CARNIVAL CORPORATION & PLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

NOTE 1 General

The consolidated financial statements include the accounts of Carnival Corporation and Carnival plc and their respective subsidiaries. Together with their consolidated subsidiaries, they are referred to collectively in these consolidated financial statements and elsewhere in this joint Quarterly Report on Form 10-Q as Carnival Corporation & plc, our, us and we.

The Consolidated Balance Sheet at May 31, 2013, the Consolidated Statements of Operations and the Consolidated Statements of Comprehensive Loss for the three and six months ended May 31, 2013 and 2012 and the Consolidated Statements of Cash Flows for the six months ended May 31, 2013 and 2012 are unaudited and, in the opinion of our management, contain all adjustments, consisting of only normal recurring adjustments, necessary for a fair presentation. Our interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements and the related notes included in the Carnival Corporation & plc 2012 joint Annual Report on Form 10-K (Form 10-K). Our operations are seasonal and results for interim periods are not necessarily indicative of the results for the entire year.

Cruise passenger ticket revenues include fees and taxes levied by governmental authorities and collected by us from our guests. The portion of these fees and taxes included in passenger ticket revenues and commissions, transportation and other costs were \$116 million and \$110 million and \$255 million and \$237 million for the three and six months ended May 31, 2013 and 2012, respectively.

During the three and six months ended May 31, 2013 and 2012, repairs and maintenance expenses, including minor improvement costs and dry-dock expenses, were \$239 million and \$196 million and \$464 million and \$432 million, respectively, and are substantially all included in other ship operating expenses.

NOTE 2 Debt

In December 2012, we issued \$500 million of unsecured publicly-traded notes, which bear interest at 1.9% and are due in December 2017. We used the net proceeds of these notes for general corporate purposes.

In February 2013, we issued \$500 million of unsecured publicly-traded notes, which bear interest at 1.2% and are due in February 2016. The proceeds were used to repay a like amount of unsecured floating rate export credit facilities prior to their maturity dates through 2022.

In March 2013, we borrowed \$311 million under an unsecured euro-denominated export credit facility, the proceeds of which were used to pay for a portion of *AIDAstella*'s purchase price. This floating rate facility is due in semi-annual installments through March 2025.

In May 2013, we borrowed \$526 million under an unsecured export credit facility, the proceeds of which were used to pay for a portion of *Royal Princess*' purchase price. This floating rate facility is due in semi-annual installments through May 2025.

NOTE 3 Contingencies

Litigation

As a result of the January 2012 *Costa Concordia* incident (2012 Ship Incident), litigation claims, enforcement actions, regulatory actions and investigations, including, but not limited to, those arising from personal injury, loss of life, loss of or damage to personal property, business interruption losses or environmental damage to any affected coastal waters and the surrounding areas, have been and may be asserted or brought against various parties, including us. The existing assertions are in their initial stages and there are significant jurisdictional uncertainties. The ultimate outcome of these matters cannot be determined at this time. However, we do not expect these matters to have a significant impact on our results of operations because we have insurance coverage for these types of third-party claims.

Additionally, in the normal course of our business, various claims and lawsuits have been filed or are pending against us. Most of these claims and lawsuits are covered by insurance and, accordingly, the maximum amount of our liability, net of any insurance recoverables, is typically limited to our self-insurance retention levels. Management believes the ultimate outcome of these claims and lawsuits will not have a material

adverse impact on our consolidated financial statements.

Table of Contents

Contingent Obligations Lease Out and Lease Back Type (LILO) Transactions

At May 31, 2013, Carnival Corporation had estimated contingent obligations totaling \$410 million, excluding termination payments as discussed below, to participants in LILO transactions for two of its ships. At the inception of these leases, the aggregate of the net present value of these obligations was paid by Carnival Corporation to a group of major financial institutions, who agreed to act as payment undertakers and directly pay these obligations. As a result, these contingent obligations are considered extinguished and neither the funds nor the contingent obligations have been included in our Consolidated Balance Sheets.

In the event that Carnival Corporation were to default on its contingent obligations and assuming performance by all other participants, we estimate that we would, as of May 31, 2013, be responsible for a termination payment of \$33 million. In 2017, we have the right to exercise options that would terminate these LILO transactions at no cost to us.

In certain cases, if the credit ratings of the financial institutions who are directly paying the contingent obligations fall below AA-, then Carnival Corporation will be required to replace these financial institutions with other financial institutions whose credit ratings are at least AA or meet other specified credit requirements. In such circumstances, we would incur additional costs, although we estimate that they would not be material to our consolidated financial statements. For the two financial institution payment undertakers subject to this AA- credit rating threshold, one has a credit rating of AA and the other has a credit rating of AA-. If Carnival Corporation's credit rating, which is BBB+, falls below BBB, it will be required to provide a standby letter of credit for \$38 million, or, alternatively, provide mortgages for this aggregate amount on these two ships.

Contingent Obligations Indemnifications

Some of the debt contracts that we enter into include indemnification provisions that obligate us to make payments to the counterparty if certain events occur. These contingencies generally relate to changes in taxes and changes in laws that increase lender capital costs and other similar costs. The indemnification clauses are often standard contractual terms and were entered into in the normal course of business. There are no stated or notional amounts included in the indemnification clauses, and we are not able to estimate the maximum potential amount of future payments, if any, under these indemnification clauses. We have not been required to make any material payments under such indemnification clauses in the past and, under current circumstances, we do not believe a request for material future indemnification payments is probable.

NOTE 4 Fair Value Measurements, Derivative Instruments and Hedging Activities

Fair Value Measurements

U.S. accounting standards establish a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurement). This hierarchy requires entities to maximize the use of observable inputs and minimize the use of unobservable inputs. The three levels of inputs used to measure fair value are as follows:

Level 1 measurements are based on unadjusted quoted prices in active markets for identical assets or liabilities that we have the ability to access. Valuation of these items does not entail a significant amount of judgment.

Level 2 measurements are based on quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active or market data other than quoted prices that are observable for the assets or liabilities.

Level 3 measurements are based on unobservable data that are supported by little or no market activity and are significant to the fair value of the assets or liabilities.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between independent and knowledgeable market participants at the measurement date. Therefore, even when market assumptions are not readily available, our own assumptions are set to reflect those that we believe market participants would use in pricing the asset or liability at the measurement date.

Edgar Filing: CARNIVAL CORP - Form 10-Q

The fair value measurement of a financial asset or financial liability must reflect the nonperformance risk of the counterparty and us. Therefore, the impact of our counterparty's creditworthiness was considered when in an asset position, and our creditworthiness was considered when in a liability position in the fair value measurement of our financial instruments. Creditworthiness did not have a significant impact on the fair values of our financial instruments at May 31, 2013 and November 30, 2012. Both the counterparties and we are expected to continue to perform under the contractual terms of the instruments. Considerable judgment may be required in interpreting market data used to develop the estimates of fair value. Accordingly, certain estimates of fair values presented herein are not necessarily indicative of the amounts that could be realized in a current or future market exchange.

Table of Contents**Financial Instruments that are not Measured at Fair Value on a Recurring Basis**

The estimated carrying and fair values and basis of valuation of our financial instrument assets and liabilities that are not measured at fair value on a recurring basis were as follows (in millions):

	Carrying Value	May 31, 2013		Carrying Value	November 30, 2012	
		Fair Value Level 1	Fair Value Level 2		Fair Value Level 1	Fair Value Level 2
Assets						
Cash and cash equivalents (a)	\$ 277	\$ 277	\$ -	\$ 269	\$ 269	\$ -
Long-term other assets (b)	67	1	65	39	1	36
Total	\$ 344	\$ 278	\$ 65	\$ 308	\$ 270	\$ 36
Liabilities						
Fixed rate debt (c)	\$ 5,997	\$ -	\$ 6,460	\$ 5,195	\$ -	\$ 5,825
Floating rate debt (c)	3,865	-	3,874	3,707	-	3,706
Total	\$ 9,862	\$ -	\$ 10,334	\$ 8,902	\$ -	\$ 9,531

- (a) Cash and cash equivalents are comprised of cash on hand and time deposits and, due to their short maturities, the carrying values approximate their fair values.
- (b) At May 31, 2013 and November 30, 2012, substantially all of our long-term other assets were comprised of notes and other receivables. The fair values of notes and other receivables were based on estimated future cash flows discounted at appropriate market interest rates.
- (c) The net difference between the fair value of our fixed rate debt and its carrying value was due to the market interest rates in existence at May 31, 2013 and November 30, 2012 being lower than the fixed interest rates on these debt obligations, including the impact of changes in our credit ratings, if any. At May 31, 2013 the net difference between the fair value of our floating rate debt and its carrying value was due to the market interest rates in existence at May 31, 2013 being slightly lower than the floating interest rates on these debt obligations, including the impact of changes in our credit ratings, if any. The fair values of our publicly-traded notes were based on their unadjusted quoted market prices in active markets. The fair values of our other debt were estimated based on appropriate market interest rates being applied to this debt.

Financial Instruments that are Measured at Fair Value on a Recurring Basis

The estimated fair value and basis of valuation of our financial instrument assets and liabilities that are measured at fair value on a recurring basis were as follows (in millions):

	May 31, 2013		November 30, 2012	
	Level 1	Level 2	Level 1	Level 2
Assets				
Cash equivalents (a)	\$ 434	\$ -	\$ 196	\$ -
Restricted cash (b)	28	-	28	-
Marketable securities held in rabbi trusts (c)	106	10	104	16
Derivative financial instruments (d)	-	22	-	48
Total	\$ 568	\$ 32	\$ 328	\$ 64
Liabilities				

Edgar Filing: CARNIVAL CORP - Form 10-Q

Derivative financial instruments (d)	\$	-	\$	72	\$	-	\$	43
Total	\$	-	\$	72	\$	-	\$	43

- (a) Cash equivalents are comprised of money market funds.
- (b) Restricted cash is substantially all comprised of money market funds.
- (c) Level 1 and 2 marketable securities are held in rabbi trusts and are principally comprised of frequently-priced mutual funds invested in common stocks and other investments, respectively. Their use is restricted to funding certain deferred compensation and non-qualified U.S. pension plans.
- (d) See Derivative Instruments and Hedging Activities section below for detailed information regarding our derivative financial instruments.

