NOTE A Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three month period ended March 31, 2009 are not necessarily indicative of the results that may be expected for the year ended December 31, 2009. For further information, refer to the consolidated financial statements and footnotes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2008.

Reclassifications: Certain prior year amounts have been reclassified to conform to the 2009 presentation.

NOTE B - Inventories

	March 31 2009	December 31 2008
Inventories at cost:		
Finished products	\$ 351.3	\$ 394.3
Work in process and raw materials	409.6	421.7
	760.9	816.0
Less LIFO reserve	(158.2)	(157.9)
	\$ 602.7	\$ 658.1

Under the LIFO method of accounting (used for approximately 53% of March 31, 2009 inventories), an actual valuation can be made only at the end of each year based on year-end inventory levels and costs. Accordingly, interim valuations are based on management's estimates of those year-end amounts.

	\$ 7,234.3	\$ 8,036.4

NOTE D - Product Support Liabilities

Product support liabilities consist of amounts accrued to meet product warranty obligations and accrued costs associated with optional extended warranty and repair and maintenance contracts. Warranty expenses and reserves are estimated and recorded at the time products or contracts are sold based on historical data regarding the source, frequency and cost of claims. PACCAR periodically assesses the adequacy of its recorded liabilities and adjusts them as appropriate to reflect actual experience.

Changes in product support liabilities are summarized as follows:

	2009	2008
Beginning balance, January 1	\$ 450.4	\$ 483.3
Cost accruals and revenue deferrals	62.3	86.2
Payments and revenue recognized	(89.2)	(88.7)

NOTE E - Stockholders Equity**Comprehensive Income**

The components of comprehensive income, net of any related tax, are as follows:

Three Months Ended March 31	2009		2008	
Net income	\$	26.3	\$	292.3
Other comprehensive (loss) income:				
Currency translation (loss) gain		(100.3)		94.0
Derivative contracts increase (decrease)		9.7		(34.7)
Marketable securities increase		.4		2.7
Employee benefit plans amortization		4.0		.5
Net other comprehensive (loss) income		(86.2)		62.5
Comprehensive (loss) income	\$	(59.9)	\$	354.8

The currency translation loss in 2009 was primarily attributable to increases in the value of the U.S. dollar relative to the euro and the Canadian dollar. The currency translation gain in 2008 was primarily due to the decrease in value of the U.S. dollar relative to the euro.

Accumulated Other Comprehensive Loss

Accumulated other comprehensive income (loss) was comprised of the following:

	March 31		December 31	
	2009		2008	
Currency translation adjustment	\$	59.9	\$	160.2
Net unrealized loss on derivative contracts		(72.6)		(82.3)
Net unrealized investment gains		1.0		.6
Employee benefit plans		(344.3)		(348.3)
Total accumulated other comprehensive loss	\$	(356.0)	\$	(269.8)

Stock Compensation Plans

Stock-based compensation expense for the first quarter was \$3.4 in 2009 and \$3.0 in 2008. Realized tax benefits related to the excess of deductible amounts over expense recognized amounted to \$1.9 and \$3.0 for the first three months of 2009 and 2008, respectively, and have been classified as a financing cash flow.

During the first quarter of 2009, PACCAR granted 1,182,790 employee stock options at an exercise price of \$30.81. The estimated aggregate fair value of the options granted was \$10.0. The Company also issued 473,808 additional common shares under deferred and stock compensation arrangements. The fair value of these awards was determined based on the stock price at the award date.

NOTE F - Net Income Per Share

The following table shows the additional amounts added to the weighted average basic shares outstanding to calculate diluted earnings per share. These amounts primarily represent the dilutive effect of stock options. Antidilutive options are excluded from the diluted earnings per share calculation and are shown separately in the table below.

Three Months Ended March 31	2009	2008
Additional shares	922,900	1,796,700
Antidilutive options	4,030,700	1,509,100

On January 1, 2009, the Company adopted FASB Staff Position EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities* (FSP EITF 03-6-1). Certain restricted stock awards granted to employees meet the definition of participating securities pursuant to FSP EITF 03-6-1 as these awards contain rights to dividends prior to vesting. As a result, basic earnings per share is allocated between distributed and undistributed income per share. Basic net income per share of \$.07 in the first quarter of 2009 consisted of distributed net income per share of \$.18 and an undistributed net loss of \$.11. Basic net income per share of \$.80 in the first quarter of 2008 consisted of distributed net income per share of \$.18 and undistributed net income per share of \$.62.

