NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(In thousands, except share data)

NOTE A -- BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements of Buckeye Technologies Inc. and its subsidiaries (the Company) have been prepared in accordance with generally accepted accounting principles for interim

Edgar Filing: BUCKEYE TECHNOLOGIES INC - Form 10-Q

financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and nine months ended March 31, 2002 are not necessarily indicative of the results that may be expected for the year ended June 30, 2002. All significant intercompany accounts and transactions have been eliminated in consolidation. For further information and a listing of the Company's significant accounting policies, refer to the financial statements and notes thereto included in the Company's annual report on Form 10-K for the year ended June 30, 2001.

Certain amounts in the 2001 financial statements have been reclassified to conform with the 2002 financial statement presentation.

NOTE B - CHANGE IN ACCOUNTING METHOD

Through June 30, 2000, property, plant and equipment had been depreciated on the straight-line method over the estimated useful lives of the assets, which range from 5 to 40 years. Effective July 1, 2000, depreciation on the Company's production machinery and equipment at cotton cellulose and airlaid nonwovens plants was computed using the units-of-production method, which is based upon the expected productive hours of the assets, subject to a minimum level of depreciation. The Company believes the units-of-production method is preferable to the method previously used because the new method recognizes that depreciation of this machinery and equipment is related substantially to physical wear due to usage rather than the passage of time. This method, therefore, more appropriately matches production costs over the lives of the production machinery and equipment of the cotton cellulose and airlaid nonwovens plants with the revenues of those plants and results in a more accurate allocation of the cost of the physical assets to the periods over their useful lives. The cumulative effect of applying the new method for years prior to 2001 is an increase to income of \$3,249 net-of-tax (\$4,535 pre-tax) reported as a cumulative effect of accounting change in the consolidated statements of operations for the year ended June 30, 2001.

NOTE C - RESTRUCTURING COSTS

During the quarter ended March 31, 2002, the Company entered into a restructuring program. The program is designed to deliver cost reductions through reduced overhead expenses. The cost recorded during the quarter ended March 31, 2002, comprised mainly of severance and other employee benefit costs, is \$965 before tax.

Involuntary termination benefits of \$639 have been paid and \$299 have been accrued as of March 31, 2002. Payments related to the restructuring program are expected to continue into the first quarter of fiscal year 2003. As a result of the restructuring, approximately 130 positions have been eliminated. All costs of the program are reported separately in the statements of operations as restructuring costs. Several geographies and businesses are impacted by this cost reduction program; however, most of the impact occurred outside the United States.

NOTE D - BUSINESS COMBINATION

On August 1, 2000, the Company acquired the cotton cellulose business

Edgar Filing: BUCKEYE TECHNOLOGIES INC - Form 10-Q

of Fibra, S.A. (Americana), located in Americana, Brazil for \$36,588, including acquisition costs. The acquisition was funded using borrowings from the Company's revolving credit facility. The acquisition was accounted for using the purchase method of accounting. In May 2001, production at Americana was suspended and capital improvements are planned to allow sales to market customers. The operating results of Americana have been included in the consolidated statements of income from the date of acquisition. The following unaudited pro forma results of operations assume that the acquisition occurred at the beginning of the periods presented.

Pro forma results of operations	Nine Months Ended 2002

Net sales.....	\$475,090
Income (loss) before cumulative effect of change in accounting....	(5,005)
Net income (loss).....	(16,505)

Basic earnings (loss) per share.....	\$ (0.48)
Diluted earnings (loss) per share.....	\$ (0.48)

The pro forma financial information is presented for information purposes only and is not necessarily indicative of the operating results that would have occurred had the business combination been consummated as of the above dates, nor is it necessarily indicative of future operating results.

