Form 10-Q
February 06, 2013

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
FORM 10-Q

QUARTERLY REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the Quarterly Period ended December 31, 2012

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
Commission file number: 000-51201
BofI HOLDING, INC.
(Exact name of registrant as specified in its charter)

Delaware 33-0867444
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

4350 La Jolla Village Drive, Suite 140, San Diego, CA 92122
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (858) 350-6200

Indicate by check mark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website every Interactive Data file required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Securities Exchange Act of 1934.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Securities Exchange Act of 1934). Yes No

The number of shares outstanding of the Registrant's common stock on the last practicable date: 12,827,710 shares of common stock, \$0.01 par value per share, as of February 1, 2013.

BOFI HOLDING, INC. AND SUBSIDIARY
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE AND SIX MONTH PERIODS ENDED DECEMBER 31, 2012 AND 2011
(Dollars in thousands, except per share data)
(Unaudited)

1. BASIS OF PRESENTATION

The condensed consolidated financial statements include the accounts of BofI Holding, Inc. and its wholly owned subsidiary, BofI Federal Bank (formerly Bank of Internet USA, the “Bank” and collectively with BofI Holding, Inc., the “Company”). All significant intercompany balances have been eliminated in consolidation.

The accompanying interim condensed consolidated financial statements, presented in accordance with accounting principles generally accepted in the United States of America (“GAAP”), are unaudited and reflect all adjustments which, in the opinion of management, are necessary for a fair statement of financial condition and results of operations for the interim periods. All adjustments are of a normal and recurring nature. Results for the three and six months ended December 31, 2012 are not necessarily indicative of results that may be expected for any other interim period or for the year as a whole. Certain information and note disclosures normally included in the audited annual financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”) with respect to interim financial reporting. The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and accompanying notes for the year ended June 30, 2012 included in our Annual Report on Form 10-K.

Certain reclassifications have been made to the prior-period financial statements to conform to the current period presentation.

2. SIGNIFICANT ACCOUNTING POLICIES

Securities. Debt securities are classified as held-to-maturity and carried at amortized cost when management has both the positive intent and ability to hold them to maturity. Debt securities are classified as available-for-sale when they might be sold before maturity. Trading securities refer to certain types of assets that banks hold for resale at a profit or when the Company elects to account for certain securities at fair value. Increases or decreases in the fair value of trading securities are recognized in earnings as they occur. Securities available-for-sale are carried at fair value, with unrealized holding gains and losses reported in other comprehensive income, net of tax.

Gains and losses on securities sales are based on a comparison of sales proceeds and the amortized cost of the security sold using the specific identification method. Purchases and sales are recognized on the trade date. Interest income includes amortization of purchase premium or discount. Premiums and discounts on securities are amortized or accreted using the level-yield method without anticipating prepayments, except for mortgage-backed securities where prepayments are anticipated. The Company’s portfolios of held-to-maturity and available-for-sale securities are reviewed quarterly for other than temporary impairment. In performing this review, management considers (1) the length of time and extent that fair value has been less than cost, (2) the financial condition and near term prospects of the issuer, (3) the impact of changes in market interest rates on the market value of the security and (4) how to record an impairment by assessing whether the Company intends to sell or it is more likely than not that it will be required to sell a security in an unrealized loss position before the Company recovers the security’s amortized cost. If either of these criteria for (4) is met, the entire difference between amortized cost and fair value is recognized in earnings. Alternatively, if the criteria for (4) is not met, the amount of impairment recognized in earnings is limited to the amount related to credit losses, while impairment related to other factors is recognized in other comprehensive income. The credit loss is defined as the difference between the present value of the cash flows expected to be collected and the amortized cost basis.

Loans. Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at the principal balance outstanding, net of unearned interest, deferred purchase premiums and discounts, deferred loan origination fees and costs, and an allowance for loan losses. Interest income is accrued on the unpaid principal balance. Premiums and discounts on loans purchased as well as loan origination fees, net of certain direct origination costs, are deferred and recognized in interest income using the level-yield method.

Recognition of interest income on all portfolio segments is generally discontinued at the time the loan is 90 days delinquent unless the loan is well secured and in process of collection. Past due status is based on the contractual terms of the loan. In all cases, loans are placed on nonaccrual or charged-off at an earlier date if collection of principal or interest is considered doubtful.

Table of Contents

All interest accrued but not received for loans placed on nonaccrual, is reversed against interest income. Interest received on such loans is accounted for on the cash-basis or cost recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Loans Held for Sale. Agency loans originated and intended for sale in the secondary market are carried at fair value. Net unrealized gains and losses are recognized through the income statement. The Bank generally sells its loans with the servicing released to the buyer. Gains and losses on loan sales are recorded as mortgage banking income, based on the difference between sales proceeds and carrying value. Non-agency loans held for sale as of December 31, 2012 were carried at the lower of cost or fair value.

Loans that were originated with the intent and ability to hold for the foreseeable future (loans held in portfolio) but which have been subsequently designated as being held for sale for risk management or liquidity needs are carried at the lower of cost or fair value calculated on an individual loan by loan basis.

There may be times when loans have been classified as held for sale and for some reason cannot be sold. Loans transferred to a long-term-investment classification from held-for-sale are transferred at the lower of cost or market value on the transfer date. Any difference between the carrying amount of the loan and its outstanding principal balance is recognized as an adjustment to yield by the interest method. A loan cannot be classified as a long-term investment unless the Bank has both the ability and the intent to hold the loan for the foreseeable future or until maturity. During the six months ended December 31, 2012 the Company transferred from loans held for sale to loans held for investment \$42,755 with no adjustments to the principal balance as part of ordinary cleanup of loans held for sale.

Allowance for Loan Losses. The allowance for loan losses is maintained at a level estimated to provide for probable incurred losses in the loan portfolio. Management determines the adequacy of the allowance based on reviews of individual loans and pools of loans, recent loss experience, current economic conditions, the risk characteristics of the various categories of loans and other pertinent factors. This evaluation is inherently subjective and requires estimates that are susceptible to significant revision as more information becomes available. The allowance is increased by the provision for loan losses, which is charged against current period operating results and recoveries of loans previously charged-off. The allowance is decreased by the amount of charge-offs of loans deemed uncollectible. Allocations of the allowance may be made for specific loans but the entire allowance is available for any loan that, in management's judgment, should be charged off.

The allowance for loan losses includes specific and general reserves. Specific reserves are provided for impaired loans considered Troubled Debt Restructurings ("TDRs"). All other impaired loans are written down through charge-offs to the fair value of collateral, less estimated selling cost, and no specific or general reserve is provided. A loan is impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. Loans for which terms have been modified resulting in a concession and for which the borrower is experiencing financial difficulties are considered TDRs and classified as impaired. A loan is measured for impairment generally two different ways. If the loan is primarily dependent upon the borrower to make payments, then impairment is calculated by comparing the present value of the expected future payments discounted at the effective loan rate to the carrying value of the loan. If the loan is collateral dependent, the net proceeds from the sale of the collateral is compared to the carrying value of the loan. If the calculated amount is less than the carrying value of the loan, the loan has impairment.

A general reserve is included in the allowance for loan losses and is determined by adding the results of a quantitative and a qualitative analysis to all other loans not measured for impairment at the reporting date. The quantitative analysis determines the Bank's actual annual historic charge-off rates for the previous three fiscal years and applies the average historic rates to the outstanding loan balances in each pool, the product of which is the general reserve amount. The qualitative analysis considers one or more of the following factors: changes in lending policies and

procedures, changes in economic conditions, changes in the content of the portfolio, changes in lending management, changes in the volume of delinquency rates, changes to the scope of the loan review system, changes in the underlying collateral of the loans, changes in credit concentrations and any changes in the requirements to the credit loss calculations. A loss rate is estimated and applied to those loans affected by the qualitative factors. The following portfolio segments have been identified: single family, home equity, multi-family, single family warehouse lines, commercial real estate, recreational vehicles, autos, commercial secured and other.

For the Company's single family, commercial and multifamily loans, the allowance methodology takes into consideration the risk that the original borrower information may have adversely changed in two ways. First, in calculating the quantitative factor for the Company's general loan loss allowance, the actual loss experience is tracked and stratified by original LTV and year of

Table of Contents

origination. As a result, the Company uses relatively higher loss rates across the LTV bands for loans originated and purchased in years 2005 through 2008 compared to the same LTV ranges for loans originated before 2005 or after 2008. Second, the Company uses a number of qualitative factors to reflect additional risk. One qualitative loss factor is real estate valuation risk which is applied to each LTV band primarily based upon the year the real estate loan was originated or purchased. Based upon price appreciation indices, multifamily property values in years 2005 through 2008 experienced significant declines. As a result, the Company applies a relatively higher qualitative loss factor rate across the LTV bands for loans originated and purchased in years 2005 through 2008 compared to the same LTV ranges for loans originated or purchased before 2005 or after 2008.

For the Company's home equity loans, the allowance methodology takes into consideration the risk that the original borrower information may have adversely changed in two ways. First, in calculating the quantitative factor for the Company's general loan loss allowance, the actual loss experience is tracked and stratified by original combined LTV of the 1st and 2nd liens. As a result, the Company allocates higher loss rates in proportion to the greater of the LTV. Second, the Company uses a number of qualitative factors to reflect additional risk. The Company does not have any individual purchased home equity loans in its portfolio and given the limited time frame under which the Company originated home equity loans, 2006-2009, no additional risk allocation is used.

For the Company's single family - warehouse lines, the allowance methodology takes into consideration the structure of these loans, as they remain in the portfolio for a short period (usually less than a month) and have higher credit protection allocated compared to traditional single family originations. A matrix was created to reflect most current operating levels of capital and line usage, which calculates a loss rating to assign to each originator. The Company will continue to monitor these loans and the allocated allowance as more historical information is obtained.

For the Company's C&I - leveraged loans, the allowance methodology takes into consideration that these loans have a limited term and incur increased underwriting and monitoring and they are supported through riskier collateral than more traditional real estate collateral backed loans. The Company incorporated a loan level grading system to base its projected loss rates, a matrix was created with a base loss rate with additional potential industry and volume risk adjustments, to calculate a loss rating for each deal. Given the lack of historical loss experience for this segment at the Company, an allowance loss range is based upon historical peer loss rates

For the Company's RV / auto loan portfolio, the allowance methodology takes into consideration potential adverse changes to the borrower's financial condition since time of origination. The general loan loss reserves for RV / auto are stratified based upon borrower FICO scores. First, to account for potential deterioration of borrower's credit history, since time of origination, due to downturn in the economy or other factors, the Company refreshes the FICO scores used to drive the allowance on a semi-annual basis. The Company believes that current borrower credit history is a better predictor of potential loss, than that was used at time of origination. Second, the Company uses a number of qualitative factors to reflect additional risk.

General loan loss reserves are calculated by grouping each loan by collateral type and by grouping the loan-to-value ratios of each loan within the collateral type. An estimated allowance rate for each loan-to-value group within each type of loan is multiplied by the total principal amount in the group to calculate the required general reserve attributable to that group. Management uses an allowance rate that provides a larger loss allowance for loans with greater loan-to-value ratios. General loan loss reserves for consumer loans are calculated by grouping each loan by credit score (e.g. FICO) at origination and applying an estimated allowance rate to each group. In addition to credit score grading, general loan loss reserves are increased for all consumer loans determined to be 90 days or more past due. Specific reserves or direct charge-offs are calculated when an internal asset review of a loan identifies a significant adverse change in the financial position of the borrower or the value of the collateral. The specific reserve or direct charge-off is based on discounted cash flows, observable market prices or the estimated value of underlying collateral. Specific loan charge-offs on impaired loans are recorded as a write-off and a decrease to the allowance in the period the impairment is identified. A loan is classified as a TDR when management determines that an existing

borrower is in financial distress and the borrower's loan terms are modified to provide the borrower a financial concession (e.g. lower payment) that would not otherwise be provided by another lender based upon borrower's current financial condition. TDRs are separately identified for impairment disclosures and are measured at the present value of estimated future cash flows using the loan's effective rate at inception. If a troubled debt restructuring is considered to be a collateral dependent loan, the loan is reported, net, at the fair value of the collateral. For troubled debt restructurings that subsequently default, the Company determines the amount of reserve in accordance with the accounting policy for the allowance for loan losses.

If the present value of estimated cash flows under the modified terms of a TDR discounted at the original loan effective rate is less than the book value of the loan before the TDR, the excess is specifically allocated for loss in the allowance for loan losses.