NOTE H - Derivative Financial Instruments

The Company adopted Statement No. 161, *Disclosures about Derivative Instruments and Hedging Activities* effective January 1, 2009. Derivative financial instruments are used as hedges to manage exposures to fluctuations in interest rates and foreign currency exchange rates. Certain derivative instruments designated as either cash flow hedges or fair value hedges are subject to hedge accounting. Derivative instruments that are not subject to hedge accounting are held as economic hedges. The Company's policies prohibit the use of derivatives for speculation or trading. At inception of each hedge relationship, the Company documents its risk management objectives, procedures and accounting treatment. Exposure limits and minimum credit ratings are used to minimize the risks of counterparty default. The Company had no material exposures to default at March 31, 2009.

Interest-Rate Contracts: The Company enters into various interest-rate contracts, including interest-rate swaps and cross currency interest-rate swaps. Interest-rate swaps involve the exchange of fixed for floating rate or floating for fixed rate interest payments based on the contractual notional amounts in a single currency. Cross currency interest-rate swaps involve the exchange of notional amounts and interest payments in different currencies. These contracts are used to manage exposures to fluctuations in interest rates and foreign currency exchange rates. Net amounts paid or received are reflected as adjustments to interest expense.

At March 31, 2009, the notional amount of the Company's interest-rate contracts was \$4,716.5. Notional maturities for all interest rate contracts over the next six years are \$1,200.5 for the remainder of 2009, \$1,502.2 for 2010, \$1,355.9 for 2011, \$489.8 for 2012, \$30.9 for 2013 and \$137.2 for 2014. The majority of these contracts are floating to fixed swaps that effectively convert an equivalent amount of commercial paper and other variable rate debt to fixed rates.

Foreign Currency Exchange Contracts: The Company enters into foreign currency exchange contracts to hedge certain anticipated transactions, assets and liabilities denominated in foreign currencies, particularly the Canadian dollar, the euro, the British pound, the Australian dollar and the Mexican peso. At March 31, 2009, the notional amount of the outstanding foreign currency exchange contracts was \$614.6. Foreign currency exchange contracts mature within one year.

Changes in the fair value of derivatives designated as cash flow hedges are recorded in accumulated other comprehensive income to the extent such hedges are considered effective. Changes in the fair value of derivatives designated as fair value hedges are recorded in earnings together with the changes in fair value of the hedged item attributable to the risk being hedged. Changes in the fair value of economic hedges are recorded in earnings in the period in which the change occurs.

Amounts in accumulated other comprehensive income are reclassified into net income in the same period in which the hedged transaction affects earnings. Net realized gains and losses from interest-rate contracts are recognized as an adjustment to interest expense. Net realized gains and losses from foreign exchange contracts are recognized as an adjustment to cost of sales or to financial services interest expense, consistent with the hedged transaction. Of the \$72.6 million accumulated net loss included in other comprehensive income as of March 31, 2009, \$39.9, net of taxes, is expected to be reclassified to interest expense or cost of sales in the following 12 months. The fixed interest earned on finance receivables will offset the amount recognized in interest expense, resulting in a stable interest margin consistent with the Company's risk management strategy.

PACCAR Inc AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Unaudited)

(Millions, Except Share Amounts)

Substantially all of the Company's interest-rate contracts and foreign currency exchange contracts have been designated as cash flow hedges. The Company uses regression analysis to assess and measure effectiveness of interest-rate contracts. For foreign currency exchange contracts, the Company performs quarterly assessments to ensure that critical terms continue to match. Gains or losses on the ineffective portion of cash flow hedges are recognized currently in earnings and were immaterial for the three months ended March 31, 2009.

Hedge accounting is discontinued prospectively when the Company determines that a derivative financial instrument has ceased to be a highly effective hedge.

The following table presents the pre-tax effects of derivative instruments on the statement of consolidated income and other comprehensive income (OCI) for the three months ended March 31, 2009:

A substantial portion of foreign currency exchange contracts held as economic hedges were hedges of foreign currency exposures related to certain borrowings. As a result, the changes in fair value on these contracts were offset by the foreign currency translation gains or losses on the related borrowings. The total \$9.8 expense recognized during the first quarter of 2009 was offset by \$8.3 of currency translation gains.

NOTE I - Fair Value Measurements

Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The hierarchy of fair value measurements is described below.

Level 1 Valuations are based on quoted prices that the Company has the ability to obtain in actively traded markets for identical assets or liabilities. Since valuations are based on quoted prices that are readily and regularly available in an active market or exchange traded market, valuation of these instruments does not require a significant degree of judgment.

Level 2 Valuations are based on quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 Valuations are based on model-based techniques for which some or all of the assumptions are obtained from indirect market information that is significant to the overall fair value measurement and which require a significant degree of management judgment. The Company has no financial instruments requiring Level 3 valuation.

