MARINER ENERGY, INC.
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. Summary of Significant Accounting Policies

Operations Mariner Energy, Inc. (Mariner or the Company) is an independent oil and gas exploration, development and production company with principal operations in West Texas and in the Gulf of Mexico, both shelf and deepwater. Unless otherwise indicated, references to Mariner , the Company , we , our , ours and us refer to Energy, Inc. and its subsidiaries collectively.

Interim Financial Statements The accompanying unaudited consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in conformity with generally accepted accounting principles in the United States of America (GAAP) have been condensed or omitted pursuant to such rules and regulations. In the opinion of management, all adjustments (consisting of a normal and recurring nature) considered necessary for a fair presentation have been included. Operating results for interim periods are not necessarily indicative of the results that may be expected for the entire year. These unaudited condensed consolidated financial statements included herein should be read in conjunction with the Financial Statements and Notes included in the Company s Annual Report on Form 10-K for the year ended December 31, 2007.

Use of Estimates The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. Our most significant financial estimates are based on remaining proved natural gas and oil reserves. Estimates of proved reserves are key components of our depletion rate for natural gas and oil properties, our unevaluated properties and our full cost ceiling test. In addition, estimates are used in computing taxes, preparing accruals of operating costs and production revenues, asset retirement obligations, fair value and effectiveness of derivative instruments and fair value of stock options and the related compensation expense. Because of the inherent nature of the estimation process, actual results could differ materially from these estimates.

Principles of Consolidation Our consolidated financial statements as of March 31, 2008 and December 31, 2007 include our accounts and the accounts of our subsidiaries. All inter-company balances and transactions have been eliminated.

Reclassifications Certain prior year amounts have been reclassified to conform to current year presentation.

Income Taxes Our provision for taxes includes both federal and state taxes. The Company records its federal income taxes using an asset and liability approach which results in the recognition of deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the book carrying amounts and the tax bases of assets and liabilities. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences and carryforwards are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Valuation allowances are established when necessary to reduce deferred tax assets to the amount more likely than not to be recovered.

There were no significant changes to the Company s uncertain tax positions in the first quarter of 2008. For a detail of the Company s uncertain tax positions, please refer to Note 9, Income Taxes to the Consolidated Financial Statements in the Company s Annual Report on Form 10-K for the year ended December 31, 2007.

Recent Accounting Pronouncements In March 2008, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 161, Disclosures about Derivative Instruments and Hedging Activities an amendment of FASB Statement No. 133 (SFAS 161). SFAS 161 is intended to improve financial reporting about derivative instruments and hedging activities by requiring enhanced disclosures to

Table of Contents

enable investors to better understand their effects on an entity's financial position, financial performance, and cash flows. SFAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. SFAS 161 also improves transparency about the location and amounts of derivative instruments in an entity's financial statements; how derivative instruments and related hedged items are accounted for under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS 133); and how derivative instruments and related hedged items affect its financial position, financial performance, and cash flows. SFAS 161 achieves these improvements by requiring disclosure of the fair values of derivative instruments and their gains and losses in a tabular format. It also provides more information about an entity's liquidity by requiring disclosure of derivative features that are credit risk related. Finally, it requires cross-referencing within footnotes to enable financial statement users to locate important information about derivative instruments. The Company is currently evaluating the provisions of this Statement.

In December 2007, FASB issued SFAS No. 141(R), *Business Combinations* (SFAS 141(R)), which replaces SFAS 141. SFAS 141(R) establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, any non-controlling interest in the acquiree and the goodwill acquired. The Statement also establishes disclosure requirements, which will enable users to evaluate the nature and financial effects of the business combination. SFAS 141(R) is effective for fiscal years beginning after December 15, 2008. The adoption of SFAS 141(R) will have an impact on accounting for business combinations with the effect dependent upon acquisitions at that time.

In December 2007, FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements* an amendment of Accounting Research Bulletin No. 51 (SFAS 160), which establishes accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net income attributable to the parent and to the noncontrolling interest, changes in a parent's ownership interest and the valuation of retained non-controlling equity investments when a subsidiary is deconsolidated. The Statement also establishes reporting requirements that provide sufficient disclosures that clearly identify and distinguish between the interests of the parent and the interests of the non-controlling owners. SFAS 160 is effective for fiscal years beginning after December 15, 2008. The Company has not determined the effect that the application of SFAS 160 will have on its consolidated financial statements.

In April 2007, FASB issued FASB Interpretation No. 39-1, *Amendment of FASB Interpretation No. 39 (FIN 39-1)*, which addresses certain modifications to FASB Interpretation No. 39, *Offsetting of Amounts Related to Certain Contracts*, and whether a reporting entity that is party to a master netting arrangement can offset fair value amounts recognized for the right to reclaim or obligation to return cash collateral against fair value amounts recognized for derivative instruments that have been offset under the same master netting arrangement in accordance with Interpretation 39. FIN 39-1 is effective for fiscal years beginning after November 15, 2007, with early application permitted. The provisions of FIN 39-1 were consistent with the Company's accounting practice. The adoption of FIN 39-1 did not impact the condensed consolidated financial statements of the Company.

During February 2007, the FASB issued SFAS No 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159). SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value, and thereby mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. This Statement also establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. SFAS 159 was effective for the Company as of January 1, 2008. SFAS 159 did not have an impact on the Company's Condensed Consolidated Financial Statements as the Company elected not to measure at fair value additional financial assets and liabilities not already required to be measured at fair value.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS 157), which establishes guidelines for measuring fair value and expands disclosures regarding fair value measurements. SFAS 157 does not require any new fair value measurements but rather it eliminates inconsistencies in the guidance found in various prior accounting pronouncements. SFAS 157 is effective for fiscal years beginning after November 15, 2007. In February 2008, the FASB issued Staff Position (FSP) No. FAS 157-2, *Effective Date of FASB*

Table of Contents

Statement No. 157, which delayed the effective date of SFAS 157 for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). This FSP is effective for financial statements issued during fiscal years beginning after November 15, 2008, and interim periods within those fiscal years for items within the scope of this FSP. Accordingly, our adoption of SFAS 157 was limited to financial assets and liabilities, which primarily affects the valuation of our derivative contracts. The adoption of SFAS 157 with respect to financial assets and liabilities did not have a material impact on our net asset values. See Note 11. We are still in the process of evaluating SFAS 157 with respect to its effect on nonfinancial assets and liabilities and therefore have not yet determined the impact that it will have on our financial statements upon full adoption in 2009. Nonfinancial assets and liabilities for which we have not applied the provisions of SFAS 157 include our asset retirement obligations and assets held for future sale.

2. Acquisitions and Dispositions

Gulf of Mexico Shelf Acquisition. On January 31, 2008, Mariner acquired 100% of the equity in a subsidiary of Hydro Gulf of Mexico, Inc. pursuant to a Membership Interest Purchase Agreement executed on December 23, 2007. The acquired subsidiary, now known as Mariner Gulf of Mexico LLC (MGOM), was an indirect subsidiary of StatoilHydro ASA and owns substantially all of its former Gulf of Mexico shelf operations. Mariner paid approximately \$243.0 million, subject to customary purchase price adjustments, including \$8.0 million for reimbursement of drilling costs attributable to the High Island 166 #5 well. The acquisition was financed by borrowing under Mariner's bank credit facility. As of March 31, 2008, additional purchase price adjustments resulted in a net credit to Mariner of approximately \$15.0 million.

