REMINGTON OIL AND GAS CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 1. ACCOUNTING POLICIES AND BASIS OF PRESENTATION

Remington Oil and Gas Corporation is an independent oil and gas exploration and production company incorporated in Delaware. Our oil and gas properties are located in the offshore Gulf of Mexico and onshore Gulf Coast.

We prepared these financial statements according to the instructions for Form 10-Q. Therefore, the financial statements do not include all disclosures required by accounting principles generally accepted in the United States. However, we have recorded all transactions and adjustments necessary to fairly present the financial statements included in this Form 10-Q. The adjustments made are normal and recurring. We have reclassified certain items in the prior year periods to conform with current year presentation. The following notes describe only the material changes in accounting policies, account details or financial statement notes during the first nine months of 2001. Therefore, please read these financial statements and notes to the financial statements together with the audited financial statements and notes to financial statements in our 2000 Form 10-K. The income statements for the three and nine months ended September 30, 2001, cannot necessarily be used to project results for the full year.

NEW ACCOUNTING STANDARDS

On January 1, 2001, we adopted Statement of Financial Accounting Standards No. 133 "Accounting for Derivative Instruments and Hedging Activities." As amended, the statement is effective for all fiscal years beginning after June 15, 2000. Currently we do not utilize any derivative instruments that fall under the criteria defined in the accounting standard. Accordingly, the adoption of SFAS No. 133 did not have a material effect on our financial statements or disclosures.

NOTE 2. CONTINGENCIES

PHILLIPS PETROLEUM LITIGATION

On May 22, 2001, we settled the litigation with Phillips Petroleum Company and acquired Phillips' Net Profits interest in South Pass block 89, offshore Louisiana. We paid \$21.25 million cash and issued 1,189,344 shares of our common stock as consideration for the settlement and assignment of the Net Profits interest.

Of the total \$42.5 million settlement, we had previously recorded \$20.2 million as an accrued liability. We recorded \$12.3 million of the remaining \$22.3 million as additional settlement expense and capitalized \$10.0 million as the cost for our purchase of the Net Profits interest. In addition, we charged the remaining \$1.2 million deferred net profits expense related to a royalty settlement in 2000 to the settlement expense.

Edgar Filing: REMINGTON OIL & GAS CORP - Form 10-Q

We agreed to purchase up to 100,000 shares per week from Phillips at \$17.867 per share in the event that Phillips was unable to sell the shares at or above that price. Subsequently, Phillips sold 33,900 shares on the open market, and we purchased the remaining 1,155,444 shares at a total cost of \$20.6 million.

NOTE 3. STOCK BASED COMPENSATION AND RESTRICTED COMMON STOCK

In June 1999, the Board of Directors approved a contingent stock grant to our employees and directors. The number of shares granted is relative to the employee's salary (or base number in the case of directors) and the closing stock price on June 17, 1999. In order for the grant to become effective, the price of our stock had to increase from \$4.19 per share to a trigger price of \$10.42 per share and close at or above \$10.42 per share for 20 consecutive trading days. The required increase in the stock price represented the equivalent of a compounded annual rate of return of 20% for five years. This trigger was achieved on January 24, 2001. When the stock grant became effective, we recorded \$8.1 million as restricted common stock, \$5.7 million as unearned compensation reported as a separate reduction in stockholders' equity on the balance sheet, and

5

REMINGTON OIL AND GAS CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

\$2.4 million as stock based compensation expense. The \$5.7 million unearned compensation expense will be amortized quarterly over the next five years as the shares vest. We amortized \$695,000 during the second and third quarters of this year and recorded it as part of our stock based compensation expense. The shares will be issued only if the employees and directors remain with the company through the vesting dates.

NOTE 4. 8 1/4% CONVERTIBLE SUBORDINATED NOTES

During the nine months ended September 30, 2001, holders of \$4.4 million face amount of the 8 1/4% convertible subordinated notes due December 1, 2002, converted their notes into common stock at the prescribed conversion ratio of one share of common stock for each \$11.00 of principal amount of notes. Subsequent to September 30, 2001, holders converted an additional \$1.4 million of the notes into common stock, and we redeemed the remaining \$95,000 of the notes for cash at a call price of 101.65%.

NOTE 5. INCOME PER SHARE

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion will assist in the understanding of our financial position and results of operations. The information below should be read in conjunction with the financial statements, the related notes to financial statements, and our Form 10-K for the year ended December 31, 2000.

Our discussion contains both historical and forward-looking information. We assess the risks and uncertainties about our business, long-term strategy, and financial condition before we make any forward-looking statements, but we cannot guarantee that our assessment is accurate or that our goals and projections can or will be met. Statements concerning results of future exploration, exploitation, development, and acquisition expenditures as well as revenue, expense, and reserve levels are forward-looking statements. We make assumptions about commodity prices, drilling results, production costs, administrative expenses, and interest costs that we believe are reasonable based on currently available information of known facts and trends.