Table of Contents

We measure our derivatives using valuations that are calibrated to the initial trade prices. Subsequent valuations are based on observable inputs and other variables included in the valuation models such as interest rate, yield and commodity price curves, forward currency exchange rates, credit spreads, maturity dates, volatilities and netting arrangements. We use the income approach to value derivatives for foreign currency options and forwards, interest rate swaps and fuel derivatives using observable market data for all significant inputs and standard valuation techniques to convert future amounts to a single present value amount, assuming that participants are motivated, but not compelled to transact. We also corroborate our fair value estimates using valuations provided by our counterparties.

Nonfinancial Instruments that are Measured at Fair Value on a Nonrecurring Basis

The reconciliation of the changes in the carrying amounts of our goodwill, which goodwill has been allocated to our North America and Europe, Australia and Asia (EAA) cruise brands, was as follows (in millions):

	North America Cruise Brands	EAA Cruise Brands	Total
Balance at November 30, 2012	\$ 1,898	\$ 1,276	\$ 3,174
Foreign currency translation adjustment	-	(40)	(40)
Balance at May 31, 2013	\$ 1,898	\$ 1,236	\$ 3,134

At July 31, 2012, all of our cruise brands carried goodwill, except for Ibero Cruises (Ibero) and Seabourn. As of that date, we performed our annual goodwill impairment reviews and no goodwill was impaired. At May 31, 2013, accumulated goodwill impairment charges were \$153 million.

The reconciliation of the changes in the carrying amounts of our intangible assets not subject to amortization, which represent trademarks that have been allocated to our North America and EAA cruise brands, was as follows (in millions):

	North America Cruise Brands	EAA Cruise Brands	Total
Balance at November 30, 2012	\$ 927	\$ 372	\$ 1,299
Foreign currency translation adjustment	-	(16)	(16)
Balance at May 31, 2013	\$ 927	\$ 356	\$ 1,283

As of July 31, 2012, we also performed our annual trademark impairment review for our cruise brands that have significant trademarks recorded, which are AIDA Cruises (AIDA), P&O Cruises (Australia), P&O Cruises (UK) and Princess Cruises (Princess). No trademarks were considered impaired at that time.

The determination of our cruise brand and trademark fair values includes numerous assumptions that are subject to various risks and uncertainties. We believe that we have made reasonable estimates and judgments in determining whether our goodwill and trademarks have been impaired. However, if there is a material change in assumptions used or if there is a material change in the conditions or circumstances influencing fair values in the future, then we may need to recognize a material impairment charge.

At May 31, 2013 and November 30, 2012, our intangible assets subject to amortization are not significant to our consolidated financial statements.

Derivative Instruments and Hedging Activities

We utilize derivative and nonderivative financial instruments, such as foreign currency forwards, options and swaps, foreign currency debt obligations and foreign currency cash balances, to manage our exposure to fluctuations in certain foreign currency exchange rates, and interest

Edgar Filing: CARNIVAL CORP - Form 10-Q

rate swaps to manage our interest rate exposure in order to achieve a desired proportion of fixed and floating rate debt. In addition, we utilize our fuel derivatives program to mitigate a portion of the risk to our future cash flows attributable to potential fuel price increases, which we define as our economic risk. Our policy is to not use any financial instruments for trading or other speculative purposes.

All derivatives are recorded at fair value. The changes in fair value are recognized currently in earnings if the derivatives do not qualify as effective hedges, or if we do not seek to qualify for hedge accounting treatment, such as for our fuel derivatives. If a derivative is designated as a fair value hedge, then changes in the fair value of the derivative are offset against the changes in the fair value of the underlying hedged item. If a derivative is designated as a cash flow hedge, then the effective portion of the changes in the fair value of the derivative is recognized as a component of accumulated other comprehensive income (AOCI) until the underlying hedged item is recognized in earnings or the forecasted transaction is no longer probable. If a derivative or a nonderivative financial instrument is designated as a hedge of our net investment in a foreign operation, then changes in the fair value of the financial instrument are recognized as a component of AOCI to offset a portion of the change in the translated value of the net investment being hedged, until the investment is sold or liquidated. We formally document hedging relationships for all derivative and nonderivative hedges and the underlying hedged items, as well as our risk management objectives and strategies for undertaking the hedge transactions.

Table of Contents

We classify the fair values of all our derivative contracts as either current or long-term, depending on whether the maturity date of the derivative contract is within or beyond one year from the balance sheet date. The cash flows from derivatives treated as hedges are classified in our Consolidated Statements of Cash Flows in the same category as the item being hedged. Our cash flows related to fuel derivatives are classified within investing activities.

The estimated fair values of our derivative financial instruments and their location on the Consolidated Balance Sheets were as follows (in millions):

	Balance Sheet Location	May 31, 2013	November 30, 2012
Derivative assets			
Derivatives designated as hedging instruments			
Net investment hedges (a)	Prepaid expenses and other	\$ 1	\$ 1
	Other assets long-term	6	6
Foreign currency zero cost collars (b)	Prepaid expenses and other	-	11
	Other assets long-term	15	5
		22	23
Derivatives not designated as hedging instruments			
Fuel (c)	Other assets long-term	-	25

- (a) At May 31, 2013 and November 30, 2012, we had foreign currency forwards totaling \$128 million and \$235 million, respectively, that are designated as hedges of our net investments in foreign operations, which have a euro-denominated functional currency. At May 31, 2013, these outstanding foreign currency forwards mature through July 2017.
- (b) At May 31, 2013 and November 30, 2012, we had foreign currency derivatives consisting of foreign currency zero cost collars that are designated as foreign currency cash flow hedges for a portion of our euro-denominated shipbuilding payments. See **Newbuild Currency Risks** below for additional information regarding these derivatives.
- (c) At May 31, 2013, we had fuel derivatives consisting of zero cost collars on Brent crude oil (**Brent**) to cover a portion of our estimated fuel consumption through 2017. See **Fuel Price Risks** below for additional information regarding these fuel derivatives. At November 30, 2012, we had fuel derivatives consisting of zero cost collars on Brent to cover a portion of our estimated fuel consumption through 2016. There were no realized gains or losses recognized in the three and six months ended May 31, 2013 and 2012 on our fuel derivatives.
- (d)

Edgar Filing: CARNIVAL CORP - Form 10-Q

We have euro interest rate swaps designated as cash flow hedges whereby we receive floating interest rate payments in exchange for making fixed interest rate payments. At May 31, 2013 and November 30, 2012, these interest rate swap agreements effectively changed \$255 million and \$269 million, respectively, of EURIBOR-based floating rate euro debt to fixed rate debt. These interest rate swaps settle through February 2022. In addition, at May 31, 2013 we had U.S. dollar interest rate swaps designated as fair value hedges whereby we receive fixed interest rate payments in exchange for making floating interest rate payments. These interest rate swap agreements effectively changed \$500 million of fixed rate debt to U.S. dollar LIBOR-based floating rate debt. These interest rate swaps settle through February 2016.

Table of Contents

The effective portions of our derivatives qualifying and designated as hedging instruments recognized in other comprehensive loss were as follows (in millions):

	Three Months Ended May 31,		Six Months Ended May 31,	
	2013	2012	2013	2012
Net investment hedges	\$ 1	\$ 54	\$ (2)	\$ 55
Foreign currency zero cost collars cash flow hedges	\$ (6)	\$ -	\$ 7	\$ -
Interest rate swaps cash flow hedges	\$ 1	\$ (4)	\$ 3	\$ (11)

There are no credit risk related contingent features in our derivative agreements, except for bilateral credit provisions within our fuel derivative counterparty agreements. These provisions require interest-bearing, non-restricted cash to be posted or received as collateral to the extent the fuel derivative fair value payable to or receivable from an individual counterparty, respectively, exceeds \$100 million. At May 31, 2013 and November 30, 2012, no collateral was required to be posted to or received from our fuel derivative counterparties.

The amount of estimated cash flow hedges unrealized gains and losses that are expected to be reclassified to earnings in the next twelve months is not significant. We have not provided additional disclosures of the impact that derivative instruments and hedging activities have on our consolidated financial statements as of May 31, 2013 and November 30, 2012 and for the three and six months ended May 31, 2013 and 2012 where such impacts were not significant.

Foreign Currency Exchange Rate Risks**Overall Strategy**

We manage our exposure to fluctuations in foreign currency exchange rates through our normal operating and financing activities, including netting certain exposures to take advantage of any natural offsets and, when considered appropriate, through the use of derivative and nonderivative financial instruments. Our primary focus is to manage the economic foreign currency exchange risks faced by our operations, which are the ultimate foreign currency exchange risks that would be realized by us if we exchanged one currency for another, and not accounting risks. Accordingly, we do not currently hedge foreign currency exchange accounting risks with derivative financial instruments. The financial impacts of the hedging instruments we do employ generally offset the changes in the underlying exposures being hedged.

Operational and Investment Currency Risks

Our European and Australian cruise brands subject us to foreign currency translation risk related to the euro, sterling and Australian dollar because these brands generate significant revenues and incur significant expenses in euro, sterling or the Australian dollar. Accordingly, exchange rate fluctuations of the euro, sterling and Australian dollar against the U.S. dollar will affect our reported financial results since the reporting currency for our consolidated financial statements is the U.S. dollar. Any strengthening of the U.S. dollar against these foreign currencies has the financial statement effect of decreasing the U.S. dollar values reported for cruise revenues and expenses. Any weakening of the U.S. dollar has the opposite effect.

Most of our brands also have non-functional currency risk related to their international sales operations, which has become an increasingly larger part of most of their businesses over time, and primarily includes the euro, sterling and Australian, Canadian and U.S. dollars. In addition, all of our brands have non-functional currency expenses for a portion of their operating expenses. Accordingly, these brands revenues and expenses in non-functional currencies create some degree of natural offset for recognized transactional currency gains and losses due to currency exchange movements.

We consider our investments in foreign operations to be denominated in relatively stable currencies and of a long-term nature. We partially mitigate our net investment currency exposures by denominating a portion of our foreign currency intercompany payables in our foreign operations functional currencies, principally sterling. At May 31, 2013 and November 30, 2012, we have designated \$1.8 billion of our foreign currency intercompany payables as nonderivative hedges of our net investments in foreign operations. Accordingly, we have included \$350 million and \$243 million of cumulative foreign currency transaction nonderivative gains in the cumulative translation adjustment component of AOCI at May 31, 2013 and November 30, 2012, respectively, which offsets a portion of the losses recorded in AOCI upon translating our foreign operations net assets into U.S. dollars. During the three and six months ended May 31, 2013 and 2012, we recognized foreign currency nonderivative transaction gains of \$18 million (\$128 million in 2012) and \$107 million (\$68 million in 2012), respectively, in the cumulative

translation adjustment component of AOCI.