Pro Forma Financial Information The pro forma information set forth below gives effect to the acquisition of MGOM as if it had been consummated as of the beginning of the applicable period. The acquisition was consummated on January 31, 2008. The pro forma information has been derived from the historical Consolidated Financial Statements of the Company and the statements of revenues and direct operating expenses of MGOM. The pro forma information is for illustrative purposes only. The financial results may have been different had MGOM been an independent company and had the companies always been combined. You should not rely on the pro forma financial information as being indicative of the historical results that would have been achieved had the acquisition occurred in the past or the future financial results that the Company will achieve after the acquisition.

	For the Three Months Ended March 31,	
	2008	2007
	(In thousands, except per share amounts)	
Pro Forma:		
Revenue	\$ 330,874	\$ 266,321
Net income available to common stockholders	\$ 75,628	\$ 47,980
Basic earnings per share	\$ 0.87	\$ 0.56
Diluted earnings per share	\$ 0.86	\$ 0.56

West Texas Acquisitions. On December 31, 2007 and February 29, 2008, Mariner acquired additional working interests in certain of its existing properties in the Spraberry field in the Permian Basin. Mariner internally estimated net proved oil and gas reserves attributable to the December 2007 acquisition of approximately 94.9 Bcfe (75% oil and NGLs) and to the February 2008 acquisition of approximately 14.0 Bcfe (65% oil and NGLs). Mariner intends to operate substantially all of the assets. The purchase price, subject to customary purchase price adjustments, for the December 2007 acquisition was approximately \$122.5 million, which Mariner financed under its bank credit facility, and for the February 2008 acquisition was approximately \$21.7 million.

Interest in Cottonwood On December 1, 2006, we completed the sale of our 20% interest in the Garden Banks 244 (Cottonwood) project to Petrobras America, Inc., for \$31.8 million. The sale was effective November 1, 2006 and represented approximately 6.6 Bcfe of proved reserves. Proceeds from the sale were deposited in trust with a qualified intermediary to preserve our ability to reinvest them in a tax-deferred, like-kind exchange transaction for federal

income tax purposes. Inasmuch as we elected not to identify replacement like-kind property to facilitate the exchange, proceeds and related interest totaling \$32.0 million were disbursed to us on January 19, 2007 and used to

Table of Contents

repay borrowings under our bank credit facility. No gain was recorded for book purposes on this disposition.

3. Long-Term Debt

Bank Credit Facility On January 31, 2008, the Company further amended its secured bank credit facility to increase the facility's maximum credit availability to \$1 billion, including up to \$50.0 million in letters of credit, subject to an increased borrowing base of \$750.0 million. The amendment also extended the facility's term to January 31, 2012; terminated an additional dedicated \$40.0 million letter of credit facility in favor of Forest Oil Corporation (Forest) due to Mariner's satisfaction of its obligations under a drill-to-earn program; and added as a permitted use of loan proceeds the funding of Mariner's purchase of Mariner Gulf of Mexico LLC (f/k/a Hydro Gulf of Mexico, L.L.C.). The Company's payment and performance of its obligations under the bank credit facility are secured by liens upon substantially all of the assets of the Company and its subsidiaries. Borrowings under our bank credit facility bear interest at either a LIBOR-based rate or a prime-based rate, at our option, plus a specified margin.

As of March 31, 2008 and December 31, 2007, \$430.0 million and \$179.0 million, respectively, was outstanding under the bank credit facility and the interest rate was 4.62% and 7.25%, respectively. In addition, as of March 31, 2008, four letters of credit totaling \$4.7 million were outstanding, of which \$4.2 million was required for plugging and abandonment obligations at certain of the Company's offshore fields.

The bank credit facility contains various restrictive covenants and other usual and customary terms and conditions, including limitations on the payment of cash dividends and other restricted payments, the incurrence of additional debt, the sale of assets, and speculative hedging. The Company was in compliance with the financial covenants under the bank credit facility as of March 31, 2008.

The Company must pay a commitment fee of 0.250% to 0.375% per year on the unused availability under the bank credit facility.

Senior Notes In 2006, the Company sold and issued \$300.0 million aggregate principal amount of its 7½% Senior Notes due 2013 (the 7½% Notes). In 2007, the Company sold and issued \$300.0 million aggregate principal amount of its 8% Senior Notes due 2017 (the 8% Notes and together with the 7½% Notes, the Notes). The Notes are senior unsecured obligations of the Company. The 7½% Notes mature on April 15, 2013 with interest payable on April 15 and October 15 of each year. The 8% Notes mature on May 15, 2017 with interest payable on May 15 and November 15 of each year. There is no sinking fund for the Notes. The Company and its restricted subsidiaries are subject to certain financial and non-financial covenants under each of the indentures governing the Notes.

Capitalized Interest For both of the three-month periods ended March 31, 2008 and 2007, capitalized interest totaled \$0.2 million.

4. Oil and Gas Properties

Our oil and gas properties are accounted for using the full-cost method of accounting. All direct costs and certain indirect costs associated with the acquisition, exploration and development of oil and gas properties are capitalized, including certain general and administrative expenses (G&A). For the three-month periods ended March 31, 2008 and 2007, capitalized G&A totaled \$4.6 million and \$2.2 million, respectively. Amortization of oil and gas properties is calculated using the unit-of-production method based on estimated proved oil and gas reserves.

GAAP requires that a quarterly full-cost ceiling limitation calculation be performed whereby net capitalized costs related to proved and unproved properties, less related deferred income taxes, may not exceed a ceiling limitation. The ceiling limitation is the amount equal to the present value discounted at 10% of estimated future net revenues from estimated proved reserves plus the lower of cost or fair value of unproved properties less estimated future production and development costs, all net of related income tax effect. The full-cost ceiling limitation is calculated using natural gas and oil prices in effect as of the balance sheet date and is adjusted for basis or location differential. Price is held constant over the life of the reserves. We use derivative financial instruments that qualify for cash flow hedge accounting under SFAS 133, Accounting for Derivative Instruments and Hedging Activities, to hedge against the volatility of oil and natural gas prices and, in accordance with SEC guidelines, we include

Table of Contents

estimated future cash flows from our hedging program in our ceiling test calculation. If net capitalized costs, less related deferred income taxes, were to exceed the ceiling limitation, the excess would be impaired and a permanent write-down would be recorded in the Consolidated Statements of Operations.

Additional guidance was provided in Staff Accounting Bulletin No. 47, Topic 12(D)(c)(3), primarily regarding the use of cash flow hedges, asset retirement obligations, and the effect of subsequent events on the ceiling test calculation.

Mariner had no write downs due to the ceiling test for the current quarter.

5. Accrual for Future Abandonment Liabilities

SFAS No. 143, Accounting for Asset Retirement Obligations, (SFAS 143) addresses accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. The Company adopted SFAS No. 143 on January 1, 2003. SFAS No. 143 requires that the fair value of a liability for an asset's retirement obligation be recorded in the period in which it is incurred and the corresponding cost capitalized by increasing the carrying amount of the related long-lived asset. The liability is accreted to its then present value each period, and the capitalized cost is depreciated over the useful life of the related asset.

To estimate the fair value of an asset retirement obligation, we employ a present value technique, which reflects certain assumptions, including our credit-adjusted risk-free interest rate, the estimated settlement date of the liability and the estimated current cost to settle the liability. Changes in timing or to the original estimate of cash flows will result in changes to the carrying amount of the liability.

The following roll forward is provided as a reconciliation of the beginning and ending aggregate carrying amounts of the asset retirement obligation.

	(In thousands)
Abandonment liability as of December 31, 2007 (1)	\$ 222,006
Liabilities Incurred	129
Liabilities Settled	(8,117)
Accretion Expense	5,008

at December 31,
2007.

