FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
 1934

For the quarterly period ended September 30, 2017

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the transition period from _____ to _____
Commission file number 001-33740

CYS Investments, Inc.
(Exact name of registrant as specified in its charter)

Maryland	20-4072657
(State or other jurisdiction of incorporation or organization)	(IRS Employer Identification No.)
500 Totten Pond Road, 6 th Floor, Waltham, Massachusetts	02451
(Address of principal executive offices)	(Zip Code)
(617) 639-0440	
(Registrant's telephone number, including area code)	

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or a an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer", "smaller reporting company", and "emerging growth company" in Rule 12b-2 of the Exchange Act. Check one:

Large accelerated filer <input checked="" type="checkbox"/>	Accelerated filer <input type="checkbox"/>
Non-accelerated filer <input type="checkbox"/> (Do not check if a smaller reporting company)	Smaller reporting company <input type="checkbox"/>
	Emerging growth company <input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Edgar Filing: CYS Investments, Inc. - Form 10-Q

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	October 26, 2017
Common Stock (\$0.01 par value)	155,010,011

CYS INVESTMENTS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

September 30, 2017

These footnotes to our accompanying unaudited consolidated financial statements in this interim report should be read in conjunction with the footnotes to our Annual Report on Form 10-K, filed with the SEC on February 17, 2017 (the "2016 Annual Report").

1. ORGANIZATION

CYS Investments, Inc. (the "Company", "we", "us" or "our") was formed as a Maryland corporation on January 3, 2006, and commenced operations on February 10, 2006. The Company has elected to be taxed and intends to continue to qualify as a real estate investment trust ("REIT") and is required to comply with the provisions of the Internal Revenue Code of 1986, as amended (the "Code"), with respect thereto. The Company primarily invests in residential mortgage-backed securities that are issued and the principal and interest of which are guaranteed by a federally chartered corporation ("Agency RMBS"), such as the Federal National Mortgage Association ("Fannie Mae") or the Federal Home Loan Mortgage Corporation ("Freddie Mac"), or an agency of the U.S. government such as the Government National Mortgage Association ("Ginnie Mae"), and debt securities issued by the United States Department of Treasury ("U.S. Treasuries"). The Company's investment guidelines provide that the Company may also purchase collateralized mortgage obligations issued by a government agency or government-sponsored entity that are collateralized by Agency RMBS ("CMOs"), or securities issued by a government sponsored entity that are not backed by collateral but, in the case of government agencies, are backed by the full faith and credit of the U.S. government, and, in the case of government sponsored entities, are backed by the integrity and creditworthiness of the issuer ("U.S. Agency Debentures").

The Company's common stock, Series A Cumulative Redeemable Preferred Stock, \$25.00 liquidation preference (the "Series A Preferred Stock"), and Series B Cumulative Redeemable Preferred Stock, \$25.00 liquidation preference (the "Series B Preferred Stock"), trade on the New York Stock Exchange under the symbols "CYS," "CYS PrA" and "CYS PrB," respectively.

In March 2015, our wholly-owned captive insurance subsidiary, CYS Insurance Services, LLC ("CYS Insurance"), was granted membership in the Federal Home Loan Bank ("FHLB") system, specifically in the FHLB of Cincinnati ("FHLBC"). Membership in the FHLBC obligated CYS Insurance to purchase FHLBC membership stock and activity stock, the latter being a percentage of the advances it obtained from the FHLBC. CYS Insurance sought both short-term advances ("Short-term FHLBC Advances") and long-term advances ("Long-term FHLBC Advances"), and collectively with Short-term FHLBC Advances ("FHLBC Advances") from the FHLBC. On January 12, 2016, the Federal Housing Finance Agency ("FHFA") issued a final rule (the "Final Rule") amending its regulations governing FHLBC Membership criteria for captive insurance companies. Under this Final Rule, which became effective on February 19, 2016, CYS Insurance's membership in the FHLBC was required to be terminated within one year of the effective date, it was not permitted to secure any new advances, and all FHLBC Advances were required to be repaid no later than February 19, 2017. The Company repaid all outstanding FHLBC Advances prior to September 30, 2016, and CYS Insurance's membership in the FHLBC was terminated on February 19, 2017.