The Company uses the following methods and assumptions to measure fair value for assets and liabilities subject to recurring fair value measurements.

Marketable Securities: The Company's marketable debt securities consist of municipal bonds, government obligations and investment-grade corporate bonds.

The fair value of government obligations and corporate bonds is based on quoted prices in active markets. These are categorized as Level 1.

The fair value of municipal bonds is estimated using recent transactions, market price quotations, and pricing models that consider, where applicable, interest rates and other observable market information. These bonds are categorized as Level 2.

Derivative Financial Instruments: The Company's derivative contracts consist of interest-rate contracts and foreign currency exchange contracts.

These derivative contracts are over the counter and their fair value is determined using modeling techniques that include market inputs such as interest rates, yield curves and currency exchange rates. These contracts are categorized as Level 2.

A portion of the Company's fixed-rate term notes has been converted to variable-rate term notes using fair value hedges for interest-rate risk. Fair value is determined using modeling techniques that include market inputs for interest rates.

NOTE J - Employee Benefit Plans

PACCAR has several defined benefit pension plans, which cover a majority of its employees. The Company also provides coverage of approximately 50% of medical costs for the majority of its U.S. employees from retirement until age 65.

The following information details the components of net periodic pension cost for the Company's defined benefit plans:

Three Months Ended March 31	2009	2008
<i>Components of Pension Expense:</i>		
Service cost	\$ 10.1	\$ 12.0
Interest on projected benefit obligation	18.0	18.5
Expected return on assets	(21.5)	(23.6)
Amortization of prior service costs	.5	.7
Recognized actuarial loss	3.0	.4
Net pension expense	\$ 10.1	\$ 8.0

During the first quarter of 2009, the Company contributed \$153.2 to its pension plans.

The following information details the components of net periodic retiree cost for the Company's unfunded postretirement medical and life insurance plans:

Three Months Ended March 31	2009	2008
<i>Components of Retiree Expense:</i>		
Service cost	\$.9	\$ 1.1
Interest cost	1.2	1.4
Recognized actuarial loss		.1
Recognized net initial obligation	.1	.1
Net retiree expense	\$ 2.2	\$ 2.7

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

RESULTS OF OPERATIONS:

PACCAR recorded lower sales and net income in the first quarter of 2009 compared to year-earlier levels. Net sales and revenues in the first quarter of 2009 were \$1.99 billion compared to 3.94 billion in the first quarter of 2008. Net income was \$26.3 million compared to the \$292.3 million earned in the first quarter of the prior year. The translation effect of weaker foreign currencies decreased first quarter 2009 sales and revenues by \$203.6 million and income before income taxes by \$18.1 million compared to the first quarter of 2008.

Truck segment net sales and revenues decreased to \$1.70 billion in the first quarter of 2009 from \$3.58 billion in the first quarter of 2008 due to lower truck sales worldwide. Truck segment income before income taxes of \$25.4 million decreased from \$334.1 million in the prior year due to lower truck sales and margins in all markets, partially offset by lower spending on research and development and selling, general, and administrative expenses. First quarter 2009 gross margins of 9.6% declined from 14.9% in 2008, reflecting lower truck demand.

Truck retail sales in the U.S. and Canada were negatively impacted by continued economic weakness, including housing starts and auto production. Customers continue to delay purchasing decisions due to low freight tonnage and uncertain economic conditions. PACCAR's Class 8 truck production in the U.S. and Canada was down from the first quarter of 2008. The Company expects industry Class 8 heavy-duty retail sales for the year to be in the range of 100,000 - 130,000 trucks.

Truck demand in Europe has also been negatively affected by an economic recession as DAF's heavy-duty truck production declined from the same period last year. Europe 2009 industry sales for the above 15 tonne truck market are expected to be in the range of 180,000 - 220,000 trucks.

Selling, general and administrative expense (SG&A) of \$88.4 million decreased \$37.7 million compared to the first quarter of 2008 as a result of rigorous cost reduction initiatives. As a percent of sales, SG&A increased to 5.1% from 3.5% reflecting lower sales volumes.

Financial Services segment revenues decreased to \$254.8 million from \$317.4 million in the first quarter of last year. Financial Services income before income taxes of \$15.3 million in the first quarter of 2009 decreased from \$67.3 million earned in the first quarter of 2008, primarily due to lower finance margins resulting from a declining portfolio and higher credit losses. Included in the lower finance margin in 2009 was \$11.1 million of expense related to derivative contracts not subject to hedge accounting.