(2) Includes
\$32.7 million
classified as a
current liability
at March 31,
2008.

6. Stockholders' Equity

We recorded compensation expense related to restricted stock and stock options of \$2.6 million and \$1.6 million for the three-month periods ended March 31, 2008 and 2007, respectively. Under the Company's Stock Incentive Plan, as amended and restated from time to time (the "Stock Incentive Plan"), unrecognized compensation expense at March

31, 2008 for the unvested portion of restricted stock granted was \$38.3 million and for unvested options was \$0.4 million.

The following table presents a summary of stock option activity under the Stock Incentive Plan and under rollover options granted to certain former Forest employees for the three months ended March 31, 2008:

10

Table of Contents

	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value (1) (In thousands)
Outstanding at beginning of year	720,488	\$ 13.82	\$ 9,503
Granted			
Exercised (2)	(52,130)	13.26	(717)
Forfeited	(18,000)	14.00	(234)
Outstanding at March 31, 2008	650,358	13.86	8,552

(1) Based upon the difference between the market price of the common stock on the last trading date of the quarter (\$27.01) and the option exercise price of in-the-money options.

(2) Options were exercised for cash proceeds of approximately \$691,000.

A summary of the activity for unvested restricted stock awards under the Stock Incentive Plan as of March 31, 2008 and 2007, respectively, and changes during the three-month periods is as follows:

	Restricted Shares under Stock Incentive Plan March 31,	
	2008	2007
Total unvested shares at beginning of period: January 1	1,484,552	875,380
Shares granted	548,864	
Shares vested	(40,844)	(48,608)
Shares forfeited	(6,708)	(7,850)
Total unvested shares at end of period: March 31	1,985,864	818,922
Available for future grant as options or restricted stock	3,561,978	4,880,706

7. Derivative Financial Instruments and Hedging Activities

The energy markets have historically been very volatile, and we can reasonably expect that oil and gas prices will be subject to wide fluctuations in the future. In an effort to reduce the effects of the volatility of the price of oil and natural gas on the Company's operations, management has elected to hedge oil and natural gas prices from time to time through the use of commodity price swap agreements and costless collars. While the use of these hedging arrangements limits the downside risk of adverse price movements, it also limits future gains from favorable movements. In addition, forward price curves and estimates of future volatility are used to assess and measure the ineffectiveness of our open contracts at the end of each period. If open contracts cease to qualify for hedge accounting, the mark-to-market change in fair value is recognized in oil and natural gas revenue. Loss of hedge accounting and cash flow designation will cause volatility in earnings. The fair values we report in our financial statements change as estimates are revised to reflect actual results, changes in market conditions or other factors, many of which are beyond our control.

The effects on our oil and gas revenues from our hedging activities were as follows:

	Three Months Ended March 31,	
	2008	2007
	(In thousands)	
Cash Gain (Loss) on Settlements	\$ (10,307)	\$ 23,622
Loss on Hedge Ineffectiveness (1)	(3,924)	(2,148)
Total	\$ (14,231)	\$ 21,474

(1) Unrealized gain (loss) recognized in natural gas revenue related to the ineffective portion of open contracts that are not eligible for deferral under SFAS 133 due primarily to the basis differentials between the contract price and the indexed price at the point of sale.

Table of Contents

As of March 31, 2008, the Company had the following hedge contracts outstanding:

Fixed Price Swaps	Quantity	Weighted Average Fixed Price	March 31, 2008 Fair Value Liability (In thousands)
Natural Gas (MMbtus)			
April 1 December 31, 2008	28,257,260	\$ 8.43	\$ (50,641)
January 1 December 31, 2009	31,642,084	\$ 8.48	(39,571)
Crude Oil (Bbls)			
April 1 December 31, 2008	1,616,724	\$ 78.93	(32,727)
January 1 December 31, 2009	2,172,210	\$ 76.15	(40,137)
Total			\$ (163,076)

Costless Collars	Quantity	Weighted Average Floor	Weighted Average Cap	March 31, 2008 Fair Value Liability (In thousands)
Natural Gas (MMbtus)				
April 1 December 31, 2008	8,889,000	\$ 7.83	\$ 14.60	\$ (1,339)
Crude Oil (Bbls)				
April 1 December 31, 2008	836,136	\$ 61.65	\$ 86.80	(12,197)
Total				\$ (13,536)

As of May 5, 2008, the Company has not entered into any hedge transactions subsequent to March 31, 2008.

8. Commitments and Contingencies

Minimum Future Lease Payments The Company leases certain office facilities and other equipment under long-term operating lease arrangements. Minimum future lease obligations under the Company's operating leases in effect at March 31, 2008 are as follows:

	(In thousands)
2009	\$ 2,217
2010	2,489
2011	2,499
2012	2,414
2013 and thereafter	11,961

Other Commitments In the ordinary course of business, the Company enters into long-term commitments to purchase seismic data. At March 31, 2008 and December 31, 2007, the Company's seismic obligations totaled \$8.4 million and \$14.6 million, respectively.

MMS Proceedings Mariner and its subsidiary, Mariner Energy Resources, Inc. (MERI), own numerous properties in the Gulf of Mexico. Certain of such properties were leased from the MMS subject to The Outer Continental Shelf Deep Water Royalty Relief Act (RRA), signed into law on November 28, 1995. The RRA relieved lessees of the

obligation to pay royalties on certain leases until a designated volume was produced. Four of these leases held by the Company and one held by MERI that are producing contain language that limits royalty relief if commodity prices exceed predetermined levels. Since 2000, commodity prices have exceeded some of the predetermined levels, except in 2002. The Company and MERI believe the MMS did not have the authority to include commodity price threshold language in these leases and have withheld payment of royalties on the leases while disputing the MMS' authority in pending proceedings on those leases that the MMS has issued orders to pay. The Company has recorded a liability for its estimated exposure on these leases, which at March 31, 2008 was \$35.3 million, including interest. The potential liability of MERI under its lease relates to production from the lease commencing July 1, 2005, the effective date of Mariner's acquisition of MERI.

Table of Contents

In May 2006, the MMS issued an order asserting price thresholds were exceeded in calendar years 2000, 2001, 2003 and 2004 and, accordingly, that royalties were due under such leases on oil and gas produced in those years. Mariner has filed and is pursuing an administrative appeal of that order. The MMS has not yet made demand for non-payment of royalties alleged to be due for calendar years subsequent to 2004 on the basis of price thresholds being exceeded.

The enforceability of the price threshold provisions of leases granted pursuant to the RRA currently is being litigated in several administrative appeals filed by other companies in addition to Mariner.

Insurance Matters

Current Insurance Against Hurricanes

Mariner is a member of OIL Insurance, Ltd. (OIL), an energy industry insurance cooperative, which provides the Company's primary layer of physical damage and windstorm insurance coverage. Our coverage is subject to a \$10.0 million per-occurrence deductible for our assets and a \$250.0 million per-occurrence loss limit. However, if a single event causes losses to all OIL-insured assets in excess of \$750.0 million, amounts covered for such losses will be reduced on a pro-rata basis among OIL members.

In addition to our primary coverage through OIL, we also maintain commercial difference in conditions insurance that would apply (with no additional deductible) once our limits with OIL are exhausted, as well as partial business interruption insurance covering certain of our significant producing fields as well as certain other fields situated in hurricane prone areas. Our business interruption coverage begins to provide benefits after a 60-day waiting period once the designated field is shut-in due to a covered event and is limited to 35% of the forecast cash flow from each designated property. Our commercial policy expires June 1, 2008, and is subject to a general limit of \$75.0 million per occurrence and in the case of named windstorms a combined annual aggregate limit of \$75.0 million covering both property damage and business interruption.

