Sadia S.A.
Concórdia - SC

1. We have examined the balance sheets of Sadia S.A. and the consolidated balance sheets of the Company and its subsidiaries as of December 31, 2006 and 2005, and the related statements of income, changes in shareholders' equity and changes in financial position for the years then ended, which are the responsibility of its management. Our responsibility is to express an opinion on these financial statements.

2. Our examination were conducted in accordance with auditing standards generally accepted in Brazil and included: (a) planning of the audit work, considering the materiality of the balances, the volume of transactions and the accounting systems and internal accounting controls of the Company and its subsidiaries; (b) verification, on a test basis, of the evidence and records which support the amounts and accounting information disclosed; and (c) evaluation of the most significant accounting policies and estimates adopted by Company management and its subsidiaries, as well as the presentation of the financial statements taken as a whole.

3. In our opinion, the aforementioned financial statements present fairly, in all material respects, the financial position of Sadia S.A. and the consolidated financial position of the Company and its subsidiaries as of December 31, 2006 and 2005, and the results of its operations, changes in its shareholders' equity and changes in its financial position for the year then ended, in conformity with accounting practices adopted in Brazil.

Independent auditors' report

To
The Board of Directors and Shareholders
Sadia S.A.
Concórdia - SC

4. Our examinations were performed with the objective of expressing an opinion on the financial statements taken as a whole. The statements of cash flows and added value as of December 31, 2006 and 2005, are supplementary to the aforementioned financial statements, which are not required under accounting practices adopted in Brazil and have been included to facilitate additional analysis. This supplementary information was subject to the same audit procedures as applied to the aforementioned financial statements and, in our opinion, is presented fairly, in all material respects, in relation to the financial statements taken as a whole.

1 Operations

The Company's main business activities are organized into four operational segments: processed products, poultry (chickens and turkeys), pork and and beef. The beef segment was included as from the beginning of this fiscal year as the Company decided to resume to this activity for export. The large production chain permits its products to be commercialized in Brazil and abroad by retailers, small groceries and food service chains.

The Company distributes its products through a large number of sales points in the local market and exports to countries in Europe, the Middle East, Eurasia, Asia and the Americas. The Company has 13 industrial units and 16 distribution centers located in 14 Brazilian states.

The industrially processed products segment has been the principal focus of the Company's investments in recent years and comprises products such as oven-ready frozen food, refrigerated pizzas and pasta, margarine, industrially processed poultry and pork by-products, crumbed products, a diet line and pre-sliced ready-packed products and desserts.

The Company has a corporate governance tier one listing for its shares on the São Paulo Stock Exchange, the Madrid Stock Exchange (Latibex) and ADRs negotiated on the New York Stock Exchange (NYSE).

2 Preparation and presentation of the financial statements

The individual and consolidated financial statements were prepared in accordance with accounting practices derived from the Brazilian Corporation Law and the rules of the Brazilian Securities and Exchange Commission (CVM), including the compliance with CVM Deliberations 488/05 and 489/05.

With the objective of presenting the information provided to the market better, the Company is presenting supplementary consolidated information, obtained from accounting records of the parent company and its subsidiaries, as follow:

Sadia S.A.

Publicly-held Company

Notes to the financial statements

(In thousands of Reais)

a. Segment reporting

A segment is a group of asset and liabilities set by the Company to manage its businesses and similar in aspects such as productive process or nature of the products or services (business segment) in a particular economic environment (geographic segment).

b. Statement of cash flows

The cash flows were prepared in accordance with NPC 20 - Statement of Cash Flows, issued by IBRACON (Brazilian Institute of Independent Auditors).

c. Statement of added value

The value added statement has been presented in accordance with the model proposed by the foundation Instituto de Pesquisa Contábeis, Atuariais e Financeiras - University of Sao Paulo the aim of which is to show the value of the wealth generated by the Company and its distribution among the elements that contributed to its generation.