Table of Contents

3. FAIR VALUE

Fair value is defined as the price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC Topic 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Quoted prices in active markets for identical assets or liabilities in active markets that the entity has the ability Level to access as of the measurement date. Level 1 assets and liabilities include debt and equity securities that are 1: actively traded in an exchange or over-the-counter market and are highly liquid, such as, among other assets and securities, certain U.S. treasury and other U.S Government and agency mortgage-backed debt.

Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market Level data for substantially the full term of the assets or liabilities. Level 2 assets include securities with quoted prices 2: that are traded less frequently than exchange-traded instruments and whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data.

Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of Level the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined 3: using pricing models such as discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

When available, the Company generally uses quoted market prices to determine fair value, in which case the items are classified in Level 1. In some cases where a market price is available, the Company will make use of acceptable practical expedients (such as matrix pricing) to calculate fair value, in which case the items are classified in Level 2.

The Company considers relevant and observable market prices in its valuations where possible. The frequency of transactions, the size of the bid-ask spread and the nature of the participants are some of the factors the Company uses to help determine whether a market is active and orderly or inactive and not orderly. Price quotes based upon transactions that are not orderly are not considered to be determinative of fair value and should be given little, if any, weight in measuring fair value.

If quoted market prices are not available, fair value is based upon internally developed valuation techniques that use, where possible, current market-based or independently sourced market parameters, such as interest rates, credit spreads, housing value forecasts, etc. Items valued using such internally generated valuation techniques are classified according to the lowest level input or value driver that is significant to the valuation. Thus, an item may be classified in Level 3 even though there may be some significant inputs that are readily observable.

The following section describes the valuation methodologies used by the Company to measure various financial instruments at fair value, including an indication of the level in the fair-value hierarchy in which each instrument is generally classified:

Securities—trading. Trading securities are recorded at fair value. The trading portfolio consists of two different issues of floating-rate debt securities collateralized by pools of bank trust preferred securities. Recent liquidity and economic uncertainty have made the market for collateralized debt obligations less active or inactive. As quoted market prices are not available, the Level 3 fair values for these securities are determined by the Company utilizing industry-standard tools to calculate the net present value of the expected cash flows available to the securities from the underlying assets. The Company's expected cash flows are calculated for each security and include the impact of actual and forecasted bank defaults within each collateral pool as well as structural features of the security's tranche such as lock outs, subordination and overcollateralization. The forecast of underlying bank defaults in each pool is based upon a quarterly financial update including the trend in non-performing assets, the allowance for loan losses and the underlying bank's capital ratios. Also a factor is the Company's loan loss experience in the local economy in which the

bank operates. At December 31, 2012, the Company's forecast of cash flows for both securities includes actual and forecasted defaults totaling 29.70% of all banks in the collateral pools, compared to 13.9% of the banks actually in default. The expected cash flows reflect the Company's best estimate of all pool losses which are then applied to the overcollateralization reserve and the subordinated tranches to determine the cash flows. The Company selects a discount rate margin based upon the spread between U.S. Treasury rates and the market rates for active credit grades for financial companies. The discount margin when added to the U.S. Treasury rate determines the discount rate, reflecting primarily market liquidity and interest rate risk since expected credit loss is included in the cash flows. At December 31, 2012, the Company used a weighted average discount margin of 450 basis points above U.S. Treasury rates to calculate the net present value of the expected cash flows and the fair value of its trading securities.

Table of Contents

The Level 3 fair values determined by the Company for its trading securities rely heavily on management's assumptions as to the future credit performance of the collateral banks, the impact of the global and regional recession, the timing of forecasted defaults and the discount rate applied to cash flows. The fair value of the trading securities at December 31, 2012 is sensitive to an increase or decrease in the discount rate. An increase in the discount margin of 100 basis points would have reduced the total fair value of the trading securities and decreased net income before income tax by \$786. A decrease in the discount margin of 100 basis points would have increased the total fair value of the trading securities and increased net income before income tax by \$929.

Securities—available-for-sale and held-to-maturity. Available-for-sale securities are recorded at fair value and consist of residential mortgage-backed securities (RMBS) and debt securities issued by U.S. agencies, RMBS issued by non-agencies, collateralized loan obligations, and municipals. Held-to-maturity securities are recorded at amortized cost and consist of RMBS issued by U.S. agencies, RMBS issued by non-agencies, and municipals. Fair value for U.S. agency securities is generally based on quoted market prices of similar securities used to form a dealer quote or a pricing matrix. There continues to be significant illiquidity in the market for RMBS issued by non-agencies, impacting the availability and reliability of transparent pricing. As orderly quoted market prices are not available, the Level 3 fair values for these securities are determined by the Company utilizing industry-standard tools to calculate the net present value of the expected cash flows available to the securities from the underlying mortgage assets. The Company computes Level 3 fair values for each non-agency RMBS in the same manner (as described below) whether available-for-sale or held-to-maturity.

To determine the performance of the underlying mortgage loan pools, the Company estimates prepayments, defaults, and loss severities based on a number of macroeconomic factors, including housing price changes, unemployment rates, interest rates and borrower attributes such as credit score and loan documentation at the time of origination. The Company inputs for each security a projection of monthly default rates, loss severity rates and voluntary prepayment rates for the underlying mortgages for the remaining life of the security to determine the expected cash flows. The projections of default rates are derived by the Company from the historic default rate observed in the pool of loans collateralizing the security, increased by and decreased by the forecasted increase or decrease in the national unemployment rate. The projections of loss severity rates are derived by the Company from the historic loss severity rate observed in the pool of loans, increased by (and decreased by) the forecasted decrease or increase in the national home price appreciation (HPA) index. The largest factor influencing the Company's modeling of the monthly default rate is unemployment. The most updated national unemployment rate announced prior to the end of the period covered by this report (reported in December 2012) was 7.8%, down from the high of 10% in October 2009.

Consensus estimates for unemployment are that the rate will continue to decline. Going forward, the Company is projecting lower monthly default rates. The range of loss severity rates applied to each default used in the Company's projections at December 31, 2012 are from 1.6% up to 79.0% based upon individual bond historical performance. The default rates and the severities are projected for every non-agency RMBS security held by the Company and will vary monthly based upon the actual performance of the security and the macroeconomic factors discussed above.

To determine the discount rates used to compute the present value of the expected cash flows for these non-agency RMBS securities, the Company separates the securities by the borrower characteristics in the underlying pool. Specifically, "prime" securities generally have borrowers with higher FICO scores and better documentation of income. "Alt-A" securities generally have borrowers with a little lower FICO and a little less documentation of income. "Pay-option ARMs" are Alt-A securities with borrowers that tend to pay the least amount of principal (or increase their loan balance through negative amortization). The Company calculates separate discount rates for prime, Alt-A and Pay-option ARM non-agency RMBS securities using market-participant assumptions for risk, capital and return on equity. The range of annual default rates used in the Company's projections at December 31, 2012 are from 1.2% up to 31.3% with prime securities tending toward the lower end of the range and Alt-A and Pay-option ARMs tending toward the higher end of the range. The Company applies its discount rates to the projected monthly cash flows which already reflect the full impact of all forecasted losses using the assumptions described above. When calculating present value of the expected cash flows at December 31, 2012, the Company computed its discount rates as a spread between 244 and 747 basis points over the LIBOR Index using the LIBOR forward curve with prime securities tending toward the lower end of the range and Alt-A and Pay-option ARMs tending toward the higher end of the

range.

Loans Held for Sale. Loans held for sale at fair value are primarily single-family and multifamily residential loans. The fair value of loans held for sale is determined, by pricing for comparable assets or by existing forward sales commitment prices with investors.

Impaired Loans. Impaired loans are loans which are inadequately protected by the current net worth and paying capacity of the borrowers or of the collateral pledged and the accrual of interest income has been discontinued. The impaired loans are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. The Bank assesses loans individually and identifies impairment when the loan is classified as impaired or been restructured or management has serious doubts about the future collectibility of principal and interest, even though the loans may currently be performing. The fair value of an impaired loan is determined based on an observable market price or current appraised value of the underlying collateral. The fair value of impaired loans with specific write-offs or allocations of the allowance for loan losses are generally based on recent

10

Table of Contents

real estate appraisals or other third-party valuations and analysis of cash flows. These appraisals and analysis may utilize a single valuation approach or a combination of approaches including comparable sales and income approaches. Adjustments are routinely made in the process by the appraisers to adjust for differences between the comparable sales and income data available. These adjustments to the estimated fair value of non-performing loans may result in increases or decreases to the provision for loan losses recorded in current earnings. Such adjustments are typically significant and result in a Level 3 classification for the inputs for determining fair value.

Other Real Estate Owned. Nonrecurring adjustments to certain commercial and residential real estate properties classified as other real estate owned (OREO) are measured at the lower of carrying amount or fair value, less costs to sell. Fair values are generally based on third party appraisals of the property, resulting in a Level 3 classification. In cases where the carrying amount exceeds the fair value, less costs to sell, an impairment loss is recognized.

Mortgage Banking Derivatives. Level 3 fair values for mortgage banking derivatives are either based upon prices in active secondary markets for identical securities or based on quoted market prices of similar assets used to form a dealer quote or a pricing matrix. If no such quoted price exists, the fair value of a commitment is determined by quoted prices for a similar commitment or commitments, adjusted for the specific attributes of each commitment. These fair values are then adjusted for items such as fallout and estimated costs to originate the loan.

The Company's valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Company's valuation methodologies are appropriate and consistent with or, in some cases, more conservative than other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the relevant reporting date.

Table of Contents

The following table sets forth the Company's financial assets and liabilities measured at fair value on a recurring basis at December 31, 2012 and June 30, 2012. Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement:

(Dollars in thousands)	December 31, 2012			Total

Table of Contents

The Table below summarizes the quantitative information about level 3 fair value measurements at the periods indicated:

		December 31, 2012		
(Dollars in thousands)	Fair Value	Valuation Technique(s)	Unobservable Input	Range (Weighted Average)
Securities - Trading	\$6,735	Discounted Cash Flow	Total Projected Defaults, Discount Rate over Treasury	27.7 to 31.4% (29.5%) 4.50 to 4.50% (4.50%)
Securities - Non agency MBS	\$69,883	Discounted Cash Flow	Constant Prepayment Rate, Constant Default Rate, Loss Severity, Discount Rate over LIBOR	2.5 to 52.4% (15.6%) 1.2 to 31.3% (11.6%) 1.6 to 79.0% (59.7%) 2.4 to 7.5% (4.7%)
Derivative Instruments, net	\$1,464	Sales Comparison Approach	Projected Sales Profit of Underlying Loans, Fallout	0.5 to 1.5% 72.0 to 81.0%
		June 30, 2012		
(Dollars in thousands)	Fair Value	Valuation Technique(s)	Unobservable Input	Range (Weighted Average)
Securities - Trading	\$5,838	Discounted Cash Flow	Total Projected Defaults, Discount Rate over Treasury	28.5 to 40.4% (34.5%) 4.50 to 4.50% (4.50%)
Securities - Non agency MBS	\$83,127	Discounted Cash Flow	Constant Prepayment Rate, Constant Default Rate, Loss Severity, Discount Rate over LIBOR	2.5 to 34.5% (17.4%) 1.5 to 31.6% (14.1%) 1.6 to 82.2% (56.8%) 2.2 to 7.6% (4.6%)
Derivative Instruments, net	\$1,585	Sales Comparison Approach	Projected Sales Profit of Underlying Loans, Fallout	0.5 to 1.5% 73.0 to 82.0%

The significant unobservable inputs used in the fair value measurement of the Company's residential mortgage-backed securities are prepayment rates, probability of default, and loss severity in the event of default. Significant increases (decreases) in any of those inputs in isolation would result in a significantly lower (higher) fair value measurement. Generally, a change in the assumption used for the probability of default is accompanied by a directionally similar change in the assumption used for the loss severity and a directionally opposite change in the assumption used for prepayment rates.

The Table below summarizes changes in unrealized gains and losses and interest income recorded in earnings for level 3 trading assets and liabilities that are still held at the periods indicated:

Impaired loans measured for impairment on a non-recurring basis using the fair value of the collateral for collateral-dependent loans have a carrying amount of \$13,936, net of \$575 of specific allowance allocations after a charge-off of \$415, for the three months ended December 31, 2012 and charge-offs of \$1,589 for the six months ended December 31, 2012, and life to date charge-offs of \$4,073. Impaired loans had a related allowance of \$575 at December 31, 2012, contributing to an additional provision for loan losses of \$1,950 for the three month period ended December 31, 2012 and \$4,500 for the six month period ended December 31, 2012.