Applicable insurance for our Hurricane Katrina and Rita claims with respect to the Gulf of Mexico assets previously acquired from Forest is provided by OIL. Our coverage for the former Forest properties is subject to a deductible of \$5.0 million per occurrence and a \$1 billion industry-wide loss limit per occurrence. OIL has advised us that the aggregate claims resulting from each of Hurricanes Katrina and Rita are expected to exceed the \$1 billion per occurrence loss limit and that therefore, our insurance recovery is expected to be reduced pro-rata with all other competing claims from the storms. To the extent insurance recovery under the primary OIL policy is reduced, we believe the shortfall would be covered by applicable commercial excess insurance coverage. This excess coverage is not subject to an additional deductible and has a stated limit of \$50.0 million per occurrence. The insurance coverage for Mariner's legacy properties is subject to a \$3.75 million deductible.

Hurricanes Katrina and Rita (2005)

In 2005, our operations were adversely affected by Hurricanes Katrina and Rita, resulting in substantial shut-in and delayed production, as well as necessitating extensive facility repairs and hurricane-related abandonment operations. Since 2005, we had incurred approximately \$141.8 million in hurricane expenditures resulting from Hurricanes Katrina and Rita, of which \$110.9 million were repairs and \$30.9 million were hurricane-related abandonment costs. We estimate that we will incur hurricane-related abandonment costs of approximately \$42.0 million during 2008.

At March 31, 2008, the insurance receivable balance for our Hurricane Katrina and Rita claims was approximately \$79.4 million, of which \$56.9 million is classified as a long-term asset. However, due to the magnitude of the storms and the complexity of the insurance claims being processed by the insurance industry, the timing of our ultimate insurance recovery cannot be ascertained. We expect to maintain a potentially significant insurance receivable for the indefinite future, while we actively pursue settlement of our claims to minimize the impact to our working capital and liquidity. Any differences between our insurance recoveries and insurance receivables will be recorded as adjustments to our oil and natural gas properties.

Table of Contents*Hurricane Ivan (2004)*

In September 2004, we incurred damage from Hurricane Ivan that affected the Mississippi Canyon 66 (Ochre) and Mississippi Canyon 357 fields. Ochre production was shut-in until September 2006, when production recommenced at approximately the same net rate. Mississippi Canyon 357 production was shut-in until March 2005, when necessary repairs were completed and production recommenced; however, production was subsequently shut-in due to Hurricane Katrina and recommenced in the first quarter of 2007. Since 2004, we had incurred approximately \$8.5 million of property damage related to Hurricane Ivan. To date, approximately \$2.4 million has been recovered through insurance, with the balance of \$4.2 million, net of deductible, recorded as insurance receivable, as we believe it is probable that these costs will be reimbursed under our insurance policies.

Litigation The Company, in the ordinary course of business, is a claimant and/or a defendant in various legal proceedings, including proceedings as to which the Company has insurance coverage and those that may involve the filing of liens against the Company or its assets. The Company does not consider its exposure in these proceedings, individually or in the aggregate, to be material. See **MMS Proceedings** above.

Letters of Credit On March 2, 2006, Mariner obtained an additional \$40.0 million letter of credit under its bank credit facility in favor of Forest that was not included as a use of the borrowing base (the **Dedicated Letter of Credit**). The Dedicated Letter of Credit was issued to secure performance of Mariner's obligation to drill and complete 150 wells under a drill-to-earn program. The Dedicated Letter of Credit reduced periodically by an amount equal to the product of \$0.5 million times the number of wells exceeding 75 that were drilled and completed. As of January 2008, the Dedicated Letter of Credit had been reduced to zero and cancelled as all 150 wells had been drilled and completed as of December 31, 2007. The Dedicated Letter of Credit balance as of December 31, 2007 was \$3.2 million.

Mariner's bank credit facility also has a letter of credit facility for up to \$50.0 million that is included as a use of the borrowing base. As of March 31, 2008, four such letters of credit totaling \$4.7 million were outstanding.

Please refer to Note 3, **Long-Term Debt** for further discussion of these letters of credit.

9. Earnings per Share

Basic earnings per share does not include dilution and is computed by dividing net income or loss attributed to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted earnings per share reflect the potential dilution that could occur if security interests were exercised or converted into common stock.

	Three Months Ended March 31,	
	2008	2007
	(In thousands, except per share data)	
Numerator:		
Net Income	\$ 72,126	\$ 38,207
Denominator:		
Weighted average shares outstanding	87,294	85,516
Add dilutive securities	719	189
Total weighted average shares outstanding and dilutive securities	\$ 88,013	\$ 85,705
Earnings per share basic:	\$ 0.83	\$ 0.45
Earnings per share diluted:	\$ 0.82	\$ 0.45

Shares issuable upon exercise of options to purchase common stock that would have been anti-dilutive are excluded from the computation of diluted earnings per share. Approximately 390,000 and 693,000 shares issuable upon exercise of stock options were excluded from the computation for the three months ended March 31, 2008 and

March 31, 2007, respectively.

Please refer to Note 6, **Stockholders' Equity** for option and share activity for the three months ended March 31, 2008 and 2007.

Table of Contents**10. Comprehensive Income**

Comprehensive income includes net income and certain items recorded directly to stockholders' equity and classified as other comprehensive income. The table below summarizes comprehensive income and provides the components of the change in accumulated other comprehensive income for the three months ended March 31, 2008 and 2007:

	Three Months Ended March 31,	
	2008	2007
	(in thousands)	
Net Income	\$ 72,126	\$ 38,207
Other comprehensive (loss) income:		
Derivative contracts settled and reclassified, net of income taxes of (\$5,067) and \$7,534	(9,164)	13,940
Change in unrealized mark-to-market losses arising during period, net of income taxes of (\$45,111) and (\$27,123)	(81,089)	(48,194)
Change in accumulated other comprehensive loss	(90,253)	(34,254)
Comprehensive (loss) income	\$ (18,127)	\$ 3,953

11. Fair Value Measurement

Certain of Mariner's assets and liabilities are reported at fair value in the accompanying Condensed Consolidated Balance Sheets. Such assets and liabilities include amounts for both financial and nonfinancial instruments. The carrying values of cash and cash equivalents, accounts receivable and accounts payable (including income taxes payable and accrued expenses) approximated fair value at March 31, 2008 and December 31, 2007. These assets and liabilities are not included in the following tables.

SFAS 157 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. As presented in the table below, the hierarchy consists of three broad levels. Level 1 inputs on the hierarchy consist of unadjusted quoted prices in active markets for identical assets and liabilities and have the highest priority. Level 3 inputs are unobservable (meaning they reflect our own assumptions regarding how market participants would price the asset or liability based on the best available information) and therefore have the lowest priority. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Mariner uses appropriate valuation techniques based on the available inputs to measure the fair values of its assets and liabilities.

SFAS 157 requires a credit adjustment for non-performance in calculating the fair value of financial instruments. The credit adjustment for derivatives in an asset position is determined based on the credit rating of the counterparty and the credit adjustment for derivatives in a liability position is determined based on Mariner's credit rating.

The following table provides fair value measurement information for the Company's derivative financial instruments as of March 31, 2008:

As of March 31, 2008				
Fair Value Measurements Using:				
		Significant		
		Quoted Prices in Active	other Observable	Significant Unobservable
Carrying	Total Fair			

	Amount	Value	Markets (Level 1)	Inputs (Level 2)	Inputs (Level 3)
Derivative Financial Instruments	(In thousands)				
Oil and Gas price swaps and collars Short Term	\$(132,546)	\$(132,546)	\$	\$(119,010)	\$(13,536)
Oil and Gas price swaps and collars Long Term	(44,066)	(44,066)		(44,066)	
	15				

Table of Contents

The following methods and assumptions were used to estimate the fair values of Mariner's derivative financial instruments in the table above.

