Consolidated Financial Results

April 1, 2003 September 30, 2003

November 6, 2003

In preparing its consolidated financial information, ORIX Corporation and its subsidiaries have complied with accounting principles generally accepted in the United States of America, except as modified to account for stock splits in accordance with the usual practice in Japan.

U.S. Dollar amounts have been calculated at Yen 111.25 to \$1.00, the approximate exchange rate prevailing at September 30, 2003.

These documents may contain forward-looking statements about expected future events and financial results that involve risks and uncertainties. Such statements are based on our current expectations and are subject to uncertainties and risks that could cause actual results to differ materially from those described in the forward-looking statements. Factors that could cause such a difference include, but are not limited to, those described under "Risk Factors" in the Company's annual report on Form 20-F filed with the United States Securities and Exchange Commission.

The Company expects that it will be a passive foreign investment company under the U.S. Internal Revenue Code. A U.S. holder of the shares of the Company is therefore subject to special rules of taxation in respect of certain dividend, gain or other income on such shares. Investors should consult their tax advisors with respect to such rules, which are summarized in the Company's annual report.

Table of Contents

Group Position

The ORIX Group consists of ORIX Corporation, 197 subsidiaries and 72 affiliates, and is developing various operations. The main contents of each operation and the positioning of ORIX Corporation and its subsidiaries are given below. The following classification is the same as that used in the classification of information by segment.

Operations in Japan

(1) Corporate finance

This business centers on direct financing leases and installment loans, other than real estate loans, to corporate customers as well as the sale of a variety of financial products and other fee business.

[Main related companies]

ORIX Corporation, ORIX Alpha Corporation, ORIX Auto Leasing Corporation, IFCO Inc., Nittetsu Lease Co., Ltd.

(2) Equipment operating leases

This business principally comprises the rental of precision measuring equipment and personal computers to corporate customers as well as automobile rental operations.

[Main related companies]

ORIX Rentec Corporation, ORIX Rent-A-Car Corporation

(3) Real estate-related finance

This business encompasses real estate loans to corporate customers and housing loans to individuals. ORIX is also expanding its business involving loan servicing, commercial mortgage-backed securities (CMBS), and REITs.

[Main related companies]

ORIX Corporation, ORIX Trust and Banking Corporation, ORIX Asset Management & Loan Services Corporation

(4) Real estate

This business consists principally of condominium development and office rental activities as well as the operation of such facilities as hotels, employee dormitories, and training facilities.

[Main related companies]

ORIX Corporation, ORIX Estate Corporation, ORIX Real Estate Corporation

(5) Life insurance

This segment consists of direct and agency life insurance sales and related activities conducted by ORIX Life Insurance.

[Main related companies]

ORIX Life Insurance Corporation

(6) Other

The other segment encompasses securities transactions, venture capital operations, consumer card loan operations, and new businesses.

[Main related companies]

ORIX Corporation, ORIX Credit Corporation, ORIX Capital Corporation, ORIX Securities Corporation, ORIX Baseball Club Co., Ltd., ORIX COMMODITIES Corporation, ORIX Club Corporation, ORIX Investment Corporation

Edgar Filing: ORIX CORP - Form 6-K

Overseas Operations

(1) The Americas

Principal businesses in the Americas segment are direct financing leases, corporate lending, securities investment, commercial mortgage-backed securities (CMBS) related business, and real estate development.

[Main related companies]

ORIX USA Corporation, ORIX Real Estate Equities, Inc., ORIX Financial Services, Inc.,
ORIX Capital Markets, LLC, Stockton Holdings Limited

(2) Asia and Oceania

Principal businesses in Asia and Oceania involve direct financing leases, operating leases for precision measuring equipment and transportation equipment, corporate lending, and securities investment.

[Main related companies]

ORIX Investment and Management Private Limited, ORIX Asia Limited, ORIX Australia Corporation
Limited, ORIX Taiwan Corporation, PT. ORIX Indonesia Finance, ORIX Leasing Malaysia Berhad, ORIX Leasing
Pakistan Limited, ORIX Leasing Singapore Limited, INFRASTRUCTURE LEASING & FINANCIAL
SERVICES LIMITED

(3) Europe

Principal businesses in Europe center on aircraft operating leases, corporate loans, and securities investments.