This discussion is primarily an update to the Management's Discussion and Analysis of Financial Condition and Results of Operations included in the 2000 Form 10-K. We recommend that you read this discussion in conjunction with the Form 10-K.

Our long-term strategy is to increase shareholder value by economically increasing reserves, production, and cash flow on an annual basis. At the same time, we believe it is important to maintain a strong balance sheet by keeping our total debt at a manageable level. We will balance our capital expenditures, financed primarily by operating cash flow and bank debt, among exploration, development, and acquisitions.

LIQUIDITY AND CAPITAL RESOURCES

On September 30, 2001, our current liabilities exceeded our current assets by \$19.0 million. Our current ratio is .62 to 1. The current ratio decreased

Edgar Filing: REMINGTON OIL & GAS CORP - Form 10-Q

from December 31, 2000 because of the decrease in cash and cash equivalents and increase in current liabilities. Our cash and cash equivalents decreased because we used cash for a portion of the Phillips Petroleum settlement in May 2001, and the third quarter purchase of 1,155,444 shares issued to Phillips in the settlement. As of September 30, 2001, our current liabilities increased because of accrued capital expenditures for the ongoing construction of three platforms and the drilling of three wells. We expect that our current ratio will improve by year end as we use the available cash flow from operations and long-term bank line of credit to reduce current liabilities and fund our capital expenditures for the fourth quarter.

For the nine months ended September 30, 2001, net cash flow provided by operations, before changes in working capital, increased by \$23.0 million as compared to the same period in the prior year primarily because of increased gas revenues. Gas revenue increased by \$40.2 million, or 124%. Gas production increased by 6.6 Bcf, or 70%, which added \$29.8 million to revenue and average gas prices increased by \$1.09, or 32%, which added \$10.4 million to revenue.

During the first nine months of 2001, we incurred capital expenditures totaling \$94.3 million for drilling and completion activities, construction and installation of platform facilities, and lease acquisitions and the purchase of the Net Profits interest from Phillips Petroleum. During the remainder of 2001, we expect to incur costs of approximately \$25.0 million for our exploration and development activities. We expect that our cash flow from operations and available bank line of credit will be adequate to fund the capital budget for the remainder of this year.

On May 22, 2001, we settled the litigation with Phillips Petroleum Company and acquired Phillips' Net Profits interest in South Pass block 89, offshore Louisiana. We paid \$21.25 million cash and issued 1,189,344 shares of our common stock as consideration for the settlement and assignment of the Net Profits interest. Subsequently, Phillips sold 33,900 shares on the open market, and we purchased the remaining 1,155,444 shares at a total cost of \$20.6 million.

During the nine months ended September 30, 2001, holders of \$4.4 million face amount of the 8 1/4% convertible subordinated notes due December 1, 2002, converted their notes into common stock at the prescribed conversion ratio of one share of common stock for each \$11.00 of principal amount of notes.

7

Subsequent to September 30, 2001, holders converted an additional \$1.4 million of the notes into common stock, and we redeemed the remaining \$95,000 of the notes for cash at a call price of 101.65%.

As of June 15, 2001, our amended credit facility has a borrowing base of \$75.0 million. As of November 6, 2001, we had \$57.0 million borrowed under the facility. The banks review the borrowing base semi-annually and may increase or decrease the borrowing base relative to the new estimate of proved oil and gas reserves. Our oil and gas properties are pledged as collateral for the line of credit. Additionally, we have agreed not to pay dividends. The line of credit expires on May 3, 2004, when all principal becomes due.

RESULTS OF OPERATIONS

We recorded net income for the first nine months of 2001 of \$16.3 million or \$0.75 per share basic and \$0.68 per share diluted compared to net income for the first nine months of 2000 of \$34.2 million or \$1.60 per share basic and \$1.53 per share diluted. For the three months ended September 30, 2001, we recorded net income of \$383,000 or \$0.02 per share, basic and diluted, compared to \$22.7 million or \$1.06 per share basic and \$0.99 per share diluted for the three months ended September 30, 2000. Net income decreased during the three and

Edgar Filing: REMINGTON OIL & GAS CORP - Form 10-Q

nine months of 2001 compared to 2000 because of lower oil and gas prices, and increased exploration expenses including dry hole costs. Further, in 2000 we sold certain South Texas properties and recognized a non-recurring gain of \$12.5 million. In addition, net income for the first nine months of 2001 is lower because of a one time pre-tax charge of \$13.5 million in connection with the settlement of the Phillips litigation recorded in May 2001. The following table reflects the increase or decrease in oil and gas sales revenue due to the changes in prices and volumes.