Level 2 Fair Value Measurements

The fair values of the oil and gas swaps are estimated using internal discounted cash flow calculations based upon forward commodity price curves, terms of each contract, and a credit adjustment based on Mariner's credit rating as of March 31, 2008.

Level 3 Fair Value Measurements

The fair values of the oil and gas price collars are estimated valuations using the Black-Scholes valuation model based upon the forward commodity price curves, implied volatilities of commodities, and a credit adjustment based on Mariner's credit rating as of March 31, 2008. The following table provides fair value measurement information for the Company's Level 3 financial instruments as of March 31, 2008:

Fair Value Measurements Using Significant Unobservable Inputs (Level 3)

	(In thousands)
Fair value of collars at December 31, 2007	\$ (4,058)
Total gains / (losses):	
Included in Natural gas and Oil Revenues (realized/unrealized)	(4,006)
Included in other comprehensive income (realized/unrealized)	(9,478)
Purchases, issuances, and settlements, net	4,006
Transfers in and/or out of Level 3	
Fair value of collars at March 31, 2008	\$ (13,536)
The amount of net losses for the period included in earnings attributable to the change in net unrealized gains relating to assets still held at the reporting date	\$

12. Segment Information

The FASB issued SFAS No. 131 Disclosures about Segments of an Enterprise and Related Information (SFAS 131), which establishes standards for reporting information about operating segments. Operating segments are defined as components of an enterprise that engage in activities from which they may earn revenues and incur expenses. Separate financial information is available and this information is regularly evaluated by the chief decision maker for the purpose of allocating resources and assessing performance.

We measure financial performance as a single enterprise, allocating capital resources on a project-by-project basis across our entire asset base to maximize profitability. We utilize a company-wide management team that administers all enterprise operations encompassing the exploration, development and production of natural gas and oil. All operations are located in the United States. Inasmuch as we are one enterprise, we do track basic operational data by area, but do not maintain comprehensive financial statement information by area.

13. Supplemental Guarantor Information

On April 30, 2007, the Company sold and issued \$300.0 million aggregate principal amount of its 8% Notes. On April 24, 2006, the Company sold and issued to eligible purchasers \$300.0 million aggregate principal amount of its 7¹/₂% Notes. The Notes are jointly and severally guaranteed on a senior unsecured basis by the Company's existing and future domestic subsidiaries (Subsidiary Guarantors).

The following information sets forth our Consolidating Balance Sheets as of March 31, 2008 and December 31, 2007, our Condensed Consolidating Statements of Operations for the three months ended March 31, 2008 and 2007, and our Condensed Consolidating Statements of Cash Flows for the three months ended March 31, 2008 and 2007.

Table of Contents

Investments in our subsidiaries are accounted for on the consolidation method; accordingly, entries necessary to consolidate Mariner, the parent company, and its Subsidiary Guarantors are reflected in the eliminations column. In the opinion of management, separate complete financial statements of the Subsidiary Guarantors would not provide additional material information that would be useful in assessing their financial composition.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion is intended to assist you in understanding our business and the results of operations together with our present financial condition. This section should be read in conjunction with our Condensed Consolidated Financial Statements and the accompanying notes included in this Quarterly Report, as well as our Annual Report on Form 10-K for the fiscal year ended December 31, 2007.

Statements in our discussion may be forward-looking. These forward-looking statements involve risks and uncertainties. We caution that a number of factors could cause future production, revenues and expenses to differ materially from our expectations. Please see **Risk Factors** in Item 1A of Part II of this Quarterly Report regarding certain risk factors relating to the Company.

Overview

We are an independent oil and natural gas exploration, development and production company with principal operations in West Texas and the Gulf of Mexico. As of December 31, 2007, approximately 67% of our total estimated proved reserves were classified as proved developed, with approximately 46% of the total estimated proved reserves located in West Texas, 15% in the Gulf of Mexico deepwater and 39% on the Gulf of Mexico shelf.

Our revenues, profitability and future growth depend substantially on prevailing prices for oil and natural gas and our ability to find, develop and acquire oil and gas reserves that are economically recoverable while controlling and reducing costs. The energy markets have historically been very volatile. Commodity prices are currently at or near historical highs and may fluctuate significantly in the future. Although we attempt to mitigate the impact of price declines and provide for more predictable cash flows through our hedging strategy, a substantial or extended decline in oil and natural gas prices or poor drilling results could have a material adverse effect on our financial position, results of operations, cash flows, quantities of natural gas and oil reserves that we can economically produce and our access to capital. Conversely, the use of derivative instruments also can prevent us from realizing the full benefit of upward price movements.

First Quarter 2008 Highlights

On December 31, 2007 and February 29, 2008, Mariner acquired additional working interests in certain of its existing properties in the Spraberry field in the Permian Basin. Mariner internally estimated net proved oil and gas reserves attributable to the December 2007 acquisition of approximately 94.9 Bcfe (75% oil and NGLs) and to the February 2008 acquisition of approximately 14.0 Bcfe (65% oil and liquids). Mariner intends to operate substantially all of the assets. The purchase price, subject to customary purchase price adjustments, for the December 2007 acquisition was approximately \$122.5 million, which Mariner financed under its bank credit facility, and for the February 2008 acquisition was approximately \$21.7 million.

On January 31, 2008, Mariner acquired 100% of the equity in a subsidiary of Hydro Gulf of Mexico, Inc. pursuant to a Membership Interest Purchase Agreement executed on December 23, 2007. The acquired subsidiary, now known as Mariner Gulf of Mexico LLC (**MGOM**), was an indirect subsidiary of StatoilHydro ASA and owns substantially all of its former Gulf of Mexico shelf operations. A summary of these assets and operations as of January 1, 2008 includes:

Ryder Scott Company, L.P. estimated proved oil and gas reserves of 49.7 Bcfe, 93% of which are developed;

interests in 36 (16 net) producing wells producing approximately 53 MMcfe per day net to MGOM's interest, 76% of which Mariner now operates;

gas gathering systems comprised of 31 miles of 10-inch, 12-inch and 16-inch pipelines; and

approximately 106,000 net acres of developed leasehold and 256,000 net acres of undeveloped leasehold.

We paid approximately \$243.0 million, subject to customary purchase price adjustments, including \$8.0 million for reimbursement of drilling costs attributable to the High Island 166 #5 well. The acquisition of MGOM was financed by borrowing under Mariner's bank credit facility. As of March 31, 2008, additional purchase price adjustments resulted in a net credit to Mariner of approximately \$15.0 million.

Table of Contents***Operational Update***

Offshore Mariner drilled five offshore wells in the first quarter of 2008 of which four were successful. Information regarding the four successful wells is shown below:

Well Name	Operator	Working Interest	Water Depth (Ft)	Location
Eugene Island 342 C16BP1	Mariner	50%	287	Conventional Shelf
Vermilion 380 A20	Mariner	100%	340	Conventional Shelf
Vermilion 380 A20ST1	Mariner	100%	340	Conventional Shelf
South Marsh 76 F-1	Mariner	100%	138	Conventional Shelf

As of March 31, 2008, five offshore wells were drilling.

