Cincinnati Bell Inc. (the “Company”) used the materials attached hereto in connection with the Company’s presentation to Institutional Shareholder Services, Inc. on April 3, 2018.

Investor PresentationApril 2018 1

---

This presentation may contain “forward-looking” statements, as defined in federal securities laws including the Private Securities Litigation Reform Act of 1995, which are based on our current expectations, estimates, forecasts and projections. Statements that are not historical facts, including statements about the beliefs, expectations and future plans and strategies of the Company, are forward-looking statements. Actual results may differ materially from those expressed in any forward-looking statements. The following important factors, among other things, could cause or contribute to actual results being materially and adversely different from those described or implied by such forward-looking statements including, but not limited to: those discussed in this release; we operate in highly competitive industries, and customers may not continue to purchase products or services, which would result in reduced revenue and loss of market share; we may be unable to grow our revenues and cash flows despite the initiatives we have implemented; failure to anticipate the need for and introduce new products and services or to compete with new technologies may compromise our success in the telecommunications industry; our access lines, which generate a significant portion of our cash flows and profits, are decreasing in number and if we continue to experience access line losses similar to the past several years, our revenues, earnings and cash flows from operations may be adversely impacted; negotiations with the providers of content for our video programming may not be successful, potentially resulting in our inability to carry certain programming channels, which could result in the loss of subscribers and due to the influence of some content providers, we may be forced to pay higher rates for some content, resulting in increased costs; our failure to meet performance standards under our agreements could result in customers terminating their relationships with us or customers being entitled to receive financial compensation, which would lead to reduced revenues and/or increased costs; we generate a substantial portion of our revenue by serving a limited geographic area; a large customer accounts for a significant portion of our revenues and accounts receivable and the loss or significant reduction in business from this customer would cause operating revenues to decline and could negatively impact profitability and cash flows; maintaining our telecommunications networks requires significant capital expenditures, and our inability or failure to maintain our telecommunications networks could have a material impact on our market share and ability to generate revenue; increases in broadband usage may cause network capacity limitations, resulting in service disruptions or reduced capacity for customers; we may be liable for material that content providers distribute on our networks; cyber attacks or other breaches of network or other information technology security could have an adverse effect on our business; natural disasters, terrorists acts or acts of war could cause damage to our infrastructure and result in significant disruptions to our operations; the regulation of our businesses by federal and state authorities may, among other things, place us at a competitive disadvantage, restrict our ability to price our products and services and threaten our operating licenses; we depend on a number of third party providers, and the loss of, or problems with, one or more of these providers may impede our growth or cause us to lose customers; a failure of back-office information technology systems could adversely affect our results of operations and financial condition; if we fail to extend or renegotiate our collective bargaining agreements with our labor union when they expire or if our unionized employees were to engage in a strike or other work stoppage, our business and operating results could be materially harmed; the loss of any of the senior management team or attrition among key sales associates could adversely affect our business, financial condition, results of operations and cash flows; our debt could limit our ability to fund operations, raise additional capital, and fulfill our obligations, which, in turn, would have a material adverse effect on our businesses and prospects generally; our indebtedness imposes significant restrictions on us; we depend on our loans and credit facilities to provide for our short-term financing requirements in excess of amounts generated by operations, and the availability of those funds may be reduced or limited; the servicing of our indebtedness is dependent on our ability to generate cash, which could be impacted by many factors beyond our control; we depend on the receipt of dividends or other intercompany transfers from our subsidiaries and investments; the merger (the “merger”) of Hawaiian Telcom Holdco, Inc. (“Hawaiian Telcom”) into a wholly owned subsidiary of Cincinnati Bell is subject to the receipt of clearances or approvals from various regulatory authorities, which may impose conditions that could have an adverse effect on us following the closing of the merger (the “combined company”) or, if not obtained, could prevent completion of the merger; the merger is subject to conditions, including certain conditions that may not be satisfied or completed on a timely basis, if at all, and any delay in completing the merger may reduce or eliminate the benefits expected; the pendency of the merger could materially adversely affect our future business and operations and/or result in a loss of our employees; our shareholders will be diluted by the merger; if completed, the merger may not achieve its intended results, and we and Hawaiian Telcom may be unable to successfully integrate our operations; the combined company is expected to incur