NOTE E -- RECENTLY ISSUED ACCOUNTING STANDARDS

In June 2001, the Financial Accounting Standards Board issued Statements of Financial Accounting Standards No. 141, Business Combinations (SFAS No. 141) and No. 142, Goodwill and Other Intangible Assets (SFAS No. 142). The Company adopted SFAS 142 on July 1, 2001 and discontinued the amortization of goodwill. The following schedule adjusts reported net income (loss) and related earnings per share to exclude amortization expense related to goodwill, including any related tax effects, for all periods presented:

	Quarter Ended March 31, 2002	2001	Nine Months 2002
	-----	-----	-----
Adjusted income (loss) before cumulative effect of change in accounting.....	\$ (4,169)	\$ 10,263	\$ (5,005)
Net income (loss):			
Originally reported net income (loss) ..	\$ (4,169)	\$ 9,290	\$ (16,505)
Add back: Goodwill Amortization.....	-	973	
(Net of taxes)			
Adjusted net income (loss).....	\$ (4,169)	\$ 10,263	\$ (16,505)
	=====	=====	=====
Adjusted earnings (loss) per share:			
Basic.....	\$ (0.12)	\$ 0.30	\$ (0.48)
Diluted.....	\$ (0.12)	\$ 0.29	\$ (0.48)

Under the guidelines of SFAS 142, the Company has completed its

Edgar Filing: BUCKEYE TECHNOLOGIES INC - Form 10-Q

impairment assessments of the carrying value of goodwill. In the assessment of the carrying value of goodwill, the Company developed its best estimate of operating cash flows over the period approximating the remaining life of the business' long-lived assets.

7

Based on this assessment, effective July 1, 2001, the Company has reduced its goodwill by \$11,500 in its converting business, which was purchased as part of the Merfin acquisition in 1997. There was no tax benefit recorded as a result of the reduction in the carrying value of the goodwill. The low growth rate in the converting business does not support its goodwill on a discounted basis.

NOTE F -- INVENTORIES

The components of inventory consist of the following:

	March 31 2002	June 30 2001
Raw materials.....	\$38,674	\$ 39,008
Finished goods.....	84,043	76,384
Storeroom and other supplies.....	22,357	21,388
	-----	-----
	\$145,074	\$136,780
	=====	=====

NOTE G -- DEBT

Revolving Credit Facility. The Company amended its Revolving Credit Facility on March 18, 2002 to modify the financial covenants for the period March 31, 2002 through June 30, 2003. Interest rates were amended to range from LIBOR plus 2.75% to 3.75% or the agent's prime rate plus 1.75% to 2.25%. The Company has agreed that by August 31, 2002 it shall sell its nonredeemable capital stock on arm's length terms in return for at least \$30,000 in net sale proceeds. On March 28, 2002, the Company borrowed the remaining availability on its Revolving Credit Facility and invested the excess cash in a AAA rated money market fund.

Senior Subordinated Notes. At March 31, 2002, the Company's fixed charge coverage ratio (as defined in the subordinated note indentures) fell below 2:1. As specified in those indentures, the Company's debt is now limited to "Permitted Indebtedness" (also defined in the indentures), until the ratio again equals or exceeds 2:1. Under the "Permitted Indebtedness" limitation, the Company is limited to its current borrowings under the revolving credit facility and may continue to borrow under its receivables based credit facility up to the \$30,000 limit. In addition, the Company has a \$25,000 basket (as defined in the 1995 Indenture) that can be used for any new indebtedness. In the event that any principal is repaid on the receivables based credit facility, any new borrowing under the receivables based credit facility will be counted against the \$25,000 basket.

The Company has no off-balance sheet financing.

NOTE H -- COMPREHENSIVE INCOME (LOSS)

The components of comprehensive income (loss) consist of the following:

Edgar Filing: BUCKEYE TECHNOLOGIES INC - Form 10-Q

	Quarter Ended March 31		Nin
	2002	2001	2002
Net income (loss).....	\$ (4,169)	\$9,290	\$ (16,50
Foreign currency translation adjustments - net....	(1,806)	(15,096)	(2,72
Comprehensive income (loss).....	\$ (5,975)	\$ (5,806)	\$ (19,23

The change in the foreign currency translation adjustment is primarily due to fluctuations in the exchange rate of the US dollar and the euro, the Brazilian real and the Canadian dollar.

8

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Critical Accounting Policies

The Company's financial statements are based on the application of accounting policies, which require management to make estimates and assumptions. We believe the following are some of the more critical judgment areas in the application of our accounting policies that currently affect our financial condition and results of operations.

Inventories

Inventories are stated at the lower of cost or market. In assessing the ultimate realization of inventories, we are required to make judgments as to future demand requirements and estimated market values and compare that with the current cost of inventory. If actual market conditions are less favorable than those projected, inventory write-downs may be required.

