2016.

Collateral and other credit enhancements

Securities purchased under agreements to resell are pledged by counterparties' debt securities or term deposits of which the Group could take the ownership if the owner of the collateral defaults. Policy loans and most of premium receivables are collateralised by their policies' cash value according to the terms and conditions of policy loan contracts and policy contracts, respectively.

Credit quality

The Group's debt securities investment mainly includes government bonds, government agency bonds, corporate bonds and subordinated bonds or debts, and most of the debt securities are guaranteed by either the Chinese government or Chinese government controlled financial institutions. As at 31 December 2017, 99.9% (as at 31 December 2016: 99.0%) of the corporate bonds held by the Group or the issuers of these corporate bonds had credit ratings of AA/A-2 or above. As at 31 December 2017, 99.9% (as at 31 December 2016: 99.9%) of the

subordinated bonds or debts held by the Group either had credit ratings of AA/A-2 or above, or were issued by national commercial banks. The bonds, debts or their issuers' credit ratings are assigned by a qualified appraisal institution in the PRC and updated at each reporting date.

As at 31 December 2017, 99.8% (as at 31 December 2016: 99.5%) of the Group's bank deposits are with the four largest state-owned commercial banks, other national commercial banks and China Securities Depository and Clearing Corporation Limited (CSDCC) in the PRC. The Group believes these commercial banks, and CSDCC have a high credit quality. The Group's most other loans excluding policyholder loans, are guaranteed by third parties or with pledge, or have the fiscal annual budget income as the source of repayment, or have higher credit rating borrowers. As a result, the Group concludes that the credit risk associated with term deposits and accrued investment income thereof, statutory deposits - restricted, other loans, and cash and cash equivalents will not cause a material impact on the Group's consolidated financial statements as at 31 December 2017 and 2016.

The credit risk associated with securities purchased under agreements to resell, policy loans and most of premium receivables will not cause a material impact on the Group's consolidated financial statements taking into consideration their collateral held and maturity terms of no more than one year as at 31 December 2017 and 2016.

Table of Contents**CHINA LIFE INSURANCE COMPANY LIMITED****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****FOR THE YEAR ENDED 31 DECEMBER 2017****4 RISK MANAGEMENT (CONTINUED)****4.2 Financial risk (continued)****4.2.3 Liquidity risk**

Liquidity risk is the risk that the Group is unable to obtain funds at a reasonable funding cost when required to meet a repayment obligation and fund its asset portfolio within a certain time.

In the normal course of business, the Group attempts to match the maturity of financial assets to the maturity of insurance and financial liabilities.

The following tables set forth the contractual and expected undiscounted cash flows for financial assets and liabilities and insurance liabilities:

As at 31 December 2017	Carrying value	Without maturity	Contractual and expected cash flows (undiscounted)			
			Not later than 1 year	Later than 1 year but later than 3 years	Later than 3 years but later than 5 years	Later than 5 years

Interest-bearing loans and other borrowings	16,170	(1,138)	(16,159)			
Bonds payable	37,998	(39,032)				
Subtotal	2,220,017	(2,031)	(219,498)	46,930	1,960	(3,489,299)
Net cash inflows/(outflows)	301,441	419,352	480,631	584,526	349,741	(2,411,261)

The amounts set forth in the tables above for insurance and investment contracts in each column are the cash flows representing expected future benefit payments taking into consideration of future premiums payments or deposits from policyholders. The excess cash inflows from matured financial assets will be reinvested to cover any future liquidity exposures. The estimate is subject to assumptions related to mortality, morbidity, the lapse rate, the loss ratio of short-term insurance contracts, expense and other assumptions. Actual experience may differ from estimates.

Table of Contents

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

4 RISK MANAGEMENT (CONTINUED)

4.2 Financial risk (continued)

4.2.3 Liquidity risk (continued)

The liquidity analysis above does not include policyholder dividends payable amounting to RMB83,910 million as at 31 December 2017 (as at 31 December 2016: RMB87,725 million). As at 31 December 2017, declared dividends of RMB68,731 million (as at 31 December 2016: RMB64,623 million) included in policyholder dividends payable have a maturity not later than one year. For the remaining policyholder dividends payable, the amount and timing of the undiscounted cash flows are indeterminate due to the uncertainty of future experiences including investment returns and are subject to future declarations by the Group.

Although all investment contracts with DPF and investment contracts without DPF contain contractual options to surrender that can be exercised immediately by all policyholders at any time, the Group's expected cash flows as shown in the above tables are based on past experience and future expectations. Should these contracts were surrendered immediately, it would cause a cash outflow of RMB56,709 million and RMB173,557 million, respectively for the year ended 31 December 2017 (2016: RMB53,271 million and RMB140,565 million, respectively), payable within one year.

4.2.4 Capital management

The Group's objectives for managing capital are to comply with the insurance capital requirements based on the minimum capital and actual capital required by the CBIRC (formerly CIRC), prevent risk in operation and safeguard the Group's ability to continue as a going concern so that it can continue to provide returns for equity holders and benefits for other stakeholders. The Group replenishes capital to improve the solvency ratio by issuing subordinated bonds and Core Tier 2 Capital Securities according to the relevant laws and the approval of the relevant authorities.

The Group is also subject to other local capital requirements, such as statutory deposits - restricted requirement, statutory insurance fund requirement, statutory reserve fund requirement and general reserve requirement discussed in detail in Note 9.4, Note 20 and Note 35, respectively.

The Group manages capital to ensure its continuous and full compliance with the regulations mainly through monitoring its quarterly solvency ratios, as well as the solvency ratio based on annual stress testing.

