**PART I**

Certain matters discussed in this Annual Report contain or incorporate statements that we believe are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the Exchange Act), and Rule 175 promulgated thereunder, and Section 21E of the Securities Exchange Act of 1934, as amended, and Rule 3b-6 promulgated thereunder. These statements relate to our financial condition, results of operations, plans, objectives, future performance or business. They usually can be identified by the use of forward-looking language, such as will likely result, may, are expected to, is anticipated, estimate, forecast, projected, intends to, or may include other similar phrases, such as believes, plans, trend, objective, continue, remain, or similar expressions, or future or conditional verbs, such as will, should, could, might, can, or similar verbs. You should not place undue reliance on these statements, as they are subject to risks and uncertainties, including, but not limited to, those described in the documents incorporated by reference. When considering these forward-looking statements, you should keep in mind these risks and uncertainties, as well as any cautionary statements we may make. Moreover, you should treat these statements as speaking only as of the date they are made and based only on information then actually known to us.

There are a number of important factors that could cause future results to differ materially from historical performance and these forward-looking statements. Factors that might cause such a difference include, but are not limited to:

- our ability to manage the loan portfolios acquired from FDIC assisted acquisitions within the limits of the loss protection provided by the FDIC;
- changes in our borrowers' performance on loans;
- changes in the commercial and consumer real estate markets;
- changes in our costs of operation, compliance and expansion;
- changes in the economy, including inflation;
- changes in government interest rate policies;
- changes in laws or the regulatory environment;
- changes in critical accounting policies and judgments;
- changes in accounting policies or procedures as may be required by the Financial Accounting Standards Board or other regulatory agencies;
- changes in the equity and debt securities markets;
- changes in competitive pressures on financial institutions;
- effect of additional provision for loan losses;
- fluctuations of our stock price;

- success and timing of our business strategies;
- impact of reputational risk created by these developments on such matters as business generation and retention, funding and liquidity;
- changes in our ability to receive dividends from our subsidiaries; and
- political developments, wars or other hostilities may disrupt or increase volatility in securities or otherwise affect economic conditions.

For a more detailed discussion of some of the factors that might cause such differences, see ITEM 1A. RISK FACTORS presented elsewhere in this report. The Company does not undertake, and specifically disclaims any obligation to update any forward-looking statements to reflect the occurrence of events or circumstances after the date of such statements, except as required by law.

## ITEM 1. BUSINESS

### *Organization*

*East West Bancorp, Inc.* East West Bancorp, Inc. (referred to herein on an unconsolidated basis as *East West* and on a consolidated basis as the *Company* or *we*) is a bank holding company incorporated in Delaware on August 26, 1998 and registered under the Bank Holding Company Act of 1956, as amended ( *BHCA* ). The Company commenced business on December 30, 1998 when, pursuant to a reorganization, it acquired all of the voting stock of East West Bank, or the *Bank* . The Bank is the Company's principal asset. In addition to the Bank, the Company has 8 other subsidiaries, namely East West Insurance Services, East West Capital Statutory Trust III, East West Capital Trust IV, East West Capital Trust V, East West Capital Trust VI, East West Capital Trust VII, East West Capital Trust VIII, and East West Capital Trust IX.

Table of Contents

*East West Insurance Services, Inc.* On August 22, 2000, East West completed the acquisition of East West Insurance Services, Inc. (the Agency ) in a stock exchange transaction. The Agency provides business and consumer insurance services primarily to the Southern California market. The Agency runs its operations autonomously from the operations of the Company. The operations of the Agency are limited and are not deemed material in relation to the overall operations of the Company.

*Other Subsidiaries of East West Bancorp, Inc.* The Company established 9 other subsidiaries as statutory business trusts, East West Capital Trust I, East West Capital Trust II, East West Capital Statutory Trust III in 2003, East West Capital Trust IV and East West Capital Trust V in 2004, East West Capital Trust VI in 2005, East West Capital Trust VII in 2006, and East West Capital Trusts VIII and East West Capital Trust IX in 2007, collectively referred to as the Trusts . In nine separate private placement transactions, the Trusts have issued either fixed or variable rate capital securities representing undivided preferred beneficial interests in the assets of the Trusts. East West is the owner of all the beneficial interests represented by the common securities of the Trusts. Business Trusts I and II were dissolved in 2011, and the corresponding securities were called. The purpose of issuing the capital securities was to provide the Company with a cost-effective means of obtaining Tier I capital for regulatory purposes. However, the Trusts will be phased out as Tier I capital starting in 2013 through 2015. In accordance with Financial Accounting Standards Board Accounting Standards Codification ( ASC ) 810, *Consolidation*, the Trusts are not consolidated into the accounts of the Company.

East West's principal business is to serve as a holding company for the Bank and other banking or banking-related subsidiaries which East West may establish or acquire. East West has not engaged in any other activities to date. As a legal entity separate and distinct from its subsidiaries, East West's principal source of funds is, and will continue to be, dividends that may be paid by its subsidiaries. East West's other sources of funds include proceeds from the issuance of its common stock in connection with stock option and employee stock purchase plans. At December 31, 2012, the Company had \$22.54 billion in total consolidated assets, \$14.82 billion in net consolidated loans, and \$18.31 billion in total consolidated deposits.

The principal office of the Company is located at 135 N. Los Robles Ave., 7th Floor, Pasadena, California 91101, and the telephone number is (626) 768-6000.

*East West Bank.* East West Bank was chartered by the Federal Home Loan Bank Board in June 1972, as the first federally chartered savings institution focused primarily on the Chinese-American community, and opened for business at its first office in the Chinatown district of Los Angeles in January 1973. From 1973 until the early 1990's, the Bank conducted a traditional savings and loan business by making predominantly long-term, single-family and multifamily residential loans and commercial real estate loans. These loans were made principally within the ethnic Chinese market in Southern California and were funded primarily with retail savings deposits and advances from the Federal Home Loan Bank of San Francisco. The Bank has emphasized commercial lending since its conversion to a state-chartered commercial bank on July 31, 1995. The Bank now also provides commercial business and trade finance loans for companies primarily located in the U.S.

At December 31, 2012, the Bank has four wholly owned subsidiaries. The first subsidiary, E-W Services, Inc., is a California corporation organized by the Bank in 1977. E-W Services, Inc. holds property used by the Bank in its operations. The secondary subsidiary, East-West Investments, Inc., primarily acts as a trustee in connection with real estate secured loans. The remaining subsidiaries are East West Bank (China) Limited and East West Securities Investment Consulting Co., Ltd. (Taiwan).

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

On November 6, 2009, the Bank entered into a purchase and assumption agreement ( UCB Purchase and Assumption Agreement ) with the Federal Deposit Insurance Corporation ( FDIC ), pursuant to which the Bank acquired certain assets and assumed certain liabilities of the former United Commercial Bank ( UCB ), a California state-chartered bank headquartered in San Francisco, California (the UCB Acquisition ). The UCB Acquisition included all 63 U.S. branches of United Commercial Bank. It also included the Hong Kong branch of United Commercial Bank and United Commercial Bank (China) Limited, the subsidiary of United Commercial Bank headquartered in Shanghai, China.

Table of Contents

Under the terms of the UCB Purchase and Assumption Agreement, the Bank acquired certain assets of United Commercial Bank with a fair value of approximately \$9.86 billion, including \$5.90 billion of loans, \$1.56 billion of investment securities, \$93.5 million of FHLB stock, \$599.0 million of cash and cash equivalents, \$147.4 million of securities purchased under sale agreements, \$38.0 million of other real estate owned ( OREO ), and \$207.6 million of other assets. Liabilities with a fair value of approximately \$9.57 billion were also assumed, including \$6.53 billion of insured and uninsured deposits, but excluding certain brokered deposits, \$1.84 billion of FHLB advances, \$858.2 million of securities sold under agreements to repurchase, \$90.6 million in other borrowings and \$254.2 million of other liabilities.

On June 11, 2010 the Bank entered into a purchase and assumption agreement ( WFIB Purchase and Assumption Agreement ) with the FDIC, pursuant to which the Bank acquired certain assets and assumed certain liabilities of the former Washington First International Bank ( WFIB ), a Washington state-chartered bank headquartered in Seattle, Washington. Under the terms of the WFIB Purchase and Assumption Agreement, the Bank acquired certain assets of WFIB with a fair value of approximately \$492.6 million, including \$313.9 million of loans, \$37.5 million of investment securities, \$67.2 million of cash and cash equivalents, \$23.4 million of other real estate owned, and \$50.6 million of other assets. Liabilities with a fair value of approximately \$481.3 million were also assumed, including \$395.9 million of insured and uninsured deposits, \$65.3 million of FHLB advances, \$1.9 million of securities sold under agreements to repurchase and \$18.1 million of other liabilities.

The Bank has also grown through strategic partnerships. On August 30, 2001, the Bank entered into an agreement with 99 Ranch Market to provide retail banking services in their stores throughout California. 99 Ranch Market is the largest Asian-focused chain of supermarkets on the West Coast, with over 30 full-service stores in California, Texas, Washington, and Nevada. Tawa Supermarket Companies ( Tawa ) is the parent company of 99 Ranch Market. Tawa's property development division owns and operates many of the shopping centers where 99 Ranch Market stores are located. We are currently providing in-store banking services to eleven 99 Ranch Market locations in California.

The Bank continues to develop its international banking capabilities. The Bank has one full-service branch in Hong Kong which commenced operations during the first quarter of 2007. The Hong Kong branch offers a variety of deposit, loan, and international banking products. In addition, the Bank has two full-service branches in mainland China through the Chinese bank subsidiary, which resulted from the UCB acquisition. The subsidiary branches include one branch in Shanghai, and one branch in Shantou. The Bank also has three overseas representative offices in China located in Beijing, Guangzhou and Shenzhen and one in Taipei, Taiwan. The first office, located in Beijing, was opened in 2003. The other overseas representative offices located in Guangzhou and Shenzhen resulted from the UCB acquisition. The representative office in Taipei, Taiwan opened in 2008. In addition to facilitating traditional letters of credit and trade finance to businesses, these representative offices allow the Bank to assist existing clients, as well as develop new business relationships. Through these offices, the Bank is focused on growing its export-import lending volume by aiding U.S. exporters in identifying and developing new sales opportunities to China-based customers as well as capturing additional letters of credit business generated from China-based exports through broader correspondent banking relationships.

The Bank continues to explore opportunities to establish other foreign offices, subsidiaries or strategic investments and partnerships to expand its international banking capabilities and to capitalize on the growing international trade business between the United States and Asia.

***Banking Services***

East West Bank is the fifth largest independent commercial bank headquartered in California as of December 31, 2012 based on total assets. East West Bank is the largest bank in the United States that focuses on the financial services needs of individuals and businesses which operate both

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

in the United States and Greater China as well as having a strong focus on the Chinese American community. Through its network of 119 banking locations in the United States, China and Hong Kong, the Bank provides a wide range of personal and commercial banking services to small- and medium-sized businesses, business executives, professionals, and other individuals. The Bank offers multilingual services to its customers in English, Cantonese, Mandarin, Vietnamese, and Spanish. The Bank also offers a variety of deposit products which includes the traditional range of personal and business checking and savings accounts, time deposits and individual retirement accounts, travelers checks, safe deposit boxes, and MasterCard and Visa merchant deposit services.

Table of Contents

The Bank's lending activities include commercial and residential real estate, construction, trade finance, and commercial business, including accounts receivable, small business administration (SBA), inventory, and working capital loans. The Bank's commercial borrowers are engaged in a wide variety of manufacturing, wholesale trade, and service businesses. The Bank generally provides commercial business loans to small- and medium-sized businesses. In addition, the Bank is focused on providing financing to clients needing a financial bridge that facilitates their business transactions between Asia and the United States.

***Market Area and Competition***

The Bank concentrates on marketing its services primarily in the greater Los Angeles metropolitan area and the greater San Francisco Bay area. California is the eighth largest economy in the world, with a population of over 35 million people. China and other Pacific Rim countries continue to grow as California's top trading partners. This provides the Bank with an important competitive advantage to its customers participating in the Asia Pacific marketplace. We believe that our customers benefit from our understanding of Asian markets through our physical presence in Hong Kong, China and Taiwan, our corporate and organizational ties throughout Asia, as well as our international banking products and services. We believe that this approach, combined with the extensive ties of our management and Board of Directors to the growing Asian business opportunities as well as the Chinese-American communities, provides us with an advantage in competing for customers in our market area. The Bank is also committed to expanding its customer base in the rest of California, Asia, Washington and other urban areas in which we operate including: New York, Georgia, Massachusetts, and Texas.

The Bank has 95 branches located in Northern and Southern California. Additionally, the Bank has six branches in New York, four branches in Georgia, two branches in Massachusetts, one branch in Texas, and four branches in Washington. In Greater China, East West's presence includes three full-service branches in Hong Kong, in Shanghai, and in Shantou. The Bank operates in China, as a full-service bank under East West Bank China (Limited), a wholly owned subsidiary of East West Bank. The Bank also has three representative offices in China located in Beijing, Guangzhou and Shenzhen and one in Taipei, Taiwan.

The banking and financial services industry in California generally, and in our market areas specifically, is highly competitive. The increasingly competitive environment is a result primarily of changes in laws and regulations, changes in technology and product delivery systems, as well as continuing consolidation among financial services providers.

The Bank competes for loans, deposits, and customers with other commercial banks, and other financial services institutions. Some of these competitors are larger in total assets and capitalization, and offer a broader range of financial services than the Bank.

***Economic Conditions, Government Policies, Legislation and Regulatory Developments***

***Economic Conditions and Government Policies***

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

The Company's profitability, like most financial institutions, is primarily dependent on interest rate differentials. In general, the difference between the interest rates paid by the Bank on interest-bearing liabilities, such as deposits and other borrowings, and the interest rates received by the Bank on interest-earning assets, such as loans extended to customers and securities held in the investment portfolio, will comprise the major portion of the Company's earnings. These rates are highly sensitive to many factors that are beyond the control of the Company, such as inflation, recession, and unemployment and the impact which future changes in domestic and foreign economic conditions might have on the Company cannot be predicted.

The Company's business is also influenced by the monetary and fiscal policies of the federal government and the policies of regulatory agencies, particularly the Board of Governors of the Federal Reserve System (the FRB). The FRB implements national monetary policies (with objectives such as curbing inflation and combating recession) through its open-market operations in United States Government securities. The FRB adjusts the required level of reserves for depository institutions subject to its reserve requirements, as well as adjusts the target federal funds and discount rates applicable to borrowings by depository institutions. The actions of the FRB in these areas influence the growth of bank loans, investments, and deposits and also affect interest earned on interest-earning assets and paid on interest-bearing liabilities. The nature and impact of any future changes in monetary and fiscal policies on the Company cannot be predicted.

Table of Contents

The impact on the Bank of the negative credit cycle during recent years has stabilized. However, the overall economic environment remains uncertain, with high unemployment rates, reduced general spending and decreased lending by financial institutions to their customers and to each other. Additionally, the sovereign debt crisis in Europe has increased the instability of the economic environment. Also, competition among depository institutions for deposits has continued to remain at heightened levels as compared to pre-recession levels. Bank and bank holding company stock prices have been negatively affected as has the ability of banks and bank holding companies to raise capital or borrow in the debt markets compared to past years. The bank regulatory agencies have been very aggressive in responding to concerns and trends identified in examinations, and this has resulted in the increased issuance of enforcement orders requiring action to address credit quality, liquidity and risk management, and capital adequacy concerns, as well as other safety and soundness concerns.

*The Dodd-Frank Wall Street Reform and Consumer Protection Act*

The Dodd-Frank Wall Street Reform and Consumer Protection Act financial reform legislation ( *Dodd-Frank* ), significantly revised and expanded the rulemaking, supervisory and enforcement authority of the federal bank regulatory agencies. The Dodd-Frank followed the Emergency Economic Stabilization Act of 2008 and the American Recovery and Reinvestment Act of 2009 in response to the economic downturn and financial industry instability. Additional initiatives may be proposed or introduced before Congress, the California Legislature, and other government bodies in the future. Such proposals, if enacted, may further alter the structure, regulation and competitive relationship among financial institutions and may subject us to increased supervision and disclosure and reporting requirements. In addition, the various bank regulatory agencies often adopt new rules and regulations and policies to implement and enforce existing legislation. It cannot be predicted whether, or in what form, any such legislation or regulatory changes in policy may be enacted or the extent to which the business of the Bank would be affected thereby. In addition, the outcome of examinations, any litigation, or any investigations initiated by state or federal authorities may result in necessary changes in our operations and increased compliance costs.

Dodd-Frank impacts many aspects of the financial industry and, in many cases, will impact larger and smaller financial institutions and community banks differently over time. Many of the following key provisions of the Dodd-Frank affecting the financial industry are now either effective or are in the proposed rule or implementation stage:

- the creation of a Financial Services Oversight Counsel to identify emerging systemic risks and improve interagency cooperation;
- expanded FDIC authority to conduct the orderly liquidation of certain systemically significant non-bank financial companies in addition to depository institutions;
- the establishment of strengthened capital and liquidity requirements for banks and bank holding companies, including minimum leverage and risk-based capital requirements no less than the strictest requirements in effect for depository institutions as of the date of enactment;
- the requirement by statute that bank holding companies serve as a source of financial strength for their depository institution subsidiaries;
- enhanced regulation of financial markets, including the derivative and securitization markets, and the elimination of certain proprietary trading activities by banks (the *Volcker Rule* );
- the termination of investments by the U.S. Treasury under the Troubled Asset Relief Program ( *TARP* ) and Capital Purchase Program ( *CPP* );

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

- the elimination and phase out of trust preferred securities from Tier 1 capital with certain exceptions;
- a permanent increase of the previously implemented temporary increase of FDIC deposit insurance to \$250,000;
- authorization for financial institutions to pay interest on business checking accounts;
- changes in the calculation of FDIC deposit insurance assessments, such that the assessment base will no longer be the institution's deposit base, but instead, will be its average consolidated total assets less its average tangible equity;
- the elimination of remaining barriers to de novo interstate branching by banks;
- expanded restrictions on transactions with affiliates and insiders under Section 23A and 23B of the Federal Reserve Act and lending limits for derivative transactions, repurchase agreements, and securities lending and borrowing transactions;

Table of Contents

- the elimination of the Office of Thrift Supervision and the transfer of oversight of thrift institutions and their holding companies to the Office of the Comptroller of the Currency or the FDIC and Federal Reserve;
- provisions that affect corporate governance and executive compensation at most United States publicly traded companies, including (i) stockholder advisory votes on executive compensation, (ii) executive compensation clawback requirements for companies listed on national securities exchanges in the event of materially inaccurate statements of earnings, revenues, gains or other criteria (iii) enhances independence requirements for compensation committee members, and (iv) giving the SEC authority to adopt proxy access rules which would permit stockholders of publicly traded companies to nominate candidates for election as director and have those nominees included in a company's proxy statement; and
- the creation of a Consumer Financial Protection Bureau (the CFPB), which is authorized to promulgate and enforce consumer protection regulations relating to bank and non-bank financial products and which may examine and enforce its regulations on banks with more than \$10 billion in assets.

The numerous rules and regulations that have been promulgated and are yet to be promulgated and finalized under Dodd-Frank are likely to significantly impact our operations and compliance costs. More stringent capital, liquidity and leverage requirements are expected to impact our business as Dodd-Frank is fully implemented. The federal agencies are in the process of issuing the many rules required to implement provisions of Dodd-Frank, some of which will apply directly to larger institutions with either more than \$50 billion in assets or more than \$10 billion in assets, such as proposed regulations for financial institutions deemed systemically significant, proposed rules requiring capital plans and stress tests and the Federal Reserve proposed rules to implement the Volcker Rule, as well as a final rule for the largest banks (over \$250 billion assets and internationally active) setting a new minimum risk-based capital floor. These and other requirements and policies imposed on larger institutions, such as expected countercyclical requirements for increased capital in times of economic expansion and a decrease in times of contraction, may subsequently become expected best practices for smaller institutions. Therefore, as a result of the changes required by Dodd-Frank, the profitability of our business activities may be impacted and we may be required to make changes to certain of our business practices. Such developments and new standards would require us to devote even more management attention and resources to evaluate and make any changes necessary to comply with new statutory and regulatory requirements.

***Supervision and Regulation***

*General.* The Company and the Bank are extensively regulated under both federal and state laws. Regulation and supervision by the federal and state banking agencies are intended primarily for the protection of depositors and the Deposit Insurance Fund administered by the FDIC and not for the benefit of stockholders. Set forth below is a brief description of key laws and regulations which relate to our operations. These descriptions are qualified in their entirety by reference to the applicable laws and regulations. The federal and state agencies regulating the financial services industry also frequently adopt changes to their regulations.

*The Company.* As a bank holding company, and pursuant to its election of financial holding company status, the Company is subject to regulation and examination by the FRB under the BHCA. Accordingly, the Company is subject to the FRB's regulation and its authority to:

- require periodic reports and such additional information as the FRB may require;

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

- require the Company to maintain certain levels of capital (see ITEM 1. BUSINESS - Supervision and Regulation - Capital Requirements );
- require that bank holding companies serve as a source of financial and managerial strength to subsidiary banks and commit resources as necessary to support each subsidiary bank. A bank holding company's failure to meet its obligations to serve as a source of strength to its subsidiary banks will generally be considered by the FRB to be an unsafe and unsound banking practice or a violation of FRB regulations or both;
- restrict the receipt and the payment of dividends;
- terminate an activity or terminate control of or liquidate or divest certain subsidiaries, affiliates or investments if the FRB believes the activity or the control of the subsidiary or affiliate constitutes a significant risk to the financial safety, soundness or stability of any bank subsidiary;
- regulate provisions of certain bank holding company debt, including the authority to impose interest ceilings and reserve requirements on such debt and require prior approval to purchase or redeem our securities in certain situations;

Table of Contents

- require the prior approval of senior executive officer or director changes and prohibit golden parachute payments, including change in control agreements, or new employment agreements with such payment terms, which are contingent upon termination;
- approve acquisitions and mergers with banks and consider certain competitive, management, financial and other factors in granting these approvals.

*Nonbanking and Financial Activities*

Subject to certain prior notice or FRB approval requirements, bank holding companies may engage in any of, or acquire shares of companies engaged in, those nonbanking activities determined by the FRB to be so closely related to banking or managing or controlling banks as to be a proper incident thereto. The Company may engage in these nonbanking activities and broader securities, insurance, merchant banking and other activities that are determined to be financial in nature or are incidental or complementary to activities that are financial in nature without prior FRB approval pursuant to its election to become a financial holding company. Pursuant to the Gramm-Leach-Bliley Act of 1999 ( GLBA ) and Dodd-Frank, in order to elect and retain financial holding company status, both the bank holding company and all depository institution subsidiaries of a bank holding company must be well capitalized and well managed, and, except in limited circumstances, depository subsidiaries must be in satisfactory compliance with the Community Reinvestment Act ( CRA ). Failure to sustain compliance with these requirements or correct any noncompliance within a fixed time period could lead to divestiture of subsidiary banks or require all activities to conform to those permissible for a bank holding company.

The Company is also a bank holding company within the meaning of the California Financial Code. As such, the Company and its subsidiaries are subject to examination by, and may be required to file reports with, the Department of Financial Institutions ( DFI ). DFI approvals may also be required for certain mergers and acquisitions.

*Securities Laws*

The Company's securities are registered with the Securities Exchange Commission ( SEC ) under the Exchange Act and listed on the Nasdaq stock market. As such, the Company is subject to the information, proxy solicitation, insider trading, corporate governance, and other requirements and restrictions of the Exchange Act. These requirements and regulations include the provisions of Dodd-Frank with respect to stockholder nominations of directors and say-on-pay voting and incentive compensation clawbacks and the listing requirements of the Nasdaq stock market.

*The Sarbanes-Oxley Act*

The Company is subject to the accounting oversight and corporate governance requirements of the Sarbanes-Oxley Act of 2002, including:

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

- required executive certification of financial presentations;
- increased requirements for board audit committees and their members;
- enhanced disclosure of controls and procedures and internal control over financial reporting;
- enhanced controls over, and reporting of, insider trading; and
- increased penalties for financial crimes and forfeiture of executive bonuses in certain circumstances.

*The Bank.* As a California state-chartered bank, the Bank is subject to primary supervision, periodic examination, and regulation by the CFPB, DFI, and by the FRB, as the Bank's primary federal regulator. As a member bank, the Bank is a stockholder of the FRB.

In general, under the California Financial Code, California banks have all the powers of a California corporation, subject to the general limitation of state bank powers under the Federal Deposit Insurance Corporation Improvement Act ( FDICIA ) to those permissible for national banks. Specific federal and state laws and regulations which are applicable to banks regulate, among other things, the scope of their business, their investments, their reserves against deposits, the timing of the availability of deposited funds, and the nature and amount of and collateral for certain loans. The regulatory structure also gives the bank regulatory agencies extensive discretion in connection with their supervisory and enforcement activities and examination policies.

Table of Contents

*Permissible Activities and Subsidiaries*

California law permits state chartered commercial banks to engage in any activity permissible for national banks. Therefore, the Bank may form subsidiaries to engage in the many so-called "closely related to banking" or "nonbanking" activities commonly conducted by national banks in operating subsidiaries, and further, pursuant to GLBA, the Bank may conduct certain "financial" activities in a subsidiary to the same extent as may a national bank, provided the Bank is and remains "well-capitalized," "well-managed" and in satisfactory compliance with the CRA. Presently, none of the Bank's subsidiaries are financial subsidiaries.

*Federal Home Loan Bank System*

The Bank is a member of the Federal Home Loan Bank ("FHLB") of San Francisco. Among other benefits, each FHLB serves as a reserve or central bank for its members within its assigned region and makes available loans or advances to its members. Each FHLB is financed primarily from the sale of consolidated obligations of the FHLB system. As an FHLB member, the Bank is required to own a certain amount of capital stock in the FHLB. At December 31, 2012, the Bank was in compliance with the FHLB's stock ownership requirement and our investment in FHLB capital stock totaled \$107.3 million, which includes \$3.1 million of the Federal Home Loan Bank of Seattle capital stock as a result of the WFIB acquisition.

*Federal Reserve System*

The Federal Reserve Board requires all depository institutions to maintain interest-bearing reserves at specified levels against their transaction accounts. At December 31, 2012, the Bank was in compliance with these requirements. As a member bank, the Bank is also required to own capital stock in the FRB. At December 31, 2012, the Bank held an investment of \$48.0 million in FRB capital stock.

*Foreign Operations*

East West Bank currently has three full-service branches in Greater Asia, which are located in Hong Kong, Shanghai, and Shantou. The Bank operates in China, as a full-service bank under East West Bank China (Limited), a wholly owned subsidiary of East West Bank. The Bank also has three representative offices in China located in Beijing, Guangzhou and Shenzhen and one in Taipei, Taiwan. The Bank's overseas activities are regulated by the FRB and the DFI and are also regulated by the supervisory authorities of the host countries in which the Bank has offices.

*Dividends and Other Transfers of Funds*

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

Dividends from the Bank constitute the principal source of income to the Company. The Bank is subject to various statutory and regulatory restrictions on its ability to pay dividends. In addition, the banking agencies have the authority to prohibit or limit the Bank from paying dividends, depending upon the Bank's financial condition, if such payment is deemed to constitute an unsafe or unsound practice. Furthermore, under the federal prompt corrective action regulations, the FRB or FDIC may prohibit a bank holding company from paying any dividends if the holding company's bank subsidiary is classified as undercapitalized. For more information on capitalization, see "Capital Requirements" below.