Depreciation

The Company provides for depreciation on its production machinery and equipment at the cotton cellulose and airlaid nonwovens plants using the units-of-production depreciation method. The depreciation is based on the expected productive hours of the assets and is subject to a minimum level of depreciation. If the estimated productive hours of these assets change in the future, the Company may be required to adjust depreciation expense per unit of production, accordingly.

Goodwill and Other Acquired Intangible Assets

The Company has made acquisitions in the past that included a significant amount of goodwill and other intangible assets. On July 1, 2001, the Company adopted Statement of Financial Accounting Standards No. 142, "Goodwill and Other Intangible Assets" and discontinued the amortization of goodwill. Under the guidelines of SFAS 142, goodwill is subject to an annual impairment test based on its estimated fair value. Other intangible assets that meet certain criteria will continue to be amortized over their useful lives and will

Edgar Filing: BUCKEYE TECHNOLOGIES INC - Form 10-Q

also be subject to an impairment test based on estimated fair value. Estimated fair value is typically based on operating earnings adjusted by a discount factor in valuing future cash flows. There are many assumptions and estimates underlying the determination of an impairment loss. If the estimates of future cash flows or their related assumptions change, additional impairment losses could be recorded in the future.

Planned Maintenance Shutdowns

The Company accrues the cost of periodic planned maintenance shutdowns, over the period between shutdowns, based on its estimates of incremental spending and fixed overhead cost. If the estimates of costs or the period between shutdowns are different than those projected, an adjustment to the accrual may be required.

Restructuring Costs

During the quarter ended March 31, 2002, the Company entered into a restructuring program. The program is designed to deliver cost reductions through reduced overhead expenses. The cost recorded during the quarter ended March 31, 2002, comprised mainly of severance and other employee benefit costs, is \$1.0 million before tax.

9

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (cont'd)

Involuntary termination benefits of \$0.6 million have been paid and \$0.3 million have been accrued as of March 31, 2002. Payments related to the restructuring program are expected to continue into the first quarter of fiscal year 2003. As a result of the restructuring, approximately 130 positions have been eliminated resulting in cost savings of over \$7.0 million annually. All costs of the program are reported separately in the statements of operations as restructuring costs. Several geographies and businesses are impacted by this cost reduction program; however, most of the impact occurred outside the United States.

Results of Operations

Net sales for the quarter ended March 31, 2002 were \$164.2 million compared to \$181.9 million for the same period in the prior fiscal year, a decrease of \$17.7 million or 9.7%. The decrease in net sales was primarily due to lower sales prices of fluff pulp. Net sales for the nine-month period ended March 31, 2002 were \$475.1 million compared to \$556.5 million for the same period in the prior fiscal year, a decrease of \$81.4 million or 14.6%. The decrease in net sales was primarily due to lower sales prices of fluff pulp and airlaid nonwovens and lower shipment volumes of cotton cellulose. These were partially offset by higher sales prices of cotton cellulose.

Operating income for the quarter ended March 31, 2002 was \$7.4 million compared to \$27.3 million for the same period in the prior fiscal year, a decrease of \$19.9 million or 72.9%. Operating income for the nine months ended March 31, 2002 was \$29.3 million compared to \$93.2 million for the same period in the prior fiscal year, a decrease of \$63.9 million or 68.6%. Operating income decreased mainly due to the sales issues previously noted and increased cost of cotton raw materials. The decrease was partially offset by reduced sales, research and administrative expenses of \$9.5 million or 26.3% for the nine months ended March 31, 2002.

Edgar Filing: BUCKEYE TECHNOLOGIES INC - Form 10-Q

Net interest expense and amortization of debt costs were \$12.3 million for the quarter ended March 31, 2002 compared to \$11.7 million for the quarter ended March 31, 2001. Net interest expense and amortization of debt costs were \$35.6 million for the nine months ended March 31, 2002 compared to \$34.2 million for the same period of the prior fiscal year. The increase was primarily due to higher debt levels and lower capitalized interest, offset by lower interest rates.

The Company's effective tax benefit rate was 24.4% for the quarter ended March 31, 2002 compared to the effective tax rate of 34.5% for the quarter ended March 31, 2001 primarily due to the write-off of foreign withholding taxes that cannot be utilized as tax credits.