The table below summarises the core and comprehensive solvency ratio, core capital, actual capital and minimum capital of the Company under *Insurance Institution Solvency Regulations (No.1 - No.17)*:

	As at 31 December 2017	As at 31 December 2016
	RMB million	RMB million
Core capital	706,516	639,396
Actual capital	706,623	677,768
Minimum capital	254,503	228,080
Core solvency ratio	278%	280%
Comprehensive solvency ratio	278%	297%

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

4 RISK MANAGEMENT (CONTINUED)

4.2 Financial risk (continued)

4.2.4 Capital management (continued)

According to the solvency ratios results mentioned above, and the unquantifiable evaluation results of operational risk, strategic risk, reputational risk and liquidity risk of insurance companies, the CBIRC (formerly CIRC) evaluates the comprehensive solvency of insurance companies and supervises insurance companies by classifying them into four categories:

- (i) Category A: solvency ratios meet the requirements, and the operational risk, strategic risk, reputational risk and liquidity risk are very low;
- (ii) Category B: solvency ratios meet the requirements, and the operational risk, strategic risk, reputational risk and liquidity risk are low;
- (iii) Category C: solvency ratios do not meet the requirements or solvency ratios meet the requirements but one or several risks in operation, strategy, reputation and liquidity are high;
- (iv) Category D: solvency ratios do not meet the requirements or solvency ratios meet the requirements but one or several risks in operation, strategy, reputation and liquidity are severe.

According to Cai Kuai Bu Han [2017] No.1510 *Notification of the Evaluation Results of Integrated Risk Rating (Classification Regulation) for the Third Quarter of 2017*, released by the CIRC, the latest Integrated Risk Rating result of the Company was Category A.

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

4 RISK MANAGEMENT (CONTINUED)

4.3 Fair value hierarchy

Level 1 fair value is based on quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can obtain at the measurement date.

Other than Level 1 quoted prices, Level 2 fair value is based on valuation techniques using significant inputs, that are observable for the asset being measured, either directly or indirectly, for substantially the full term of the asset through corroboration with observable market data. Observable inputs generally used to measure the fair value of securities classified as Level 2 include quoted market prices for similar assets in active markets; quoted market prices in markets that are not active for identical or similar assets and other market observable inputs. This level includes the debt securities for which quotations are available from pricing services providers. Fair values provided by pricing services providers are subject to a number of validation procedures by management. These procedures include a review of the valuation models utilised and the results of these models, as well as the recalculation of prices obtained from pricing services at the end of each reporting period.

Under certain conditions, the Group may not receive a price quote from independent third party pricing services. In this instance, the Group's valuation team may choose to apply internally developed valuation method to the assets or liabilities being measured, determine the main inputs for valuation, and analyse the change of the valuation and report it to management. Key inputs involved in internal valuation services are not based on observable market data. They reflect assumptions made by management based on judgements and experiences. The assets or liabilities valued by this method are generally classified as Level 3.

As at 31 December 2017, assets classified as Level 1 accounted for approximately 32.93% of assets measured at fair value on a recurring basis. Fair value measurements classified as Level 1 include certain debt securities, equity securities that are traded in an active exchange market or interbank market and open-ended funds with public market price quotation. The Group considers a combination of certain factors to determine whether a market for a financial instrument is active, including the occurrence of trades within the specific period, the respective trading volume, and the degree which the implied yields for a debt security for observed transactions differs from the Group's understanding of the current relevant market rates and information. Trading prices from the Chinese interbank market are determined by both trading counterparties and can be observed publicly. The Company adopted this price of the debt securities traded on the Chinese interbank market at the reporting date as their fair market value and classified the investments as Level 1. Open-ended funds also have active markets. Fund management companies publish the net asset value of these funds on their websites on each trade date. Investors subscribe for and redeem units of these funds in accordance with the funds' net asset value published by the fund management companies on each trade date. The Company adopted the unadjusted net asset value of the funds at the reporting date as their fair market value and classified the investments as Level 1.

As at 31 December 2017, assets classified as Level 2 accounted for approximately 51.20% of assets measured at fair value on a recurring basis. They primarily include certain debt securities and equity securities. Valuations are generally obtained from third party pricing services for identical or comparable assets, or through the use of valuation methodologies using observable market inputs, or recent quoted market prices. Valuation service providers typically gather, analyse and interpret information related to market transactions and other key valuation model inputs from multiple sources, and through the use of widely accepted internal valuation models, provide a theoretical quote on various securities. Debt securities are classified as Level 2 when they are valued at recent quoted prices from the Chinese interbank market or from valuation service providers.

At 31 December 2017, assets classified as Level 3 accounted for approximately 15.87% of assets measured at fair value on a recurring basis. They primarily include unlisted equity securities and unlisted debt securities. Fair values are determined using valuation techniques, including discounted cash flow valuations, the market comparison approach, etc.

For the accounting policies regarding the determination of fair values of financial assets and liabilities, see Note 3.2.

Securities at fair value through profit or loss				
- Equity securities	52,790	867	1,061	54,718
- Debt securities	37,172	117,234		154,406
Total	301,746	561,725	91,239	954,710
Liabilities measured at fair value				
Financial liabilities at fair value through profit or loss	(2,031)			(2,031)
Investment contracts at fair value through profit or loss	(12)			(12)
Total	(2,043)			(2,043)

The following table presents the changes in Level 3 assets for the year ended 31 December 2016:

	Available-for-sale securities		Securities at	Total
	Debt	Equity	fair value	
			through	
	securities	securities	profit or loss	
	RMB million	RMB million	Equity	RMB million
Opening balance	501	62,343	1,884	64,728
Purchases	13,533	12,499		26,032
Transferred into Level 3		1,326	1,128	2,454
Transferred out of Level 3		(2,054)	(1,884)	(3,938)
Total gains/(losses) recorded in profit or loss			(67)	(67)
Total gains/(losses) recorded in other comprehensive income		2,331		2,331
Maturity	(301)			(301)
Closing balance	13,733	76,445	1,061	91,239

The assets whose fair value measurements are classified under Level 3 above do not have material impact on the profit or loss of the Group.

For the assets and liabilities measured at fair value, during the year ended 31 December 2017, RMB19,275 million (2016: RMB8,932 million) debt securities were transferred from Level 1 to Level 2 within the fair value hierarchy, whereas RMB9,652 million (2016: RMB8,668 million) debt securities were transferred from Level 2 to Level 1. No material equity securities were transferred between Level 1 and Level 2.