[Main related companies]

ORIX Europe Limited, ORIX Ireland Limited, ORIX Aviation Systems Limited

Summary of Consolidated Financial Results

Management Policies

Objectives

ORIX has continued to provide value-added financial products and services to meet its customers' needs. To meet the increasingly sophisticated requirements of our customers, we have increased the number and quality of financial solutions that we provide. As a result, ORIX's financial services have expanded from leasing, rentals and lending to include life insurance, real estate finance and investment banking activities. As new business opportunities arise in the future, we plan to build on our accumulated knowledge and experience to continue to develop creative and innovative value-added financial solutions.

ORIX aims to achieve the optimum growth in long-term shareholder value and contribute to society by taking the lead in discovering customers' needs in order to provide new value-added financial services. This is the basis of ORIX's management philosophy and we will further strive to focus on areas that fully utilize the specialization of the entire ORIX Group in order to meet our customers' needs.

In addition, ORIX has placed the utmost importance on profitability by carefully selecting businesses and concentrating its resources to achieve maximum growth in shareholder value. However, in the Japanese financial market, it is quite difficult to achieve a level of risk-adjusted return that is comparable to global standards. In light of this reality, ORIX is striving to increase the efficiency of its asset-based business and is concentrating more of its resources on investment banking activities with the present goal of increasing profitability without increasing assets.

Dividend Policy

We believe we should use retained earnings mainly to invest in new growth opportunities as we strive to achieve returns for shareholders by increasing our corporate value over the long run.

Unit Shares

ORIX's basic policy is to periodically review the number of common shares that make up one trading unit in order to promote a broad participation of investors. With regards to the number of shares that make one unit, ORIX will consider demands from the market and weigh the costs and benefits associated with any changes to the present trading unit.

Corporate Governance

ORIX has strengthened its corporate governance structure in order to more objectively ensure that business activities are being carried out to maximize shareholder value. For example, ORIX established an

Table of Contents

Advisory Board in 1997, introduced a Corporate Executive Officer system in 1998, and welcomed independent directors to the Board and set up the Executive Nomination and Compensation Committee in 1999. In order to take further steps to strengthen its corporate governance structure, ORIX received approval from shareholders at the 40th Annual General Meeting of Shareholders on June 25, 2003 to adopt a Company with Committees board model, which became possible on April 1, 2003 as a result of revisions to the Japanese Commercial Code. In addition, ORIX believes that compliance is a foundation of strong corporate governance and continues to strengthen its compliance based on the spirit of EC21, which is our guide to continue to be an Excellent Company in the 21st Century. We have established a Compliance Coordination Office and we are actively promoting our Corporate Action Principles and Employee Action Principles as part of compliance.

Financial Results

1. Six Months Ended September 30, 2003

Economic Environment

The pace of recovery of the U.S. economy was boosted thanks to an increase in consumer spending, however, there were still concerns about employment. Asia experienced a general slowdown in certain economies due to the lower level of exports to the United States and sluggish consumer spending in some of the more developed countries of the region. The Japanese economy continued to suffer from deflation with still no clear signs of recovery in consumer spending, however, the rise in stock prices and improvement in corporate earnings has resulted in less pessimism about the future.

Financial Highlights

Income before Income Taxes	58,256 million yen (up 53% year on year)
Net Income	31,419 million yen (up 38% year on year)
Earnings Per Share (Basic)	375.42 yen (up 38% year on year)
Earnings Per Share (Diluted)	353.65 yen (up 38% year on year)
Shareholders' Equity Per Share	6,465.22 yen (up 7% from March 31, 2003)
ROE (annualized)	12.0% (September 30, 2002: 9.1%)
ROA (annualized)	1.08% (September 30, 2002: 0.73%)

Revenues: 345,871 million yen (up 3% year on year)