It is FRB policy that bank holding companies should generally pay dividends on common stock only out of income available over the past year, and only if prospective earnings retention is consistent with the organization's expected future needs and financial condition. It is also FRB policy that bank holding companies should not maintain dividend levels that undermine the company's ability to be a source of strength to its banking subsidiaries. Additionally, in consideration of the current financial and economic environment, the FRB has stated that bank holding companies should carefully review their dividend policy and has discouraged payment ratios that are at maximum allowable levels unless both asset quality and capital are very strong.

As of December 31, 2012, the Company had outstanding approximately \$83.0 million of 8% Non-Cumulative Perpetual Convertible Preferred Stock, Series A ( "Series A preferred stock" ), which was originally issued in April 2008. So long as the Company's Series A preferred stock is outstanding, dividend payments and repurchases or redemptions relating to certain equity securities, including the Company's common stock, are prohibited until all accrued and unpaid dividends are paid on such Series A preferred stock, subject to certain limited exceptions (for complete discussion and disclosure see "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources" presented elsewhere in this report).

Table of Contents

*Capital Requirements*

Bank holding companies and banks are subject to various regulatory capital requirements administered by state and federal banking agencies. Increased capital requirements are expected as a result of expanded authority set forth in Dodd-Frank and the Basel III international supervisory developments discussed below. Capital adequacy guidelines and, additionally for banks, prompt corrective action regulations involve quantitative measures of assets, liabilities, and certain off-balance sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weighting, and other factors. At December 31, 2012, the Company's and the Bank's capital ratios exceeded the minimum capital adequacy guideline percentage requirements of the federal banking agencies for well capitalized institutions. For complete discussion and disclosure see Management's Discussion and Analysis of Financial Condition and Results of Operations Risk-Based Capital and Note 23 to the Company's consolidated financial statements presented elsewhere in this report.

The federal banking agencies have adopted risk-based minimum capital adequacy guidelines for bank holding companies and banks which are intended to provide a measure of capital that reflects the degree of risk associated with a banking organization's operations for both transactions reported on the balance sheet as assets and transactions which are recorded as off-balance sheet items. The risk-based capital ratio is determined by classifying assets and certain off-balance sheet financial instruments into weighted categories, with higher levels of capital being required for those categories perceived as representing greater risk. Bank holding companies and banks engaged in significant trading activity may also be subject to the market risk capital guidelines and be required to incorporate additional market and interest rate risk components into their risk-based capital standards. Under the capital adequacy guidelines, a banking organization's total capital is divided into tiers. Tier I capital currently includes common equity and trust preferred securities, subject to certain criteria and quantitative limits. Under Dodd-Frank depository institution holding companies, such as the Company, with more than \$15 billion in total consolidated assets as of December 31, 2009, will no longer be able to include trust preferred securities as Tier I regulatory capital as of the end of a three-year phase-out period in 2016, and may be obligated to replace any outstanding trust preferred securities issued prior to May 19, 2010, with qualifying Tier I regulatory capital during the phase-out period. Tier II capital includes hybrid capital instruments, other qualifying debt instruments, a limited amount of the allowance for loan and lease losses, and a limited amount of unrealized holding gains on equity securities. Following the phase-out period under Dodd-Frank, trust preferred securities will be treated as Tier II capital. Tier III capital consists of qualifying unsecured debt. The sum of Tier II and Tier III capital may not exceed the amount of Tier I capital. The risk-based capital guidelines require a minimum ratio of qualifying total capital to risk-weighted assets of 8% and a minimum ratio of Tier I capital to risk-weighted assets of 4%. An institution is defined as well capitalized if its total capital to risk-weighted assets ratio is 10.00% or more; its core capital to risk-weighted assets ratio is 6.00% or more; and its core capital to adjusted average assets ratio is 5.00% or more.

Bank holding companies and banks are also required to comply with minimum leverage ratio requirements. The leverage ratio is the ratio of a banking organization's Tier I capital to its total adjusted quarterly average assets (as defined for regulatory purposes). The requirements necessitate a minimum leverage ratio of 3.0% for holding companies and banks that either have the highest supervisory rating or have implemented the appropriate federal regulatory authority's risk-adjusted measure for market risk. All other holding companies and banks are required to maintain a minimum leverage ratio of 4.0%, unless a different minimum is specified by an appropriate regulatory authority. For a depository institution to be considered well capitalized under the regulatory framework for prompt corrective action, its leverage ratio must be at least 5.0%.

*Basel Accords*

The regulatory agencies' risk-based capital guidelines are based upon the 1988 capital accord (Basel I) of the International Basel Committee on Bank Supervision (Basel Committee), a committee of central banks and bank supervisors/regulators from the major industrialized countries that

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

develops broad policy guidelines, which each country's supervisors can use to determine the supervisory policies they apply to their home jurisdiction. In 2004, the Basel Committee proposed a new capital accord ( Basel II ) to replace Basel I that provided approaches for setting capital standards for credit risk and capital requirements for operational risk and refining the existing capital requirements for market risk exposures. U.S. banking regulators published a final rule for Basel II implementation requiring banks with over \$250 billion in consolidated total assets or on-balance sheet foreign exposure of \$10 billion ( core banks ) to adopt the advanced approaches of Basel II while allowing other banks to elect to opt in. The regulatory agencies later issued a proposed rule for larger banks that would give banking organizations that do not use the advanced approaches the option to implement a new risk-based capital framework that would adopt the standardized approach of Basel II for credit risk, the basic indicator approach of Basel II for operational risk and related disclosure requirements. A definitive rule was not issued.

Table of Contents

In December 2010, the Basel Committee released its final framework for strengthening international capital and liquidity regulation, now officially identified as Basel III. If and when implemented by the U.S. banking agencies and fully phased-in, it would require bank holding companies and their bank subsidiaries to maintain substantially more capital than currently required, with a greater emphasis on common equity. The Basel III capital framework, among other things:

- introduces as a new capital measure, Common Equity Tier 1 ( CET1 ), more commonly known in the United States as Tier 1 Common, and defines CET1 narrowly by requiring that most adjustments to regulatory capital measures be made to CET1 and not to the other components of capital, and expands the scope of the adjustments as compared to existing regulations;
- if fully phased in as currently proposed, requires covered banks to maintain: (i) a newly adopted international standard, a minimum ratio of CET1 to risk-weighted assets of at least 4.5%, plus a 2.5% capital conservation buffer (which is added to the 4.5% CET1 ratio as that buffer is phased in, effectively resulting in a minimum ratio of CET1 to risk-weighted assets of at least 7%); (ii) an additional SIFI buffer for those large institutions deemed to be systemically important, ranging from 1.0% to 2.5%, and up to 3.5% under certain conditions; (iii) a minimum ratio of Tier 1 capital to risk-weighted assets of at least 6.0%, plus the capital conservation buffer (which is added to the 6.0% Tier 1 capital ratio as that buffer is phased in, effectively resulting in a minimum Tier 1 capital ratio of 8.5% upon full implementation); (iv) a minimum ratio of total (that is, Tier 1 plus Tier 2) capital to risk-weighted assets of at least 8.0%, plus the capital conservation buffer (which is added to the 8.0% total capital ratio as that buffer is phased in, effectively resulting in a minimum total capital ratio of 10.5% upon full implementation); and (v) as a newly adopted international standard, a minimum leverage ratio of 3%, calculated as the ratio of Tier 1 capital to balance sheet exposures plus certain off-balance sheet exposures (as the average for each quarter of the month-end ratios for the quarter); and
- an additional countercyclical capital buffer, generally to be imposed when national regulators determine that excess aggregate credit growth becomes associated with a buildup of systemic risk, that would be a CET1 add-on to the capital conservation buffer in the range of 0% to 2.5% when fully implemented.

The federal bank regulatory agencies issued joint proposed rules in June 2012 that would revise the risk-based capital requirement and the method for calculating risk-weighted assets to make them consistent with Basel III and provisions of the Dodd-Frank Act. The proposed rules would apply to all depository institutions and top-tier bank holding companies with assets of \$500 million or more. Among other things, the proposed rules establish a new minimum common equity Tier 1 ratio (4.5% of risk-weighted assets) and a higher minimum Tier 1 risk-based capital requirement (6.0% of risk-weighted assets) and assigns higher risk weighting to exposures that are more than 90 days past due or are on nonaccrual status and certain commercial real estate facilities that finance the acquisition, development or construction of real property. The proposed rules also require unrealized gains and losses on certain securities holdings to be included in calculating capital ratios; limit capital distributions and certain discretionary bonus payments by financial institutions defined as systemically important, though not so deemed by the Basel Committee, unless an additional capital conservation buffer of 0% to 1.0% of risk-weighted assets is maintained. The proposed rules, including alternative requirements for smaller community financial institutions like the Company, would, when finalized, be phased in through 2019. The implementation of the Basel III framework was to commence January 1, 2013, however, due to the number of comment letters received by the federal banking agencies in response to the notice of proposed rulemaking, the initial implementation has been postponed indefinitely.

Table of Contents

*Enforcement Authority*

The federal and California regulatory structure gives the bank regulatory agencies extensive discretion in connection with their supervisory and enforcement activities and examination policies, including policies with respect to the classification of assets and the establishment of adequate loan loss reserves for regulatory purposes. The regulatory agencies have adopted guidelines to assist in identifying and addressing potential safety and soundness concerns before an institution's capital becomes impaired. The guidelines establish operational and managerial standards generally relating to: (i) internal controls, information systems, and internal audit systems; (ii) loan documentation; (iii) credit underwriting; (iv) interest-rate exposure; (v) asset growth and asset quality; and (vi) compensation, fees, and benefits. Further, the regulatory agencies have adopted safety and soundness guidelines for asset quality and for evaluating and monitoring earnings to ensure that earnings are sufficient for the maintenance of adequate capital and reserves. If, as a result of an examination, the DFI or the FRB should determine that the financial condition, capital resources, asset quality, earnings prospects, management, liquidity, or other aspects of the Bank's operations are unsatisfactory or that the Bank or its management is violating or has violated any law or regulation, the DFI and the FRB, and separately the FDIC as insurer of the Bank's deposits, have residual authority to:

- Require affirmative action to correct any conditions resulting from any violation or practice;
  
- Direct an increase in capital and the maintenance of higher specific minimum capital ratios, which may preclude the Bank from being deemed well capitalized and restrict its ability to accept certain brokered deposits;
  
- Restrict the Bank's growth geographically, by products and services, or by mergers and acquisitions, including bidding in FDIC receiverships for failed banks;
  
- Enter into or issue informal or formal enforcement actions, including required Board resolutions, memoranda of understanding, written agreements and consent or cease and desist orders or prompt corrective action orders to take corrective action and cease unsafe and unsound practices;
  
- Require prior approval of senior executive officer or director changes; remove officers and directors and assess civil monetary penalties; and
  
- Take possession of and close and liquidate the Bank or appoint the FDIC as receiver.

*Prompt Corrective Action*

The Federal Deposit Insurance Corporation Improvement Act ( FDICIA ) provides a framework for the regulation of depository institutions and their affiliates, including parent holding companies, by their federal banking regulators. Among other things, it requires the relevant federal banking regulator to take prompt corrective action with respect to a depository institution if that institution does not meet certain capital adequacy standards, including requiring the prompt submission of an acceptable capital restoration plan. Supervisory actions by the appropriate federal banking regulator under the prompt corrective action rules generally depend upon an institution's classification within five capital categories as defined in the regulations. The relevant capital measures are the capital ratio, the Tier 1 capital ratio, and the leverage ratio. However, the federal banking agencies have also adopted non-capital safety and soundness standards to assist examiners in identifying and addressing potential safety and soundness concerns before capital becomes impaired. These include operational and managerial standards relating to: (i) internal controls, information systems and internal audit systems, (ii) loan documentation, (iii) credit underwriting, (iv) asset quality and growth, (v) earnings, (vi) risk management, and (vii) compensation and benefits.

A depository institution's capital tier under the prompt corrective action regulations will depend upon how its capital levels compare with various relevant capital measures and the other factors established by the regulations. A bank will be: (i) well capitalized if the institution has a total risk-based capital ratio of 10.0% or greater, a Tier 1 risk-based capital ratio of 6.0% or greater, and a leverage ratio of 5.0% or greater and is not subject to any order or written directive by any such regulatory authority to meet and maintain a specific capital level for any capital measure; (ii) adequately capitalized if the institution has a total risk-based capital ratio of 8.0% or greater, a Tier 1 risk-based capital ratio of 4.0% or greater, and a leverage ratio of 4.0% or greater and is not well capitalized; (iii) undercapitalized if the institution has a total risk-based capital ratio that is less than 8.0%, a Tier 1 risk-based capital ratio of less than 4.0%, or a leverage ratio of less than 4.0%; (iv) significantly undercapitalized if the institution has a total risk-based capital ratio of less than 6.0%, a Tier 1 risk-based capital ratio of less than 3.0%, or a leverage ratio of less than 3.0%; and (v) critically undercapitalized if the institution's tangible equity is equal to or less than 2.0% of average quarterly tangible assets. An institution may be downgraded to, or deemed to be in, a capital category that is lower than indicated by its capital ratios if it is determined to be in an unsafe or unsound condition or if it receives an unsatisfactory examination rating with respect to certain matters.

Table of Contents

The FDICIA generally prohibits a depository institution from making any capital distributions (including payment of a dividend) or paying any management fee to its parent holding company if the depository institution would thereafter be undercapitalized. Undercapitalized institutions are subject to growth limitations and are required to submit a capital restoration plan. The regulatory agencies may not accept such a plan without determining, among other things, that the plan is based on realistic assumptions and is likely to succeed in restoring the depository institution's capital. In addition, for a capital restoration plan to be acceptable, the depository institution's parent holding company must guarantee that the institution will comply with such capital restoration plan. The bank holding company must also provide appropriate assurances of performance. The aggregate liability of the parent holding company is limited to the lesser of (i) an amount equal to 5.0% of the depository institution's total assets at the time it became undercapitalized and (ii) the amount which is necessary (or would have been necessary) to bring the institution into compliance with all capital standards applicable with respect to such institution as of the time it fails to comply with the plan. If a depository institution fails to submit an acceptable plan, it is treated as if it is significantly undercapitalized. Significantly undercapitalized depository institutions may be subject to a number of requirements and restrictions, including orders to sell sufficient voting stock to become adequately capitalized, requirements to reduce total assets, and cessation of receipt of deposits from correspondent banks. Critically undercapitalized institutions are subject to the appointment of a receiver or conservator.

The appropriate federal banking agency may, under certain circumstances, reclassify a well capitalized insured depository institution as adequately capitalized. The FDICIA provides that an institution may be reclassified if the appropriate federal banking agency determines (after notice and opportunity for a hearing) that the institution is in an unsafe or unsound condition or deems the institution to be engaging in an unsafe or unsound practice. The appropriate agency is also permitted to require an adequately capitalized or undercapitalized institution to comply with the supervisory provisions as if the institution were in the next lower category (but not treat a significantly undercapitalized institution as critically undercapitalized) based on supervisory information other than the capital levels of the institution.

*FDIC Deposit Insurance*

The FDIC insures our customer deposits through the Deposit Insurance Fund of the FDIC up to prescribed limits for each depositor. The FDIC may terminate a depository institution's deposit insurance upon a finding that the institution's financial condition is unsafe or unsound or that the institution has engaged in unsafe or unsound practices that pose a risk to the Deposit Insurance Fund or that may prejudice the interest of the bank's depositors. The termination of deposit insurance for the Bank would also result in the revocation of the Bank's charter by the DFI.

All FDIC-insured institutions are also required to pay assessments to the FDIC to fund interest payments on bonds issued by the Financing Corporation ( FICO ), an agency of the Federal government established to recapitalize the predecessor to the Deposit Insurance Fund. The FICO assessment rates are determined quarterly. These assessments will continue until the FICO bonds mature in 2017.

Table of Contents

*Federal Banking Agency Compensation Guidelines*

Guidelines adopted by the federal banking agencies pursuant to the Federal Deposit Insurance (FDI) Act prohibit excessive compensation as an unsafe and unsound practice and describe compensation as excessive when the amounts paid are unreasonable or disproportionate to the services performed by an executive officer, employee, director or principal stockholder. Such guidance is intended to ensure that the incentive compensation policies of banking organizations do not undermine the safety and soundness of such organizations by encouraging excessive risk-taking. The incentive compensation guidance covers all employees who have the ability to materially affect the risk profile of an organization, either individually or as part of a group. It is based upon the key principles that a banking organization's incentive compensation arrangements should (i) provide incentives that do not encourage risk-taking beyond the organization's ability to effectively identify and manage risks, (ii) be compatible with effective internal controls and risk management, and (iii) be supported by strong corporate governance, including active and effective oversight by the organization's board of directors. Any deficiencies in compensation practices that are identified may be incorporated into the organization's supervisory ratings, which can affect its ability to make acquisitions or perform other actions. The incentive compensation guidance provides that enforcement actions may be taken against a banking organization if its incentive compensation arrangements or related risk-management control or governance processes pose a risk to the organization's safety and soundness and the organization is not taking prompt and effective measures to correct the deficiencies.

In 2011, the FRB and federal banking agencies, including the SEC, proposed joint rules to implement Section 956 of Dodd-Frank for banks with \$1 billion or more in assets. Section 956 prohibits incentive-based compensation arrangements that encourage inappropriate risk taking by covered financial institutions and are deemed to be excessive, or that may lead to material losses. The proposed rule would move the U.S. closer to aspects of international compensation standards by (i) requiring deferral of a substantial portion of incentive compensation for executive officers of particularly large institutions described above; (ii) prohibiting incentive-based compensation arrangements for covered persons that would encourage inappropriate risks by providing excessive compensation; (iii) prohibiting incentive-based compensation arrangements for covered persons that would expose the institution to inappropriate risks by providing compensation that could lead to a material financial loss; (iv) requiring policies and procedures for incentive-based compensation arrangements that are commensurate with the size and complexity of the institution; and (v) requiring annual reports on incentive compensation structures to the institution's appropriate Federal regulator. Final rules are still pending.

The scope, content and application of the U.S. banking regulators' policies on incentive compensation continue to evolve in the aftermath of the economic downturn. It cannot be determined at this time whether compliance with such policies will adversely affect the ability of the Company and the Bank to hire, retain and motivate key employees.

*Loans-to-One Borrower Limitations*

With certain limited exceptions, the maximum amount of obligations, secured or unsecured, that any borrower (including certain related entities) may owe to a United States bank at any one time may not exceed 25% of the sum of stockholders' equity, allowance for loan losses, capital notes and debentures of the bank. Unsecured obligations may not exceed 15% of the sum of shareholders' equity, allowance for loan losses, capital notes and debentures of the bank. The Bank has established internal loan limits which are lower than the legal lending limits for United States banks.

*Extensions of Credit to Insiders and Transactions with Affiliates*

The Federal Reserve Act and FRB Regulation O place limitations and conditions on loans or extensions of credit to:

- a bank or bank holding company's executive officers, directors and principal stockholders (i.e., in most cases, those persons who own, control or have power to vote more than 10% of any class of voting securities);
- any company controlled by any such executive officer, director or stockholder; or
- any political or campaign committee controlled by such executive officer, director or principal stockholder.

Such loans and leases:

- must comply with loan-to-one-borrower limits;
- require prior full board approval when aggregate extensions of credit to the person exceed specified amounts;
- must be made on substantially the same terms (including interest rates and collateral) and follow credit underwriting procedures no less stringent than those prevailing at the time for comparable transactions with non-insiders; and
- must not involve more than the normal risk of repayment or present other unfavorable features.

Table of Contents

In addition, Regulation O provides that the aggregate limit on extensions of credit to all insiders of a bank as a group cannot exceed the bank's unimpaired capital and unimpaired surplus. California has laws and the DFI has regulations which adopt and also apply Regulation O to the Bank.

The Bank also is subject to certain restrictions imposed by Federal Reserve Act Sections 23A and 23B and FRB Regulation W on any extensions of credit to, or the issuance of a guarantee or letter of credit on behalf of, any affiliates, the purchase of, or investments in, stock or other securities thereof, the taking of such securities as collateral for loans, and the purchase of assets of any affiliates. Affiliates include parent holding companies, sister banks, sponsored and advised companies, financial subsidiaries and investment companies where the Bank's affiliate serves as investment advisor. Sections 23A and 23B and Regulation W generally:

- prevent any affiliates from borrowing from the Bank unless the loans are secured by marketable obligations of designated amounts;
- limit such loans and investments to or in any affiliate individually to 10% of the Bank's capital and surplus;
- limit such loans and investments to all affiliates in the aggregate to 20% of the Bank's capital and surplus;
- place restrictions on certain asset sales to and from an insider to an institution; and
- require such loans to and investments in any affiliate to be on terms and under conditions substantially the same or at least as favorable to the Bank as those prevailing for comparable transactions with non-affiliated parties.

Additional restrictions on transactions with affiliates may be imposed on the Bank under the FDICIA prompt corrective action provisions and the supervisory authority of the federal and state banking agencies.

*Securities Activities*

FRB Regulation R implements exceptions provided in GLBA for securities activities which banks may conduct without registering with the SEC as a securities broker or moving such activities to a broker-dealer affiliate. Regulation R provides exceptions for networking arrangements with third party broker-dealers and authorizes compensation for bank employees who refer and assist retail and high net worth bank customers with their securities, including sweep accounts to money market funds, and with related trust, fiduciary, custodial and safekeeping needs. The current securities activities which the Bank provides customers are conducted in conformance with these rules and regulations.

*Operations and Consumer Compliance Laws*

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

The Bank must comply with numerous federal anti-money laundering and consumer privacy and protection statutes and regulations, including the Consumer Financial Protection Act of 2010, which constitutes part of the Dodd-Frank Act and establishes the CFPB, as described above, the USA PATRIOT Act of 2001, the Bank Secrecy Act, the Foreign Account Tax Compliance Act, effective in 2013, the CRA, the Fair Credit Reporting Act, as amended by the Fair and Accurate Credit Transactions Act, the Electronic Fund Transfer Act, the Equal Credit Opportunity Act, the Truth in Lending Act, the Fair Housing Act, the Home Mortgage Disclosure Act, the Real Estate Settlement Procedures Act, the National Flood Insurance Act, the Americans with Disabilities Act and various federal and state privacy protection laws.

The CFPB is an independent entity within the Federal Reserve. It has broad rulemaking, supervisory and enforcement authority over consumer financial products and services, including deposit products, residential mortgages, home-equity loans and credit cards, and contains provisions on mortgage-related matters such as steering incentives, determinations as to a borrower's ability to repay and prepayment penalties. The CFPB's functions include investigating consumer complaints, conducting market research, rulemaking, supervising and examining banks consumer transactions, and enforcing rules related to consumer financial products and services.

Under the Dodd-Frank Act, regulators were required to mandate specific underwriting criteria to support a reasonable, good faith determination by lenders of a consumer's ability to repay a mortgage. The CFPB by amendment to Regulation Z, which implements the Truth in Lending Act and will take effect on January 10, 2014, has defined what would be considered a qualified mortgage. Another Dodd-Frank provision requires banks and other mortgage lenders to retain a minimum 5% economic interest in mortgage loans sold through securitizations unless the loans meet a definition of a qualified residential mortgage yet to be promulgated. Banks will have to reevaluate their underwriting standards and the extent and type of their mortgage lending as a result of these regulations implementing Dodd-Frank.

Table of Contents

These laws and regulations mandate certain disclosure and other requirements and regulate the manner in which financial institutions must deal with customers when taking deposits, making loans, collecting loans, and providing other services. Failure to comply with these laws and regulations can subject the Bank to various penalties, including but not limited to enforcement actions, injunctions, fines or criminal penalties, punitive damages to consumers, and the loss of certain contractual rights. The Bank and the Company are also subject to federal and state laws prohibiting unfair or fraudulent business practices, untrue or misleading advertising and unfair competition.

*Regulation of Subsidiaries/Branches*

Foreign-based subsidiaries, including East West Bank China (Limited) are subject to applicable foreign laws and regulations, such as those implemented by the China Banking Regulatory Commission. Nonbank subsidiaries are subject to additional or separate regulation and supervision by other state, federal and self-regulatory bodies. East West Insurance Services, Inc. is subject to the licensing and supervisory authority of the California Commissioner of Insurance. The East West, Hong Kong branch is subject to applicable foreign laws and regulations, such as those implemented by the Hong Kong Monetary Authority.

*Employees*

East West does not have any employees other than officers who are also officers of the Bank. Such employees are not separately compensated for their employment with the Company. As of December 31, 2012, the Bank had a total of 2,194 full-time employees and 101 part-time employees and East West Insurance had a total of 11 full-time employees. None of the employees are represented by a union or collective bargaining group. The managements of the Bank and East West Insurance believe that their employee relations are satisfactory.

*Recently Issued Accounting Standards*

For a discussion of recent accounting pronouncements and their expected impact on the Company's consolidated financial statements, see Note 1 to the Company's consolidated financial statements presented elsewhere in this report.

*Available Information*

We file reports with the SEC, including our proxy statements, annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K. These reports and other information on file can be inspected and copied at the SEC's Public Reference Room at 100 F Street, N.E., Washington, DC 20549, on official business days during the hours of 10 a.m. to 3 p.m. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The Commission maintains a website that contains the reports, proxy and information statements and other information we file with them. The address of the site is <http://www.sec.gov>.

The Company also maintains an internet website at [www.eastwestbank.com](http://www.eastwestbank.com). The Company makes its website content available for information purposes only. It should not be relied upon for investment purposes.

We make available free of charge through our website our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and proxy statements for our annual stockholders meetings, as well as any amendments to those reports, as soon as reasonably practicable after the Company files such reports with the SEC. The Company's SEC reports can be accessed through the investor information page of its website. None of the information contained in or hyperlinked from our website is incorporated into this Form 10-K.

***Executive Officers of the Registrant***

The following table sets forth the executive officers of the Company, their positions, and their ages. Each officer is appointed by the Board of Directors of the Company or the Bank and serves at their pleasure.

<b>Name</b>	<b>Age (1)</b>	<b>Position with Company or Bank</b>
Dominic Ng	54	Chairman and Chief Executive Officer of the Company and the Bank
Julia S. Gouw	53	President and Chief Operating Officer of the Company and the Bank

Table of Contents

Ming Lin Chen	52	Executive Vice President and Director of International and Loan Administration of the Bank
William H. Fong	65	Executive Vice President and Head of Northern California Commercial Lending Division of the Bank
Karen Fukumura	48	Executive Vice President and Head of Retail Banking of the Bank
John R. Hall	57	Executive Vice President and Chief Credit Officer of the Bank
Douglas P. Krause	56	Executive Vice President, Chief Risk Officer, General Counsel, and Secretary of the Company and the Bank
Marty Newton	53	Executive Vice President and Head of Commercial Banking Services of the Bank
Irene H. Oh	35	Executive Vice President and Chief Financial Officer of the Company and the Bank
Bennett Pozil	51	Executive Vice President and Senior Manager Director of Capital Markets of the Bank
Lawrence B. Schiff	60	Executive Vice President and Director of Credit Risk Management of the Bank
James T. Schuler	64	Executive Vice President and Chief Human Resources Officer of the Bank
Sue Yang	45	Executive Vice President and Head of Greater China and Corporate Strategy for the Bank
Andy Yen	55	Executive Vice President and Director of the Business Banking Division of the Bank

---

(1) As of February 28, 2013

**Dominic Ng** serves as Chairman and Chief Executive Officer of East West Bancorp, Inc. and East West Bank. Prior to taking the helm of East West in 1992, Mr. Ng was President and Chief Executive Officer of Seyen Investment, Inc. and before that spent over a decade as a CPA with Deloitte & Touche LLP. Mr. Ng serves on the Board of Directors of Mattel, Inc. and served for six years as a director of the Federal Reserve Bank of San Francisco, Los Angeles Branch.