For the years ended 31 December 2017 and 2016, there were no significant changes in the business or economic circumstances that affected the fair value of the Group's financial assets and liabilities. There were also no reclassifications of financial assets.

As at 31 December 2017 and 2016, unobservable inputs such as the weighted average cost of capital and liquidity discount were used in the valuation of assets at fair value classified as Level 3. The fair value was not significantly sensitive to reasonable changes in these unobservable inputs.

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

5 SEGMENT INFORMATION

5.1 Operating segments

The Group operates in four operating segments:

(i) Life insurance business (Life)

Life insurance business relates primarily to the sale of life insurance policies, including those life insurance policies without significant insurance risk transferred.

(ii) Health insurance business (Health)

Health insurance business relates primarily to the sale of health insurance policies, including those health insurance policies without significant insurance risk transferred.

(iii) Accident insurance business (Accident)

Accident insurance business relates primarily to the sale of accident insurance policies.

(iv) Other businesses (Others)

Other businesses relate primarily to income and cost of the agency business in respect of transactions with CLIC, etc., as described in Note 32, net share of profit of associates and joint ventures, income and expenses of subsidiaries, and unallocated income and expenditure of the Group.

5.2 Allocation basis of income and expenses

Investment income, net realised gains on financial assets, net fair value gains through profit or loss and foreign exchange gains/(losses) within other expenses are allocated among segments in proportion to the respective segments average liabilities of insurance contracts and investment contracts at the beginning and end of the year. Administrative expenses are allocated among segments in proportion to the unit cost of respective products in the different segments. Unallocated other income and other expenses are presented in the Others segment directly. Income tax is not allocated.

5.3 Allocation basis of assets and liabilities

Financial assets and securities sold under agreements to repurchase are allocated among segments in proportion to the respective segments' average liabilities of insurance contracts and investment contracts at the beginning and end of the year. Insurance and investment contract liabilities are presented under the respective segments. The remaining assets and liabilities are not allocated.

F-59

Table of Contents**CHINA LIFE INSURANCE COMPANY LIMITED****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****FOR THE YEAR ENDED 31 DECEMBER 2017****7 INVESTMENT PROPERTIES (CONTINUED)**

The Company leases part of its investment properties to its subsidiaries and charges rentals based on the areas occupied by the respective entities. These properties are categorised as property, plant and equipment of the Group in the consolidated statement of financial position.

The Group has no restrictions on the use of its investment properties and no contractual obligations to each investment property purchased, constructed or developed or for repairs, maintenance and enhancements.

As at 31 December 2017, the net book value of investment properties which are in process to obtain title certificates is RMB1,872 million (31 December 2016: Nil).

The fair value of investment properties of the Group as at 31 December 2017 amounted to RMB4,629 million (as at 31 December 2016: RMB2,201 million), which was estimated by the Group having regards to valuations performed by an independent appraiser. The investment properties were classified as Level 3 in the fair value hierarchy.

The Group uses the market comparison approach as its primary method to estimate the fair value of its investment properties. Under the market comparison approach, the estimated fair value of a property is based on the average sale price of comparable properties recently sold, with consideration of the comprehensive adjustment coefficient, which is composed of a number of adjusting factors, including the time and the conditions of sale, the geographical location, age, decoration, floor area, lot size of the property and other factors.

Under the market comparison approach, an increase (decrease) in the comprehensive adjustment coefficient will result in an increase (decrease) in the fair value of investment properties.

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

8 INVESTMENT IN ASSOCIATES AND JOINT VENTURES (CONTINUED)

- (i) The Company proposed to subscribe for 1,869,586,305 additional shares offering of CGB at no more than RMB7.01 per share, with a total consideration of RMB13.2 billion. The specific subscription price and quantity will be subject to the adjustment based on the valuation result filed to state-owned assets authority. Upon the completion of transaction, the Company will hold 43.686% of CGB's ownership interest, unchanged from prior to the transaction. As at 31 December 2017, the transaction has been reviewed and approved by the Board of Directors of the Company, and the relevant parties of the transaction have not entered into the contracts.

- (ii) The 2016 final dividend of HKD0.12 in cash per ordinary share was approved and declared in the Annual General Meeting of Sino-Ocean on 18 May 2017. The Company received a cash dividend amounting to RMB239 million. The 2017 interim dividend of HKD0.167 in cash per ordinary share was approved and declared by the board of directors of Sino-Ocean on 23 August 2017. The Company received a cash dividend amounting to RMB314 million.

Sino-Ocean, the Group's associate is listed in Hong Kong. On 29 December 2017 (the last trading day in 2017), the stock price of Sino-Ocean was HKD5.39 per share. As at 31 December 2017, an impairment loss of RMB1.01 billion for the investment in Sino-Ocean had been made by the Group. The Group performed an impairment test to this investment on 31 December 2017. The recoverable amount of this investment valued by the Group approximated to the carrying amount and therefore no impairment loss was made for this investment in 2017.

- (iii) On 16 August 2017, the Company entered into an agreement to acquire 3,177,159,590 non-public offering of A ordinary shares of China Unicom, with a total consideration of RMB21.7 billion to participate into the Mixed Ownership Reform of China Unicom. Upon the completion of the transaction as at 31 October 2017, the Group's share percentage of China Unicom increased from 0.08% to 10.56%, making the Company the second largest shareholder of China Unicom. In accordance with the articles of China Unicom, the Company is entitled to nominate candidates for the Board of Directors and Supervisors. The candidate of Board of Directors nominated by the Company was approved in the General Meeting of China Unicom on 8 February 2018. The management considered that the Group can exert significant influence upon China Unicom, and therefore accounted for it as an associate. On 29 December 2017 (the last trading day in 2017), the stock price of China Unicom was RMB6.33 per share. As at 31 December 2017, the Company had not yet completed the valuation for fair value of the identifiable net assets of China Unicom.