expenses related to the integration of the Company and Hawaiian Telcom; the future results of the combined company will suffer if the combined company does not effectively manage its expanded operations following the merger; uncertainties associated with the merger may cause a loss of management personnel and other key employees, which could adversely affect the future business and operations of the combined company; the combined company will have substantial indebtedness following the merger and the credit ratings of the combined company or its subsidiaries may be different from what the companies currently expect; the merger may involve unexpected costs, unexpected liabilities or unexpected delays; the acquisition of OnX may not achieve its intended results, and we may be unable to successfully integrate OnX's operations; the trading price of our common shares may be volatile, and the value of an investment in our common shares may decline; the uncertain economic environment, including uncertainty in the U.S. and world securities markets, could impact our business and financial condition; our future cash flows could be adversely affected if it is unable to fully realize our deferred tax assets; adverse changes in the value of assets or obligations associated with our employee benefit plans could negatively impact shareowners' deficit and liquidity; changes in tax laws and regulations, and actions by federal, state and local taxing authorities related to the interpretation and application of such tax laws and regulations, could have a negative impact on the our financial results and cash flows; our interpretation of the Tax Cuts and Jobs Act of 2017 could change, and have an adverse impact on financial results; third parties may claim that we are infringing upon their intellectual property, and we could suffer significant litigation or licensing expenses or be prevented from selling products; third parties may infringe upon our intellectual property, and we may expend significant resources enforcing our rights or suffer competitive injury; we could be subject to a significant amount of litigation, which could require us to pay significant damages or settlements; we could incur significant costs resulting from complying with, or potential violations of, environmental, health and human safety laws; and the possibility that the proposed transaction involving Hawaiian Telcom does not close, including due to the failure to satisfy the closing conditions and the other risks and uncertainties detailed in our filings, including our Form 10-K, with the U.S. Securities and Exchange Commission (the "SEC") as well as Hawaiian Telcom's filings, including its Form 10-K, with the SEC. These forward-looking statements are based on information, plans and estimates as of the date hereof and there may be other factors that may cause our actual results to differ materially from these forward-looking statements. We assume no obligation to update the information contained in this release except as required by applicable law. Safe Harbor 2

---

This presentation contains information about adjusted earnings before interest, taxes, depreciation and amortization (Adjusted EBITDA). This is a non-GAAP financial measure used by Cincinnati Bell management when evaluating results of operations and cash flow. Management believes this measure also provide users of the financial statements with additional and useful comparisons of current results of operations and cash flows with past and future periods. Non-GAAP financial measures should not be construed as being more important than comparable GAAP measures. Detailed reconciliations of non-GAAP financial measures to comparable GAAP financial measures are available in the Investor Relations section of [www.cincinnati-bell.com](http://www.cincinnati-bell.com) within the Investor Relations section. The company defines Adjusted EBITDA as GAAP operating income plus depreciation, amortization, restructuring and severance related charges, (gain) loss on sale or disposal of assets, transaction costs, curtailment (gain) loss, asset impairments, components of pension and other retirement plan costs (including interest costs, asset returns, and amortization of actuarial gains and losses), and other special items. Management believes that Adjusted EBITDA provides a useful measure of operational performance. Adjusted EBITDA should not be considered as an alternative to comparable GAAP measures of profitability and may not be comparable with the measures as defined by other companies. Important Additional Information Cincinnati Bell, its directors and certain of its executive officers may be deemed to be participants in the solicitation of proxies from Cincinnati Bell shareholders in connection with the matters to be considered at Cincinnati Bell's 2018 annual meeting. Cincinnati Bell has filed a proxy statement and WHITE proxy card with the SEC in connection with such solicitation of proxies from Cincinnati Bell shareholders. More detailed information regarding the identity of potential participants, and their direct or indirect interests, by security holdings or otherwise, is set forth in such proxy statement and other materials to be filed with the SEC in connection with Cincinnati Bell's 2018 annual meeting. **CINCINNATI BELL SHAREHOLDERS ARE STRONGLY ENCOURAGED TO READ SUCH PROXY STATEMENT AND ACCOMPANYING WHITE PROXY CARD AND OTHER DOCUMENTS FILED WITH THE SEC CAREFULLY AND IN THEIR ENTIRETY WHEN THEY BECOME AVAILABLE BECAUSE THEY WILL CONTAIN IMPORTANT INFORMATION.** Additional information can also be found in Cincinnati Bell's Annual Report on Form 10-K for the year ended December 31, 2017, filed with the SEC on February 26, 2018, and in Cincinnati Bell's Quarterly Reports on Form 10-Q. Cincinnati Bell's shareholders will be able to obtain, free of charge, any proxy statement, any amendments or supplements to the proxy statement and any other documents filed by Cincinnati Bell with the SEC at the SEC's website at <http://www.sec.gov>. In addition, copies will be available free of charge at Cincinnati Bell's website at [investor.cincinnati-bell.com](http://investor.cincinnati-bell.com) or by contacting Cincinnati Bell's Investor Relations by mail at Cincinnati Bell Inc., 221 East Fourth Street, Cincinnati, Ohio 45202. Cincinnati Bell Today	Cincinnati Bell's Strategic Transformation	Strong Performance Through Transformation	Commitment to Shareholder Friendly Corporate Governance	Table of Contents	4
-----------------------	--	---	---	-------------------	---

