RESOURCES CONNECTION, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Three and nine months ended February 23, 2019 and February 24, 2018

1. Description of the Company and its Business

Resources Connection, Inc. ("Resources Connection"), a Delaware corporation, was incorporated on November 16, 1998. Resources Connection is a multinational business consulting firm; its operating entities provide services primarily under the name Resources Global Professionals ("RGP" or the "Company"). The Company provides agile consulting services and talent to its global client base utilizing experienced professionals in the areas of accounting; finance; governance, risk and compliance management; corporate advisory, strategic communications and restructuring; information management; human capital; supply chain management; and legal and regulatory. The Company has offices in the United States ("U.S."), Asia, Australia, Canada, Europe and Mexico.

The Company's fiscal year consists of 52 or 53 weeks, ending on the last Saturday in May. The third quarters of fiscal 2019 and 2018 each consisted of 13 weeks.

2. Summary of Significant Accounting Policies

Interim Financial Information

The financial information as of and for the three and nine months ended February 23, 2019 and February 24, 2018 is unaudited but includes all adjustments (consisting only of normal recurring adjustments) the Company considers necessary for a fair presentation of its financial position at such dates and the operating results and cash flows for those periods. The fiscal 2018 year-end balance sheet data was derived from audited financial statements, and certain information and note disclosures normally included in annual financial statements prepared in accordance with generally accepted accounting principles in the U.S. ("GAAP") have been condensed or omitted pursuant to Securities and Exchange Commission ("SEC") rules or regulations; however, the Company believes the disclosures made are adequate to make the information presented not misleading.

The results of operations for the interim periods presented are not necessarily indicative of the results of operations to be expected for the full fiscal year. These condensed interim financial statements should be read in conjunction with the audited financial statements for the year ended May 26, 2018, which are included in the Company's Annual Report on Form 10-K which was filed with the SEC on July 23, 2018 (File No. 0-32113).

Revenue Recognition

Effective May 27, 2018, the Company adopted Accounting Standards Codification ("ASC") Topic 606, *Revenue from Contracts with Customers* ("ASC 606"), using the modified retrospective method, which allows companies to apply the new revenue standard to reporting periods beginning in the year the standard is first implemented, while prior periods continue to be reported in accordance with previous accounting guidance. The adoption of ASC 606 did not have a significant impact on revenue recognition; therefore, the Company did not have an opening retained earnings adjustment for the nine months ended February 23, 2019.

Revenues are recognized when control of the promised service is transferred to the Company's clients, in an amount that reflects the consideration expected in exchange for the services. Revenue is recorded net of sales or other transaction taxes collected from clients and remitted to taxing authorities. Revenues from contracts are recognized over time, based on hours worked by the Company's professionals. The performance of the agreed-to service over time is the single performance obligation for revenues. Certain clients may receive discounts (for example, volume discounts or rebates) to the amounts billed. These discounts or rebates are considered variable consideration. Management evaluates the facts and circumstances of each contract and client relationship to estimate the variable consideration assessing the most likely amount to recognize and considering management's expectation of the volume of services to be provided over the applicable period. Rebates are the largest component of variable consideration and are estimated using the most likely amount method prescribed by ASC 606, contracts terms and estimates of revenue. Revenues are recognized net of variable consideration to the extent that it is probable that a significant reversal of revenues will not occur in subsequent periods.

On a limited basis, the Company may have fixed-price contracts, for which revenues are recognized over time using the input method based on time incurred as a proportion of estimated total time. Time incurred represents work performed, which corresponds with, and therefore best depicts, the transfer of control to the client. Management uses significant judgments when estimating the total hours expected to complete the contract performance obligation. It is possible that updated estimates for consulting engagements may vary from initial estimates with such updates being recognized in the period of determination. Depending on the timing of billings and services rendered, the Company accrues or defers revenue as appropriate.

Table of Contents

The Company recognizes revenues on a gross basis as it acts as a principal for primarily all of its revenue transactions. The Company has concluded that gross reporting is appropriate because the Company a) has the risk of identifying and hiring qualified consultants; b) has the discretion to select the consultants and establish the price and responsibilities for services to be provided; and c) bears the risk for services provided that are not fully paid for by clients. The Company recognizes all reimbursements received from clients for out-of-pocket expenses as revenue and all such expenses as direct cost of services. Reimbursements received from clients were \$2.7 million and \$2.9 million for the three months ended February 23, 2019 and February 24, 2018, respectively, and \$9.2 million and \$8.4 million for the nine months ended February 23, 2019 and February 24, 2018, respectively.

The Company's clients are contractually obligated to pay the Company for all hours billed. We invoice the majority of our clients on a weekly basis or, in certain circumstances, on a monthly basis, in accordance with our typical arrangement of payment due within 30 days. To a much lesser extent, the Company also earns revenue if one of its consultants is hired by, or if the Company places an outside candidate with, its client. Conversion fees or permanent placement fees are recognized when one of the Company's professionals or a candidate identified by the Company, accepts an offer of permanent employment from a client and all requisite terms of the agreement have been met. Such conversion fees or permanent placement fees are recognized when the performance obligation is considered complete, which the Company considers a) when the consultant or candidate accepts the position; b) the consultant or candidate has notified either RGP or their current employer of their decision; and c) the start date is within the Company's current quarter. Conversion fees were 0.6% and 0.4% of revenue for the three months ended February 23, 2019 and February 24, 2018, respectively, and 0.5% and 0.4% of revenue for the nine months ended February 23, 2019 and February 24, 2018, respectively. Permanent placement fees were 0.5% of revenue for each of the three months ended February 23, 2019 and February 24, 2018, respectively, and 0.6% and 0.3% of revenue for the nine months ended February 23, 2019 and February 24, 2018, respectively.

The Company's contracts generally have termination for convenience provisions and do not have termination penalties. While our clients are contractually obligated to pay the Company for all hours billed, the Company does not have long-term agreements with its clients for the provision of services and the Company's clients may terminate engagements at any time. All costs of compensating the Company's professionals are the responsibility of the Company and are included in direct cost of services.

Foreign Currency Translation

The financial statements of subsidiaries outside the U.S. are measured using the local currency as the functional currency. Assets and liabilities of these subsidiaries are translated at the exchange rates effective at the end of the period, income and expense items are translated at average exchange rates prevailing during the period and the related translation adjustments are recorded as a component of accumulated other comprehensive income or loss within the Consolidated Balance Sheets. Gains and losses from foreign currency transactions are included in the Consolidated Statements of Operations.

Net Income Per Share Information

The Company presents both basic and diluted earnings per common share (EPS). Basic EPS is calculated by dividing net income by the weighted average number of common shares outstanding during the period. Diluted EPS is based upon the weighted average number of common and common equivalent shares outstanding during the period, calculated using the treasury stock method for stock options. Under the treasury stock method, assumed proceeds include the amount the employee must pay for exercising stock options and the amount of compensation cost for future services the Company has not yet recognized. Common equivalent shares are excluded from the computation in periods in which they have an anti-dilutive effect. Stock options for which the exercise price exceeds the average

market price per common share over the period are anti-dilutive and are excluded from the calculation.

The following table summarizes the calculation of net income per common share for the periods indicated (in thousands, except per share amounts):

	Three Months Ended		Nine Months Ended	
	February 23,	February 24,	February 23,	February 24,
	2019	2018	2019	2018
Net income	\$ 5,796	\$ 4,595	\$ 22,101	\$ 14,845
Basic:

Net income per common share:				
Basic	\$ 0.18	\$ 0.15	\$ 0.70	\$ 0.49
Dilutive	\$ 0.18	\$ 0.14	\$ 0.68	\$ 0.48
Anti-dilutive shares not included above	3,716	4,166	3,313	4,872

Table of Contents***Stock-Based Compensation***

The Company recognizes compensation expense for all share-based awards made to employees and directors, including employee stock options, restricted stock grants, restricted stock units (RSUs) and employee stock purchases made via the Company's Employee Stock Purchase Plan (the ESPP), based on estimated fair value at the date of grant.

The Company estimates the fair value of share-based awards on the date of grant using an option-pricing model. The value of the portion of the award ultimately expected to vest is recognized as an expense over the requisite service periods. Stock option awards vest over four years and restricted stock award vesting is determined on an individual grant basis under the Company's 2014 Performance Incentive Plan (the 2014 Plan). The Company determines the estimated value of stock option awards using the Black-Scholes valuation model. The Company recognizes stock-based compensation expense on a straight-line basis over the service period for options and restricted stock that are expected to vest and records adjustments to compensation expense at the end of the service period if actual forfeitures differ from original estimates.

See Note 9 *Stock-Based Compensation Plans* for further information on the 2014 Plan and stock-based compensation.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although management believes these estimates and assumptions are adequate, actual results could differ from the estimates and assumptions used.

3. Acquisitions

During fiscal 2018, the Company completed two acquisitions. The first acquisition, completed August 31, 2017 (the second quarter of fiscal 2018), was of *taskforce* Management on Demand AG (*taskforce*), a German based professional services firm founded in 2007, that provides clients with senior interim management and project management expertise. Subsequent to the acquisition, *taskforce* continues to operate as a separate brand. The Company paid initial consideration of \$5.8 million (approximately \$6.9 million at the date of acquisition) in a combination of cash and restricted stock.

In addition, the purchase agreement for *taskforce* requires additional earn-out payments to be made based on performance in calendar years 2017, 2018 and 2019. Under accounting rules for business combinations, obligations that are contingently payable to the sellers based upon the occurrence of one or more future events are recorded as a discounted liability on the Company's balance sheet. The Company is obligated to pay the sellers in Euros as follows: for calendar year 2017, Adjusted EBITDA times 6.1 times 20%; and for both calendar years 2018 and 2019, Adjusted EBITDA times 6.1 times 15%; (Adjusted EBITDA is calculated as defined in the purchase agreement). The payment for calendar year 2017 of \$2.1 million (approximately \$2.6 million) was made March 28, 2018. The payment for calendar year 2018 of \$1.6 million (approximately \$1.9 million) was made on March 27, 2019; the payment represented an increase of \$0.1 million (approximately \$0.2 million) from the estimate provided in the second quarter of fiscal 2019. The Company estimated the fair value of the obligation to pay the remaining contingent consideration for calendar year 2019 based on a number of different projections of the estimated Adjusted EBITDA for the year. The Company recorded this future obligation using a discount rate of approximately 11.0%, representing the Company's weighted average cost of capital. The current estimated fair value of the contractual obligation to pay the contingent consideration for calendar year 2019 totals \$2.1 million (approximately \$2.4 million based on the exchange

rate on the last day of the third quarter of fiscal 2019) as of February 23, 2019. Each reporting period, the Company will estimate changes in the fair value of contingent consideration and any change in fair value will be recognized in the Company's Consolidated Statements of Operations. The estimate of fair value of contingent consideration requires very subjective assumptions to be made of various potential Adjusted EBITDA results and discount rates. Future revisions to these assumptions could materially change the estimate of the fair value of contingent consideration and therefore could materially affect the Company's future operating results. During the three and nine months ended February 23, 2019, the Company decreased the estimated contingent consideration by 302,000 (\$343,000) and 332,000 (\$376,000), respectively, and also recognized accretion expense on the discounted liability. These amounts are included in S, G & A for the respective periods. Results of operations of *taskforce* are included in the Consolidated Statements of Operations from the date of acquisition.

Table of Contents

The second acquisition occurred December 4, 2017 (the third quarter of fiscal 2018) when the Company acquired substantially all of the assets and assumed certain liabilities of Accretive Solutions, Inc. (Accretive). Accretive was a professional services firm that provided expertise in accounting and finance, enterprise governance, business technology and business transformation solutions to a wide variety of organizations in the U.S. and supported startups through its County suite of back office services. The Company paid consideration of \$20.0 million in cash and issued 1,072,000 shares of Resources Connection, Inc. common stock restricted for sale for four years; additional cash and shares of Company stock will be due after settlement of working capital adjustments. In addition, additional amounts may be paid to the sellers at the end of a certain period of time if there are no claims or may be used to satisfy any preacquisition claims in favor of the buyers. As of the end of the third quarter of fiscal 2019, the amounts due based on initial estimates of the resolution of these items are \$0.1 million in cash and 108,000 in additional shares of common stock and are accrued as a liability on the balance sheet as of February 23, 2019. The Company completed its integration of the operations of Accretive into its business model as of the first day of fiscal 2019 and thus the Company is unable to estimate the impact of additional revenue attributable to the Accretive acquisition during fiscal 2019.

4. Intangible Assets and Goodwill

The following table summarizes details of the Company's intangible assets and related accumulated amortization (amounts in thousands):

	As of February 23, 2019			As of May 26, 2018		
	Gross	Accumulated Amortization	Net	Gross	Accumulated Amortization	Net
Customer contracts and relationships (3-8 years)	\$ 14,515	\$ (2,899)	\$ 11,616	\$ 14,565	\$ (1,263)	\$ 13,302
Tradenames (3-10 years)	4,429	(1,316)	3,113	4,481	(560)	3,921
Consultant list (3 years)	792	(400)	392	815	(205)	610
Non-compete agreements (3 years)	906	(457)	449	932	(234)	698
Total	\$ 20,642	\$ (5,072)	\$ 15,570	\$ 20,793	\$ (2,262)	\$ 18,531

The Company recorded amortization expense of \$0.9 million and \$1.0 million for the three months ended February 23, 2019 and February 24, 2018, respectively, and \$2.9 million and \$1.3 million for the nine months ended February 23, 2019 and February 24, 2018, respectively. The 2019 fiscal year period includes a full year of amortization of intangible assets acquired from the Accretive and *taskforce* transactions while the prior year included amortization expense from the dates of acquisition. Future estimated intangible asset amortization expense (based on existing intangible assets) is \$3.8 million, \$3.8 million, \$2.5 million, \$1.8 million and \$1.8 million for the years ending May 25, 2019, May 30, 2020, May 29, 2021, May 28, 2022 and May 27, 2023, respectively. The estimates of future intangible asset amortization expense do not incorporate the potential impact of future currency fluctuations when translating the financial results of the Company's international operations that have amortizable intangible assets into U.S. dollars.