Other real estate owned and foreclosed assets, which are measured at the lower of carrying value or fair value less costs to sell, had a net carrying amount of \$1,685 after charge-offs of \$10 for the three month period ended December 31, 2012 and \$42 for the six month period ended December 31, 2012. Our other real estate owned and foreclosed assets had a net carrying amount of \$1,011 after charge-offs of \$168 during the year ended June 30, 2012.

Table of Contents

Held-to-maturity securities measured for impairment on a non-recurring basis had a fair value of \$110,747 and a carrying amount of \$108,057 at December 31, 2012, after net impairment charge to income of \$820 and \$1,694 and changes to other comprehensive loss of \$2,053 and \$4,051 during the three and six months ended December 31, 2012, respectively. The Company recognized a net impairment charge to income of \$715 and \$1,312 and changes in other comprehensive loss of zero and \$120 for the three and six month periods ended December 31, 2011, respectively. These held-to-maturity securities are valued using Level 3 inputs.

The Company has elected the fair value option for Agency loans held for sale. These loans are intended for sale and the Company believes that the fair value is the best indicator of the resolution of these loans. Interest income is recorded based on the contractual terms of the loan and in accordance with the Company's policy on loans held for investment. None of these loans are 90 days or more past due nor on nonaccrual as of December 31, 2012 and June 30, 2012 .

As of December 31, 2012 and June 30, 2012, the aggregate fair value, contractual balance (including accrued interest), and gain was as follows:

(Dollars in thousands)	December 31, 2012	June 30, 2012
Aggregate fair value	\$57,498	\$38,469
Contractual balance	55,748	37,567
Gain	\$ 1,750	\$902

The total amount of gains and losses from changes in fair value included in earnings for the period indicated below for loans held for sale were:

(Dollars in thousands)	For the Three Months Ended		For the Six Months Ended	
	December 31, 2012	2011	December 31, 2012	2011
Interest income	\$363	\$509	\$794	\$749
Change in fair value	185	(306) 740	841
Total Change in fair value	\$548	\$203	\$1,534	\$1,590

Table of Contents

The following table presents quantitative information about level 3 fair value measurements for financial instruments measured at fair value on a non-recurring basis at the periods indicated:

December 31, 2012

(Dollars in thousands)	Fair Value	Valuation Technique(s)	Unobservable Input	Range (Weighted Average)

Table of Contents

The methods and assumptions, not previously presented, used to estimate fair value are described as follows:

Carrying amount is the estimated fair value for cash and cash equivalents, interest bearing deposits, accrued interest receivable and payable, demand deposits, short-term debt, and variable rate loans or deposits that reprice frequently and fully. For fixed rate loans, deposits, borrowings or subordinated debt and for variable rate loans, deposits, borrowings or subordinated debt with infrequent repricing or repricing limits, fair value is based on discounted cash flows using current market rates applied to the estimated life and credit risk. A discussion of the methods of valuing trading securities, available for sale securities and loans held for sale can be found earlier in this footnote. It was not practicable to determine the fair value of FHLB stock due to restrictions placed on its transferability. The fair value of off-balance sheet items is not considered material.

2. Private sponsors of securities collateralized primarily by pools of 1-4 family residential first mortgages . Primarily supersenior securities secured by prime, Alt-A or pay-option ARM mortgages.

The Company's non-agency RMBS available-for-sale portfolio with a total fair value of \$69,883 at December 31, 2012 consists of twenty-five different issues of super senior securities with a fair value of \$42,619; two senior structured whole loan securities with a fair value of \$27,219 and three mezzanine z-tranche securities with a fair value of \$45 collateralized by seasoned prime and Alt-A first-lien mortgages. The Company acquired its mezzanine z-tranche securities in fiscal 2009 and accounts for them by measuring the excess of cash flows expected at acquisition over the purchase price (accretable yield) and recognizes interest income over the remaining life of the security.

The non-agency RMBS held-to-maturity portfolio with a carrying value of \$192,026 at December 31, 2012 consists of eighty-one different issues of super senior securities totaling \$188,428 and one senior-support security with a carrying value of \$3,598. Debt securities with evidence of credit quality deterioration since issuance and for which it is probable at purchase that the Company will be unable to collect all of the par value of the security are accounted for under ASC Topic 310, Accounting for Certain Loans or Debt Securities Acquired in a Transfer (ASC Topic 310). Under ASC Topic 310, the excess of cash flows expected at acquisition over the purchase price is referred to as the accretable yield and is recognized in interest income over the remaining life of the security. The Company has one

Table of Contents

senior support security that it acquired at a significant discount that evidenced credit deterioration at acquisition and is accounted for under ASC Topic 310. For a cost of \$17,740 the Company acquired the senior support security with a contractual par value of \$30,560 and accretable and non-accretable discounts that were projected to be \$9,015 and \$3,805, respectively. Since acquisition, repayments from the security have been received more rapidly than projected at acquisition, but expected total payments have declined, resulting in a determination that the security was other than temporarily impaired although not credit related and therefore no expenses recorded for the fiscal 2012 and for the six months ended December 31, 2012. At December 31, 2012 the security had a remaining contractual par value of zero and amortizable and non-amortizable premium are currently projected to be zero and \$3,724, respectively.

The current face amounts of debt securities available-for-sale and held-to-maturity that were pledged to secure borrowings at December 31, 2012 and June 30, 2012 were \$229,066 and \$215,199 respectively.

The securities with unrealized losses, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position were as follows:

	December 31, 2012

Table of Contents

There were 13 securities that were in a continuous loss position at December 31, 2012 for a period of more than 12 months. There were 10 securities that were in a continuous loss position at June 30, 2012 for a period of more than 12 months. The following table summarizes amounts of credit loss recognized in the income statement through other than temporary impairment charges which reduced non-interest income:

(Dollars in thousands)	For the Three Months Ended		For the Six Months Ended	
	December 31,		December 31,	
	2012	2011	2012	2011
Beginning balance	\$(12,709) \$(9,630) \$(11,835) \$(9,033
Additions for the amounts related to credit loss for which an other than temporary impairment was not previously recognized	(295) (112) (295) (169
Increases to the amount related to the credit loss for which other than temporary impairment was previously recognized	(525) (603) (1,399) (1,143
Ending balance	\$(13,529) \$(10,345) \$(13,529) \$(10,345

At December 31, 2012, 47 non-agency RMBS with a total carrying amount of \$111,992 were determined to have cumulative credit losses of \$13,529 of which \$820 was recognized in earnings during the three months ended December 31, 2012 and \$1,694 was recognized in earnings for the six months period ended December 31, 2012. This quarter's other than temporary impairment of \$820 is related to 6 non-agency RMBS with a total carrying amount of \$22,022. The Company measures its non-agency RMBS in an unrecognized loss position at the end of the reporting period for other than temporary impairment by comparing the present value of the cash flows currently expected to be collected from the security with its amortized cost basis. If the calculated present value is lower than the amortized cost, the difference is the credit component of an other than temporary impairment of its debt securities. The excess of present value over the fair value of the security (if any) is the noncredit component only if the Company does not intend to sell the security and will not be required to sell the security before recovery of its amortized cost basis. The credit component of the other than temporary impairment is recorded as a loss in earnings and the noncredit component as a charge to other comprehensive income, net of the related income tax benefit.

To determine the cash flow expected to be collected and to calculate the present value for purposes of testing for other-than-temporary impairment, the Company utilizes the same industry-standard tool and the same cash flows as those calculated for Level 3 fair values as discussed in footnote 3. The Company computes cash flows based upon the cash flows from underlying mortgage loan pools. The Company estimates prepayments, defaults, and loss severities based on a number of macroeconomic factors, including housing price changes, unemployment rates, interest rates and borrower attributes such as credit score and loan documentation at the time of origination. The Company inputs for each security a projection of monthly default rates, loss severity rates and voluntary prepayment rates for the underlying mortgages for the remaining life of the security to determine the expected cash flows. The projections of default rates are derived by the Company from the historic default rate observed in the pool of loans collateralizing the security, increased by (or decreased by) the forecasted increase or decrease in the national unemployment rate. The projections of loss severity rates are derived by the Company from the historic loss severity rate observed in the pool of loans, increased by (or decreased by) the forecasted increase or decrease in the national home price appreciation (HPA) index. The largest factor influencing the Company's modeling of the monthly default rate is unemployment. The most updated unemployment rate announced prior to the end of the period covered by this report (reported in December 2012) was 7.8%, down from the high of 10% in October 2009. Consensus estimates for unemployment are that the rate will continue to decline. The discount rates used to compute the present value of the expected cash flows for purposes of testing for the credit component of the other than temporary impairment are either the implicit rate calculated in each of the Company's securities at acquisition or the last accounting yield. The Company calculates the implicit rate at acquisition based on the contractual terms of the security, considering scheduled payments (and minimum payments in the case of pay-option ARMs) without prepayment assumptions. Once the discount rate (or

discount margin in the case of floating rate securities) is calculated as described above, the discount is used in the industry-standard model to calculate the present value of the cash flows.

There were no sales of securities during the six month periods ended December 31, 2012 and 2011.

Table of Contents

The Company had recorded unrealized gains and unrealized losses in accumulated other comprehensive loss as follows:

(Dollars in thousands)	December 31, 2012	June 30, 2012
Available-for-sale debt securities—net unrealized gains	\$ 8,917	\$8,722
Held-to-maturity debt securities—non credit related	(21,487)	(17,784)

5. LOANS & ALLOWANCE FOR LOAN LOSSES

The following table sets forth the composition of the loan portfolio as of the dates indicated:

(Dollars in thousands)	December 31, 2012	June 30, 2012
Mortgage loans on real estate:		
Residential single family (one to four units) ¹	\$1,215,744	\$863,624
Home equity	25,742	29,167
Residential multifamily (five units or more)	766,247	687,661
Commercial real estate	28,681	35,174
Consumer—Recreational vehicle and auto	21,494	24,324
Commercial secured and other	128,267	100,549
Total gross loans	2,186,175	1,740,499
Allowance for loan losses	(11,449) (9,636
Unaccreted discounts and loan fees	(19,420) (10,300
Net loans	\$2,155,306	\$1,720,563

¹ The balance of single family warehouse was \$158,556 at December 31, 2012 and \$6,194 at June 30, 2012.

Allowance for Loan Losses. The Company's goal is to maintain the allowance for loan losses (sometimes referred to as the allowance) at a level that is considered to be commensurate with estimated probable incurred credit losses in the portfolio. Although the adequacy of the allowance is reviewed quarterly, management performs an ongoing assessment of the risks inherent in the portfolio. While the Company believes that the allowance for loan losses is adequate at December 31, 2012, future additions to the allowance will be subject to continuing evaluation of estimated and known, as well as inherent, risks in the loan portfolio.

Allowance for Credit Loss Disclosures—The assessment of the adequacy of the Company's allowance for loan losses is based upon a number of quantitative and qualitative factors, including levels and trends of past due and nonaccrual loans, change in volume and mix of loans, collateral values and charge-off history.

The Company provides general loan loss reserves for its recreational vehicle ("RV") and auto loans based upon the borrower credit score at the time of origination and the Company's loss experience to date. The allowance for loan loss for the RV and auto loan portfolio at December 31, 2012 was determined by classifying each outstanding loan according to semi-annually refreshed FICO score and providing loss rates. The Company had \$19,678 of RV and auto loan balances subject to general reserves as follows: FICO greater than or equal to 770: \$5,579; 715 – 769: \$6,528; 700 – 714: \$1,058; 660 – 699: \$3,448 and less than 660: \$3,065.

The Company provides general loan loss reserves for mortgage loans based upon the size and class of the mortgage loan and the loan-to-value ratio (LTV) at date of origination. The allowance for each class is determined by dividing the outstanding unpaid balance for each loan by the loan-to-value and applying a loss rates. The LTV groupings for each significant mortgage class are as follows:

The Company had \$1,201,771 of single family mortgage portfolio loan balances subject to general reserves as follows: LTV less than or equal to 60%: \$649,773; 61% – 70%: \$233,530; 71% – 80%: \$50,956; greater than 80%: \$6,903; and other \$260,609.

The Company had \$759,096 of multifamily mortgage portfolio loan balances subject to general reserves as follows: LTV less than or equal to 55%: \$328,816; 56% – 65%: \$278,225; 66% – 75%: \$136,371; 76% – 80%: \$9,720 and greater than 80%: \$5,964. The Company divides the LTV analysis into two classes, separating the purchased loans from the loans underwritten directly by the Company. Based on historical performance, the Company concluded that originated multifamily loans require lower estimated loss rates.