- (iv) The Group invested in real estate, industrial logistics assets and other industries through these enterprises.

- (v) Except for a 36-month restricted period of the investment in China Unicom, as mentioned in (iii), the Group has no restrictions to transact other investments in associates and joint ventures.

After ten years	31,517	17,500
Total	383,504	226,573

- (i) Other loans mainly consisted of different types of asset management products. As at 31 December 2017, asset management products of RMB44,835 million (as at 31 December 2016: RMB37,679 million) were owned by the Group, which are issued by CL AMC (including its subsidiaries), a subsidiary of the Company. The total assets of those products were RMB62,015 million (as at 31 December 2016: RMB114,499 million). Meanwhile, the Group also owned asset management products of RMB202,255 million (as at 31 December 2016: RMB77,999 million) issued by other financial institutions. Asset management products are guaranteed by third parties or with pledge, or have the fiscal annual budget income as the source of repayment, or have higher credit rating borrowers. The Group did not guarantee or provide any financing support for other loans, and considers that the carrying value of other loans represents its maximum risk exposure.

During the year ended 31 December 2017, the Group's investment income from the above asset management products was RMB10,150 million (2016: RMB6,820 million), and the related asset management fee received by AMC (including its subsidiaries) for all asset management products it issued was RMB222 million (2016: RMB236 million).

9.3 Term deposits

	As at 31 December 2017 RMB million	As at 31 December 2016 RMB million
Maturing:		
Within one year	97,076	185,835
After one year but within five years	349,524	344,790
After five years but within ten years	2,800	7,700
Total	449,400	538,325

As at 31 December 2017, term deposits of RMB16.691 billion (2016: RMB13.2 billion) deposited in banks for overseas borrowings backed by domestic deposits business are restricted to use.

In September 2016, CL Hotel Investor, L.P. and Glorious Fortune Forever Limited, subsidiaries of the Company, entered into a loan agreement with the New York and Seoul branches of the Agricultural Bank of China, respectively. In December 2016, Sunny Bamboo Limited and Golden Bamboo Limited, subsidiaries of the Company, entered into a loan agreement with the Hong Kong branch of the Agricultural Bank of China. As at 31 December 2017, the Company arranged overseas borrowings backed by domestic term deposit transactions with the Beijing Xicheng branch of the Agricultural Bank of China with amounts of RMB6,861 million, RMB7,080 million and RMB750 million, respectively.

On 6 December 2017, New Fortune Wisdom Limited and New Capital Wisdom Limited, subsidiaries of the Company's subsidiary, Ningbo Meishan Bonded Port Area Guo Yang Guo Sheng Investment Partnership (Guo Yang Guo Sheng), entered into a loan agreement with a subsidiary of the Agricultural Bank of China. Guo Yang Guo Sheng arranged overseas borrowings backed by domestic deposit transactions with the Beijing Xicheng branch of the Agricultural Bank of China. As at 31 December 2017, the amounts of term deposits and current deposits are RMB2,000 million and RMB1,247 million, respectively.

Financial liabilities at fair value through profit or loss	(2,529)	(2,031)	(2,529)	(2,031)
Securities sold under agreements to repurchase	(87,309)	(81,088)	(87,309)	(81,088)
Bonds payable (iii)		(37,998)		(38,204)
Interest-bearing loans and borrowings	(18,794)	(16,170)	(18,794)	(16,170)

- (i) The estimates and judgements to determine the fair value of financial assets are described in Note 3.2.
- (ii) The fair value of held-to-maturity securities is determined by reference with other debt securities which are measured by fair value. Please refer to Note 4.3. The fair value of held-to-maturity securities under Level 1 was RMB55,137 million and that under Level 2 was 637,847 million as at 31 December 2017 (as at 31 December 2016: Level 1 RMB76,299 million and Level 2 RMB542,853 million).
- (iii) Investment contracts at fair value through profit or loss have quoted prices in active markets, and therefore, their fair value was classified as Level 1.

The fair value of policy loans approximated its carrying value. The fair values of other loans, investment contracts at amortised cost and bonds payable were determined using valuation techniques, with consideration of the present value of expected cash flows arising from contracts using a risk-adjusted discount rate, allowing for the risk-free rate available on the valuation date, credit risk and risk margin associated with the future cash flows. The fair values of other loans and investment contracts at amortised cost, and bonds payable were classified as Level 3.

Table of Contents**CHINA LIFE INSURANCE COMPANY LIMITED****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****FOR THE YEAR ENDED 31 DECEMBER 2017****11 PREMIUMS RECEIVABLE**

F-71

Table of Contents**CHINA LIFE INSURANCE COMPANY LIMITED****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****FOR THE YEAR ENDED 31 DECEMBER 2017****14 INSURANCE CONTRACTS****(a) Process used to decide on assumptions**

- (i) For the insurance contracts of which future insurance benefits are affected by investment yields of the corresponding investment portfolios, the discount rate assumption is based on expected investment returns of the asset portfolio backing these liabilities, considering the impacts of time value on reserves.

In developing discount rate assumptions, the Group considers investment experience, the current investment portfolio and trend of the relevant yield curves. The assumed discount rates reflect the future economic outlook as well as the Group's investment strategy. The assumed discount rates with risk margin are as follows:

	Discount rate assumptions
As at 31 December 2017	4.85%
As at 31 December 2016	4.45%~4.85%

For the insurance contracts of which future insurance benefits are not affected by investment yields of the corresponding investment portfolios, the discount rate assumption is based on the Yield curve of reserve computation benchmark for insurance contracts, published on the China Bond website with consideration of liquidity spreads, taxation and other relevant factors. The assumed spot discount rates with risk margin for the past two years are as follows:

	Discount rate assumptions
As at 31 December 2017	3.31%~4.86%
As at 31 December 2016	3.23%~4.68%

There is uncertainty on the discount rate assumption, which is affected by factors such as future macro-economy, monetary and foreign exchange policies, capital market and availability of investment channels of insurance funds. The Group determines the discount rate assumption based on the information obtained at the end of each reporting period including consideration of risk margin.