The following table summarizes the activity in the Company's goodwill balance (in thousands):

	February 23, 2019	February 24, 2018
Goodwill, beginning of year	\$ 191,950	\$ 171,088
Acquisitions- <i>taskforce</i> (see Note 3)		8,762
Acquisitions-Accretive (see Note 3)	3	11,536
Impact of foreign currency exchange rate changes	(804)	2,195
Goodwill, end of period	\$ 191,149	\$ 193,581

Table of Contents**5. Income Taxes**

On December 22, 2017, Congress enacted H.R.1, the Tax Cuts and Jobs Act (Tax Reform Act), which made significant changes to U.S. federal income tax laws including reducing the corporate rate from 35% to 21% effective January 1, 2018. In December 2017, the SEC issued Staff Accounting Bulletin No. 118 (SAB 118) which allows the Company to record provisional amounts related to the impact of the Tax Reform Act and adjust those amounts during a measurement period not to extend more than one year from date of enactment. During fiscal 2018, the Company recorded a provisional income tax benefit of approximately \$0.8 million upon re-measurement of U.S. deferred tax assets and liabilities at the rate the balances are expected to be realized. During the third quarter of fiscal 2019, the Company completed its accounting for the impact of the Tax Reform Act and determined that no adjustments were required to the income tax benefit of \$0.8 million recorded in fiscal 2018 to reflect the tax impact of re-measuring its U.S. net deferred tax liability.

The Tax Reform Act also includes the Global Intangible Low-Tax Income (GILTI) provision, a new mechanism for taxing certain foreign profits, the Base Erosion Anti-Abuse Tax, a minimum tax on payments to related parties, and the Foreign-Derived Intangible Income provision, a tax incentive to earn income abroad. The Company is permitted to make an accounting policy election to account for GILTI as either a period charge when the tax arises or as a part of deferred taxes. The Company has determined to account for GILTI as a period cost and has recognized provisional tax impacts associated with GILTI as a current expense for the nine months ended February 23, 2019.

The Company's provision for income taxes was \$3.8 million (effective tax rate of approximately 40%) and \$0.1 million (effective tax rate of approximately 1.0%) for the three months ended February 23, 2019 and February 24, 2018, respectively, and \$12.5 million (effective tax rate of approximately 36%) and \$5.1 million (effective tax rate of approximately 26%) for the nine months ended February 23, 2019 and February 24, 2018, respectively. The Company records tax expense based upon an actual effective tax rate versus a forecasted tax rate because of the volatility in its international operations that span numerous tax jurisdictions.

The provision for income taxes in the three and nine months ended February 23, 2019 and February 24, 2018 results from taxes on income in the U.S. and certain other foreign jurisdictions, no benefit for losses in jurisdictions in which a full valuation allowance on operating loss carryforwards had previously been established and a lower benefit for losses in certain foreign jurisdictions with tax rates lower than the U.S. statutory rates. The provision for income taxes increased for the three months ended February 23, 2019 compared to the prior year quarter because of improved global income. Also in the prior year quarter, the Tax Reform Act was enacted and the Company reversed \$2.2 million as a result of the reduction in the U.S. statutory rate applied to its year-to-date U.S. earnings and cumulative net deferred tax liability. Although the effective rate for the three months ended February 23, 2019 is positively impacted by the reduced U.S. tax rate, the effective rate increased as the prior year quarter benefited from the aforementioned initial impact of the reduction upon enactment.

The Company recognized a tax expense of approximately \$0.2 million and a tax benefit of \$0.2 million during the third quarter of fiscal 2019 and 2018, respectively, and a tax expense of approximately \$0.2 million and a tax benefit of \$0.8 million, during the first nine months of fiscal 2019 and 2018, respectively, related to stock-based compensation for nonqualified stock options expensed and for disqualifying dispositions under the ESPP.

Table of Contents**6. Long-Term Debt**

The Company has a \$120 million secured revolving credit facility (Facility) with Bank of America, consisting of (i) a \$90 million revolving loan facility (Revolving Loan), which includes a \$5 million sublimit for the issuance of standby letters of credit, and (ii) a \$30 million reducing revolving loan facility (Reducing Revolving Loan), any amounts of which may not be reborrowed after being repaid. The Facility is available for working capital and general corporate purposes, including potential acquisitions and stock repurchases. The Company's obligations under the Facility are guaranteed by all of the Company's domestic subsidiaries and secured by essentially all assets of the Company, Resources Connection LLC and their domestic subsidiaries, subject to certain customary exclusions. Borrowings under the Facility bear interest at a rate per annum of either, at the Company's option, (i) a London Interbank Offered Rate (LIBOR) defined in the Facility plus a margin of 1.25% or 1.50% or (ii) an alternate base rate, plus a margin of 0.25% or 0.50%, with the applicable margin depending on the Company's consolidated leverage ratio. The alternate base rate is the highest of (i) Bank of America's prime rate, (ii) the federal funds rate plus 0.50% and (iii) the Eurodollar rate plus 1.0%. The Company pays an unused commitment fee on the average daily unused portion of the Facility at a rate of 0.15% to 0.25% depending upon on the Company's consolidated leverage ratio. The Facility expires October 17, 2021.

The Facility contains both affirmative and negative covenants. Covenants include, but are not limited to, limitations on the Company's and its subsidiaries' ability to incur liens, incur additional indebtedness, make certain restricted payments, merge or consolidate and make disposition of assets. In addition, the Facility requires the Company to comply with financial covenants limiting the Company's total funded debt, minimum interest coverage ratio and maximum leverage ratio. The Company was in compliance with all financial covenants under the Facility as of February 23, 2019.

Upon the occurrence of an event of default under the Facility, the lender may cease making loans, terminate the Facility and declare all amounts outstanding to be immediately due and payable. The Facility specifies a number of events of default (some of which are subject to applicable grace or cure periods), including, among other things, non-payment defaults, covenant defaults, cross-defaults to other material indebtedness, bankruptcy and insolvency defaults and material judgment defaults.

The Company's borrowings on the Facility were \$58.0 million as of February 23, 2019, all of which were under the Revolving Loan. In addition, the Company has \$1.3 million of outstanding letters of credit issued under the Revolving Loan. The Company has \$30.7 million remaining to borrow under the Revolving Loan and \$30.0 million remaining under the Reducing Revolving Loan as of February 23, 2019. As of February 23, 2019, the interest rate on the Company's borrowings was 4.0% on a tranche of \$19.0 million (1-month LIBOR plus 1.50%), 4.1% on a tranche of \$24.0 million (6-month LIBOR plus 1.50%) and 4.3% on a tranche of \$15.0 million (6-month LIBOR plus 1.50%).

Subsequent to quarter end, on February 28, 2019, the Company made a \$10.0 million principal payment on the Facility.

7. Stockholders' Equity*Stock Repurchase Program*

In July 2015, the Company's board of directors approved a stock repurchase program (the July 2015 program), authorizing the repurchase, at the discretion of the Company's senior executives, of the Company's common stock for an aggregate dollar limit not to exceed \$150 million. Repurchases under the program may take place in the open market or in privately negotiated transactions and may be made pursuant to a Rule 10b5-1 plan. During the three

months ended February 23, 2019, the Company purchased 558,755 shares of its common stock on the open market at an average price of \$16.55 per share, for approximately \$9.2 million, and during the nine months ended February 23, 2019, the Company purchased 1,365,203 shares of its common stock on the open market at an average price of \$16.30 per share, for approximately \$22.3 million. As of February 23, 2019, approximately \$97.7 million remained available for future repurchases of the Company's common stock under the July 2015 program.

8. Supplemental Disclosure of Cash Flow Information

The following table presents information regarding income taxes paid, interest paid and non-cash investing and financing activities (amounts in thousands):

	For the Nine Months Ended	
	February 23, 2019	February 24, 2018
Income taxes paid	\$ 11,640	\$ 9,189
Interest paid	\$ 1,878	\$ 1,202
Non-cash investing and financing activities:		
Capitalized leasehold improvements paid directly by landlord	\$ 1,211	\$
Acquisition of <i>taskforce</i> :		
Issuance of common stock	\$	\$ 2,602
Liability for contingent consideration	\$ 4,202	\$ 6,952
Acquisition of Accretive:		
Issuance of common stock	\$	\$ 11,754
Dividends declared, not paid	\$ 4,147	\$ 3,780

Table of Contents**9. Stock-Based Compensation Plans*****Stock Options and Restricted Stock***

The maximum number of shares of the Company's common stock that may be issued or transferred pursuant to awards under the 2014 Plan equals the sum of: (1) 2,400,000 shares, plus (2) the number of shares subject to stock options granted under the Resources Connection, Inc. 2004 Performance Incentive Plan and the 1999 Long Term Incentive Plan (together the "Prior Stock Plans") and outstanding as of September 3, 2014 (the date at which the Prior Stock Plans terminated), which expire, or for any reason are cancelled or terminated, after that date without being exercised, plus (3) the number of shares subject to restricted stock, RSUs and other full-value awards granted under the Prior Stock Plans that were outstanding and unvested as of September 3, 2014, which are forfeited, terminated, cancelled, or otherwise reacquired after that date without having become vested. As of February 23, 2019, 1,506,000 shares were available for award grant purposes under the 2014 Plan, subject to future increases as described in (2) and (3) above and subject to increase as then-outstanding awards expire or terminate without having become vested or exercised, as applicable.

Awards under the 2014 Plan may include, but are not limited to, stock options, RSUs and restricted stock grants. Stock option grants generally vest in equal annual installments over four years and terminate ten years from the date of grant. Restricted stock award vesting is determined on an individual grant basis. Awards of restricted stock under the 2014 Plan will be counted against the available share limit as two and a half shares for every one share actually issued in connection with the award. The Company's policy is to issue shares from its authorized shares upon the exercise of stock options.

The following table summarizes the stock option activity for the nine months ended February 23, 2019 (number of shares under option and aggregate intrinsic value in thousands):

	Number of Shares Under Option	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (in years)	Aggregate Intrinsic Value
Outstanding at May 26, 2018	6,869	\$ 15.10	5.50	\$ 12,310
Granted, at fair market value	1,290	18.96		
Exercised	(1,392)	13.74		
Forfeited	(193)	15.65		
Expired	(404)	18.89		
Outstanding at February 23, 2019	6,170	\$ 15.95	6.29	\$ 12,956
Exercisable at February 23, 2019	3,644	\$ 15.10	4.54	\$ 10,205
Vested and expected to vest at February 23, 2019	5,858	\$ 15.83	6.13	\$ 12,794

The aggregate intrinsic value in the table above represents the total pretax intrinsic value, which is the difference between the Company's closing stock price on the last trading day of the third quarter of fiscal 2019 and the exercise price multiplied by the number of shares that would have been received by the option holders if they had exercised their in the money options on February 23, 2019. This amount will change based on changes in the fair market value of the Company's common stock. The total pre-tax intrinsic value related to stock options exercised during the three months ended February 23, 2019 and February 24, 2018 was \$1.9 million and \$0.9 million, respectively, and during the nine months ended February 23, 2019 and February 24, 2018 was \$5.0 million and \$1.3 million, respectively.

Table of Contents***Stock-Based Compensation Expense***

As of February 23, 2019, there was \$9.3 million of total unrecognized compensation cost related to unvested employee stock options granted. That cost is expected to be recognized over a weighted-average period of 36 months. Stock-based compensation expense included in selling, general and administrative expenses was \$1.9 million and \$1.4 million for the three months ended February 23, 2019 and February 24, 2018, respectively, and \$5.0 million and \$4.5 million for the nine months ended February 23, 2019 and February 24, 2018, respectively. These amounts consisted of stock-based compensation expense related to employee stock options, employee stock purchases made via the ESPP and restricted stock awards. In addition, commencing in the third quarter of fiscal 2018, stock-based compensation expense includes expense related to stock units credited under the Directors Deferred Compensation Plan. For the three and nine months ended February 23, 2019, this expense was \$83,000 and \$157,000, respectively, and \$18,000 for both the three and nine months ended February 24, 2018. As of February 23, 2019, there were 77,789 stock units not vested, with approximately \$1.2 million of remaining unrecognized compensation cost. There were no capitalized share-based compensation costs during the nine months ended February 23, 2019 or February 24, 2018.

The Company granted 21,537 shares of restricted stock during the three and nine months ended February 23, 2019 and granted 37,778 shares and 117,588 of restricted stock during the three and nine months ended February 24, 2018, respectively. Stock-based compensation expense for restricted stock awards was \$0.4 million for both the three months ended February 23, 2019 and February 24, 2018, and \$1.2 million and \$1.0 million for the nine months ended February 23, 2019 and February 24, 2018, respectively. As of February 23, 2019, there were 158,926 unvested restricted shares, with approximately \$2.2 million of remaining unrecognized compensation cost.