2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP") and the instructions to the Securities and Exchange Commission ("SEC") Form 10-Q and Article 10, Rule 10-01 of Regulation S-X. Accordingly, the financial statements do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. The unaudited consolidated financial statements should be read in conjunction with the Company's audited financial statements as of and for the year ended December 31, 2016, included in the 2016 Annual Report. The results for interim periods are not necessarily indicative of the results to be expected for the entire fiscal year.

The unaudited consolidated financial statements include the accounts of the Company and all of its subsidiaries. All intercompany balances and transactions have been eliminated. The unaudited consolidated financial statements of the Company have been prepared on the accrual basis of accounting in accordance with GAAP. The preparation of financial statements in conformity with GAAP requires management to make a number of estimates and assumptions that affect the amounts reported in the unaudited consolidated financial statements and accompanying footnotes. Actual results could differ from these estimates and the differences may be material.

Table of Contents

Reclassification

Prior to January 1, 2016, FHLBC Advances were presented and disclosed separately on the Consolidated Balance Sheet and interest expense on all FHLBC Advances was reported in the aggregate with interest expense on repurchase agreements. Effective January 1, 2016, FHLBC Advances are presented on the balance sheet and disclosed in the aggregate, while interest expense on FHLBC Advances is reported separately from interest expense on repurchase agreements. Prior periods have been reclassified to conform to the current period presentation.

Cash and Cash Equivalents

Cash and cash equivalents represent cash held in banks, cash on hand, and liquid investments with original maturities of three months or less. We may have bank balances in excess of federally insured amounts; however, we deposit our cash and cash equivalents with high credit-quality institutions to minimize credit risk exposure. We have not experienced, and do not expect, any losses on our cash or cash equivalents.

Investments in Securities

The Company's investment securities are accounted for in accordance with the Financial Accounting Standards Board's ("FASB") Accounting Standards Codification ("ASC") 320-Investments-Debt and Equity Securities. These investments meet the requirements to be classified as available-for-sale under ASC 320. Therefore, our investment securities are recorded at fair market value on the Consolidated Balance Sheets. The Company has chosen to make a fair value election pursuant to ASC 825-Financial Instruments for its securities. Electing the fair value option requires the Company to record changes in the fair value of investments in the Consolidated Statement of Operations as a component of net unrealized gain (loss) on investments, which in management's view more appropriately reflects the results of operations for a particular reporting period as all securities activities will be recorded in a similar manner. The Company records its security purchase and sale transactions, including forward settling transactions, on a trade date basis. Realized gains and losses on securities transactions are recorded on an identified cost basis.

Agency RMBS

The Company's investments in Agency RMBS consist of pass-through certificates backed by fixed-rate, monthly-reset adjustable-rate loans ("ARMs") and Hybrid ARMs, the principal and interest of which are guaranteed by Fannie Mae, Freddie Mac or Ginnie Mae. Hybrid ARMs have interest rates that have an initial fixed period (typically three, five, seven or 10 years) and thereafter reset at regular intervals in a manner similar to ARMs.

Forward Settling Transactions

The Company engages in forward settling transactions to purchase or sell certain securities. Agency RMBS may include forward contracts for Agency RMBS purchases or sales of specified pools on a to-be-announced basis ("TBA Securities") that meet the regular-way scope exception in ASC 815-Derivatives and Hedging ("ASC 815"), and are recorded on a trade date basis to the extent it is probable that we will take or make timely physical delivery of the related securities. The Company maintains security positions such that sufficiently liquid assets will be available to make payment on the settlement date for securities purchased. The Agency RMBS purchased at the forward settlement date are typically priced at a discount to securities for settlement in the current month. Securities purchased on a forward settling basis are carried at fair value and begin earning interest on the settlement date. Gains or losses may occur on these transactions due to changes in market conditions or the failure of counterparties to perform under the contract.