**Julia S. Gouw** serves as President and Chief Operating Officer of the Company and the Bank and as a member of the Board of Directors. Ms. Gouw served as Executive Vice President and Chief Financial Officer of the Company and the Bank from 1994 until April 2008. In April 2008, she became the Vice Chairman of the Board of Directors of the Company and the Bank and the Chief Risk Officer of the Bank. Ms. Gouw retired from her position as Chief Risk Officer of the Bank at the end of 2008 and rejoined the Bank in December 2009 as President and Chief Operating Officer. Prior to joining East West in 1989, Ms. Gouw was a Senior Audit Manager with KPMG LLP. Ms. Gouw serves on the boards of Pacific Mutual Holding Company and Pacific LifeCorp.

**Ming Lin Chen** serves as Executive Vice President and Director of International and Loan Administration. Ms. Chen joined East West Bank in 2004 as Senior Vice President and Senior Relationship Manager and was promoted to her current position in 2009. Prior to joining East West Bank, Ms. Chen was Senior Vice President and Corporate Secretary of General Bank and General Bancorp. She held several management positions including international banking, commercial and SBA lending, marketing and branch operations during her 19 years with General Bank.

Edgar Filing: EAST WEST BANCORP INC - Form 10-K

**William H. Fong** serves as Executive Vice President and Head of the Bank's Northern California Commercial Lending Division. Mr. Fong joined East West Bank in April 2006 from United Commercial Bank where he was the Head of Commercial Banking. Prior to this, Mr. Fong spent 23 years with Bank of the West. As Executive Vice President, he was responsible for Pacific Rim Banking's corporate banking team in Bank of the West. Mr. Fong serves as a director on the boards of Cal-Asia Business Council and Hong Kong Association of Northern California.

Table of Contents

**Karen Fukumura** serves as Executive Vice President and Head of the Bank's Retail Banking Division. Prior to joining East West Bank in April 2008, Ms. Fukumura was a Senior Vice President with Bank of America and held several transformational leadership roles within the Consumer Bank and Service & Fulfillment Operations. Additionally, Ms. Fukumura has seven years of management and technology consulting experience in Asia, and previously held sales and manufacturing operations roles within Mobil Oil and Xerox Corporation, respectively.

**John R. Hall** serves as Executive Vice President and Chief Credit Officer of East West Bank. Mr. Hall joined the Bank in 2010, after serving six years as Regional Vice President/Senior Vice President of Commercial Banking for Wells Fargo Bank in the Los Angeles area. Mr. Hall spent 22 years at Wells Fargo and its predecessor bank, Norwest Bank, in various commercial banking management positions. Mr. Hall has over 35 years experience in the middle market lending and various specialized industry groups within commercial banking. He also serves as a member of the Board of Governors at Cedars-Sinai Medical Center in Los Angeles.

**Douglas P. Krause** serves as Executive Vice President, Chief Risk Officer, General Counsel, and Corporate Secretary of East West Bancorp, Inc. and East West Bank. Prior to joining the Bank in 1996, Mr. Krause was General Counsel of Metrobank from 1991 to 1996. Mr. Krause started his career with the law firms of Dewey & LeBoeuf and Jones, Day, Reavis and Pogue where he specialized in financial services. Mr. Krause also serves as commissioner on the governing board and as Chairman of the Audit Committee of the Port of Los Angeles. He also serves on the executive committee and project committee of the I-710 Project.

**Marty Newton** serves as Executive Vice President and Head of Commercial Banking Services. Mr. Newton joined East West Bank in early 2011. Before joining the Bank, Mr. Newton spent the majority of his career with Wells Fargo Bank in a variety of positions as well as several years with Bank of America. Mr. Newton has twenty five years of commercial and retail banking experience in management, sales and training.

**Irene H. Oh** serves as Executive Vice President and Chief Financial Officer of East West Bancorp, Inc. and East West Bank. Ms. Oh joined the Bank in 2004. Prior to being promoted to Chief Financial Officer, Ms. Oh served as Senior Vice President and Director of Corporate Finance. A CPA, she began her financial career in 1999 with Deloitte & Touche in Los Angeles and spent two years with Goldman Sachs.

**Bennett Pozil** serves as Executive Vice President and Senior Manager Director of Capital Markets. Prior to joining East West Bank in April 2011, Mr. Pozil served 11 years as the Managing Director of the Los Angeles office for Natixis. Mr. Pozil is active in the Los Angeles community, serving on the Boards of the Music Center of Los Angeles and the Asia Society's Southern California Chapter.

**Lawrence B. Schiff** serves as Executive Vice President and Director of Credit Risk Management. Mr. Schiff joined East West Bank in 2010, after serving for several years as Director of National Credit Risk Management at KPMG and as a Group Vice President in SunTrust Bank's Credit Risk Management Division. Mr. Schiff spent the majority of his career as a commercial bank examiner with the Federal Reserve System, both in Washington, DC and in New York. Mr. Schiff is a board member of the City of Hope Hospital's LA Real Estate Council.

**James T. Schuler** serves as Executive Vice President and Chief Human Resources Officer of East West Bank. Mr. Schuler joined the Bank in mid 2010, after serving more than 25 years with Avery Dennison where he was instrumental in transforming Avery into an integrated global corporation. Mr. Schuler has a wealth of human resources experience as well as extensive experience working throughout the Asia Pacific

Region.

**Sue Yang** serves as Executive Vice President, Head of Greater China and Corporate Strategy. Prior to joining East West Bank in November 2011, Ms. Yang was a senior executive at Bank of America from 1997 to 2011. Ms. Yang held various senior positions at Bank of America, including Chief Risk Officer for Global Wealth and Investment Management and Corporate Strategy Executive of Global Corporate Strategy. Ms. Yang also oversaw Bank of America's investment in China Construction Bank Corporation and served on the China Construction Bank Corporation Board of Directors from 2010 to 2011.

**Andy Yen** serves as Executive Vice President and Director of the Business Banking Division. Mr. Yen joined the Bank in September 2005 through its merger with United National Bank ( UNB ). Before being promoted to President of UNB in 2001, Mr. Yen was the Executive Vice President from 1998 to 2000 and Senior Vice President from 1992 to 1997, overseeing both the operations and lending functions of UNB. Mr. Yen also served as a member of the Board of Directors of UNB from 1992 to 2005. Mr. Yen has over 28 years experience in commercial and real estate lending and also held positions at Tokai Bank of California and Trans National Bank before he joined UNB.

Table of Contents

**ITEM 1A. RISK FACTORS**

*Risk Factors That May Affect Future Results*

Together with the other information on the risks we face and our management of risk contained in this Annual Report or in our other SEC filings, the following presents significant risks which may affect us. Events or circumstances arising from one or more of these risks could adversely affect our business, financial condition, operating results, cash flows and prospects, and the value and price of our common stock could decline. The risks identified below are not intended to be a comprehensive list of all risks we face and additional risks that we may currently view as not material may also impair our business operations and results.

***Recent changes in banking regulation may adversely affect our business.*** Regulation of the financial services industry continues to undergo major changes. Dodd-Frank significantly revises and expands the rulemaking, supervisory and enforcement authority of federal bank regulators. Dodd-Frank addresses many areas which may affect our operations and costs immediately or in the future. Among other provisions, Dodd-Frank:

- imposes new capital requirements on bank holding companies and eliminates certain trust preferred securities from Tier 1 capital;
- expands the FDIC's authority to raise insurance premiums and permanently raises the current standard deposit insurance limit to \$250,000;
- extended until January 1, 2013, the insurance of all noninterest-bearing and transaction;
- allows financial institutions to pay interest on business checking accounts;
- authorizes nationwide interstate branching for banks;
- limits interchange fees payable on debit card transactions;
- establishes the CFPB to promulgate and enforce consumer protection regulations relating to financial products that would affect banks and nonbank finance companies;
- contains provisions that affect corporate governance and executive compensation;
- restricts proprietary trading by financial institutions, their owning or sponsoring hedge and private equity funds, and regulates the derivatives activities of banks and their affiliates.

The CFPB has adopted revisions to Regulation Z, which implements the Truth in Lending Act, pursuant to Dodd-Frank. The revisions will take effect on January 10, 2014 and apply to all consumer mortgages (except home equity lines of credit, timeshare plans, reverse mortgages, or temporary loans). The revisions mandate specific underwriting criteria for home loans in order for creditors to make a reasonable, good faith determination of a consumer's ability to repay and establish certain protections from liability under this requirement for qualified mortgages

meeting certain standards. This may impact our underwriting of single family residential loans and the resulting unknown effect on potential delinquencies. In particular, the revisions when they take effect will prevent us from making no documentation and low documentation home loans, because the rules require determining a consumer's ability to pay based in part on verified and documented information. Low documentation loans represent a substantial portion of our single family residential loan portfolio. Accordingly, these new provisions may adversely affect the growth in the residential loan portfolio.

***We may be subject to more stringent capital requirements.*** Dodd-Frank phases out over a prescribed period of time certain trust preferred securities from Tier 1 capital and allows the federal banking agencies to establish minimum leverage and risk-based capital requirements that will apply to both insured banks and their holding companies. In the case of certain trust preferred securities issued prior to May 19, 2010 by bank holding companies with total consolidated assets of \$15 billion or more as of December 31, 2009, these regulatory capital deductions are being implemented incrementally over a period of three years which commenced in January 2013. Dodd-Frank also requires the federal banking agencies to establish minimum leverage and risk-based capital requirements that will apply to both insured banks and their holding companies.

Table of Contents

***Difficult economic and market conditions have adversely affected our industry.*** Since 2007, negative developments in the housing market, including decreased home prices and increased delinquencies and foreclosures by comparison with pre-recession levels, have negatively impacted the credit performance of mortgage and construction loans and have resulted in significant write-downs of assets by many financial institutions, including the Bank. In addition, the values of real estate collateral supporting many loans declined and may continue to decline. The impact on the Bank of the negative credit cycle has shown signs of stabilization. However, the overall economic environment remains problematic with high unemployment rates, reduced general spending, and decreased lending by financial institutions to their customers and to each other. Also, competition among depository institutions for deposits has continued to remain at heightened levels as compared to pre-recession times. Bank and bank holding company stock prices have been negatively affected as has the ability of banks and bank holding companies to raise capital or borrow in the debt markets compared to past years. A worsening of these conditions would likely exacerbate the adverse effects of these difficult market conditions on us and others in the financial institutions industry. In particular, we may face the following risks in connection with these events:

- We face increased regulation of our industry including heightened legal standards and regulatory requirements or expectations imposed in connection with Dodd-Frank. Compliance with such regulation may increase our costs and limit our ability to pursue business opportunities.
- The process we use to estimate losses inherent in our credit exposure requires difficult, subjective and complex judgments, including forecasts of economic conditions and how these economic conditions might impair the ability of our borrowers to repay their loans. The level of uncertainty concerning economic conditions may adversely affect the accuracy of our estimates which may, in turn, impact the reliability of the process.
- The Company's commercial and residential borrowers may be unable to make timely repayments of their loans, or the decrease in value of real estate collateral securing the payment of such loans could result in significant credit losses, increased delinquencies, foreclosures and customer bankruptcies, any of which could have a material adverse effect on the Company's operating results.
- The value of the portfolio of investment securities that we hold may be adversely affected by increasing interest rates and defaults by debtors.
- Future disruptions in the capital markets or other events, including actions by rating agencies and deteriorating investor expectations, may result in an inability to borrow on favorable terms or at all from other financial institutions.
- Increased competition among financial services companies due to the recent consolidation of certain competing financial institutions and the conversion of certain investment banks to bank holding companies may adversely affect the Company's ability to market its products and services.

***Adverse conditions in Asia could adversely affect our business.*** A substantial number of our customers have economic and cultural ties to Asia. Additionally, we have three representative offices in China located in Beijing, Guangzhou and Shenzhen and one in Taipei, Taiwan, and one full-service branch in Hong Kong and two full-service branches in China. As a result, our business and results of operations may be impacted by adverse economic and political conditions in Asia and, in particular, in China. Volatility in the Shanghai and Hong Kong stock exchanges and/or a potential dramatic fall in real estate prices in China, among other things, may negatively impact asset values and the profitability and liquidity of our customers who operate in this region. Pandemics and other public health crises or concerns over the possibility of such crises could create economic and financial disruptions in the region. United States and global economic policies, military tensions, and unfavorable global economic conditions may also adversely impact the Asian economies. Transfer risk may result when an entity is unable to obtain the foreign exchange needed to meet its obligations or to provide liquidity. This may adversely impact the recoverability of investments with or loans made to such entities.

***Increased deposit insurance costs and changes in deposit regulation may adversely affect our results of operations.*** As a result of recent economic conditions and the enactment of Dodd-Frank, the FDIC has increased the deposit insurance assessment rates in recent years and thus raised deposit premiums for insured depository institutions. If these increases are insufficient for the Deposit Insurance Fund to meet its funding requirements, further special assessments or increases in deposit insurance premiums may be required which we may be required to pay. We are generally unable to control the amount of premiums that we are required to pay for FDIC insurance. If there are additional bank or financial institution failures, we may be required to pay even higher FDIC premiums than the recently increased levels. Any future additional assessments, increases or required prepayments in FDIC insurance premiums may materially adversely affect our results of operations. As of January 1, 2013, the *Transaction Account Guarantee Program*, ended. This ended the temporary unlimited insurance on non-interest bearing demand deposit accounts from the FDIC. The end of this insurance may cause a decrease in our deposit balances.

Table of Contents

***United States and international financial markets and economic conditions, particularly in California, could adversely affect our liquidity, results of operations and financial condition.*** Although the Company and the Bank remain well capitalized and have not suffered any significant liquidity issues as a result of the recent economic downturn, the cost and availability of funds may be adversely impacted by illiquid credit markets and the demand for our products and services may be impacted as our borrowers and customers continue to experience the impact of the recent economic slowdown and recession. In view of the concentration of our operations and the collateral securing our loan portfolio primarily in Northern and Southern California, we may be particularly susceptible to the adverse economic conditions in the state of California, where our business is concentrated. In addition, the duration of the current economic conditions is unknown and may exacerbate the Company's exposure to credit risk and adversely affect the ability of borrowers to perform under the terms of their lending arrangements with us. Any turbulence in the United States and international markets and economy may adversely affect our liquidity, financial condition, results of operations and profitability.

***We may be required to make additional provisions for loan losses and charge off additional loans in the future, which could adversely affect our results of operations.*** During the year ended December 31, 2012, we recorded a \$60.2 million provision for loan losses on non-covered loans and charged off \$58.4 million, gross of \$16.2 million in recoveries on non-covered loans. The Bank has a concentration of real estate loans in California, including the areas of Los Angeles, Riverside, San Bernardino and Orange counties. Potential further deterioration in the real estate market generally and residential homes in particular could result in additional loan charge-offs and provisions for loan losses in the future, which could have a material adverse effect on the Company's financial condition, net income and capital.

***Our allowance for loan losses may not be adequate to cover actual losses.*** A significant source of risk arises from the possibility that we could sustain losses because borrowers, guarantors, and related parties may fail to perform in accordance with the terms of their loans. The underwriting and credit monitoring policies and procedures that we have adopted to address this risk may not prevent unexpected losses that could have a material adverse effect on our business, financial condition, results of operations and cash flows. We maintain an allowance for loan losses to provide for loan defaults and nonperformance. The allowance is also appropriately increased for new loan growth. While we believe that our allowance for loan losses is adequate to cover current losses, we cannot assure you that we will not increase the allowance for loan losses further.

***Liquidity risk could impair our ability to fund operations and jeopardize our financial condition.*** Liquidity is essential to our business. An inability to raise funds through deposits, borrowings, the sale of loans and other sources could have a material adverse effect on our liquidity. Our access to funding sources in amounts adequate to finance our activities could be impaired by factors that affect us specifically or the financial services industry in general. Factors that could detrimentally impact our access to liquidity sources include a decrease in the level of our business activity due to a market downturn or adverse regulatory action against us. Our ability to acquire deposits or borrow could also be impaired by factors that are not specific to us, such as a severe disruption of the financial markets or negative views and expectations about the prospects for the financial services industry as a whole as a result of conditions faced by banking organizations in the domestic and worldwide credit markets.

***The actions and commercial soundness of other financial institutions could affect the Company's ability to engage in routine funding transactions.*** Financial service institutions are interrelated as a result of trading, clearing, counterparty or other relationships. The Company has exposure to different industries and counterparties, and executes transactions with various counterparties in the financial industry, including brokers and dealers, commercial banks, investment banks, mutual and hedge funds, and other institutional clients. Defaults by financial services institutions, and even questions about one or more financial services institutions or the financial services industry in general, have led to market wide liquidity problems and could lead to losses or defaults by the Company or by other institutions. Many of these transactions expose the Company to credit risk in the event of default of its counterparty or client. In addition, the Company's credit risk may increase when the underlying collateral held cannot be realized or is liquidated at prices not sufficient to recover the full amount of the loan or derivative exposure due to the Company. Any such losses could materially and adversely affect the Company's results of operations.

*A portion of our loan portfolio is secured by real estate and thus we have a higher degree of risk from a downturn in our real estate markets.* A further decline in our real estate markets could hurt our business because many of our loans are secured by real estate. Real estate values and real estate markets are generally affected by changes in national, regional or local economic conditions, fluctuations in interest rates and the availability of loans to potential purchasers, changes in tax laws and other governmental statutes, regulations and policies and acts of nature, such as earthquakes and national disasters particular to California. A significant portion of our real estate collateral is located in California. If real estate values decline further, the value of real estate collateral securing our loans could be significantly reduced. Our ability to recover on defaulted loans by foreclosing and selling the real estate collateral would then be diminished and we would be more likely to suffer losses on defaulted loans. Furthermore, a significant portion of our loan portfolio is comprised of commercial real estate. Commercial real estate and multifamily loans typically involve large balances to single borrowers or groups of related borrowers. Since payments on these loans are often dependent on the successful operation or management of the properties, as well as the business and financial condition of the borrower, repayment of such loans may be subject to adverse conditions in the real estate market, adverse economic conditions or changes in applicable government regulations. Borrowers' inability to repay such loans may have an adverse affect on our business.

Table of Contents

***Our business is subject to interest rate risk and variations in interest rates may negatively affect our financial performance.*** A substantial portion of our income is derived from the differential or spread between the interest earned on loans, investment securities and other interest-earning assets, and the interest paid on deposits, borrowings and other interest-bearing liabilities. Because of the differences in the maturities and repricing characteristics of our interest-earning assets and interest-bearing liabilities, changes in interest rates do not produce equivalent changes in interest income earned on interest-earning assets and interest paid on interest-bearing liabilities. Significant fluctuations in market interest rates could materially and adversely affect not only our net interest spread, but also our asset quality and loan origination volume.

***We are subject to extensive government regulation that could limit or restrict our activities, which, in turn, may hamper our ability to increase our assets and earnings.*** Our operations are subject to extensive regulation by federal, state and local governmental authorities and are subject to various laws and judicial and administrative decisions imposing requirements and restrictions on part or all of our operations. Because our business is highly regulated, the laws, rules, regulations and supervisory guidance and policies applicable to us are subject to regular modification and change. From time to time, various laws, rules and regulations are proposed, which, if adopted, could impact our operations by making compliance much more difficult or expensive, restricting our ability to originate or sell loans or further restricting the amount of interest or other charges or fees earned on loans or other products.

***Failure to manage our growth may adversely affect our performance.*** Our financial performance and profitability depend on our ability to manage our possible future growth. Future acquisitions and our continued growth may present operating, integration and other issues that could have a material adverse effect on our business, financial condition, results of operations and cash flows.

***We could be liable for breaches of security in our online banking services. Fear of security breaches could limit the growth of our online services.*** We offer various Internet-based services to our clients, including online banking services. The secure transmission of confidential information over the Internet is essential to maintain our clients' confidence in our online services. Advances in computer capabilities, new discoveries or other developments could result in a compromise or breach of the technology we use to protect client transaction data. In addition, individuals may seek to intentionally disrupt our online banking services or compromise the confidentiality of customer information with criminal intent. Although we have developed systems and processes that are designed to prevent security breaches and periodically test our security, failure to mitigate breaches of security could adversely affect our ability to offer and grow our online services, result in costly litigation and loss of customer relationships and could have an adverse effect on our business.

***Our controls and procedures could fail or be circumvented.*** Management regularly reviews and updates our internal controls, disclosure controls and procedures and corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and can provide only reasonable, but not absolute, assurances of the effectiveness of these systems and controls, and that the objectives of these controls have been met. Any failure or circumvention of our controls and procedures, and any failure to comply with regulations related to controls and procedures could adversely affect our business, results of operations and financial condition.

***We face strong competition from financial services companies and other companies that offer banking services.*** We conduct the majority of our operations in California. The banking and financial services businesses in California are highly competitive and increased competition in our primary market area may adversely impact the level of our loans and deposits. Ultimately, we may not be able to compete successfully against current and future competitors. These competitors include national banks, regional banks and other community banks. We also face competition from many other types of financial institutions, including savings and loan associations, finance companies, brokerage firms, insurance companies, credit unions, mortgage banks and other financial intermediaries. In particular, our competitors include major financial companies whose greater resources may afford them a marketplace advantage by enabling them to maintain numerous locations and mount extensive promotional and advertising campaigns. Areas of competition include interest rates for loans and deposits, efforts to obtain loan and deposit customers and a range in quality of products and services provided, including new technology-driven products and services. If we are unable to attract and retain banking customers, we may be unable to continue our loan growth and level of deposits.

*If we cannot attract deposits, our growth may be inhibited.* Our ability to increase our deposit base depends in large part on our ability to attract additional deposits at favorable rates. We seek additional deposits by offering deposit products that are competitive with those offered by other financial institutions in our markets.

Table of Contents

***We rely on communications, information, operating and financial control systems technology from third party service providers, and we may suffer an interruption in those systems.*** We rely heavily on third party service providers for much of our communications, information, operating and financial control systems technology, including our online banking services and data processing systems. Any failure or interruption of these services or systems or breaches in security of these systems could result in failures or interruptions in our customer relationship management, general ledger, deposit, servicing, and/or loan origination systems. The occurrence of any failures or interruptions may require us to identify alternative sources of such services, and we cannot assure you that we could negotiate terms that are as favorable to us, or could obtain services with similar functionality as found in our existing systems without the need to expend substantial resources, if at all.

***We are dependent on key personnel and the loss of one or more of those key personnel may materially and adversely affect our prospects.*** Competition for qualified employees and personnel in the banking industry is intense and there is a limited number of qualified persons with knowledge of, and experience in, the regional banking industry, specially the West Coast market. The process of recruiting personnel with the combination of skills and attributes required to carry out our strategies is often lengthy. Our success depends to a significant degree upon our ability to attract and retain qualified management, loan origination, finance, administrative, marketing, and technical personnel, and upon the continued contributions of our management and personnel. In particular, our success has been and continues to be highly dependent upon the abilities of key executives, including our Chief Executive Officer and our President/Chief Operating Officer, and certain other employees.

***Managing reputational risk is important to attracting and maintaining customers, investors and employees.*** Threats to the Company's reputation can come from many sources, including unethical practices, employee misconduct, failure to deliver minimum standards of service or quality, compliance deficiencies, and questionable or fraudulent activities of our customers. We have policies and procedures in place to protect our reputation and promote ethical conduct, but these policies and procedures may not be fully effective. Negative publicity regarding our business, employees, or customers, with or without merit, may result in the loss of customers, investors and employees, costly litigation, a decline in revenues and increased governmental regulation.

***Laws may restrict our ability to pay dividends.*** The ability of the Bank to pay dividends to the Company is limited by California law and the FRB. The Company's ability to pay dividends on its outstanding stock is limited by Delaware law. The FRB and the DFI have authority to prohibit the Bank from engaging in business practices which are considered to be unsafe or unsound. Depending upon the financial condition of the Bank and upon other factors, the FRB or DFI could assert that payments of dividends or other payments by the Bank might be such an unsafe or unsound practice. For complete discussion and disclosure see Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources presented elsewhere in this report.

***The terms of our outstanding preferred stock limit our ability to pay dividends on and repurchase our common stock, and there can be no assurance of any future dividends on our common stock.*** The terms of our outstanding Series A preferred stock have limitations on our ability to redeem or repurchase our common stock. In addition, we are unable to pay any dividends on our common stock unless we are current in our dividend payments on the Series A preferred stock. These restrictions, together with the potentially dilutive impact of the common stock issuable upon conversion of the Series A preferred stock, described below, could have a negative effect on the value of our common stock. Moreover, holders of our common stock are entitled to receive dividends only when, as and if declared by our Board of Directors. Although we have historically paid cash dividends on our common stock, we are not required to do so. For complete discussion and disclosure see Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources presented elsewhere in this report.

***Our outstanding preferred stock impacts net income available to our common stockholders and earnings per common share, and the potential issuances of equity securities may be dilutive to holders of our common stock.*** The dividends declared on our outstanding preferred stock reduce the net income available to common stockholders and our earnings per common share. Our outstanding preferred stock will also receive preferential treatment in the event of liquidation, dissolution or winding up of the Company. In addition, to the extent shares of our Series A preferred stock are converted, or options to purchase common stock under our employee and director stock option plans are exercised,

holders of our common stock will incur additional dilution. Further, if we sell additional equity or convertible debt securities, such sales could result in increased dilution to our stockholders.

Table of Contents

***The price of our common stock may be volatile or may decline.*** The trading price of our common stock may fluctuate as a result of a number of factors, many of which are outside our control. In addition, the stock market is subject to fluctuations in the share prices and trading volumes that affect the market prices of the shares of many companies. These broad market fluctuations could adversely affect the market price of our common stock. Among the factors that could affect our stock price are:

- actual or anticipated quarterly fluctuations in our operating results and financial condition;
- changes in revenue or earnings estimates or publication of research reports and recommendations by financial analysts;
- failure to meet analysts' revenue or earnings estimates;
- speculation in the press or investment community;
- strategic actions by us or our competitors, such as acquisitions or restructurings;
- actions by institutional stockholders;
- fluctuations in the stock price and operating results of our competitors;
- general market conditions and, in particular, developments related to market conditions for the financial services industry;
- proposed or adopted regulatory changes or developments;
- anticipated or pending investigations, proceedings or litigation that involve or affect us; or
- domestic and international economic factors unrelated to our performance.

The stock market and, in particular, the market for financial institution stocks, has experienced significant volatility during the past couple of years. As a result, the market price of our common stock may be volatile. In addition, the trading volume in our common stock may fluctuate more than usual and cause significant price variations to occur. The trading price of the shares of our common stock and the value of our other securities will depend on many factors, which may change from time to time, including, without limitation, our financial condition, performance, creditworthiness and prospects, and future sales of our equity or equity-related securities. In some cases, the markets have produced downward pressure on stock prices and credit availability for certain issuers without regard to those issuers' underlying financial strength. A significant decline in our stock price could result in substantial losses for individual stockholders and could lead to costly and disruptive securities litigation.