The Company recognizes compensation expense for only the portion of stock options and restricted stock that is expected to vest, rather than recording forfeitures when they occur. If the actual number of forfeitures differs from that estimated by management, additional adjustments to compensation expense may be required in future periods.

Employee Stock Purchase Plan

The ESPP allows qualified employees (as defined in the ESPP) to purchase designated shares of the Company's common stock at a price equal to 85% of the lesser of the fair market value of common stock at the beginning or end of each semi-annual stock purchase period. The ESPP's term expires October 16, 2024. A total of 5,900,000 shares of common stock may be issued under the ESPP. The Company issued 359,000 and 338,000 shares of common stock pursuant to the ESPP during the nine months ended February 23, 2019 and the year ended May 26, 2018, respectively. There were 221,000 shares of common stock available for issuance under the ESPP as of February 23, 2019.

10. Segment Information and Enterprise Reporting

The Company discloses information regarding operations outside of the U.S. The Company operates as one segment. The accounting policies for the domestic and international operations are the same as those described in Note 2 *Summary of Significant Accounting Policies* in the Notes to Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the fiscal year ended May 26, 2018. Summarized information regarding the Company's domestic and international operations is shown in the following table (amounts in thousands):

		Long-Lived Assets
	Revenue for the	(1)
	Three Months Ended	as of
	Revenue for the	
	Nine Months Ended	

	February 23, 2019	February 24, 2018	February 23, 2019	February 24, 2018	February 23, 2019	May 26, 2018
United States	\$ 142,409	\$ 134,334	\$ 432,539	\$ 366,902	\$ 200,057	\$ 198,280
International	37,089	38,080	114,316	103,436	32,410	34,614
Total	\$ 179,498	\$ 172,414	\$ 546,855	\$ 470,338	\$ 232,467	\$ 232,894

(1) Long-lived assets are comprised of goodwill, intangible assets and property and equipment.

11. Legal Proceedings

The Company is involved in certain legal matters arising in the ordinary course of business. In the opinion of management, all such matters, if disposed of unfavorably, would not have a material adverse effect on the Company's financial position, cash flows or results of operations.

Table of Contents**12. Recent Accounting Pronouncements***Accounting Pronouncements Adopted During Current Fiscal Year*

Revenue from Contracts with Customers (Topic 606): In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-09, a comprehensive new revenue recognition standard that supersedes current revenue recognition guidance and is intended to improve and converge revenue recognition and related financial reporting requirements. The core principle of this guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Effective the beginning of fiscal year 2019 (May 27, 2018), the Company adopted ASC 606, *Revenue from Contracts with Customers*, using the modified retrospective method, which allows companies to apply the new revenue standard to reporting periods beginning in the year the standard is first implemented, while prior periods continue to be reported in accordance with previous accounting guidance. The adoption of ASC 606 did not have a significant impact on revenue recognition; therefore, the Company did not have an opening retained earnings adjustment for the nine months ended February 23, 2019. See Note 2 *Summary of Significant Accounting Policies* for additional information.

Intangibles – Goodwill and Other – Internal-Use Software (Subtopic 350-40): Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract. In August 2018, the FASB issued ASU 2018-15, which aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software (and hosting arrangements that include an internal-use software license). An entity in a hosting arrangement that is a service contract must determine which implementation costs to capitalize as an asset related to the service contract and which costs to expense. Costs that cannot be capitalized include training costs, certain data conversion costs, costs incurred during preliminary project and post implementation stages. Costs that are subject to evaluation for potential capitalization are incurred during the application development stage. The guidance also specifies factors to consider when developing the period over which to amortize the capitalized costs once the arrangement is deployed for usage by the entity and elements to consider in analyzing potential impairment of the asset.

The guidance is effective for financial statements for annual periods beginning after December 15, 2019 (for the Company, fiscal 2021) and for interim periods within those fiscal years. However, early adoption is permitted. The Company adopted this guidance prospectively in the first quarter of fiscal 2019 as the Company has an initiative involving a cloud computing arrangement that is a service contract for its processing of payroll. The initiative is now complete and the amount capitalized during fiscal 2019 was approximately \$0.8 million and is accounted for in Other Assets in the Company’s Consolidated Balance Sheet.

Compensation – Stock Compensation (Topic 718): Scope of Modification Accounting. In May 2017, the FASB issued ASU 2017-09, which clarifies when changes to the terms or conditions of a share-based payment award require an entity to apply modification accounting. Under the new guidance, modification accounting is only required if the fair value, vesting conditions or classification (equity or liability) of the new award are different from the original award immediately before the original award is modified. The new standard is effective for financial statements for annual periods beginning after December 15, 2017 and was adopted by the Company effective May 27, 2018. The guidance must be applied prospectively to awards modified on or after the adoption date. The future impact of ASU 2017-09 will be dependent on the nature of future stock award modifications.

Accounting Pronouncements Pending Adoption

Fair Value Measurement (Topic 820): Disclosure Framework – Changes to the Disclosure Requirements for Fair Value Measurement. In August 2018, the FASB issued ASU 2018-13, which eliminates, adds and modifies certain fair value measurement disclosures. The ASU is effective for annual reporting periods beginning after December 15, 2019 (for the Company, fiscal 2021), including interim reporting periods within those annual periods, with early adoption permitted. We do not expect the adoption of this standard to have a material impact to our Consolidated Financial Statements and related disclosures.

Intangibles – Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment. In January 2017, the FASB issued ASU 2017-04, which provides guidance regarding the goodwill impairment testing process. The new standard eliminates Step 2 of the goodwill impairment test. If a company determines in Step 1 of the goodwill impairment test that the carrying value of goodwill is greater than the fair value, an impairment for that difference must be recorded in the income statement, rather than proceeding to Step 2. The new standard is effective for financial statements for annual periods beginning after December 15, 2019 (for the Company, fiscal 2021). Early adoption is permitted. Based on the Company's most recent annual goodwill impairment test completed in fiscal 2018, the Company expects no initial impact on adoption.

Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. In June 2016, the FASB issued ASU 2016-13, which provides guidance on accounting for credit losses, including trade receivables. The guidance requires the application of a current expected credit loss model, which measure credit losses based on relevant information about past events, including historical experience, current conditions, and reasonable and supportable forecasts. The guidance is effective for annual periods beginning after December 15, 2019 (for the Company, fiscal 2021). The guidance requires companies to apply the

Table of Contents

requirements using a modified retrospective approach. The Company is currently evaluating the potential impact of the adoption of this standard on the Consolidated Financial Statements and required disclosures.

Leases (Topic 842): Leases. In February 2016, the FASB issued ASU 2016-02, which amends the existing guidance to require lessees to recognize operating lease obligations on their balance sheets by recording the rights and obligations created by those leases. ASU 2016-02 will be effective for the Company beginning May 26, 2019. The Company will adopt this standard utilizing the optional transition method by recognizing a cumulative-effect adjustment to the opening balance of retained earnings on the adoption date without retrospective application to comparative periods. The Company will elect the package of practical expedients permitted under the transition guidance within the new standard. The Company will also elect the practical expedient to keep leases with an initial term of 12 months or less off of the balance sheet. While the Company is still finalizing the impact this guidance will have on the Company's Consolidated Financial Statements, based on its lease portfolio as of February 23, 2019, the Company currently expects the adoption of this guidance to result in an initial lease liability balance of up to \$65 million, and an initial right of use asset balance of up to \$60 million. The difference between these two amounts will be recorded as a decrease to the Company's deferred lease incentive liability and restructuring charge liability on the Consolidated Balance Sheets.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants and the SEC did not, or are not expected to, have a material effect on the Company's results of operations, financial position or cash flows.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our Consolidated Financial Statements and accompanying notes. This discussion and analysis contains forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements relate to expectations concerning matters that are not historical facts. Such forward-looking statements may be identified by words such as anticipates, believes, can, continue, could, estimates, expects, intends, may, plans, potential, or will or the negative of these terms or other comparable terminology. These statements, and all phases of our operations, are subject to known and unknown risks, uncertainties and other factors that could cause our actual results, levels of activity, performance or achievements and those of our industry to differ materially from those expressed or implied by these forward-looking statements. You are urged to review carefully the disclosures we make concerning risks, uncertainties and other factors that may affect our business or operating results, including those identified in Part II, Item 1A, Risk Factors below and in our Annual Report on Form 10-K for the year ended May 26, 2018 (File No. 0-32113). Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also affect our business or operating results. Readers are cautioned not to place undue reliance on the forward-looking statements included herein, which speak only as the date of this filing. We do not intend, and undertake no obligation, to update the forward-looking statements in this filing to reflect events or circumstances after the date of this filing or to reflect the occurrence of unanticipated events, unless required by law to do so. References in this filing to Resources Connection, RGP, Resources Global Professionals, the Company, we, us, and our refer to Resources Connection, Inc. and its subsidiaries.

Overview

RGP is a multinational business consulting firm that provides agile consulting services and talent to its global client base which is faced with disruption, business transformation and compliance issues. We also bring functional

competencies in the areas of accounting; finance; governance, risk and compliance management; corporate advisory, strategic communications and restructuring; information management; human capital; supply chain management; and legal and regulatory. We assist our clients with projects requiring specialized expertise or capacity in areas such as:

Finance and accounting including process transformation and optimization; financial reporting and analysis; technical and operational accounting; merger and acquisition due diligence and integration; audit readiness, preparation and response; implementation of the requirements of new accounting standards, such as revenue recognition and lease accounting; and remediation support.

Information management including program and project management; business and technology integration; data strategy including governance, security and privacy (such as the European General Data Protection Regulation); and business performance management (such as core planning and consolidation systems).

Corporate advisory, strategic communications, crisis communications and restructuring.

Governance, risk and compliance management including governance; assessments; auditing and automation of programs managing regulatory compliance such as ensuring compliance with the Sarbanes-Oxley Act of 2002 (Sarbanes); enterprise risk management; internal audits; operational risk management; and data security and privacy services.

Table of Contents

Supply chain management including strategy development; procurement and supplier management; logistics and materials management; supply chain planning and forecasting; and Unique Device Identification compliance.

Human capital including change management; organization development and effectiveness; employment engagement; compensation and incentive plan strategies and design and optimization of human resources technology and operations.

Legal and regulatory supporting commercial transactions; global compliance initiatives; law department operations; and law department business strategy and analytics.

We were founded in June 1996 by a team at Deloitte, led by our chairman, Donald B. Murray, who was then a senior partner with Deloitte. Our founders created Resources Connection to capitalize on the increasing demand for high quality outsourced professional services. We operated as a part of Deloitte until April 1999. In April 1999, we completed a management-led buyout in partnership with several investors. In December 2000, we completed our initial public offering of common stock and began trading on the Nasdaq Stock Market. We currently trade on the Nasdaq Global Select Market under the ticker symbol **RECN**. We operate under the acronym RGP, branding for our operating entity name of Resources Global Professionals.

We operated solely in the United States (U.S.) until fiscal year 2000, when we opened our first three international offices and began to expand geographically to meet the demand for project consulting services across the world. As of February 23, 2019, we served clients from offices in 21 countries, including 26 international offices and 47 offices in the U.S. Our world-wide footprint allows the Company to support the global initiatives of our multinational client base.

The Company announced certain strategic initiatives in April 2017. The first initiative focused on cultivating a more sophisticated and robust sales culture. The Company has now completed this initiative. Among the features of the initiative are enhanced training activities; the alignment of the Company's sales process using tools such as Salesforce.com and the establishment of an enterprise-wide business development function; and the current year initiation of a new incentive compensation program for individuals focused on profitable revenue generation and gross margin. The new incentive compensation program rewards individuals for achieving or exceeding pre-determined sales goals, with bonus multipliers applicable for exceeding goals; the rewards for sales achievement are tied to both gross margin goals and qualitative goals associated with the Company's culture of **LIFE AT RGP**. Finally, to complete this initiative, the Company expanded its Strategic Client Program, which involves a dedicated account team for certain high profile clients with world-wide operations.

The second initiative redesigned the Company's business model to enhance its client offerings, with a focus on building its integrated solutions capabilities and delivering multi-disciplinary offerings to its clients in three areas of focus: Transaction Services, Technical Accounting Services, and Data & Analytics. During fiscal 2018, the Company implemented the new operating model for sales, talent and integrated solutions within RGP for all of North America; that is, reporting relationships are now largely defined by functional area rather than on an office location basis. While we believe this effort has already delivered improved revenue growth and improved customer experience into fiscal 2019, we are focused on continued improvement from this initiative. The Company completed the redesigned operating model in Europe and Asia Pacific during the third quarter of fiscal 2019.

The third initiative focuses on cost containment. Goals of this initiative include (i) improving leverage of selling, general and administrative expenses (S, G & A) as a percentage of revenue and (ii) realizing cost synergies in the core

business and with the Accretive acquisition. S, G & A as a percentage of revenue decreased to 31.0% in the third quarter of fiscal 2019 as compared to 32.1% in the third quarter of fiscal 2018; RGP remains committed to managing its cost structure to achieve improved S, G & A performance as measured against revenue throughout fiscal 2019.

During fiscal 2018, the Company completed two acquisitions. The first acquisition, completed August 31, 2017 (the second quarter of fiscal 2018), was of *taskforce* Management on Demand AG (*taskforce*), a German based professional services firm founded in 2007, that provides clients with senior interim management and project management expertise. The Company paid initial consideration of 5.8 million (approximately \$6.9 million at the date of acquisition) in a combination of cash and restricted stock.

