NEWS RELEASE

Key energy industry companies unite for CO₂ sequestration project

CALGARY, ALBERTA February 4, 2008 Enbridge Inc. (TSX:ENB) (NYSE:ENB) announced today that it will lead a group of 19 energy industry participants in the Alberta Saline Aquifer Project (ASAP).

ASAP is a broad-based, industry-supported initiative that participants will roll out in three phases. Phase 1 will involve identifying suitable locations for the long term sequestration (storage) of carbon dioxide in deep saline aquifers. It is expected to be completed by the end of 2008.

Phase 2 will involve a pilot project during which sequestration sites will be designed to receive injected carbon dioxide. Later phases will involve expanding the project to a large-scale, long-term commercial sequestration operation.

ASAP is the first project of its kind in Canada, and will play a major role in advancing industry and government's knowledge of carbon dioxide sequestration. It also clearly demonstrates participants' commitment to addressing the challenges posed by climate change.

Sequestration is widely considered to be one of the most meaningful ways that Canada and Alberta can reduce overall emissions, said Patrick D. Daniel, President and Chief Executive Officer, Enbridge Inc. This project is a significant stepping stone in that endeavor, and an excellent opportunity for industry members to collaborate in the effort to find climate change solutions that work.

ASAP participants represent a wide range of expertise in the energy sector. Among them is founding partner EPCOR Utilities Inc., which builds, owns and operates power plants and electrical transmission and distribution networks in Canada and the U.S.

As a founding partner in ASAP, our goal is to accelerate carbon dioxide capture and sequestration in Alberta, and to jump start the development of a carbon dioxide pipeline that will be critical to its success, said Donald Lowry, President and Chief Executive Officer, EPCOR.

The list of ASAP participants is as follows:

ATCO Power Canada Ltd.
BP Canada Energy Company
Chevron Canada Resources
ConocoPhillips
Enbridge Inc.
EnCana
EPCOR
GreatPoint Energy Inc.
Hatch Energy
Laricina Energy Ltd.
Norwest Corporation
OPTI Canada Inc.
Pembina Pipeline Corporation
Penn West Energy Trust
Praxair Canada Inc.
Quadris Canada Corporation
Schlumberger Carbon Services
TransCanada
UTS Energy Corporation

About Enbridge

Enbridge Inc., a Canadian company, is a leader in energy transportation and distribution in North America and internationally. As a transporter of energy, Enbridge operates, in Canada and the U.S., the world's longest crude oil and liquids transportation system. The Company also has international operations and a growing involvement in the natural gas transmission and midstream businesses. As a distributor of energy, Enbridge owns and operates Canada's largest natural gas distribution company, and provides distribution services in Ontario, Quebec, New Brunswick and New York State. Enbridge employs approximately 5,500 people, primarily in Canada, the U.S. and South America. Enbridge's common shares trade on the Toronto Stock Exchange in Canada and on the New York Stock Exchange in the U.S. under the symbol ENB. Information about Enbridge is available on the Company's web site at www.enbridge.com.

NEWS RELEASE

Enbridge Receives NEB Approval on Southern Lights Project

CALGARY, ALBERTA February 20, 2008 Enbridge Inc (TSX: ENB) (NYSE: ENB) announced today that the National Energy Board (NEB) has approved Enbridge's applications for the Southern Lights Project.

We are very pleased that this major milestone in the project has been achieved, said Patrick D. Daniel, President and Chief Executive Officer, Enbridge, Inc. By increasing diluent import capacity, Southern Lights is very important to the economic development of Western Canadian crude oil production. As the NEB acknowledged, Southern Lights is an innovative and cost-effective solution to transport diluent.

Southern Lights is a proposed pipeline that will transport diluent from the U.S. Midwest to Edmonton, Alberta. A new 20-inch diluent pipeline from Chicago to Clearbrook, Minnesota is planned subject to U.S. regulatory approvals. From Clearbrook, the project involves reversing the flow of Enbridge's Line 13, which currently transports light synthetic crude oil from Edmonton to Clearbrook, Minnesota. Once reversed, Line 13 would transport diluent received at Clearbrook to the Edmonton area. Once completed, the Southern Lights diluent pipeline would have a capacity of 180,000 barrels-per-day (bpd). To replace the crude oil capacity of Line 13, the Southern Lights project also includes construction of a new 20-inch light sour crude oil pipeline from Cromer, Manitoba to Clearbrook.

NEWS RELEASE

Enbridge Receives NEB Approval on Alberta Clipper Expansion Project

CALGARY, ALBERTA February 22, 2008 Enbridge Inc (TSX: ENB) (NYSE: ENB) announced today that the National Energy Board (NEB) has approved Enbridge's application for the Alberta Clipper Expansion Project. The company is reviewing the details of this decision.

Alberta Clipper involves the construction of a new 36-inch diameter, 1,607-kilometre (1,000-mile) crude oil pipeline from Hardisty, Alberta to Superior, Wisconsin. Pending U.S. regulatory approvals the pipeline is scheduled to be in service in mid-2010. The pipeline will have an initial capacity of 450,000 barrels-per-day (bpd) and allow for expansions to increase capacity up to 800,000 bpd. Alberta Clipper will be integrated with, and form part of, the existing Enbridge system in Canada and the Enbridge Energy Partners' Lakehead system in the United States.

Today's decision marks another significant step for Enbridge in providing our customers with strategic alternatives for the marketing of Canadian crude, said Patrick D. Daniel, President and Chief Executive Officer, Enbridge Inc. The Alberta Clipper pipeline is the largest expansion project in Enbridge's history and demonstrates our commitment to accelerating energy delivery throughout North America. Together with our Southern Access project, Alberta Clipper will ultimately deliver an incremental 1.2 million barrels-per-day from Alberta to Eastern Canadian markets and U.S. refineries throughout the Midwest, the mid-continent and the U.S. Gulf Coast.