***Anti-takeover provisions could negatively impact our stockholders.*** Provisions of Delaware law and of our certificate of incorporation, as amended, and bylaws could make it more difficult for a third party to acquire control of us or have the effect of discouraging a third party from attempting to acquire control of us. For example, our certificate of incorporation requires the approval of the holders of at least two-thirds of our outstanding shares of voting stock to approve certain business combinations. We are subject to Section 203 of the Delaware General Corporation Law, which would make it more difficult for another party to acquire us without the approval of our Board of Directors. Additionally, our certificate of incorporation, as amended, authorizes our Board of Directors to issue preferred stock and preferred stock could be issued as a defensive measure in response to a takeover proposal. These and other provisions could make it more difficult for a third party to acquire us even if an acquisition might be in the best interest of our stockholders.

***Natural disasters and geopolitical events beyond our control could adversely affect us.*** Natural disasters such as earthquakes, wildfires, extreme weather conditions, hurricanes, floods, and other acts of nature and geopolitical events involving terrorism or military conflict could adversely affect our business operations and those of our customers and cause substantial damage and loss to real and personal property. These natural disasters and geopolitical events could impair our borrowers' ability to service their loans, decrease the level and duration of deposits by customers, erode the value of loan collateral, and result in an increase in the amount of our nonperforming loans and a higher level of nonperforming assets (including real estate owned), net charge-offs, and provision for loan losses, which could adversely affect our earnings.

***Our interest expense may increase following the repeal of the federal prohibition on payment of interest on demand deposits.*** The federal prohibition on the ability of financial institutions to pay interest on demand deposit accounts was repealed as part of Dodd-Frank. As a result, beginning on July 21, 2011, financial institutions could commence offering interest on demand deposits to compete for clients. Our interest expense will increase and our net interest margin will decrease if the Bank begins offering interest on demand deposits to attract additional customers or maintain current customers, which could have a material adverse effect on our financial condition, net income and results of operations.

***We have engaged in and may continue to engage in further expansion through acquisitions, which could negatively affect our business and earnings.*** There are risks associated with expansion through acquisitions. These risks include, among others, incorrectly assessing the asset quality of a bank acquired in a particular transaction, encountering greater than anticipated costs in integrating acquired businesses, facing resistance from customers or employees, and being unable to profitably deploy assets acquired in the transaction. Additional country- and region-specific risks are associated with transactions outside the United States, including in China. To the extent we issue capital stock in connection with additional transactions, these transactions and related stock issuances may have a dilutive effect on earnings per share and share ownership.

Table of Contents

*We may experience difficulty in managing the loan portfolios acquired through FDIC-assisted acquisitions, which are within the limits of the loss protection provided by the FDIC.* The Bank entered into shared-loss agreements with the FDIC that covered most of UCB's and all of WFIB's loans and other real estate owned, respectively. East West Bank shares in the losses, beginning with the first dollar of loss occurred, of the loans (including single-family residential mortgage loans, commercial loans, foreclosed loan collateral and other real estate owned) covered (covered loans) under the shared-loss agreements. Pursuant to the terms of the shared-loss agreements, the FDIC is obligated to reimburse East West Bank 80% of eligible losses with respect to covered loans. East West Bank has a corresponding obligation to reimburse the FDIC for 80% of eligible recoveries with respect to covered loans.

The shared-loss agreements for commercial and single-family residential mortgage loans are in effect for 5 years and 10 years, respectively, from the acquisition date and the loss recovery provisions are in effect for 8 years and 10 years, respectively, from the acquisition date. Ten years after acquisition date, East West Bank is required to pay the FDIC 50% of the excess, if any, of specific amounts stated in the original agreements for each acquisition respectively. Although we have substantial expertise in asset resolution, we cannot guarantee that we will be able to adequately manage the loan portfolio within the limits of the loss protection provided by the FDIC. Failure to comply with the requirements of the shared-loss agreements could result in loss of indemnification by the FDIC. Additionally, the Bank is subject to audits by the FDIC, through its designated agent, under the terms of the shared-loss agreements. The required terms of the shared-loss agreements are extensive and failure to comply with any of the guidelines could result in a potential specific asset or group of assets losing indemnification.

*The number of delinquencies and defaults in residential mortgages have created a backlog in U.S. courts and may lead to an increase in the amount of legislative action that might restrict or delay our ability to foreclose and, therefore, delay the collection of payments for single-family residential loans.* Collateral-based loans on which the Bank forecloses could be delayed by an extended foreclosure process, including delays resulting from a court backlog, local or national foreclosure moratoriums or other delays, and these delays could negatively impact our results of operations. Homeowner protection laws may also delay the initiation or completion of foreclosure proceedings on specified types of residential mortgage loans. Any such limitations are likely to cause delayed or reduced collections. Significant restrictions on our ability to foreclose on loans, requirements that we forgo a portion of the amount otherwise due on a loan or requirements that we modify a significant number of original loan terms could negatively impact our business, financial condition, liquidity and results of operations.

**ITEM 1B. UNRESOLVED STAFF COMMENTS**

None.

**ITEM 2. PROPERTIES**

The Company currently neither owns nor leases any real or personal property. The Company uses the premises, equipment, and furniture of the Bank. The Agency also currently conducts its operations in one of the administrative offices of the Bank. The Company is currently reimbursing the Bank for the Agency's use of this facility.

The Bank owns the buildings and land at 31 of its retail branch offices. Three of these retail branch locations are either attached or adjacent to offices that are being used by the Bank to house various administrative departments. All other branch and administrative locations are leased by the Bank, with lease expiration dates ranging from 2013 to 2023, exclusive of renewal options.

The Company believes that its existing facilities are adequate for its present purposes. The Company believes that, if necessary, it could secure alternative facilities on similar terms without adversely affecting its operations.

At December 31, 2012, the Bank's consolidated investment in premises and equipment, net of accumulated depreciation and amortization, totaled \$107.5 million. Total occupancy expense, inclusive of rental payments and furniture and equipment expense, for the year ended December 31, 2012 was \$55.5 million. Total annual rental expense (exclusive of operating charges and real property taxes) was approximately \$25.8 million during 2012.

Table of Contents**ITEM 3. LEGAL PROCEEDINGS**

Certain lawsuits and claims arising in the ordinary course of business have been filed or are pending against us or our affiliates. Where appropriate, we establish reserves in accordance with ASC 450, *Contingencies*. The outcome of litigation and other legal and regulatory matters is inherently uncertain, however, and it is possible that one or more of the legal or regulatory matters currently pending or threatened could have a material adverse effect on our liquidity, consolidated financial position, and/or results of operations.

**ITEM 4. MINE SAFETY DISCLOSURES**

Not applicable.

**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES***Market Information*

Our common stock is traded on the NASDAQ Global Select Market under the symbol EWBC. The following table sets forth the range of sales prices and dividend information for the Company's common stock for the years ended December 31, 2012 and 2011.

	2012		Dividends
	High	Low	
First quarter	\$ 24.39	\$ 19.58	\$0.10 cash dividend
Second quarter	23.49	20.71	\$0.10 cash dividend
Third quarter	24.10	20.97	\$0.10 cash dividend
Fourth quarter	22.16	19.68	\$0.10 cash dividend

	2011		Dividends
	High	Low	
First quarter	\$ 23.79	\$ 19.30	\$0.01 cash dividend
Second quarter	23.37	17.97	\$0.05 cash dividend
Third quarter	20.65	14.31	\$0.05 cash dividend
Fourth quarter	20.19	13.94	\$0.05 cash dividend

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

The closing price of our common stock on January 31, 2013 was \$23.45 per share, as reported by the NASDAQ Global Select Market.

As of January 31, 2013, 140,126,005 shares of the Company's common stock were held by 2,704 stockholders of record.

For information on the statutory and regulatory limitations on the ability of the Company to pay dividends to its stockholders and on the Bank to pay dividends to East West, see Item 1. BUSINESS - Supervision and Regulation - Dividends and Other Transfers of Funds and Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Cash Flow presented elsewhere in this report.

### *Stock Performance Graph*

The following graph shows a comparison of stockholder return on the Company's common stock based on the market price of the common stock assuming the reinvestment of dividends, with the cumulative total returns for the companies in the Standard & Poor's 500 Index and the SNL Western Bank Index for the 5-year period beginning on December 31, 2007 through December 31, 2012. This graph is historical only and may not be indicative of possible future performance of the Company's common stock. The information set forth under the heading "Stock Performance Graph" shall not be deemed soliciting material or to be filed with the Commission except to the extent we specifically request that such information be treated as soliciting material or specifically incorporate it by reference into a filing under the Securities Exchange Act of 1934, as amended, or the Securities Act of 1933, as amended.

*Purchases of Equity Securities by the Issuer and Affiliated Purchasers*

On January 19, 2012, it was announced that the Company's Board of Directors authorized a stock repurchase program to buy back up to \$200.0 million of the Company's common stock. The Company completed the authorized repurchase program during the third quarter of 2012, repurchasing 9,068,105 shares at a total cost of \$199.9 million. The following summarizes share repurchase activities during the fourth quarter of 2012:

Total	Total Number of Shares Purchased as	Approximate Dollar Value in Millions of Shares that May
-------	---	--

(1) 2012, 2011 and 2010 include other-than-temporary ( OTTI ) charges relating to investment securities of \$99 thousand, \$633 thousand and \$16.7 million, respectively, and pre-tax gain on acquisition of \$22.9 million and \$471.0 million during 2010 and 2009, respectively.

(2) Represents noninterest expense, excluding the amortization of intangibles, amortization and impairment write-downs of premiums on deposits acquired, impairment write-down on goodwill, amortization of investments in affordable housing partnerships and other investments, and prepayment penalties for FHLB advances and other borrowings, divided by the aggregate of net interest income before provision for loan losses and noninterest income, excluding impairment write-downs on investment securities and other equity investments.

Table of Contents

**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion provides information about the results of operations, financial condition, liquidity, and capital resources of East West Bancorp, Inc. and its subsidiaries. This information is intended to facilitate the understanding and assessment of significant changes and trends related to our financial condition and the results of our operations. This discussion and analysis should be read in conjunction with our consolidated financial statements and the accompanying notes presented elsewhere in this report.

**Critical Accounting Policies**

Our financial statements are prepared in accordance with accounting principles generally accepted in the United States of America and general practices within the banking industry. The financial information contained within these statements is, to a significant extent, financial information that is based on approximate measures of the financial effects of transactions and events that have already occurred. All of our significant accounting policies are described in Note 1 to our consolidated financial statements presented elsewhere in this report and are essential to understanding Management's Discussion and Analysis of Financial Condition and Results of Operations. Various elements of our accounting policies, by their nature, are inherently subject to estimation techniques, valuation assumptions and other subjective assessments. In addition, certain accounting policies require significant judgment in applying complex accounting principles to individual transactions to determine the most appropriate treatment. We have established procedures and processes to facilitate making the judgments necessary to prepare financial statements.

The following is a summary of the more judgmental and complex accounting estimates and principles. In each area, we have identified the variables most important in the estimation process. We have used the best information available to make the estimations necessary to value the related assets and liabilities. Actual performance that differs from our estimates and future changes in the key variables could change future valuations and impact net income.

*Fair Value of Financial Instruments*

Fair value is the price that could be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. Based on the observability of the inputs used in the valuation techniques, we classify our financial assets and liabilities measured and disclosed at fair value in accordance with a three-level hierarchy (i.e., Level 1, Level 2 and Level 3). Fair value determination requires that we make a number of significant judgments. In determining the fair value of financial instruments, we use market prices of the same or similar instruments whenever such prices are available. We do not use prices involving distressed sellers in determining fair value. If observable market prices are unavailable or impracticable to obtain, then fair value is estimated using modeling techniques such as discounted cash flow analyses. These modeling techniques incorporate our assessments regarding assumptions that market participants would use in pricing the asset or the liability, including assumptions about the risks inherent in a particular valuation technique and the risk of nonperformance.

Fair value is used on a recurring basis for certain assets and liabilities in which fair value is the primary basis of accounting. Additionally, fair value is used on a nonrecurring basis to evaluate assets or liabilities for impairment or for disclosure purposes in accordance with ASC 825, *Financial Instruments*.

*Investment Securities*

The accounting for investment securities are discussed in detail in Note 1 to the Company's consolidated financial statements presented elsewhere in this report. The fair values of the investment securities are generally determined by independent external pricing service providers who have experience in valuing these securities and by comparison to and/or average of quoted market prices obtained from independent external brokers. In obtaining such valuation information from third parties, the Company has evaluated the methodologies used to develop the resulting fair values. The Company performs a monthly analysis on the broker quotes and pricing service values received from third parties to ensure that the prices represent a reasonable estimate of the fair value. The procedures include, but are not limited to, initial and on-going review of third party pricing methodologies, review of pricing trends, and monitoring of trading volumes. The Company ensures prices received from independent brokers represent a reasonable estimate of fair value through the use of internal and external cash flow models developed based on spreads and, when available, market indices. As a result of this analysis, if the Company determines there is a more appropriate fair value based upon the available market data, the price received from the third party is adjusted accordingly. Prices from third party pricing services are often unavailable for securities that are rarely traded or are traded only in privately negotiated transactions. As a result, certain securities are priced via independent broker quotations which utilize proprietary models that include observable market based inputs. Additionally, the majority of these independent broker quotations are non-binding.

Table of Contents

For broker prices obtained on certain investment securities that we believe are based on forced liquidation or distressed sale values in inactive markets, we individually examine these securities for the appropriate valuation methodology based on a combination of the market approach reflecting current broker prices and a discounted cash flow approach. In calculating the fair value derived from the income approach, the Company makes assumptions using an exit price approach related to the implied rate of return which have been adjusted for general change in market rates, estimated changes in credit risk and liquidity risk premium, specific nonperformance and default experience in the collateral underlying the security. The values resulting from each approach (i.e. market and income approaches) are weighted to derive the final fair value for each security trading in an inactive market.

We are obligated to assess, at each reporting date, whether there is an other-than-temporary impairment to our investment securities. If we determine that a decline in fair value is other-than-temporary, a credit-related impairment loss is recognized in current earnings. Noncredit-related impairment losses are charged to other comprehensive income, to the extent we intend to hold the security until recovery. The determination of other-than-temporary impairment is a subjective process, requiring the use of judgments and assumptions. We examine all individual securities that are in an unrealized loss position at each reporting date for other-than-temporary impairment. Specific investment-related factors are examined to assess impairment which include the nature of the investments, severity and duration of the loss, the probability that we will be unable to collect all amounts due, an analysis of the issuers of the securities and whether there has been any cause for default on the securities and any change in the rating of the securities by the various rating agencies. Additionally, we evaluate whether the creditworthiness of the issuer calls the realization of contractual cash flows into question. We take into consideration the financial resources, intent and the overall ability of the Company to hold the securities until their fair values recover. Investment securities are discussed in more detail in Note 5 to the Company's consolidated financial statements presented elsewhere in this report.

The Company considers all available information relevant to the collectability of the security, including information about past events, current conditions, and reasonable and supportable forecasts, when developing the estimate of future cash flows and making its other-than-temporary impairment assessment for its portfolio of trust preferred securities. The Company considers factors such as remaining payment terms of the security, prepayment speeds, expected defaults, the financial condition of the issuer(s), and the value of any underlying collateral.

*Acquired Loans*

Acquired loans are initially recorded as of acquisition date at fair value in accordance with ASC 805, *Business Combinations*. Loans purchased with evidence of credit deterioration since origination for which it is probable that all contractually required payments will not be collected are accounted for under ASC 310-30, *Receivables, Loans and Debt Securities Acquired with Deteriorated Credit Quality*. Further, the Company elected to account for all other acquired loans within the scope of ASC 310-30 using the same methodology.

An allowance for loan losses is not carried over or recorded as of the acquisition date. In situations where loans have similar risk characteristics, loans were aggregated into pools to estimate cash flows under ASC 310-30. A pool is accounted for as a single asset with a single interest rate, cumulative loss rate and cash flow expectation. The Company aggregated all of the loans acquired in the FDIC-assisted acquisitions of WFIB and UCB into different pools, based on common risk characteristics.

The cash flows expected over the life of the pools are estimated using an internal cash flow model that projects cash flows and calculates the carrying values of the pools, book yields, effective interest income and impairment, if any, based on pool level events. Assumptions as to cumulative loss rates, loss curves and prepayment speeds are utilized to calculate the expected cash flows.

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

Under ASC 310-30, the excess of the expected cash flows at acquisition over the recorded investment is considered to be the accretable yield and is recognized as interest income over the life of the loan or pool. The excess of the contractual cash flows over the expected cash flows is considered to be the nonaccretable difference. Subsequent to the acquisition date, any increases in cash flow over those expected at purchase date in excess of the fair value that are probable are recorded as an adjustment to the accretable difference on a prospective basis. Any subsequent decreases in cash flow over those expected at purchase date that are probable are recognized by recording an allowance for loan losses. Any disposals of loans, including sales of loans, payments in full or foreclosures result in the removal of the loan from the ASC 310-30 portfolio at the carrying amount.

Table of Contents

The majority of the loans acquired in the FDIC-assisted acquisitions of WFIB and UCB are included in the FDIC shared-loss agreements and are referred to as covered loans. Covered loans are reported exclusive of the expected cash flow reimbursements from the FDIC. At the date of acquisition, all covered loans were accounted for under ASC 805 and ASC 310-30.

*FDIC Indemnification Asset*

In conjunction with the FDIC-assisted acquisitions of WFIB and UCB, the Bank entered into shared-loss agreements with the FDIC for amounts receivable covered by the shared-loss agreements. At the date of the acquisition the Company elected to account for amounts receivable under the shared-loss agreements as an indemnification asset in accordance with ASC 805. Subsequent to the acquisition the indemnification asset is tied to the loss in the covered loans and is not being accounted for under fair value. The FDIC indemnification asset is accounted for on the same basis as the related covered loans and is the present value of the cash flows the Company expects to collect from the FDIC under the shared-loss agreements. The difference between the present value and the undiscounted cash flow the Company expects to collect from the FDIC is accreted into noninterest income over the life of the FDIC indemnification asset. The FDIC indemnification asset is adjusted for any changes in expected cash flows based on the loan performance. Any increases in cash flow of the loans over those expected will reduce the FDIC indemnification asset and any decreases in cash flow of the loans over those expected will increase the FDIC indemnification asset. Over the life of the FDIC indemnification asset, increases and decreases are recorded as adjustments to noninterest income. In December 2010, the bank lowered the credit discount on the UCB covered loan portfolio as the credit quality was performing better than originally estimated. By lowering the credit discount, interest income will increase over the life of the loans. Correspondingly, with the lowered credit discount, the expected reimbursement from the FDIC under the loss sharing agreement will decrease, resulting in amortization on the FDIC indemnification asset which is recorded as a charge to noninterest income.

*Allowance for Loan Losses*

Our allowance for loan loss methodology incorporates a variety of risk considerations, both quantitative and qualitative, in establishing an allowance for loan loss that management believes is appropriate at each reporting date. Quantitative factors include our historical loss experience, delinquency and charge-off trends, collateral values, changes in nonperforming loans, and other factors. Qualitative considerations include, but are not limited to, prevailing economic or market conditions, relative risk profiles of various loan segments, volume concentrations, growth trends, delinquency and nonaccrual status, problem loan trends, and geographic concentrations.

For a detailed discussion of our allowance for loan loss methodology see Management's Discussion and Analysis of Consolidated Financial Condition and Results of Operations Allowance for Loan Losses presented elsewhere in this report. As we add new products, increase the complexity of our loan portfolio, and expand our geographic coverage, we continue to enhance our methodology to keep pace with the size and complexity of the loan portfolio and the changing credit environment. Changes in any of the factors cited above could have a significant impact on the loan loss calculation. We believe that our methodologies continue to be appropriate given our size and level of complexity. This discussion should also be read in conjunction with the Company's consolidated financial statements and the accompanying notes presented elsewhere in this report. See Note 8 to the Company's consolidated financial statements.

*Goodwill Impairment*

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

Under ASC 350, *Intangibles - Goodwill and Other*, goodwill must be allocated to reporting units and tested for impairment. The Company tests goodwill for impairment at least annually or more frequently if events or circumstances, such as adverse changes in the business, indicate that there may be justification for conducting an interim test. Impairment testing is performed at the reporting-unit level (which is the same level as the Company's two major operating segments identified in Note 24 to the Company's consolidated financial statements presented elsewhere in this report). The first part of the test is a comparison, at the reporting unit level, of the fair value of each reporting unit to its carrying value, including goodwill. In order to determine the fair value of the reporting units, a combined income approach and market approach was used. Under the income approach, the Company provided a net income projection and a terminal growth rate was used to calculate the discounted cash flows and the present value of the reporting units. Under the market approach, the fair value was calculated using the current fair values of comparable peer banks of similar size, geographic footprint and focus. The market capitalizations and multiples of these peer banks were used to calculate the market price of the Company and each reporting unit. The fair value was also subject to a control premium adjustment, which is the cost savings that a purchase of the reporting unit could achieve by eliminating duplicative costs. Under the combined income and market approach, the value from each approach was appropriately weighted to determine the fair value. If the fair value is less than the carrying value, then the second part of the test is needed to measure the amount of goodwill impairment. The implied fair value of the reporting unit goodwill is calculated and compared to the actual carrying value of goodwill recorded within the reporting unit. If the carrying value of reporting unit goodwill exceeds the implied fair value of that goodwill, then the Company would recognize an impairment loss for the amount of the difference, which would be recorded as a charge against net income. For complete discussion and disclosure see Note 12 to the Company's consolidated financial statements presented elsewhere in this report.

Table of Contents

*Share-Based Compensation*

We account for share-based awards to employees, officers, and directors in accordance with the provisions of ASC 505, *Equity*, and ASC 718, *Compensation - Stock Compensation*. Share-based compensation cost is measured at the grant date, based on the fair value of the award, and is recognized as expense over the employee's requisite service period.

We grant nonqualified stock options and restricted stock, which include a service condition for vesting. Additionally, some of our stock awards include a company financial performance requirement for vesting. The stock option awards generally vest in one to four years from the grant date, while the restricted stock awards generally vest in three to five years from the date of grant. Compensation expense is amortized on a straight-line basis over the requisite service period for the entire award, which is generally the maximum vesting period of the award.

We use an option-pricing model to determine the grant-date fair value of our stock options which is affected by assumptions regarding a number of complex and subjective variables. We make assumptions regarding expected term, expected volatility, expected dividend yield, and risk-free interest rate in determining the fair value of our stock options. The expected term represents the weighted-average period that stock options are expected to remain outstanding. The expected term assumption is estimated based on the stock options' vesting terms and remaining contractual life and employees' historical exercise behavior. The expected volatility is based on the historical volatility of our common stock over a period of time equal to the expected term of the stock options. The dividend yield assumption is based on the Company's current dividend payout rate on its common stock. The risk-free interest rate assumption is based upon the U.S. Treasury yield curve in effect at the time of grant appropriate for the term of the employee stock options.

For restricted share awards, the grant-date fair value is measured at the fair value of the Company's common stock as if the restricted share was vested and issued on the date of grant.

As share-based compensation expense is based on awards ultimately expected to vest, it is reduced for estimated forfeitures. Forfeitures are estimated at the time of grant and are reviewed annually for reasonableness. If the estimated forfeitures are revised, a cumulative effect of a change in estimated forfeitures for current and prior periods are recognized in compensation cost in the period of change. Share-based compensation is discussed in more detail in Notes 1 and 20 to the Company's consolidated financial statements presented elsewhere in this report.

**Overview**

The Company increased net income each consecutive quarter of 2012. For the full year 2012, net income totaled a record \$281.7 million, a 15% or \$36.5 million increase from \$245.2 million in 2011 and earnings per share totaled \$1.89, an increase of 18% from \$1.60 for full year 2011. Capital levels for the Company remain high. As of December 31, 2012, the Company's Tier 1 risk-based capital and total risk-based ratios were 14.8% and 16.1%, respectively, over \$800 million greater than the well capitalized requirements of 6% and 10%, respectively. Total deposits grew to a record \$18.3 billion, a 5% or \$856.4 million increase during the full year 2012. Core deposits grew to a record \$12.2 billion, an increase of 18% or \$1.9 billion year to date.

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

Total non-covered loans, excluding loans held for sale, grew to a record \$12.0 billion, an increase of 16% or \$1.7 billion during the full year 2012. The growth in non-covered loans was fueled by strong growth in commercial and trade finance loans and single-family real estate loans. Total loans receivable including non-covered loans, loans held for sale and loans covered under loss-share agreements grew to a record \$15.1 billion, an increase of 4% or \$578.6 million during the full year 2012.

Net covered loans totaled \$2.9 billion as of December 31, 2012, a decrease of \$987.5 million or 25% from December 31, 2011. The decrease in the covered loan portfolio was primarily due to payoffs and paydown activity, as well as charge-offs.

Table of Contents

The covered loan portfolio is comprised of loans acquired from the FDIC-assisted acquisitions of UCB and WFIB which are covered under loss-share agreements with the FDIC. For the full year 2012, we recorded a net decrease in the FDIC indemnification asset and receivable included in noninterest (loss)/income of (\$122.3) million, largely due to continued improved credit performance of the UCB portfolio as compared to our original estimate.

The Company reported total noninterest loss for the full year 2012 of (\$5.6) million, a decrease from noninterest income of \$10.9 million as compared to 2011. The decrease in noninterest (loss)/income from the prior year was primarily attributable to an increase in the net reduction of the FDIC indemnification asset and FDIC receivable.

Noninterest expense totaled \$422.5 million for the full year 2012, a decrease of 3% or \$13.1 million as compared to 2011. The decrease was a result of decreases in other real estate owned expenses of 45% or \$18.1 million, deposit insurance premium of 31% or \$6.4 million and loan related expense of 23% or \$4.4 million, partially offset by an increase in compensation and employee benefits expense of 7% or \$11.3 million.

As a result of continued credit quality improvement, nonperforming assets as of December 31, 2012, decreased to \$141.0 million, a decrease of 19% or \$34.0 million from prior year. The provision for loan losses for non-covered loans decreased 35% to \$60.2 million for the full year 2012 as compared to the prior year. Additionally, nonaccrual loans, excluding covered loans, totaled \$108.1 million or 0.72% of total loans as of December 31, 2012.

For the full year 2012, the Company repurchased 6% or 9.1 million shares of our common stock for a total cost of \$199.9 million. Additionally, the Company increased the common stock dividend rate 100% to \$0.40 per year.

In light of this commitment to our shareholders, our excellent capital levels and strong financial performance, the Company's Board of Directors has approved an increase in our quarterly common stock cash dividend to \$0.15 per share from \$0.10 per share. Further, the Board also authorized a new stock repurchase program in January 2013, to buy back up to \$200.0 million of the Company's common stock.

**Results of Operations**

Net income for 2012 totaled \$281.7 million, compared with a net income of \$245.2 million for 2011 and \$164.6 million in 2010.

Return on average total equity	12.14%	10.98%	7.02%

Table of Contents**Net Interest Income**

Our primary source of revenue is net interest income, which is the difference between interest earned on loans, investment securities and other earning assets less the interest expense on deposits, borrowings and other interest-bearing liabilities. Net interest income in 2012 totaled \$918.9 million, a 2% increase over net interest income of \$903.0 million in 2011. Comparing 2011 to 2010, net interest income increased 1% to \$903.0 million, as compared to \$894.7 million in 2010.