- (ii) The mortality and morbidity assumptions are based on the Group's historical mortality and morbidity experience. The assumed mortality rates and morbidity rates vary with the age of the insured and contract type.

The Group bases its mortality assumptions on China Life Insurance Mortality Table (2000-2003), adjusted where appropriate to reflect the Group's recent historical mortality experience. The main source of uncertainty with life insurance contracts is that epidemics and wide-ranging lifestyle changes could result in deterioration in future mortality experience, thus leading to an inadequate reserving of liability. Similarly, improvements in longevity due to continuing advancements in medical care and social conditions may expose the Group to longevity risk.

The Group bases its morbidity assumptions for critical illness products on analysis of historical experience and expectations of future developments. There are two main sources of uncertainty. Firstly, wide-ranging lifestyle changes could result in future deterioration in morbidity experience. Secondly, future development of medical technologies and improved coverage of medical facilities available to policyholders may bring forward the timing of diagnosing critical illness, which demands earlier payment of the critical illness benefits. Both could ultimately result in an inadequate reserving of liability if current morbidity assumptions do not properly reflect such trends.

Risk margin is considered in the Group's mortality and morbidity assumptions.

Table of Contents**CHINA LIFE INSURANCE COMPANY LIMITED****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****FOR THE YEAR ENDED 31 DECEMBER 2017****14 INSURANCE CONTRACTS (CONTINUED)****(a) Process used to decide on assumptions (continued)**

- (iii) Expense assumptions are based on expected unit costs with the consideration of previous expense studies and future trends. Expense assumptions are affected by certain factors such as future inflation and market competition which bring uncertainty to these assumptions. The Group considers risk margin for expense assumptions based on information obtained at the end of each reporting period. Components of expense assumptions include the cost per policy and percentage of premium as follows:

	Individual Life		Group Life	
	RMB Per Policy	% of Premium	RMB Per Policy	% of Premium
As at 31 December 2017	45.00	0.85%~0.90%	25.00	0.90%
As at 31 December 2016	37.00~45.00	0.85%~0.90%	15.00	0.90%

- (iv) The lapse rates and other assumptions are affected by certain factors, such as future macro-economy, availability of financial substitutions, and market competition, which bring uncertainty to these assumptions. The lapse rates and other assumptions are determined with reference to creditable past experience, current conditions, future expectations and other information.
- (v) The Group applied a consistent method to determine risk margin. The Group considers risk margin for discount rate, mortality and morbidity and expense assumptions to compensate for the uncertain amount and timing of future cash flow. When determining risk margin, the Group considers historical experience, future expectations and other factors. The Group determines the risk margin level by itself as the regulations have not imposed any specific requirement on it.

The Group adopted a consistent process to decide on assumptions for the insurance contracts disclosed in this note. On each reporting date, the Group reviews the assumptions for reasonable estimates of liability and risk margin, with consideration of all available information, and taking into account the Group's historical experience and expectation of future events.

(b) Net liabilities of insurance contracts

	As at 31 December 2017 RMB million	As at 31 December 2016 RMB million

Table of Contents**CHINA LIFE INSURANCE COMPANY LIMITED****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****FOR THE YEAR ENDED 31 DECEMBER 2017****14 INSURANCE CONTRACTS (CONTINUED)****(d) Movements in liabilities of long-term insurance contracts**

The table below presents movements in the liabilities of long-term insurance contracts:

	2017	2016
	RMB million	RMB million
As at 1 January	1,825,956	1,698,773
Premiums	464,898	390,438
Release of liabilities (i)	(379,262)	(353,048)
Accretion of interest	78,232	73,644
Change in assumptions		
- Change in discount rates	6,599	14,262
- Change in other assumptions (ii)	2,424	474
Other movements	219	1,413
As at 31 December	1,999,066	1,825,956

- (i) The release of liabilities mainly consists of release due to death or other termination and related expenses, release of residual margin and change of reserves for claims and claim adjustment expenses.
- (ii) For the year ended 31 December 2017, the change in other assumptions was mainly caused by the change in morbidity rate assumptions of certain products, which increased insurance contract liabilities by RMB1,718 million. This change reflected the Group's most recent experience and future expectations about the morbidity rates as at the reporting date. Changes in assumptions other than morbidity rates increased insurance contract liabilities by RMB706 million.

For the year ended 31 December 2016, the change in other assumptions was mainly caused by the change in morbidity rate assumptions of certain products, which increased insurance contract liabilities by RMB464 million. This change reflected the Group's most recent experience and future expectations about the morbidity rates as at the reporting date. Changes in assumptions other than morbidity rates increased insurance contract liabilities by RMB10 million.

29 EARNINGS PER SHARE

There is no difference between the basic and diluted earnings per share. The basic and diluted earnings per share for the year ended 31 December 2017 are calculated based on the net profit for the year attributable to ordinary equity holders of the Company and the weighted average of 28,264,705,000 ordinary shares (2016: 28,264,705,000 ordinary shares).

Table of Contents

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

30 STOCK APPRECIATION RIGHTS

The Board of Directors of the Company approved, on 5 January 2006, an award of stock appreciation rights of 4.05 million units and on 21 August 2006, another award of stock appreciation rights of 53.22 million units to eligible employees. The exercise prices of the two awards were HKD5.33 and HKD6.83, respectively, the average closing price of shares in the five trading days prior to 1 July 2005 and 1 January 2006, the dates for vesting and exercise price setting purposes of this award. The exercise prices of stock appreciation rights were the average closing price of the shares in the five trading days prior to the date of the award. Upon the exercise of stock appreciation rights, exercising recipients will receive payments in RMB, subject to any withholding tax, equal to the number of stock appreciation rights exercised times the difference between the exercise price and market price of the H shares at the time of exercise.