As we continued to focus on the profitability of each transaction, we carefully selected new leasing and loan transactions. As a result of a lower balance of assets and fewer gains from securitization, revenues from direct financing leases and interest on loans and investment securities were down compared to the same period of the previous fiscal year. However, revenues from operating leases increased compared to the same period of the previous fiscal year due primarily to the improvement of the precision measuring

Table of Contents

equipment rental business and gains from the sale of some office buildings. Residential condominium sales performed strongly due primarily to the increase in the number of condominiums sold to buyers during the period. While brokerage commissions increased due primarily to the strong performance of the Japanese stock market, net gains on investment securities declined compared to the same period of the previous fiscal year resulting in an overall year-on-year decline in brokerage commissions and net gains on investment securities. Total revenues were up 3% year on year to 345,871 million yen.

Expenses: 299,142 million yen (unchanged)

Interest expense was down 13% year on year due mainly to lower asset levels and the resulting lower level of debt overseas. Costs of residential condominium sales increased in line with the growth in revenues from residential condominium sales and selling, general and administrative expenses increased mainly due to the increase in the number of consolidated companies, while write-downs of long-lived assets and write-downs of securities were lower compared to the same period of the previous fiscal year. As a result, expenses were flat year on year at 299,142 million yen.

Net Income: 31,419 million yen (up 38% year on year)

Operating income grew 35% year on year to 46,729 million yen. Equity in net income of affiliates increased 255% to 11,923 million yen due mainly to the recognition of deferred tax assets at Korea Life Insurance Co., Ltd. (refer to page 8, 5. Additional Information). As a result, income before extraordinary gain, cumulative effect of a change in accounting principle and income taxes increased 53% year on year to 58,256 million yen and net income rose 38% year on year to 31,419 million yen.

Operating Assets: 4,937,086 million yen (down 4% from March 31, 2003)

Operating assets were down 4% to 4,937,086 million yen compared with March 31, 2003 as a result of a careful selection of new assets, the sale of certain assets and the appreciation of the yen against the U.S. dollar.

Segment Information (Profits refer to income before income taxes)

Operations in Japan

Corporate Finance: While the automobile leasing operations continued to perform relatively strongly, the cautious selection of new assets and the resulting lower level of segment assets compared with the first half of the previous fiscal year in operations other than automobile leasing led to a decrease in segment profits to 21,919 million yen from the 24,500 million yen recorded in the same period of the previous fiscal year.

Equipment Operating Leases: The improvement of the precision measuring equipment rental business contributed to an increase in segment profits to 3,456 million yen compared to 2,979 million yen in the first half of the previous fiscal year.

Table of Contents

Real Estate-Related Finance: Segment assets decreased year on year as a portion of the housing loan portfolio was sold off. Although gains from the housing loan operations and the increase in revenues from the loan servicing operations contributed to earnings, segment profits were 9,119 million yen for the first half of this fiscal year compared to 9,910 million yen for the same period of the previous fiscal year. The figures for the last fiscal year included a gain of 3,174 million yen from the sale of shares of a J-REIT to the public in June 2002.

Real Estate: The condominium development business made a strong contribution to segment profits due primarily to an increase in the number of condominiums sold to buyers. In addition, gains from the sale of some office buildings and other real estate, and revenues from building maintenance operations contributed to segment profits of 6,329 million yen in the first half of this fiscal year, up from a loss of 8,807 million yen that resulted primarily from write-downs of long-lived assets of 14,665 million yen in the same period of the previous fiscal year.

Life Insurance: Revenues were lower as a result of the continued shift to insurance-only life insurance products. Segment profits for the first half of this fiscal year were 2,507 million yen compared to 2,976 million yen in the same period of the previous fiscal year, due to lower life insurance related investment income.

Other: Although the consumer card loan operations continued to perform well, fewer gains were realized at our venture capital and other operations, and segment profits were 2,828 million yen in the first half of this fiscal year down from 6,926 million yen in the same period of the previous fiscal year.

Overseas Operations

The Americas: Segment profits improved to 3,912 million yen in the first half of this fiscal year compared to a loss of 1,027 million yen in the same period of the previous fiscal year due largely to lower provisions and fewer write-downs of securities.