Investment and Derivative Valuation

The Company has a pricing committee responsible for establishing valuation policies and procedures, and reviewing and approving valuations monthly. The pricing committee is composed of individuals from the finance and investment teams and other members of senior management. See Note 7, Fair Value Measurements, for additional details related to the fair value of the Company's assets and liabilities.

Interest Income

We record interest income and expense on an accrual basis. We accrue interest income based on the outstanding principal amount of the settled securities in our portfolio and their contractual terms. We amortize premiums and discounts using the effective interest method as prepayments occur, and this net amortization is either a reduction of or accretive to interest income from Agency RMBS in the accompanying Consolidated Statements of Operations. The Company does not estimate prepayments when calculating the yield to maturity on Agency RMBS.

Table of Contents

Other Investments

CYS Insurance was a member of the FHLBC. As a condition of its membership in the FHLBC, CYS Insurance was required to maintain FHLBC stock, both for membership and for the level of advances from the FHLBC to CYS Insurance. The Company accounted for its investment in FHLBC stock as a cost method investment in "Other investments" in the accompanying Consolidated Balance Sheets in accordance with ASC 325, Investments - Other. The Company periodically evaluated FHLBC stock for impairment in accordance with ASC 320-Investments-Debt and Equity Securities. Also included in other investments is a net investment in real estate that is recorded at fair value, inclusive of \$3.7 million of corresponding mortgage debt, with changes in estimated fair value recognized in the accompanying Consolidated Statements of Operations.

Repurchase Agreements and FHLBC Advances

Prior to the February 19, 2016 Final Rule effective date, which precluded the Company from securing new FHLBC Advances, we entered into FHLBC Advances, some of which had an initial maturity of more than one year that were collateralized by the Company's Agency RMBS and U.S. Treasuries (collectively, "Debt Securities"). The Company chose to make a fair value election pursuant to ASC 825-Financial Instruments for FHLBC Advances with initial terms greater than one year and, therefore, this debt was recorded at fair market value in the accompanying Consolidated Balance Sheets. The unpaid principal balance of FHLBC Advances with initial maturities less than one year generally approximated fair value due to the short-term nature of the instruments. We priced FHLBC Advances with an initial maturity greater than one year daily through a pricing service that used a discounted cash flow model to value the debt, and we periodically validated the prices we received through this process. Changes in the fair market value were recorded in current period earnings in the accompanying Consolidated Statements of Operations as a component of net unrealized gain (loss) on FHLBC Advances. Electing the fair value option permitted the Company to record changes in the fair value of FHLBC Advances along with that of our investments in the Consolidated Statements of Operations which, in management's view, more appropriately reflect the results of operations for a particular reporting period as all income producing assets and liabilities are recognized in a consistent manner. Borrowings under repurchase agreements ("repo borrowings") are, and FHLBC Advances were, collateralized by the Company's Debt Securities. The Company's repo borrowing counterparties are institutional dealers in fixed income securities and large financial institutions, and CYS Insurance's counterparty for FHLBC Advances was the FHLBC. Collateral pledged on repo borrowings is valued daily, and collateral that was pledged on FHLBC Advances was valued periodically, and our counterparties may require posting of additional collateral when the fair value of pledged collateral declines. Repo borrowing counterparties have, and the FHLBC had, the right to sell or repledge collateral pledged under repo borrowings and FHLBC Advances.

We account for our repo borrowings as short-term indebtedness under ASC 470-Debt; accordingly, these short-term instruments are reflected in our financial statements at their amortized cost, which approximates fair value due to their short-term nature.