Stock appreciation rights have been awarded in units, with each unit representing the value of one H share. No shares of common stock will be issued under the stock appreciation rights plan. According to the Company's plan, all stock appreciation rights will have an exercise period of five years from the date of award and will not be exercisable before the fourth anniversary of the date of award unless specific market or other conditions have been met. On 26 February 2010, the Board of Directors of the Company extended the exercise period of all stock appreciation rights, which is also subject to government policy.

All the stock appreciation rights awarded were fully vested as at 31 December 2017. As at 31 December 2017, there were 55.01 million units outstanding and exercisable (as at 31 December 2016: 55.01 million units). As at 31 December 2017, the amount of intrinsic value for the vested stock appreciation rights was RMB820 million (as at 31 December 2016: RMB641 million).

The fair value of the stock appreciation rights is estimated on the date of valuation at each reporting date using lattice-based option valuation models based on expected volatility from 20% to 32%, an expected dividend yield of no higher than 3% and a risk-free interest rate ranging from 0.51% to 1.02%.

The Company recognised a loss of RMB179 million in the net fair value through profit or loss in the consolidated comprehensive income representing the fair value change of the rights during the year ended 31 December 2017 (2016: fair value gains of RMB191 million, 2015: fair value gains of RMB180 million). RMB820 million and RMB13 million were included in salary and staff welfare payable included under other liabilities for the units not exercised and exercised but not paid as at 31 December 2017 (as at 31 December 2016: RMB641 million and RMB13 million), respectively. There was no unrecognised compensation cost for the stock appreciation rights as at 31 December 2017 (as at 31 December 2016: Nil).

31 DIVIDENDS

Pursuant to the shareholders' approval at the Annual General Meeting on 31 May 2017, a final dividend of RMB0.24 (inclusive of tax) per ordinary share totalling RMB6,784 million in respect of the year ended 31 December 2016 was

declared and paid in 2017. The dividend has been recorded in the consolidated financial statements for the year ended 31 December 2017.

Pursuant to the shareholders' approval at the Annual General Meeting on 30 May 2016, a final dividend of RMB0.42 (inclusive of tax) per ordinary share totalling RMB11,871 million in respect of the year ended 31 December 2015 was declared and paid in 2016. The dividend has been recorded in the consolidated financial statements for the year ended 31 December 2016.

Pursuant to the shareholders' approval at the Annual General Meeting on 28 May 2015, a final dividend of RMB0.40 (inclusive of tax) per ordinary share totalling RMB11,306 million in respect of the year ended 31 December 2014 was declared and paid in 2015. The dividend has been recorded in the consolidated financial statements for the year ended 31 December 2015.

A distribution of RMB380 million (inclusive of tax) to the holders of Core Tier 2 Capital Securities was approved by management in 2017 according to the authorisation by the Board of Directors, which was delegated by the General Meeting.

A distribution of RMB386 million (inclusive of tax) to the holders of Core Tier 2 Capital Securities was approved by management in 2016 according to the authorization by the Board of Directors, which was delegated by the General Meeting.

A distribution of RMB185 (inclusive of tax) million to the holders of Core Tier 2 Capital Securities was approved by the management in 2015 according to the authorization by the Board of Directors, , which was delegated by the General Meeting.

Pursuant to a resolution passed at the meeting of the Board of Directors on 22 March 2018, a final dividend of RMB0.40 (inclusive of tax) per ordinary share totalling approximately RMB11,306 million for the year ended 31 December 2017 was proposed for shareholders' approval at the forthcoming Annual General Meeting. The dividend has not been recorded in the consolidated financial statements for the year ended 31 December 2017.

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

32 SIGNIFICANT RELATED PARTY TRANSACTIONS (CONTINUED)

(g) Transactions with significant related parties (continued)

Notes:

- (i) On 29 December 2014, the Company and CLIC signed a renewable insurance agency agreement, effective from 1 January 2015 to 31 December 2017. The agreement was subject to an automatic three-year renewal if no objections were raised by both parties. The Company performs its duties of insurance agents in accordance with the agreement, but does not acquire any rights and profits or assume any obligations, losses and risks as an insurer of the non-transferrable policies. The policy management fee was payable semi-annually, and is equal to the sum of (1) the number of policies in force as at the last day of the period, multiplied by RMB8.00 per policy and (2) 2.50% of the actual premiums and deposits received during the period, in respect of such policies. The policy management fee income is included in other income in the consolidated statement of comprehensive income.

- (ii.a) On 30 December 2015, CLIC renewed an asset management agreement with AMC, entrusting AMC to manage and make investments for its insurance funds. The agreement is effective from 1 January 2016 to 31 December 2018. In accordance with the agreement, CLIC paid AMC a basic service fee at the rate of 0.05% per annum for the management of insurance funds. The service fee was calculated and payable on a monthly basis, by multiplying the average book value of the assets under management (after deducting the funds obtained from and interests accrued for repurchase transactions, deducting debt and equity investment schemes, project asset-backed schemes, the principal and interests of customised non-standard products) at the beginning and the end of any given month by the rate of 0.05%, divided by 12. At the end of each year, CLIC assessed the investment performance of the assets managed by AMC, compared the actual results against benchmark returns and made adjustment to the basic service fee.

- (ii.b) On 28 June 2017, CL Overseas renewed an investment management agreement with AMC HK, effective from 1 January 2016 to 31 December 2016. In accordance with the agreement, CL Overseas entrusted AMC HK to manage and make investments for its insurance funds and paid AMC HK a basic investment management fee and an investment performance fee. The basic investment management fee was accrued by multiplying the weighted average total funds by the basic fee rate. The investment performance fee was calculated based on the difference between the total actual annual

yield and predetermined net realised yield. The basic investment management fee was calculated and payable on a semi-annual basis. The investment performance fee was payable according to the total actual annual yield at the end of each year. On 15 December 2017, CL Overseas renewed the agreement with AMC HK, effective to the next year when the contract is signed and sealed. The terms are applied in 2017. The agreement was subject to an automatic one-year renewal if no objections were raised by both parties with written consent in 5 years.