Asia and Oceania: Strong performance of the corporate lending and automobile leasing operations of each company in the region and the earnings contribution from Korea Life Insurance Co., Ltd. (refer to page 8, 5. Additional Information), an equity method affiliate, resulted in a large increase in segment profits to 13,939 million yen in the first half of this fiscal year compared to 4,314 million yen in the same period of the previous fiscal year.

Europe: Segment profits experienced a loss of 1,899 million yen, compared to a loss of 610 million yen in the same period of the previous fiscal year due to the decrease in segment assets and the recording of losses on certain equity method investments.

Table of Contents

2. Summary of Cash flows (Six Months Ended September 30, 2003)

Cash and cash equivalents decreased by 18%, or 36,330 million yen, to 168,347 million yen compared to March 31, 2003.

Cash flows from operating activities, which included a decrease stemming from equity in net income of and gain on sales of affiliates of 11,527 million yen, were 71,813 million yen in the first half of this fiscal year, down from the 83,282 million yen in the first half of the previous fiscal year, which included an increase associated with the recording of 14,665 million yen of write-downs of long-lived assets.

Cash flows from investing activities were 119,027 million yen in the first half of the previous fiscal year and 117,408 million yen in the first half of this fiscal year, due to inflows associated with proceeds from sales of available-for-sale securities and proceeds from sales of other securities .

345,174 million yen was used in cash flows from financing activities in the first half of the previous fiscal year, while 225,059 million yen was used in the first half of this fiscal year due to the decrease of commercial paper and repayment of debt.

3. Summary of Second Quarter (Three Months Ended September 30, 2003)

In the second quarter, revenues increased 1,183 million yen year on year. Revenues from direct financing leases and interest on loans and investment securities were down compared to the same period of the previous fiscal year owing to a lower balance of assets and fewer gains from securitization. Life insurance premiums and related investment income was also down as a result of the continued shift to insurance-only life insurance products. On the other hand, residential condominium sales continued to perform well as more condominiums were sold to buyers, and our building maintenance operations recorded under other operating revenues also increased. Overall expenses were down 13,074 million yen compared to the previous second quarter due to the decrease in interest expense and life insurance costs as well as a drop in write-downs of long-lived assets, which were 14,665 million yen in the second quarter of the previous fiscal year. This resulted in an increase in operating income by 14,257 million yen to 24,193 million yen compared with the previous second quarter. As a result, income before extraordinary gain, cumulative effect of a change in accounting principle and income taxes and net income for the second quarter rose by 20,662 million yen and 11,443 million yen, respectively, compared with the previous second quarter.

Table of Contents

4. Additional Information

Equity in net income of affiliates for the period ended September 30, 2003 included 9,911 million yen from Korea Life Insurance Co., Ltd. (KLI). This amount included ORIX 's proportionate interest in the ordinary operating results of KLI and our proportionate interest in the recognition of deferred tax assets of 5,380 million yen attributable to a change in tax rules in Korea.

The change in Korean tax rules in May 2003 will enable KLI to apply certain historical losses to reduce future taxable income. As a result of this change, KLI recorded a tax benefit in earnings and a corresponding deferred tax asset in the first quarter of its current fiscal year ending March 31, 2004. ORIX recorded a proportionate interest in income reported by KLI in the second quarter of our fiscal year ending March 31, 2004 in accordance with the Company 's policy of recording its equity in the income of KLI on a one-quarter lag basis.

ORIX has plans to sell a portion of its interest in KLI in the near future. However, no definitive agreements of sale have been arranged at the time of this announcement. The corresponding increase in the carrying value of ORIX 's ownership interest as a result of the recording of the above recognition of deferred tax assets in KLI is not necessarily reflective of an increase in the fair value of our equity interest in the event of a sale to a third party. We believe that there is a possibility that we will be unable to sell our portion of KLI at or above the carrying value of our investment at the time of sale. In such an event, we will record a loss on the sale in the period in which a definitive agreement of sale is arranged.