	THREE MONTHS ENDED SEPTEMBER 30,		NINE MONTHS ENDED SEPTEMBER 30,

Price per Mcf.....	\$ 2.86	\$ 4.18	\$ 4.49	\$ 3.40
Increase (decrease) in gas sales revenue due to:				
Change in prices.....	\$ (4,213)		\$10,379	
Change in production volume.....	6,417		29,809	
Total increase in gas sales revenue.....	\$ 2,204		\$40,188	
	=====		=====	

Oil revenue during the third quarter and first nine months of 2001 decreased when compared to 2000. Gulf of Mexico oil production increased by 73,000 barrels and 43,000 barrels during the three and nine months of 2001 compared to the same periods in the prior year. These increases were more than offset by decreased production from Mississippi and South Texas. In addition, the average oil prices decreased which caused oil revenues to decrease by \$444,000 for the three months ended September 30, 2001, and by \$472,000 for the nine months ended September 30, 2001, when compared to the same periods in the prior year.

Gas revenues for the first nine months of 2001 increased \$40.2 million or 124% compared to the prior year because of the 70% increase in production and the 32% increase in the average price per Mcf. Offshore Gulf of Mexico gas production increased by 7.0 Bcf, or 94%. However, gas production from the onshore gulf coast

decreased by 0.4 Bcf, or 18% because of the sale of certain South Texas Properties in August 2000. Gas revenues during the third quarter of 2001 increased \$2.2 million or 16% compared to the third quarter of 2000 because of the 70% increase in production partially offset by a 32% decrease in the average

Edgar Filing: REMINGTON OIL & GAS CORP - Form 10-Q

price per Mcf. Offshore Gulf of Mexico gas production increased by 2.2 Bcf, or 84%. In addition, gas production from the onshore gulf coast increased slightly during the third quarter of 2001.

Operating expenses including net profits expense increased during the three and nine months ended September 30, 2001, compared to the same period in 2000 primarily because of an increase in the number of producing properties.

Exploration expense increased by \$5.7 million during the third quarter of 2001 and by \$8.7 million during the first nine months of 2001 primarily because of increased dry hole costs and increased seismic expenditures in Mississippi and the Gulf of Mexico. During the first three quarters we drilled two non-commercial wells and impaired another property in the Gulf of Mexico for a total charge of \$6.1 million. We also drilled five non-commercial wells in the onshore gulf coast area. Depreciation, depletion, and amortization expense increased by \$3.9 million during the third quarter of 2001 and by \$13.0 million during the first nine months of 2001 compared to the same periods in the prior year because of increased production and an increase in the number of producing properties.

When the stock grant approved by the Board of Directors in June 1999 became effective on January 24, 2001, we recorded \$8.1 million as restricted common stock, \$5.7 million as unearned compensation reported as a separate reduction in stockholders' equity on the balance sheet, and \$2.4 million as stock based compensation expense. During the second and third quarters of 2001, we amortized an additional \$695,000 of the unearned compensation and included it in stock based compensation expense. The shares will be issued only if the employees or directors remain with the company through the vesting dates.

On May 22, 2001, we settled the litigation with Phillips Petroleum Company. Of the total \$42.5 million settlement, we had previously recorded \$20.2 million as an accrued liability. We recorded \$12.3 million of the remaining \$22.3 million as additional settlement expense and capitalized \$10.0 million as the cost for our purchase of the net profits interest. In addition, we charged the remaining \$1.2 million deferred net profits expense related to a royalty settlement in 2000 to the settlement expense. During 2000, we reached two separate agreements with the Minerals Management Service concerning the royalties due on offshore Gulf of Mexico properties. Because of the agreements, we recorded an expense of \$2.2 million during the third quarter of 2000 and \$5.4 million during the first nine months of 2000.

Interest and financing expense decreased by 38% during the third quarter of 2001 and by 13% during the first nine months of 2001 because of lower interest rates applicable to our outstanding debt and because we are no longer accruing interest on the Phillips judgment.

During the first nine months of 2001, we recorded income tax expense totaling \$7.9 million, all of which we estimate is deferred. We fully utilized our net deferred income tax benefit during 2000 and the first quarter of 2001.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our market risk sensitive instrument at September 30, 2001, is a revolving line of credit from a bank. At September 30, 2001, the unpaid principal balance under the line was \$37.0 million. The interest rate on this debt is sensitive to market fluctuations, however, we do not believe that significant fluctuations in the market rate of interest have a material effect on our consolidated financial position, results of operations, or cash flow from operations.

Edgar Filing: REMINGTON OIL & GAS CORP - Form 10-Q

PART II, OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Incorporated herein by reference is the discussion of litigation set forth in Part I, Item 1, Notes to Condensed Consolidated Financial Statements -- Note 2. Contingencies of this Form 10-Q.