3 Description of significant accounting policies

a. Statement of income

Income and expenses are recognized on the accrual basis. Revenue from the Company's sales is recognized upon shipment of the products and when the following conditions are met:

i) the ownership is transferred and therefore risk of loss has passed to the client; ii) collection is probable; iii) there is evidence of an arrangement; and iv) the sales price is fixed or determinable.

b. Foreign currency

Monetary assets and liabilities denominated in foreign currencies were translated into reais at the foreign exchange rate ruling at the balance sheet date and the foreign exchange differences arising on translation are recognized in the statement of income for the year.

c. Accounting estimates

The preparation of the financial statements in accordance with accounting practices adopted in Brazil requires that management uses its judgment in determining and recording accounting estimates. Significant assets and liabilities subject to these estimates and assumptions include the residual value of property, plant and equipment, deferred charges, allowance for doubtful accounts, inventories, deferred tax assets and liabilities, provision for contingencies, valuation of derivative instruments, and assets and liabilities related to employees' benefits. The settlement of transactions involving these estimates may result in different amounts due to the lack of precision inherent to the process of their determination. The Company reviews the estimates and assumptions periodically.

d. Long and short-term investments

Investment funds in local and foreign currency are recorded at market value according to the respective shares price at the date of the financial statements.

Other long and short-term investments in local and foreign currency are recorded at cost plus income accrued up to the balance sheet date, not exceeding market value.

Additionally, the portion receivable from currency swap contracts is recorded at the difference between the nominal amounts of these contracts and the amounts restated by the variation of the foreign currency, plus interest earned up to the balance sheet date.

Sadia S.A.

Publicly-held Company

Notes to the financial statements

(In thousands of Reais)

e. Trade accounts receivable

Trade accounts receivable are recorded at the amount invoiced and interest is not levied. The allowance for doubtful accounts is the best estimate the Company has and is considered sufficient by management to cover any losses arising on collection of accounts receivable. Accounts receivable are written off against the allowance for doubtful accounts after all means of collection have been exhausted and the possibility of recovery of the amounts receivable is considered remote.

f. Inventories

Finished goods, livestock (excluding breeders), work-in-progress, raw materials and supplies and others are valued at the lower of cost of acquisition or production (average method), or replacement or realization. The cost of finished goods and work-in-progress includes raw materials acquired, labor, production expenses, transport and storage relating to the purchase and production of inventories. Normal production losses are inventoried and abnormal losses are expensed immediately as cost of goods sold.

g. Investments

Investments in subsidiaries in Brazil and abroad are valued using the equity method based on the respective net equity calculated on the same date, as disclosed in Note 10.

The financial statements of foreign subsidiaries are translated into Brazilian Reais, based on the following criteria:

- Balance sheet accounts at the exchange rate at the end of the year.
- Statement of income accounts at the exchange rate at the end of each month.

Other investments are valued at cost less a provision for devaluation, when applicable.

h. Property, plant and equipment

Property, plant and equipment are recorded at cost of acquisition, formation or construction, including the interest incurred on financing, during the period of construction, modernization and expansion of the industrial units. Expenditures that materially extend the useful lives of existing facilities and equipment are capitalized. Depreciation is calculated using the straight-line method at rates that take into account the estimated useful life of the assets, adjusted in keeping with the work shifts, as disclosed in Note 11. Depletion of forestry resources is calculated based on the extraction of timber and the average costs of the forests.

Breeding stock is recorded at the cost of formation which includes the appropriation of costs of the breeding hens, animal feed, medication and labor. These costs are accumulated for approximately six months until the breeding stock initiates the breeding cycle. From then on, the costs of the breeding stock begin to be amortized by the estimated number of offsprings. The productive cycle ranges from fifteen to thirty months.

i. Impairment of long lived assets

The Company reviews its property, plant and equipment to verify possible impairment losses, whenever events or changes in circumstances indicate that the carrying amount of an asset or group of assets may not be recoverable based on future cash flows. If these events occur, the reviews will be conducted at the lowest level of groups of assets for which the Company manages to attribute future cash flows. If the carrying amount of an asset is higher than the future cash flows, an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the asset. Until now, these reviews have not indicated the need to recognize impairment losses.

j. Deferred charges

Deferred charges are represented substantially by pre-operating costs incurred in the implementation of software, reorganization charges and development of new products, which are amortized on a straight-line basis over 5 years as from the beginning of operation.

