## Section 1 — Conflict Minerals Disclosure

### Item 1.01 Conflict Minerals Disclosure and Report

HP Inc. (“HP”) is a leading global provider of personal computing and other access devices, imaging and printing products, and related technologies, solutions and services. HP sells to individual consumers, small- and medium-sized businesses and large enterprises, including customers in the government, health and education sectors. Unless otherwise specified or unless the context otherwise requires, references to “HP,” “we,” “us” or “our” refer to HP Inc. and its consolidated subsidiaries. Terms or phrases that are italicized the first time they appear have the meanings given in Item 1.01 of Form SD.

We have a long-standing commitment to sustainability. As part of our commitment, we expect our suppliers to conduct their worldwide operations in a socially and environmentally responsible manner pursuant to HP’s Supply Chain Social and Environmental Responsibility Policy. In 2011, we added to this policy a section on conflict minerals. We engage in ongoing supplier outreach and communications regarding the substance of our conflict minerals policy, our expectations of suppliers with respect to conflict minerals, and our objective of responsible mineral sourcing. The policy is available on our website at <http://h20195.www2.hp.com/V2/GetDocument.aspx?docname=c04797682>.

### Conflict Minerals Disclosure

#### Reasonable Country of Origin Inquiry

We conducted a reasonable country of origin inquiry (“RCOI”) to determine whether any conflict minerals in our 2017 products originated in the Democratic Republic of Congo or adjoining countries (the “Covered Countries”), or were conflict minerals from recycled or scrap sources. To make this determination, downstream companies like HP must obtain and review sourcing information on the entities reported to provide conflict minerals necessary to functionality or production (“necessary conflict minerals”) contained in our products in the form of gold and the derivatives tin, tantalum, and tungsten (collectively, “3TG”). We asked our direct suppliers (who in turn asked their suppliers) to provide us with relevant information and to report to us the entities that were providing necessary conflict minerals to them or their suppliers. HP social and environmental responsibility requirements for suppliers, which include conflict minerals due diligence and reporting obligations, are incorporated into HP’s contracts with direct suppliers.

#### Our RCOI included:

- surveying 772 of our direct suppliers from which we identified 218 direct suppliers of materials, parts, components or products containing necessary conflict minerals (“3TG Direct Suppliers”);

- requiring that 3TG Direct Suppliers use the Responsible Minerals Initiative (“RMI,” formerly the Conflict Free Sourcing Initiative (“CFSI”)) Conflict Minerals Reporting Template (the “Template”) to obtain and provide to us information from their supply chains regarding relevant entities and the origin of necessary conflict minerals sourced by these entities;

- conducting follow-up with 3TG Direct Suppliers with analysis of their submissions compared to our criteria, specifying deficiencies to be corrected in their responses, if necessary, to clarify, update or complete information reported to us so that it meets our expectations;

- providing training and education to support 3TG Direct Suppliers in completing the Template;

- obtaining acceptable responses from 3TG Direct Suppliers, estimated to represent 98% of our 2017 spend with such suppliers;

- reviewing any information on countries of origin or recycled and scrap sourcing available through our membership in the Responsible Minerals Initiative (member ID: HPQQ) for reported entities; and

engaging an external expert consultant to review other publicly available information to assist us in determining whether or not reported entities may have sourced from the Covered Countries or may source only conflict minerals from recycled or scrap sources.

---

We compared all entities reported to us by our 3TG Direct Suppliers against the Responsible Minerals Initiative list of smelters, refiners, recyclers or scrap processors of conflict minerals in order to identify the 310 entities providing necessary conflict minerals that were reported to be in our supply chain (collectively, the “3TG facilities”). Of the 310 3TG facilities, we reasonably believe that 49 exclusively provided conflict minerals from recycled or scrap sources and 190 did not source conflict minerals from the Covered Countries, leaving 71 facilities for due diligence.

For 2017, we determined with respect to our products containing necessary conflict minerals that we know or have reason to believe that some of the necessary conflict minerals from those 71 3TG facilities originated or may have originated in the Covered Countries and may not be conflict minerals from recycled or scrap sources. Accordingly, we conducted due diligence on the source and chain of custody of necessary conflict minerals from the 71 3TG facilities and have prepared the Conflict Minerals Report attached hereto as Exhibit 1.01.

Attachment A to the Conflict Minerals Report includes the countries from which the 310 supplier-reported 3TG facilities may have sourced necessary conflict minerals.

A copy of the Conflict Minerals Report filed for the calendar year ended December 31, 2017 is publicly available electronically at <http://www8.hp.com/us/en/pdf/sustainability/conflictminerals.pdf>.

Item 1.02 Exhibit

The Conflict Minerals Report for the calendar year ended December 31, 2017 is filed as Exhibit 1.01 hereto.

Section 2 — Exhibits

Item 2.01 Exhibits

Exhibit 1.01 Conflict Minerals Report as required by Items 1.01 and 1.02 of Form SD.

---

**SIGNATURE**

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.