The Company had \$26,484 of commercial real estate loan balances subject to general reserves as follows: LTV less than or equal to 50%: \$17,742; 51% – 60%: \$6,642; 61% – 70%: \$2,100; and 71% – 80%: \$0.

The Company's commercial secured portfolio consists of business loans well-collateralized by residential real estate. The Company's other portfolio consists of receivables factoring for businesses and consumers. The Company allocates its allowance for loan loss for these asset types based on qualitative factors which consider the value of the collateral and the financial position of the issuer of the receivables.

Table of Contents

The following table summarizes activity in the allowance for loan losses by portfolio classes for the periods indicated:

For the Three Months Ended December 31, 2012							
(Dollars in thousands)	Single Family	Home Equity	Multi-family	Commercial Real Estate	Recreational Vehicles and Autos	Commercial Secured and Other	Total

Table of Contents

Credit Quality Disclosures. Non-performing loans consisted of the following:

(Dollars in thousands)	December 31, 2012	June 30, 2012		
Loans secured by real estate:				
Single family:				
In-house originated	\$986	\$18		
Purchased	11,237	10,081		
Home equity loans:				
In-house originated	45	102		
Multifamily:				
In-house originated	501	—		
Purchased	5,034	5,757		
Commercial:				
Purchased	2,197	425		
Total nonaccrual loans secured by real estate	20,000	16,383		
RV/Auto	846	739		
Total non-performing loans	\$20,846	\$17,122		
Non-performing loans to total loans	0.95	% 0.98		%

Approximately 15.53% of our non-performing loans at December 31, 2012 were considered TDRs, compared to 23.09% at June 30, 2012. Borrowers which make timely payments after TDRs are considered non-performing for at least six months.

Generally, after six months of timely payments, those TDRs are reclassified from the non-performing loan category to performing and any previously deferred interest income is recognized. Approximately 58.63% of the Bank's non-performing loans are single family first mortgages already written down to 48.99% in aggregate, of the original appraisal value of the underlying properties. Generally these loans have experienced longer delays completing the foreclosure process due to the poor servicing practices of one of our seller servicers.

The following table provides the outstanding unpaid balance of loans that are performing and non-performing by portfolio class:

(Dollars in thousands)	December 31, 2012						
	Single Family	Home Equity	Multi-family	Commercial Real Estate and Land	Recreational Vehicles and Autos	Commercial Secured and Other	Total
Performing	\$1,203,521	\$25,697	\$760,712	\$26,484	\$20,648	\$128,267	\$2,165,329

Average balances of impaired loans	\$8,306	\$162	\$6,175	\$1,733	\$2,398	\$—	\$18,774

The Company's loan modifications included Single Family, Multifamily and Commercial loans of which included one or a combination of the following: a reduction of the stated interest rate or delinquent property taxes that were paid by the Bank and either repaid by the borrower over a one year period or capitalized and amortized over the remaining life of the loan. The Company's loan modifications also included RV loans in which borrowers were able to make interest-only payments for a period of six months to a year which then reverted back to fully amortizing.

There were four loans with a balance of \$1.9 million modified as TDRs during the three and six months ended December 31, 2012 and there were zero during the six months ended December 31, 2011. Three of the new TDR's were classified as such due to our regulators, the Office of the Comptroller of the Currency (OCC) directing banks to classify mortgages and other loans discharged by troubled borrowers in bankruptcy as TDR's. The Company had no loans modified as TDRs within the previous twelve months for which there was a payment default for the three months ended December 31, 2012 and December 31, 2011. The Company defines a payment default as 90 days past due.

Credit Quality Indicators

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. The Company analyzes loans individually by classifying the loans as to credit risk. The Company uses the following definitions for risk ratings.

Pass. Loans classified as pass are well protected by the current net worth and paying capacity of the obligor or by the fair value, less cost to acquire and sell, of any underlying collateral in a timely manner.

Special Mention. Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position at some future date.

Substandard. Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Table of Contents

Doubtful. Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

The Company reviews and grades loans following a continuous loan review process, featuring coverage of all loan types and business lines at least quarterly. Continuous reviewing provides more effective risk monitoring because it immediately tests for potential impacts caused by changes in personnel, policy, products or underwriting standards.

The following table presents the composition of our loan portfolio by credit quality indicators:

(Dollars in thousands)	December 31, 2012

6. STOCK-BASED COMPENSATION

The Company has two equity incentive plans, the 2004 Stock Incentive Plan (“2004 Plan”) and the 1999 Stock Option Plan (“1999 Plan”), which provide for the granting of non-qualified and incentive stock options, restricted stock and restricted stock units, stock appreciation rights and other awards to employees, directors and consultants.

1999 Stock Option Plan. In July 1999, the Company’s Board of Directors approved the 1999 Stock Option Plan and in August 2001, the Company’s shareholders approved an amendment to the 1999 Plan such that 15% of the outstanding shares of the Company would always be available for grants under the 1999 Plan. The 1999 Plan is designed to encourage selected employees and directors to improve operations and increase profits, to accept or continue employment or association with the Company through participation in the growth in the value of the common stock. The 1999 Plan requires that option exercise prices be not less than fair market value per share of common stock on the option grant date for incentive and nonqualified options. The options issued under the 1999 Plan generally vest in between three and five years. Option expiration dates are established by the plan administrator but may not be later than 10 years after the date of the grant.

In November 2007, the shareholders of the Company approved the termination of the 1999 Plan. No new option awards will be made under the 1999 Plan and the outstanding awards under the 1999 Plan will continue to be subject to the terms and conditions of the 1999 Plan.

2004 Stock Incentive Plan. In October 2004, the Company’s Board of Directors and the stockholders approved the 2004 Plan. In November 2007, the 2004 Plan was amended and approved by the Company’s stockholders. The maximum number of shares of common stock available for issuance under the 2004 Plan is 14.8% of the Company’s outstanding common stock measured from time to time. In addition, the number of shares of the Company’s common stock reserved for issuance will also automatically increase by an additional 1.5% on the first day of each of four fiscal years starting July 1, 2007. At December 31, 2012, there were a maximum of 2,067,401 shares available for issuance under the limits of the 2004 Plan.

Stock Options. At December 31, 2012, expense related to stock option grants has been fully recognized.

A summary of stock option activity under the Plans during the periods indicated is presented below:

	Number of Shares	Weighted-average Exercise Price Per Share
Outstanding - July 1, 2011	267,533	\$ 9.15
Granted	—	\$ —
Exercised	(74,522)	\$ 9.73
Canceled	(2,894)	\$ 9.10
Outstanding - June 30, 2012	190,117	\$ 8.93
Granted	—	\$ —
Exercised	(2,085)	\$ 10.00
Canceled	(500)	\$ 11.00
Outstanding - December 31, 2012	187,532	\$ 8.91
Options exercisable - June 30, 2012	190,117	\$ 8.93
Options exercisable - December 31, 2012	187,532	\$ 8.91

Table of Contents

The following table summarizes information as concerning currently outstanding and exercisable options:

As of December 31, 2012

Options Outstanding			Options Exercisable	
Exercise Prices	Number Outstanding	Weighted-Average Remaining Contractual Life (Years)	Number Exercisable	Weighted-Average Exercise Price
\$7.35	56,700	3.6	56,700	\$7.35
\$8.50	7,500	2.9	7,500	\$8.50
\$9.20	7,500	2.6	7,500	\$9.20
\$9.50	73,300	2.6	73,300	\$9.50
\$10.00	42,532	1.5	42,532	\$10.00
\$8.91	187,532	2.6	187,532	\$8.91

The aggregate intrinsic value of options outstanding and options exercisable under the Plans at December 31, 2012 was \$3,544.

Restricted Stock and Restricted Stock Units. Under the 2004 Plan, employees and directors are eligible to receive grants of restricted stock and restricted stock units. The Company determines stock-based compensation expense using the fair value method. The fair value of restricted stock and restricted stock units is equal to the closing sale price of the Company's common stock on the date of grant.

During the quarters ended December 31, 2012 and 2011, the Company granted 34,524 and 31,584 restricted stock units respectively, to employees and directors. Restricted stock unit ("RSU") awards granted during these quarters vest over three years, one-third on each anniversary date, except for any RSUs granted to our CEO, vest one-third on each fiscal year end.

The Company's income before income taxes and net income for the quarters ended December 31, 2012 and 2011 included stock award expense of \$834 and \$611, respectively. The income tax benefit was \$334 and \$244, respectively. For the six months ended December 31, 2012 and 2011, stock award expense was \$1,542 and \$1,181, with total income tax benefit of \$617 and \$476, respectively. The Company recognizes compensation expense based upon the grant-date fair value divided by the vesting and the service period between each vesting date. At December 31, 2012, unrecognized compensation expense related to non-vested awards aggregated to \$6,056 and is expected to be recognized in future periods as follows:

(Dollars in thousands)	Stock Award Compensation Expense
For the fiscal year remainder:	
2013	\$1,780
2014	2,211
2015	1,441
2016	624
Total	\$6,056

Table of Contents

The following table presents the status and changes in restricted stock grants for the periods indicated:

	Restricted Stock and Restricted Stock Unit Shares	Weighted-Average Grant-Date Fair Value
Non-vested balance at July 1, 2011	390,074	\$ 11.35
Granted	190,584	\$ 14.45
Vested	(210,281) \$ 10.90
Canceled	(9,715) \$ 15.22
Non-vested balance at June 30, 2012	360,662	\$ 13.20
Granted	149,102	\$ 25.55
Vested	(74,973) \$ 12.07
Canceled	(14,864) \$ 16.19
Non-vested balance at December 31, 2012	419,927	\$ 17.68

The total fair value of shares vested for the three and six months ended December 31, 2012 was \$490 and \$2,085, respectively. The total fair value of shares vested for the three and six months ended December 31, 2011 was \$212 and \$930, respectively.

2004 Employee Stock Purchase Plan. In October 2004, the Company's Board of Directors and stockholders approved the 2004 Employee Stock Purchase Plan, which is intended to qualify as an "Employee Stock Purchase Plan" under Section 423 of the Internal Revenue Code. An aggregate total of 500,000 shares of the Company's common stock has been reserved for issuance and will be available for purchase under the 2004 Employee Stock Purchase Plan. At December 31, 2012, there have been no shares issued under the 2004 Employee Stock Purchase Plan.

Table of Contents

7. EARNINGS PER SHARE ("EPS")

Basic EPS excludes dilution and is computed by dividing net income or loss available to common shareholders by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if stock options or other contracts to issue common stock were exercised or converted to common stock that would then share in our earnings.

The following table presents the calculation of basic and diluted EPS:

(Dollars in thousands, except per share data)	Three Months Ended		Six Months Ended	
	December 31,		December 31,	
	2012	2011	2012	2011
Earnings Per Common Share

Dilutive effect of convertible preferred stock	536,057	1,067,773	761,907	318,471
Total dilutive common shares issued and outstanding	13,824,440	12,304,628	13,538,503	11,415,793
Diluted earnings per common share	\$0.70	\$0.54	\$1.37	\$1.14

8. COMMITMENTS AND CONTINGENCIES

Credit-Related Financial Instruments. The Company is a party to credit-related financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments are commitments to extend credit. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets.

The Company's exposure to credit loss is represented by the contractual amount of these commitments. The Company follows the same credit policies in making commitments as it does for on-balance-sheet instruments.

At December 31, 2012, the Company had commitments to originate \$163.7 million in fixed rate loans and \$47.7 million in variable rate loans, totaling an aggregate outstanding principal balance of \$211.4 million. Our fixed rate commitments to originate had rates ranging from 0.9% to 8.0%. At December 31, 2012, the Company also had commitments to sell \$169.0 million in fixed rate loans and \$11.3 million in variable rate loans, totaling an aggregate outstanding principal balance of \$180.3 million.

Commitments to extend credit are agreements to lend to a customer so long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The commitments for equity lines of credit may expire without being drawn upon.

Therefore, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Company, is based on management's credit evaluation of the customer.

Table of Contents

9. RELATED PARTY TRANSACTIONS

In the ordinary course of business, the Company has granted related party loans collateralized by real property to officers, directors and their affiliates that are considered to be insiders by regulation. There were five refinances of existing related party loans and one new loan for a net \$1.4 million granted under the provisions of the employee loan program during the six months ended December 31, 2012, and no refinances of existing loans or new loans granted during the six months ended December 31, 2011.