Sadia S.A.

Publicly-held Company

Notes to the financial statements

(In thousands of Reais)

k. Current and noncurrent liabilities

Current and noncurrent liabilities are stated at known or estimated amounts, plus related charges and monetary and exchange variations up to the balance sheet date.

l. Provisions

A provision is recognized in the balance sheet when the Company has a legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation.

m. Income and social contribution taxes

The income and social contribution taxes, both current and deferred, are calculated monthly based on taxable income at the rates of 15% plus a surcharge of 10% for income tax and 9% for social contribution and consider the offsetting of tax losses and negative basis of social contribution, limited to 30% of taxable income.

The deferred tax assets were recorded in accordance with CVM Instruction 371/02 and are represented significantly by temporary differences arising from non-deductible provisions, including tax loss carryforward and negative basis of social contribution.

n. Employees' benefits

Employees' benefits are recorded based on actuarial studies prepared annually at the end of the year in compliance with CVM Deliberation 371/00.

o. Environmental questions

Our production facilities and our forestry activities are subject to government environmental regulations. We have reduced the risks associated with environmental questions through operational controls and procedures, as well as investments in equipment and systems for pollution control. We believe that no provision for losses related to environmental questions is currently necessary, based on existing Brazilian laws and regulations.

4 Consolidated financial information

The transactions and balances between the Parent company and its subsidiaries included in the consolidation process have been eliminated and the non-realized profit arising from the sales to the subsidiaries were excluded and incorporated to the inventory balances for each year. Minority interests were excluded from shareholders' equity and net income and are presented separately in the consolidated balance sheets and income statements.

In the case of joint ventures, the assets, liabilities and shareholders' equity and the result for the year were consolidated in proportion to the percentage of ownership.

In accordance with the CVM Instruction 408/04, the Company consolidated the financial statements of its investment funds Concórdia Foreign Investment Fund Class A and Taurus Fund Limited, where it is the wholly investment holder. These investment funds have the sole purpose of centralizing the foreign investment fund portfolio, delegating to a third party the administrative functions and maximizing shareholder returns. As of December 31, 2006 and 2005, these investment funds were consolidated in the Company's financial statements as they had loans collateralized by its own financial assets.

The consolidated financial statements include the accounts of Sadia S.A. and its direct and indirect subsidiaries, including investments in joint ventures. The consolidated direct or indirect subsidiaries and the corresponding shareholdings of the Company are as follows:

The Company and its subsidiaries abroad (Sadia International Ltd. and Wellax Food Logistics C.P.A.S.U. Lda.) entered into an agreement for sale of its receivables with an outside financial institution up to the maximum amount of US\$170 million, with interest rate of 0.375% p.a. + LIBOR.

As of December 31, 2006, the amount of receivables sold under this agreement amounted to approximately R\$ 170 million (R\$ 100 million as of December 31, 2005). During the year ended December 31, 2006, the Company received cash proceeds of approximately R\$ 1,910 million (R\$ 1,840 million for the year ended December 31, 2006) and incurred expenses of R\$ 14 million (R\$ 8 million in 2005) with respect to this agreement.

A credit insurance policy covering 90% of the value of the receivables was taken out with third parties and the beneficiaries in the event of default are the contracting financial institutions.