Table of Contents

Newbuild Currency Risks

Our shipbuilding contracts are typically denominated in euros. Our decisions regarding whether or not to hedge a non-functional currency ship commitment for our cruise brands are made on a case-by-case basis, taking into consideration the amount and duration of the exposure, market volatility, currency exchange rate correlation, economic trends, our overall expected net cash flows by currency and other offsetting risks. We use foreign currency derivative contracts and have used nonderivative financial instruments to manage foreign currency exchange rate risk for some of our ship construction payments.

In July 2012, we entered into foreign currency zero cost collars that are designated as cash flow hedges for a portion of P&O Cruises (UK) newbuild's euro-denominated shipyard payments. These collars mature in February 2015 at a weighted-average ceiling rate of £0.83 to the euro, or \$278 million, and a weighted-average floor rate of £0.77 to the euro, or \$257 million. If the spot rate is between these two rates on the date of maturity, then we would not owe or receive any payments under these collars.

In May 2013, we settled our foreign currency zero cost collars that were designated as cash flow hedges for the final euro-denominated shipyard payments of *Royal Princess* prior to their maturity date, which resulted in an insignificant gain being recognized in other comprehensive loss for the three months ended May 31, 2013. Concurrently with the settlement of these foreign currency zero cost collars, we entered into foreign currency forwards for \$552 million that were also designated as cash flow hedges for the final euro-denominated shipyard payments of *Royal Princess* due in May 2013. These foreign currency forwards settled in May 2013, and we recognized a \$6 million gain in other comprehensive loss for the three months ended May 31, 2013.

At May 31, 2013, substantially all of our remaining newbuild currency exchange rate risk relates to euro-denominated newbuild construction payments for *Regal Princess* and a portion of P&O Cruises (UK)'s newbuild, which represent a total commitment of \$1.1 billion.

The cost of shipbuilding orders that we may place in the future that is denominated in a different currency than our cruise brands' or the shipyards' functional currency is expected to be affected by foreign currency exchange rate fluctuations. These foreign currency exchange rate fluctuations may affect our desire to order new cruise ships.

Interest Rate Risks

We manage our exposure to fluctuations in interest rates through our investment and debt portfolio management strategies. These strategies include purchasing high quality short-term investments with floating interest rates, and evaluating our debt portfolio as to whether to make periodic adjustments to the mix of fixed and floating rate debt through the use of interest rate swaps and the issuance of new debt or the early retirement of existing debt. At May 31, 2013, 58% and 42% (61% and 39% at November 30, 2012) of our debt bore fixed and floating interest rates, respectively, including the effect of interest rate swaps.

Fuel Price Risks

Our exposure to market risk for changes in fuel prices substantially all relate to the consumption of fuel on our ships. We use our fuel derivatives program to mitigate a portion of our economic risk attributable to potential fuel price increases. We designed our fuel derivatives program to maximize operational flexibility by utilizing derivative markets with significant trading liquidity and our program currently consists of zero cost collars on Brent.

All of our derivatives are based on Brent prices whereas the actual fuel used on our ships is marine fuel. Changes in the Brent prices may not show a high degree of correlation with changes in our underlying marine fuel prices. We will not realize any economic gain or loss upon the monthly maturities of our zero cost collars unless the average monthly price of Brent is above the ceiling price or below the floor price. We believe that these derivatives will act as economic hedges, however hedge accounting is not applied. As part of our fuel derivatives program, we will continue to evaluate various derivative products and strategies. Accordingly, during the three months ended May 31, 2013 we reduced the spread between the floor and ceiling prices for certain of our fuel derivatives that mature in 2014 and 2015.

At May 31, 2013, our outstanding fuel derivatives consisted of zero cost collars on Brent to cover a portion of our estimated fuel consumption as follows:

Table of Contents

Maturities (a)	Transaction Dates	Barrels (in thousands)	Weighted-Average Floor Prices	Weighted-Average Ceiling Prices	Percent of Estimated Fuel Consumption Covered
Fiscal 2013 (Q3-Q4)					
	November 2011	1,056	\$ 74	\$ 132

		5,304			25%

(a) Fuel derivatives mature evenly over each month within the above fiscal periods.

Concentrations of Credit Risk

As part of our ongoing control procedures, we monitor concentrations of credit risk associated with financial and other institutions with which we conduct significant business. Our maximum exposure under foreign currency and fuel derivative contracts and interest rate swap agreements that are in-the-money, which were not significant at May 31, 2013, is the replacement cost, net of any collateral received, in the event of nonperformance by the counterparties to the contracts, all of which are currently our lending banks. We seek to minimize credit risk exposure, including counterparty nonperformance primarily associated with our cash equivalents, investments, committed financing facilities, contingent obligations, derivative instruments, insurance contracts and new ship progress payment guarantees, by normally conducting business with large, well-established financial institutions, insurance companies and export credit agencies, and by diversifying our counterparties. In addition, we have guidelines regarding credit ratings and investment maturities that we follow to help safeguard liquidity and minimize risk. We normally do require collateral and/or guarantees to support notes receivable on significant asset sales, long-term ship charters and new ship progress payments to shipyards. We currently believe the risk of nonperformance by any of our significant counterparties is remote.

Edgar Filing: CARNIVAL CORP - Form 10-Q

We also monitor the creditworthiness of travel agencies and tour operators in Europe and credit card providers to which we extend credit in the normal course of our business. Our credit exposure includes contingent obligations related to cash payments received directly by travel agents and tour operators for cash collected by them on cruise sales in most of Europe where we are obligated to extend credit in a like amount to these guests even if we do not receive payment from the travel agents or tour operators. Concentrations of credit risk associated with these receivables and contingent obligations are not considered to be material, primarily due to the large number of unrelated accounts within our customer base, the amount of these contingent obligations and their short maturities. We have experienced only minimal credit losses on our trade receivables and related contingent obligations. We do not normally require collateral or other security to support normal credit sales.

Table of Contents

NOTE 5 Segment Information

We have three reportable cruise segments that are comprised of our (1) North America cruise brands, (2) EAA cruise brands and (3) Cruise Support. In addition, we have a Tour and Other segment. Our segments are reported on the same basis as the internally reported information that is provided to our chief operating decision maker (CODM), who is the Chairman of the Boards of Directors and Chief Executive Officer of Carnival Corporation and Carnival plc. Decisions to allocate resources and assess performance for Carnival Corporation & plc are made by the CODM upon review of the segment results across all of our cruise brands and other segments.

Our North America cruise segment includes Carnival Cruise Lines, Holland America Line, Princess and Seabourn. Our EAA cruise segment includes AIDA, Costa Cruises (Costa), Cunard, Ibero, P&O Cruises (Australia) and P&O Cruises (UK). These individual cruise brand operating segments have been aggregated into two reportable segments based on the similarity of their economic and other characteristics, including types of customers, regulatory environment, maintenance requirements, supporting systems and processes and products and services they provide. Our Cruise Support segment represents certain of our port and related facilities and other corporate-wide services that are provided for the benefit of our cruise brands. Our Tour and Other segment represented the hotel and transportation operations of Holland America Princess Alaska Tours and two of our ships that we chartered to an unaffiliated entity. In April 2013, we sold one of these chartered ships to the unaffiliated entity and recognized a \$15 million gain as a reduction of Tour and Other operating expenses during the three months ended May 31, 2013.

Table of Contents

Selected information for our Cruise and Tour and Other segments was as follows (in millions):

	Three Months Ended May 31,					
	Revenues	Operating expenses	Selling and administrative	Depreciation and amortization	Ibero impairment charges	Operating income (loss)
2013						
North America Cruise Brands (a)	\$ 2,113	\$ 1,487	\$ 254	\$ 228	\$ -	\$ 144

Diluted weighted-average shares outstanding	777	779	777	778
Basic and diluted earnings (loss) per share	\$ 0.05	\$ 0.02	\$ 0.10	\$ (0.16)
Anti-dilutive equity awards excluded from diluted earnings (loss) per share computations	6	9	5	13

NOTE 7 Shareholders Equity

During the six months ended May 31, 2013, we repurchased 2.8 million shares of Carnival Corporation common stock for \$103 million under our general repurchase authorization program (Repurchase Program). From June 1, 2013 through June 24, 2013, no shares of Carnival Corporation common stock or Carnival plc ordinary shares were repurchased under the Repurchase Program. At June 24, 2013, the remaining availability under the Repurchase Program was \$975 million.

During the six months ended May 31, 2013, Carnival Investments Limited, a subsidiary of Carnival Corporation, sold 0.9 million of Carnival plc ordinary shares for net proceeds of \$35 million. Substantially all of the net proceeds from these sales were used to purchase 0.9 million shares of Carnival Corporation common stock. Pursuant to our Stock Swap (Stock Swap) program, Carnival Corporation sold these Carnival plc ordinary shares owned by Carnival Investments Limited only to the extent it was able to repurchase shares of Carnival Corporation common stock in the U.S. on at least an equivalent basis.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Cautionary Note Concerning Factors That May Affect Future Results

Some of the statements, estimates or projections contained in this joint Quarterly Report on Form 10-Q are forward-looking statements that involve risks, uncertainties and assumptions with respect to us, including some statements concerning future results, outlooks, plans, goals and other events which have not yet occurred. These statements are intended to qualify for the safe harbors from liability provided by Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. We have tried, whenever possible, to identify these statements by using words like will, may, could, should, would, believe, depends, expect, goal, anticipate, forecast, future, target, indicate and similar expressions of future intent or the negative of such terms.