In addition, the purchase agreement for *taskforce* requires additional earn-out payments to be made based on performance in calendar years 2017, 2018 and 2019. Under accounting rules for business combinations, obligations that are contingently payable to the sellers based upon the occurrence of one or more future events are recorded as a discounted liability on the Company's balance sheet. The Company is obligated to pay the sellers in Euros as follows: for calendar year 2017, Adjusted EBITDA times 6.1 times 20%; and for both calendar years 2018 and 2019, Adjusted EBITDA times 6.1 times 15%; (Adjusted EBITDA is calculated as defined in the purchase agreement). The payment for calendar year 2017 of 2.1 million (approximately \$2.6 million) was made March 28, 2018. The payment for calendar year 2018 of 1.6 million (approximately \$1.9 million) was made on March 27, 2019; the payment represented an increase of 0.1 million (approximately \$0.2 million) from the estimate provided in the second quarter of fiscal 2019. The Company estimated the fair value of the obligation to pay the remaining contingent consideration for calendar year 2019 based on a number of different projections of the estimated Adjusted EBITDA for the year. The Company recorded this future obligation using a discount rate of approximately 11.0%, representing the Company's weighted average cost of capital. The current estimated fair value of the contractual obligation to pay the contingent consideration for calendar year 2019 totals 2.1 million (approximately \$2.4 million based on the exchange rate on the last day of the third quarter of fiscal 2019) as of February 23, 2019. Each reporting period, the Company will estimate changes in the fair value of contingent consideration and any change in fair value will be recognized in the

Table of Contents

Company's Consolidated Statements of Operations. The estimate of fair value of contingent consideration requires very subjective assumptions to be made of various potential Adjusted EBITDA results and discount rates. Future revisions to these assumptions could materially change the estimate of the fair value of contingent consideration and therefore could materially affect the Company's future operating results. During the three and nine months ended February 23, 2019, the Company decreased the estimated contingent consideration by 302,000 (\$343,000) and 332,000 (\$376,000), respectively, and also recognized accretion expense on the discounted liability. These amounts are included in S, G & A for the respective periods. Results of operations of *taskforce* are included in the Consolidated Statements of Operations from the date of acquisition.

The second acquisition occurred December 4, 2017 (the third quarter of fiscal 2018) when the Company acquired substantially all of the assets and assumed certain liabilities of Accretive Solutions, Inc. (Accretive). Accretive was a professional services firm that provided expertise in accounting and finance, enterprise governance, business technology and business transformation solutions to a wide variety of organizations in the U.S. and supported startups through its Countsy suite of back office services. The Company paid consideration of \$20.0 million in cash and issued 1,072,000 shares of Resources Connection, Inc. common stock restricted for sale for four years; additional cash and shares of Company stock will be due after settlement of working capital adjustments. In addition, additional amounts may be paid to the sellers at the end of a certain period of time if there are no claims or may be used to satisfy any preacquisition claims in favor of the buyers. As of the end of the third quarter of fiscal 2019, the amounts due based on initial estimates of the resolution of these items are estimated at \$0.1 million in cash and 108,000 in additional shares of common stock and are accrued as a liability on the balance sheet as of February 23, 2019. The Company completed its integration of the operations of Accretive into its business model as of the first day of fiscal 2019 and thus the Company is unable to estimate the impact of additional revenue attributable to the Accretive acquisition during fiscal 2019.

Critical Accounting Policies

The following discussion and analysis of our financial condition and results of operations are based upon our Consolidated Financial Statements, which have been prepared in accordance with generally accepted accounting principles in the U.S. (GAAP). The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

The following represents a summary of our critical accounting policies, defined as those policies we believe: (a) are the most important to the portrayal of our financial condition and results of operations and (b) involve inherently uncertain issues that require management's most difficult, subjective or complex judgments. The Company's accounting policies were revised in connection with the adoption of ASC 606 (described further in Note 2 *Summary of Significant Accounting Policies* in the Notes to Consolidated Financial Statements in Part I, Item 1, of this Quarterly Report on Form 10-Q). There have been no material changes in our critical accounting policies, or in the estimates and assumptions underlying those policies, from those described in our Annual Report on Form 10-K for the year ended May 26, 2018.

Revenue recognition Revenues are recognized when control of the promised service is transferred to our clients, in an amount that reflects the consideration expected in exchange for the services. Revenue is recorded net of sales or other transaction taxes collected from clients and remitted to taxing authorities. Revenues from contracts are recognized over time, based on hours worked by the Company's professionals. The performance of the agreed-to service over time is the single performance obligation for revenues. Certain clients may receive discounts (for example, volume discounts or rebates) to the amounts billed. These discounts or rebates are considered variable consideration. Management evaluates the facts and circumstances of each contract and client relationship to estimate the variable

consideration assessing the most likely amount to recognize and considering management's expectation of the volume of services to be provided over the applicable period. Rebates are the largest component of variable consideration and are estimated using the most likely amount method prescribed by Accounting Standards Codification (ASC) Topic 606, contracts terms and estimates of revenue. Revenues are recognized net of variable consideration to the extent that it is probable that a significant reversal of revenues will not occur in subsequent periods.

Valuation of long-lived assets We assess the potential impairment of long-lived tangible and intangible assets periodically or whenever events or changes in circumstances indicate the carrying value may not be recoverable. Identifiable intangibles assets are amortized over their lives, typically ranging from three to ten years. Goodwill is not subject to amortization. This asset is considered to have an indefinite life and its carrying value is required to be assessed by us for impairment at least annually. Depending on future market values of our stock, our operating performance and other factors, these assessments could potentially result in impairment reductions of this intangible asset in the future and this adjustment may materially affect the Company's future financial results and financial condition.

Allowance for doubtful accounts We maintain an allowance for doubtful accounts for estimated losses resulting from our clients failing to make required payments for services rendered. We estimate this allowance based upon our knowledge of the financial condition of our clients (which may not include knowledge of all significant events), review of historical receivable and reserve trends and other pertinent information. While such losses have historically been within our expectations and the provisions established, we cannot guarantee we will continue to experience the same credit loss rates we have in the past. A significant change in the liquidity or financial position of our clients could cause unfavorable trends in receivable collections and additional allowances may be required. These additional allowances could materially affect the Company's future financial results.

Table of Contents

Income taxes In order to prepare our Consolidated Financial Statements, we are required to make estimates of income taxes, if applicable, in each jurisdiction in which we operate. The process incorporates an assessment of any current tax exposure together with temporary differences resulting from different treatment of transactions for tax and financial statement purposes. These differences result in deferred tax assets and liabilities that are included in our Consolidated Balance Sheets. The recovery of deferred tax assets from future taxable income must be assessed and, to the extent recovery is not likely, we will establish a valuation allowance. An increase in the valuation allowance results in recording additional tax expense and any such adjustment may materially affect the Company's future financial results. If the ultimate tax liability differs from the amount of tax expense we have reflected in the Consolidated Statements of Operations, an adjustment of tax expense may need to be recorded and this adjustment may materially affect the Company's future financial results and financial condition.

Stock-based compensation Under our 2014 Performance Incentive Plan, officers, employees, and outside directors have received or may receive grants of restricted stock, stock units, options to purchase common stock or other stock or stock-based awards. Under our Employee Stock Purchase Plan (the "ESPP"), eligible officers and employees may purchase our common stock in accordance with the terms of the plan.

The Company estimates a value for employee stock options on the date of grant using an option-pricing model. We have elected to use the Black-Scholes option-pricing model which takes into account assumptions regarding a number of highly complex and subjective variables. These variables include the expected stock price volatility over the term of the awards and actual and projected employee stock option exercise behaviors. Additional variables to be considered are the expected term, expected dividends and the risk-free interest rate over the expected term of our employee stock options. In addition, because stock-based compensation expense recognized in the Consolidated Statements of Operations is based on awards ultimately expected to vest, it is reduced for estimated forfeitures. Forfeitures must be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Forfeitures are estimated based on historical experience. If facts and circumstances change and we employ different assumptions in future periods, the compensation expense recorded may differ materially from the amount recorded in the current period.

The Company uses its historical volatility over the expected life of the stock option award to estimate the expected volatility of the price of its common stock. The risk-free interest rate assumption is based upon observed interest rates appropriate for the term of our employee stock options. The impact of expected dividends (\$0.13 per share in the first three quarters of fiscal 2019 and \$0.12 per share in each quarter of fiscal 2018) is also incorporated in determining the estimated value per share of employee stock option grants. Such dividends are subject to quarterly board of director approval. The Company's expected life of stock option grants is 5.7 years for non-officers and 8.3 years for officers. The Company uses its historical volatility over the expected life of the stock option award to estimate the expected volatility of the price of its common stock. The Company reviews the underlying assumptions related to stock-based compensation at least annually.

We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities. Actual results may differ from these estimates under different assumptions or conditions.

Results of Operations

The following tables set forth, for the periods indicated, our Consolidated Statements of Operations data. These historical results are not necessarily indicative of future results.

	Three Months Ended		Nine Months Ended	
	February 23, 2019	February 24, 2018	February 23, 2019	February 24, 2018
	(Amounts in thousands)		(Amounts in thousands)	
Revenue	\$ 179,498	\$ 172,414	\$ 546,855	\$ 470,338
Direct cost of services	111,587	109,904	337,372	294,711
Gross margin	67,911	62,510	209,483	175,627
Selling, general and administrative expenses	55,587	55,268	166,912	150,181
Amortization of intangible assets	948	1,004	2,855	1,326
Depreciation expense	1,163	1,089	3,429	2,976

Interest income	(60)	(34)	(173)	(94)
Income before provision for income taxes	9,618	4,641	34,558	19,962
Provision for income taxes	3,822	46	12,457	5,117
Net income	\$ 5,796	\$ 4,595	\$ 22,101	\$ 14,845

Table of Contents

We also assess the results of our operations using EBITDA, Adjusted EBITDA and Adjusted EBITDA Margin. EBITDA is defined as earnings before interest, taxes, depreciation and amortization. We define Adjusted EBITDA as EBITDA plus stock-based compensation expense plus or minus contingent consideration adjustments. Adjusted EBITDA Margin is calculated by dividing Adjusted EBITDA by revenue. These measures assist management in assessing our core operating performance and the Company believes they are also useful to investors as an alternative measure of our operating performance. The following table presents EBITDA, Adjusted EBITDA and Adjusted EBITDA Margin for the periods indicated and includes a reconciliation of such measures to net income, the most directly comparable GAAP financial measure:

	Three Months Ended		Nine Months Ended	
	February 23,	February 24,	February 23,	February 24,
	2019	2018	2019	2018
	(Amounts in thousands)		(Amounts in thousands)	
Net income	\$ 5,796	\$ 4,595	\$ 22,101	\$ 14,845
Adjustments:				
Amortization of intangible assets	948	1,004	2,855	1,326
Depreciation expense	1,163	1,089	3,429	2,976
Interest expense	655	542	1,902	1,276
Interest income	(60)	(34)	(173)	(94)
Provision for income taxes	3,822	46	12,457	5,117
EBITDA	12,324	7,242	42,571	25,446
Stock-based compensation expense	1,948	1,437	4,961	4,499
Contingent consideration adjustment	(343)		(376)	
Adjusted EBITDA	\$ 13,929	\$ 8,679	\$ 47,156	\$ 29,945
Revenue	\$ 179,498	\$ 172,414	\$ 546,855	\$ 470,338
Adjusted EBITDA Margin	7.8%	5.0%	8.6%	6.4%

The financial measures and key performance indicators we use to assess our financial and operating performance above are not defined by, or calculated in accordance with, GAAP. A non-GAAP financial measure is defined as a numerical measure of a company's financial performance that (i) excludes amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the comparable measure calculated and presented in accordance with GAAP in the Consolidated Statements of Operations; or (ii) includes amounts, or is subject to adjustments that have the effect of including amounts, that are excluded from the comparable measure so calculated and presented.

EBITDA, Adjusted EBITDA and Adjusted EBITDA Margin are non-GAAP financial measures. We believe EBITDA, Adjusted EBITDA and Adjusted EBITDA Margin, which are used by management to assess the core performance of our Company, provide useful information to our investors because they are alternative financial measures investors can also use to assess the core performance of the Company and compare it to the Company's peers. EBITDA, Adjusted EBITDA and Adjusted EBITDA Margin are not measurements of financial performance or liquidity under GAAP and should not be considered in isolation or construed as substitutes for net income or other cash flow data prepared in accordance with GAAP for purposes of analyzing our profitability or liquidity. These

measures should be considered in addition to, and not as a substitute for, net income, earnings per share, cash flows or other measures of financial performance prepared in conformity with GAAP.

Further, EBITDA, Adjusted EBITDA and Adjusted EBITDA Margin have the following limitations:

Although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future and EBITDA and Adjusted EBITDA do not reflect any cash requirements for such replacements;

Stock-based compensation is an element of our long-term incentive compensation program, although we exclude it as an expense from Adjusted EBITDA when evaluating our ongoing operating performance for a particular period; and

Table of Contents

Other companies in our industry may calculate Adjusted EBITDA and Adjusted EBITDA Margin differently than we do, limiting their usefulness as comparative measures.

Due to these limitations, EBITDA, Adjusted EBITDA and Adjusted EBITDA Margin should not be considered a substitute for performance measures calculated in accordance with GAAP.

Three Months Ended February 23, 2019 Compared to Three Months Ended February 24, 2018

Percentage change computations are based upon amounts in thousands.