10. STOCKHOLDERS' EQUITY

On September 11, 2012, the Company mandatorily converted 20,132 shares of our 6.0% Series B Non-Cumulative Perpetual Convertible Preferred Stock (the "Series B preferred stock"). The Series B preferred stock was converted into 1,246,571 shares of our common stock (which reflects an approximate initial conversion price of \$16.15 per share of our common stock) plus cash in lieu of fractional shares, subject to anti-dilution and other adjustments.

On various dates beginning on October 11, 2012, BofI Holding, Inc. (the "Company"), entered into subscription agreements (the "Subscription Agreements") with various institutional and individual accredited investors under which the Company sold an aggregate of 1,857 shares of its 6.0% Series C Non-Cumulative Perpetual Convertible Preferred Stock, par value \$0.01 per share (the "Series C Preferred Stock") for a purchase price of \$10,000 per share or an aggregate of \$18,570, with net proceeds after expenses of approximately \$18,552.

The terms of the Series C Preferred Stock are more fully described in the Certificate of Designations filed by the Company with the Secretary of State of the State of Delaware on October 15, 2012 designating the rights, preferences and privileges of the Series C Preferred Stock (the "Certificate of Designations").

Under the Certificate of Designations, the holders of Series C Preferred Stock will have preferential dividend and liquidation rights over the holders of the Company's Junior Securities (as defined in the Certificate of Designations). The Company's ability to declare and pay, or set aside for payment, dividends or distributions on shares of its Junior Securities or Parity Securities (as defined in the Certificate of Designations) is subject to certain restrictions in the event that the Company does not pay dividends in full, or declare and set aside a sum sufficient for payment, on the Series C Preferred Stock. The Company's ability to purchase, redeem or otherwise acquire shares of its Junior Securities is similarly limited.

Each holder of the Series C Preferred Stock shall have the right, at such holder's option, to convert all or any portion of such holder's Series C Preferred Stock into 327.86885 shares of Common Stock (which reflects an approximate conversion price of \$30.50 per share) plus cash in lieu of fractional shares, subject to anti-dilution and other adjustments set forth in the Certificate of Designations. In addition, if the closing price of the Company's common stock exceeds \$35.00 per share for 20 trading days (whether or not consecutive) during any period of 30 consecutive trading days, the Company may at its option cause some or all of the Series C Preferred Stock to automatically convert into common stock at the then prevailing conversion rate. Furthermore, all or some of the Series C Preferred Stock may be redeemed by the Company at its option no earlier than three years from the date of issuance at a redemption price per share of \$10,800 three years after the issuance date, \$10,500 four years after the issuance date, and \$10,300 five years or more after the issuance date.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion provides information about the results of operations, financial condition, liquidity, off balance sheet items, contractual obligations and capital resources of BofI Holding, Inc. and subsidiary. This information is intended to facilitate the understanding and assessment of significant changes and trends related to our financial condition and the results of our operations. This discussion and analysis should be read in conjunction with our financial information in our Annual Report on Form 10-K for the year ended June 30, 2012, and the interim unaudited condensed consolidated financial statements and notes thereto contained in this report.

Some matters discussed in this report may constitute forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and as such, may involve risks and uncertainties. These forward-looking statements can be identified by the use of terminology such as "estimate," "project," "anticipate," "expect," "intend," "believe," "will," or the negative thereof or other variations thereon or comparable terminology or by discussions of strategy that involve risks and uncertainties. These forward-looking statements relate to, among other things, expectations of the environment in which we operate and projections of future performance.

Forward-looking statements are inherently unreliable and actual results may vary. Factors that could cause actual results to differ from these forward-looking statements include economic conditions, changes in the interest rate environment, changes in the competitive marketplace, risks associated with credit quality and other risk factors discussed under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations – Factors That May Affect Our Performance" in our Annual Report on Form 10-K for the year ended June 30, 2012, which has been filed with the Securities and Exchange Commission. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. All written and oral forward-looking statements made in connection with this report, which are attributable to us or persons acting on our behalf are expressly qualified in their entirety by the foregoing information.

General

Our company, BofI Holding, Inc., is the holding company for BofI Federal Bank, a diversified financial services company with \$2.9 billion in assets that provides innovative banking and lending products and services to approximately 40,000 customers through our scalable low cost distribution channels. BofI Holding, Inc.'s common stock is listed on the NASDAQ Global Select Market and is a component of the Russell 3000 Index.

BofI Federal Bank is a federal savings bank wholly-owned by our company and regulated by the Office of the Comptroller of the Currency (OCC). The parent company, BofI Holding, Inc., is a unitary savings and loan holding company regulated by the Board of Governors of the Federal Reserve System.

We originate small- to medium-size multifamily and single-family mortgage loans. We also purchase loans and mortgage-backed securities. We source our deposit products, including time deposits and interest bearing demand and savings accounts from low-cost channels including; direct retail over the internet, affinity and affiliate programs and wholesale programs. We manage our cash and cash equivalents based upon our need for liquidity, and we seek to minimize the assets we hold as cash and cash equivalents by investing our excess liquidity in higher yielding assets such as mortgage loans or mortgage-backed securities.

Critical Accounting Policies

The following discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements and the notes thereto, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these consolidated financial statements requires us to make a number of estimates and assumptions that affect the reported amounts and disclosures in the consolidated financial statements. On an ongoing basis, we evaluate our estimates and assumptions based upon historical experience and various factors and circumstances. We believe that our estimates and assumptions are reasonable under the circumstances. However, actual results may differ significantly from these estimates and assumptions that could have a material effect on the carrying value of assets and liabilities at the balance

sheet dates and our results of operations for the reporting periods.

Our significant accounting policies and practices are described in greater detail in Note 1 to our June 30, 2012 audited consolidated financial statements and under the caption “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies” contained in our Annual Report on Form 10-K filed with the Securities and Exchange Commission for the fiscal year end June 30, 2012.

Table of Contents

Use of Non-GAAP Financial Measures

In addition to the results presented in accordance with GAAP, this report includes non-GAAP financial measures such as core earnings. Core earnings exclude realized and unrealized gains and losses associated with our securities portfolios. Excluding these gains and losses provides investors with an understanding of our Bank's core lending and mortgage banking business. Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied and are not audited. Readers should be aware of these limitations and should be cautious as their use of such measures. Although we believe the non-GAAP financial measures disclosed in this report enhance investors' understanding of its business and performance, these non-GAAP measures should not be consider in isolation, or as a substitute for GAAP basis financial measures.

1. Interest rate spread represents the difference between the annualized weighted average yield on interest-earning assets and the annualized weighted average

rate paid on interest-bearing liabilities.

2. Net interest margin represents annualized net interest income as a percentage of average interest-earning assets.

3. Reflects regulatory capital ratios of BofI Federal Bank.

RESULTS OF OPERATIONS

Comparison of the Three and Six Months Ended December 31, 2012 and December 31, 2011

For the three months ended December 31, 2012, we had net income of \$9.8 million compared to net income of \$6.7 million for the three months ended December 31, 2011. Net income attributable to common stockholders was \$9.4 million or \$0.70 per diluted share compared to net income attributable to common shareholders of \$6.3 million or \$0.54 per diluted share for the three months ended December 31, 2012 and 2011, respectively. For the six months ended December 31, 2012, we had net income of \$18.8 million compared to net income of \$13.2 million for the six months ended December 31, 2011. Net income attributable to common stockholders was \$18.3 million or \$1.37 per diluted share compared to net income attributable to common shareholders of \$12.7 million or \$1.14 per diluted share for the six months ended December 31, 2012 and 2011, respectively.

Other key comparisons between our operating results for the three and six months ended December 31, 2012 and 2011 are:

Net interest income increased \$5.9 million and \$10.2 million in the quarter and six months ended December 31, 2012 due to a 23.4% and 22.7%, increase in average earning assets primarily from the growth in our loan portfolio in those respective periods. Our net interest margin increased 21 basis points and 14 basis points in the quarter and six months ended December 31, 2012 compared to December 31, 2011. The overall rate on interest earning assets was lower by 27 and 37 basis points in the three and six month periods ended December 31, 2012 compared to December 31, 2011, primarily because loan rates have been pushed lower by the economy and competition. This reduction on the asset side was more than offset by a 52 and 53 basis point reduction in rates paid on interest bearing liabilities for the three and six months ending December 31, 2012 compared to December 31, 2011. The primary reduction was due to a decrease in the rates paid on time deposits of 57 and 52 basis points, respectively, as we allowed the higher rate time deposits to roll off the books.

Non-interest income increased \$3.3 million and \$5.5 million for the three and six months ended December 31, 2012 compared to the three and six months ended December 31, 2011. The increase in non-interest income for the quarter was primarily the result of a \$2.5 million increase in mortgage banking income, a \$448,000 increase in prepayment penalty income and a \$507,000 increase in banking service fees. The increase in non-interest income for the six months ended December 31, 2012 compared to December 31, 2011 was primarily the result of a \$4.2 million increase in mortgage banking income, a \$589,000 increase in prepayment penalty income and a \$756,000 increase in banking service fees.

Non-interest expense increased \$3.6 million and \$5.6 million for the three and six months ended December 31, 2012 compared to the three and six months ended December 31, 2011. For the three months ended December 31, 2012 compared to the three months ended December 31, 2011 salaries and compensation was up \$2.0 million primarily due to the overall increase in staff, mainly in our production areas to support the overall growth of the Bank. Advertising and promotions were up \$510,000 mainly due to the cost of lead generation in the mortgage area. Other general and administration expenses were \$689,000 higher primarily due to an increase of \$258,000 in loan related expenses, an increase of \$144,000 related to software, licenses and associated costs, an increase of \$72,000 in expenses related travel, and an increase of \$53,000 in losses on deposit accounts. For the six months ended December 31, 2012 compared to the six months ended December 31, 2011 salaries and compensation was up \$3.6 million primarily due to the overall increase in staff, mainly in our production areas to support the overall growth of the Bank. Advertising and promotions were up \$846,000 mainly due to the cost of lead generation in the mortgage area. Other general and administration expenses were \$1.4 million higher primarily due to an increase of \$708,000 in loan related expenses, an increase of \$198,000 related to software, licenses and associated costs, an increase of \$77,000 in expenses related travel, and an increase of \$57,000 in losses on deposit accounts.

We define net income without the after-tax impact of realized and unrealized securities gains and losses as adjusted earnings ("core earnings") which we believe provides useful information about the Bank's operating performance. Core earnings for the three and six months ended December 31, 2012 and 2011, were \$10.1 million and \$6.8 million and \$19.2 and 13.6, respectively.

Table of Contents

Below is a reconciliation of net income to core earnings:

(Dollars in thousands)	Three Months Ended		Six Months Ended	
	December 31,		December 31,	
	2012	2011	2012	2011
Net Income	\$9,768	\$6,660	\$18,757	\$13,193
Unrealized securities losses	525	285	797	687
Tax provision	(213) (117) (324) (277
Core Earnings	\$10,080	\$6,828	\$19,230	\$13,603
Net Interest Income				

Net interest income for the quarter and six months ended December 31, 2012 totaled \$24.9 million and \$47.4 million, an increase of 30.7% and 27.3%, respectively, compared to net interest income of \$19.1 million and \$37.3 million for the quarter and six months ended December 31, 2011.

Total interest and dividend income during the three and six months ended December 31, 2012 increased 17.3% to \$33.6 million and 14.5% to \$64.6 million, respectively, compared to \$28.6 million and \$56.4 million during the three and six months ended December 31, 2011. The increase in interest and dividend income for the 2012 quarter and six months was attributable primarily to growth in average earning assets from growth in the loan portfolio which was partially offset by a decrease in the average balance of investments. The average balance of loans increased 34.2% and 33.5% when compared to the three and six periods ended December 31, 2011, while the average balance on investments was lower by 9.0% and 8.3% for the same respective periods. The increase in interest income on loans was partially offset by lower rates earned on loans and mortgage-backed securities. The loan portfolio yield for the quarter and six months ended December 31, 2012 decreased 23 and 36 basis points, respectively, and the investment security portfolio yield decreased 72 and 66 basis points from the 2011 periods. The net growth in average earning assets for the three and six month periods were funded largely by increased deposits and to a lesser extent borrowings. Total interest expense was \$8.6 million and \$17.1 million for the three and six months ended December 31, 2012, a decrease of \$0.9 million or 9.4% and \$2.0 million or 10.4% as compared with the same periods in 2011. The average funding rate decreased by 52 and 53 basis points while average interest-bearing liabilities grew 22.7% and 21.6% respectively. Contributing to the decrease in the average funding rates were decreases in the average rates for time deposits of 57 and 52 basis points, FHLB advances of 31 and 43 basis and demand and savings accounts of 13 and 11 basis points for the three and six months ended December 31, 2012 compared to the same periods in 2011. Net interest margin, defined as net interest income divided by average earning assets, increased by 21 basis points to 3.81% for the quarter ended December 31, 2012, compared with 3.60% for the quarter ended December 31, 2011. Net interest margin increased by 14 basis points to 3.76% for the six months ended December 31, 2012, compared with 3.62% for the six months ended December 31, 2011.

