1. Organization and Significant Accounting Policies

Salomon Brothers High Income Fund II Inc. (the Fund) was incorporated in Maryland and is registered as a diversified, closed-end, management investment company under the Investment Company Act of 1940, as amended. The Fund seeks to maximize current income by investing at least 80% of its net assets plus any borrowings for investment purposes in high yield debt securities (as defined in the Fund's prospectus). As a secondary objective, the Fund seeks capital appreciation to the extent consistent with its objective of seeking to maximize current income.

The following are significant accounting policies consistently followed by the Fund. These policies are in conformity with U.S. generally accepted accounting principles (GAAP).

(a) Investment Valuation In valuing the Fund's assets, all securities for which market quotations are readily available are valued (i) at the last sale price prior to the time of determination if there were a sale on the date of determination, (ii) at the mean between the last current bid and asked prices if there were no sales on such date and bid and asked quotations are available, and (iii) at the bid price if there were no sales price on such date and only bid quotations are available. Publicly traded foreign government debt securities are typically traded internationally in the over-the-counter market, and are valued at the mean between the last current bid and asked price as of the close of business of that market. However, when the spread between bid and asked price exceeds five percent of the par value of the security, the security is valued at the bid price. Securities may also be valued by independent pricing services which use prices provided by market-makers or estimates of market values obtained from yield data relating to instruments or securities with similar characteristics. When market quotations are not readily available, or are determined not to reflect accurately fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Fund calculates its net asset value, the Fund may value these investments at fair value as determined in accordance with the procedures approved by the Fund's Board of Directors. Short-term investments having a maturity of 60 days or less are valued at amortized cost, which approximates market value.

(b) Repurchase Agreements. When entering into repurchase agreements, it is the Fund's policy that a custodian take possession of the underlying collateral securities, the value of which at least equals the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction exceeds one business day, the value of the collateral is marked-to-market to ensure the adequacy of the collateral. If the seller defaults and the value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited.

(c) Reverse Repurchase Agreements. The Fund may enter into reverse repurchase agreements in which the Fund sells portfolio securities and agrees to repurchase them from the buyer at a specified date and price. Whenever the Fund enters into a reverse repurchase agreement, the Fund's custodian delivers liquid assets to the counterparty in an amount at least equal to the repurchase price marked-to-market daily (including accrued interest), and the counterparty subsequently monitors the account to ensure that such equivalent value is maintained. The Fund pays interest on amounts obtained pursuant to reverse repurchase agreements. Reverse repurchase agreements are considered to be borrowings by the Fund. Reverse repurchase agreements involve leverage risk and the risk that the market value of securities purchased

Notes to Schedule of Investments (unaudited)(continued)

with the proceeds from the reverse repurchase agreement may decline below the repurchase price of the securities sold by the Fund which, it is obligated to repurchase.

(d) Lending of Portfolio Securities. The Fund has an agreement with its custodian whereby the custodian may lend securities owned by the Fund to brokers, dealers and other financial organizations, and receives a lender's fee. Fees earned by the Fund on securities lending are recorded as investment income. Loans of securities by the Fund are collateralized by cash, U.S. government securities or high quality money market instruments that are maintained at all times in an amount at least equal to the current market value of the loaned securities, plus a margin which may vary depending on the type of securities loaned. The custodian establishes and maintains the collateral in a segregated account. The Fund maintains exposure for the risk of any losses in the investment of amounts received as collateral. The Fund has the right under the lending agreement to recover the securities from the borrower on demand.

(e) Loan Participations. The Fund invests in fixed and floating rate loans arranged through private negotiations between a foreign sovereign entity and one or more financial institutions (lenders). The Fund's investment in any such loan may be in the form of a participation in or an assignment of the loan. In connection with purchasing participations, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loan, nor any rights of set-off against the borrower, and the Fund may not benefit directly from any collateral supporting the loan in which it has purchased the participation. As a result, the Fund will assume the credit risk of both the borrower and the lender that is selling the participation. In the event of the insolvency of the lender selling the participation, the Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower. When the Fund purchases assignments from lenders, the Fund will acquire direct rights against the borrower on the loan, except that under certain circumstances such rights may be more limited than those held by the assigning lender. The Fund may have difficulty disposing of participation/assignments because the market for certain instruments may not be highly liquid.

(f) Credit and Market Risk. The yields of emerging markets debt obligations and high-yield corporate debt obligations reflect, among other things, perceived credit and market risk. The Fund's investment in securities rated below investment grade typically involves risks not associated with higher rated securities including, among others, overall greater risk of timely and ultimate payment of interest and principal, greater market price volatility and less liquid secondary market trading. The consequences of political, social, economic or diplomatic changes may have disruptive effects on the market prices of investments held by the Fund.

(g) Investment Transactions. Investment transactions are recorded on a trade date basis.

Notes to Schedule of Investments (unaudited)(continued)

At January 31, 2005, the Fund loaned securities having a market value of \$227,297,561. The Fund received cash collateral amounting to \$232,399,476 which was invested in the State Street Navigator Securities Lending Trust Prime Portfolio, a Rule 2a-7 money market fund, registered under the 1940 Act.

At January 31, 2005, the Fund held one loan participation with a total cost of \$1,104,294 and a total market value of \$1,100,792.

3. Loan

At January 31, 2005, the Fund had outstanding a \$300,000,000 loan pursuant to a revolving credit and security agreement with Crown Capital Company LLC, and Citicorp North America Inc. (CNA), an affiliate of SBAM. In addition, CNA acts as administrative agent. The loans generally bear interest at a variable rate based on the weighted average interest rates of the underlying commercial paper or LIBOR, plus any applicable margin. Securities held by the Fund are subject to a lien, granted to the lenders, to the extent of the borrowing outstanding and any additional expenses.