Edgar Filing: PACCAR INC - Form 10-Q

The provision for losses was \$25.0 million in the first quarter of 2009 compared to \$26.9 million in the fourth quarter of 2008 and \$17.4 million in the first quarter last year. Credit losses were \$28.3 million in the first quarter of 2009 compared to \$32.4 million in the fourth quarter of 2008 and \$15.3 million in the first quarter last year. In the current quarter, credit losses declined from the fourth quarter of 2008 due to lower credit losses in the U.S. and Canada partially offset by higher credit losses in Europe. First quarter 2009 credit losses increased over the first quarter of 2008 primarily due to increases in Europe.

Table of Contents

Financial Services segment 30+ days past due accounts were 4.9% of the portfolio balances as of March 31, 2009 compared to 3.3% as of December 31, 2008 and 2.3% as of March 31, 2008. The increase in past due accounts in the first quarter of 2009 over the fourth quarter of 2008 was due to increases in Europe and Mexico as negative economic conditions exerted further pressure on truck operators. First quarter 2009 30+ days past due accounts in the U.S. and Canada were comparable to the fourth quarter of 2008.

The effective tax rate for the first quarter of 2009 was 28.1% compared to 31.0% last year reflecting the mix of income from foreign operations.

LIQUIDITY AND CAPITAL RESOURCES:

Total Truck and Other cash and marketable debt securities decreased \$47.5 million to \$2.03 billion at the end of the first quarter of 2009, as positive operating cash flow was offset by dividend payments and capital investments.

Cash provided by operations was \$90.8 million in the first quarter of 2009 compared to \$367.0 million in the first quarter of 2008.

In November 2008, PACCAR Inc filed a shelf registration under the Securities Act of 1933. In February 2009, the Company issued \$750 million of fixed rate medium-term notes under this registration. The registration expires in 2011 and does not limit the principal amount of debt securities that may be issued during the period.

In January 2009, PACCAR's U.S. finance subsidiary, PACCAR Financial Corp. (PFC), issued \$178.5 million of floating rate medium-term notes. The registration under which these were issued expires in November 2009 and does not limit the principal amount of debt securities that may be issued during the period. PFC intends to file a new shelf registration statement under the Securities Act of 1933 in November 2009.

At March 31, 2009, PACCAR's European finance subsidiary, PACCAR Financial Europe (PFE), had 480 million available for issuance under a 1.5 billion medium-term note program registered with the London Stock Exchange. The program is renewable annually.

The Company has line of credit arrangements of \$3.51 billion, of which \$3.28 billion was unused at the end of March 2009. Included in these arrangements are \$3.0 billion of syndicated bank facilities. Of the \$3.0 billion bank facilities, \$2.0 billion matures in June 2009 and \$1.0 billion matures in June 2012. The Company intends to replace these credit facilities as they expire with facilities of similar amounts and duration. These credit facilities are maintained primarily to provide backup liquidity for commercial paper borrowings and maturing medium-term notes.

The Company believes its strong liquidity position and AA- investment grade credit rating will continue to provide financial stability and access to capital markets at competitive interest rates.

FORWARD-LOOKING STATEMENTS:

Certain information presented in this report contains forward-looking statements made pursuant to the Private Securities Litigation Reform Act of 1995, which are subject to risks and uncertainties that may affect actual results. Risks and uncertainties include, but are not limited to: a significant decline in industry sales; competitive pressures; reduced market share; reduced availability of or higher prices for fuel; increased safety, emissions, or other regulations resulting in higher costs and/or sales restrictions; currency or commodity price fluctuations; lower used truck prices; insufficient or under-utilization of manufacturing capacity; supplier interruptions; insufficient liquidity in the capital markets; fluctuations in interest rates; insufficient supplier capacity or access to raw materials; labor disruptions; shortages of commercial truck drivers; increased warranty costs or litigation; or legislative and governmental regulations.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There were no material changes in the Company's market risk during the three months ended March 31, 2009. For additional information, refer to Item 7A as presented in the 2008 Annual Report on Form 10-K.

ITEM 4. CONTROLS AND PROCEDURES

An evaluation was performed under the supervision and with the participation of the Company's management, including the principal executive officer and principal financial officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in rules 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended) as of March 31, 2009. Based on that evaluation, the principal executive officer and principal financial officer of the Company concluded that the disclosure controls and procedures in place at the Company are effective to ensure that information required to be disclosed by the Company, including its consolidated subsidiaries, in reports that the Company files or submits under the Exchange Act, is recorded, processed, summarized and reported on a timely basis in accordance with applicable rules and regulations. There have been no significant changes in the Company's internal controls over financial reporting that occurred during the fiscal quarter covered by this quarterly report that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