Note: 1. The Company recognized an Extraordinary Gain, Net of Applicable Tax Effect in the six months ended September 30,2003 and in the previous fiscal year due to the excess of the proportionate fair value of the net assets over the purchase price of the affiliate paid by the Company (Negative Goodwill).

2. On April 1,2002, as a result of the adoption of FASB Statement No. 141 (Business Combinations), the Company and its subsidiaries recorded a transition gain arising from the write-off of Negative Goodwill of JPY1,937 million as of March 31,2002 as the Cumulative Effect of a Change in Accounting Principle, Net of Applicable Tax Effect.

Table of Contents

Basis of presentation and significant accounting policies

In preparing the accompanying consolidated financial statements, ORIX Corporation (the Company) and its subsidiaries have followed with accounting principles generally accepted in the United States of America, except as modified to account for stock splits in accordance with the usual practice in Japan.

The significant differences between U.S. and Japanese accounting policies and practices are as follows: Accounting for direct financing leases, accounting for the impairment of long-lived assets and long-lived assets to be disposed of, the use of the straight-line method of depreciation for operating lease equipment, deferral of life insurance policy acquisition costs and the calculation of policy liabilities, accounting for derivative instruments and hedging activities, accounting for goodwill and intangible assets resulting from business combinations, accounting for pension plans, and a reflection of the income tax effect on such adjustments. Segment information is prepared in accordance with FASB Statement No. 131. The basis of presentation and significant accounting policies are as follows.

1. Consolidated subsidiaries

The accompanying consolidated financial statements include the accounts of the Company, 112 domestic subsidiaries and 85 foreign subsidiaries (all 197 subsidiaries). The accounts of certain variable interest entities created after January 31, 2003 are also included pursuant to FASB Interpretation No.46 (Consolidation of Variable Interest Entities). Major subsidiaries are ORIX Auto Leasing Corporation, ORIX USA Corporation and others.

2. Affiliates accounted for by the equity method

Investment in 47 domestic affiliates and 25 foreign affiliates (all 72 affiliates) are accounted for by using equity method. Major affiliates are The Fuji Fire and Marine Insurance Company Limited, Stockton Holdings Limited and others.

3. The date of subsidiaries interim closing

Subsidiaries where interim closing date differs from that of the Company close their books with necessary adjustments for consolidation purpose at the interim closing date.

4. Accounting policies

(1) Use of estimates

The preparation of the consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(2) Recognition of revenues

Direct financing leases The excess of aggregate lease rentals plus the estimated unguaranteed residual value over the cost of the leased equipment constitutes the unearned lease income to be taken into income over the lease term using the interest method. Certain direct lease origination costs are being deferred and amortized over the lease term as a yield adjustment.

Table of Contents

Operating leases Revenues from operating leases are recognized on a straight-line basis over the contract terms. Operating lease assets are recorded at cost and are depreciated over their estimated useful lives mainly on a straight-line basis.

Insurance premium and expenses Premium income from life insurance policies are recognized as earned premiums when due. Life insurance benefits are recorded as expenses when they are incurred. Policy liabilities for future policy benefits are established for by the net level premium method, based on actuarial estimates of the amount of future policyholder benefits. Certain costs associated with writing insurance are deferred and amortized over the respective policy periods in proportion to anticipated premium revenue.

(3) Investment in securities

Trading securities are reported at fair value with unrealized gains and losses included in income. Available-for-sale securities are reported at fair value, and unrealized gains or losses are recorded through accumulated other comprehensive income (loss), net of applicable income taxes. However, the Company and its subsidiaries recognize losses related to securities for which the market price has been below the acquisition cost and not considered temporary in nature. Held-to-maturity securities are recorded at amortized cost.

(4) Impairment of long-lived assets

Long-lived assets and certain identifiable intangibles to be held and used by the Company and its subsidiaries are reviewed for impairment, whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. When the sum of undiscounted future cash flows expected to be generated by the assets is less than the carrying amount of the assets, impairment losses are recognized based on the fair value of the assets.