Derivative Instruments

Included in Derivative Instruments are interest rate swaps and interest rate caps and TBA Derivatives (defined below). The Company uses interest rate swaps and caps (a "swap" or "cap", respectively) to economically hedge a portion of its exposure to market risks, including interest rate and extension risk. The objective of our risk management strategy is to reduce fluctuations in stockholders' equity over a range of interest rate scenarios. In particular, we attempt to manage the risk of the cost of our variable rate liabilities increasing during a period of rising interest rates.

During the term of a swap or cap, the Company makes and/or receives periodic payments and records unrealized gains or losses as a result of marking the swap or cap to fair value. We report the periodic payments and amortization of premiums on cap contracts under swap and cap interest expense in the accompanying Consolidated Statements of Operations. When the Company terminates a swap or cap, we record a realized gain or loss equal to the difference between the proceeds from (or the cost of) closing the transaction and the Company's cost basis in the contract, if any. Swaps involve a risk that interest rates will move contrary to the Company's expectations, thereby increasing the Company's payment obligation.

The Company's swaps and caps may be subject to a master netting arrangement ("MNA"), pursuant to which the Company may be exposed to credit loss in the event of non-performance by the counterparty to the swap or cap,

limited to the fair value of collateral posted in excess of the fair value of the contract in a net liability position and the shortage of the fair value of collateral posted for the contract in a net asset position. As of September 30, 2017 and December 31, 2016, the Company did not anticipate non-performance by any counterparty. Should interest rates move contrary to the Company's expectations, the Company may not achieve the anticipated benefits of the interest rate swap or cap and may realize a loss.

7

Table of Contents

While the Company's derivative agreements generally permit netting or setting-off derivative assets and liabilities with the counterparty, the Company reports derivative assets and liabilities on a gross basis in the accompanying Consolidated Balance Sheets. Derivatives are accounted for in accordance with ASC 815 which requires recognition of all derivatives as either assets or liabilities at fair value in the accompanying Consolidated Balance Sheets with changes in fair value recognized in the accompanying Consolidated Statements of Operations in "Net realized and unrealized gain (loss) on derivative instruments". Cash receipts and payments related to derivative instruments are classified in the accompanying Consolidated Statements of Cash Flows in accordance with GAAP in the operating activities section, while premium paid on interest rate caps and proceeds from the termination of interest rate caps are recorded in the investing activities section of the accompanying Consolidated Statements of Cash Flows.

The Company enters into TBA dollar roll transactions whereby the Company is not contractually obligated to accept delivery on the settlement date ("TBA Derivatives"). TBA Derivatives are accounted for as a series of derivative transactions. The fair value of TBA Derivatives is based on similar methods used to value Agency RMBS with gains and losses recorded in Net realized and unrealized gains (losses) on derivative instruments in the accompanying Consolidated Statements of Operations. TBA Derivative transactions involve moving the settlement of a TBA contract out to a later date by entering into an offsetting short position (referred to as a "pair off"), net settling the paired off positions for cash, and simultaneously purchasing a similar TBA contract for a later settlement date. The Company records such pair offs on a gross basis such that there is a sale of the original TBA Derivative and a subsequent purchase of a new TBA Derivative.

None of the Company's derivatives have been designated as hedging instruments for accounting purposes. Effective January 1, 2016, the Company recognized all TBAs that do not qualify for the regular-way scope exception under ASC 815 as derivatives.

Income Taxes

The Company has elected to be treated as a REIT under the Code. The Company will generally not be subject to federal income tax to the extent that it distributes 90% of its taxable income, after application of available tax attributes, within the time limits prescribed by the Code and as long as it satisfies the ongoing REIT requirements including meeting certain asset, income and stock ownership tests.

Leases

The Company occupies leased office space. The Company's lease is accounted for in accordance with ASC 840-Leases, and is classified as an operating lease. Rent expense is amortized on a straight-line basis over the lease term and is included in "General, administrative and other expense" in the accompanying Consolidated Statements of Operations.

