Add: Capitalized interest	1,528
Add: Amortization of discounts	1,146
Total Fixed Charges	\$ 44,370
 Ratio of earnings to fixed charges	 5.11

(1) As adjusted for the issuance of notes in this offering and application of the net proceeds of the offering to repay borrowings under our bank credit facility.

For the purposes of determining the ratio of earnings to fixed charges, earnings consist of income before taxes, plus fixed charges, less capitalized interest, and fixed charges consist of interest expense (net of capitalized interest), plus capitalized interest, plus amortized discounts related to indebtedness. The pro forma column is calculated giving effect to the application of the net proceeds from the offering, reflecting the net change in interest from the refinancing of indebtedness incurred under the Company's bank credit facility with the notes.

After giving effect to this offering and the use of proceeds therefrom, the long-term indebtedness outstanding under our Credit Facility will be \$61,567,000.