The Company also assigned receivables to a Credit Assignment Investment Fund (FIDC), administered by Concórdia S.A. Corretora de Valores Móbiliários, Cambio e Commodities. As of December 31, 2006, the net equity of this fund was R\$ 264,949 (R\$ 231,197 at December 31, 2005), of which R\$ 254,861 (R\$ 190,350 at December 31, 2005) was represented by acquisitions of the Company's receivables on the domestic market, with a discounted cost equivalent to 95% of the CDI per senior quota. The assignment of the receivables is made without right of recourse, and the eventual losses from default for Sadia are limited to the value of the subordinated quotas, which at December 31, 2006, represented R\$ 53,992 (R\$ 17,150 at December 31, 2005).

Sadia S.A.**Publicly-held Company**

a. The construction in progress is mainly represented by projects related to the expansion and modernization of industrial units, mainly Uberlandia and Lucas do Rio Verde units.

b. In accordance with CVM Deliberation 193/96 the interest incurred in the period arising from financing of projects for modernization and expansion of the industrial units has been recorded in the respective costs of the construction in progress in the amount of R\$ 44,554 (R\$ 16,852 at December 31, 2005).

c. On November 16, 2006 a claim occurred, as a result of fire that destroyed completely the building where the factory of roasted products of the Toledo unit was located. The amount of the assets damaged was estimated in R\$ 120,000, which are totally covered by insurance policy, with an amount sufficient to comprehensively cover the material damage suffered. The inventory of assets is in course and, due to this event, a provision reducing fixed assets was recorded, in comparison to the amounts receivable from insurance in other credits in current assets. The amount of the franchise, of R\$ 100, was provided for.

18 Stock option plan

The Company has a granting plan of option of purchase of shares, which contemplates nominative preferred shares of issue of the Company, available in treasury, the objective of which is a long-term view, motivating the feeling of property and commitment of the Company's players, in line with the shareholders' interests.

The plan is managed by a Management Committee, composed of the Chief Executive Officer and the Human Resources Committee of the Board of Directors.

The price for exercising the purchase options does not include any discount and will be based on the average value of the quotation for the share in the last three days of trading on the São Paulo Stock Exchange prior to the grant date, updated by the accumulated National Consumer Price Index (INPC) between the grant date of exercising the option. The vesting period, during which the participant cannot exercise his/her right to purchase the shares, will be three years as from the option granting date. The participant will be able to fully or partially exercise his/her purchase rights after the vesting period within a maximum period of 2 years, and only after this period has expired will he/she lose the right to the options not exercised.

The composition of the options granted is presented as follows:

Cycle	Date			Quantity of Shares	Price of Shares	
	Grant	Start	Final		Grant date	Update - INPC
2005	6/24/05	6/24/08	6/24/10	2.200.000	4.55	4.76

Since the Company has treasury shares earmarked for the stock option plan, the difference between the market value and the updated price for the year will not affect the Company's results.

19 Employees' profit sharing

The Company grants its employees a profit sharing plan, which depends on attaining specific targets, established and agreed to at the beginning of each year. This plan has been approved by Board of Directors of the Company and it has been registered by a formal agreement with the unions.

20 Other operating income

On October 26, the Company obtained recognition of the final, favorable, unappealable decision on the COFINS proceedings referring to the unconstitutionality of Law 9718/98, which changed the basis for the calculation of PIS and COFINS by including operating and financial income. This matter was judged and considered unconstitutional by the Superior court of Justice on November 9, 2005. The Company has been collecting the tax in accordance with legislation and, based on the transit in rem judicatam of this proceeding, recognized the tax credit in the amount of R\$ 80,168, which, net of attorneys' fees, represented a gain of R\$ 75,654.

The deferred tax assets related to the income tax loss carryforwards and negative basis of social contribution in the amount of R\$ 37,834, represented by R\$ 29,160 of the Parent and R\$ 8,674 from a foreign subsidiary will be realized base on future taxable income on such companies. Management estimates that the deferred tax asset related to the Parent will be fully realized during this year and the deferred tax asset related to the foreign subsidiary will be realized within three years.