Table of Contents

Average Balances, Net Interest Income, Yields Earned and Rates Paid

The following table sets forth the effects of changing rates and volumes on our net interest income. Information is provided with respect to (i) effects on interest income and interest expense attributable to changes in volume (changes in volume multiplied by prior rate); (ii) effects on interest income and interest expense attributable to changes in rate (changes in rate multiplied by prior volume); and (iii) changes in rate/volume (change in rate multiplied by change in volume) for the three and six months ended December 31, 2012 and 2011:

(Dollars in thousands)	For the Three Months Ended December 31, 2012 vs 2011				For the Six Months Ended December 31, 2012 vs 2011			
	Increase (Decrease) Due to			Total	Increase (Decrease) Due to			Total

Provision for Loan Losses

The loan loss provision was \$2.0 million and \$4.5 million compared to \$1.6 million and \$4.0 million for the three and six month periods ended December 31, 2012 and December 31, 2011. The increases in the provision for both the three and six month periods ended December 31, 2012 is due to the overall increase in the loan portfolio. Provisions for loan losses are charged to income to bring the allowance for loan losses to a level deemed appropriate by management based on the factors discussed under “Financial Condition-Asset Quality and Allowance for Loan Losses.”

Table of Contents

Non-Interest Income

The following table sets forth information regarding our non-interest income for the periods shown:

(Dollars in thousands)	For the Three Months Ended			For the Six Months Ended		
	December 31,			December 31,		
	2012	2011	Inc (Dec)	2012	2011	Inc (Dec)
Other than temporary loss on securities:						
Total impairment losses	\$(2,873)	\$(715)	\$(2,158)	\$(5,745)	\$(1,432)	\$(4,313)
Loss recognized in other comprehensive loss	2,053	—	2,053	4,051	120	3,931
Net impairment loss recognized in earnings	(820)	(715)	(105)	(1,694)	(1,312)	(382)
Fair value gain on trading securities	295	430	(135)	897	625	272
Total unrealized loss on securities	(525)	(285)	(240)	(797)	(687)	(110)
Prepayment penalty fee income	513	65	448	715	126	589
Mortgage banking income	5,579	3,031	2,548	12,035	7,816	4,219
Banking service fees and other income	682	175	507	1,057	301	756
Total non-interest income	\$6,249	\$2,986	\$3,263	\$13,010	\$7,556	\$5,454

Non-interest income increased \$3.2 million to \$6.2 million from \$3.0 million for the three months ended December 31, 2012 and 2011. The increase was primarily the result of higher mortgage banking income of \$2.5 million, a \$448,000 increase in prepayment penalty fee income, and a \$507,000 increase in banking service fees and other income. The increase in mortgage banking income includes gains on sale of loans of \$5.6 million and \$3.0 million for the three months ended December 31, 2012 and 2011, respectively, due to an increase in origination volume of loans held for sale to \$280.6 million from \$227.8 million. Non-interest income increased \$5.4 million to \$13.0 million from \$7.6 million for the six months ended December 31, 2012 and 2011. The increase was primarily the result of higher mortgage banking income of \$4.2 million, a \$589,000 increase in prepayment penalty fee income, and a \$756,000 increase in banking service fees and other income. The increase in mortgage banking income includes gains on sale of loans of \$12.0 million and \$7.8 million for the six months ended December 31, 2012 and 2011, respectively, due to an increase in origination volume of loans held for sale to \$535.4 million from \$318.2 million.

Non-Interest Expense

The following table sets forth information regarding our non-interest expense for the periods shown:

(Dollars in thousands)	For the Three Months Ended			For the Six Months Ended		
	December 31,			December 31,		
	2012	2011	Inc (Dec)	2012	2011	Inc (Dec)
Salaries, employee benefits and stock-based compensation	\$6,952	\$4,977	\$1,975	\$13,321	\$9,682	\$3,639
Professional services	726	604	122	1,644	1,177	467
Occupancy and equipment	477	293	184	984	555	429
Data processing and internet	656	600	56	1,227	983	244
Advertising and promotional	1,116	606	510	1,910	1,064	846
Depreciation and amortization	449	332	117	786	630	156
Real estate owned and repossessed vehicles	15	244	(229)	113	2,028	(1,915)
FDIC and regulator fees	494	341	153	982	666	316
Other general and administrative	1,896	1,207	689	3,346	1,971	1,375
Total non-interest expenses	\$12,781	\$9,204	\$3,577	\$24,313	\$18,756	\$5,557

Non-interest expense, which is comprised primarily of compensation, data processing and internet expenses, occupancy, advertising and promotional and other operating expenses, was \$12.8 million and \$24.3 million for the three and six months ended December 31, 2012, up from \$9.2 million and \$18.8 for the three and six months ended December 31, 2011.

Table of Contents

Total salaries, employee benefits and stock-based compensation increased \$2.0 million to \$7.0 million for the quarter ended December 31, 2012 compared to \$5.0 million for the quarter ended December 31, 2011. There was a net decrease in fixed staff headcount of 2, variable staff increased 15 and commission based employees grew at total of 6 in the three month period ended December 31, 2012 compared to December 31, 2011. For the six month period ended December 31, 2012 total salaries, employee benefits and stock-based compensation increased \$3.6 million to \$13.3 million compared to \$9.7 million for the six months ended December 31, 2011.

Professional services, which include accounting and legal fees, increased \$122,000 and \$467,000 for the three and six month periods ended December 31, 2012, compared to the same periods last year. The increases were primarily due to legal fees related to loan acquisition contracts and new business startup costs.

Advertising and promotional expense increased \$510,000 and \$846,000 for the three and six month periods ending December 31, 2012, compared to the same periods ended December 31, 2011. The increases were primarily due to increases in lead generation costs for our single family loan origination program as a result of higher mortgage refinance volume.

Data processing and internet expense increased \$56,000 and \$244,000 for the three and six month periods ended December 31, 2012, compared to the same periods last year. The increases were primarily due to growth in the number of customer accounts and fees for special enhancements to the Bank's core processing system.

The costs and losses associated with the maintenance and sale of REO and repossessed RVs decreased \$229,000 and \$1.9 million for the three and six month periods ending December 31, 2012, compared to the same periods last year. This reduction is due to lower operating costs and a decrease in market value adjustments experienced in the three and six months ended December 31, 2012 compared to the same periods last year.

The cost of our Federal Deposit Insurance Corporation or "FDIC" and "OCC" standard regulatory charges increased \$153,000 and \$316,000 for the three and six month periods ended December 31, 2012, compared to the same periods last year. The increases were due to a rate increase as a result of an increase in brokered deposits in the FDIC insurance premium cost calculation. As an FDIC-insured institution, the Bank is required to pay deposit insurance premiums to the FDIC.

Other general and administrative expense increased \$689,000 and \$1.4 million for the three and six month periods ended December 31, 2012, compared to the same periods last year. The increases were primarily due to loan and other general expenses related to the growth in loan volume and the number of employees.

Provision for Income Taxes

Our effective income tax rates (income tax provision divided by net income before income tax) for the three and six months ended December 31, 2012 and 2011 were 40.63% and 40.68% and 40.89% and 40.30%, respectively. The reduction in the tax rate is the result of changes in state tax allocations.

Table of Contents

FINANCIAL CONDITION

Balance Sheet Analysis

Our total assets increased \$487.5 million, or 20.4%, to \$2,874.3 million, as of December 31, 2012, up from \$2,386.8 million at June 30, 2012. The increase in total assets was primarily due to an increase of \$434.7 million in net loans held for investment. Total liabilities increased a total of \$451.5 million, primarily due to an increase in deposits of \$353.2 million and an increase in borrowings of \$105.0 million from the Federal Home Loan Bank of San Francisco (the "FHLB"). Our deferred income taxes increased \$2.0 million to \$17.0 million primarily due to the impairment in our securities portfolio, loan loss provision, and state taxes.

Loans

Net loans held for investment increased 25.3% to \$2,155.3 million at December 31, 2012 from \$1,720.6 million at June 30, 2012. The increase in the loan portfolio was due to loan originations and purchases of \$613.2 million, offset by loan repayments of \$215.1 million, net transfers from our held for sale portfolio of \$42.2 million and a net increase in the allowance of \$1.8 million during the six months ended December 31, 2012.

The following table sets forth the composition of the loan portfolio as of the dates indicated:

(Dollars in thousands)	December 31, 2012		June 30, 2012		
	Amount	Percent	Amount	Percent	
Residential real estate loans:					
Single family (one to four units)	\$1,215,744	55.6	% \$863,624	49.6	%
Home equity	25,742	1.2	% 29,167	1.7	%
Multifamily (five units or more)	766,247	35.0	% 687,661	39.5	%
Commercial real estate	28,681	1.3	% 35,174	2.0	%
Consumer—Recreational vehicle	21,494	1.0	% 24,324	1.4	%
Commercial secured and other	128,267	5.9	% 100,549	5.8	%
Total loans held for investment	\$2,186,175	100.0	% \$1,740,499	100.0	%
Allowance for loan losses	(11,449)		(9,636)		
Unamortized premiums/discounts, net of deferred loan fees	(19,420)		(10,300)		
Net loans held for investment	\$2,155,306		\$1,720,563		

The Bank originates and purchases mortgage loans with terms that may include repayments that are less than the repayments for fully amortizing loans, including interest only loans, option adjustable-rate mortgages, and other loan types that permit payments that may be smaller than interest accruals. The Bank's lending guidelines for interest only loans are adjusted for the increased credit risk associated with these loans by requiring borrowers with such loans to borrow at LTVs that are lower than standard amortizing ARM loans and by calculating debt to income ratios for qualifying borrowers based upon a fully amortizing payment, not the interest only payment. The Company's Internal Asset Review Committee monitors and performs reviews of interest only loans. Adverse trends reflected in the Company's delinquency statistics, grading and classification of interest only loans would be reported to management and the Board of Directors. As of December 31, 2012, the Company had \$350.6 million of interest only loans and \$7.5 million of option adjustable-rate mortgage loans. Through December 31, 2012, the net amount of deferred interest on these loan types was not material to the financial position or operating results of the Company.

During fiscal year 2011, the Bank changed its growth strategy to originate more mortgage loans rather than purchasing loans.

Asset Quality and Allowance for Loan Loss

Non-performing Assets

Non-performing loans are comprised of loans past due 90 days or more on nonaccrual status and other nonaccrual loans. Non-performing assets include non-performing loans plus other real estate owned and repossessed vehicles. At December 31, 2012, our non-performing loans totaled \$20.8 million, or 0.95% of total gross loans and our total

non-performing assets totaled \$22.7 million, or 0.79% of total assets.

Table of Contents

Non-performing loans and foreclosed assets or “non-performing assets” consisted of the following as of the dates indicated:

(Dollars in thousands)	December 31, 2012	June 30, 2012	Inc (Dec)
Non-performing assets:			
Non-accrual loans:			
Loans secured by real estate:			
Single family	\$12,223	\$10,099	\$2,124
Home equity loans	45	102	(57)
Multifamily	5,535	5,757	(222)
Commercial	2,197	425	1,772
Total nonaccrual loans secured by real estate	20,000	16,383	3,617
RV / Auto	846	739	107
Total non-performing loans	20,846	17,122	3,724
Foreclosed real estate	1,452	457	995
Repossessed—vehicles	379	700	(321)
Total non-performing assets	\$22,677	\$18,279	\$4,398
Total non-performing loans as a percentage of total loans	0.95	% 0.98	% (0.03)%
Total non-performing assets as a percentage of total assets	0.79	% 0.77	% 0.02 %

Total non-performing assets increased from \$18.3 million at June 30, 2012 to \$22.7 million at December 31, 2012. The non-performing assets increase of \$4.4 million, or 2 basis points on assets, was the net result of an increase in the non-performing status of the Bank's commercial portfolio from \$0.4 million to \$2.2 million, an increase in the single family portfolio of \$2.1 million and an increase in foreclosed real estate of \$1.0 million, which was offset by a decrease in non-performing multifamily loans of \$0.2 million and a decrease in repossessed vehicles of \$0.3 million. Currently, more delinquent loans are being resolved through short sale rather than through foreclosure and bank sale. The result is an increase in delinquent non performing loans.