Forward-looking statements include those statements that may impact, among other things, the forecasting of our non-GAAP earnings per share (EPS); net revenue yields; booking levels; pricing; occupancy; operating, financing and tax costs, including fuel expenses; costs per available lower berth day (ALBD); estimates of ship depreciable lives and residual values; liquidity; goodwill and trademark fair values; and outlook. Because forward-looking statements involve risks and uncertainties, there are many factors that could cause our actual results, performance or achievements to differ materially from those expressed or implied in this joint Quarterly Report on Form 10-Q. These factors include, but are not limited to, the following:

- general economic and business conditions;
- increases in fuel prices;
- incidents, the spread of contagious diseases and threats thereof, adverse weather conditions or other natural disasters and other incidents affecting the health, safety, security and satisfaction of guests and crew;
- the international political climate, armed conflicts, terrorist and pirate attacks, vessel seizures, and threats thereof, and other world events affecting the safety and security of travel;
- negative publicity concerning the cruise business in general or us in particular, including any adverse environmental impacts of cruising;
- litigation, enforcement actions, fines or penalties;
- economic, market and political factors that are beyond our control, which could increase our operating, financing and other costs;
- changes in and compliance with laws and regulations relating to the protection of persons with disabilities, employment, environment, health, safety, security, tax and other regulations under which we operate;
- our ability to implement our shipbuilding programs and ship repairs, maintenance and refurbishments on terms that are favorable or consistent with our expectations;
- increases to our repairs and maintenance expenses and refurbishment costs as our fleet ages;
- lack of continuing availability of attractive, convenient and safe port destinations;
- continuing financial viability of our travel agent distribution system, air service providers and other key vendors in our supply chain and reductions in the availability of, and increases in the pricing for, the services and products provided by these vendors;
- disruptions and other damages to our information technology and other networks and operations, and breaches in data security;
- failure to keep pace with developments in technology;
- competition from and overcapacity in the cruise ship or land-based vacation industry;
- loss of key personnel or our ability to recruit or retain qualified personnel;
- union disputes and other employee relation issues;
- disruptions in the global financial markets or other events that may negatively affect the ability of our counterparties and others to perform their obligations to us;
- the continued strength of our cruise brands and our ability to implement our brand strategies;
- our international operations are subject to additional risks not generally applicable to our U.S. operations;
- geographic regions in which we try to expand our business may be slow to develop and ultimately not develop how we expect;
- our decisions to self-insure against various risks or our inability to obtain insurance for certain risks at reasonable rates;
- fluctuations in foreign currency exchange rates;
- whether our future operating cash flow will be sufficient to fund future obligations and whether we will be able to obtain financing, if necessary, in sufficient amounts and on terms that are favorable or consistent with our expectations;
- risks associated with the dual listed company arrangement; and
- uncertainties of foreign legal systems as Carnival Corporation and Carnival plc are not U.S. corporations.

Forward-looking statements should not be relied upon as a prediction of actual results. Subject to any continuing obligations under applicable law or any relevant stock exchange rules, we expressly disclaim any obligation to disseminate, after the date of this joint Quarterly Report on Form 10-Q, any updates or revisions to any such forward-looking statements to reflect any change in expectations or events, conditions or circumstances on which any such statements are based.

Table of Contents

Outlook

On June 25, 2013, we said that we expected our non-GAAP diluted EPS for the 2013 third quarter and full year would be in the ranges of \$1.25 to \$1.33 and \$1.45 to \$1.65, respectively (see Key Performance Non-GAAP Financial Indicators). Our 2013 third quarter and full year guidance were based on fuel prices of \$671 per metric ton. In addition, our 2013 third quarter and full year guidance were based on currency rates of \$1.33 and \$1.32 to the euro, \$0.95 and \$0.99 to the Australian dollar, respectively, and \$1.56 to the sterling. The fuel and currency assumptions used in our guidance change daily and, accordingly, our forecasts change daily based on the changes in these assumptions.

Our 2013 outlook was affected by the decline in cruise ticket pricing at some of our North America and EAA brands. This decline in cruise ticket pricing was driven by the promotional discounting at Carnival Cruise Lines and the challenging economic environment in Europe.

We believe it is more meaningful to evaluate our earnings performance by excluding the impact of unrealized gains and losses on fuel derivatives from non-GAAP diluted EPS. Therefore, we do not include any year-to-date impact or future estimates of unrealized gains and losses on fuel derivatives in our non-GAAP EPS guidance. However, we do forecast realized gains and losses on fuel derivatives by applying current Brent prices to the derivatives that settle in the forecast period. Based on this approach and current prices, we are not forecasting any realized gains or losses for 2013 under our current fuel derivatives portfolio.

The above forward-looking statements involve risks, uncertainties and assumptions with respect to us. There are many factors that could cause our actual results to differ materially from those expressed above including, but not limited to, general economic and business conditions, increases in fuel prices, incidents, spread of contagious diseases, adverse weather conditions, geo-political events, negative publicity and other factors that could adversely impact our revenues, costs and expenses. You should read the above forward-looking statement together with the discussion of these and other risks under Cautionary Note Concerning Factors That May Affect Future Results.

Critical Accounting Estimates

For a discussion of our critical accounting estimates, see Management's Discussion and Analysis of Financial Condition and Results of Operations that is included in the 2012 Form 10-K.

Costa's 2012 Ship Incident and Carnival Cruise Lines' 2013 voyage disruptions (2013 voyage disruptions), including the associated negative publicity, have resulted in lower cruise ticket pricing from prior levels. However, we believe that these events will not have a material long-term impact on either brand and, accordingly, we believe it is more-likely-than-not that the fair values of these brands exceed their carrying values. At May 31, 2013, Costa's and Carnival Cruise Lines' goodwill balance was \$511 million and \$579 million, respectively. We will be performing our annual goodwill impairment tests as of July 31, 2013, which will include a quantitative test for Costa and Carnival Cruise Lines. See Note 4 Fair Value Measurements, Derivative Instruments and Hedging Activities in the accompanying consolidated financial statements for additional goodwill discussions.

Given the continued weakness of the Spanish economy and its impact on Ibero's cruise ticket pricing, it is possible that a portion of the net carrying values of Ibero's three cruise ships and trademarks could become impaired. However, we believe that the Spanish economy will recover over the long-term and alternative guest source markets and ship deployments are available for Ibero's cruise ships to enable us to recover their carrying values. At May 31, 2013, the net carrying values of Ibero's three cruise ships and its trademarks were \$226 million and \$13 million, respectively.

The determination of our cruise brand, cruise ship and trademark fair values include numerous assumptions that are subject to various risks and uncertainties. We believe that we have made reasonable estimates and judgments in determining whether our goodwill, cruise ships and trademarks have been impaired. However, if there is a material change in assumptions used or if there is a material change in the conditions or circumstances influencing fair values, then we may need to recognize a material impairment charge.

Seasonality

Our revenues from the sale of passenger tickets are seasonal. Historically, demand for cruises has been greatest during our third quarter, which includes the Northern Hemisphere summer months. This higher demand during the third quarter results in higher ticket prices and occupancy levels and, accordingly, the largest share of our operating income is earned during this period. The seasonality of our results also increases due to ships being taken out-of-service for maintenance, which we schedule during non-peak demand periods. In addition, substantially all of Holland America Princess Alaska Tours' revenue and net income is generated from May through September in conjunction with the Alaska cruise season.

U.S. dollar to £1	\$ 1.52	\$ 1.59	\$ 1.55	\$ 1.58
U.S. dollar to Australian dollar	\$ 1.02	\$ 1.03	\$ 1.03	\$ 1.04

(a) ALBDs is a standard measure of passenger capacity for the period, which we use to perform rate and capacity variance analyses to determine the main non-capacity driven factors that cause our cruise revenues and expenses to vary. ALBDs assume that each cabin we offer for sale accommodates two passengers and is computed by multiplying passenger capacity by revenue-producing ship operating days in the period.

(b) For the three months ended May 31, 2013 compared to the three months ended May 31, 2012, we had a 1.2% capacity increase in ALBDs caused by a 4.6% capacity increase in our EAA brands, partially offset by a 1.0% capacity decrease in our North America brands. Our EAA brands capacity increase was caused by the addition of two AIDA 2,194-passenger capacity ships and one Costa 2,984-passenger capacity ship, partially offset by the sale of one P&O Cruises (Australia) 1,462-passenger capacity ship. Our North America brands capacity decrease was caused by more ship dry-dock days in 2013 compared to 2012, partially offset by the addition of one Carnival Cruise Lines 3,690-passenger capacity ship.

For the six months ended May 31, 2013 compared to the six months ended May 31, 2012, we had a 2.5% capacity increase in ALBDs caused by a 4.8% increase in our EAA brands and a 1.1% increase in our North America brands. Our EAA brands capacity increase was principally due to the reasons discussed above for the three months ended May 31, 2013 and 2012 comparison, partially offset by the removal of two Costa ships. Our North America brands capacity increase was caused by the addition of one Carnival Cruise Lines 3,690-passenger capacity ship.

(c) In accordance with cruise business practice, occupancy is calculated using a denominator of two passengers per cabin even though some cabins can accommodate three or more passengers. Percentages in excess of 100% indicate that on average more than two passengers occupied some cabins.

Three Months Ended May 31, 2013 (2013) Compared to the Three Months Ended May 31, 2012 (2012)**Revenues****Consolidated**

Cruise passenger ticket revenues made up 75% of our 2013 total revenues. Cruise passenger ticket revenues decreased by \$62 million, or 2.3%, to \$2.6 billion in 2013 from \$2.7 billion in 2012. This decrease was caused by:

\$81 million - decrease in cruise ticket pricing;

\$20 million - stronger U.S. dollar against the euro and sterling (referred to as currency impact) and

Edgar Filing: CARNIVAL CORP - Form 10-Q

\$10 million - decrease in air transportation revenues from guests who purchased their tickets from us.
These decreases were partially offset by:

\$31 million - 1.2% capacity increase in ALBDs and

\$19 million - slight increase in occupancy.

Table of Contents

The remaining 25% of 2013 total revenues were substantially all comprised of onboard and other cruise revenues, which decreased slightly by \$5 million to \$839 million in 2013 from \$844 million in 2012. Onboard and other revenues included concession revenues of \$257 million in 2013 and \$253 million in 2012.

North America Brands

Cruise passenger ticket revenues made up 74% of our 2013 total revenues. Cruise passenger ticket revenues decreased by \$38 million, or 2.4%, to \$1.5 billion in 2013 from \$1.6 billion in 2012. This decrease was substantially due to a 1.3 percentage point decrease in occupancy, which accounted for \$19 million, and our 1.0% capacity decrease in ALBDs, which accounted for \$16 million.