Financial Condition

Cash Flow

EBITDA represents earnings before interest, taxes, depreciation, amortization and non-recurring items. EBITDA for the quarters ended March 31, 2002 and 2001 was \$19.6 million and \$39.2 million respectively. EBITDA for the nine months ended March 31, 2002 and 2001 was \$63.8 million and \$129.9 million, respectively. Cash provided by operating activities for the nine months ended March 31, 2002 and 2001 were \$13.8 million and \$25.7 million, respectively. The decrease of \$11.9 million was due primarily to lower earnings partially offset by a smaller increase in finished goods inventory in the nine months ended March 31, 2002. Additional borrowings from the credit facilities, along with the cash provided from operations, were used to fund capital expenditures and to make the \$22.0 million note payment to UPM-Kymmene for the purchase of Walkisoft. Cash used in investing activities for the nine months ended March 31, 2002 was \$29.5 million compared to \$144.6 million for the same period in the prior fiscal year. The decrease is due mainly to the completion of the large airlaid nonwovens machine at the Gaston County, North Carolina plant.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (cont'd)

Liquidity and Capital Resources

The Company has the following major sources of financing: revolving credit facility, receivables based credit facility and senior subordinated notes. The Company's revolving credit facility and senior subordinated notes contain various covenants. At March 31, 2002, the Company was in compliance with such covenants and believes it will be in compliance for the foreseeable future.

Revolving Credit Facility. The Company amended its Revolving Credit Facility on March 18, 2002 to modify the financial covenants for the period March 31, 2002 through June 30, 2003. On March 28, 2002, the Company borrowed the remaining availability on its \$215 million Revolving Credit Facility and invested the excess cash in a AAA rated money market fund.

Receivables Based Credit Facility. At March 31, 2002, \$29.9 million was outstanding on the Company's \$30.0 million receivables based credit facility. The interest rate applicable to borrowings under this facility is one-week LIBOR plus 0.95%, and the facility is secured by certain insured receivables. During the quarter ended March 31, 2002, the Company reclassified the outstanding

Edgar Filing: BUCKEYE TECHNOLOGIES INC - Form 10-Q

amount of the receivables based credit facility to the current portion of long-term debt. The Company intends to renew and, based on discussions with the lender, believes it will be able to renew the loan for an additional year when the credit facility matures on December 5, 2002.

Senior Subordinated Notes. At March 31, 2002, the Company's fixed charge coverage ratio (as defined in the subordinated note indentures) fell below 2:1. Falling below the 2:1 ratio does not breach any covenant and is not an event of default under any of the Company's debt agreements. As specified in those indentures, the Company's debt is now limited to "Permitted Indebtedness" limitation (also defined in the indentures), until the ratio again equals or exceeds 2:1. Under the "Permitted Indebtedness" limitation, the Company is limited to but is able to maintain its current borrowings under the revolving credit facility and to continue to borrow under its receivables based credit facility. In addition, the Company has a \$25.0 million basket (as defined in the 1995 Indenture) that can be used for any new indebtedness. In the event that any principal is repaid on the receivables based credit facility, any new borrowing under the receivables based credit facility will be counted against the \$25 million basket.

While there can be no assurances, the Company believes that operating results will improve and the Company will exceed the 2:1 ratio, which is measured on a rolling four-quarter basis, in the next nine to twelve months.

On March 15, 2002, the Company filed a Form S-3 shelf registration statement. The shelf registration statement will allow the Company to issue various types of securities, including common stock, preferred stock and debt securities, from time to time, up to an aggregate of \$300 million. The Company filed the registration statement to gain additional flexibility in accessing capital markets for general corporate purposes. This S-3 registration statement became effective on April 18, 2002.

While there can be no assurances, the Company believes that its cash flow from operations along with current cash and cash equivalents will be sufficient to fund capital expenditures (expected to total \$37.0 million for this fiscal year and \$45.0 million for next fiscal year), meet operating expenses and service all debt requirements for the foreseeable future.

11

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (cont'd)

Recently Issued Accounting Standards

Effective July 1, 2001 the Company adopted SFAS No. 142, Goodwill and Other Intangible Assets, which establishes new accounting and reporting requirements for goodwill and other intangible assets as described in our critical accounting policies. Based on the assessment, effective July 1, 2001, the Company has reduced its goodwill by \$11,500 in the converting business, which was purchased as part of the Merfin acquisition in 1997. There was no tax benefit recorded as a result of the reduction in the carrying value of the goodwill.