- (ii.c) In 2015, CLP&C signed an agreement for the management of insurance funds with AMC, entrusting AMC to manage and make investments for its insurance funds. The agreement was effective from 1 January 2015 to 31 December 2016. The agreement was subject to an automatic one-year renewal if no objections were raised by both parties upon expiry. On 1 January 2017, the agreement was automatically renewed to 31 December 2017. In accordance with the agreement, CLP&C paid AMC a fixed service fee and a variable service fee. The fixed service fee was calculated and payable on a monthly basis, by multiplying the average net asset value of assets of each category under management at the beginning and the end of any given month by the responding annual investment management fee rate, divided by 12. The variable service fee was linked to investment performance.

- (ii.d) On 3 February 2016, the Company and CLI renewed a management agreement of alternative investment of insurance funds, which was effective from 1 January 2016 to 30 June 2017. In accordance with the agreement, the Company entrusted CLI to engage in specialised investment, operation and management of equities, real estate and related financial products, and securitised financial products under the instructions of the annual guidelines. The Company paid CLI an asset management fee and a performance related bonus based on the agreement. For fixed-income projects, the management fee rate was 0.05%-0.6% according to different ranges of returns and without a performance-related bonus; for non-fixed-income projects, the management fee rate was 0.3% and the performance-related bonus was linked to the return on comprehensive investment upon expiry of the project. On 30 June 2017, the Company and CLI renewed a management agreement of alternative investment of insurance funds, which is retrospectively effective from 1 January 2017 to 31 December 2018. The management fee rates of fixed-income projects and non-fixed-income projects remain the same as those in the previous agreement. In addition, the Company adjusts the investment management fees for fixed-income projects and non-fixed-income projects based on the annual evaluation results to CLI's performance. The adjustment amount (variable management fee) ranges from negative 10% to positive 15% of the investment management fee in the current period.

32 SIGNIFICANT RELATED PARTY TRANSACTIONS (CONTINUED)

(g) Transactions with significant related parties (continued)

Notes (continued):

- (ii.e) On 29 December 2015, the Company and AMC renewed a renewable agreement for the management of insurance funds, effective from 1 January 2016 to 31 December 2018. In accordance with the agreement, the Company entrusted AMC to manage and make investments for its insurance funds and paid AMC a fixed service fee and a variable service fee. The fixed annual service fee was calculated and payable on a monthly basis, by multiplying the average net value of the assets under management by the rate of 0.05%; the variable service fee was payable annually, based on the results of performance evaluation, at 20% of the fixed service fee per annum. The service fees were determined by the Company and AMC based on an analysis of the cost of service, market practice and the size and composition of the asset pool to be managed. Asset management fees charged to the Company by AMC are eliminated in the consolidated statement of comprehensive income.
- (ii.f) On 18 September 2016, the Company and AMC HK renewed the offshore investment management service agreement, which is effective from 19 September 2016 to 31 December 2018. In accordance with the agreement, the Company entrusted AMC HK to manage and make investments for its insurance funds and paid AMC HK an asset management fee. The asset management fee was calculated at a fixed rate of 0.40% of the portfolio asset value and a performance bonus capped at 0.15% of the portfolio asset value for assets managed on a discretionary basis. Management fees on assets managed on a non-discretionary basis are calculated at 0.05% of the portfolio asset value. The above management fee was calculated based on the net value of the entrusted asset from the monthly reports provided by the trustee, without deducting the monthly management fee payable. The fixed management fee was calculated monthly and payable quarterly. A performance bonus was calculated and payable on an annual basis. Asset management fees charged to the Company by AMC HK are eliminated in the consolidated statement of comprehensive income.
- (iii) On 8 March 2015, the Company and CLP&C signed a new 2-year framework insurance agency agreement, whereby CLP&C entrusted the Company to act as an agent to sell designated P&C insurance products in certain authorised jurisdictions. The agency fee was determined based on cost (tax included) plus a margin. The agreement was subject to an automatic one-year renewal if no

objections were raised by both parties upon expiry. On 8 March 2017, the agreement was automatically renewed for one year.

On 8 March 2015, the Company and CLP&C signed a new 2-year framework insurance agency agreement, whereby the Company entrusted CLP&C to act as an agent to sell designated life insurance products in certain authorised jurisdictions. The brokerage fee was determined based on market practice. The agreement was subject to an automatic one-year renewal if no objections were raised by both parties upon expiry. On 8 March 2017, the agreement was automatically renewed for one year.

- (iv) On 31 December 2014, the Company signed a property leasing agreement with CLI, effective till 31 December 2017, pursuant to which CLI leased to the Company certain owned buildings. Annual rental payable by the Company to CLI in relation to the CLI properties is determined either by reference to the market rent, or, the costs incurred by CLI in holding and maintaining the properties, plus a margin of approximately 5%. The rental was paid on a semi-annual basis, and each payment was equal to one half of the total annual rental.

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

32 SIGNIFICANT RELATED PARTY TRANSACTIONS (CONTINUED)

(g) Transactions with significant related parties (continued)

Notes (continued):

- (v) On 12 August 2016, the Company and CGB renewed an insurance agency agreement to distribute insurance products. All individual insurance products suitable for distribution through bancassurance channels are included in the agreement. CGB provides agency services, including the sale of insurance products, and collecting premiums and paying benefits. The Company paid the agency commission by multiplying the net amount of total premiums received from the sale of each category individual insurance products after deducting the withdrawn policy premiums in the hesitation period, by the responding fixed commission rate. The commission rates for various insurance products sold by CGB are agreed based on arm's length transactions. The commissions are payable on a monthly basis. The agreement is effective for two years starting from the signing date and is subject to an automatic one-year renewal with no limitation of times if no objections were raised by either party upon expiry.