Net interest margin, defined as net interest income divided by average earning assets, decreased 3 basis points to 4.63% during 2012, from 4.66% during 2011. Although the low interest rate environment reduced our loan and investment securities yields in 2012 as compared to 2011, actions were taken throughout the year to reduce deposit and borrowing costs. During 2012 and 2011, our covered loan yield was positively impacted by the accretion from the covered loans under ASC 310-30. Comparing 2011 to 2010 our net interest margin decreased by 39 basis points to 4.66% during 2011, compared to 5.05% during 2010.

The following table presents the interest rate spread, net interest margin, average balances, interest income and expense, and the average yield rates by asset and liability component for the years ended December 31, 2012, 2011 and 2010:

- (1) Includes (amortization) of premiums and accretion of discounts on investment securities and loans receivable totaling \$(8.0) million, \$6.3 million, and \$9.3 million for the years ended December 31, 2012, 2011 and 2010, respectively. Also includes the net (amortization) of deferred loan fees and cost totaling (\$16.2) million, (\$13.1) million, and (\$7.4) million for the years ended December 31, 2012, 2011 and 2010.
- (2) Average balances exclude unrealized gains or losses on available-for-sale securities.
- (3) Average balances include nonperforming loans.

**Analysis of Changes in Net Interest Income**

Changes in our net interest income are a function of changes in rates and volumes of both interest-earning assets and interest-bearing liabilities. The following table sets forth information regarding changes in interest income and interest expense for the years indicated. The total change for each category of interest-earning assets and interest-bearing liabilities is segmented into the change attributable to variations in volume (changes in volume multiplied by old rate) and the change attributable to variations in interest rates (changes in rates multiplied by old volume). Nonaccrual loans are included in average loans used to compute this table.

(1) Changes in interest income/expense not arising from volume or rate variances are allocated proportionately to rate and volume.

**Provision for Loan Losses**

The provision for loan losses on non-covered loans and covered loans amounted to \$60.2 million and \$5.0 million for 2012, as compared to \$92.6 million and \$2.4 million for 2011 and \$195.9 million and \$4.2 million for 2010, respectively. Throughout 2012, the Company continued to proactively manage credit, resulting in improvements in key asset quality metrics. Total non-covered net charge-offs amounted to \$42.2 million or 0.38% of the average non-covered loans during 2012. This compares to \$112.1 million or 1.16% of the average non-covered loans during 2011. Total net charge-offs for covered loans amounted to \$6.5 million during 2012. No net charge-offs on covered loans were recorded in 2011. The decrease in non-covered net charge-offs in 2012 was primarily due to the credit quality improvement. However, the non-covered allowance for loan losses on commercial and industrial, commercial real estate and consumer portfolio did increase which is commensurate with the increases in these portfolios. We continue to aggressively monitor delinquencies and proactively review the credit risk exposure of our loan portfolio to minimize and mitigate potential losses. Also during the year we had note sale proceeds of \$12.8 million on notes with a carrying value of \$14.3 million. \$1.0 million in loans were originated to facilitate sales of loans; the remaining difference between the carrying value and

the sale amount was charged against the allowance for loan losses.

Comparing 2011 to 2010, the decrease in loan loss provisions during 2011 reflects decreased charge-off levels as a result of the credit quality improvement. However, the allowance for loan losses on commercial and residential loans did increase which is commensurate with the increases in these portfolios.

Provisions for loan losses are charged to income to bring the allowance for credit losses as well as the allowance for unfunded loan commitments, off-balance sheet credit exposures, and recourse provisions to a level deemed appropriate by the Company based on the factors discussed under the Allowance for Loan Losses section of this report.

Table of Contents**Noninterest (Loss) Income**Table 4: *Components of Noninterest (Loss) Income*

	2012	2011	2010
	<i>(In millions)</i>		
Branch fees	\$ 33.60	\$ 33.78	\$ 32.63
Net gain on sales of loans	17.04	20.19	18.51
Letters of credit fees and commissions	19.10	14.00	11.82
Net gain on sales of investment securities	0.76	9.70	31.24
Foreign exchange income	7.17	9.14	3.17
Ancillary loan fees	8.83	8.35	8.53
Income from life insurance policies	4.01	4.03	4.08
Gain (loss) on sale of fixed assets	4.27	2.27	(0.19)
Other operating income	21.95	10.23	6.49
Fee and Other Operating Income	116.73	111.69	116.28
Gain on acquisition			22.87
Impairment writedown on investment securities	(0.10)	(0.63)	(16.67)
Decrease in FDIC indemnification asset and receivable	(122.25)	(100.14)	(83.21)
Total	\$ (5.62)	\$ 10.92	\$ 39.27

Noninterest (loss) income includes revenues earned from sources other than interest income. These sources include service charges and fees on deposit accounts, fees and commissions generated from trade finance activities and the issuance of letters of credit, ancillary fees on loans, net gains on sales of loans, investment securities available-for-sale, and other assets, impairment write-downs on investment securities and other assets, gain on acquisitions, decrease in the FDIC indemnification asset and receivable, income from life insurance policies and other noninterest-related revenues.

Noninterest loss amounted to \$5.6 million for 2012 as compared to noninterest income of \$10.9 million for 2011. Total fee and other operating income increased slightly to \$116.7 million during 2012, compared with \$111.7 million for the corresponding period in 2011. The \$99 thousand and \$633 thousand impairment charges recorded during 2012 and 2011, respectively, were related to credit-related impairment loss on our trust preferred securities.

Branch fees totaled \$33.6 million in 2012, compared to \$33.8 million earned in 2011. The majority of branch fees are earned from commercial demand deposit analysis services fees, non-sufficient funds fees and wire fee income.

The net gain on sales of loans of \$17.0 million in 2012 was mainly due to the sale of \$311.8 million and \$24.9 million of government guaranteed student loans and SBA loans, respectively.

Letters of credit fees and commissions, which represent revenues from trade finance operations as well as fees related to the issuance and maintenance of standby letters of credit, increased 36% to \$19.1 million in 2012, from \$14.0 million in 2011. The increase in letters of credit fees and commissions was primarily due to the increase in the volume of trade finance loans during 2012 relative to 2011.

Net gain on sales of investment securities available-for-sale decreased to \$757 thousand during 2012 compared with \$9.7 million in 2011. During 2012, the Company reassessed the available for sale securities portfolio and elected to sell certain securities to reduce the exposure to specific industries within the corporate debt portfolio, thus creating an overall lower net gain

Foreign exchange income decreased to \$7.2 million during 2012 compared with \$9.1 million in 2011. This primarily represents the gain on our foreign exchange transactions.

Net gain on sales of fixed assets increased to \$4.3 million in 2012 compared to \$2.3 million in 2011, the increase was primarily due to the sale of a building for \$20.0 million which was acquired through the UCB acquisition.

Table of Contents

Other operating income, which includes insurance commissions and insurance related service fees, rental income, and other miscellaneous income, increased to \$22.0 million in 2012, compared to \$10.2 million in 2011. The increase was primarily due to the \$8.4 million increase in derivative income during 2012.

Comparing 2011 to 2010, our recorded noninterest income was \$10.9 million and \$39.3 million, respectively. Total fee and other operating income slightly decreased to \$111.7 million during 2011, compared with \$116.3 million for the corresponding period in 2010. The reduction of the FDIC indemnification asset and receivable increased to (\$100.1) million for 2011, as compared to (\$83.2) million for 2010.

**Noninterest Expense**Table 5: *Components of Noninterest Expense*

	2012	2011	2010
		<i>(In millions)</i>	
Compensation and employee benefits	\$ 171.37	\$ 160.09	\$ 170.05
Occupancy and equipment expense	55.48	50.08	52.07
Amortization of investments in affordable housing partnerships and other investments	18.06	17.32	10.03
Amortization of premiums on deposits acquired	10.91	12.33	13.28
Deposit insurance premiums and regulatory assessments	14.13	20.53	25.20
Loan related expense	14.99	19.38	21.07
Other real estate owned expense	22.35	40.44	61.57
Legal expense	25.44	21.33	19.58
Prepayment penalty for FHLB advances and other borrowings	6.86	12.28	13.83
Data processing	9.23	8.60	10.62
Deposit-related expenses	6.01	5.70	4.75
Consulting expense	7.98	7.15	7.99
Other operating expenses	59.72	60.38	67.88
Total noninterest expense	\$ 422.53	\$ 435.61	\$ 477.92
Efficiency Ratio (1)	42.34%	43.04%	47.51%

(1) Represents noninterest expense, excluding the amortization of intangibles, amortization of premiums on deposits acquired, amortization of investments in affordable housing partnerships and other investments, and prepayment penalties for FHLB advances and other borrowings, divided by the aggregate of net interest income before provision for loan losses and noninterest income, excluding items that are non-recurring in nature.

Noninterest expense, which is comprised primarily of compensation and employee benefits, occupancy and other operating expenses decreased 3% to \$422.5 million during 2012, compared to \$435.6 million during 2011. Total noninterest expense for 2012 and 2011 included \$27.2 million and \$43.9 million, respectively, which is reimbursable by the FDIC within the loss share agreements. 80% of these amounts are included in noninterest income, resulting in a net impact to income of 20%.

Compensation and employee benefits increased 7% to \$171.4 million in 2012, compared to \$160.1 million in 2011. The increase is primarily due to the overall increase in the cost of compensation. Occupancy and equipment expenses increased 11% to \$55.5 million during 2012,

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

compared with \$50.1 million during 2011. The increase is mostly due to onetime costs of new offices and new branches, and some consolidation of existing branches.

The amortization of affordable housing partnerships investments and other investments increased to \$18.1 million in 2012, from \$17.3 million in 2011. The total of these investments as of December 31, 2012 was \$231.5 million, an increase from \$194.1 million at December 31, 2011.

Table of Contents

The amortization of premiums on deposits acquired decreased 12% to \$10.9 million during 2012, compared with \$12.3 million in 2011. The decrease is primarily due to the full amortization of specific core deposit premiums during 2012 that were acquired through previous acquisitions.

Deposit insurance premiums and regulatory assessments decreased to \$14.1 million during 2012, compared with \$20.5 million in 2011. The decrease in deposit insurance premiums and regulatory assessments during 2012 is primarily due to a decrease in the assessment base and assessment rate.

Loan-related expenses decreased to \$15.0 million in 2012, compared to \$19.4 million in 2011. The \$15.0 million in loan-related expenses in 2012 includes \$8.2 million of expenses that are covered under the FDIC shared-loss agreements.

We recorded OREO expenses, net of OREO revenues and gains, totaling \$22.4 million during 2012, compared with \$40.4 million during 2011. As of December 31, 2012, total net non-covered OREO amounted to \$32.9 million, compared to \$29.4 million as of December 31, 2011. The \$22.4 million in total OREO expenses during 2012 is comprised of \$12.0 million in various operating and maintenance expenses related to our OREO properties, \$16.0 million in valuation losses, and \$5.7 million in net OREO gains from the sale of 146 OREO properties consummated in 2012. Net covered OREO amounted to \$26.8 million and \$63.6 million as of December 31, 2012 and 2011, respectively. The \$22.4 million in total OREO expenses for 2012 includes \$7.2 million of expenses that are covered under the FDIC shared-loss agreements. The \$40.4 million in total OREO expenses for 2011 includes \$24.9 million of expenses that are covered under the FDIC shared-loss agreements.

Deposit-related expenses increased 5% to \$6.0 million during 2012, compared with \$5.7 million during 2011. Deposit-related expenses represent various business-related expenses paid by the Bank on behalf of its commercial account customers.

Other operating expenses include advertising and public relations, telephone and postage, stationery and supplies, bank and item processing charges, insurance expenses, other professional fees, and charitable contributions. Other operating expenses decreased 1% to \$59.7 million in 2012, compared with \$60.4 million in 2011.

Comparing 2011 to 2010, noninterest expense decreased \$42.3 million, or 9%, to \$435.6 million. The decrease is comprised primarily of the following: (1) compensation and employee benefits totaling \$160.1 million during 2011, compared with \$170.1 million during 2010; (2) OREO expenses, net of OREO revenues and gains, totaling \$40.4 million during 2011, compared with \$61.6 million during 2010. The \$40.4 million in total OREO expenses incurred during 2011 is comprised of \$13.7 million in various operating and maintenance expenses related to our OREO properties, \$29.2 million in valuation losses, and \$2.5 million in net OREO losses from the sale of 214 OREO properties consummated in 2011; (3) a decrease in other operating expenses of \$7.5 million, or 11%; and (4) a decrease in deposit insurance premiums and regulatory assessments expense of \$4.7 million or 19%.

The Company's efficiency ratio decreased to 42.34% in 2012 compared to 43.04% in 2011 and 47.51% in 2010. Comparing 2012 to 2011, the decrease in our efficiency ratio can be attributed to expense reduction, most significantly a reduction of expenses associated with credit including OREO/ foreclosure transactions, and loan related expenses.

## Income Taxes

The provision for income taxes was \$143.9 million in 2012, representing an effective tax rate of 33.8%, compared to \$138.1 million, representing an effective tax rate of 36.0% and \$91.3 million, representing an effective tax rate of 35.7% for 2011 and 2010, respectively. The lower effective tax rate is mainly due to the additional tax benefit from affordable housing investments and the California enterprise zone net interest deduction. Included in the income tax recognized during 2012, 2011 and 2010 are \$18.7 million, \$11.1 million and \$12.4 million, respectively, in tax credits generated from our investments in affordable housing partnerships and other investments.

During the second quarter of 2012, the company closed its audits for the years 2000 through 2002 with the California Franchise Tax Board and received a settlement refund of \$3.0 million related to various refund claims and other previously pending matters under review. During 2012, the Company also finalized the Internal Revenue Service examination for the 2010 tax year with no material changes.

Management regularly reviews the Company's tax positions and deferred tax assets. Factors considered in this analysis include future reversals of existing temporary differences, future taxable income exclusive of reversing differences, taxable income in prior carryback years, and tax planning strategies. The Company accounts for income taxes using the asset and liability approach, the objective of which is to establish deferred tax assets and liabilities for the temporary differences between the financial reporting basis and the tax basis of the Company's assets and liabilities at enacted rates expected to be in effect when such amounts are realized and settled. Based on the available evidence, Management has concluded that it is more likely than not that all of the benefit of the deferred tax assets will be realized, with the exception of the deferred tax assets related to certain state net operating loss carryforwards. Accordingly, a valuation allowance has been recorded for these amounts.

As of December 31, 2012, the Company had a net deferred tax asset of \$185.7 million.

Table of Contents

**Operating Segment Results**

We define our operating segments based on our core strategy and we have three operating segments: Retail Banking, Commercial Banking and Other.

The Retail Banking segment focuses primarily on retail operations through the Bank's branch network. The Commercial Banking segment, which includes commercial and industrial, and commercial real estate relationships, primarily generates these loans through the efforts of the commercial lending offices located in the Bank's production offices in California, New York, Texas, and the New England region, among others. Furthermore, the Commercial Banking segment also offers a wide variety of international finance and trade services and products. The remaining centralized functions, including the former Treasury segment and eliminations of intersegment amounts have been aggregated and included in Other.

Changes in our management structure or reporting methodologies may result in changes in the measurement of operating segment results. Results for prior periods are generally restated for comparability for changes in management structure or reporting methodologies unless it is not deemed practicable to do so.

Our transfer pricing process is formulated with the goal of incenting loan and deposit growth that is consistent with the Company's overall growth objectives as well as to provide a reasonable and consistent basis for measurement of our business segments and product net interest margins. Our transfer pricing assumptions and methodologies are reviewed at least annually to ensure that our process is reflective of current market conditions.

For more information about our segments, including information about the underlying accounting and reporting process, see Note 24 to the Company's consolidated financial statements presented elsewhere in this report.

*Retail Banking*

The Retail Banking segment reported a pretax income of \$74.8 million during 2012, compared to a pretax income of \$102.2 million for 2011. Earnings declined from the prior year mainly due to a decrease in net interest income, partially offset by a reduction in noninterest expense.

Net interest income for this segment decreased \$37.8 million, or 10%, from \$381.5 million in 2011 to \$343.7 million in 2012. The decrease in net interest income was attributable to a combination of an extended lower interest rate environment and a flattening yield curve.

Noninterest income for this segment declined \$0.8 million, or 4%, to \$17.7 million from \$18.5 million in 2011. The decrease was primarily due to reductions in branch and loan related fees and income from secondary market activities, offset by a lower reduction of FDIC indemnification

asset and receivable.

Noninterest expense for this segment decreased \$14.9 million, or 7%, from \$203.9 million in 2011 to \$189.0 million in 2012. The decrease in noninterest expense was primarily due to decreases in FDIC deposit insurance premiums, amortization of intangibles, and promotion and advertising expenses, offset by an increase in OREO-related expenses.

Comparing 2011 to 2010, the Retail Banking segment reported a pre-tax profit of \$102.2 million, up from a pre-tax loss of \$5.0 million in 2010. The improvement was largely driven by an increase in net interest income and decreases in loan loss provisions and noninterest expense, offset by a reduction in noninterest income. The \$43.1 million increase in net interest income for 2011 was attributable to the lower cost of funds on deposits and an increase in the mortgage portfolio as well as an increase in the disposal activity in the covered loan portfolio, partially offset by lower loan yields from the extended low interest rate environment. Noninterest income decreased \$9.0 million to \$18.5 million primarily due to a higher net reduction from the FDIC indemnification asset and receivable, offset by an increase in branch fee income. Noninterest expense from this segment decreased \$28.5 million to \$203.9 million in 2011. The decline was mostly due to decreases in OREO and loan related expenses, compensation and employee benefits, and FDIC deposit insurance premiums.

Table of Contents

*Commercial Banking*

The Commercial Banking segment reported pre-tax income of \$266.2 million for 2012 compared to \$227.8 million for 2011. The increase was due to an increase in net interest income, a reduction in provision for loan losses, and noninterest expense, partially offset by a larger noninterest loss.

Net interest income for this segment increased \$28.1 million, or 6%, to \$488.3 million for 2012, compared to \$460.2 million in 2011. The increase in net interest income was primarily due to higher levels of disposal activity in the covered loan portfolio. The net interest income was also adversely impacted by the extended low interest rate environment.

Noninterest loss for this segment totaled \$34.3 million, a 57% greater loss as, compared to a loss of \$21.9 million for 2011. The increase in loss for this segment was primarily driven by a larger decrease in the FDIC indemnification asset and receivable, partially offset by increases in loan-related fee income, and swap income.

Noninterest expense for this segment decreased \$1.2 million, or 1%, to \$132.6 million in 2012, compared to \$133.8 million for 2011. The decrease in noninterest expense was largely attributed to declines in OREO-related expenses and loan related expenses, offset by increases in compensation and employee benefits, legal, and occupancy expenses.

Comparing 2011 to 2010, the Commercial Banking segment reported a pre-tax income of \$227.8 million, up from \$157.9 million for 2010. The increase in profit was the result of reductions in loan loss provision, noninterest loss, and noninterest expenses, partially offset by a decrease in net interest income. The lower net interest income was primarily impacted by the disposal activity on the covered loan portfolio and lower interest rates on loans. The reduction in noninterest loss was due to higher loan fees, swap income, and foreign exchange fee income offset by a higher reduction from FDIC indemnification asset and receivable. The decrease in noninterest expense in 2011 was attributed to decreases in OREO and loan related expenses and FDIC deposit insurance premiums, offset by an increase in compensation and employee benefits.

*Other*

The Other segment reported pre-tax income of \$84.6 million for 2012 compared to \$53.4 million for 2011, an increase of \$31.2 million, or 59%. Net interest income increased \$25.5 million, or 42%, to \$86.9 million for 2012 compared to \$61.4 million for 2011. As this segment includes the treasury function, which is responsible for the liquidity and interest rate risk management of the Bank, it bears the cost of beneficial and adverse movements in interest rates affecting our net interest margin and supports the Retail Banking and Commercial Banking segments through funds transfer pricing.

Noninterest income totaled \$11.0 million for 2012, a \$3.3 million, or 23% reduction, compared to \$14.3 million recorded in 2011. This reduction was primarily due to a lower net gain on sales of investments, partially offset by a larger net gain on sales of fixed assets.

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

Noninterest expense for this segment increased \$3.0 million, or 3%, to \$100.9 million in 2012 compared to \$97.9 million in 2011. The increase was primarily due to higher compensation and employee benefits and occupancy expenses, partially offset by reductions in legal expenses and prepayment penalties on FHLB advances.

Comparing 2011 to 2010, the Other segment reported a pre-tax income of \$53.4 million compared to an income of \$103.0 million in the prior year, a decline of \$49.6 million or 48%. This was primarily due to decreases in net interest income and noninterest income, partially offset by a reduction in noninterest expense. Net interest income for 2011 decreased to \$61.4 million compared to \$63.3 million in 2010. Reduction in noninterest income of \$23.4 million was primarily due to the gain on acquisition in 2010 as well as a higher gain on sales of investments in 2010, offset by a decrease of impairment on investment securities. Noninterest expense decreased \$5.7 million mainly from a reduction in compensation and employee benefits, partially offset by increases from amortization of investments in affordable housing partnerships.

### **Balance Sheet Analysis**

Total assets increased \$567.4 million, or 3%, to \$22.54 billion as of December 31, 2012. The increase is comprised predominantly of increases in securities purchased under resale agreements of \$663.6 million and net loans receivable of \$660.9 million offset by decreases in investment securities available-for-sale of \$465.5 million, FDIC indemnification asset and receivable of \$194.8 million and loans held for sale of \$104.3 million. The increase in total assets was funded primarily through increases in deposits of \$856.4 million.

Table of Contents

**Investment Securities**

Income from investing activities provides a significant portion of our total income. We aim to maintain an investment portfolio with an adequate mix of fixed-rate and adjustable-rate securities with relatively short maturities to minimize overall interest rate risk. Our investment securities portfolio primarily consists of U.S. Treasury securities, U.S. Government agency securities, U.S. Government sponsored enterprise debt securities, U.S. Government sponsored enterprise and other mortgage-backed securities, municipal securities, and corporate debt securities. Investments classified as available-for-sale are carried at their estimated fair values with the corresponding changes in fair values recorded in accumulated other comprehensive income or loss, net of tax, as a component of stockholders' equity. All investment securities have been classified as available-for-sale as of December 31, 2012 and December 31, 2011.

Total investment securities available-for-sale decreased 15% to \$2.61 billion as of December 31, 2012, compared with \$3.07 billion at December 31, 2011. As of December 31, 2012, the investment portfolio had a net unrealized gain of \$8.0 million as compared to a net unrealized loss of \$60.4 million as of December 31, 2011. Within the portfolio, all categories by security type were in a net unrealized gain position except for corporate debt. During 2012, total repayments/maturities and proceeds from sales of investment securities amounted to \$1.12 billion and \$1.23 billion, respectively. Proceeds from repayments, maturities, sales, and redemptions were applied towards additional investment securities purchases totaling \$1.84 billion. We recorded net gains totaling \$757 thousand and \$9.7 million on sales of investment securities during 2012 and 2011, respectively. At December 31, 2012, investment securities available-for-sale with a par value of \$1.78 billion were pledged to secure public deposits, FHLB advances, repurchase agreements, FRB discount window, and for other purposes required or permitted by law.

The corporate debt securities portfolio was reduced by \$912.8 million during 2012 primarily due to the sales stated above. During 2012, the Company reassessed the investment portfolio and elected to sell these securities to reduce the exposure to specific industries within the corporate debt securities portfolio. For the remainder of the corporate debt securities portfolio held as of December 31, 2012, the Company has the intent and ability to hold these securities and it is not more likely than not that the Company will be required to sell the securities before it recovers the cost basis of its investment.

We perform regular impairment analyses on the investment securities. If we determine that a decline in fair value is other-than-temporary, a credit-related impairment loss is recognized in current earnings. The noncredit-related impairment losses are charged to other comprehensive income which is the portion of the loss attributed to market rates or other factors non-credit related. Other-than-temporary declines in fair value are assessed based on factors including the duration the security has been in a continuous unrealized loss position, the severity of the decline in value, the rating of the security, the probability that we will be unable to collect all amounts due, and our ability and intent to not sell the security before recovery of its amortized cost basis. For securities that are determined to not have other-than-temporary declines in value, we have both the ability and the intent to hold these securities and it is not more likely than not that we will be required to sell these securities before recovery of their amortized cost basis.

The fair values of the investment securities are generally determined by reference to the average of at least two quoted market prices obtained from independent external brokers or prices obtained from independent external pricing service providers who have experience in valuing these securities. The Company performs a monthly analysis on the pricing service quotes and the broker quotes received from third parties to ensure that the prices represent a reasonable estimate of the fair value. The procedures include, but are not limited to, initial and ongoing review of third party pricing methodologies, review of pricing trends, and monitoring of trading volumes. The Company assesses whether prices received from independent brokers represent a reasonable estimate of fair value through the use of internal and external cash flow models developed that are based on spreads and, when available, market indices. As a result of this analysis, if the Company determines there is a more appropriate fair value based upon available market data, the price received from the third party is adjusted accordingly.

Prices from third party pricing services are often unavailable for securities that are rarely traded or are traded only in privately negotiated transactions. As a result, certain securities are priced via independent broker quotations that utilize inputs that may be difficult to corroborate with observable market based data. Additionally, the majority of these independent broker quotations are non-binding.

As a result of the financial crisis in the U.S. and global markets, the market for certain pooled trust preferred securities has been distressed since mid-2007. It is the Company's view that current broker prices (which are typically non-binding) on these securities are based on forced liquidation or distressed sale values in very inactive markets that are not representative of the fair value of these securities. As such, the Company considered what weight, if any, to place on transactions that are not orderly when estimating fair value.

Table of Contents

There were 13 individual securities that have been in a continuous unrealized loss position for twelve months or longer as of December 31, 2012. These securities are comprised of 8 investment grade debt securities and with a total fair value of \$182.7 million and 5 positions in trust preferred securities with a total fair value of \$12.6 million. The Company recorded other-than-temporary impairment losses in 2012 of \$99 thousand on our portfolio of trust preferred securities.

The majority of unrealized losses in the available-for-sale portfolio at December 31, 2012 are related to investment grade corporate debt securities that have been in a continuous loss position for more than twelve months. As of December 31, 2012, the Company had \$412.0 million in investment grade corporate debt securities available-for-sale, representing approximately 16% of the total investment securities available-for-sale portfolio.

For complete discussion and disclosure see Note 5 to the Company's consolidated financial statements presented elsewhere in this report.

The following table sets forth certain information regarding the fair values of our investment securities available-for-sale, as well as the weighted average yields, and contractual maturity distribution, excluding periodic principal payments, of our available-for-sale portfolio at December 31, 2012.

available-for-sale**

**Covered Assets**

Covered assets consist of loans receivable and OREO that were acquired in the WFIB Acquisition on June 11, 2010 and in the UCB Acquisition on November 6, 2009 for which the Company entered into shared-loss agreements with the FDIC. The shared-loss agreements covered over 99% of the loans originated by WFIB and all of the loans originated by UCB, excluding the loans originated by UCB in China under its United Commercial Bank China (Limited) subsidiary. The Company shares in the losses, which began with the first dollar of loss incurred, on the loan pools (including single-family residential mortgage loans, commercial loans, foreclosed loan collateral and other real estate owned) covered ( covered assets ) under the shared-loss agreements.