The remaining 26% of 2013 total revenues were comprised of onboard and other cruise revenues, which decreased by \$23 million, or 4.0%, to \$553 million in 2013 from \$576 million in 2012. The majority of the decrease was due to a 1.3 percentage point decrease in occupancy, which accounted for \$7 million, and our 1.0% capacity decrease in ALBDs, which accounted for \$6 million. Onboard and other revenues included concession revenues of \$167 million in 2013 and \$169 million in 2012.

EAA Brands

Cruise passenger ticket revenues made up 80% of our 2013 total revenues. Cruise passenger ticket revenues decreased by \$24 million, or 2.2%, and remained at \$1.1 billion in both 2013 and 2012. This decrease was caused by:

\$80 million - decrease in cruise ticket pricing;

\$20 million - currency impact and

\$17 million - decrease in air transportation revenues from guests who purchased their tickets from us.
These decreases were partially offset by:

\$50 million - 4.6% capacity increase in ALBDs and

\$48 million - 4.2 percentage point increase in occupancy.

Our cruise ticket pricing decline, which was affected by the challenging economic environment in Europe, was driven by our Northern European brands, partially offset by increases at Costa and P&O Cruises (Australia).

The remaining 20% of 2013 total revenues were comprised of onboard and other cruise revenues, which increased by \$13 million, or 5.2%, to \$261 million in 2013 from \$248 million in 2012. This increase was caused by our 4.6% capacity increase in ALBDs, which accounted for \$11 million, and a 4.2 percentage point increase in occupancy, which also accounted for \$11 million. These increases were partially offset by lower onboard spending by our guests. Onboard and other revenues included concession revenues of \$89 million in 2013 and \$84 million in 2012.

Costs and Expenses

Consolidated

Operating costs and expenses increased slightly by \$9 million and remained at \$2.5 billion in both 2013 and 2012. This increase was caused by:

Edgar Filing: CARNIVAL CORP - Form 10-Q

\$33 million - additional costs and expenses related to the 2013 *Carnival Triumph* voyage disruptions;

\$29 million - 1.2% capacity increase in ALBDs;

\$17 million - nonrecurrence in 2013 of hull and machinery insurance proceeds for the total loss of a ship in excess of its net book value resulting from the 2012 Ship Incident (Costa's excess insurance proceeds);

\$17 million - nonrecurrence in 2013 of a gain from Cunard's litigation settlement related to *Queen Mary 2's* propulsion pods (Cunard's litigation settlement);

\$13 million - higher dry-dock costs;

\$12 million - higher insurance premiums and

\$18 million - various other operating expenses, net.
These increases were partially offset by:

\$60 million - lower fuel prices;

\$37 million - lower fuel consumption per ALBD;

\$18 million - decreases in commissions, transportation and other related expenses caused by lower cruise ticket pricing and a decrease in air transportation costs related to guests who purchased their tickets from us and

\$15 million - gain in our Tour and Other segment from the sale of Holland America Line's former *Noordam*, which was on charter to an unaffiliated entity.

Table of Contents

Selling and administrative expenses increased \$18 million, or 4.2%, to \$449 million in 2013 from \$431 million in 2012.

Depreciation and amortization expenses increased \$15 million, or 4.0%, to \$391 million in 2013 from \$376 million in 2012.

Our total costs and expenses as a percentage of revenues increased to 95.6% in 2013 from 92.8% in 2012.

North America Brands

Operating costs and expenses decreased \$36 million, or 2.4%, and remained at \$1.5 billion in both 2013 and 2012. This decrease was caused by:

\$39 million - intersegment transaction related to intersegment insurance reimbursements, which was fully offset in our Cruise Support segment;

\$32 million - lower fuel prices;

\$15 million - 1.0% capacity decrease in ALBDs and

\$14 million - lower fuel consumption per ALBD.

These decreases were partially offset by:

\$33 million - additional costs and expenses related to the 2013 *Carnival Triumph* voyage disruptions;

\$9 million - increase in air transportation costs related to guests who purchased their tickets from us and

\$23 million - various other operating expenses, net.

Our total costs and expenses as a percentage of revenues increased to 93.1% in 2013 from 91.1% in 2012.

EAA Brands

Operating costs and expenses increased slightly by \$8 million and remained at \$1.0 billion in both 2013 and 2012. This increase was caused by:

\$44 million - 4.6% capacity increase in ALBDs;

\$17 million - nonrecurrence in 2013 of Costa's excess insurance proceeds;

\$17 million - nonrecurrence in 2013 of a gain from Cunard's litigation settlement;

Edgar Filing: CARNIVAL CORP - Form 10-Q

\$16 million - 4.2 percentage point increase in occupancy and

\$13 million - higher dry-dock costs.

These increases were partially offset by:

\$31 million - decreases in commissions, transportation and other related expenses caused by lower cruise ticket pricing and a decrease in air transportation costs related to guests who purchased their tickets from us;

\$28 million - lower fuel prices;

\$22 million - lower fuel consumption per ALBD and

\$14 million - currency impact.

Our total costs and expenses as a percentage of revenues increased to 96.2% in 2013 from 93.6% in 2012.

Operating Income

Our consolidated operating income decreased \$101 million to \$152 million in 2013 from \$253 million in 2012. Our North America brands operating income decreased \$49 million to \$144 million in 2013 from \$193 million in 2012, and our EAA brands operating income decreased \$34 million to \$51 million in 2013 from \$85 million in 2012. These changes were primarily due to the reasons discussed above.

Nonoperating Expense

Net unrealized losses on fuel derivatives were \$31 million in 2013 compared to \$145 million in 2012. There were no realized gains or losses recognized in 2013 and 2012.

Table of Contents

Key Performance Non-GAAP Financial Indicators

We use net cruise revenues per ALBD (net revenue yields), net cruise costs per ALBD and net cruise costs excluding fuel per ALBD as significant non-GAAP financial measures of our cruise segment financial performance. These measures enable us to separate the impact of predictable capacity changes from the more unpredictable rate changes that affect our business. We believe these non-GAAP measures provide useful information to investors and expanded insight to measure our revenue and cost performance as a supplement to our U.S. generally accepted accounting principles (U.S. GAAP) consolidated financial statements.

Net revenue yields are commonly used in the cruise business to measure a company s cruise segment revenue performance and for revenue management purposes. We use net cruise revenues rather than gross cruise revenues to calculate net revenue yields. We believe that net cruise revenues is a more meaningful measure in determining revenue yield than gross cruise revenues because it reflects the cruise revenues earned net of our most significant variable costs, which are travel agent commissions, cost of air and other transportation, certain other costs that are directly associated with onboard and other revenues and credit card fees. Substantially all of our remaining cruise costs are largely fixed, except for the impact of changing prices and food expenses, once our ship capacity levels have been determined.

Net passenger ticket revenues reflect gross cruise revenues, net of (1) onboard and other revenues, (2) commissions, transportation and other costs and (3) onboard and other cruise costs. Net onboard and other revenues reflect gross cruise revenues, net of (1) passenger ticket revenues, (2) commissions, transportation and other costs and (3) onboard and other cruise costs. Net passenger ticket revenue yields and net onboard and other revenue yields are computed by dividing net passenger ticket revenues and net onboard and other revenues by ALBDs.

Net cruise costs per ALBD and net cruise costs excluding fuel per ALBD are the most significant measures we use to monitor our ability to control our cruise segment costs rather than gross cruise costs per ALBD. We exclude the same variable costs that are included in the calculation of net cruise revenues to calculate net cruise costs with and without fuel to avoid duplicating these variable costs in our non-GAAP financial measures.

In addition, because our EAA cruise brands utilize the euro, sterling and Australian dollar to measure their results and financial condition, the translation of those operations to our U.S. dollar reporting currency results in decreases in reported U.S. dollar revenues and expenses if the U.S. dollar strengthens against these foreign currencies and increases in reported U.S. dollar revenues and expenses if the U.S. dollar weakens against these foreign currencies. Accordingly, we also monitor and report these non-GAAP financial measures assuming the 2013 periods currency exchange rates have remained constant with the 2012 periods rates, or on a constant dollar basis, in order to remove the impact of changes in exchange rates on our non-U.S. dollar cruise operations. We believe that this is a useful measure since it facilitates a comparative view of the changes in our business in a fluctuating currency exchange rate environment.

We believe that the impairment charges recognized in the six months ended May 31, 2012 related to Ibero s goodwill and trademarks are special charges and, therefore, are not an indication of our future earnings performance. As such, we believe it is more meaningful for the impairment charges to be excluded from our net loss and loss per share and, accordingly, we present 2012 non-GAAP net income and non-GAAP EPS excluding these impairment charges.

Under U.S. GAAP, the realized and unrealized gains and losses on fuel derivatives not qualifying as fuel hedges are recognized currently in earnings. We believe that unrealized gains and losses on fuel derivatives are not an indication of our earnings performance since they relate to future periods and may not ultimately be realized in our future earnings. Therefore, we believe it is more meaningful for the unrealized gains and losses on fuel derivatives to be excluded from our net income and EPS and, accordingly, we present non-GAAP net income and non-GAAP EPS excluding these unrealized gains and losses. For the six months ended May 31, 2012, non-GAAP diluted weighted-average shares outstanding were 779 million, which includes the dilutive effect of equity plans.

We have not included in our earnings guidance the impact of unrealized gains and losses on fuel derivatives because these unrealized amounts involve a significant amount of uncertainty, and we do not believe they are an indication of our future earnings performance. Accordingly, our earnings guidance is presented on a non-GAAP basis only. As a result, we did not present a reconciliation between forecasted non-GAAP diluted EPS guidance and forecasted U.S. GAAP diluted EPS guidance, since we do not believe that the reconciliation information would be meaningful.

Our consolidated financial statements are prepared in accordance with U.S. GAAP. The presentation of our non-GAAP financial information is not intended to be considered in isolation or as substitute for, or superior to, the financial information prepared in accordance with U.S. GAAP. There are no specific rules for determining our non-GAAP current and constant dollar financial measures and, accordingly, they are susceptible to varying calculations, and it is possible that they may not be exactly comparable to the like-kind information presented by other companies, which is a potential risk associated with using these measures to compare us to other companies.