On 23 March 2016, the Company and CGB signed another insurance agency agreement to distribute group insurance products. The group insurance products suitable for distribution through bancassurance channels are included in the agreement. CGB provides agency services, including the sale of group insurance products, collecting premiums and paying benefits, and so on. The Company paid the agency commission by multiplying the net amount of total premiums received from the sale of each category group insurance product after deducting the withdrawn policy premiums in the hesitation period, by the responding fixed commission rate. The commission rates for various insurance products sold by CGB are agreed by referring to comparable quoted market prices of independent third-parties. The commissions are payable on a monthly basis. The agreement is effective on 1 January 2016 for two years and is subject to an automatic one-year renewal if no objections were raised by either party upon expiry.

- (vi) On 26 October 2016, the Company and CL Ecommerce renewed a one year agreement for managing the regional telemarketing centre, which was effective from 1 January 2016 and expired on 31 December 2016. The agreement is subject to an automatic one-year renewal if no objections are raised by both parties. On 1 January 2017, the agreement was automatically renewed for one year. Pursuant to the agreement, the Company entrusted CL Ecommerce to manage the operation of its telemarketing centre, and paid the management fee accordingly. The total amount of the management

fee is not expected to exceed RMB100 million, but is still pending for negotiation between the two parties based on the actual circumstance.

- (vii) On 28 November 2016, the Company and Pension Company signed a new agency agreement for the distribution and customer service of enterprise annuity funds, the pension management business and the occupational pension management business. The agreement was effective from 28 November 2016 and expired on 31 December 2017. The agreement is subject to an automatic one-year renewal if no objections were raised by either party upon expiry. The commissions agreed upon in the agreement include the daily business commissions and the annual promotional plans commissions. According to the agreement, the commissions for the entrusting service of enterprise annuity fund management, which is the core business of Pension Company, are calculated at 30% to 80% of the annual entrusting management fee revenues, depending on the duration of the agreement. The commissions for account management service are calculated at 60% of the first year's account management fee and were only charged for the first year, regardless of the duration of the agreement. The commissions for investment management service, in accordance with the duration of the agreement, are calculated at 60% to 3% of the annual investment management fee (excluding risk reserves for investment), and decreased annually. The commissions of the group pension plan is, in accordance with the duration of the contracts, calculated at 50% to 3% of the annual investment management fee, and decreased annually; the commissions of the personal pension plan is calculated at 30% to 50% of the annual investment management fee according to the various rates of daily management fee applied to the various individual pension management products in all of the management years; the commissions of occupation annuity is in accordance with the provision of annual promotional plans, which should be determined by both parties on a separate occasion. The commissions charged to the Company by Pension Company are eliminated in the consolidated statement of the comprehensive income of the Group.
- (viii) These transactions constitute continuing connected transactions which are subject to reporting and announcement requirements but are exempt from independent shareholders' approval requirements under Chapter 14A of the Listing Rules. The Company has complied with the disclosure requirements in accordance with Chapter 14A of the Listing Rules.

CHINA LIFE INSURANCE COMPANY LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2017

32 SIGNIFICANT RELATED PARTY TRANSACTIONS (CONTINUED)

(j) Transactions with state-owned enterprises

Under IAS 24 *Related Party Disclosures* (IAS 24), business transactions between state-owned enterprises controlled by the PRC government are within the scope of related party transactions. CLIC, the ultimate holding company of the Group, is a state-owned enterprise. The Group's key business is insurance and investment related and therefore the business transactions with other state-owned enterprises are primarily related to insurance and investment activities. The related party transactions with other state-owned enterprises were conducted in the ordinary course of business. Due to the complex ownership structure, the PRC government may hold indirect interests in many companies. Some of these interests may, in themselves or when combined with other indirect interests, be controlling interests which may not be known to the Group. Nevertheless, the Group believes that the following captures the material related parties and has applied IAS 24 exemption and disclosed only qualitative information.

As at 31 December 2017, most of the bank deposits of the Group were with state-owned banks; the issuers of corporate bonds and subordinated bonds held by the Group were mainly state-owned enterprises. For the year ended 31 December 2017, a large portion of its group insurance business of the Group were with state-owned enterprises; the majority of bancassurance commission charges were paid to state-owned banks and postal offices; and the majority of the reinsurance agreements of the Group were entered into with a state-owned reinsurance company.

	million	million	million	million
Core Tier 2 Capital Securities	7,791			7,791
Total	7,791			7,791

The Company issued Core Tier 2 Capital Securities at par with the nominal value of USD1,280 million on 3 July 2015, and obtained an approval to list such securities on the Stock Exchange of Hong Kong Limited, effective on 6 July 2015. The Securities are issued in the specified denomination of USD200,000 and integral multiples of USD1,000 in excess thereof. After a deduction of the issue expense, the total amount of the proceeds raised from this issuance was USD1,274 million or RMB7,791 million. The issued capital securities have a term of 60 years, extendable upon expiry. The initial distribution rate for the first five interest-bearing years is 4.00%, and the Company may redeem the securities at its option at the end of the fifth year after issuance. If the Company does not exercise this option, the rate of distribution will be reset based on comparable US treasury yield plus a margin of 2.294% at the end of the fifth year and every five years thereafter.

37 PROVISIONS AND CONTINGENCIES

The following is a summary of the significant contingent liabilities:

	As at 31 December 2017 RMB million	As at 31 December 2016 RMB million
Pending lawsuits	493	588

The Group involves in certain lawsuits arising from the ordinary course of business. In order to accurately disclose the contingent liabilities for pending lawsuits, the Group analysed all pending lawsuits case by case at the end of each reporting period. A provision will only be recognised if management determines, based on third-party legal advice, that the Group has present obligations and the settlement of which is expected to result in an outflow of the Group's resources embodying economic benefits, and the amount of such obligations could be reasonably estimated. Otherwise, the Group will disclose the pending lawsuits as contingent liabilities. As at 31 December 2017 and 2016, the Group had other contingent liabilities but disclosure of such was not practical because the amounts of liabilities could not be reliably estimated and were not material in aggregate.

38 COMMITMENTS

(a) Capital commitments

The Group had the following capital commitments relating to property development projects and investments:

	As at 31 December 2017 RMB million	As at 31 December 2016 RMB million