Pursuant to the terms of the shared-loss agreements, the FDIC is obligated to reimburse the Company 80% of eligible losses for both WFIB and UCB with respect to covered assets. For the UCB covered assets, the FDIC will reimburse the Company for 95% of eligible losses in excess of \$2.05 billion with respect to covered assets. The Company has a corresponding obligation to reimburse the FDIC for 80% or 95%, as applicable, of eligible recoveries with respect to covered assets. For both acquisitions the shared-loss agreements for commercial and single-family residential mortgage loans are in effect for 5 years and 10 years, respectively, from the acquisition date and the loss recovery provisions are in effect for 8 years and 10 years, respectively, from the acquisition date.

Table of Contents

The following table sets forth the composition of the covered loan portfolio as of the dates indicated:

Table 7: *Composition of Covered Loan Portfolio*

	December 31,

Total covered loans, net	\$ 2,935,595		\$ 3,923,142	

**FDIC Indemnification Asset**

The FDIC indemnification asset represents the present value of the amounts the Company expects to receive from the FDIC under the shared-loss agreements. The difference between the present value of undiscounted cash flow the Company expects to collect from the FDIC is accreted into noninterest income over the life of the FDIC indemnification asset. The FDIC indemnification asset was \$316.3 million as of December 31, 2012, compared to \$511.1 million as of December 31, 2011. For the years ended December 31, 2012 and 2011, the Company recorded \$33.8 million and \$59.9 million, respectively, of amortization in line with the improved accretable yield as discussed in Note 7 presented elsewhere in this report. The Company also recorded a \$144.0 million and \$210.4 million reduction for the years ended December 31, 2012 and 2011, respectively, to the FDIC indemnification asset and recorded the adjustment to noninterest income (loss). The reduction in both years is primarily the result of covered loan payoffs. As these covered loans are removed from their respective pools, the Company records a proportional amount of accretable yield into interest income. Correspondingly, the Company removes the indemnification asset associated with those removed loans and the adjustments are recorded into noninterest income. Additionally, during 2012 and 2011, respectively, \$17.0 million and \$3.6 million were recorded as the increase in the estimate of liability owed to the FDIC at the completion of the FDIC loss share agreements.

**FDIC Receivable**

As of December 31, 2012 and 2011, the FDIC loss-sharing receivable was \$73.1 million and \$76.6 million, respectively. This receivable represents 80% of reimbursable amounts from the FDIC, under the loss-sharing agreements that have not yet been received. These reimbursable amounts include net charge-offs, loan-related expenses and OREO-related expenses. 100% of the loan-related and OREO expenses are recorded as noninterest expense, 80% of any reimbursable expense is recorded as noninterest income, netting to the 20% of actual expense paid by the

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

Company. The FDIC shares in 80% of recoveries received. Thus, the FDIC receivable is reduced when we receive payment from the FDIC as well as when recoveries occur. The FDIC loss-sharing receivable is included in other assets on the consolidated balance sheet.

For complete discussion and disclosure of covered assets, FDIC indemnification asset and FDIC receivable see Note 7 to the Company's consolidated financial statements presented elsewhere in this report.

Table of Contents**Non-Covered Loans**

We offer a broad range of products designed to meet the credit needs of our borrowers. Our lending activities consist of residential single-family loans, residential multifamily loans, income producing commercial real estate loans, land loans, construction loans, commercial business loans, trade finance loans, student loans, and other consumer loans. Net non-covered loans receivable increased \$1.54 billion, or 15%, to \$11.88 billion at December 31, 2012.

The following table sets forth the composition of the loan portfolio as of the dates indicated:

Table 8: *Composition of Loan Portfolio*

**Residential Loans.** The residential loan segment includes both single-family and multifamily loans. At December 31, 2012, \$3.09 billion or 26% of the loan portfolio was residential real estate properties, compared to \$2.73 billion or 27% at December 31, 2011.

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

The Bank offers both fixed and adjustable rate ( ARM ) first mortgage loans secured by one-to-four unit residential properties located in its primary lending areas. The Bank originated \$735.3 million and \$924.3 million in new residential single-family loans during 2012 and 2011, respectively.

The Bank also offers both fixed and ARM residential multifamily loan programs. For the years ended December 31, 2012 and 2011, the Bank originated \$128.4 million and \$80.5 million, respectively, in multifamily residential loans. The Bank primarily offers ARM multifamily loan programs that have six-month, three-year, or five-year initial fixed periods. The Bank considers all of the single-family and multifamily loans originated to be prime loans and underwriting criteria include minimum FICO scores, maximum loan-to-value ratios and minimum debt coverage ratios, as applicable. The Bank does have some single-family loans with interest-only features which represent less than 1% of total single-family loans at both December 31, 2012 and 2011, respectively. Additionally, the Bank has residential loans that permit different repayment options that were purchased years ago. For these loans, there is the potential for negative amortization if the borrower chooses so. These residential loans that permit different repayment options represent less than 1%, of total residential loans at both December 31, 2012 and 2011, respectively. None of these loans were negatively amortizing as of December 31, 2012 and 2011.

The Bank also offers a low loan documentation program for single family residential loans. These loans require a large down payment and a low loan to value LTV . These loans have historically experienced low delinquency and default rates. A majority of the 2012 single family residential loan originations were originated under this program.

*Commercial Real Estate Loans.* The commercial real estate loan segment includes income producing real estate loans, construction loans and land loans. We continue to originate commercial real estate loans that are advantageous opportunities for the Bank. Although real estate lending activities are collateralized by real property, these transactions are subject to similar credit evaluation, underwriting and monitoring standards as those applied to commercial business loans. Commercial real estate loans accounted for \$3.89 billion or 33%, and \$3.83 billion or 37%, of our non-covered loan portfolio at December 31, 2012, and 2011, respectively.

Table of Contents

Since a significant portion of our real estate loans are secured by properties located in California, declines in the California economy and in real estate values could have a significant effect on the collectability of our loans and on the level of allowance for loan losses required.

*Commercial and Industrial Loans.* The commercial and industrial loan segment includes commercial business and trade finance loans. We finance small and middle-market businesses in a wide spectrum of industries throughout California. Included in commercial business loans are loans for working capital, accounts receivable lines, inventory lines, small business administration loans and lease financing. Included in our trade finance loans are a variety of international trade services and products, including letters of credit, revolving lines of credit, import loans, bankers' acceptances, working capital lines, domestic purchase financing and pre-export financing. At December 31, 2012, the commercial and industrial loans segment accounted for a total of \$4.23 billion or 35% of our loan portfolio, compared to \$3.14 billion or 31% at December 31, 2011. The increase in this loan segment is due to a focus during 2012 and going forward of growing the commercial and industrial loan portfolio while reducing our exposure to non income producing commercial real estate loans.

Most of our trade finance activities are related to trade with Asian countries. However, a significant majority of our loans are made to companies domiciled in the United States. A substantial portion of this business involves California based customers engaged in import and export activities. We also offer export-import financing to various domestic and foreign customers. Certain trade finance loans may be guaranteed by the Export-Import Bank of the United States or the Export-Import Bank of China. Our trade finance portfolio as of December 31, 2011 primarily represents loans made to borrowers that import goods into the U.S as well as some export of goods to China. These financings are generally made through letters of credit ranging from \$100 thousand to \$1 million. At December 31, 2012, total unfunded commitments related to trade finance loans increased 27% to \$697.2 million, compared to \$551.0 million at December 31, 2011.

*Consumer Loans.* The consumer loans segment includes student loans and other consumer loans. Consumer loans increased from \$583.8 million at December 31, 2011 to \$744.9 million at December 31, 2012, an increase of 28%. A majority of our student loans are 100% guaranteed by the U.S Department of Education. The other consumer loan portfolio is mainly comprised of home equity lines of credit and auto loans.

*Loans Held for Sale.* At December 31, 2012, loans held for sale are mainly comprised of the student loans segment. Loans held for sale totaled \$174.3 million and \$278.6 million as of December 31, 2012 and 2011, respectively. During 2012, in total, loans receivable of \$144.1 million were reclassified to loans held for sale. These loans were purchased by the Company with the intent to be held for investment; however, subsequent to the loan's purchase, the Company's intent for these loans changed and they were consequently reclassified to loans held for sale. Proceeds from sales of loans held for sale were \$351.9 million in 2012, resulting in net gains on sales of \$14.6 million. Proceeds from sales of loans held for sale were \$652.7 million and \$409.5 million in 2011 and 2010, respectively. Net gains on sales were \$14.5 million in 2011 compared to 18.5 million in 2010.

*Foreign Loans* At December 31, 2012 \$281.5 million of loans were held in our overseas offices, including our Hong Kong branch and our subsidiary bank in China. These loans represent 1% of total consolidated assets. These loans are included in the *Composition of Loan Portfolio* table above.

**Non-covered Nonperforming Assets**

Generally, the Company's policy is to place a loan on nonaccrual status if principal or interest payments are past due in excess of 90 days or the full collection of principal or interest becomes uncertain, regardless of the length of past due status. When a loan reaches nonaccrual status, any interest accrued on the loan is reversed and charged against current income. In general, subsequent payments received are applied to the outstanding principal balance of the loan. Nonaccrual loans that demonstrate a satisfactory payment trend for several months are returned to full accrual status subject to management's assessment of the full collectability of the loan.

Non-covered nonperforming assets are comprised of nonaccrual loans, accruing loans past due 90 days or more, and non-covered other real estate owned, net. Non-covered nonperforming assets totaled \$141.0 million, or 0.63% of total assets at December 31, 2012, and \$175.0 million, or 0.80% of total assets, at December 31, 2011. Nonaccrual loans totaled \$108.1 million and \$145.6 million at December 31, 2012 and 2011, respectively. During 2012, we took actions to reduce our exposure to problem assets. In conjunction with these efforts, we sold \$31.9 million in non-covered OREO properties during 2012. Also during 2012, we sold notes with a carrying value of \$14.3 million for proceeds of \$12.8 million and loans to facilitate sale of loans of \$1.0 million. Net charge-offs for non-covered nonperforming loans were \$42.2 million for the year ended December 31, 2012. For non-covered OREO properties, write-downs of \$5.1 million were recorded for the year ended December 31, 2012.

Approximately \$13.4 million, or 94%, of our problem loan sales during 2012 were all-cash transactions. We also partially financed a loan sale to an unrelated third party. Problem loans are sold on a servicing released basis and the shortfall between the loan balance and any new note is charged-off. A substantial down payment, typically 20% or greater, is received from the new borrower purchasing the problem loan. The underlying sales agreements provide for full recourse to the new borrower and require that periodic updated financial information be provided to demonstrate their ability to service the new loan. The Company maintains no effective control over the sold loans.

Loans totaling \$148.4 million were placed on nonaccrual status during 2012. Loans totaling \$27.2 million which were not 90 days past due as of December 31, 2012 were included in nonaccrual loans as of December 31, 2012. Additions to nonaccrual loans during 2012 were offset by \$58.4 million in gross charge-offs, \$41.2 million in payoffs and principal paydowns, \$41.5 million in loans that were transferred to other real estate owned, \$10.2 in loan sales and \$34.6 million in loans brought current. Additions to nonaccrual loans during the year ended December 31, 2012 were comprised of \$47.6 million in residential loans \$51.1 million in commercial real estate loans, \$44.7 million in commercial and industrial loans and \$5.0 million in consumer loans.

Table of Contents

The Company had \$94.6 million and \$99.6 million in total performing troubled debt restructured loans as of December 31, 2012 and 2011, respectively. Nonperforming TDR loans were \$10.0 million and \$38.9 million at December 31, 2012 and 2011, respectively, and are included in nonaccrual loans. Included in the total restructured loans as of December 31, 2012 and 2011 were \$34.8 million and \$22.8 million in performing A/B notes, respectively. In A/B note restructurings, the original note is bifurcated into two notes where the A note represents the portion of the original loan which allows for acceptable loan-to-value and debt coverage on the collateral and is expected to be collected in full and the B note represents the portion of the original loan where there is a shortfall in value and is fully charged-off. The A/B note is comprised of A note balances only. A notes are not disclosed as TDRs in years after the restructuring if the restructuring agreement specifies an interest rate equal to or greater than the rate that the Bank was willing to accept at the time of the restructuring for a new loan with comparable risk and the loan is performing based on the terms specified by the restructuring agreement. At December 31, 2012, the amount of unfunded commitments for restructured loans was \$607 thousand. As of December 31, 2012, restructured loans were comprised of \$10.1 million in single-family loans, \$38.5 million in multifamily loans, \$36.8 million in commercial real estate loans, \$1.5 million in CRE construction loans, \$10.9 million in CRE land loans, \$6.0 million in commercial business loans, \$579 thousand in trade finance loans, and \$108 thousand in consumer loans.

Non-covered other real estate owned includes properties acquired through foreclosure or through full or partial satisfaction of loans. As of December 31, 2012, the Company had OREO properties with a combined carrying value of \$32.9 million. Approximately 31% of the carrying value of OREO properties as of December 31, 2012 was located in California, compared to 62% in 2011. During 2012, the Company foreclosed on properties with an aggregate carrying value of \$40.6 million as of the foreclosure date. Additionally, the Company recorded \$5.1 million in write-downs. During this period, the Company also sold 47 OREO properties for total proceeds of \$34.1 million resulting in a total net gain on sale of \$232 thousand and recoveries totaling \$2.0 million. As of December 31, 2011, the Company had OREO properties with a carrying value of \$29.3 million. During 2011, the Company foreclosed on properties with an aggregate carrying value of \$38.0 million as of the foreclosure date. Additionally, the Company recorded \$3.0 million in write-downs. During this period, the Company also sold 51 OREO properties for total proceeds of \$26.6 million resulting in a total net loss on sale of \$151 thousand and charges against the allowance for loan losses totaling \$780 thousand. During the year ended December 31, 2010, the Company sold 79 OREO properties for total proceeds of \$39.5 million for a net loss on sale of \$145 thousand.

The following table sets forth information regarding nonaccrual loans, loans 90 or more days past due but not on nonaccrual, restructured loans and non-covered other real estate owned as of the dates indicated:

Table 11: *Nonperforming Assets*

	2012	2011	December 31, 2010	2009	2008
	<i>(Dollars in thousands)</i>				
Nonaccrual loans	\$ 108,109	\$ 145,632	\$ 172,929	\$ 173,180	\$ 214,607
Loans 90 or more days past due but not on nonaccrual					
Total nonperforming loans	\$ 108,109	\$ 145,632	\$ 172,929	\$ 173,180	\$ 214,607
Non-covered other real estate owned, net	32,911	29,350	21,865	13,832	38,302
Total nonperforming assets	\$ 141,020	\$ 174,982	\$ 194,794	\$ 187,012	\$ 252,909
Performing restructured loans	\$ 94,580	\$ 99,603	\$ 122,139	\$ 114,800	\$ 10,950
Total nonperforming assets to total assets	0.63%	0.80%	0.94%	0.91%	2.12%
Allowance for loan losses to nonperforming loans	212.18%	144.11%	133.24%	137.91%	82.95%
Nonperforming loans to total gross non-covered loans	0.89%	1.38%	1.93%	2.04%	2.60%

Covered nonperforming assets totaled \$231.1 million, representing 1.03% of total assets at December 31, 2012. These covered nonperforming assets are subject to the shared-loss agreements with the FDIC.

We evaluate loan impairment according to the provisions of ASC 310-10-35, *Receivables - Overall - Subsequent Measurement*. Under ASC 310-10-35, loans are considered impaired when it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan agreement, including scheduled interest payments. Impaired loans are measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as an expedient, at the loan's observable market price or the fair value of the collateral if the loan is collateral dependent, less costs to sell. If the measure of the impaired loan is less than the recorded investment in the loan, the deficiency will be charged off against the allowance for loan losses. Also, in accordance with ASC 310-10-35, loans that are considered impaired are specifically excluded from the quarterly migration analysis when determining the amount of the general valuation allowance for loan losses required for the period.

Table of Contents

At December 31, 2012, the Company's total recorded investment in impaired loans was \$200.5 million, compared with \$219.6 million at December 31, 2011. The decrease in impaired loans is largely due to a decrease in nonperforming loans. All nonaccrual and doubtful loans held for investment are included in impaired loans. Impaired loans at December 31, 2012 are comprised of single-family loans totaling \$18.2 million, multifamily loans totaling \$54.3 million, income producing commercial real estate loans totaling \$54.7 million, CRE construction loans totaling \$27.0 million, CRE land loans totaling \$15.1 million, commercial business loans totaling \$26.7 million and other consumer loans totaling \$4.5 million. As of December 31, 2012, the allowance for loan losses included \$11.5 million for impaired loans with a total recorded balance of \$33.3 million. As of December 31, 2011, the allowance for loan losses included \$13.0 million for impaired loans with a total recorded balance of \$30.4 million.

Our average recorded investment in impaired loans during 2012 and 2011 totaled \$214.0 million and \$252.4 million, respectively. During 2012 and 2011, gross interest income that would have been recorded on nonaccrual loans, had they performed in accordance with their original terms, totaled \$7.2 million and \$9.4 million, respectively. Of this amount, actual interest recognized on impaired loans, on a cash basis, was \$2.3 million and \$3.5 million, respectively.

**Allowance for Loan Losses**

We are committed to maintaining the allowance for loan losses at a level that is commensurate with the estimated inherent loss in the loan portfolio. In addition to regular quarterly reviews of the allowance for loan losses, we perform an ongoing assessment of the risks inherent in the loan portfolio. The allowance for loan losses is increased by the provision for loan losses which is charged against current period operating results, and is increased or decreased by the amount of net recoveries or charge-offs, respectively, during the period. While we believe that the allowance for loan losses is appropriate at December 31, 2012, future additions to the allowance will be subject to a continuing evaluation of inherent risks in the loan portfolio.

*Non-covered Loans*

At December 31, 2012, the allowance for loan losses on non-covered loans amounted to \$229.4 million, or 1.92% of total non-covered loans receivable, compared with \$209.9 million or 2.04% of total non-covered loans receivable at December 31, 2011. The \$19.5 million increase in the allowance for loan losses on non-covered loans at December 31, 2012, from year-end 2011, is primarily related to loan growth partially offset by the continued improvement in credit quality of the loan portfolio.

Credit quality continues to improve as nonaccrual loans decreased as compared to 2011. Net charge-offs on non-covered loans also decreased compared to 2011. However, the allowance for loan losses on non-covered loans continues to increase due to the new loan growth in the portfolio. As of December 31, 2012, the commercial and industrial, commercial real estate, residential, and consumer portfolio segments all increased as compared to December 31, 2011. The allowance coverage related to the residential portfolio has decreased slightly compared to December 31, 2011 while the loan portfolio has increased in total. The historical losses for residential loans have decreased and the newly originated loans have performed well with most of the new loans maintaining a Pass/Watch grade status, therefore the overall allowance related to the residential portfolio has decreased.

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

The allowance for unfunded loan commitments, off-balance sheet credit exposures, and recourse provisions is included in accrued expenses and other liabilities and amounted to \$9.4 million and \$11.0 million at December 31, 2012 and 2011, respectively. Net adjustments to the allowance for unfunded loan commitments, off-balance sheet credit exposures and recourse provisions are included in the provision for loan losses.

We recorded \$60.2 million in loan loss provisions on non-covered loans during 2012. In comparison, we recorded \$92.6 million in loan loss provisions on non-covered loans during 2011. During 2012, we recorded \$42.2 million in net charge-offs on non-covered loans representing 0.38% of average non-covered loans outstanding during the year. In comparison, we recorded net charge-offs totaling \$112.1 million, or 1.16% of average non-covered loans outstanding in 2011.

Table of Contents

*Covered Loans*

At December 31, 2012, included in covered loans are \$431.7 million of additional advances under the shared-loss agreements which are not accounted for under ASC 310-30, and are subject to the allowance for loan losses on covered loans. The Bank has considered these additional advances on commitments covered under the shared-loss agreements in the allowance for loan losses calculation. These additional advances are within our loan segments as follows: \$302.3 million of commercial and industrial loans, \$83.4 million of commercial real estate loans, \$34.5 million of consumer loans and \$11.5 million of residential loans. In comparison, at December 31, 2011, included in covered loans were \$583.8 million of additional advances under the shared-loss agreements which were not accounted for under ASC 310-30, and are subject to the allowance for loan losses on covered loans. These additional advances were within our loan segments as follows: \$390.3 million of commercial and industrial loans, \$149.1 million of commercial real estate loans, \$31.6 million of consumer loans and \$12.7 million of residential loans.

At December 31, 2012, the allowance for loan losses on covered loans amounted to \$5.2 million, compared with \$6.6 million at December 31, 2011. The \$1.5 million decrease in the allowance for loan losses on covered loans at December 31, 2012, compared to year-end 2011, primarily reflects \$5.0 million in additional loan loss provisions, less \$6.5 million in net charge-offs recorded during 2012, specifically during the third quarter of 2012.

We recorded \$5.0 million in loan loss provisions on covered loans during the full year 2012 compared to \$2.4 million during 2011. We recorded net charge-offs of \$6.5 million for the year ended December 31, 2012. In comparison, we did not record any net charge-offs on covered loans in 2011. The \$6.5 million of charge-offs are mainly related to three specific loans and are 80% reimbursable by the FDIC through loss-share agreements, resulting in a net loss to the Company of \$1.3 million.

The \$5.2 million in allowance for loan losses on covered loans at December 31, 2012 is allocated within our loan segments as follows: \$2.5 million for commercial real estate loans, \$2.3 million for commercial and industrial loans, \$194 thousand for consumer loans and \$87 thousand for residential loans. In comparison, the \$6.6 million in allowance for loan losses on covered loans at December 31, 2011 was allocated within our loan segments as follows: \$4.0 million for commercial real estate loans, \$2.4 million for commercial and industrial loans, \$174 thousand for consumer loans and \$70 thousand for residential loans.

Table of Contents

The following table summarizes activity in the allowance for loan losses for the periods indicated:

Table 12.1: Allowance for Loan Losses 2012, 2011 and 2010

Net chargeoffs to average loans	5.69%	1.64%
Allowance for loan losses to total gross loans at end of year	2.81%	2.16%

(1) There was no allowance for covered loans as of December 31, 2009.

(2) The Company did not have covered loans as of December 31, 2008.

Our methodology to determine the allowance is based on a loss migration model and qualitative considerations. The migration analysis looks at pools of loans having similar characteristics and analyzes their loss rates over a historical period. We utilize historical loss factors derived from trends and losses associated with each pool over a specified period of time. Based on this process, we assign loss factors to each loan grade within each pool of loans. Loss rates derived by the migration model are based predominantly on historical loss trends that may not be indicative of the actual or inherent loss potential. As such, we utilize qualitative and environmental factors as adjusting mechanisms to supplement the historical results of the classification migration model. Qualitative considerations include, but are not limited to, prevailing economic or market conditions, relative risk profiles of various loan segments, volume concentrations, growth trends, delinquency and nonaccrual status, problem loan trends, and geographic concentrations. Qualitative and environmental factors are reflected as percent adjustments and are added to the historical loss rates derived from the classified asset migration model to determine the appropriate allowance amount for each loan pool.

Table of Contents

The following table reflects the Company's allocation of the allowance for loan losses by loan segment and the ratio of each loan segment to total loans as of the dates indicated.

Table 13.1: Allowance for Loan Losses by Loan Segment 2012 and 2011

	2012		At December 31,		2011	
	Amount	%	Amount	%	Amount	%
	<i>(Dollars in thousands)</i>					
Residential	\$ 49,349	25.8%	\$ 52,180	26.6%		
Commercial Real Estate	69,856	32.6%	66,457	37.2%		
Commercial and Industrial	105,376	35.3%	87,020	30.5%		
Consumer	4,801	6.3%	4,219	5.7%		
Covered loans subject to general reserves	5,153	%	6,647	%		
Total	\$ 234,535	100.0%	\$ 216,523	100.0%		

The increase of \$18.0 million in the allowance for loan losses at December 31, 2012, relative to year-end 2011, was primarily due to increases in the allowance for loan losses on commercial and industrial loans, commensurate with the increase in the portfolio.

**Deposits**

We offer a wide variety of deposit account products to both consumer and commercial customers. Total deposits increased \$856.4 million to \$18.31 billion at December 31, 2012, as compared to \$17.45 billion at December 31, 2011. The increase in total deposits was due to increases of \$1.04 billion in noninterest-bearing demand deposits, \$322.0 million in money market accounts, \$259.2 million in interest-bearing checking accounts, \$256.6 million in deposits, respectively. The increase was partially offset by a decrease of \$1.02 billion, or 14%, in time deposits. During 2012, we grew deposits from our retail network and commercial customers by \$1.19 billion and decreased brokered deposits by \$331.7 million.

As of December 31, 2012, time deposits within the Certificate of Deposit Account Registry Service ( CDARS ) program decreased to \$260.5 million, compared to \$580.9 million at December 31, 2011. The CDARS program allows customers with deposits in excess of FDIC-insured limits to obtain full coverage on time deposits through a network of banks within the CDARS program. Additionally, we partner with another financial institution to offer a retail sweep product for non-time deposit accounts to provide added deposit insurance coverage for deposits in excess of FDIC-insured limits. Deposits gathered through these programs are considered brokered deposits under current regulatory reporting guidelines.

Public deposits increased 18% to \$1.09 billion at December 31, 2012, from \$928.0 million at December 31, 2011. A large portion of these public funds are comprised of deposits from the State of California.

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

Time deposits greater than \$100 thousand were \$4.24 billion, representing 23% of the deposit portfolio at December 31, 2012. These accounts, consisting primarily of deposits by consumers, had a weighted average interest rate of 0.85% at December 31, 2012. The following table provides the remaining maturities at December 31, 2012 of time deposits greater than \$100 thousand:

Table 14: *Time Deposits \$100,000 or Greater*

	<i>(In thousands)</i>	
3 months or less	\$	1,510,199
Over 3 months through 6 months		861,021
Over 6 months through 12 months		1,183,595
Over 12 months		682,222
Total	\$	4,237,037

Table of Contents

**Borrowings**

We utilize a combination of short-term and long-term borrowings to manage our liquidity position. We had no federal funds purchased at the years ended December 31, 2012 and December 31, 2011. FHLB advances decreased 31% to \$313.0 million as of December 31, 2012, compared to \$455.3 million at December 31, 2011. The decrease in FHLB advances is consistent with our overall strategy to reduce our cost of funds. During 2012, long-term FHLB advances totaling \$93.0 million were prepaid, with prepayment penalties of \$6.8 million. Also in 2012, the Company modified \$300.0 million and \$75.0 million of fixed rate FHLB advances into adjustable rate, reducing the effective interest rate on these borrowings by 91 basis points and 86 basis points, respectively. The remainder of the decrease in FHLB advances is due to a \$48.2 million modification cost incurred by the Company during 2012 that has been deferred and treated as a discount on the corresponding debt.

In addition to FHLB advances, we also utilize securities sold under repurchase agreements ( repurchase agreements ) to manage our liquidity position. Repurchase agreements totaled \$995.0 million and \$1.02 billion as of December 31, 2012 and 2011, respectively. Included in these balances were \$25.2 million in short-term repurchase agreements as of December 31, 2011. No short-term repurchase agreements were outstanding as of December 31, 2012. During 2012, the Company modified \$200.0 million and \$150.0 million of long-term repurchase agreements, extending the terms and reducing the rate of these agreements by 86 basis points and 195 basis points, respectively. The interest rates for the long-term repurchase agreements are largely fixed ranging from 2.54% to 5.01% as of December 31, 2012. The counterparties have the right to a quarterly call for many of the repurchase agreements. Repurchase agreements are accounted for as collateralized financing transactions and recorded at the amounts at which the securities were sold. The collateral for these agreements consist of U.S. Government agency and U.S. Government sponsored enterprise debt and mortgage-backed securities.