Table of Contents

Consolidated gross and net revenue yields were computed by dividing the gross and net cruise revenues, without rounding, by ALBDs as follows (dollars in millions, except yields):

	Three Months Ended May 31,		
	2013	2013 Constant Dollar	2012
Passenger ticket revenues	\$ 2,613	\$ 2,633	\$ 2,675

Table of Contents

Non-GAAP fully diluted earnings per share was computed as follows (in millions, except per share data):

	Three Months Ended May 31,	
	2013	2012
Net income diluted		
U.S. GAAP net income	\$ 41	\$ 14
Unrealized losses on fuel derivatives, net	31	145
Non-GAAP net income	\$ 72	\$ 159
Weighted-average shares outstanding diluted	777	779
Earnings per share diluted		
U.S. GAAP earnings per share	\$ 0.05	\$ 0.02
Unrealized losses on fuel derivatives, net	0.04	0.18
Non-GAAP earnings per share	\$ 0.09	\$ 0.20

Net cruise revenues decreased \$41 million, or 1.4%, to \$2.8 billion in 2013 from \$2.9 billion in 2012. This was caused by our 1.9% decrease in constant dollar net revenue yields, which accounted for \$55 million, and the currency impact, which accounted for \$19 million, partially offset by a 1.2% capacity increase in ALBDs, which accounted for \$34 million. The 1.9% decrease in net revenue yields on a constant dollar basis was comprised of a 2.7% decrease in net passenger ticket revenue yields, partially offset by a slight increase in net onboard and other revenue yields. The 2.7% decrease in net passenger ticket revenue yields was driven by our EAA brands' 3.8% net yield decrease, which was affected by the challenging economic environment in Europe. Our EAA brands' decline in net passenger ticket revenue yields was driven by our Northern European brands, partially offset by increases at Costa and P&O Cruises (Australia). Our North America brands' net passenger ticket revenue yields decreased 1.8%, which was primarily driven by the promotional discounting at Carnival Cruise Lines. Gross cruise revenues were \$3.5 billion in 2013 and 2012 for largely the same reasons as discussed above.

Net cruise costs excluding fuel increased \$148 million, or 9.3%, to \$1.7 billion in 2013 from \$1.6 billion in 2012. The increase was caused by an 8.8% increase in constant dollar net cruise costs excluding fuel per ALBD, which accounted for \$141 million, and our 1.2% capacity increase in ALBDs, which accounted for \$19 million. The 8.8% increase in constant dollar net cruise costs excluding fuel per ALBD was primarily driven by:

\$33 million - additional costs and expenses related to the 2013 *Carnival Triumph* voyage disruptions;

\$17 million - nonrecurrence in 2013 of Costa's excess insurance proceeds;

\$17 million - nonrecurrence in 2013 of a gain from Cunard's litigation settlement;

\$13 million - higher dry-dock costs and

\$12 million - higher insurance premiums.

Fuel costs decreased \$90 million, or 14.0%, to \$555 million in 2013 from \$645 million in 2012. This was caused by lower fuel prices, which accounted for \$60 million, and lower fuel consumption per ALBD, which accounted for \$37 million.

Edgar Filing: CARNIVAL CORP - Form 10-Q

Gross cruise costs increased \$32 million, or 1.1%, and remained at \$2.9 billion in both 2013 and 2012 for principally the same reasons as discussed above.

Six Months Ended May 31, 2013 (2013) Compared to the Six Months Ended May 31, 2012 (2012)

Revenues

Consolidated

Cruise passenger ticket revenues made up 76% of our 2013 total revenues. Cruise passenger ticket revenues decreased by \$86 million, or 1.6%, and remained at \$5.4 billion in both 2013 and 2012. This decrease was caused by a decrease in cruise ticket pricing, which accounted for \$158 million, and a decrease in air transportation revenues from guests who purchased their tickets from us, which accounted for \$46 million. These decreases were partially offset by our 2.5% capacity increase in ALBDs, which accounted for \$136 million.

Table of Contents

The remaining 24% of 2013 total revenues were substantially all comprised of onboard and other cruise revenues, which increased by \$30 million, or 1.8%, and remained at \$1.7 billion in both 2013 and 2012. This increase was caused by our 2.5% capacity increase in ALBDs, which accounted for \$41 million. Onboard and other revenues included concession revenues of \$506 million in 2013 and \$491 million in 2012.

North America Brands

Cruise passenger ticket revenues made up 74% of our 2013 total revenues. Cruise passenger ticket revenues decreased slightly by \$22 million and remained at \$3.1 billion in both 2013 and 2012. This decrease was caused by a decrease in cruise ticket pricing and a slight decrease in occupancy, which each accounted for \$26 million. These decreases were partially offset by our 1.1% capacity increase in ALBDs, which accounted for \$33 million.

The remaining 26% of 2013 total revenues were comprised of onboard and other cruise revenues, which increased slightly by \$3 million and remained at \$1.1 billion in both 2013 and 2012. This increase was caused by our 1.1% capacity increase in ALBDs, which accounted for \$12 million. Onboard and other revenues included concession revenues of \$331 million in 2013 and \$325 million in 2012.

EAA Brands

Cruise passenger ticket revenues made up 81% of our 2013 total revenues. Cruise passenger ticket revenues decreased by \$64 million, or 2.8%, to \$2.2 billion in 2013 from \$2.3 billion in 2012. This decrease was caused by:

\$137 million - decrease in cruise ticket pricing and

\$50 million - decrease in air transportation revenues from guests who purchased their tickets from us.
These decreases were partially offset by:

\$112 million - 4.8% capacity increase in ALBDs and

\$22 million - slight increase in occupancy.
Our cruise ticket pricing decline was affected by the challenging economic environment in Europe.

The remaining 19% of 2013 total revenues were comprised of onboard and other cruise revenues, which increased by \$20 million, or 4.1%, to \$516 million in 2013 from \$496 million in 2012. This increase was caused by our 4.8% capacity increase in ALBDs, which accounted for \$24 million. Onboard and other revenues included concession revenues of \$175 million in 2013 and \$166 million in 2012.

Costs and Expenses

Consolidated

Operating costs and expenses decreased \$85 million, or 1.6%, to \$5.1 billion in 2013 from \$5.2 billion in 2012. This decrease was caused by:

\$86 million - lower fuel prices;

\$84 million - decreases in commissions, transportation and other related expenses caused by lower cruise ticket pricing and a decrease in air transportation costs related to guests who purchased their tickets from us;

Edgar Filing: CARNIVAL CORP - Form 10-Q

\$67 million - lower fuel consumption per ALBD;

\$34 million - nonrecurrence in 2013 of the 2012 *Costa Allegra* impairment charge and

\$29 million - nonrecurrence in 2013 of the 2012 Ship Incident related expenses.

These decreases were partially offset by:

\$129 million - 2.5% capacity increase in ALBDs;

\$46 million - additional costs and expenses related to the 2013 *Carnival Triumph* voyage disruptions;

\$17 million - nonrecurrence in 2013 of Costa's excess insurance proceeds and

\$17 million - nonrecurrence in 2013 of a gain from Cunard's litigation settlement.

Selling and administrative expenses increased \$56 million, or 6.6%, to \$908 million in 2013 from \$852 million in 2012.

Depreciation and amortization expenses increased \$28 million, or 3.7%, to \$780 million in 2013 from \$752 million in 2012.

In 2012, we recorded the Ibero goodwill and trademark impairment charges of \$173 million.

Table of Contents

Our total costs and expenses as a percentage of revenues decreased to 95.8% in 2013 from 97.6% in 2012.

North America Brands

Operating costs and expenses decreased slightly by \$14 million and remained at \$3.0 billion in both 2013 and 2012. This decrease was caused by:

\$41 million - lower fuel prices;

\$39 million - intersegment transaction related to intersegment insurance reimbursements, which was fully offset in our Cruise Support segment and

\$30 million - lower fuel consumption per ALBD.

These decreases were partially offset by:

\$46 million - additional costs and expenses related to the 2013 *Carnival Triumph* voyage disruptions;

\$32 million - 1.1% capacity increase in ALBDs and

\$18 million - various other operating expenses, net.

Our total costs and expenses as a percentage of revenues increased to 94.1% in 2013 from 92.7% in 2012.

EAA Brands

Operating costs and expenses decreased \$93 million, or 4.4%, to \$2.0 billion in 2013 from \$2.1 billion in 2012. This decrease was caused by:

\$92 million - decreases in commissions, transportation and other related expenses caused by lower cruise ticket pricing and a decrease in air transportation costs related to guests who purchased their tickets from us;

\$45 million - lower fuel prices;

\$36 million - lower fuel consumption per ALBD;

\$34 million - nonrecurrence in 2013 of the 2012 *Costa Allegra* impairment charge and

\$29 million - nonrecurrence in 2013 of the 2012 Ship Incident related expenses.

These decreases were partially offset by:

\$102 million - 4.8% capacity increase in ALBDs;

\$17 million - nonrecurrence in 2013 of Costa's excess insurance proceeds and

\$17 million - nonrecurrence in 2013 of a gain from Cunard's litigation settlement.

In 2012, we recorded the Ibero goodwill and trademark impairment charges of \$173 million.

Our total costs and expenses as a percentage of revenues decreased to 95.6% in 2013 from 102.4% in 2012. Our total costs and expenses as a percentage of revenues, excluding the nonrecurring 2012 Ibero goodwill and trademark impairment charges, decreased to 95.6% in 2013 from 96.2% in 2012.

Operating Income

Our consolidated operating income increased \$126 million to \$297 million in 2013 from \$171 million in 2012. Our North America brands operating income decreased \$59 million to \$249 million in 2013 from \$308 million in 2012, and our EAA brands operating income increased \$189 million to \$122 million in 2013 from an operating loss of \$67 million in 2012. These changes were primarily due to the reasons discussed above.

Nonoperating Expense

Net unrealized losses on fuel derivatives were \$59 million in 2013 compared to \$124 million in 2012. There were no realized gains or losses recognized in 2013 and 2012.