---

Transparency: The transformation initiated by the Board aims at simplifying the business by separating the organizational structure and external reporting around two distinct, complementary businesses – Entertainment and Communications and IT Services. Scale: The creation of this new structure and the added scale through acquisition gives the market a better view for sum of the parts valuation, while giving the company added future value creation opportunity. Execution: The Board and management’s disciplined capital allocation strategy is focused on investing in the business while managing leverage. Proven track record of value creation through sale of wireless and CyrusOne assets. Governance: Strong board commitment to the highest standards of corporate governance through transparency, talent refreshment, and diversification and maintaining the right mix of necessary skills and industry experience.

Cincinnati Bell’s Board Has Developed and Overseen the Right Strategy to Support Superior Long-Term Shareholder Returns 5

“We are encouraged by continued strength and development of the company’s fiber business [...] In addition, we believe the company’s acquisition of OnX and proposed purchase of Hawaiian Telcom have the potential to strengthen CBB’s long-term fundamental outlook.” November 2, 2017 “Cincinnati Bell’s stock is up ~20% since it announced the acquisitions of OnX and Hawaiian Telcom. This contrasts with the market’s attitude towards other recent wireline M&A [...] The company has not done significant M&A since it acquired CyrusOne (since spun off) back in 2010, but if it is successful, it could pursue more M&A given its relative cost of capital advantage vs other wireline peers [...] As noted previously with CyrusOne, Cincinnati Bell has experience spinning off businesses, and we think the IT services business (CBTS) is on an easier path to monetization following the enhanced scale provided by OnX.” November 30, 2017 “In a rapidly consolidating sector, these deals give CBB added scale in the communications space and align with management’s strategy of increasing investment in fiber and IT services. HCOM is a fiber-rich asset with a similar competitive profile to CBB’s. Meanwhile, OnX will bring along relationships, sales and a national distribution platform that will help management target the growing IoT, cyber security and cloud markets. We estimate the deals will enhance standalone CBB’s growth trajectory and are slightly accretive to free cash flow per share.” July 10, 2017 Wall Street Has Been Supportive of Cincinnati Bell’s Transformational Strategy “These acquisitions help CBB gain needed scale in the communications and IT services businesses, and would be accretive to FCF/share upon closing. The transactions will increase CBB’s exposure in the enterprise market to 76% (vs. 69% today) [...] We believe the longer term strategy of diversifying its business is a correct one given the structural challenges of telecom.” July 10, 2017 “With IT Services, CBB could eventually pursue a strategy similar to the one it had with CyrusOne – i.e. scaling the business and eventually monetizing it (via IPO, spin-off, etc.) in order to delever, reinvest in the fiber business, buy back stock. With HCOM deal, [...] in the long run, CBB could still become an acquisition target for a company interested in expanding its scale through purchase of fiber-rich wireline properties.” July 11, 2017 24

composition after the departure of John Zrno and addition of Leigh Fox

---

Conclusion: Cincinnati Bell Has the Right Team, Strategy and Governance to Deliver Superior Long-Term Shareholder Returns 30 Transparency: The transformation initiated by the Board aims at simplifying the business by separating the organizational structure and external reporting around two distinct, complementary businesses – Entertainment and Communications and IT Services. Scale: The creation of this new structure and the added scale through acquisition gives the market a better view for sum of the parts valuation, while giving the company added future value creation opportunity. Execution: The Board and management’s disciplined capital allocation strategy is focused on investing in the business while managing leverage. Proven track record of value creation through sale of wireless and CyrusOne assets. Governance: Strong board commitment to the highest standards of corporate governance through transparency, talent refreshment, and diversification and maintaining the right mix of necessary skills and industry experience.