**Long-Term Debt**

Long-term debt comprised of subordinated debt and junior subordinated debt decreased \$75.0 million or 35% to \$137.2 million as of December 31, 2012, compared to \$212.2 million as of December 31, 2011. The decrease was a result of the Company paying off \$75.0 million of subordinated debt carrying an effective interest rate of 1.60%, and incurring a prepayment penalty of \$42 thousand during 2012. As of December 31, 2012, long-term debt is comprised of junior subordinated debt, which qualifies as Tier I capital for regulatory purposes, issued in connection with our various pooled trust preferred securities offerings. Under the Dodd-Frank Wall Street Reform and Consumer Protection Act, bank holding companies with more than \$15 billion in total consolidated assets will no longer be able to include trust preferred securities as Tier I regulatory capital beginning in 2013 with complete phase-out by 2016.

**Off-Balance Sheet Arrangements and Aggregate Contractual Obligations**

In the course of our business, we may enter into or be a party to transactions that are not recorded on the balance sheet and are considered to be off-balance sheet arrangements. Off-balance sheet arrangements are any contractual arrangements whereby an unconsolidated entity is a party, under which we have: (1) any obligation under a guarantee contract; (2) a retained or contingent interest in assets transferred to an unconsolidated entity or similar arrangement that serves as credit, liquidity or market risk support to that entity for such assets; (3) any obligation under certain derivative instruments; or (4) any obligation under a material variable interest held by us in an unconsolidated entity that provides financing, liquidity, market risk or credit risk support to us, or engages in leasing, hedging or research and development services with us.

Table of Contents*Commitments*

As a financial service provider, we routinely enter into commitments to extend credit to customers, such as loan commitments, commercial letters of credit for foreign and domestic trade, standby letters of credit, and financial guarantees. Many of these commitments to extend credit may expire without being drawn upon. The same credit policies are used in extending these commitments as in extending loan facilities to customers. Under some of these contractual agreements, the Company may also have liabilities contingent upon the occurrence of certain events. A schedule of significant commitments to extend credit to customers as of December 31, 2012 is as follows:

Table 15: *Significant Commitments*

	<b>December 31, 2012</b>	
	<i>(In thousands)</i>	
Undisbursed loan commitments	\$	2,610,888
Standby letters of credit		2,078,463
Commercial letters of credit		77,110

A discussion of significant contractual arrangements under which the Company may be held contingently liable is included in Note 19 to the Company's consolidated financial statements presented elsewhere in this report. In addition, the Company has commitments and obligations under post-retirement benefit plans as described in Note 21 to the Company's consolidated financial statements presented elsewhere in this report.

*Contractual Obligations*

The following table presents, as of December 31, 2012, the Company's significant fixed and determinable contractual obligations, within the categories and payment dates described below. With the exception of operating lease obligations, these contractual obligations are included in the consolidated balance sheets. The payment amounts represent the amounts and interest contractually due to the recipient.

Table 16: *Contractual Obligations*

### Capital Resources

At December 31, 2012, stockholders' equity totaled \$2.38 billion, a 3.0% increase from the year-end 2011 balance of \$2.31 billion. The increase is comprised of the following: (1) net income of \$281.7 million recorded during 2012; (2) additional unrealized gain on investment securities available-for-sale, net of tax, of \$42.4 million; (3) stock compensation costs amounting to \$12.7 million related to grants of restricted stock and stock options; (4) issuance of common stock totaling \$4.4 million, representing 362,182 shares, pursuant to various stock plans and agreements; and (5) net tax benefit of \$462 thousand from various stock plans. These transactions were offset by: (1) repurchase of treasury stock pursuant to the stock repurchase program totaling \$199.9 million; (2) accrual and payment of cash dividends on common stock and preferred stock totaling \$64.4 million; (3) purchase of treasury shares related to vested restricted stock amounting to \$3.0 million, representing 137,258 shares; and (4) noncredit-related impairment loss on investment securities amounting to \$2.9 million, net of tax.

Historically, our primary source of capital has been the retention of operating earnings. In order to ensure adequate levels of capital, we conduct an ongoing assessment of projected sources, needs and uses of capital in conjunction with projected increases in assets and level of risk. As part of this ongoing assessment, the Board of Directors reviews the various components of capital and the adequacy of capital.

Table of Contents*Series A Preferred Stock Offering*

In April 2008, the Company issued 200,000 shares of 8% Non-Cumulative Perpetual Convertible Preferred Stock, Series A ( Series A ), with a liquidation preference of \$1,000 per share. The Company received \$194.1 million of additional Tier 1 qualifying capital, after deducting stock issuance costs. The proceeds from this offering were used to augment the Company's liquidity and capital positions and reduce its borrowings. See Note 22 of the Notes to Consolidated Financial Statements for additional information.

*Risk-Based Capital*

We are committed to maintaining capital at a level sufficient to assure our shareholders, our customers and our regulators that our company and our bank subsidiary are financially sound. We are subject to risk-based capital regulations and capital adequacy guidelines adopted by the federal banking regulators. These guidelines are used to evaluate capital adequacy and are based on an institution's asset risk profile and off-balance sheet exposures. According to these guidelines, institutions whose Tier I and total capital ratios meet or exceed 6.0% and 10.0%, respectively, may be deemed well-capitalized. At December 31, 2012, the Bank's Tier I and total capital ratios were 14.3% and 15.6%, respectively, compared to 14.7% and 16.3%, respectively, at December 31, 2011.

The following table compares East West Bancorp, Inc.'s and East West Bank's actual capital ratios at December 31, 2012, to those required by regulatory agencies for capital adequacy and well-capitalized classification purposes:

Table 17: *Regulatory Required Ratios*

	East West Bancorp	East West Bank	Minimum Regulatory Requirements	Well Capitalized Requirements
Total Capital (to Risk-Weighted Assets)	16.1%	15.6%	8.0%	10.0%
Tier 1 Capital (to Risk-Weighted Assets)	14.8%	14.3%	4.0%	6.0%
Tier 1 Capital (to Average Assets)	9.6%	9.3%	4.0%	5.0%

**ASSET LIABILITY AND MARKET RISK MANAGEMENT****Liquidity**

Liquidity management involves our ability to meet cash flow requirements arising from fluctuations in deposit levels and demands of daily operations, which include funding of securities purchases, providing for customers' credit needs and ongoing repayment of borrowings. Our liquidity is actively managed on a daily basis and reviewed periodically by the Asset/Liability Committee and the Board of Directors. This process is intended to ensure the maintenance of sufficient funds to meet the needs of the Bank, including adequate cash flow for off-balance

sheet instruments.

Our primary sources of liquidity are derived from financing activities which include the acceptance of customer and brokered deposits, federal funds facilities, repurchase agreement facilities, advances from the Federal Home Loan Bank of San Francisco, and issuances of long-term debt. These funding sources are augmented by payments of principal and interest on loans and securities. In addition, government programs, such as the FDIC's Temporary Liquidity Guarantee Program ( TLGP ), may influence deposit behavior. Primary uses of funds include withdrawal of and interest payments on deposits, originations and purchases of loans, purchases of investment securities, and payment of operating expenses.

During the years ended December 31, 2012, 2011 and 2010, we experienced net cash inflows from operating activities of \$287.5 million, \$255.3 million and \$869.2 million, respectively. Net cash inflows from operating activities were primarily due to net income earned during the year.

Net cash (outflows) inflows from investing activities totaled (\$758.9) million, (\$1.07) billion and \$93.2 million during 2012, 2011, and 2010, respectively. Net cash outflow from investing activities for 2012 and 2011 were primarily due to purchases of securities purchased under resale agreements and investment securities available-for-sale. Net cash inflows from investment activities for 2010 was primarily due to repayment, redemption and sales of investment securities offset by purchases of investment securities.

Table of Contents

During the years ended December 31, 2012 and 2011, we experienced net cash inflows from financing activities of \$364.2 million and \$914.2 million, respectively. Net cash inflows from financing activities for 2012 and 2011 were primarily due to the increase in deposits. During 2010, we had net cash outflows from financing activities of \$729.7 million primarily due to repayment of FHLB advances.

As a means of augmenting our liquidity, we have available a combination of borrowing sources comprised of the Federal Reserve Bank's discount window, FHLB advances, federal funds lines with various correspondent banks, and several master repurchase agreements with major brokerage companies. We believe our liquidity sources to be stable and adequate to meet our day-to-day cash flow requirements. At December 31, 2012, we are not aware of any trends, events or uncertainties that had or were reasonably likely to have a material effect on our liquidity position. As of December 31, 2012, we are not aware of any material commitments for capital expenditures in the foreseeable future.

The liquidity of East West Bancorp, Inc. has historically been dependent on the payment of cash dividends by its subsidiary, East West Bank, subject to applicable statutes, regulations and special approval. For the years ended December 31, 2012 and 2011, total dividends paid by the Bank to East West Bancorp, Inc. amounted to \$324.0 million and \$72.0 million, respectively. In January 2013, \$319.0 million in dividends were upstreamed to East West Bancorp. On January 23, 2013, the Board of Directors declared first quarter dividends on the Company's common stock and Series A preferred stock of \$20.00 and the Board of Directors authorized common stock dividends of \$0.15 per share for the first quarter of 2013.

**Interest Rate Sensitivity Management**

Our success is largely dependent upon our ability to manage interest rate risk, which is the impact of adverse fluctuations in interest rates on our net interest income and net portfolio value.

The fundamental objective of the asset liability management process is to manage our exposure to interest rate fluctuations while maintaining adequate levels of liquidity and capital. Our strategy is formulated by the Asset/Liability Committee, which coordinates with the Board of Directors to monitor our overall asset and liability composition. The Committee meets regularly to evaluate, among other things, the sensitivity of our assets and liabilities to interest rate changes, the book and market values of assets and liabilities, unrealized gains and losses on the available-for-sale portfolio (including those attributable to hedging transactions, if any), purchase and securitization activity, and maturities of investments and borrowings.

Our overall strategy is to minimize the adverse impact of immediate incremental changes in market interest rates (rate shock) on net interest income and net portfolio value. Net portfolio value is defined as the present value of assets, minus the present value of liabilities and off-balance sheet instruments. The attainment of this goal requires a balance between profitability, liquidity and interest rate risk exposure. To minimize the adverse impact of changes in market interest rates, we simulate the effect of instantaneous interest rate changes on net interest income and net portfolio value on a quarterly basis. The table below shows the estimated impact of changes in interest rates on net interest income and market value of equity as of December 31, 2012 and 2011, assuming a non-parallel shift of 100 and 200 basis points in both directions:

Table 18: *Rate Shock Table*

Edgar Filing: EAST WEST BANCORP INC - Form 10-K

Change in Interest Rates (Basis Points)	Net Interest Income Volatility (1)		Net Portfolio Value Volatility (2)	
	December 31, 2012	December 31, 2011	December 31, 2012	December 31, 2011
+200	9.0 %	6.2 %	6.3 %	2.4 %
+100	4.0 %	3.0 %	2.4 %	0.5 %
-100	(0.5)%	(0.9)%	(3.7)%	(5.9)%
-200	(0.8)%	(1.2)%	(6.8)%	(14.2)%

---

(1) The percentage change represents net interest income for twelve months in a stable interest rate environment versus net interest income in the various rate scenarios.

(2) The percentage change represents net portfolio value of the Bank in a stable rate environment versus net portfolio value in the various rate scenarios.

Table of Contents

All interest-earning assets, interest-bearing liabilities and related derivative contracts are included in the interest rate sensitivity analysis at December 31, 2012 and 2011. In a declining rate environment, the interest rate floors on these loans contribute to the favorable impact on our net interest income. However, in a rising rate environment, these interest rate floors also serve to lessen the full benefit of higher interest rates. At December 31, 2012 and 2011, our estimated changes in net interest income and net portfolio value were within the ranges established by the Board of Directors.

Our primary analytical tool to gauge interest rate sensitivity is a simulation model used by many major banks and bank regulators, and is based on the actual maturity and repricing characteristics of interest-rate sensitive assets and liabilities. The model attempts to predict changes in the yields earned on assets and the rates paid on liabilities in relation to changes in market interest rates. As an enhancement to the primary simulation model, prepayment assumptions and market rates of interest provided by independent broker/dealer quotations, an independent pricing model and other available public sources are incorporated into the model. Adjustments are made to reflect the shift in the Treasury and other appropriate yield curves. The model also factors in projections of anticipated activity levels by product line and takes into account our increased ability to control rates offered on deposit products in comparison to our ability to control rates on adjustable-rate loans tied to the published indices.

The following table provides the outstanding principal balances and the weighted average interest rates of our financial instruments as of December 31, 2012. The information presented below is based on the repricing date for variable rate instruments and the expected maturity date for fixed rate instruments.

Table 19: *Expected Maturity for Financial Instruments*

Expected maturities of assets are contractual maturities adjusted for projected payment based on contractual amortization and unscheduled prepayments of principal as well as repricing frequency. Expected maturities for deposits are based on contractual maturities adjusted for projected rollover rates for deposits with no stated maturity dates. We utilize assumptions supported by documented analyses for the expected maturities of our loans and repricing of our deposits. We also use prepayment projections for amortizing securities. The actual maturities of these instruments could vary significantly if future prepayments and repricing frequencies differ from our expectations based on historical experience.

Table of Contents

The fair values of interest-bearing deposits in other banks are based on the discounted cash flow approach. The discount rate is derived from the Bank's time deposit rate curve. The fair values of short-term investments generally approximate their book values due to their short maturities. For securities purchased under resale agreements, fair values are calculated by discounting future cash flows based on expected maturities or repricing dates utilizing estimated market discount rates and taking into consideration the call features of each instrument. The fair values of the investment securities are generally determined by reference to the average of at least two quoted market prices obtained from independent external brokers or prices obtained from independent external pricing service providers who have experience in valuing these securities. In obtaining such valuation information from third parties, the Company has reviewed the methodologies used to develop the resulting fair values. For the pooled trust preferred securities, the fair value was derived based on discounted cash flow analyses. The discount rate is derived from assumptions using an exit pricing approach related to the implied rate of return which have been adjusted for general changes in market rates, estimated changes in credit quality and liquidity risk premiums, and specific nonperformance and default experience in the collateral underlying the securities.

The fair value of deposits is determined based on the discounted cash flow approach. The discount rate is derived from the associated yield curve, plus spread, if any. For core deposits, the cash outflows are projected by the decay rate based on the Bank's core deposit premium study. Cash flows for all non-time deposits are discounted using the LIBOR yield curve. For time deposits, the cash flows are based on the contractual runoff and are discounted by the Bank's current offering rates, plus spread. For federal funds purchased, fair value approximates book value due to their short maturities. The fair value of FHLB term advances is estimated by discounting the cash flows through maturity or the next repricing date based on current rates offered by the FHLB for borrowings with similar maturities. Customer repurchase agreements, which have maturities ranging from one to three days, are presumed to have equal book and fair values because the interests rates paid on these instruments are based on prevailing market rates. The fair values of securities sold under repurchase agreements are calculated by discounting future cash flows based on expected maturities or repricing dates, utilizing estimated market discount rates and taking into consideration the call features of each instrument. For junior subordinated debt instruments, fair values are estimated by discounting cash flows through maturity based on current market rates the Bank would pay for new issuances.

The Asset/Liability Committee is authorized to utilize a wide variety of off-balance sheet financial techniques to assist in the management of interest rate risk. We may elect to use derivative financial instruments as part of our asset and liability management strategy, with the overall goal of minimizing the impact of interest rate fluctuations on our net interest margin and stockholders' equity. Currently, derivative instruments do not have a material effect on our operating results or financial position.

**ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

For quantitative and qualitative disclosures regarding market risk in our portfolio, see Management's Discussion and Analysis of Consolidated Financial Condition and Results of Operations - Asset Liability and Market Risk Management presented elsewhere in this report.

**ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA**

The financial statements of the Company, including the Report of Independent Registered Public Accounting Firm, are included in this report immediately following Part IV.

**ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE**

None.

**ITEM 9A. CONTROLS AND PROCEDURES**

*Disclosure Controls and Procedures*

As of December 31, 2012, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Exchange Act Rule 13a-15(e) and 15d-15(e). Based upon that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures are effective as of December 31, 2012.

Table of Contents

Our disclosure controls and procedures are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Our disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

*Management's Annual Report on Internal Control over Financial Reporting*

Management of the Company is responsible for establishing and maintaining effective internal control over financial reporting as defined in Rules 13a-15(f) under the Securities Exchange Act of 1934. The Company's internal control over financial reporting is designed to provide reasonable assurance to the Company's management and Board of Directors regarding the preparation and fair presentation of published financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2012. In making this assessment, management used the criteria set forth in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on our assessment, we concluded, as of December 31, 2012, the Company's internal control over financial reporting is effective based on those criteria.

*Changes in Internal Control over Financial Reporting*

There have been no changes in our internal control over financial reporting during the quarter ended December 31, 2012, that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

*Audit Report of the Company's Registered Public Accounting Firm*

The independent registered public accounting firm of KPMG LLP, as auditors of East West Bancorp's consolidated financial statements, has issued an audit report on the effectiveness of internal control over financial reporting based on criteria established in *Internal Control - Integrated Framework*, issued by COSO, which is presented on the following page.

Table of Contents

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

The Board of Directors and Stockholders  
East West Bancorp, Inc.:

We have audited East West Bancorp, Inc. and subsidiaries (the Company) internal control over financial reporting as of December 31, 2012, based on criteria established in the *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company, maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on criteria established in the *Internal Control Integrated Framework* issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of the Company as of December 31, 2012 and 2011, and the related consolidated statements of income, comprehensive income, changes in stockholders' equity and cash flows for each of the years in the three-year period ended December 31, 2012, and our report dated February 28, 2013 expressed an unqualified opinion on those consolidated financial statements.

Table of Contents

**ITEM 9B. OTHER INFORMATION**

None.

**PART III**

**ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE**

Information concerning directors and executive officers of the Company, to the extent not included under Item 1 under the heading *Executive Officers of the Registrant* appearing at the end of Part I of this report, will appear in the Company's definitive proxy statement for the 2013 Annual Meeting of Shareholders (the 2013 Proxy Statement), and such information either shall be (i) deemed to be incorporated herein by reference from the section entitled ELECTION OF DIRECTORS, if filed with the SEC pursuant to Regulation 14A not later than 120 days after the end of the Company's most recently completed fiscal year, or (ii) included in an amendment to this report filed with the SEC on Form 10-K/A not later than the end of such 120 day period. Additionally, information on compensation arrangements for the Board of Directors of the Company is set forth as Exhibit 10.12 Director Compensation.

**Code of Ethics**

The Company has adopted a code of ethics that applies to its principal executive officer, principal financial and accounting officer, controller, and persons performing similar functions. The code of ethics is posted on our internet website at [www.eastwestbank.com](http://www.eastwestbank.com).

**Audit Committee Financial Experts**

The Company has determined that all members of the Audit Committee, namely Directors Andrew Kane, Clarence Kwan, John Lee, Paul Irving and Keith Renken are Audit Committee Financial Experts as defined under Section 407 of the Sarbanes-Oxley Act of 2002 and the rules promulgated by the SEC in furtherance of Section 407. All members of the Audit Committee are independent of management.

**ITEM 11. EXECUTIVE COMPENSATION**

Information concerning executive compensation of the Company's named executives will appear in the 2013 Proxy Statement, and such information either shall be (i) deemed to be incorporated herein by reference from the sections entitled DIRECTOR COMPENSATION, COMPENSATION OF EXECUTIVE OFFICERS, COMPENSATION DISCUSSION AND ANALYSIS, and REPORT BY THE

COMPENSATION COMMITTEE, if filed with the SEC pursuant to Regulation 14A not later than 120 days after the end of the Company's most recently completed fiscal year, or (ii) included in an amendment to this report filed with the SEC on Form 10-K/A not later than the end of such 120 day period.

**ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS**

Information concerning security ownership of certain beneficial owners and management will appear in the 2013 Proxy Statement, and such information either shall be (i) deemed to be incorporated herein by reference from the sections entitled "BENEFICIAL STOCK OWNERSHIP OF PRINCIPAL STOCKHOLDERS AND MANAGEMENT" if filed with the SEC pursuant to Regulation 14A not later than 120 days after the end of the Company's most recently completed fiscal year, or (ii) included in an amendment to this report filed with the SEC on Form 10-K/A not later than the end of such 120 day period.

Table of Contents*Securities Authorized for Issuance Under Equity Compensation Plans*

The following table provides information as of December 31, 2012 regarding equity compensation plans under which equity securities of the Company were authorized for issuance.

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans excluding securities reflected in Column (a) (c)
Equity compensation plans approved by security holders	677,708	\$ 28.41	4,436,370
Equity compensation plans not approved by security holders			
<b>Total</b>	<b>677,708</b>	<b>\$ 28.41</b>	<b>4,436,370</b>

**ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE**

Information concerning certain relationships and related transactions will appear in the 2013 Proxy Statement, and such information either shall be (i) deemed to be incorporated herein by reference from the section entitled **CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS**, if filed with the SEC pursuant to Regulation 14A not later than 120 days after the end of the Company's most recently completed fiscal year, or (ii) included in an amendment to this report filed with the SEC on Form 10-K/A not later than the end of such 120 day period.

**ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES**

Information concerning principal accountant fees and services will appear in the 2013 Proxy Statement, and such information either shall be (i) deemed to be incorporated herein by reference from the section entitled **INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**, if filed with the SEC pursuant to Regulation 14A not later than 120 days after the end of the Company's most recently completed fiscal year, or (ii) included in an amendment to this report filed with the SEC on Form 10-K/A not later than the end of such 120 day period.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

The Board of Directors and Stockholders  
East West Bancorp, Inc.:

We have audited the accompanying consolidated balance sheet of East West Bancorp, Inc. and subsidiaries (the Company) as of December 31, 2012 and 2011 and the related consolidated statements of income, comprehensive income, changes in stockholders' equity and cash flows for each of the years in the three-year period ended December 31, 2012. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2012 and 2011 and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2012, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2012, based on criteria established in the *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 28, 2013 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

**EAST WEST BANCORP, INC. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**1. SUMMARY OF OPERATIONS AND SIGNIFICANT ACCOUNTING POLICIES**

***OPERATIONS SUMMARY***

East West Bancorp, Inc. (referred to herein on an unconsolidated basis as "East West" and on a consolidated basis as the "Company" or "we") is a registered bank holding company that offers a full range of banking services to individuals and small to mid-size businesses through its subsidiary bank, East West Bank and its subsidiaries ("East West Bank" or the "Bank"). The Bank is the Company's principal asset. The Bank operates 95 banking locations throughout California, six branches in New York, four branches in Georgia, two branches in Massachusetts, one branch in Texas, and four branches in Washington. In Greater China, the Bank's presence includes three full-service branches in Hong Kong, in Shanghai, and in Shantou. The Bank also has three representative offices in China located in Beijing, Guangzhou and Shenzhen and one in Taipei, Taiwan.

The Bank focuses on commercial lending, including commercial real estate loans, commercial business loans and trade finance loans. The Bank also provides financing for residential loans including single-family and multifamily loans. To a lesser extent, the Bank also makes construction development and consumer loans. Included in the Bank's locations are eleven in-store branches located in 99 Ranch Market stores in Southern and Northern California. The Bank's revenues are derived from providing financing for residential and commercial real estate and business customers, as well as investing activities. Funding for lending and investing activities is obtained through acceptance of customer deposits, Federal Home Loan Bank advances and other borrowing activities.

***SIGNIFICANT ACCOUNTING POLICIES***

***Basis of Presentation*** The consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America and general practices within the banking industry. The following is a summary of significant principles used in the preparation of the accompanying financial statements. In preparing the financial statements, management of the Company has made a number of estimates and assumptions pertaining to the reporting of assets and liabilities, including the fair value of assets acquired and liabilities assumed, the FDIC indemnification asset, valuation of OREO, the allowance for loan losses, the disclosure of contingent assets and liabilities and the disclosure of income and expenses for the periods presented in conformity with accounting principles generally accepted in the United States of America. Actual results could differ from those estimates.

***Principles of Consolidation*** The consolidated financial statements include the accounts of East West Bancorp, Inc., and its wholly owned subsidiaries, East West Bank and East West Insurance Services, Inc. Intercompany transactions and accounts have been eliminated in consolidation. East West also has seven wholly owned subsidiaries that are statutory business trusts (the "Trusts"). In accordance with Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 810, the Trusts are not consolidated into the accounts of East West Bancorp, Inc.

**Fair Value** Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date and, in many cases, may require us to make a number of significant judgments. Based on the observability of the inputs used in the valuation techniques, we classify our assets and liabilities measured and disclosed at fair value in accordance with a three-level hierarchy (e.g., Level 1, Level 2 and Level 3) established under ASC 820. In determining the fair value of financial instruments, we use market prices of the same or similar instruments whenever such prices are available. We do not use prices involving distressed sellers in determining fair value. If observable market prices are unavailable or impracticable to obtain, then fair value is estimated using modeling techniques such as discounted cash flow analyses. These modeling techniques incorporate our assessments regarding assumptions that market participants would use in pricing the asset or the liability, including assumptions about the risks inherent in a particular valuation technique and the risk of nonperformance.

**Securities Purchased Under Resale Agreements ( Resale Agreements )** The Company purchases securities under resale agreements with terms that range from one day to several years. These agreements are collateralized by mortgage-backed securities and mortgage or commercial loans that are generally held by a third party custodian. The purchases are over-collateralized to ensure against unfavorable market price movements. In the event that the fair value of the securities decreases below the carrying amount of the related repurchase agreement, the counterparty is required to deliver an equivalent value of additional securities. The counterparties to these agreements are nationally recognized investment banking firms that meet credit eligibility criteria and with whom a master repurchase agreement has been duly executed. Resale agreements that are short-term in nature, or have terms of up to 90 days, are included in cash and cash equivalents. Resale agreements with terms greater than 90 days are separately categorized.

Table of Contents

**Investment Securities** The Company classifies its investment securities according to their purpose and holding period. Investment securities available-for-sale are reported at estimated fair value, with unrealized gains and losses excluded from operations and reported as a separate component of accumulated other comprehensive income or loss, net of tax, in stockholders' equity.

The fair values of the investment securities are generally determined by independent external pricing service providers who have experience in valuing these securities and by comparison to and/or average of quoted market prices obtained from independent external brokers. In obtaining such valuation information from third parties, the Company has evaluated the methodologies used to develop the resulting fair values. The Company performs a monthly analysis on the broker quotes and the third party pricing service quotes to ensure that the prices represent a reasonable estimate of the fair value. The procedures include, but are not limited to, initial and ongoing review of third party pricing methodologies, review of pricing trends, and monitoring of trading volumes. The Company considers whether prices received from independent brokers represent a reasonable estimate of fair value through the use of internal and external cash flow models developed based on spreads, and when available, market indices. As a result of this analysis, if the Company determines there is a more appropriate fair value based upon the available market data, the price received from the third party is adjusted accordingly. Prices from third party pricing services are often unavailable for securities that are rarely traded or are traded only in privately negotiated transactions. As a result, certain securities are priced via independent broker quotations which utilize proprietary models that include observable market based inputs. Additionally, the majority of these independent broker quotations are non-binding.