A troubled debt restructuring is a concession made to a borrower experiencing financial difficulties, typically permanent or temporary modifications of principal and interest payments or an extension of maturity dates. When a loan is delinquent and classified as a troubled debt restructuring no interest is accrued until the borrower demonstrates over time (typically six months) that it can make payments. When a loan is considered a troubled debt restructuring and is on nonaccrual, it is considered non-performing and included in the table above. The Bank had performing troubled debt restructurings on mortgage loans and RV loans with outstanding balances totaling \$4.4 million at December 31, 2012 and \$3.3 million at June 30, 2012.

Allowance for Loan Losses

We are committed to maintaining the allowance for loan losses at a level that is considered to be commensurate with estimated and known risks in the portfolio. Although the adequacy of the allowance is reviewed quarterly, our management performs an ongoing assessment of the risks inherent in the portfolio. While we believe that the allowance for loan losses is adequate at December 31, 2012, future additions to the allowance will be subject to continuing evaluation of estimated and known, as well as inherent, risks in the loan portfolio.

The assessment of the adequacy of our allowance for loan losses is based upon a number of quantitative and qualitative factors, including levels and trends of past due and nonaccrual loans, change in volume and mix of loans, collateral values and charge-off history.

We provide general loan loss reserves for our RV and auto loans based upon the borrower credit score at the time of origination and the Company's loss experience to date. The allowance for loan loss for the RV and auto loan portfolio at December 31, 2012 was determined by classifying each outstanding loan according to the semi-annually refreshed

FICO score and providing loss rates. The Company had \$19,678 of RV and auto loan balances subject to general reserves as follows: FICO greater than or equal to 770: \$5,579; 715 – 769: \$6,528; 700 -714: \$1,058; 660 – 699: \$3,448 and less than 660: \$3,065.

Over the last two years, we have experienced increased charge-offs of RV loans due to the nationwide recession. Our portfolio of RV loans is expected to decrease in the future because the Bank ceased originating RV loans in fiscal 2009.

The Company provides general loan loss reserves for mortgage loans based upon the size and class of the mortgage loan and the loan-to-value ratio (LTV) at date of origination. The allowance for each class is determined by dividing the outstanding

Table of Contents

unpaid balance for each loan by the loan-to-value and applying a loss rates. The LTV groupings for each significant mortgage class are as follows:

The Company had \$1,201,771 of single family mortgage portfolio loan balances subject to general reserves as follows: LTV less than or equal to 60%: \$649,773; 61% – 70%: \$233,530; 71% – 80%: \$50,956; greater than 80%: \$6,903; and other \$260,609.

The Company had \$759,096 of multifamily mortgage portfolio loan balances subject to general reserves as follows: LTV less than or equal to 55%: \$328,816; 56% – 65%: \$278,225; 66% – 75%: \$136,371; 76% – 80%: \$9,720 and greater than 80%: \$5,964. During the quarter ended March 31, 2011, the Company divided the LTV analysis into two classes, separating the purchased loans from the loans underwritten directly by the Company. Based on historical performance, the Company concluded that originated multifamily loans require lower estimated loss rates.

The Company had \$26,484 of commercial real estate loan balances subject to general reserves as follows: LTV less than or equal to 50%: \$17,742; 51% – 60%: \$6,642; 61% – 70%: \$2,100; and 71% – 80%: \$0.

The weighted average LTV percentage for our entire real estate loan portfolio was 54% at December 31, 2012. We believe that this percentage is lower and more conservative than most banks. This has resulted in lower average mortgage loan charge-offs when compared to many other comparable banks.

While we anticipate that such level of charge-offs will continue into the future, given the uncertainties surrounding the improvement of the U.S. economy, we may experience an increase in the relative amount of charge-offs and we may be required to increase our loan loss provisions in the future to provide a larger loss allowance for one or more of our loan types.

The following table summarizes impaired loans as of:

(Dollars in thousands)	December 31, 2012	June 30, 2012
Non-performing loans—90+ days past due plus other non-accrual loans	\$17,609	\$13,168
Troubled debt restructuring loans—non-accrual	3,237	3,954
Troubled debt restructuring loans—performing	4,357	3,280
Total impaired loans	\$25,203	\$20,402

The following table reflects management's allocation of the allowance for loan losses by loan category and the ratio of each loan category to total loans as of the dates indicated:

(Dollars in thousands)	December 31, 2012		June 30, 2012			
	Amount of Allowance	Allocation as a % of Allowance	Amount of Allowance	Allocation as a % of Allowance		
Single family	\$5,142	44.91	%	\$4,126	42.82	%
Home equity	227	1.98	%	192	1.99	%
Multifamily	2,911	25.43	%	2,558	26.55	%
Commercial real estate	783	6.84	%	398	4.13	%
Consumer—Recreational vehicles and autos	1,699	14.84	%	2,159	22.41	%
Commercial secured and other	687	6.00	%	203	2.10	%
Total	\$11,449	100.00	%	\$9,636	100.00	%

The loan loss provision was \$2.0 million and \$1.6 million for the quarter ended December 31, 2012 and December 31, 2011, respectively. The loan loss provision was \$4.5 million and \$4.0 million for the six months ended December 31, 2012 and December 31, 2011, respectively. We believe that the lower average LTV in the Bank's loan portfolio will continue to result in future lower average mortgage loan charge-offs when compared to many other comparable banks. Our general loan loss reserves are based upon historical losses and expected future trends. The resolution of the Bank's existing REO and non-performing loans should not have a significant adverse impact on our operating results.

Table of Contents

Investment Securities

Total investment securities were \$462.4 million as of December 31, 2012, compared with \$483.0 million at June 30, 2012. During the three months ended December 31, 2012, we purchased \$23.5 million in U.S. government/agency debt and Collateralized Loan Obligations, and received principal repayments of approximately \$20.8 million in our available-for-sale portfolio. In our held-to-maturity portfolio, we had zero purchases of mortgage-backed securities, municipal bonds, or agency debt, and received principal repayments of \$22.9 million with the balance attributable to accretion and other activities. We currently classify agency mortgage-backed and debt securities as held-to-maturity or available-for-sale at the time of purchase based upon small issue size and based on issue features, such as callable terms.

Deposits

Deposits increased a net \$353.2 million, or 21.9%, to \$1,968.3 million at December 31, 2012, from \$1,615.1 million at June 30, 2012. Our deposit growth composition was the result of a 77.4% increase in interest-bearing demand accounts and an 18.8% increase in savings accounts as a result of increased promotion and competitive pricing of savings accounts during the six months ended December 31, 2012.

The following table sets forth the composition of the deposit portfolio as of the dates indicated:

(Dollars in thousands)	December 31, 2012		June 30, 2012		
	Amount	Rate ¹	Amount	Rate ¹	
Non-interest bearing:	\$17,854	—	% \$12,439	—	%
Interest bearing:					
Demand	168,352	0.57	% 94,888	0.52	%
Savings	693,689	0.74	% 583,955	0.72	%
Total demand and savings	862,041	0.71	% 678,843	0.69	%
Time deposits:					
Under \$100,000	202,929	1.41	% 224,140	1.85	%
\$100,000 or more	885,441	1.49	% 699,666	1.75	%
Total time deposits ²	1,088,370	1.47	% 923,806	1.78	%
Total interest bearing	1,950,411	1.13	% 1,602,649	1.32	%
Total deposits	\$1,968,265	1.12	% \$1,615,088	1.31	%

¹ Based on weighted-average stated interest rates at end of period.

² The total includes brokered deposits of \$407.8 million and \$367.0 million as of December 31, 2012 and June 30, 2012, respectively, of which \$252.0 million and \$202.7 million, respectively, are time deposits.

The following table sets forth the number of deposit accounts by type as of the date indicated:

	December 31, 2012	June 30, 2012	December 31, 2011
Checking and savings accounts	23,028	19,931	17,866
Time deposits	12,168	12,341	15,194
Total number of deposit accounts	35,196	32,272	33,060

Table of Contents

Borrowings

The following table sets forth the composition of our borrowings as of the dates indicated:

(Dollars in thousands)	December 31, 2012		June 30, 2012		December 31, 2011			
	Balance	Weighted Average Rate	Balance	Weighted Average Rate	Balance	Weighted Average Rate		
Repurchase agreements	\$ 115,000	4.35	% \$ 120,000	4.34	% \$ 130,000	4.23	%	
FHLB Advances	527,000	1.22	% 422,000	1.42	% 330,000	1.74	%	
Subordinated debentures and other borrowings	5,155	2.83	% 5,155	2.87	% 5,155	2.70	%	
	\$647,155	1.79	% \$547,155	2.07	% \$465,155	2.45	%	
Weighted average cost of borrowings during the quarter	2.24	%	2.20	%	2.67	%		
Borrowings as a percent of total assets	22.52	%	22.92	%	20.92	%		

At December 31, 2012, total borrowings amounted to \$647.2 million, up from \$547.2 million or 18.3% from June 30, 2012 and up \$182.0 million or 39.1% from December 31, 2011. Total borrowings represented 22.52% of total assets and had a weighted average cost of 1.79% at December 31, 2012, compared with 22.9% of total assets at a weighted average cost of 2.07% at June 30, 2012 and 20.9% of total assets at a weighted average cost of 2.45% at December 31, 2011.

We have sold securities under various agreements to repurchase for total proceeds of \$115.0 million. The repurchase agreements have interest rates between 3.24% and 4.75% and scheduled maturities between January 2013 and December 2017. Under these agreements, we may be required to repay the \$115.0 million and repurchase our securities before the scheduled maturity if the issuer requests repayment on scheduled quarterly call dates. The weighted-average remaining contractual maturity period is 2.18 years and the weighted average remaining period before such repurchase agreements could be called is 0.13 years.

We regularly use advances from the FHLB to manage our interest rate risk and, to a lesser extent, manage our liquidity position. Generally, FHLB advances with terms between three and ten years have been used to fund the purchase of single family and multifamily mortgages and to provide us with interest rate risk protection should rates rise. At December 31, 2012, a total of \$15.0 million of FHLB advances include agreements that allow the FHLB, at its option, to put the advances back to us after specified dates. The weighted-average remaining contractual maturity period of the \$15.0 million in puttable advances is 3.00 years and the weighted average remaining period before such advances could be put to us is 0.16 years.

Stockholders' Equity

Stockholders' equity increased \$36.0 million to \$242.6 million at December 31, 2012 compared to \$206.6 million at June 30, 2012. The increase was the result of our net income for the six months ended December 31, 2012 of \$18.8 million, issuance of convertible preferred stock Series C of \$18.6 million, vesting and issuance of RSU's and exercise of stock options of \$1.2 million, offset by a \$2.1 million unrealized loss in other comprehensive income, net of tax and \$0.4 million in dividends declared on preferred stock.

Table of Contents

LIQUIDITY

Cash flow information is as follows:

(Dollars in thousands)	For the Six Months Ended	
	December 31,	
	2012	2011
Operating Activities	\$ (34,511) \$ 13,096
Investing Activities	\$ (383,421) \$ (268,755
Financing Activities	\$ 472,008	\$ 268,910

During the six months ended December 31, 2012, we had net cash outflows from operating activities of \$34.5 million compared to inflows of \$13.1 million for the for the six months ended December 31, 2011. Net operating cash inflows for the 2011 period were primarily due to the proceeds from sale of loans held for sale exceeding originations of loans held for sale, while net outflows in 2012 were due to originations of loans held for sale exceeding proceeds from sale of loans held for sale

Net cash outflows from investing activities totaled \$383.4 million for the six months ended December 31, 2012, while outflows totaled \$268.8 million for the same period in 2011. The increase was primarily due to higher loan originations which were only partially offset by increased repayments of loans in the 2012 period compared to the same period in the prior year.

Our net cash provided by financing activities totaled \$472.0 million for the six months ended December 31, 2012, while inflows totaled \$268.9 million for the six months ended December 31, 2011. Net cash provided by financing activities increased primarily from growth in deposits and a net increase in FHLB advances for the six months ended December 31, 2012 compared to December 31, 2011. During the six months ended December 31, 2012, the Bank could borrow up to 40.0% of its total assets from the FHLB. Borrowings are collateralized by the pledge of certain mortgage loans and investment securities to the FHLB. At December 31, 2012, the Company had \$251.0 million available immediately and an additional \$268.3 million available with additional collateral. At December 31, 2012, we also had two \$10.0 million unsecured federal funds purchase lines with two different banks under which no borrowings were outstanding.