In addition, Mariner was the apparent high bidder on 19 of 30 blocks on which it bid at the U.S. Minerals Management Service (MMS) Central Gulf of Mexico Lease Sale 206 held March 19, 2008. Mariner submitted joint bids with one or more industry partners on most blocks and exposed a net total of \$109.9 million. Mariner's net exposure on the 19 apparent high bids was \$79.1 million. As of May 5, 2008, the MMS had awarded one of the blocks on which Mariner was the apparent high bidder. Mariner expects the MMS to determine which other blocks ultimately will be awarded over the next several months. Mariner's working interest in all 19 blocks if awarded will range from 33% to 100%.

Several of Mariner's identified prospects were among the most active in the sale, with 26 of Mariner's 30 bids receiving one or more competing bids and one receiving ten bids. Mariner's apparent high bid blocks involve seven deepwater subsalt prospects (both Wilcox and Miocene), four conventional deepwater prospects, four deep shelf prospects, and one conventional shelf prospect.

Onshore In the first quarter of 2008, Mariner drilled 36 development wells in West Texas, all of which were successful. As of March 31, 2008, six rigs were operating on our West Texas properties.

Results of Operations

Three Months Ended March 31, 2008 Compared to Three Months Ended March 31, 2007

The following table sets forth summary information with respect to our oil and gas operations. Certain prior year amounts have been reclassified to conform to current year presentation.

Summary Operating Information:	Three Months Ended March 31,		Increase	%
	2008	2007	(Decrease)	Change
	(In thousands, except net production, average sales prices and % change)			
Net Production:				
Natural gas (MMcf)	20,956	17,478	3,478	20%
Oil (MBbls)	1,350	1,047	303	29%
Natural gas liquids (MBbls)	377	277	100	36%

Net interest expense	18,245	12,056	6,189	51%
Other income		5,431	(5,431)	(100%)
Income before taxes and minority interest	113,410	56,417	56,993	101%
Provision for income taxes	41,194	18,210	22,984	126%
Net Income	72,126	38,207	33,919	89%

(1) Average sales prices include the effects of hedging

Net Income for the first quarter 2008 was \$72.1 million compared to \$38.2 million for the comparable period in 2007. Basic and fully-diluted earnings per share for the first quarter 2008 were \$0.83 and \$0.82, respectively, compared to \$0.45 for each measure in first quarter 2007.

Net Production Natural gas production increased 20% for the first quarter of 2008 to approximately 230 MMcf per day, compared to approximately 194 MMcf per day for the first quarter of 2007. Oil production increased 29% for the first quarter of 2008 to approximately 14,835 barrels per day, compared to approximately 11,633 barrels per day for the first quarter of 2007. Natural gas liquids increased 36% for the first quarter of 2008 as compared to the first quarter of 2007. Total overall production increased 22% for the first quarter of 2008 to approximately 344 MMcf per day, compared to 282 MMcf per day for the first quarter of 2007. Natural gas production comprised approximately 67% of total production for the first quarter of 2008 compared to approximately 69% for the first quarter of 2007. The increase in production for the first quarter of 2008 resulted from our acquisitions of MGOM and additional interests in West Texas, and certain wells that commenced production, including Bass Lite, and NW Nansen.

Production in the Gulf of Mexico increased 22% to 27.6 Bcfe for the first quarter of 2008 from 22.7 Bcfe for the first quarter of 2007, while onshore production increased 37% to 3.7 Bcfe for the first quarter of 2008 from 2.7 Bcfe for the first quarter of 2007.

Natural gas, oil and NGL revenues Total natural gas, oil and NGL revenues increased 50% to \$314.2 million for the first quarter of 2008 compared to \$210.1 million for the first quarter of 2007. Total natural gas revenues were \$179.6 million and \$140.5 million for the first quarters of 2008 and 2007, respectively. Total oil revenues for the first

quarter of 2008 were \$113.6 million compared to \$60.5 million for the first quarter of 2007. Total NGL revenues increased 129% to \$21.0 million for the first quarter of 2008 from \$9.1 million for the first quarter of 2007.

During the first quarter of 2008 hedges increased average natural gas pricing by \$0.09/Mcf to \$8.57/Mcf and decreased average oil pricing by \$11.97/Bbl to \$84.16/Bbl, resulting in a net recognized hedging loss of \$14.2 million. During the first quarter of 2007 hedges increased average natural gas pricing by \$1.13/Mcf to \$8.04/Mcf and increased average oil pricing by \$1.61/Bbl to \$57.76/Bbl, resulting in a net recognized hedging gain of \$21.5 million.

The cash losses on our hedge contracts settled during first quarter 2008 were \$10.3 million as compared to cash gains of \$23.6 million during the first quarter of 2007. Additionally, during the first quarters of 2008 and 2007, we recognized unrealized losses of \$3.9 million and \$2.1 million, respectively, related to the ineffective portion of open

Table of Contents

contracts that are not eligible for deferral under SFAS 133 due primarily to the basis differentials between the contract price and the indexed price at the point of sale.

Other revenues increased approximately \$0.2 million to \$1.7 million for the first quarter of 2008 from \$1.5 million for the first quarter of 2007 as a result of imputed rent attributable to the occupancy by the seller of office property acquired by the Company in January 2008, offset by decreased transportation income from our gathering system in West Texas.

Lease operating expense (LOE) increased approximately \$12.8 million to \$44.8 million for the first quarter of 2008 from \$32.0 million for the first quarter of 2007, primarily as a result of increased property insurance premiums (particularly for windstorm coverage), the impact of the additional West Texas assets acquired at year end, which are long lived and typically carry a higher per unit LOE, and start-up production in February 2008 from Bass Lite and NW Nansen. LOE was also impacted by expenses relating to our Midland and Lafayette offices that were previously classified as general and administrative expense in the first quarter of 2007.

Severance and ad valorem tax increased approximately \$1.6 million to \$4.6 million for the first quarter of 2008 from \$3.0 million for the first quarter of 2007 due primarily to higher property valuations in West Texas resulting from the drilling and completion of additional wells and our acquisitions of additional interests in West Texas.

Transportation expense increased approximately \$1.1 million to \$3.0 million for the first quarter of 2008 from \$1.9 million for the first quarter of 2007 due primarily to commencement of production at Bass Lite and High Island A467.

General and administrative (G&A) expense decreased approximately \$0.7 million to \$11.9 million for the first quarter of 2008 from \$12.6 million for the first quarter of 2007. Excluding stock compensation expense, G&A decreased approximately \$1.7 million to \$9.3 million for the first quarter of 2008 from \$11.0 million for the first quarter of 2007. Beginning in 2008, we classify a portion of expenses attributable to our Lafayette and Midland offices as LOE, and capitalize stock compensation expense attributable to those non-officer employees directly engaged in exploration, development and acquisition activities.

Depreciation, depletion, and amortization (DD&A) expense increased approximately \$20.5 million to \$119.3 million for the first quarter of 2008 from \$98.8 million for the first quarter of 2007, primarily as a result of higher costs and associated accretion of asset retirement obligations and increased production from our acquisition of MGOM.

Net interest expense increased approximately \$6.2 million to \$18.2 million for the first quarter of 2008 from \$12.0 million for the first quarter of 2007 due primarily to an increase in average debt levels to \$1.1 billion for the first quarter of 2008 as compared to \$598.0 million for the first quarter of 2007.

Other income reflects a partial cash settlement of \$5.4 million received in January 2007 related to a merger transaction with Forest Oil Corporation in 2006.

Income before taxes and minority interest increased approximately \$57.0 million to \$113.4 million for the first quarter of 2008 from \$56.4 million for the first quarter of 2007 due to increased operating income partially offset by increased net interest expense as discussed above.