Revenue. Revenue increased \$7.1 million, or 4.1%, to \$179.5 million for the three months ended February 23, 2019 from \$172.4 million for the three months ended February 24, 2018. On a constant currency basis, revenue increased 5.3%. Accretive was acquired in the third quarter of fiscal 2018; revenue in the third quarter of fiscal 2018 includes twelve weeks of revenue in North America attributable to historic clients of Accretive.

We deliver our services to clients, whether multi-national or locally based, in a similar fashion across the globe. Bill rates improved 0.8% (the same on a constant currency basis) and hours worked increased 3.5% between the two periods. We believe the improvement in revenue for the third quarter of fiscal 2019 as compared to the prior year quarter is in part the product of the operational changes and refinements made throughout fiscal 2018 and into fiscal 2019, including the use of Salesforce.com as a tool to measure individual productivity directly and structuring reporting lines by functional area. In addition, we believe a portion of the revenue growth is attributable to client service and technical teams spending more time interacting with clients and prospects, improved alignment of our incentive systems to sales growth and an increase in sales efforts delivered by a focused business development team.

As presented in the table below, revenue increased in the third quarter of fiscal 2019 compared to the same quarter of fiscal 2018 in North America and Asia Pacific while revenue decreased in Europe (dollars in thousands):

	Revenue for the Three Months Ended			% of Total	
	February 23, 2019	February 24, 2018	% Change	February 23, 2019	February 24, 2018
North America	\$ 146,817	\$ 137,953	6.4%	81.8%	80.0%
Europe	20,911	23,149	(9.7)%	11.7	13.4
Asia Pacific	11,770	11,312	4.0%	6.5	6.6
Total	\$ 179,498	\$ 172,414	4.1%	100.0%	100.0%

Our financial results are subject to fluctuations in the exchange rates of foreign currencies in relation to the U.S. dollar (U.S. dollar). Revenues denominated in foreign currencies are translated into U.S. dollars at the monthly average exchange rates in effect during each period. Thus, as the value of the U.S. dollar strengthens relative to the currencies of our non-U.S. based operations, our translated revenue (and expenses) will be lower; conversely, if the value of the U.S. dollar weakens relative to the currencies of our non-U.S. based operations, our translated revenue (and expenses) will be higher. Using the comparable fiscal 2018 third quarter conversion rates, international revenues would have been higher than reported under GAAP by approximately \$2.0 million in the third quarter of fiscal 2019. Using these constant currency rates, which we believe provides a more comprehensive view of trends in our business, our revenue increased in North America and Asia Pacific by 6.6% and 7.5%, respectively, and decreased in Europe by 3.5%.

The number of consultants on assignment as of February 23, 2019 was 3,059 compared to 3,143 consultants engaged as of February 24, 2018. We operated 73 (26 abroad) offices as of February 23, 2019 and 74 (26 abroad) as of February 24, 2018.

Our clients do not sign long-term contracts with us. As such, there can be no assurance as to future demand levels for the services we provide or that future results can be reliably predicted by considering past trends.

Direct Cost of Services. Direct cost of services increased \$1.7 million, or 1.5%, to \$111.6 million for the three months ended February 23, 2019 from \$109.9 million for the three months ended February 24, 2018. On a constant currency basis, direct cost of services increased 2.7%. The increase in the amount of direct cost of services between periods was primarily attributable to an increase of 3.5% in the number of hours worked, partially offset by a decrease of 1.6% in the average pay rate per hour between the two quarters.

Direct cost of services as a percentage of revenue was 62.2% and 63.7% for the three months ended February 23, 2019 and February 24, 2018, respectively. The direct cost of services as a percentage of revenue improved in the third quarter of fiscal 2019 primarily because of improvement in the bill/pay ratio and a reduction in the Company's payroll taxes and business expenses as compared to the prior year period.

Table of Contents

Our target direct cost of services percentage is 60% in all of our markets.

Selling, General and Administrative Expenses. S, G & A as a percentage of revenue was 31.0% and 32.1% for the quarters ended February 23, 2019 and February 24, 2018, respectively. S, G & A was \$55.6 million for the third quarter of fiscal 2019 and \$55.3 million for the comparable prior year period. The slight year over year increase is primarily attributable to: 1) \$1.3 million of additional payroll and benefit costs from new headcount to support the growth of critical markets; and 2) \$0.5 million related to increased commission and bonus expenses tied to the revenue growth of the business; these costs were partially offset by lower severance, consulting and acquisition costs of \$1.5 million compared to the prior year.

Management and administrative headcount was 915 at the end of the third quarter of fiscal 2019 and 890 at the end of the third quarter of fiscal 2018.

Sequential Operations. On a sequential quarter basis, fiscal 2019 third quarter revenues decreased approximately 4.9% (4.8% constant currency), from \$188.8 million to \$179.5 million. Third quarter revenue declined primarily because of the Christmas, New Year's and Chinese New Year's holidays while the only significant holiday in the second quarter was Thanksgiving in the U.S. Hours worked during the third quarter decreased 4.9% from the second quarter while average bill rates remained the same between the two quarters. The Company's sequential revenue decreased in North America by 4.6%, Europe by 9.7% and Asia Pacific by 0.4%. On a constant currency basis, using the comparable second quarter fiscal 2019 conversion rates, sequential revenue decreased in North America (4.5%), Europe (8.7%) and Asia Pacific (1.4%).

Direct cost of services as a percentage of revenue was 62.2% and 61.1% in the third and second quarters of fiscal 2019, respectively; the decrease in the direct cost of services percentage in the third quarter is primarily the result of the increase in the amount of Company payroll tax expense typically experienced with the beginning of the new calendar year.

S, G & A as a percent of revenue was 31.0% for the third quarter of fiscal 2019 compared to 29.1% for the second quarter of fiscal 2019. Spend in the third quarter increased \$0.6 million to \$55.6 million from \$55.0 million in the previous quarter. The primary reasons for the change were: 1) \$1.5 million of additional payroll and benefit costs from new headcount to support the growth of critical markets; and 2) \$1.2 million of costs related to various categories, including rent, bad debt expense and loss on asset disposal. These costs were partially offset by 1) a \$1.3 million decrease in commission and bonus expenses; and 2) lower severance costs of \$0.8 million compared to the second quarter.

Amortization and Depreciation Expense. Amortization of intangible assets was \$0.9 million and \$1.0 million in the third quarter of fiscal 2019 and 2018, respectively. The amortization expense relates to identifiable intangible assets acquired in the December 2017 acquisition of Accretive and the September 2017 acquisition of *taskforce*.

Depreciation expense was \$1.2 million and \$1.1 million in the third quarter of fiscal 2019 and 2018, respectively. The increase is primarily the result of depreciation on fixed assets acquired in the purchase of Accretive.

Interest Expense. Interest expense for the third quarter of fiscal 2019 was approximately \$0.7 million compared to \$0.5 million in the same period of fiscal 2018. The increase in the 2019 third quarter expense is the result of generally higher interest rates. As of February 23, 2019, the interest rates on the Company's borrowings were 4.0% on a tranche of \$19.0 million (1-month LIBOR plus 1.50%), 4.1% on a tranche of \$24.0 million (6-month LIBOR plus 1.50%) and 4.3% on a tranche of \$15.0 million (6-month LIBOR plus 1.50%).

Income Taxes. On December 22, 2017, Congress enacted H.R.1, the Tax Cuts and Jobs Act (Tax Reform Act), which made significant changes to U.S. federal income tax laws including reducing the corporate rate from 35% to 21% effective January 1, 2018. In December 2017, the SEC issued Staff Accounting Bulletin No. 118 (SAB 118) which allows the Company to record provisional amounts related to the impact of the Tax Reform Act and adjust those amounts during a measurement period not to extend more than one year from date of enactment. During fiscal 2018, the Company recorded a provisional income tax benefit of approximately \$0.8 million upon re-measurement of U.S. deferred tax assets and liabilities at the rate the balances are expected to be realized. During the third quarter of fiscal 2019 the Company completed its accounting for the impact of the Tax Reform Act and determined that no adjustments were required to the income tax benefit of \$0.8 million recorded in fiscal 2018 to reflect the tax impact of re-measuring its U.S. net deferred tax liability.

The Tax Reform Act also includes the Global Intangible Low-Tax Income (GILTI) provision, a new mechanism for taxing certain foreign profits, the Base Erosion Anti-Abuse Tax, a minimum tax on payments to related parties, and the Foreign-Derived Intangible Income provision, a tax incentive to earn income abroad. The Company is permitted to make an accounting policy election to account for GILTI as either a period charge when the tax arises or as a part of deferred taxes. The Company has determined to account for GILTI as a period cost and has recognized provisional tax impacts associated with GILTI as a current expense for the nine months ended February 23, 2019.

Table of Contents

The Company's provision for income taxes was \$3.8 million (effective tax rate of approximately 40%) and \$0.1 million (effective tax rate of approximately 1.0%) for the three months ended February 23, 2019 and February 24, 2018, respectively, and \$12.5 million (effective tax rate of approximately 36%) and \$5.1 million (effective tax rate of approximately 26%) for the nine months ended February 23, 2019 and February 24, 2018, respectively. The Company records tax expense based upon an actual effective tax rate versus a forecasted tax rate because of the volatility in its international operations that span numerous tax jurisdictions.

The provision for income taxes in the three and nine months ended February 23, 2019 and February 24, 2018 results from taxes on income in the U.S. and certain other foreign jurisdictions, no benefit for losses in jurisdictions in which a full valuation allowance on operating loss carryforwards had previously been established and a lower benefit for losses in certain foreign jurisdictions with tax rates lower than the U.S. statutory rates. The provision for income taxes increased for the three months ended February 23, 2019 compared to the prior year quarter because of improved global income. Also, in the prior year quarter, the Tax Reform Act was enacted and the Company reversed \$2.2 million as a result of the reduction in the U.S. statutory rate applied to its year-to-date U.S. earnings and cumulative net deferred tax liability. Although the effective rate for the three months ended February 23, 2019 is positively impacted by the reduced U.S. tax rate, the effective rate increased as the prior year quarter benefited from the aforementioned initial impact of the reduction upon enactment.

The Company recognized a tax expense of approximately \$0.2 million and a tax benefit of \$0.2 million during the third quarter of fiscal 2019 and 2018, respectively, and a tax expense of approximately \$0.2 million and a tax benefit of approximately \$0.8 million, during the first nine months of fiscal 2019 and 2018, respectively, related to stock-based compensation for nonqualified stock options expensed and for disqualifying dispositions under the ESPP.

Periodically, the Company reviews the components of both book and taxable income to analyze the adequacy of the tax provision. There can be no assurance that the Company's effective tax rate will remain constant in the future because of the lower benefit from the U.S. statutory rate for losses in certain foreign jurisdictions, the limitation on the benefit for losses in jurisdictions in which a valuation allowance for operating loss carryforwards has previously been established, and the unpredictability of timing and the amount of eligible disqualifying incentive stock options exercises.

Comparability of Quarterly Results. Our quarterly results have fluctuated in the past and we believe they will continue to do so in the future. Certain factors that could affect our quarterly operating results are described in Part II, Item 1A. Risk Factors. Due to these and other factors, we believe quarter-to-quarter comparisons of our results of operations may not be meaningful indicators of future performance.

Nine Months Ended February 23, 2019 Compared to Nine Months Ended February 24, 2018

Percentage change computations are based upon amounts in thousands.

Revenue. Revenue increased \$76.5 million, or 16.3%, to \$546.9 million for the nine months ended February 23, 2019 from \$470.3 million for the nine months ended February 24, 2018. On a constant currency basis, revenue increased 17.0%. Revenue in the first nine months of fiscal 2019 includes revenue in North America attributable to historic clients of Accretive but it is not possible to isolate this revenue due to the completion of the integration of Accretive operations into RGP at the beginning of the first quarter of fiscal 2019. Accretive was acquired in the third quarter of fiscal 2018. Bill rates improved 1.4% and hours worked increased 14.9% between the two periods; a portion of the increase in hours is due to the Accretive and *taskforce* acquisitions.

We believe the improvement in revenue for the current period compared to the prior year period is in part the product of the operational changes made throughout fiscal 2018 and into fiscal 2019, including the use of Salesforce.com as a tool to measure individual productivity directly and structuring reporting lines with a function and client focus. In addition, we believe a portion of the revenue growth is attributable to client service and technical teams spending more time interacting with clients and prospects, improved alignment of our incentive systems to sales growth and an increase in sales efforts delivered by a focused business development team. Also, in the current nine-month period, the Company's financial service industry revenue exceeded the prior year comparable period's revenue, reversing a downward trend noted in previous periods.

Table of Contents

As presented in the table below, revenue increased in the first nine months of fiscal 2019 compared to the same period of fiscal 2018 in North America, Europe and Asia Pacific (dollars in thousands):

	Revenue for the Nine Months Ended			% of Total	
	February 23, 2019	February 24, 2018	% Change	February 23, 2019	February 24, 2018
North America	\$ 446,811	\$ 376,348	18.7%	81.7%	80.0%
Europe	64,758	61,259	5.7%	11.8	13.0
Asia Pacific	35,286	32,731	7.8%	6.5	7.0
Total	\$ 546,855	\$ 470,338	16.3%	100.0%	100.0%

Our financial results are subject to fluctuations in the exchange rates of foreign currencies in relation to the U.S. dollar. Revenues denominated in foreign currencies are translated into U.S. dollars at the monthly average exchange rates in effect during each period. Thus, as the value of the U.S. dollar strengthens relative to the currencies of our non-U.S. based operations, our translated revenue (and expenses) will be lower; conversely, if the value of the U.S. dollar weakens relative to the currencies of our non-U.S. based operations, our translated revenue (and expenses) will be higher. Using the conversion rates of the comparable fiscal 2018 period, international revenues would have been higher than reported under GAAP by approximately \$3.6 million in the first nine months of fiscal 2019. Using these constant currency rates, which we believe provides a more comprehensive view of trends in our business, our revenue increased in North America, Europe and Asia Pacific by 18.9%, 9.1% and 10.1%, respectively.