The Company applies a modified valuation approach to certain investment securities for which it believes the current broker prices obtained are based on forced liquidation or distressed sale values in inactive markets. The fair value of each of these securities is individually determined based on a combination of the market approach, reflecting current broker prices, and the income approach, which is a discounted cash flow approach. In calculating the fair value derived from the income approach, the Company makes assumptions related to the implied rate of return, general change in market rates, estimated changes in credit quality and liquidity risk premium, specific non-performance and default experience in the collateral underlying the security; additionally, broker discount rates are taken into consideration in determining the discount rate. The values resulting from each approach (i.e. market and income approaches) are weighted to derive the final fair value of each security trading in an inactive market.

Amortization of premiums and accretion of discounts on securities are recorded as yield adjustments on such securities using the effective interest method. The specific identification method is used for purposes of determining cost in computing realized gains and losses on investment securities sold.

At each reporting date, the Company assesses whether there is an other-than-temporary impairment ( OTTI ) in its portfolio of investment securities. If we determine that a decline in fair value is other-than-temporary, an impairment loss is recognized in current earnings. When we have the intent and ability to hold debt securities with OTTI for a period necessary to recover the noncredit-related impairment losses, only the credit-related impairment losses are recognized in current earnings. In these instances, the noncredit-related impairment losses are charged to other comprehensive income. The Company examines all individual securities that are in an unrealized loss position at each reporting date for other-than-temporary impairment. Specific investment level factors that are examined to assess impairment include the nature of the investments, the severity and duration of the loss, the probability that the Company will be unable to collect all amounts due, an analysis of the issuers of the securities and whether there has been any cause for default on the securities, and any change in the rating of the securities by the various rating agencies. Additionally, management takes into consideration the Company's financial resources as well as the Company's overall ability and intent to hold the securities until their fair values recover.

The Company considers all available information relevant to the collectability of the security, including information about past events, current conditions, and reasonable and supportable forecasts, when developing the estimate of future cash flows and making its other-than-temporary impairment assessment for its portfolio of trust preferred securities. The Company considers factors such as remaining payment terms of the

security, prepayment speeds, expected defaults, the financial condition of the issuer(s), and the value of any underlying collateral.

Table of Contents

**Loans Receivable** Loans receivable that the Company has the intent and ability to hold for the foreseeable future, or until maturity, are stated at their outstanding principal, reduced by an allowance for loan losses and net deferred loan fees or costs on originated loans and unamortized premiums or discounts on purchased loans. Nonrefundable fees and direct costs associated with the origination or purchase of loans are deferred and netted against outstanding loan balances. The deferred net loan fees and costs are recognized in interest income as an adjustment to yield over the loan term using the effective interest method. Discounts or premiums on purchased loans are accreted or amortized to interest income using the effective interest method over the remaining period to contractual maturity adjusted for anticipated prepayments. Interest on loans is calculated using the simple-interest method on daily balances of the principal amounts outstanding. Accrual of interest is discontinued on a loan when management believes, after considering economic and business conditions and collection efforts, that the borrower's financial condition is such that full collection of principal or interest becomes uncertain, regardless of the length of past due status. Generally, loans are placed on nonaccrual status when they become 90 days past due. When interest accrual is discontinued, all unpaid accrued interest is reversed against interest income. In general, subsequent payments received are applied to the outstanding principal balance of the loan. A loan is returned to accrual status when the borrower has demonstrated a satisfactory payment trend subject to management's assessment of the borrower's ability to repay the loan.

Loans held for sale are carried at the lower of aggregate cost or fair value using the aggregate method. Origination fees on loans held for sale, net of certain costs of processing and closing the loans, are deferred until the time of sale and are included in the computation of the gain or loss from the sale of the related loans. A valuation allowance is established if the fair value of such loans is lower than their cost, with a corresponding charge to noninterest income.

**Troubled Debt Restructurings ( TDR )** A loan is identified as a troubled debt restructure when a borrower is experiencing financial difficulties and for economic or legal reasons related to these difficulties the Company grants a concession to the borrower in the restructuring that it would not otherwise consider. The Company has granted a concession when, as a result of the restructuring to a troubled borrower, it does not expect to collect all amounts due, including principal and/or interest accrued at the original terms of the loan. The concessions may be granted in various forms, including a below-market change in the stated interest rate, a reduction in the loan balance or accrued interest, an extension of the maturity date, or a note split with principal forgiveness. A restructuring executed at an interest rate that is at market interest rates is not a TDR. All troubled debt restructurings are reviewed for impairment. For modifications where we forgive principal, the entire amount of such principal forgiveness is immediately charged off. Generally, a nonaccrual loan that is restructured remains on nonaccrual status for a period of six months to demonstrate that the borrower can perform under the restructured terms. However, the borrower's performance prior to the restructuring, or other significant events at the time of restructuring may be considered in assessing whether the borrower can meet the new terms and may result in the loan remaining on accrual status or being returned to accrual status after a shorter performance period. If the borrower's performance under the new terms is not reasonably assured, the loan remains classified as a nonaccrual loan. Loans classified as TDRs are reported as impaired loans.

**Allowance for Loan Losses** The allowance for loan losses is established as management's estimate of probable losses inherent in the loan portfolio. The allowance is increased by the provision for loan losses and decreased by charge-offs when management believes the uncollectability of a loan is confirmed. Subsequent recoveries, if any, are credited to the allowance. The allowance for loan losses is evaluated on a regular basis by management and is based on management's periodic review of the collectability of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to revision as more information becomes available. Additionally, non-classified loans are also considered in the allowance for loan losses calculation and are factored in based on the historical loss experience adjusted for various qualitative factors.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect all scheduled payments of principal or interest due according to the contractual terms of the loan agreement. Factors considered by management in determining and measuring loan impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired.

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis for residential, commercial real estate, and commercial and industrial loans based on the loan's observable market price or the fair value of the collateral, less costs to sell, if the loan is collateral dependent, or the present value of expected future cash flows discounted at the loan's effective interest rate. If the measure of the impaired loan is less than the recorded investment in the loan, the deficiency is charged off against the allowance for loan losses. Consumer loans consist of homogeneous smaller balance loans and are reviewed on a collective basis for impairment.

**Acquired Loans** Acquired loans are valued as of acquisition date in accordance with ASC 805. Loans purchased with evidence of credit deterioration since origination for which it is probable that all contractually required payments will not be collected are accounted for under ASC 310-30. Further, the Company has elected to account for all other acquired loans within the scope of ASC 310-30 using the same methodology.

Table of Contents

Under ASC 805 and ASC 310-30, loans are recorded at fair value at acquisition date, factoring in credit losses expected to be incurred over the life of the loan. Accordingly, an allowance for loan losses is not carried over or recorded as of the acquisition date. In situations where loans have similar risk characteristics, loans are aggregated into pools to estimate cash flows under ASC 310-30. A pool is accounted for as a single asset with a single interest rate, cumulative loss rate and cash flow expectation.

The cash flows expected over the life of the loan or pool are estimated using an internal cash flow model that projects cash flows and calculates the carrying value of the loan or pool, book yield, effective interest income and impairment, if any, based on loan or pool level events, respectively. Assumptions as to default rates, loss severity, loss curves and prepayment speeds are utilized to calculate the expected cash flows.

At acquisition, the excess of the cash flows expected to be collected over the recorded investment is considered to be the accretable yield and is recognized as interest income over the life of the loan or pool. The excess of the contractual cash flows over the cash flows expected to be collected is considered to be the nonaccretable difference. Subsequent to the acquisition date, any increases in expected cash flows over those expected at purchase date in excess of fair value that are significant and probable are adjusted through the accretable difference on a prospective basis. Any subsequent decreases in expected cash flows over those expected at purchase date that are probable are recognized by recording an allowance for loan losses. Any disposals of loans, including sales of loans, payments in full or foreclosures result in the removal of the loan from the ASC 310-30 portfolio at the carrying amount.

**Covered Loans** Loans acquired in an FDIC-assisted acquisition that are subject to an FDIC shared-loss agreement are referred to as covered loans. Covered loans are reported exclusive of the expected cash flow reimbursements we expect to collect from the FDIC. All covered loans are accounted for under ASC 805 and ASC 310-30.

**FDIC Indemnification Asset** In conjunction with the FDIC-assisted acquisitions of Washington First International Bank and United Commercial Bank, the Bank entered into shared-loss agreements with the FDIC related to covered loans and covered other real estate owned (see Covered Other Real Estate Owned below). The FDIC indemnification asset is initially recorded at fair value, based on the discounted value of expected future cash flows under the shared-loss agreement. The Company has elected to account for amounts receivable under the shared-loss agreements as an indemnification asset in accordance with ASC 805. The difference between the present value and the undiscounted cash flows the Company expects to collect from the FDIC is accreted into noninterest income over the life of the FDIC indemnification asset. The FDIC indemnification asset is reviewed quarterly and adjusted for any changes in expected cash flows based on recent performance and expectations for future performance of the covered portfolio. These adjustments are measured on the same basis as the related covered loans and covered other real estate owned. Any increases in cash flow of the covered loans over those expected will reduce the FDIC indemnification asset and any decreases in cash flow of the covered loans over those expected will increase the FDIC indemnification asset. Over the life of the FDIC indemnification asset, increases and decreases are recorded as adjustments to noninterest income. In December 2010, the bank lowered the credit discount on the UCB covered loan portfolio as the credit quality was performing better than originally estimated. By lowering the credit discount, interest income will increase over the life of the loans. Correspondingly, with the lowered credit discount, the expected reimbursement from the FDIC under the loss sharing agreement will decrease, resulting in amortization on the FDIC indemnification asset which is recorded as a charge to noninterest income.

**Other Real Estate Owned** Other real estate owned ( OREO ) represents properties acquired through foreclosure or through full or partial satisfaction of loans, is considered held for sale, and is recorded at the lower of cost or estimated fair value at the time of foreclosure. Loan balances in excess of the fair value of the real estate acquired at the date of foreclosure are charged against the allowance for loan losses. After foreclosure, the real estate is carried at the lower of carrying value or fair value less costs to sell. Subsequent declines in the fair value of OREO below the carrying value are recorded through the use of a valuation allowance by charges to noninterest expense. Any subsequent operating expenses or income of such properties are also charged to noninterest expense. If the OREO is sold within three months of foreclosure, the Company substitutes the value received in the sale (net of costs to sell) for the fair value (less costs to sell). Any adjustment made to the loss

originally recognized at the time of foreclosure is then charged against or credited to the allowance for loan losses, if deemed material. Otherwise, any declines in value, after foreclosure, are recorded in non-interest expense as gains or losses from the sale or disposition of the real estate. Gain recognition upon disposition of a property is dependent on the sale having met certain criteria relating to the buyer's initial investment in the property sold.

Table of Contents

**Covered Other Real Estate Owned** All other real estate owned acquired in an FDIC-assisted acquisition that are subject to an FDIC shared-loss agreement are referred to as covered other real estate owned. Covered other real estate owned is reported exclusive of the expected cash flow reimbursements we expect to collect from the FDIC. Upon transferring covered loan collateral to covered other real estate owned status, acquisition date fair value discounts on the related loan are also transferred to covered other real estate owned. Fair value adjustments on covered other real estate owned result in a reduction of the covered other real estate carrying amount through expense and a corresponding increase of the FDIC reimbursement for 80% of the adjustment resulting in income. The net of that expense and income is the non-reimbursed portion or 20% of the estimated loss to the Bank which is the net amount charged against earnings.

**Investment in Affordable Housing Partnerships** The Company owns limited partnership interests in projects of affordable housing for lower income tenants. The investments in which the Company has a limited partnership interest that exceeds 5% are recorded using the equity method of accounting. The remaining investments are recorded using the cost method and are being amortized over the life of the related tax credits. The tax credits are being recognized in the consolidated financial statements to the extent they are utilized on the Company's income tax returns. The investments are reviewed for impairment on an annual basis or on an interim basis if an event occurs that would trigger potential impairment.

**Goodwill and Other Intangible Assets** The Company has goodwill, which represents the excess of the purchase price over the fair value of net assets acquired, as a result of various past acquisitions. Goodwill is not amortized and is reviewed for impairment on an annual basis or on an interim basis if an event occurs or circumstances change that would reduce the fair value of a reporting unit below its carrying value. Premiums on deposits, which represent the intangible value of depositor relationships resulting from deposit liabilities assumed in acquisitions, are amortized over the projected useful lives of the deposits, which is typically 7 to 15 years. Core deposit intangibles are reviewed for impairment whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Impairment on goodwill and premiums on deposits is recognized by writing down the asset to the extent that the carrying value exceeds the estimated fair value.

**Investment in Federal Home Loan Bank Stock** As a member of the Federal Home Loan Bank ( FHLB ) of San Francisco, the Bank is required to own common stock in the FHLB of San Francisco based upon our balance of residential mortgage loans and outstanding FHLB advances. As a result of the acquisition of WFIB in 2010, the Bank also owns common stock in the FHLB of Seattle. FHLB stock is carried at cost and may be sold back to the FHLB at its carrying value. Cash dividends are accrued and reported as dividend income.

**Investment in Federal Reserve Bank Stock** As a member of the Federal Reserve Bank ( FRB ) of San Francisco, the Bank is required to maintain stock in the FRB of San Francisco based on a specified ratio relative to our capital. FRB stock is carried at cost and may be sold back to the FRB at its carrying value. Cash dividends are accrued and reported as dividend income.

**Premises and Equipment** The Company's premises and equipment are stated at cost, less accumulated depreciation and amortization. Depreciation and amortization are computed based on the straight-line method over the estimated useful lives of the various classes of assets. The ranges of useful lives for the principal classes of assets are as follows:

Buildings and building improvements	25 years
Furniture, fixtures and equipment	3 to 7 years
Leasehold improvements	Term of lease or useful life, whichever is shorter

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

The Company reviews its long-lived assets for impairment annually or when events or circumstances indicate that the carrying amount of these assets may not be recoverable. An asset is considered impaired when the expected undiscounted cash flows over the remaining useful life is less than the net book value. When impairment is indicated for an asset, the amount of impairment loss is the excess of the net book value over its fair value.

**Securities Sold Under Repurchase Agreements ( *Repurchase Agreements* )** The Company sells securities under repurchase agreements. These transactions are accounted for as collateralized financing transactions and recorded at the amounts at which the securities were sold. The Company may have to provide additional collateral to the counterparty, as necessary.

**Long-Term Debt** Long-term debt consists of junior subordinated debt. The Company has established nine statutory business trusts whereby the Company is the owner of all the beneficial interests represented by the common securities of the Trusts, and third parties hold the fixed and variable rate capital securities of the Trusts. The purpose of issuing the capital securities was to provide the Company with a cost-effective means of obtaining Tier I capital for regulatory reporting purposes. However, these securities will be phased out of the Tier I capital beginning in 2013, fully phased out by 2016.

Table of Contents

The Trusts are not consolidated by the Company. Two of the nine trusts were dissolved during 2011. Junior subordinated debt represents liabilities of the Company to the Trusts and is included in long-term debt on the accompanying consolidated balance sheets.

**Federal Funds Purchased** The Company utilizes federal funds purchased as part of its short-term financing strategy. Federal funds purchased are generally overnight borrowings and mature within one business day to six months from the transaction date.

**Income Taxes** Deferred income taxes are recognized for the tax consequences in future years of differences between the tax bases of assets and liabilities and their financial reporting amounts at each year-end, based on enacted tax laws and statutory tax rates applicable to the periods in which the differences are expected to affect taxable income.

The Company examines its financial statements, its income tax provision, and its federal and state income tax returns and analyzes its tax positions, including permanent and temporary differences, as well as the major components of income and expense to determine whether a tax benefit is more likely than not to be sustained upon examination by tax authorities. In the event a tax position is not more likely than not to be sustained by the tax authorities, a reserve is established by management. The Company recognizes interest and penalties related to tax positions as part of its provision for income taxes.

**Stock-Based Compensation** The Company issues stock-based compensation to certain employees, officers, and directors and accounts for stock options using the fair value method, which generally results in compensation expense recognition.

**Transfers and Servicing of Financial Assets and Extinguishments of Liabilities** Transfers of financial assets are accounted for as sales, when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company; (2) the transferee has the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets; and (3) the Company does not maintain effective control over the transferred assets through either (a) an agreement that entitles and obligates the Company to repurchase or redeem them before their maturity or (b) an agreement that provides the Company with both the unilateral ability to cause the holder to return specific assets and a more than trivial benefit attributable to that ability. The difference between the net proceeds received and the carrying amount of the financial assets being sold is recognized as a gain or loss on sale.

**Earnings Per Share ( EPS )** The Company applies the two-class method of computing EPS. Under the two-class method, EPS is determined for each class of common stock and participating security according to dividends declared and participation rights in undistributed earnings. The Company's restricted stock, which receive dividends as declared, qualify as participating securities. Restricted stock units issued by the Company are not considered participating securities, as they do not have dividend distribution rights during the vesting period. Diluted EPS is calculated on the basis of the weighted average number of shares outstanding during the period plus potential dilutive shares.

**Comprehensive Income** The term comprehensive income describes the total of all components of comprehensive income, including net income and other comprehensive income. Other comprehensive income refers to revenues, expenses, and gains and losses that are included in comprehensive income but are excluded from net income because they have been recorded directly in equity under the provisions of other Financial Accounting Standards Board statements. In accordance with the adoption of ASU 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*, the Company presents comprehensive income in the consolidated statements of comprehensive income,

which was formerly presented in the consolidated statements of changes in stockholders' equity.

***Derivative Financial Instruments*** As part of the asset and liability management strategy, the Company uses derivative financial instruments to mitigate exposure to interest rate and foreign currency risks. All derivative instruments, including certain derivative instruments embedded in other contracts, are recognized on the consolidated balance sheet at fair value with the change in fair value reported in earnings. When master netting agreements exist, the Company nets counterparty positions with any cash collateral received or delivered.

Table of Contents

The Company's interest rate swaps on certain certificates of deposit qualify for hedge accounting treatment under ASC 815, *Derivatives and Hedging*. The Company documents its hedge relationships, including identification of the hedging instruments and the hedged items, as well as its risk management objectives and strategies for undertaking the hedge transaction at the time the derivative contract is executed. This includes designating the derivative contract as a fair value hedge which is a hedge of a recognized asset or liability. All derivatives designated as fair value hedges are linked to specific hedged items or to groups of specific assets and liabilities on the balance sheet. Both at inception and quarterly thereafter, the Company assesses whether the derivatives used in hedging transactions are highly effective (as defined in the guidance) in offsetting changes in the fair value of the hedged item. Retroactive effectiveness is also assessed as well as the continued expectation that the hedge will remain effective prospectively. Any ineffective portion of the changes of fair value hedges is recognized immediately in interest expense in the consolidated statements of income.

The Company discontinues hedge accounting prospectively when (i) a derivative is no longer highly effective in offsetting changes in the fair value, (ii) a derivative expires or is sold, terminated, or exercised, or (iii) the Company determines that designation of a derivative as a hedge is no longer appropriate. If a fair value hedge derivative instrument is terminated or the hedge designation removed, the previous adjustments to the carrying amount of the hedged liability would be subsequently accounted for in the same manner as other components of the carrying amount of that liability. For interest-bearing liabilities, such adjustments would be amortized into earnings over the remaining life of the respective liability.

The Company also offers various derivative products to clients and enters into derivative transactions in due course. These transactions are not linked to specific Company assets or liabilities in the consolidated balance sheets or to forecasted transactions in a hedge relationship and, therefore, do not qualify for hedge accounting. The contracts are marked-to-market each reporting period with changes in fair value recorded in the consolidated statements of income.

**Reclassifications** Certain items in the consolidated balance sheet and the consolidated statements of income for the years ended December 31, 2011 and 2010 were reclassified to conform to the 2012 and 2011 presentation, respectively. These reclassifications did not affect previously reported net income.

**RECENT ACCOUNTING STANDARDS**

In April 2011, the FASB issued ASU 2011-03, *Transfers and Servicing (Topic 860): Reconsideration of Effective Control for Repurchase Agreements*. ASU 2011-03 removes the transferor's ability criterion from the consideration of effective control for repos and other agreements that both entitle and obligate the transferor to repurchase or redeem financial assets before their maturity. The amendments in ASU 2011-03 remove from the assessment of effective control (1) the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee, and (2) the collateral maintenance implementation guidance related to that criterion. The FASB indicates that eliminating the transferor's ability criterion and related implementation guidance from an entity's assessment of effective control should improve the accounting for repos and other similar transactions. The amendments in ASU 2011-03 are effective for the first interim or annual period beginning on or after December 15, 2011 and are to be applied prospectively to transactions or modifications of existing transactions that occur on or after the effective date. Early adoption is not permitted. The adoption of this guidance did not have a material effect on the Company's consolidated financial statements.

In May 2011, the FASB issued ASU 2011-04, *Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. ASU 2011-04 addresses convergence between GAAP and International Financial Reporting Standards (IFRS) requirements for measurement of and disclosures about fair value. The amendments are not expected to have a

## Edgar Filing: EAST WEST BANCORP INC - Form 10-K

significant impact on companies applying GAAP. Key provisions of the amendment include: a prohibition on grouping financial instruments for purposes of determining fair value, except when an entity manages market and credit risks on the basis of the entity's net exposure to the group; an extension of the prohibition against the use of a blockage factor to all fair value measurements (that prohibition currently applies only to financial instruments with quoted prices in active markets); and a requirement that for recurring Level 3 fair value measurements, entities disclose quantitative information about unobservable inputs, a description of the valuation process used and qualitative details about the sensitivity of the measurements. In addition, for items not carried at fair value but for which fair value is disclosed, entities will be required to disclose the level within the fair value hierarchy that applies to the fair value measurement disclosed. The amendments in ASU 2011-04 are effective during interim and annual periods beginning after December 15, 2011. The adoption of this guidance did not have a material effect on the Company's consolidated financial statements.

Table of Contents

In June 2011, the FASB issued ASU 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*. ASU 2011-05 will require companies to present the components of net income and other comprehensive income either as one continuous statement or as two consecutive statements. It eliminates the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity. The standard does not change the items which must be reported in other comprehensive income, how such items are measured, or when they must be reclassified to net income. The FASB amended ASU 2011-05 in December 2011, with the issuance of ASU 2011-12, *Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05*. ASU 2011-12 defers only changes in ASU 2011-05 that relate to the presentation of reclassification adjustments. Both standards are effective for interim and annual periods beginning after December 15, 2011. The adoption of these standards only affected the presentation of the Company's consolidated financial statements and did not have an impact on the financial amounts presented in the statements.

In September 2011, the FASB issued ASU 2011-08, *Intangibles - Goodwill and Other (Topic 350): Testing Goodwill for Impairment*. ASU 2011-08 gives both public and nonpublic companies the option to qualitatively determine whether they can bypass the two-step goodwill impairment test under ASC 350-20, *Intangibles - Goodwill and Other: Goodwill*. Under ASU 2011-08, if a company chooses to perform a qualitative assessment and determines that it is more likely than not (a more than 50 percent likelihood) that the fair value of a reporting unit is less than its carrying amount, it would then perform Step 1 of the annual goodwill impairment test in ASC 350-20 and, if necessary, proceed to Step 2. Otherwise, no further evaluation would be necessary. The amended guidance is effective for interim and annual periods beginning after December 15, 2011. The Company has elected to continue to assess the two-step goodwill impairment, quantitatively. As such, this guidance did not have an impact on the Company's consolidated financial statements.

In December 2011, the FASB issued ASU 2011-11, *Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities*. ASU 2011-11 affects all entities that have financial instruments and derivative instruments that are either (1) offset in accordance with either Section 210-20-45 or Section 815-10-45 or (2) subject to an enforceable master netting arrangement or similar agreement. The requirements amend the disclosure requirements on offsetting in Section 210-20-50. This information is intended to enable users of an entity's financial statements to evaluate the effect or potential effect of netting arrangements on an entity's financial position, including the effect or potential effect of rights of setoff associated with certain financial instruments and derivative instruments in the scope of this ASU. The amended guidance is effective for interim and annual periods beginning after January 1, 2013 and should be applied retrospectively to all periods presented. The Company does not expect the adoption of the disclosure requirements to have a material effect on its consolidated financial statements.

In October 2012, the FASB issued ASU 2012-06, *Business Combinations (Topic 805): Subsequent Accounting for an Indemnification Asset Recognized at the Acquisition Date as a Result of a Government-Assisted Acquisition of a Financial Institution*. ASU 2012-06 clarifies the applicable guidance for subsequently measuring an indemnification asset recognized as a result of a government-assisted acquisition of a financial institution. The standard instructs that when a reporting entity recognizes an indemnification asset, it should subsequently account for the change in the measurement of the indemnification asset on the same basis as the change in the assets subject to indemnification. Any amortization of changes in value should be limited to the contractual term of the indemnification agreement. The amended guidance is effective for interim and annual periods beginning on or after December 15, 2012. Early adoption is permitted. The adoption of this guidance did not have a material effect on the Company's consolidated financial statements, as the Company had applied this methodology prior to the issuance of this ASU.

Table of Contents

**2. FAIR VALUE**

Fair value is defined as the price that would be received to sell an asset or be paid to transfer a liability in an orderly transaction between market participants at the measurement date. In determining fair value, the Company uses various methods including market and income approaches. Based on these approaches, the Company utilizes certain assumptions that market participants would use in pricing the asset or liability. These inputs can be readily observable, market corroborated, or generally unobservable inputs. The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. Based on the observability of the inputs used in the valuation techniques, the Company is required to provide the following information according to the fair value hierarchy noted below. The hierarchy is based on the quality and reliability of the information used to determine fair values. The hierarchy gives the highest priority to quoted prices available in active markets and the lowest priority to data lacking transparency. Financial assets and liabilities carried at fair value will be classified and disclosed in one of the following three categories:

- Level 1 Quoted prices for identical instruments that are highly liquid, observable and actively traded in over-the-counter markets. Level 1 financial instruments typically include U.S. Treasury securities.
- Level 2 Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose inputs are observable and can be corroborated by market data. Level 2 financial instruments typically include U.S. Government debt and agency mortgage-backed securities, municipal securities, corporate debt securities, single issuer trust preferred securities, equity swap agreements, foreign exchange options, interest rate swaps, impaired loans and other real estate owned ( OREO ).
- Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. This category typically includes pooled trust preferred securities, impaired loans and derivatives payable.

The Company records investment securities available-for-sale, equity swap agreements, derivative liabilities, foreign exchange options, interest rate swaps and short-term foreign exchange contracts at fair value on a recurring basis. Certain other assets such as impaired loans, other real estate owned, loans held for sale, goodwill, premiums on acquired deposits and other investments are recorded at fair value on a nonrecurring basis. Nonrecurring fair value measurements typically involve assets that are periodically evaluated for impairment and for which any impairment is recorded in the period in which the remeasurement is performed.

In determining the appropriate hierarchy levels, the Company performs a detailed analysis of assets and liabilities that are subject to fair value disclosure. The following tables present both financial and nonfinancial assets and liabilities that are measured at fair value on a recurring and nonrecurring basis. These assets and liabilities are reported on the consolidated balance sheets at their fair values as of December 31, 2012 and 2011. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to their fair value measurement. There were no transfers in and out of Levels 1 and 3 or Levels 2 and 3 during 2012 and 2011.

Table of ContentsAssets (Liabilities) Measured at Fair Value on a Recurring Basis  
as of December 31, 2012