23 Risk management and financial instruments

The Company's operations are exposed to market risks, especially in relation to exchange rate variations, credit risk and grain purchase prices. These risks are monitored by the Risk Management Area which uses a specific system to calculate the "VAR -Value at Risk", and they are permanently monitored by the finance committee, composed of members of the Board of Directors and other finance executives of the Company, who are responsible for defining the Board's risk management strategy by determining the position and exposure limits. At December 31, 2006 the Value at Risk (VAR) of the financial assets and liabilities, for one year, with a 95% confidence rating, represents R\$ 96,735 (non-audited information), representing 3.93% of shareholder equity (not audited by auditors).

a. Exchange rate risk

The exchange rate risk for loans, financing and any other payables denominated in foreign currency is hedged by short-term investments denominated in foreign currency, with same interest rates, and by derivative financial instruments, such as rate swaps (dollar to CDI), interest rate swap contracts (Libor to pre-fixed or vice-versa) and future market agreements, in addition to foreign receivables from exports, which also reduce exchange variations by serving as a "natural hedge".

The Company, within its hedge strategy, uses currency futures contracts (US dollars, Euros and Pounds), as a form of mitigating exchange rate risk over operating and financial assets and liabilities. The nominal amounts of these contracts are not recorded in the financial statements.

Sadia S.A.

Publicly-held Company

Notes to the financial statements

(In thousands of Reais)

The realized income of future contracts, for the year ended December 31, 2006, generated a gain of R\$ 150,645 (R\$ 152,222 for 2005), and the amount of R\$ 150,077 for 2006 was accounted for as financial income in “Monetary Variations Asset”, and the amount of R\$ 568 as operating income in “Gross operating revenue”.

The results of the operations in the currency futures market, realized and not financially settled and the daily adjustments of currency futures contracts on the Future and Commodities Exchange - BM&F are recorded in the financial statements as “Amounts receivable from futures contracts” and “Amounts payable for futures contracts”.

The unrealized income of counter operations entered into with future maturity dates are not recognized in the financial statements. These contracts, as from December 2006, are segregated and defined as operating or financial, in accordance with the item to be protected. The amount of these contracts, if recorded as of December 31, 2006, would result in an income of R\$ 26,279 in the financial income and of R\$ 15,018 in the operating income.

b. Credit risk

The Company is potentially exposed to credit risk in relation to its trade accounts receivable, long and short-term investments and derivative instruments. The Company limits the risk associated with these financial instruments by subjecting them to the control of highly rated financial institutions that operate within the limits pre-established by the credit and financing committees.

The concentration of credit risk with respect to accounts receivable is minimized due to the spread of its client base, since the Company does not have any customer or group representing 10% or more of its consolidated revenues, as well as granting credits for customers with solid financial and operational ratios. Generally, the Company does not require a guarantee for sales, however it has contracted an insurance credit policy to its domestic receivables.

c. Grain purchase price risks

The Company's operations are exposed to the volatility in prices of grain (corn and soybean) used in the preparation of animal feed for its breeding stock, where the price variation results from factors beyond the control of management, such as climate, the size of the harvest, transport and storage costs and government agricultural policies, among others. The Company does not enter into futures or options contracts to hedge against fluctuations in the prices of the commodities, however it maintains a risk management strategy, based on physical control, which includes purchase of grain at fixed and fixable prices. The Company has a Grains Committee, composed of the chief executive officer and financial and operational executives. Its aim is to permanently monitor changes in scenarios, establishing limits of authority for purchase or sale.

d. Estimated market values

The Company used the following methods and assumptions to estimate the disclosure of the fair value of its financial instruments as of December 31, 2006 and 2005:

Sadia S.A.

Publicly-held Company

Notes to the financial statements

(In thousands of Reais)

• **Cash and cash equivalents** - The book values of cash and banks recorded in the balance sheet are similar to the respective fair values.

• **Short-term financial investments** - The fair value of short-term financial investments is estimated based on the market quotations of comparable contracts.

• **Accounts receivable and payable** - The book values of accounts receivable and payable recorded in the balance sheet are similar to their respective fair values.