Direct Cost of Services. Direct cost of services increased \$42.7 million, or 14.5%, to \$337.4 million for the nine months ended February 23, 2019 from \$294.7 million for the nine months ended February 24, 2018. On a constant currency basis, direct cost of services increased 15.2%. The primary reason for the change is an increase in hours worked of 14.9% between the two periods (partially attributable to the Accretive and *taskforce* acquisitions), while the average consultant pay rates per hour remained consistent.

Direct cost of services as a percentage of revenue was 61.7% and 62.7% for the nine months ended February 23, 2019 and February 24, 2018, respectively. The direct cost of services as a percentage of revenue improved in the current period primarily because of improvement in the bill/pay ratio and a reduction in cost of the Company's self-insured medical program as compared to the prior year.

Our target direct cost of services percentage is 60% in all of our markets.

Selling, General and Administrative Expenses. S, G & A as a percentage of revenue was 30.5% and 31.9% for the nine months ended February 23, 2019 and February 24, 2018, respectively. S, G & A increased to \$166.9 million for the first nine months of fiscal 2019 from \$150.2 million for the same period in the prior year for the following primary reasons: we added S, G & A tied to the operations of the Accretive acquisition (now integrated with the operations of RGP) and the *taskforce* acquisition (which operates as a separate brand). More specifically, the year over year increase is primarily attributable to: 1) \$11.8 million of additional payroll and benefit costs from *taskforce* personnel, legacy Accretive personnel and new headcount to support the growth of critical markets; 2) \$6.1 million related to increased commission and bonus expenses tied to the revenue growth of the business; 3) \$1.8 million of marketing costs associated with driving revenue growth; and 4) increases of \$2.0 million in rent, bad debt and other categories. These costs were offset by lower severance, acquisition, and integration costs, and other cost reductions of \$5.0 million

incurred in the comparable period of the prior year.

Amortization and Depreciation Expense. Amortization of intangible assets was \$2.9 million and \$1.3 million in the first nine months of fiscal 2019 and 2018, respectively. The current fiscal year includes a full nine months of amortization of intangible assets acquired from the Accretive and *taskforce* transactions, while the prior year included amortization expense from the dates of acquisition.

Depreciation expense was \$3.4 million and \$3.0 million in the first nine months of fiscal 2019 and 2018, respectively. The increase is primarily the result of depreciation on fixed assets acquired in the purchase of Accretive.

Interest Expense. Interest expense for the first nine months of fiscal 2019 was approximately \$1.9 million compared to \$1.3 million in the same period of fiscal 2018. The increase in the 2019 period is the result of interest on incremental borrowings of \$15.0 million in fiscal 2018 to finance a portion of the acquisition of Accretive and generally higher interest rates.

Income Taxes. The Company's provision for income taxes was \$12.5 million (effective tax rate of approximately 36%) and \$5.1 million (effective tax rate of approximately 26%) for the nine months ended February 23, 2019 and February 24, 2018, respectively. The Company records tax expense based upon an actual effective tax rate versus a forecasted tax rate because of the volatility in its international operations that span numerous tax jurisdictions.

Table of Contents

The provision for income taxes for the nine months ended February 23, 2019 and February 24, 2018 results from taxes on income in the U.S. and certain other foreign jurisdictions, no benefit for losses in jurisdictions in which a full valuation allowance on operating loss carryforwards had previously been established and a lower benefit for losses in certain foreign jurisdictions with tax rates lower than the U.S. statutory rates. The provision for income taxes increased for the nine months ended February 23, 2019 compared to the prior year period because of improved global income. Also, in the prior year period, the Tax Reform Act was enacted, and the Company recognized a tax benefit of \$2.2 million as a result of the reduction in the U.S. statutory rate applied to its year-to-date U.S. earnings and cumulative net deferred tax liability. The Company also reversed \$2.4 million of valuation allowances that offset deferred tax assets of certain foreign entities in the prior year period whereas there was no reversal in nine months ended February 23, 2019. Although the effective rate for the nine months ended February 23, 2019 is positively impacted by the reduced U.S. tax rate, the effective rate increased from the nine months ended February 24, 2018 primarily due to the valuation allowance reversal benefit and the initial impact of the U.S. rate reduction recognized in the prior year period.

The Company recognized tax expense of approximately \$0.2 million and tax benefit of approximately \$0.8 million related to stock-based compensation for nonqualified stock options expensed and for disqualifying dispositions under the ESPP during the first nine months of fiscal 2019 and 2018, respectively.

Liquidity and Capital Resources

Our primary sources of liquidity are cash provided by our operations and our \$120 million secured revolving credit facility (Facility) with Bank of America and, historically, to a lesser extent, stock option exercises and ESPP purchases. On an annual basis, we have generated positive cash flows from operations since inception, and we continued to do so for the year ended May 26, 2018. Our ability to generate positive cash flow from operations in the future will be, at least in part, dependent on continued stable global economic conditions. As of February 23, 2019, the Company had \$48.0 million of cash and cash equivalents including \$21.5 million held in international operations.

We entered into the Facility in October 2016, which is available for working capital and general corporate purposes, including potential acquisitions and stock repurchases. The Facility allows the Company to choose the interest rate applicable to advances. Borrowings under the Facility bear interest at a rate per annum of either, at the Company's option, (i) LIBOR plus a margin of 1.25% or 1.50% or (ii) an alternate base rate, plus margin of 0.25% or 0.50% with the applicable margin depending on the Company's consolidated leverage ratio. The alternate base rate is the highest of (i) Bank of America's prime rate, (ii) the federal funds rate plus 0.50% and (iii) the Eurodollar rate plus 1.0%. The Company pays an unused commitment fee on the average daily unused portion of the Facility at a rate of 0.15% to 0.25% depending upon the Company's consolidated leverage ratio. The Facility expires October 17, 2021. Additional information regarding the Facility is included in Note 6 *Long Term Debt* in the Notes to Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q.

As of February 23, 2019, the Company had borrowings of approximately \$58.0 million under the Facility and directed Bank of America to issue approximately \$1.3 million of outstanding letters of credit for the benefit of third parties related to operating leases and guarantees. As of February 23, 2019, the Company was in compliance with the financial covenants in the Facility. Subsequent to quarter end, on February 28, 2019, the Company made a \$10.0 million principal payment on the Facility.

Our ongoing operations and anticipated growth in the geographic markets we currently serve will require us to continue to make investments in office premises and capital equipment, primarily technology hardware and software. In addition, we may consider making strategic acquisitions. We currently believe that our current cash, ongoing cash flows from our operations and funding available under our Facility will be adequate to meet our working capital and

capital expenditure needs for at least the next 12 months. If we require additional capital resources to grow our business, either internally or through acquisition, we may seek to sell additional equity securities or to increase use of our Facility. In addition, if we decide to make additional share repurchases, we may fund these through existing cash balances or use of our Facility. The sale of additional equity securities or certain forms of debt financing could result in additional dilution to our stockholders. We may not be able to obtain financing arrangements in amounts or on terms acceptable to us in the future. In the event we are unable to obtain additional financing when needed, we may be compelled to delay or curtail our plans to develop our business or to pay dividends on our capital stock, which could have a material adverse effect on our operations, market position and competitiveness.

Operating Activities

Operating activities for the nine months ended February 23, 2019 provided cash of \$13.5 million compared to cash used in operating activities of \$2.3 million for the nine months ended February 24, 2018. Cash provided by operations in the first nine months of fiscal 2019 resulted from net income of \$22.1 million and non-cash items of \$17.4 million. These amounts were offset by net unfavorable changes in operating assets and liabilities of \$26.0 million due primarily to the increase in the balance of accounts receivable as of the end of the third quarter of fiscal 2019, reflecting increasing revenue during the first nine months of the fiscal year. In the first nine months of fiscal 2018, cash used in operations resulted from net income of \$14.8 million and non-cash items of \$9.4 million. These amounts were offset by net unfavorable changes in operating assets and liabilities of \$26.5 million due primarily to the increase in the balance of accounts receivable as of the end of the third quarter of fiscal 2018 driven by the increase in revenue at the end of the quarter. Non-cash items in both fiscal 2019 and fiscal 2018 include depreciation, amortization, deferred income taxes, and stock-based compensation expense. These charges do not reflect an actual cash outflow from the Company.

Table of Contents

Investing Activities

Net cash used in investing activities was \$5.9 million for the first nine months of fiscal 2019, compared to \$25.1 million in the comparable prior year period. Fiscal 2018 included cash used to acquire Accretive and *taskforce* of approximately \$23.5 million, net of cash acquired; the Company did not acquire an entity in the first nine months of fiscal 2019. In the current year, expenditures for property and equipment were \$5.9 million compared to \$1.6 million in the prior year as the Company relocated or refurbished certain offices during the first nine months of fiscal 2019.

Financing Activities

Net cash used in financing activities totaled \$15.6 million for the nine months ended February 23, 2019 compared to \$8.2 million of cash provided for the nine months ended February 24, 2018. Net cash used in financing activities for the nine months ended February 23, 2019 included dividends paid on the Company's common stock of \$12.0 million, which were approximately \$1.5 million higher than in the comparable period of the prior year. The change in dividend paid in the nine months ended February 23, 2019 was caused by an increase in the Company's dividend accrual rate of \$0.01 per common share compared to the prior year and a higher number of outstanding common shares after the *taskforce* and Accretive acquisitions. The Company's board of directors declared a quarterly cash dividend of \$0.13 per common share on January 17, 2019. The dividend of approximately \$4.1 million, paid on March 13, 2019, is accrued in the Company's Consolidated Balance Sheet as of February 23, 2019.

The Company used \$22.3 million to purchase approximately 1,365,000 shares of common stock on the open market during the first nine months of fiscal 2019 at a price averaging \$16.30 per common share. The Company used \$5.1 million to purchase approximately 321,000 shares of common stock on the open market during the first nine months of fiscal 2018. Proceeds from the exercise of employee stock options and issuance of shares via the ESPP were approximately \$14.8 million higher in fiscal 2019 as compared to the comparable period of fiscal 2018 mainly due to exercises of in the money options as a result of the Company's higher share price during the period. The Company also reduced its obligation on the Facility by \$5.0 million during the first nine months of fiscal 2019. In fiscal 2018, the Company borrowed \$15.0 million under the Facility as part of the Accretive acquisition.

As described in Note 3 *Acquisitions*, in the Notes to Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q, the purchase agreement for *taskforce* requires earn-out payments to be made. Under accounting rules for business combinations, obligations that are contingently payable to the sellers based upon the occurrence of one or more future events are recorded as a discounted liability on the Company's balance sheet. The Company is obligated to pay the sellers (in Euros) Adjusted EBITDA times 6.1 times 15% (Adjusted EBITDA as defined in the purchase agreement) for calendar years 2018 and 2019. The Company estimated the fair value of the obligation to pay contingent consideration based on a number of different projections of the estimated Adjusted EBITDA for each of the calendar years. The Company recorded this future obligation using a discount rate of approximately 11.0%, representing the Company's weighted average cost of capital. The estimated fair value of the contingent consideration as of February 23, 2019 was 3.7 million (approximately \$4.2 million using the exchange rate at the end of the quarter). 1.6 million (approximately \$1.9 million) of the contingent consideration was paid subsequent to the end of the third quarter to settle the calendar year 2018 obligation.

Recent Accounting Pronouncements

Information regarding recent accounting pronouncements is contained in Note 12 *Recent Accounting Pronouncements* in the Notes to Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q.

Off-Balance Sheet Arrangements

The Company has no off-balance sheet arrangements.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Interest Rate Risk. We are primarily exposed to market risks from fluctuations in interest rates and the effects of those fluctuations on the market values of our cash and cash equivalents and our borrowings under our Facility that bear interest at a variable market rate.

As of February 23, 2019, we had approximately \$48.0 million of cash and cash equivalents and \$58.0 million of borrowings under our Facility. The earnings on investments are subject to changes in interest rates; however, assuming a constant balance available for investment, a 10% decline in interest rates would reduce our interest income but would not have a material impact on our consolidated financial position or results of operations.

Borrowings under the Facility bear interest at a rate per annum of either, at the Company's option, (i) LIBOR plus a margin of 1.25% or 1.50% or (ii) an alternate base rate, plus margin of 0.25% or 0.50% with the applicable margin depending on the Company's consolidated leverage ratio. The alternate base rate is the highest of (i) Bank of America's prime rate, (ii) the federal funds rate plus 0.50% and (iii) the Eurodollar rate plus 1.0%. We are exposed to rate risk related to fluctuations in the LIBOR rate primarily; at the current level of borrowing as of February 23, 2019 of \$58.0 million, a 10% change in interest rates would have resulted in approximately a \$0.2 million change in annual interest expense.

Foreign Currency Exchange Rate Risk. For the three months ended February 23, 2019, approximately 20.7% of the Company's revenues were generated outside of the U.S. As a result, our operating results are subject to fluctuations in the exchange rates of foreign currencies in relation to the U.S. dollar. Revenues and expenses denominated in foreign currencies are translated into U.S. dollars at the monthly average exchange rates prevailing during the period. Thus, as the value of the U.S. dollar fluctuates relative to the currencies in our non-U.S. based operations, our reported results may vary.