Provision for income taxes reflected an effective tax rate of 36.3% for the first quarter of 2008 as compared to 32.3% for first quarter 2007. The increase in our effective tax rate is due primarily to 2007 post-allocation period activity attributable to a merger transaction with Forest Oil Corporation in 2006.

Liquidity and Capital Resources

Net cash provided by operating activities increased by \$60.6 million to \$214.2 million from \$153.6 million for the three months ended March 31, 2008 and 2007, respectively. The increase was due to greater operating revenue due to increased production of 62 MMcfe per day or \$48.8 million and an increase in the realized price per Mcfe of \$1.76 or \$55.3 million, offset by higher lease operating expense.

Table of Contents

As of March 31, 2008, the Company had a working capital deficit of \$146.7 million, including non-cash current derivative liabilities and deferred tax assets. In addition, working capital was negatively impacted by accrued capital expenditures. We expect that this deficit will be funded by cash flow from operating activities and borrowings under our bank credit facility, as needed.

Net cash flows used in investing activities increased by \$363.3 million to \$480.2 million from \$116.9 million for the three months ended March 31, 2008 and 2007, respectively. The increase was due primarily to the acquisition of MGOM, including approximately \$15.0 million of mid-stream assets, increased capital expenditures attributable to increased activity in our drilling programs, and an investment of approximately \$27.4 million in additional office property paid in January 2008. This increase was partially offset by \$31.8 million of restricted cash received in January 2007 from the sale of our interest in Cottonwood.

Net cash flows provided by financing activities increased by \$291.3 million to \$251.3 million for the three months ended March 31, 2008 as compared to net cash flows used by financing activities of \$40.0 million for the comparable period in 2007. This increase was due primarily to \$223.5 million borrowed in January 2008 under our bank credit facility to finance the purchase of MGOM and net increased borrowings of \$67.5 million for working capital requirements.

Capital Expenditures During the three months ended March 31, 2008, we incurred approximately \$199.9 million in capital expenditures for exploration and development activities, with approximately \$108.2 million or 54% associated with exploration activities and \$91.7 million or 46% associated with development activities, of which \$68.9 million was attributable to offshore and \$22.8 million to onshore development. In addition, we expended an additional \$253.7 million on acquisitions and \$37.6 million on capitalized overhead and other corporate items. Non-cash capital accruals of \$6.0 million are a component of working capital changes in the statement of cash flows. We were the apparent high bidder on 19 of 30 blocks on which we bid at the MMS Central Gulf of Mexico Lease Sale 206 held March 19, 2008, one of which, as of May 5, 2008, had been awarded. We submitted joint bids with one or more industry partners on most blocks and exposed a net total of \$109.9 million. Our net exposure on the 19 apparent high bids was \$79.1 million. We expect the MMS to determine which other blocks will ultimately be awarded over the next several months.

Bank Credit Facility Mariner is party to a revolving line of credit with a syndicate of banks led by Union Bank of California, N.A. and BNP Paribas. On January 31, 2008, Mariner amended its secured bank credit facility to increase the facility's maximum credit availability to \$1 billion, including up to \$50.0 million in letters of credit, subject to an increased borrowing base of \$750.0 million as of January 31, 2008. The amendment also extended the facility's term to January 31, 2012; terminated an additional dedicated \$40.0 million letter of credit facility (the "Dedicated Letter of Credit") in favor of Forest Oil Corporation due to Mariner's satisfaction of its obligations under a drill-to-earn program; and added as a permitted use of loan proceeds the funding of Mariner's purchase of MGOM.

The bank credit facility is secured by substantially all of our assets. The borrowing base remained at \$750.0 million as of March 31, 2008, and is subject to periodic re-determination by the lenders of the Company's oil and gas reserves and other factors. Any increase in the borrowing base requires the consent of all lenders. At March 31, 2008, the Company had \$430.0 million in advances outstanding under its bank credit facility and four outstanding letters of credit totaling \$4.7 million of which \$4.2 million is required for plugging and abandonment obligations at certain of its offshore fields.

Future Uses of Capital. Our identified needs for liquidity in the future are as follows:

funding future capital expenditures;

funding hurricane repairs and hurricane-related abandonment operations;

financing any future acquisitions that Mariner may identify;

paying routine operating and administrative expenses; and

paying other commitments comprised largely of cash settlement of hedging obligations and debt service.

2008 Capital Expenditures. We anticipate that our base operating capital expenditures for 2008 will be approximately \$757.0 million (excluding hurricane-related expenditures and acquisitions, including the acquisition

Table of Contents

of MGOM in January 2008), with significant potential expansion contingent on drilling success and cash flow experience during the year. Approximately 43% of the base operating capital program is planned to be allocated to development activities, 33% to exploration activities, and the remainder to other items (primarily capitalized overhead and interest). In addition, we expect to incur additional hurricane-related abandonment costs during 2008 related to Hurricanes Katrina and Rita of approximately \$42.0 million that we believe is covered under applicable insurance, although complete recovery or settlement is not expected to occur during the next 12 months.

Future Capital Resources. Our anticipated sources of liquidity in the future are as follows:

cash flow from operations in future periods;

proceeds under our bank credit facility;

proceeds from insurance policies relating to hurricane repairs; and

proceeds from future capital markets transactions as needed.

We intend to tailor our 2008 operating capital program (exclusive of hurricane-related expenditures and acquisitions) within our projected operating cash flow so that our operating capital requirements are largely self-sustaining under normal commodity price assumptions. We anticipate using proceeds under our bank credit facility only for working capital needs or acquisitions and not generally to fund our operations. We would generally expect to fund future acquisitions on a case by case basis through a combination of bank debt and capital markets activities. Based on our current operating plan and assumed price case, our expected cash flow from operations and continued access to our bank credit facility allows us ample liquidity to conduct our operations as planned for the foreseeable future.

The timing of expenditures (especially regarding deepwater projects) is unpredictable. Also, our cash flows are heavily dependent on the oil and natural gas commodity markets, and our ability to hedge oil and natural gas prices. If either oil or natural gas commodity prices decrease from their current levels, our ability to finance our planned capital expenditures could be affected negatively. Amounts available for borrowing under our bank credit facility are largely dependent on our level of estimated proved reserves and current oil and natural gas prices. If either our estimated proved reserves or commodity prices decrease, amounts available to us to borrow under our bank credit facility could be reduced. If our cash flows are less than anticipated or amounts available for borrowing are reduced, we may be forced to defer planned capital expenditures.

Off-Balance Sheet Arrangements

Letters of Credit Mariner's bank credit facility has a letter of credit facility for up to \$50.0 million that is included as a use of the borrowing base. As of March 31, 2008, four such letters of credit totaling \$4.7 million were outstanding.

The Dedicated Letter of Credit was terminated on January 31, 2008. It was obtained on March 2, 2006 under our bank credit facility and was not included as a use of the borrowing base.

Please refer to *Liquidity and Capital Resources* Bank Credit Facility for further discussion of these letters of credit.

Fair Value Measurement

Mariner determines fair value for its natural gas and oil collars using fair value measurements based on the Black-Scholes valuation model, adjusted for credit risk. The credit risk adjustment for collar liabilities are based on Mariner's credit quality and the credit risk adjustment for collar assets are based on the credit quality of the counter party. Such valuations have historically approximated our exit price for such derivatives. We validate the fair value measurements of our collars using a Black-Scholes pricing model using observable market data, to the extent available, and unobservable or adjusted data, if observable data is not available or is not representative of fair value. As of March 31, 2008, our internal calculations of fair value were determined using market data.