Stock-based Compensation

The Company applies the provisions of ASC 718-Compensation-Stock Compensation, with regard to its equity incentive plans. ASC 718 covers a wide range of share-based compensation arrangements including stock options, restricted stock plans, performance-based awards, stock appreciation rights and employee stock purchase plans. ASC 718 requires that compensation costs relating to stock-based payment transactions be recognized in the consolidated financial statements. Compensation costs related to restricted common shares issued are measured at their estimated fair value at the grant date, and are amortized and expensed over the vesting period on a straight-line basis.

Earnings Per Share ("EPS")

The Company computes basic EPS using the two-class method by dividing net income (loss), after adjusting for the impact of unvested stock awards deemed to be participating securities, by the weighted-average number of common shares outstanding, calculated excluding unvested stock awards. The Company computes diluted EPS by dividing net income (loss), after adjusting for the impact of unvested stock awards deemed to be participating securities, by the weighted-average number of common shares outstanding, calculated excluding unvested stock awards, giving effect to common stock options and warrants, if they are dilutive. See Note 9, Earnings Per Share for EPS computations.

Recent Accounting Pronouncements

The following table provides a brief description of recent accounting pronouncements that could potentially impact the Company's unaudited consolidated financial statements:

Table of Contents

Accounting Standard	Description	Required Date of Adoption	Anticipated Effect on the Financial Statements
ASU 2017-09 Compensation - Stock Compensation (Topic 718); Scope of Modification Accounting	On May 10, 2017, the FASB issued ASU 2017-09, which amends the scope of modification accounting for share-based payment arrangements. The ASU provides guidance on the types of changes to the terms or conditions of share-based payment awards to which an entity would be required to apply modification accounting under ASC 718, (Compensation - Stock Compensation). Specifically, an entity would not apply modification accounting if the fair value, vesting conditions, and classification of the awards are the same immediately before and after the modification.	Effective for annual reporting periods, including interim periods within those annual reporting periods, beginning after December 15, 2017. Early adoption is permitted, including adoption in any interim period.	Not expected to have a significant impact on the consolidated financial statements.
ASU 2017-05 Other Income—Gains and Losses from the Derecognition of Nonfinancial Assets (Subtopic 610-20) Clarifying the Scope of Asset Derecognition Guidance and Accounting for Partial Sales of Nonfinancial Assets	On February 22, 2017, the FASB issued ASU 2017-05, which clarifies the scope of the Board’s recently established guidance on nonfinancial asset derecognition (ASC 610-20) as well as the accounting for partial sales of nonfinancial assets. The ASU conforms the derecognition guidance on nonfinancial assets with the model for transactions in the new revenue standard (ASC 606, as amended). The FASB issued the ASU in response to stakeholder feedback indicating that (1) the meaning of the term “in-substance nonfinancial asset” is unclear because the Board’s new revenue standard does not define it and (2) the scope of the guidance on nonfinancial assets is confusing and complex and does not specify how a partial sales transaction should be accounted for or which model entities should apply.	January 1, 2018. The effective date of the new guidance aligns with the requirements in the new revenue standard. If the entity decides to early adopt the ASU’s guidance, it must also early adopt ASC 606-Revenue from Contracts with Customers (and vice versa).	Not expected to have a significant impact on the consolidated financial statements.