Table of Contents**Key Performance Non-GAAP Financial Indicators**

Consolidated gross and net revenue yields were computed by dividing the gross and net cruise revenues, without rounding, by ALBDs as follows (dollars in millions, except yields):

	Six Months Ended May 31,		
	2013	2013 Constant Dollar	2012
Passenger ticket revenues	\$ 5,353	\$ 5,358	\$ 5,439
Onboard and other revenues	1,683	1,684	1,653
Gross cruise revenues	7,036	7,042	7,092

Table of Contents

Non-GAAP fully diluted earnings per share was computed as follows (in millions, except per share data):

	Six Months Ended May 31,	
	2013	2012
Net income (loss) diluted		
U.S. GAAP net income (loss)	\$ 78	\$ (125)
Ibero goodwill and trademark impairment charges	-	173
Unrealized losses on fuel derivatives, net	59	124
Non-GAAP net income	\$ 137	\$ 172
Weighted-average shares outstanding diluted	777	778
Earnings (loss) per share diluted		
U.S. GAAP earnings (loss) per share	\$ 0.10	\$ (0.16)
Ibero goodwill and trademark impairment charges	-	0.22
Unrealized losses on fuel derivatives, net	0.08	0.16
Non-GAAP earnings per share	\$ 0.18	\$ 0.22

Net cruise revenues increased slightly by \$13 million and remained at \$5.7 billion in both 2013 and 2012. This was caused by our 2.5% capacity increase in ALBDs, which accounted for \$142 million, partially offset by a 2.1% decrease in constant dollar net revenue yields, which accounted for \$122 million. The 2.1% decrease in net revenue yields on a constant dollar basis was comprised of a 3.0% decrease in net passenger ticket revenue yields, partially offset by a slight increase in net onboard and other revenue yields. The 3.0% decrease in net passenger ticket revenue yields was driven by our EAA brands' 4.8% yield decrease, which was affected by the challenging economic environment in Europe. Our North America brands' net passenger ticket revenue yields decreased 1.6%, which was affected by the promotional discounting at Carnival Cruise Lines as well as the indirect consequences of the 2012 Ship Incident. Gross cruise revenues decreased slightly to \$7.0 billion in 2013 from \$7.1 billion in 2012 for largely the same reasons as discussed above.

Net cruise costs excluding fuel increased \$167 million, or 5.0%, to \$3.5 billion in 2013 from \$3.3 billion in 2012. The increase was caused by a 2.6% increase in constant dollar net cruise costs excluding fuel per ALBD, which accounted for \$88 million, and our 2.5% capacity increase in ALBDs, which accounted for \$83 million. The 2.6% increase in constant dollar net cruise costs excluding fuel per ALBD was caused by:

\$46 million - additional costs and expenses related to the 2013 *Carnival Triumph* voyage disruptions;

\$17 million - nonrecurrence in 2013 of Costa's excess insurance proceeds;

\$17 million - nonrecurrence in 2013 of a gain from Cunard's litigation settlement and

\$71 million - various other operating expenses, net.

These increases were partially offset by:

\$34 million - nonrecurrence in 2013 of the 2012 *Costa Allegra* impairment charge and

\$29 million - nonrecurrence in 2013 of the 2012 Ship Incident related expenses.

Fuel costs decreased \$122 million, or 9.9%, to \$1.1 billion in 2013 from \$1.2 billion in 2012. This was caused by lower fuel prices, which accounted for \$86 million and lower fuel consumption per ALBD, which accounted for \$67 million, partially offset by our 2.5% capacity increase in ALBDs, which accounted for \$31 million.

Gross cruise costs decreased slightly by \$24 million and remained at \$6.0 billion in both 2013 and 2012 for principally the same reasons as discussed above.

Liquidity, Financial Condition and Capital Resources

Our primary financial goals are to profitably grow our cruise business, while maintaining a strong balance sheet. Our ability to generate significant operating cash flows allows us to internally fund all of our capital investment program and still have a substantial amount of free cash flow, which we intend to return to shareholders. Other objectives of our capital structure policy are to maintain an acceptable level of liquidity with our available cash and cash equivalents and committed financings for immediate and future liquidity needs, and a reasonable debt maturity profile that is spread out over a number of years.

Table of Contents

Based on our historical results, projections and financial condition, we believe that our future operating cash flows and liquidity will be sufficient to fund all of our expected capital projects including shipbuilding commitments, ship improvements, debt service requirements, working capital needs and other firm commitments over the next several years. However, as we intend to continue to return all of our free cash flow to shareholders, we expect to issue debt in the future to supplement our committed ship financings in order to repay certain of our debt as it matures. We believe that our ability to generate significant operating cash flows and our strong balance sheet as evidenced by our investment grade credit ratings provide us with the ability in most financial credit market environments to obtain such debt financing. However, our future operating cash flows and our ability to issue debt can be adversely impacted by numerous factors outside our control including, but not limited to, those noted under **Cautionary Note Concerning Factors That May Affect Future Results**. In June 2013, Moody's downgraded our senior unsecured credit ratings to Baa1. This downgrade will not have a significant impact on our operating results. However, if our long-term senior unsecured credit ratings were to be further downgraded, our access to, and cost of, debt financing may be negatively impacted.

At May 31, 2013, we had a working capital deficit of \$5.7 billion. This deficit included \$3.6 billion of customer deposits, which represent the passenger revenues we collect in advance of sailing dates and, accordingly, are substantially more like deferred revenue balances rather than actual current cash liabilities. Our May 31, 2013 working capital deficit also included \$2.0 billion of current debt obligations, which are substantially related to our export credit facilities, bank loans and other debt. We continue to generate substantial cash from operations and have a strong balance sheet. This strong balance sheet provides us with the ability to refinance our current debt obligations before, or as they become due in most financial credit market environments. We also have our revolving credit facility available to provide long-term rollover financing should the need arise, or if we choose to do so. After excluding customer deposits and current debt obligations from our May 31, 2013 working capital deficit balance, our non-GAAP adjusted working capital deficit was only \$91 million. Our business model, along with our unsecured revolving credit facilities, allows us to operate with a working capital deficit and still meet our operating, investing and financing needs. We believe we will continue to have working capital deficits for the foreseeable future.

At November 30, 2012, the U.S. dollar was \$1.60 to sterling, \$1.30 to the euro and \$1.05 to the Australian dollar. Had these November 30, 2012 currency exchange rates been used to translate our May 31, 2013 non-U.S. dollar functional currency operations' assets and liabilities instead of the May 31, 2013 U.S. dollar exchange rates of \$1.51 to sterling, \$1.29 to the euro and \$0.96 to the Australian dollar, our total assets and liabilities would have been higher by \$315 million and \$130 million, respectively.

Sources and Uses of Cash

Our business provided \$1.6 billion of net cash from operations during the six months ended May 31, 2013, an increase of \$98 million, or 6.7%, compared to \$1.5 billion for the same period in 2012. This increase was caused by less cash being used for our working capital needs, partially offset by less cash being provided from our operating results.

During the six months ended May 31, 2013, our expenditures for capital projects were \$1.4 billion, of which \$991 million was spent on our ongoing new shipbuilding program, including \$836 million for the final delivery payments for *AIDAstella* and *Royal Princess*. In addition to our new shipbuilding program, we had capital expenditures of \$396 million for ship improvements and replacements and \$60 million for information technology and other assets. Furthermore, during the six months ended May 31, 2013, we sold three of our Seabourn ships and received \$70 million in cash proceeds, which represented substantially all of the sales price.

During the six months ended May 31, 2013, we repaid a net \$41 million of short-term borrowings in connection with our availability of, and needs for, cash at various times throughout the period. In addition, during the six months ended May 31, 2013, we issued \$1.0 billion of unsecured publicly-traded notes, of which \$500 million was used to repay a like amount of unsecured floating rate export credit facilities, and also borrowed \$837 million of new long-term debt under two unsecured floating rate export credit facilities. Furthermore, during the six months ended May 31, 2013 we repaid \$330 million of long-term debt. Finally, during the six months ended May 31, 2013 we paid cash dividends of \$777 million and purchased \$103 million of shares of Carnival Corporation common stock in open market transactions, net of \$35 million of treasury stock sales under our Stock Swap program.

Future Commitments and Funding Sources

Our contractual cash obligations as of May 31, 2013 have changed compared to November 30, 2012 primarily as a result of our debt borrowings and repayments and ship progress payments as noted above under **Sources and Uses of Cash**.

Due to the 2013 voyage disruptions, we previously announced a corporate-wide operational review of all our ships, which will include lessons learned from the recent incidents to significantly enhance the level of onboard operating redundancies and our fire prevention, detection and suppression systems that can be applied across our fleet. Based on the results of the ongoing review, the latest versions of these technologies and enhancements will be implemented on our fleet where they are not already present. The overall program of enhancements across the fleet is

expected to cost between \$600 and \$700 million over the next several years.

Table of Contents

The year-over-year percentage increase in our capacity for the third and fourth quarters of 2013 are expected to be 3.6% and 3.3%, respectively. The year-over-year percentage increase in our annual capacity for 2013, 2014, 2015 and 2016 is currently expected to be 3.0%, 2.0%, 4.7% and 3.8%, respectively. These percentage increases result primarily from contracted new ships entering service and include *Seabourn Pride*, *Seabourn Spirit* and *Seabourn Legend* leaving the fleet in April 2014, April 2015 and May 2015, respectively, and exclude any unannounced future ship orders, acquisitions, retirements, charters or sales.

At May 31, 2013, we had liquidity of \$6.3 billion. Our liquidity consisted of \$434 million of cash and cash equivalents, which excludes \$277 million of cash used for current operations, \$2.5 billion available for borrowing under our revolving credit facilities and \$3.4 billion under committed ship financings. Of this \$3.4 billion of committed ship financings, \$1.0 billion, \$1.0 billion and \$1.4 billion are scheduled to be funded in 2014, 2015 and 2016, respectively. Substantially all of our revolving credit facilities are scheduled to mature in 2016. These commitments are from numerous large and well-established banks and export credit agencies, which we believe will honor their contractual agreements with us.

Substantially all of our debt agreements contain financial covenants as described in Note 5 Debt in the annual consolidated financial statements, which is included within our 2012 Form 10-K. At May 31, 2013, we believe we were in compliance with our debt covenants. In addition, based on, among other things, our forecasted operating results, financial condition and cash flows, we expect to be in compliance with our debt covenants for the foreseeable future. Generally, if an event of default under any debt agreement occurs, then pursuant to cross default acceleration clauses, substantially all of our outstanding debt and derivative contract payables could become due, and all debt and derivative contracts could be terminated.