Assets and liabilities of our non-U.S. based operations are translated into U.S. dollars at the exchange rate effective at the end of each monthly reporting period. Approximately 55% of our balances of cash and cash equivalents as of February 23, 2019 were denominated in U.S. dollars. The remaining amount of approximately 45% was comprised primarily of cash balances translated from Euros, Mexican Pesos, British Pound Sterling and Chinese Yuan. The difference resulting from the translation each period of assets and liabilities of our non-U.S. based operations is recorded as a component of stockholders' equity in other accumulated other comprehensive income or loss.

Although we intend to monitor our exposure to foreign currency fluctuations, we do not currently use financial hedging techniques to mitigate risks associated with foreign currency fluctuations including in a limited number of circumstances when we may be asked to transact with our client in one currency but are obligated to pay our consultant in another currency. We cannot provide assurance that exchange rate fluctuations will not adversely affect our financial results in the future.

ITEM 4. CONTROLS AND PROCEDURES.

As required by Rule 13a-15(b) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as such term is defined in Rule 13a-15(e) under the Exchange Act) as of February 23, 2019. Based on that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of February 23, 2019. There was no change in the Company's internal control over financial reporting, as such term is defined in Rule

13a-15(f) promulgated under the Exchange Act, during the Company's quarter ended February 23, 2019 that materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

We are not a party to any material legal proceedings, although we are from time to time party to legal proceedings that arise in the ordinary course of our business.

ITEM 1A. RISK FACTORS.

Other than with respect to the risk factor titled Our computer hardware and software and telecommunications systems are susceptible to damage, breach or interruption, there have been no material changes in our risk factors from those disclosed in Part 1, Item 1A of our Annual Report on Form 10-K for the fiscal year ended May 26, 2018, which was filed with the Securities and Exchange Commission on July 23, 2018. For convenience, our updated risk factors are included below in this Item 1A. The order in which the risks appear is not intended as an indication of their relative weight or importance.

A future economic downturn or change in the use of outsourced professional services consultants could adversely affect our business.

While we believe general economic conditions continue to improve in most parts of the world, there is some uncertainty regarding general economic conditions within some regions and countries in which we operate, leading to reluctance on the part of some multinational companies to spend on discretionary projects. Deterioration of or increased uncertainty related to the global economy or tightening credit markets could result in a reduction in the demand for our services and adversely affect our business in the future. In addition, the use of professional services consultants on a project-by-project basis could decline for non-economic reasons. In the event of a reduction in the demand for our consultants, our financial results would suffer.

Economic deterioration at one or more of our clients may also affect our allowance for doubtful accounts. Our estimate of losses resulting from our clients' failure to make required payments for services rendered has historically been within our expectations and the provisions established. However, we cannot guarantee we will continue to experience the same credit loss rates we have in the past. A significant change in the liquidity or financial position of our clients could cause unfavorable trends in receivable collections and cash flows and additional allowances may be required. These additional allowances could materially affect the Company's future financial results.

In addition, we are required to periodically, but at least annually, assess the recoverability of certain assets, including deferred tax assets and goodwill. Softening of the U.S. economy and international economies could adversely affect our evaluation of the recoverability of deferred tax assets, requiring us to record additional tax valuation allowances. Our assessment of impairment of goodwill is currently based upon comparing our market capitalization to our net book value. Therefore, a significant downturn in the future market value of our stock could potentially result in impairment reductions of goodwill and such an adjustment could materially affect the Company's future financial results and financial condition.

The market for professional services is highly competitive, and if we are unable to compete effectively against our competitors, our business and operating results could be adversely affected.

We operate in a competitive, fragmented market, and we compete for clients and consultants with a variety of organizations that offer similar services. The competition is likely to increase in the future due to the expected growth of the market and the relatively few barriers to entry. Our principal competitors include:

consulting firms

local, regional, national and international accounting and other traditional professional services firms

Table of Contents

independent contractors

traditional and Internet-based staffing firms

the in-house or former in-house resources of our clients

We cannot assure you we will be able to compete effectively against existing or future competitors. Many of our competitors have significantly greater financial resources, greater revenues and greater name recognition, which may afford them an advantage in attracting and retaining clients and consultants and in offering pricing concessions. Some of our competitors in certain markets do not provide medical and other benefits to their consultants, thereby allowing them to potentially charge lower rates to clients. In addition, our competitors may be able to respond more quickly to changes in companies' needs and developments in the professional services industry.

Our business depends upon our ability to secure new projects from clients and, therefore, we could be adversely affected if we fail to do so.

We do not have long-term agreements with our clients for the provision of services and our clients may terminate engagements with us at any time. The success of our business is dependent on our ability to secure new projects from clients. For example, if we are unable to secure new client projects because of improvements in our competitors' service offerings, or because of a change in government regulatory requirements, or because of an economic downturn decreasing the demand for outsourced professional services, our business is likely to be materially adversely affected. New impediments to our ability to secure projects from clients may develop over time, such as the increasing use by large clients of in-house procurement groups that manage their relationship with service providers.

We may be legally liable for damages resulting from the performance of projects by our consultants or for our clients' mistreatment of our personnel.

Many of our engagements with our clients involve projects or services critical to our clients' businesses. If we fail to meet our contractual obligations, we could be subject to legal liability or damage to our reputation, which could adversely affect our business, operating results and financial condition. While we are not currently subject to any client-related legal claims which we believe are material, it remains possible, because of the nature of our business, we may be involved in litigation in the future that could materially affect our future financial results. Claims brought against us could have a serious negative effect on our reputation and on our business, financial condition and results of operations.

Because we are in the business of placing our personnel in the workplaces of other companies, we are subject to possible claims by our personnel alleging discrimination, sexual harassment, negligence and other similar activities by our clients. We may also be subject to similar claims from our clients based on activities by our personnel. The cost of defending such claims, even if groundless, could be substantial and the associated negative publicity could adversely affect our ability to attract and retain personnel and clients.

We may not be able to grow our business, manage our growth or sustain our current business.

Historically, we have grown by opening new offices and by increasing the volume of services provided through existing offices. Beginning late in fiscal 2017, we embarked on several new strategic initiatives, including the implementation of a new operating model to drive growth. While the roll-out of that operating model is complete in the U.S., the adoption internationally is ongoing. Our ability to execute on those strategies or the disruptions related to

implementation of the new operating model may impact or limit our ability to grow our business. There can be no assurance we will be able to maintain or expand our market presence in our current locations or to successfully enter other markets or locations. Our ability to continue to grow our business will depend upon an improving global economy and a number of factors, including our ability to:

grow our client base

expand profitably into new geographies

provide additional professional services offerings

hire qualified and experienced consultants

maintain margins in the face of pricing pressures

Table of Contents

manage costs

maintain or grow revenues and increase other service offerings from existing clients

Even if we are able to resume more rapid growth in our revenue, the growth will result in new and increased responsibilities for our management as well as increased demands on our internal systems, procedures and controls, and our administrative, financial, marketing and other resources. For instance, a limited number of clients are requesting certain engagements be of a fixed fee nature rather than our traditional hourly time and materials approach, thus shifting a portion of the burden of financial risk and monitoring to us. Failure to adequately respond to these new responsibilities and demands may adversely affect our business, financial condition and results of operations.

Our ability to serve clients internationally is integral to our strategy and our international activities expose us to additional operational challenges we might not otherwise face.

Our international activities require us to confront and manage a number of risks and expenses we would not face if we conducted our operations solely in the U.S. Any of these risks or expenses could cause a material negative effect on our operating results. These risks and expenses include:

difficulties in staffing and managing foreign offices as a result of, among other things, distance, language and cultural differences

less flexible or future changes in labor laws and regulations in the U.S. and in foreign countries

expenses associated with customizing our professional services for clients in foreign countries

foreign currency exchange rate fluctuations when we sell our professional services in denominations other than U.S. dollars

protectionist laws and business practices that favor local companies

political and economic instability in some international markets

multiple, conflicting and changing government laws and regulations

trade barriers

reduced protection for intellectual property rights in some countries

potentially adverse tax consequences

the potential impact of Brexit on the economies of European countries, particularly the United Kingdom
We have acquired, and may continue to acquire, companies, and these acquisitions could disrupt our business.

We have acquired several companies, including two during the 2018 fiscal year, and we may continue to acquire companies in the future. Entering into an acquisition entails many risks, any of which could harm our business, including:

diversion of management's attention from other business concerns

failure to integrate the acquired company with our existing business

failure to motivate, or loss of, key employees from either our existing business or the acquired business

failure to identify certain risks or liabilities during the due diligence process

potential impairment of relationships with our existing employees and clients

additional operating expenses not offset by additional revenue

incurrence of significant non-recurring charges

incurrence of additional debt with restrictive covenants or other limitations

addition of significant amounts of intangible assets, including goodwill, that are subject to periodic assessment of impairment, primarily through comparison of market value of our stock to our net book value, with such impairment potentially resulting in a material impact on our future financial results and financial condition

dilution of our stock as a result of issuing equity securities

assumption of liabilities of the acquired company

Table of Contents

Our failure to be successful in addressing these risks or other problems encountered in connection with our past or future acquisitions could cause us to fail to realize the anticipated benefits of such acquisitions, incur unanticipated liabilities and harm our business generally.

We must provide our clients with highly qualified and experienced consultants, and the loss of a significant number of our consultants, or an inability to attract and retain new consultants, could adversely affect our business and operating results.

Our business involves the delivery of professional services, and our success depends on our ability to provide our clients with highly qualified and experienced consultants who possess the skills and experience necessary to satisfy their needs. At various times, such professionals can be in great demand, particularly in certain geographic areas or if they have specific skill sets. Our ability to attract and retain consultants with the requisite experience and skills depends on several factors including, but not limited to, our ability to:

provide our consultants with either full-time or flexible-time employment

obtain the type of challenging and high-quality projects our consultants seek

pay competitive compensation and provide competitive benefits

provide our consultants with flexibility as to hours worked and assignment of client engagements

There can be no assurance we will be successful in accomplishing any of these factors and, even if we are, we cannot assure we will be successful in attracting and retaining the number of highly qualified and experienced consultants necessary to maintain and grow our business.

Decreased effectiveness of equity compensation could adversely affect our ability to attract and retain employees.

We have historically used stock options as a component of our employee compensation program in order to align employees' interests with the interests of our stockholders, encourage employee retention and provide competitive compensation packages. About 38% of our options outstanding as of the end of the third quarter of fiscal 2019 are priced at more than the current per share market value of our stock, limiting the grants from those years as a significant incentive to retain employees.

Our computer hardware and software and telecommunications systems are susceptible to damage, breach or interruption.

The management of our business is aided by the uninterrupted operation of our computer and telecommunication systems. These systems are vulnerable to security breaches, natural disasters or other catastrophic events, computer viruses, or other interruptions or damage stemming from power outages, equipment failure or unintended usage by employees. In particular, our employees may have access or exposure to personally identifiable or otherwise confidential information and customer data and systems, the misuse of which could result in legal liability. In addition, we rely on information technology systems to process, transmit and store electronic information and to communicate among our locations around the world and with our clients, partners and consultants. The breadth and

complexity of this infrastructure increases the potential risk of security breaches. Security breaches, including cyber-attacks or cyber-intrusions by computer hackers, foreign governments, cyber terrorists or others with grievances against the industry in which we operate or us in particular, may disable or damage the proper functioning of our networks and systems. We review and update our systems and have implemented processes and procedures to protect against security breaches and unauthorized access to our data. Despite our implementation of security controls, our systems and networks are vulnerable to computer viruses, malware, worms, hackers and other security issues, including physical and electronic break-ins, router disruption, sabotage or espionage, disruptions from unauthorized access and tampering (including through social engineering such as phishing attacks), impersonation of authorized users and coordinated denial-of-service attacks. For example, in the past we have experienced cyber security incidents resulting from unauthorized access to our systems, which to date have not had a material impact on our business or results of operations; however, there is no assurance that such impacts will not be material in the future. It is also possible our security controls over personal and other data may not prevent unauthorized access to, or destruction, loss, theft, misappropriation or release of personally identifiable or other proprietary, confidential, sensitive or valuable information of ours or others; this access could lead to potential unauthorized disclosure of confidential personal, Company or client information others could use to compete against us or for other disruptive, destructive or harmful purposes and outcomes. Any such disclosure or damage to our networks and systems could subject us to third party claims against us and reputational harm. If these events occur, our ability to attract new clients may be impaired or we may be subjected to damages or penalties. In addition, system-wide or local failures of these information technology systems could have a material adverse effect on our business, financial condition, results of operations or cash flows.

Table of Contents

Our cash and short-term investments are subject to economic risk.

The Company invests its cash, cash equivalents and short-term investments in foreign and domestic bank deposits, money market funds, commercial paper and certificates of deposit. Certain of these investments are subject to general credit, liquidity, market and interest rate risks. In the event these risks caused a decline in value of any of the Company's investments, it could adversely affect the Company's financial condition.

Our business could suffer if we lose the services of one or more key members of our senior management.

Our future success depends upon the continued employment of our senior management team. The unforeseen departure of one or more key members of our senior management team could significantly disrupt our operations if we are unable to successfully manage the transition. The replacement of members of senior management can involve significant time and expense and create uncertainties that could delay, prevent the achievement of, or make it more difficult for us to pursue and execute on our business opportunities, which could have an adverse effect on our business, financial condition and operating results.