Table of Contents

Mariner determines the fair value of its natural gas and oil swaps by reference to forward pricing curves for natural gas and oil futures contracts. The difference between the forward price curve and the contractual fixed price is discounted to the measurement date using a credit risk adjusted discount rate. The credit risk adjustment for swap liabilities are based on Mariner's credit quality and the credit risk adjustment for swap assets are based on the credit quality of the counter party. Our fair value determinations of our swaps have historically approximated our exit price for such derivatives.

Due to unavailability of observable volatility data input or use of adjusted implied volatility for our collars, we have determined that all of our collars fair value measurements are categorized as level 3 in accordance with Statement of Financial Accounting Standards (SFAS) No. 157. See note 11, Fair Value Measurements. We have determined that the fair value methodology described above for our swaps is consistent with observable market inputs and have categorized our swaps as level 2 in accordance with SFAS No. 157.

During the three month period ended March 31, 2008, Mariner recorded a decrease in the fair value of its derivative financial instruments of \$144.4 million, principally due to the increase in natural gas and oil commodity prices. Approximately \$10.3 million of the decrease was recorded as a loss in the income statement due to settlements, approximately \$3.9 million was recorded as a loss in the income statement due to ineffectiveness and approximately \$81.1 million was recorded as a decrease in comprehensive income, net of income taxes of \$45.1 million.

The continued volatility of natural gas and oil commodity prices will have a material impact on the fair value of our derivatives positions. It is our intent to hold all of our derivatives positions to maturity such that realized gains or losses are generally recognized in income when the hedged natural gas or oil is produced and sold. While the derivatives settlements may decrease (or increase) our effective price realized, the ultimate settlement of our derivatives positions is not expected to materially adversely affect our liquidity, results of operations or cash flows.

Item 3. Quantitative and Qualitative Disclosures about Market Risk***Commodity Prices and Related Hedging Activities***

Our major market risk exposure continues to be the prices applicable to our natural gas and oil production. The sales price of our production is primarily driven by the prevailing market price. The energy markets have historically been very volatile, and we can reasonably expect that oil and gas prices will be subject to wide fluctuations in the future. In an effort to reduce the effects of the volatility of the price of oil and natural gas on our operations, management has adopted a policy of hedging oil and natural gas prices from time to time primarily through the use of commodity price swap agreements and costless collar arrangements. While the use of these hedging arrangements limits the downside risk of adverse price movements, it also limits future gains from favorable movements. In addition, forward price curves and estimates of future volatility are used to assess and measure the ineffectiveness of our open contracts at the end of each period. If open contracts cease to qualify for hedge accounting, the mark-to-market change in fair value is recognized in oil and natural gas revenue. Loss of hedge accounting and cash flow designation will cause volatility in earnings. The fair values we report in our financial statements change as estimates are revised to reflect actual results, changes in market conditions or other factors, many of which are beyond our control.

The effects on our oil and gas revenues from our hedging activities were as follows:

	Three Months Ended March 31,	
	2008	2007
	(In thousands)	
Cash Gain (Loss) on Settlements	\$ (10,307)	\$ 23,622
Loss on Hedge Ineffectiveness (1)	(3,924)	(2,148)

Table of Contents

As of March 31, 2008, the Company had the following hedge contracts outstanding:

Fixed Price Swaps	Quantity	Weighted Average Fixed Price	March 31, 2008 Fair Value Liability (In thousands)
Natural Gas (MMbtus)			
April 1 December 31, 2008	28,257,260	\$ 8.43	\$ (50,641)
January 1 December 31, 2009	31,642,084	\$ 8.48	(39,571)
Crude Oil (Bbls)			
April 1 December 31, 2008	1,616,724	\$ 78.93	(32,727)
January 1 December 31, 2009	2,172,210	\$ 76.15	(40,137)
Total			\$ (163,076)

Costless Collars	Quantity	Weighted Average Floor	Weighted Average Cap	March 31, 2008 Fair Value Liability (In thousands)
Natural Gas (MMbtus)				
April 1 December 31, 2008	8,889,000	\$ 7.83	\$ 14.60	\$ (1,339)
Crude Oil (Bbls)				
April 1 December 31, 2008	836,136	\$ 61.65	\$ 86.80	(12,197)
Total				\$ (13,536)

As of May 5, 2008, the Company has not entered into any hedge transactions subsequent to March 31, 2008.

Interest Rate Market Risk Borrowings under our bank credit facility, as discussed under the caption Liquidity and Capital Resources, mature on January 31, 2012, and bear interest at either a LIBOR-based rate or a prime-based rate, at our option, plus a specified margin. Both options expose us to risk of earnings loss due to changes in market rates. We have not entered into interest rate hedges that would mitigate such risk. As of March 31, 2008, the interest rate on our outstanding bank debt was 4.62%. If the balance of our bank debt at March 31, 2008 were to remain constant, a 10% change in market interest rates would impact our cash flow by approximately \$496,000 per quarter.

Item 4. Controls and Procedures*Evaluation of Disclosure Controls and Procedures*

Mariner, under the supervision and with the participation of its management, including Mariner's principal executive officer and principal financial officer, evaluated the effectiveness of its disclosure controls and procedures, as such term is defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act), as of the end of the period covered by this Quarterly Report. Based on that evaluation, our principal executive officer and principal financial officer concluded that Mariner's disclosure controls and procedures are effective as of March 31, 2008 to ensure that information required to be disclosed by Mariner in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and include controls and procedures designed to ensure that information required to be disclosed by us in such reports is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions

regarding required disclosure.

Changes in Internal Controls Over Financial Reporting

There were no changes that occurred during the quarter ended March 31, 2008 covered by this Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II OTHER INFORMATION

Item 1A. Risk Factors.

Please refer to Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2007.

Various statements in this Quarterly Report on Form 10-Q (Quarterly Report), including those that express a belief, expectation, or intention, as well as those that are not statements of historical fact, are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. The forward-looking statements may include projections and estimates concerning the timing and success of specific projects and our future production, revenues, income and capital spending. Our forward-looking statements are generally accompanied by words such as may, estimate, project, predict, believe, expect, anticipate, potential, plan, goal or other words that indicate uncertainty of future events or outcomes. The forward-looking statements in this Quarterly Report speak only as of the date of this Quarterly Report; we disclaim any obligation to update these statements unless required by law, and we caution you not to rely on them unduly. We have based these forward-looking statements on our current expectations and assumptions about future events. While our management considers these expectations and assumptions to be reasonable, they are inherently subject to significant business, economic, competitive, regulatory and other risks, contingencies and uncertainties, most of which are difficult to predict and many of which are beyond our control. We disclose important factors that could cause our actual results to differ materially from our expectations described in Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations of Part I and elsewhere in this Quarterly Report. These risks, contingencies and uncertainties relate to, among other matters, the following:

the volatility of oil and natural gas prices;

discovery, estimation, development and replacement of oil and natural gas reserves;

cash flow, liquidity and financial position;

business strategy;

amount, nature and timing of capital expenditures, including future development costs;

availability and terms of capital;

timing and amount of future production of oil and natural gas;

availability of drilling and production equipment;

operating costs and other expenses;

prospect development and property acquisitions;

risks arising out of our hedging transactions;

marketing of oil and natural gas;

competition in the oil and natural gas industry;

the impact of weather and the occurrence of natural events and natural disasters such as loop currents, hurricanes, fires, floods and other natural events, catastrophic events and natural disasters;

governmental regulation of the oil and natural gas industry;

environmental liabilities;

developments in oil-producing and natural gas-producing countries;

32

Table of Contents

uninsured or underinsured losses in our oil and natural gas operations;

risks related to our level of indebtedness; and

risks related to significant acquisitions or other strategic transactions, such as failure to realize expected benefits or objectives for future operations.
