ITEM 2.02 DISCLOSURE OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION

On February 5, 2018, the registrant issued a news release announcing its fourth quarter 2017 results. A copy of that news release is furnished herewith as Exhibit 99.1 and is incorporated herein by reference.

As required by current generally accepted accounting principles (GAAP) guidance, the Tax Cut and Jobs Act discrete charge through continuing operations includes the impact of the corporate tax rate change on deferred tax balances established through Other Comprehensive Income (OCI). This treatment results in deferred taxes at the old corporate tax rate remaining in OCI until the items resulting in the timing differences cease to exist. In response to stakeholders' concerns with this treatment of OCI deferred taxes, the Financial Accounting Standards Board on January 18, 2018 issued an Exposure Draft for a Proposed Accounting Standards Update; Income Statement—Reporting Comprehensive Income (Topic 220); Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income (Proposal). The Proposal would require updating the tax rate for deferred tax balances in OCI with a corresponding adjustment to retained earnings. The comment period for the exposure draft ended on February 2, 2018. If the Proposal is adopted, it would be effective for all entities for fiscal years beginning after December 15, 2018, with early adoption permitted. If this Proposal is adopted prior to the filing of the Company's Form 10-K, the Company plans to early adopt and update its financial statements for the Form 10-K filing resulting in an estimated \$1.3 million decline in OCI with a corresponding increase in retained earnings.

The news release furnished herewith contains information regarding the registrant's operating income (loss). Operating income (loss) differs from net income (loss) attributable to Everest Re Group, the most directly comparable generally accepted accounting principle financial measure, only by the exclusion of realized capital gains (losses) on investments. Management believes that presentation of operating income (loss) provides useful information to investors because it more accurately measures and predicts the registrant's results of operations by removing the variability arising from the management of the registrant's investment portfolio. In addition, management, analysts and investors use operating income (loss) to evaluate the financial performance of the registrant and the insurance industry in general.

In accordance with general instruction B.2 of Form 8-K, the information in this report, including exhibits, is furnished pursuant to Item 2.02 and shall not be deemed "filed" for the purposes of Section 18 of the Securities Exchange Act of 1934, or otherwise subject to the liability of that section.