Off-Balance Sheet Arrangements

We are not a party to any off-balance sheet arrangements, including guarantee contracts, retained or contingent interests, certain derivative instruments and variable interest entities that either have, or are reasonably likely to have, a current or future material effect on our consolidated financial statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

At May 31, 2013, 61% and 39% (58% and 42% at November 30, 2012) of our debt was U.S. dollar and euro-denominated, respectively, including the effect of foreign currency swaps.

During the six months ended May 31, 2013, we entered into zero cost collar fuel derivatives for 15.1 million barrels of Brent to cover a portion of our estimated fuel consumption for 2014 through 2017. See Note 4 - Fair Value Measurements, Derivative Instruments and Hedging Activities in the accompanying consolidated financial statements for additional discussion of these fuel derivatives. At May 31, 2013, the estimated fair value of our outstanding fuel derivative contracts was a liability of \$51 million.

During the six months ended May 31, 2013, we entered into interest rate swaps designated as fair value hedges whereby we receive fixed interest rate payments in exchange for making floating interest rate payments. At May 31, 2013, these fair value hedges effectively changed \$500 million of fixed rate debt to U.S. dollar LIBOR-based floating rate debt.

For a further discussion of our hedging strategies and market risks, see Note 4 Fair Value Measurements, Derivative Instruments and Hedging Activities in the accompanying consolidated financial statements, and Management's Discussion and Analysis of Financial Condition and Results of Operations within our 2012 Form 10-K.

Item 4. Controls and Procedures.

A. Evaluation of Disclosure Controls and Procedures

Disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit, is recorded, processed, summarized and reported, within the time periods specified in the U.S. Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in our reports that we file or submit under the Securities Exchange Act of 1934 is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as

appropriate to allow timely decisions regarding required disclosure.

Our Chief Executive Officer, Chief Operating Officer and Chief Financial Officer have evaluated our disclosure controls and procedures and have concluded, as of May 31, 2013, that they are effective as described above.

B. Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting during the quarter ended May 31, 2013 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION****Item 1. Legal Proceedings.**

On June 25, 2012, an action was filed in the United States District Court for the Central District of California naming as defendants Carnival Corporation, Costa Crociere S.p.A., Micky Arison, Howard Frank, Arnold Donald, Joseph Farcus, and Joseph Farcus, Architect, P.A. (Sandoval v. Carnival Corporation). The defendants have been served with the action, although the plaintiffs voluntarily dismissed claims against Costa Crociere S.p.A. The action was filed by two plaintiffs in connection with the 2012 Ship Incident. The plaintiffs allege claims for design defect, negligent training and operations, and gross negligence. On March 21, 2013, the defendants filed a motion to dismiss the plaintiffs' claims to Italy based on the *forum non conveniens* doctrine. The defendants also filed a motion for summary judgment on May 23, 2013. Both motions are pending at this time.

On July 5, 2012, two actions were filed in the Circuit Court serving Miami-Dade County, Florida naming as defendants Carnival Corporation, Carnival Corporation & plc, Costa Cruise Lines, Inc., Costa Crociere S.p.A. and Joseph Farcus Architect, P.A. (Scimone v. Carnival Corp. and Abeid-Saba v. Carnival Corp.). The defendants have been served with the action. The plaintiffs filed the actions in connection with the 2012 Ship Incident. The plaintiffs allege claims for negligence, product liability, professional negligence and intentional tort. The complaints seek economic and compensatory damages, attorneys' fees, costs and interest. The plaintiffs state they will amend their complaints to state a claim for punitive damages. The defendants removed the cases to the United States District Court for the Southern District of Florida and moved to dismiss the plaintiffs' claims to Italy based on the *forum non conveniens* doctrine and the forum selection clauses in certain of the plaintiffs' Passage Ticket Contracts. The plaintiffs filed motions to remand the cases back to state court. On February 15, 2013, the federal court granted the motions to remand. On February 25, 2013, the defendants filed petitions for leave to appeal the remand orders with the U.S. Court of Appeals for the Eleventh Circuit, which were granted and the appeals are in the process of being briefed. During the pendency of the appeals, the cases will proceed in the state court. The defendants filed dispositive motions on March 12, 2013 in the state courts that were recently argued and are pending decision from the state courts.

On January 14, 2013, an action was filed in the United States District Court for the Southern District of Florida naming as defendants Carnival Corporation, Carnival plc, Costa Crociere S.p.A. and John Does 1-10 (King v. Carnival Corp.). The defendants accepted service on April 30, 2013 and their appearances are due no later than July 29, 2013. The action was filed by two plaintiffs in connection with the 2012 Ship Incident. The plaintiffs allege claims for violation of the Athens Convention Relating to the Carriage of Passengers and their Luggage by Sea, breach of contract, negligence, unjust enrichment, punitive damages, negligent infliction of emotional distress, negligent supervision and gross negligence.

On January 24, 2013, Costa was notified by the Chief Prosecutor of Grosseto, Italy of his intention to seek to charge Costa pursuant to Section 25 of Legislative Decree No. 231/2001 (Law 231) for acts committed by its employees in connection with the 2012 Ship Incident. On April 10, 2013, Costa entered into a plea arrangement with the Chief Prosecutor to resolve this matter.

Item 1A. Risk Factors.

The risk factors that affect our business and financial results are discussed in Item 1A. Risk Factors, included in the 2012 Form 10-K, and there has been no material change to these risk factors since the 2012 Form 10-K filing. We wish to caution the reader that the risk factors discussed in Item 1A. Risk Factors, included in the 2012 Form 10-K, and those described elsewhere in this report or other Securities and Exchange Commission filings, could cause future results to differ materially from those stated in any forward-looking statements. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition or future results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.**A. Repurchase Authorizations**

In September 2007, the Boards of Directors authorized, subject to certain restrictions, the repurchase of up to an aggregate of \$1 billion of Carnival Corporation common stock and/or Carnival plc ordinary shares under the Repurchase Program. In January 2013, the Boards of Directors increased the remaining \$165 million under the Repurchase Program back to \$1 billion. The Repurchase Program does not have an expiration date and may be discontinued by our Boards of Directors at any time.

Table of Contents

During the three months ended May 31, 2013, purchases of Carnival Corporation common stock pursuant to the Repurchase Program were as follows:

Period	Total Number of shares of Carnival Corporation Common Stock Purchased (a)	Average Price Paid per Share of Carnival Corporation Common Stock	Maximum Dollar Value of Shares That May Yet Be Purchased Under the Repurchase Program (b) (in millions)
March 1, 2013 through March 31, 2013	475,000	\$ 34.69	\$ 983
April 1, 2013 through April 30, 2013	234,899	\$ 33.87	\$ 975
May 1, 2013 through May 31, 2013	-	-	\$ 975
Total	709,899	\$ 34.42	

- (a) No shares of Carnival Corporation common stock were purchased outside of publicly announced plans or programs.
- (b) During the three months ended May 31, 2013, there were no repurchases of Carnival plc ordinary shares under the Repurchase Program. From June 1, 2013 through June 24, 2013, no shares of Carnival Corporation common stock or Carnival plc ordinary shares were repurchased under the Repurchase Program. In addition to the Repurchase Program, the Boards of Directors have authorized the repurchase of up to 19.2 million Carnival plc ordinary shares and up to 32.8 million shares of Carnival Corporation common stock under the Stock Swap programs described below. At June 24, 2013, the remaining availability, under the Stock Swap programs was 18.1 million Carnival plc ordinary shares and 31.1 million shares of Carnival Corporation common stock.

Carnival plc ordinary share repurchases under both the Repurchase Program and the Stock Swap programs require annual shareholder approval. The existing shareholder approval is limited to repurchasing a maximum of 21.5 million ordinary shares and is valid until the earlier of the conclusion of the Carnival plc 2014 annual general meeting, or October 16, 2014. Depending on market conditions and other factors, we may purchase shares of Carnival Corporation common stock and Carnival plc ordinary shares under the Repurchase Program and the Stock Swap programs concurrently.

B. Stock Swap Programs

We use the Stock Swap programs in situations where we can obtain an economic benefit because either Carnival Corporation common stock or Carnival plc ordinary shares are trading at a price that is at a premium or discount to the price of Carnival plc ordinary shares or Carnival Corporation common stock, as the case may be. This economic benefit is used for general corporate purposes, which could include repurchasing additional stock under the Repurchase Program.

In the event Carnival Corporation common stock trades at a premium to Carnival plc ordinary shares, we may elect to issue and sell shares of Carnival Corporation common stock through a sales agent, from time to time at prevailing market prices in ordinary brokers' transactions, and use the sale proceeds to repurchase Carnival plc ordinary shares in the UK market on at least an equivalent basis. Based on an authorization provided by the Board of Directors in October 2008, Carnival Corporation was authorized to issue and sell up to 19.2 million shares of its common stock in the U.S. market and has 18.1 million shares remaining at June 24, 2013. Any sales of Carnival Corporation shares have been or will be registered under the Securities Act.

In the event Carnival Corporation common stock trades at a discount to Carnival plc ordinary shares, we may elect to sell existing Carnival plc ordinary shares, with such sales made by Carnival Corporation or Carnival Investments Limited through a sales agent, from time to time at prevailing market prices in ordinary brokers' transactions, and use the sale proceeds to repurchase shares of Carnival Corporation common stock in the U.S. market on at least an equivalent basis. Based on an authorization provided by the Board of Directors in January 2013, Carnival Corporation or Carnival Investments Limited was authorized to sell up to 32.8 million Carnival plc ordinary shares in the UK market and has 31.1 million shares remaining at June 24, 2013. Any sales of Carnival plc ordinary shares have been or will be registered under the Securities Act.

Edgar Filing: CARNIVAL CORP - Form 10-Q

During the three months ended February 28, 2013, Carnival Investments Limited sold 865 thousand of Carnival plc ordinary shares through its sales agent, Goldman Sachs International (Goldman), for gross proceeds of \$35 million and paid commission fees to Goldman of \$246 thousand and other governmental and regulatory transaction fees resulting in total net proceeds of \$35 million. Substantially all of the net proceeds from these sales were used to purchase 865 thousand shares of Carnival Corporation common stock. During the three months ended February 28, 2013, no Carnival Corporation common stock was sold and no Carnival plc ordinary shares were repurchased under the Stock Swap program.

During the three months ended May 31, 2013, no Carnival Corporation common stock or Carnival plc ordinary shares were sold or repurchased under the Stock Swap programs.
