Percentages are calculated as a percentage of net assets applicable to common shares.

* Zero coupon bond

(a) The Trust owns 100% of the bond issuance.

(b) Securities purchased on a when-issued or delayed delivery basis.

(c) These securities are restricted and may be resold only in transactions exempt from registration which are normally those transactions with qualified institutional buyers. Restricted securities comprise 0.9% of net assets applicable to common shares.

(d) All or a portion of these securities have been physically segregated in connection with open futures contracts.

(e) Security is a "step-up" bond where the coupon increases or steps up at a predetermined date.

(f) An Inverse Floating Rate security is one where the coupon is inversely indexed to a short-term floating interest rate multiplied by a specific factor. As the floating rate rises, the coupon is reduced. Conversely, as the floating rate declines, the coupon is increased. The price of these securities may be more volatile than the price of a comparable fixed rate security. These instruments are typically used by the Trust to enhance the yield of the portfolio. All of the Trust's portfolio holdings, including derivative instruments, are marked to market each day with the change in value reflected in the unrealized appreciation/depreciation. Upon disposition, a realized gain or loss is recognized accordingly.