The Bank has the ability to borrow short-term from the Federal Reserve Bank of San Francisco Discount Window. At December 31, 2012, the Bank did not have any borrowings outstanding and the amount available from this source was \$37.8 million. The credit line is are collateralized by consumer loans, and mortgage-backed securities.

In an effort to expand our Bank's liquidity options, we have issued brokered deposits, with \$407.8 million outstanding at December 31, 2012. We believe our liquidity sources to be stable and adequate for our anticipated needs and contingencies. We believe we have the ability to increase our level of deposits and borrowings to address our liquidity needs for the foreseeable future.

Table of Contents

OFF-BALANCE SHEET COMMITMENTS

At December 31, 2012, we had commitments to originate loans with an aggregate outstanding principal balance of \$211.4 million, and commitments to sell loans with an aggregate outstanding principal balance of \$180.3 million. We have no commitments to purchase loans, investment securities or any other unused lines of credit.

CONTRACTUAL OBLIGATIONS

The Company enters into contractual obligations in the normal course of business primarily as a source of funds for its asset growth and to meet required capital needs. Our time deposits due within one year of December 31, 2012 totaled \$608.9 million. We believe the large percentage of time deposits that mature within one year reflects customers' hesitancy to invest their funds long term. If these maturing deposits do not remain with us, we may be required to seek other sources of funds, including other time deposits and borrowings. Depending on market conditions, we may be required to pay higher rates on deposits and borrowings than we currently pay on time deposits maturing within one year. We believe, however, based on past experience, a significant portion of our time deposits will remain with us. We believe we have the ability to attract and retain deposits by adjusting interest rates offered.

The following table presents certain of our contractual obligations as of the period indicated:

(Dollars in thousands)	As of December 31, 2012				
	Total	Payments Due by Period ¹			
		Less Than One Year	One To Three Years	Three To Five Years	More Than Five Years
Long-term debt obligations ²	\$682,443	\$372,176	\$136,580	\$87,643	\$86,044
Time deposits ²	1,102,188	615,357	214,422	103,639	168,770
Operating lease obligations ³	12,631	797	3,393	3,560	4,881
Total	\$1,797,262	\$988,330	\$354,395	\$194,842	\$259,695

1. Our contractual obligations include long-term debt, time deposits and operating leases as shown. We had no capitalized leases or material commitments for capital expenditures at December 31, 2012.

2. Amounts include principal and interest due to recipient.

3. Payments are for a lease of real property.

CAPITAL RESOURCES AND REQUIREMENTS

BofI Federal Bank is subject to various regulatory capital requirements set by the federal banking agencies. Failure by our Bank to meet minimum capital requirements could result in certain mandatory and discretionary actions by regulators that could have a material adverse effect on our consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, our Bank must meet specific capital guidelines that involve quantitative measures of our Bank's assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. Our Bank's capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weightings and other factors.

Quantitative measures established by regulation require our Bank to maintain certain minimum capital amounts and ratios. Regulations of the Office of the Comptroller of the Currency (OCC) require our Bank to maintain minimum ratios of tangible capital to tangible assets of 1.5%, core capital to tangible assets of 4.0% and total risk-based capital to risk-weighted assets of 8.0%. At December 31, 2012, our Bank met all the capital adequacy requirements to which it was subject. At December 31, 2012, our Bank was "well capitalized" under the regulatory framework for prompt corrective action. To be "well capitalized," our Bank must maintain minimum leverage, tier 1 risk-based and total risk-based capital ratios of at least 5.0%, 6.0% and 10.0%, respectively. Management believes that no conditions or events have occurred since December 31, 2012 that management believes would materially adversely change the Bank's capital classification. From time to time, we may need to raise additional capital to support our Bank's further growth and to maintain its "well capitalized" status.

Table of Contents

The Bank's capital amounts, capital ratios and capital requirements were as follows:

(Dollars in thousands)	As of December 31, 2012							
	Actual		For Capital Adequacy Purposes				To be "Well Capitalized" Under Prompt Corrective Action Regulations	
	Amount	Ratio	Amount	Ratio	Amount	Ratio		
Tier 1 leverage (core) capital to adjusted tangible assets	\$245,804	8.52	% \$115,403	4.00	% \$144,254	5.00	%	
Tier 1 capital (to risk-weighted assets)	245,804	13.95	% N/A	N/A	105,733	6.00	%	
Total capital (to risk-weighted assets)	257,253	14.60	% 140,977	8.00	% 176,221	10.00	%	
Tangible capital (to tangible assets)	245,804	8.52	% 43,276	1.50	% N/A	N/A		

(Dollars in thousands)	As of June 30, 2012							
	Actual		For Capital Adequacy Purposes				To be "Well Capitalized" Under Prompt Corrective Action Regulations

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We measure interest rate sensitivity as the difference between amounts of interest-earning assets and interest-bearing liabilities that mature or contractually re-price within a given period of time. The difference, or the interest rate sensitivity gap, provides an indication of the extent to which an institution's interest rate spread will be affected by changes in interest rates. A gap is considered positive when the amount of interest rate sensitive assets exceeds the amount of interest rate sensitive liabilities and negative when the amount of interest rate sensitive liabilities exceeds the amount of interest rate sensitive assets. In a rising interest rate environment, an institution with a positive gap would be in a better position than an institution with a negative gap to invest in higher yielding assets or to have its asset yields adjusted upward, which would cause the yield on its assets to increase at a faster pace than the cost of its interest-bearing liabilities. During a period of falling interest rates, however, an institution with a positive gap would tend to have its assets reprice at a faster rate than one with a negative gap, which would tend to reduce the growth in its net interest income.

Table of Contents

The following table sets forth the interest rate sensitivity of our assets and liabilities at December 31, 2012:

(Dollars in thousands)	Term to Repricing, Repayment, or Maturity at December 31, 2012			
	One Year or Less	Over One Year Through Five Years	Over Five Years	Total
Interest-earning assets:				
Cash and cash equivalents	\$89,502	\$—	\$—	\$89,502
Securities ¹	278,257	31,256	152,841	462,354
Stock of the FHLB, at cost	24,769	—	—	24,769
Loans—net of allowance for loan losses	466,403	1,235,763	453,140	2,155,306
Loans held for sale	97,182	—	—	97,182
Total interest-earning assets	956,113	1,267,019	605,981	2,829,113
Non-interest earning assets	—	—	—	45,209
Total assets	\$956,113	\$1,267,019	\$605,981	\$2,874,322
Interest-bearing liabilities:				
Interest-bearing deposits ³	\$1,470,951	\$312,753	\$166,707	\$1,950,411
Securities sold under agreements to repurchase	20,000	95,000	—	115,000
Advances from the FHLB ⁴	342,000	110,000	75,000	527,000
Other borrowed funds	5,155	—	—	5,155
Total interest-bearing liabilities	1,838,106	517,753	241,707	2,597,566
Other non-interest-bearing liabilities	—	—	—	34,143
Stockholders' equity	—	—	—	242,613
Total liabilities and equity	\$1,838,106	\$517,753	\$241,707	\$2,874,322
Net interest rate sensitivity gap	\$(881,993)	\$749,266	\$364,274	\$231,547
Cumulative gap	\$(881,993)	\$(132,727)	\$231,547	\$231,547
Net interest rate sensitivity gap—as a % of interest earning assets	(92.25)%	59.14%	60.11%	8.18%
Cumulative gap—as % of cumulative interest earning assets	(92.25)%	(5.97)%	8.18%	8.18%

1. Comprised of U.S. government securities and mortgage-backed securities, which are classified as held-to-maturity, available-for-sale and trading. The table reflects contractual re-pricing dates.

2. The table reflects either contractual re-pricing dates or maturities.

3. The table assumes that the principal balances for demand deposit and savings accounts will re-price in the first year.

4. The table reflects either contractual repricing dates or maturities and does not estimate prepayments or puts.

Although “gap” analysis is a useful measurement device available to management in determining the existence of interest rate exposure, its static focus as of a particular date makes it necessary to utilize other techniques in measuring exposure to changes in interest rates. For example, gap analysis is limited in its ability to predict trends in future earnings and makes no assumptions about changes in prepayment tendencies, deposit or loan maturity preferences or repricing time lags that may occur in response to a change in the interest rate environment.

Table of Contents

We attempt to measure the effect market interest rate changes will have on the net present value of assets and liabilities, which is defined as market value of equity. The market value of equity for these purposes is not intended to refer to the trading pricing of our common stock. We analyze the market value of equity sensitivity to an immediate parallel and sustained shift in interest rates derived from the current treasury and LIBOR yield curves. For rising interest rate scenarios, the industry market interest rate forecast was increased by 100, 200 and 300 basis points. The following table indicates the sensitivity of market value of equity to the interest rate movement described above:

(Dollars in thousands)	As of December 31, 2012			Net	
	Net Present Value	Percentage Change from Base		Present Value as a Percentage of Assets	
Up 300 basis points	\$203,022	(30.8))%	7.30	%
Up 200 basis points	232,749	(20.7))%	8.17	%
Up 100 basis points	261,254	(10.9))%	8.95	%
Base	293,367	—	%	9.82	%
Down 100 basis points	328,359	11.9	%	10.78	%
Down 200 basis points	344,248	17.3	%	11.19	%

The computation of the prospective effects of hypothetical interest rate changes is based on numerous assumptions, including relative levels of interest rates, asset prepayments, runoffs in deposits and changes in repricing levels of deposits to general market rates, and should not be relied upon as indicative of actual results. Furthermore, these computations do not take into account any actions that we may undertake in response to future changes in interest rates.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISKS

For quantitative and qualitative disclosures regarding market risks in our portfolio, see, “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Quantitative and Qualitative Disclosures About Market Risk.”

ITEM 4. CONTROLS AND PROCEDURES

The Company’s management, with the participation of its Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of the design and operation of the Company’s disclosure controls and procedures, pursuant to Exchange Act Rule 13a-15(e). Based upon that evaluation, our Chief Executive Officer along with our Chief Financial Officer concluded that, as of the end of the period covered by this report, the Company’s disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified by the Securities and Exchange Commission’s rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

There were no changes in the Company’s internal control over financial reporting that occurred during the quarter ended December 31, 2012 that have materially affected, or are reasonably likely to materially affect our internal control over financial reporting.

Management, including the Company’s Chief Executive Officer and Chief Financial Officer, does not expect that the Company’s internal controls will prevent or detect all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the

benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of internal controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. Also, any evaluation of the effectiveness of controls in future periods are subject to the risk that those internal controls may become inadequate because of changes in business conditions, or that the degree of compliance with the policies or procedures may deteriorate.

PART II—OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are not involved in any material legal proceedings. From time to time we may be a party to a claim or litigation that arises in the ordinary course of business, such as claims to enforce liens, claims involving the origination and servicing of loans, and other issues related to the business of the Bank.

ITEM 1A. RISK FACTORS

We face a variety of risks that are inherent in our business and our industry. These risks are described in more detail under “MD&A - Factors That May Affect Our Performance,” in our Annual Report on Form 10-K for the year ended June 30, 2012. We encourage you to read these factors in their entirety. Moreover, other factors may also exist that we cannot anticipate or that we currently do not consider to be significant based on information that is currently available.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The table below sets forth our market repurchases of Bofl common stock and the Bofl common shares retained in connection with net settlement of restricted stock awards during the six months ended December 31, 2012. Purchases made relate to the stock repurchase plan of 414,991 shares that was originally approved by the Company's Board of Directors on July 5, 2005, plus an additional 500,000 shares approved on November 20, 2008. Stock repurchased under this plan will be held as treasury shares.

Period	Number of Shares Purchased	Average Price Paid Per Shares	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs
Stock Repurchases				
Beginning Balance at July 1, 2012	595,700	\$5.72	595,700	319,291
Ending Balance at December 31, 2012	595,700	\$5.72	595,700	319,291
Stock Retained in Net Settlement				
Beginning Balance at July 1, 2012	213,342			
July 1, 2012 to July 31, 2012	1,388			
August 1, 2012 to August 31, 2012	16,515			
September 1, 2012 to September 30, 2012	7,625			
October 1, 2012 to October 31, 2012	2,254			
November 1, 2012 to November 30, 2012	—			
December 1, 2012 to December 31, 2012	4,938			
Ending Balance at December 31, 2012	246,062			
Total Treasury Shares at December 31, 2012	841,762			

In October 2012, the Company sold an aggregate of 1,857 shares of its Series C Preferred Stock in transactions that were not registered under the Securities Act of 1933, as amended. The Company previously reported this transaction and provided the information required by Item 701 of Regulation S-K in its Current Report on Form 8-K filed on October 17, 2012.