(5) Allowance for doubtful receivables on direct financing leases and probable loan losses

The allowance for doubtful receivables on direct financing leases and probable loan losses is maintained at a level which, in the judgment of management, is adequate to provide for probable losses on lease and loan portfolios that can be reasonably anticipated.

(6) Prepaid benefit cost (Accrued benefit liability)

The Company and its subsidiaries follow FASB Statement No.87 (Employer s Accounting for Pensions).

(7) Foreign currencies translation

The Company and its subsidiaries maintain their accounting records in their functional currency. Transactions in foreign currencies are recorded in the entity s functional currency based on the prevailing exchange rates on the transaction date.

The financial statements of foreign subsidiaries and affiliates are translated into Japanese yen by applying the exchange rates in effect at the end of each fiscal year to all assets and liabilities. Income and expenses are translated at the average rates of exchange prevailing during the fiscal year.

(8) Hedge accounting

The Company and its subsidiaries follow FASB Statement No. 133 (Accounting for Derivative Instruments and Hedging Activities), as amended by FASB Statement No. 138 (Accounting for Certain Derivative Instruments and Certain Hedging Activities an amendment of FASB Statement No. 133). All derivatives are recorded on the balance sheet at fair value.

Table of Contents

(9) Goodwill and intangible assets resulting from business combinations

Goodwill and intangible assets that have indefinite useful lives are not amortized. Impairment tests are required on an annual basis and between annual tests when events or circumstances indicate impairment.

(10) Income taxes

The Company, in general, determines its income tax provisions for interim periods by applying the current estimate of the effective tax rate to be applicable for the full fiscal year to the actual year-to-date pre-tax income amount. The estimated effective tax rate is determined by dividing total estimated income tax expense for the full fiscal year by total estimated pre-tax income for the full fiscal year.

5. Cash and cash equivalents in the accompanying consolidated statements of cash flows

Cash and cash equivalents include cash on hand, deposits placed with banks and short-term highly liquid investments with original maturities of three months or less.

Revenues from foreign customers

Revenues from foreign customers are as follows.

Table of Contents

Derivative Financial Instruments

The Company and its subsidiaries are parties to derivative financial instruments that they generally use in the normal course of business to reduce exposure to fluctuations in interest and foreign currency rates.

(a) Cash flow hedges

The Company and its subsidiaries designate interest rate swap agreements as cash flow hedges for variability of cash flows originating from floating rate borrowings.

(b) Fair value hedges

The Company and its subsidiaries use financial instruments designated as fair value hedges to hedge their exposure to interest rate risk and foreign currency exchange risk. The Company and its subsidiaries designate foreign currency swap agreements and foreign exchange forward contracts to minimize foreign currency exposures on operating assets including lease receivables, loan receivables and borrowings. One subsidiary hedges a portion of the interest rate exposure of the fair values of certain asset-backed securities using sales of future contracts and forward contracts on U.S. treasury securities. Certain subsidiaries, which issued medium-term notes with fixed interest rates, use interest rate swap contracts to hedge interest rate exposure of the fair values of these medium-term notes. In case where the medium-term notes were denominated in other than the subsidiaries' local currency, foreign currency swap agreements are used to hedge foreign exchange rate exposure.

(c) Hedges of net investment in foreign operations

The Company uses foreign exchange forward contracts, foreign currency swap agreements and borrowings denominated in the subsidiaries' local currencies to hedge the foreign currency exposure of the net investment in foreign subsidiaries.

(d) Trading and other derivatives

Certain subsidiaries engage in trading activities with various future contracts. The Company and certain subsidiaries entered into interest rate swap agreements, caps and collars for risk management purposes but not qualified for hedge accounting under FASB Statement No. 133. In accordance with FASB Statement No. 133, conversion options were bifurcated from the Company and certain subsidiaries' convertible bonds and are recorded as stand-alone derivative contracts. At September 30, 2003 and 2002, March 31, 2003, the total face amount were JPY54,819 million (US\$493 million), JPY110,733 million and JPY82,000 million, respectively, and the fair value of conversion option were JPY504 million (US\$5 million), JPY695 million, and JPY187 million, respectively.