Further, we generally do not have non-compete agreements with our employees and, therefore, they could terminate their employment with us at any time. Our ability to retain the services of members of our senior management and other key employees could be impacted by a number of factors, including competitors' hiring practices or the effectiveness of our compensation programs. If members of our senior management or other key employees leave our employ for any reason, they could pursue other employment opportunities with our competitors or otherwise compete with us. If we are unable to retain the services of these key personnel or attract and retain other qualified and experienced personnel on acceptable terms, our business, financial condition and operating results could be adversely affected.

Our quarterly financial results may be subject to significant fluctuations that may increase the volatility of our stock price.

Our results of operations could vary significantly from quarter to quarter. Factors that could affect our quarterly operating results include:

our ability to attract new clients and retain current clients

the mix of client projects

the announcement or introduction of new services by us or any of our competitors

the expansion of the professional services offered by us or any of our competitors into new locations both nationally and internationally

changes in the demand for our services by our clients

the entry of new competitors into any of our markets

the number of consultants eligible for our offered benefits as the average length of employment with the Company increases

the amount of vacation hours used by consultants or number of holidays in a quarter, particularly the day of the week on which they occur

availability of consultants with the requisite skills in demand by clients

changes in the pricing of our professional services or those of our competitors

variation in foreign exchange rates from one quarter to the next used to translate the financial results of our international operations

the amount and timing of operating costs and capital expenditures relating to management and expansion of our business

the timing of acquisitions and related costs, such as compensation charges that fluctuate based on the market price of our common stock

the periodic fourth quarter consisting of 14 weeks, which occurred during the fiscal year ended May 31, 2014 and next occurs during the fiscal year ending May 30, 2020

Due to these factors, we believe quarter-to-quarter comparisons of our results of operations are not meaningful indicators of future performance. It is possible that in some future periods, our results of operations may be below the expectations of investors. If this occurs, the price of our common stock could decline.

Table of Contents

If our internal control over financial reporting does not comply with the requirements of Sarbanes, our business and stock price could be adversely affected.

Section 404 of Sarbanes requires us to evaluate periodically the effectiveness of our internal control over financial reporting, and to include a management report assessing the effectiveness of our internal controls as of the end of each fiscal year. Our management report on internal controls is contained in our Annual Report on Form 10-K for the year ended May 26, 2018. Section 404 also requires our independent registered public accountant to report on our internal control over financial reporting.

Our management does not expect our internal control over financial reporting will prevent all errors or acts of fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance the control system's objectives will be met. Further, the design of a control system must reflect that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, involving us have been, or will be, detected. These inherent limitations include the realities that judgments in decision-making can be faulty and breakdowns can occur because of simple errors or mistakes. Controls can also be circumvented by individual acts of a person, or by collusion among two or more people, or by management override of controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and we cannot assure you any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies and procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to errors or fraudulent acts may occur and not be detected.

Although our management has determined, and our independent registered public accountant has attested, that our internal control over financial reporting was effective as of May 26, 2018, we cannot assure you that we or our independent registered public accountant will not identify a material weakness in our internal controls in the future. A material weakness in our internal control over financial reporting may require management and our independent registered public accountant to evaluate our internal controls as ineffective. If our internal control over financial reporting is not considered adequate, we may experience a loss of public confidence, which could have an adverse effect on our business and our stock price. Additionally, if our internal control over financial reporting otherwise fails to comply with the requirements of Sarbanes, our business and stock price could be adversely affected.

We may be subject to laws and regulations that impose difficult and costly compliance requirements and subject us to potential liability and the loss of clients.

In connection with providing services to clients in certain regulated industries, such as the gaming, energy and healthcare industries, we are subject to industry-specific regulations, including licensing and reporting requirements. Complying with these requirements is costly and, if we fail to comply, we could be prevented from rendering services to clients in those industries in the future. Additionally, changes in these requirements, or in other laws applicable to us, in the future could increase our costs of compliance.

In addition, we may face challenges from certain state regulatory bodies governing the provision of certain professional services, such as legal services or audit services. The imposition of such regulations could require additional financial and operational burdens on our business.

It may be difficult for a third party to acquire the Company, and this could depress our stock price.

Delaware corporate law and our amended and restated certificate of incorporation and amended and restated bylaws contain provisions that could delay, defer or prevent a change of control of the Company or our management. These provisions could also discourage proxy contests and make it difficult for you and other stockholders to elect directors and take other corporate actions. As a result, these provisions could limit the price future investors are willing to pay for your shares. These provisions:

authorize our board of directors to establish one or more series of undesignated preferred stock, the terms of which can be determined by the board of directors at the time of issuance

divide our board of directors into three classes of directors, with each class serving a staggered three-year term. Because the classification of the board of directors generally increases the difficulty of replacing a majority of the directors, it may tend to discourage a third party from making a tender offer or otherwise attempting to obtain control of us and may make it difficult to change the composition of the board of directors

prohibit cumulative voting in the election of directors which, if not prohibited, could allow a minority stockholder holding a sufficient percentage of a class of shares to ensure the election of one or more directors

Table of Contents

require that any action required or permitted to be taken by our stockholders must be effected at a duly called annual or special meeting of stockholders and may not be effected by any consent in writing

state that special meetings of our stockholders may be called only by the chairman of the board of directors, by our chief executive officer, by the board of directors after a resolution is adopted by a majority of the total number of authorized directors, or by the holders of not less than 10% of our outstanding voting stock

establish advance notice requirements for submitting nominations for election to the board of directors and for proposing matters that can be acted upon by stockholders at a meeting

provide that certain provisions of our certificate of incorporation and bylaws can be amended only by supermajority vote (a 66 2/3 % majority) of the outstanding shares. In addition, our board of directors can amend our bylaws by majority vote of the members of our board of directors

allow our directors, not our stockholders, to fill vacancies on our board of directors

provide that the authorized number of directors may be changed only by resolution of the board of directors

We are required to recognize compensation expense related to employee stock options and our employee stock purchase plan. There is no assurance the expense we are required to recognize measures accurately the value of our share-based payment awards and the recognition of this expense could cause the trading price of our common stock to decline.

We measure and recognize compensation expense for all stock-based compensation based on estimated values. Thus, our operating results contain a non-cash charge for stock-based compensation expense related to employee stock options and our employee stock purchase plan. In general, accounting guidance requires the use of an option-pricing model to determine the value of share-based payment awards. This determination of value is affected by our stock price as well as assumptions regarding a number of highly complex and subjective variables. These variables include, but are not limited to, our expected stock price volatility over the term of the awards, and actual and projected employee stock option exercise behaviors. Option-pricing models were developed for use in estimating the value of traded options that have no vesting restrictions and are fully transferable. Because our employee stock options have certain characteristics that are significantly different from traded options, and because changes in the subjective assumptions can materially affect the estimated value, in management's opinion the existing valuation models may not provide an accurate measure of the value of our employee stock options. Although the value of employee stock options is determined using an option-pricing model, that value may not be indicative of the fair value observed in a willing buyer/willing seller market transaction.

The terms of our credit facility impose operating and financial restrictions on us, which may limit our ability to respond to changing business and economic conditions.

We currently have a \$120.0 million secured revolving credit facility which is available through October 21, 2021. We are subject to various operating covenants under the credit facility which restrict our ability to, among other things, incur liens, incur additional indebtedness, make certain restricted payments, merge or consolidate and make dispositions of assets. The credit facility also requires us to comply with financial covenants limiting our total funded

debt, minimum interest coverage ratio and maximum leverage ratio. Any failure to comply with these covenants may constitute a breach under the credit facility, which could result in the acceleration of all or a substantial portion of any outstanding indebtedness and termination of revolving credit commitments under the credit facility. Our inability to maintain our credit facility could materially and adversely affect our liquidity and our business.

We may be unable to or elect not to pay our quarterly dividend payment.

The Company currently pays a regular quarterly dividend, subject to quarterly board of director approval. The payment of, or continuation of, the quarterly dividend is at the discretion of our board of directors and is dependent upon our financial condition, results of operations, capital requirements, general business conditions, tax treatment of dividends in the U.S., contractual restrictions contained in credit agreements and other agreements and other factors deemed relevant by our board of directors. We can give no assurance that dividends will be declared and paid in the future. The failure to pay the quarterly dividend, reduction of the quarterly dividend rate or the discontinuance of the quarterly dividend could adversely affect the trading price of our common stock.

Failure to comply with data privacy laws and regulations could have a materially adverse effect on our reputation, results of operations or financial condition, or have other adverse consequences.

The collection, hosting, transfer, disclosure, use, storage and security of personal information required to provide our services is subject to federal, state and foreign data privacy laws. These laws, which are not uniform, do one or more of the following: regulate the collection, transfer (including in some cases, the transfer outside the country of collection), processing, storage, use and disclosure of personal information, require notice to individuals of privacy practices; give individuals certain access and correction rights with respect to their personal information; and prevent the use or disclosure of personal information for secondary purposes such as marketing. Under certain circumstances, some of these laws require us to provide notification to affected individuals, data protection

Table of Contents

authorities and/or other regulators in the event of a data breach. In many cases, these laws apply not only to third-party transactions, but also to transfers of information among the Company and its subsidiaries. In addition, the European Union has adopted a comprehensive General Data Protection Regulation (the "GDPR") which became fully effective in May 2018. Complying with the enhanced obligations imposed by the GDPR has resulted and may continue to result in additional costs to our business and has required and may further require us to amend certain of our business practices. Further, enforcement actions and investigations by regulatory authorities related to data security incidents and privacy violations continue to increase. It is possible that future enactment of more restrictive laws, rules or regulations and/or future enforcement actions or investigations could have an adverse impact on us through increased costs or restrictions on our businesses and noncompliance could result in regulatory penalties and significant legal liability.

We may be unable to adequately protect our intellectual property rights, including our brand name. If we fail to adequately protect our intellectual property rights, the value of such rights may diminish and our results of operations and financial condition may be adversely affected.

We believe establishing, maintaining and enhancing the RGP and Resources Global Professionals brand name is important to our business. We have applied for registration in the U.S. and some foreign jurisdictions with respect to certain service marks. We own U.S. trademark registrations for our RGP service mark and puzzle piece logo, Reg. No. 4,649.837; our RGP service mark, puzzle piece and tag line, Reg. No. 4,649.838; our RGP Healthcare service mark and puzzle piece logo, Reg. No. 4,649.839; our RGP Legal service mark and puzzle piece logo, Reg. No. 4,649.840; our RGP Search service mark and puzzle piece logo, Reg. No. 4,649.841; the ACCRETIVE and ACCRETIVE SOLUTIONS trademarks (Reg. No. 2,747,885 and 2,798,340) and our COUNTSY word and design mark registrations in the United States (Reg. Nos. 5,487,577, 5,487,743 and 5,493,357). We also obtained a U.S. registration for the Resources Global Professionals mark, Registration No. 3,298,841 September 25, 2007, and this trademark registration was renewed in 2018.

Our rights to the above service marks are currently protected in most of the foreign jurisdictions we are doing business in, with a couple of marks still pending in Canada (RGP and Design) and India (CONSULTING FROM THE INSIDE OUT). However, not all of our trademarks were able to successfully register in all of the desired countries. Accordingly, if another party adopts or uses a name, service mark or trademark similar to ours, they could make infringement claims against us or could thereby impede our ability to build brand identity if they have prior rights in those countries. We cannot assure you our business would not be adversely affected if such a claim was made or if we were required to change our name.

Table of Contents**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.**

The following table provides information about purchases by the Company of its common stock during the three months ended February 23, 2019.

Period		Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Announced Programs (1)	Approximate Dollar Value of Shares that May Yet be Purchased Under Announced Program
November 25, 2018	December 22, 2018		\$		\$ 106,985,857
December 23, 2018	January 19, 2019	67,973	\$ 16.22	67,973	\$ 105,883,278
January 20, 2019	February 23, 2019	490,782	\$ 16.60	490,782	\$ 97,736,690
Total November 25, 2018	February 23, 2019	558,755	\$ 16.55	558,755	\$ 97,736,690

- (1) In July 2015, our board of directors approved a stock repurchase program authorizing the purchase, at the discretion of the Company's senior executives, of our common stock for an aggregate dollar limit not to exceed \$150 million. Subject to the aggregate dollar limit, the currently authorized stock repurchase program does not have an expiration date. Repurchases under the program may take place in the open market or in privately negotiated transactions and may be made pursuant to a Rule 10b5-1 plan.

ITEM 5. OTHER INFORMATION.

In a Current Report on Form 8-K filed by the Company on April 3, 2019, the Company announced that Timothy Brackney, age 47, has been appointed to the newly-created position of President and Chief Operating Officer, effective immediately. Mr. Brackney will report to the Company's Chief Executive Officer. As Chief Operating Officer, Mr. Brackney is responsible for the oversight and control over the diverse, global business operations, go-to-market strategies and designing organizational vision and ensuring operational excellence across the Company. In addition, the Company finalized the retirement date of John Bower, Senior Vice President and Chief Accounting Officer, to be effective April 22, 2019. Mr. Bower will act as an Executive Advisor to the Company through May 18, 2019 and will continue to serve the Company in a consulting role over the next 24 months, as requested by the Chief Financial Officer. Effective upon Mr. Bower's retirement on April 22, 2019, Herbert M. Mueller, the Company's Executive Vice President and Chief Financial Officer, will assume the responsibilities of the Company's principal accounting officer.

ITEM 6. EXHIBITS.