• **Short and long-term loans and financing** - The market values of loans and financing were calculated based on their present value calculated through the future cash flows and using interest rates applicable to instruments of similar nature, terms and risks, or based on the market quotation of these securities. The market values of BNDES financing are similar to the book values, since there are no similar instruments with comparable maturities and interest rates.

• **Exchange and interest rate swap contracts** - The fair values of exchange and interest rate swap contracts were estimated based on market quotations for comparable contracts. As of December 31, 2006 the contracted amounts in force totaled R\$ 1,554,843

(R\$ 2,381,603 in December 31, 2005) and the valuation of these contracts to fair value would result in losses of R\$ 67,041 (loss of R\$ 31,227 in December 31, 2005). The effective cash settlements of the contracts occur on the respective maturities of each agreement. The Company does not intend to settle these contracts before their maturity.

The market values were estimated on the balance sheet date, based on “relevant market information”. Changes in the assumptions may significantly affect these estimates.

The book values and the estimated fair values of the Company’s financial instruments as of December 31, 2004 and 2005 are presented in the table below. The fair value of a financial instrument is the amount for which the instrument could be traded between interested parties under current market conditions.

24 Insurance

The Company and its subsidiaries adopt insurance engagement policy at levels that Management considers adequate to cover risks resulting from the claims of its assets. Due to the characteristics of multilocated operations, Management engages its policies with a limit of maximum loss possible in the same event, with amounts calculated based on risk inspections and potential losses. The policies engaged guarantee coverage against fire, general civil liability, windstorms, disorders and electric damage, as well as insurance for merchandise transport, personal and vehicle damage. The amount currently insured guarantees the comprehensive coverage of the Company's fixed assets.

The assumptions adopted, given their nature, are not part of the scope of an audit of financial statements and, accordingly, they were not examined by our independent auditors.

25 Private pension plan

a. Defined benefit plan

The Company and its subsidiary Concórdia S.A. C.V.M.C.C. are the sponsors of a defined contribution pension plan for employees, managed by Fundação Attílio Francisco Xavier Fontana.

The supplementary pension benefit is defined as the difference between (i) the benefit wage (updated average of the last 12 participation salaries, limited to 80% of the last participation salary) and (ii) the amount of the pension paid by the National Institute of Social Security. The supplementary benefit is updated on the same base date and in accordance with the rates applicable to the main activity category of the Company, discounting real gains.

The actuarial system is that of capitalization for supplementary retirement and pension benefits and of simple apportionment for supplementary disability compensation. The Company's contribution is based on a fixed percentage of the payroll of active participants, as annually recommended by independent actuaries and approved by the trustees of Fundação Attílio Francisco Xavier Fontana.

According to the Foundation's statutes, the sponsoring companies are jointly liable for the obligations undertaken by the Foundation on behalf of its participants and dependents. On December 31, 2006 the defined benefit plan presented a surplus of R\$ 210,904 (R\$ 176,605 as of December 31, 2005).

At December 31, 2006 the Foundation had a total of 20,484 participants (21,697 on December 31, 2005), of which 16,795 were active participants (18,156 on December 31, 2005).

The contributions of the parent company, on December 31, 2006 and 2005, amounted to R\$ 2,004 and R\$ 2,044, and R\$ 2,073 and R\$ 2,097 in the consolidated, respectively.

b. Defined contribution plan

As from January 1, 2003, the Company began to adopt new supplementary pension plans under the defined contribution modality for all employees hired by Sadia and its subsidiaries. Under the terms of the regulations, plans are funded on an equitable basis so that the portion paid by the Company is equal to the payment made by the employee in accordance with a contribution scale based on salary bands that vary between 1.5% and 6% of the employee's remuneration, observing a contribution limit that is updated annually. The contributions made by the Company at December 31, 2006 and 2005 totaled R\$ 2,807 and R\$ 2,276 respectively. As of December 31, 2005 this plan had 11,924 participants (11,563 in December 31, 2005).