Table of Contents

Accounting Standard	Description	Required Date of Adoption	Anticipated Effect on the Financial Statements
ASU 2017-01 Business Combinations (Topic 805) Clarifying the Definition of a Business	On January 5, 2017, the FASB issued ASU 2017-01 to clarify the definition of a business in ASC 805. The FASB issued the ASU in response to stakeholder feedback that the definition of a business in ASC 805 is being applied too broadly. In addition, stakeholders said that analyzing transactions under the current definition is difficult and costly. Concerns about the definition of a business were among the primary issues raised in connection with the Financial Accounting Foundation's post-implementation review report on FASB Statement No. 141(R), Business Combinations (codified in ASC 805). The amendments in the ASU are intended to make application of the guidance more consistent and cost-efficient. Real estate is less likely to be a "business" which will lead to more capitalization of transaction costs-vs-expensing.	January 1, 2018 (early adoption permitted).	Not expected to have a significant impact on the consolidated financial statements.
ASU 2016-15 Statement of Cash Flows (Topic 230) Classification of Certain Cash Receipts and Cash Payments ("ASU 2016-15") (a consensus of the Emerging Issues Task Force)	On August 26, 2016, the FASB issued ASU 2016-15, which amends ASC 230, Statement of Cash Flows ("ASC 230), to add or clarify guidance on the classification of certain cash receipts and payments in the statement of cash flows. ASC 230 lacks consistent principles for evaluating the classification of cash payments and receipts in the statement of cash flows. This has led to diversity in practice and, in certain circumstances, financial statement restatements. Consequently, the FASB issued ASU 2016-15 with the intent of reducing diversity in practice with respect to certain types of cash flows.	January 1, 2018 (early adoption is permitted). Entities must apply the guidance retrospectively to all periods presented but may apply it prospectively if retrospective application would be impracticable.	Not expected to have a significant impact on the consolidated financial statements.
ASU 2016-02 Leases (Topic 842)	The amendments require lessees to recognize a right-of-use asset and a liability to make lease payments in the balance sheets for most leases. The accounting for lessors is largely unchanged.	January 1, 2019 (early adoption permitted).	Not expected to have a significant impact on the consolidated financial statements.
ASU 2016-01 Financial Instruments - Overall (Subtopic 825-10) Recognition and Measurement of Financial Assets and	The amendments address certain aspects of recognition, measurement, presentation, and disclosure of financial instruments.	January 1, 2018 (early adoption permitted for a provision related to presentation of instrument-specific credit risk of liabilities accounted for under the	Not expected to have a significant impact on the consolidated financial statements.

Financial Liabilities

fair value option).

3. INVESTMENTS IN SECURITIES

The available-for-sale portfolio consisted of the following as of September 30, 2017 and December 31, 2016 (in thousands):

The following table presents the gross unrealized loss and fair values of our available-for-sale investments by length of time that such securities have been in a continuous unrealized loss position as of September 30, 2017 and December 31, 2016 (in thousands):

As of	Unrealized loss positions					
	Fair value	Less than 12 Months Unrealized loss	Greater than 12 months Fair value	Greater than 12 months Unrealized loss	Total Fair value	Total Unrealized loss
September 30, 2017	\$3,669,574	\$(23,348)	\$24,878	\$(110)	\$3,694,452	\$(23,458)
December 31, 2016	9,264,265	(140,909)	—	—	9,264,265	(140,909)

Table of Contents

The following table summarizes the Company's available-for-sale investments as of September 30, 2017 and December 31, 2016, according to their estimated remaining weighted-average maturity classifications:

	September 30, 2017		December 31, 2016	
	Fair Value	Amortized Cost	Fair Value	Amortized Cost
Less than one year	\$24,878	\$24,988	\$—	\$—
Greater than one year through five years	6,801,743	6,763,508	3,765,037	3,744,614
Greater than five years through ten years	6,283,870	6,264,884	8,864,309	8,978,537
Greater than ten years	—	—	19,385	19,583
Total	\$13,110,491	\$13,053,380	\$12,648,731	\$12,742,734

The following table summarizes our net realized gain (loss) from the sale of available-for-sale investments for the three months ended September 30, 2017 and 2016 (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30, 2017	September 30, 2016	September 30, 2017	September 30, 2016
Available-for-sale investments, at cost	\$822,503	\$7,041,173	\$5,686,484	\$13,846,416
Proceeds from sale of available-for-sale investments	817,288	7,059,328	5,595,394	13,902,132
Net realized gain (loss) on sale of available-for-sale investments	\$(5,215)	\$18,155	(91,090)	\$55,716
Gross gain on sale of available-for-sale investments	\$220	\$21,363	11,093	63,489
Gross (loss) on sale of available-for-sale investments	(5,435)	(3,208)	(102,183)	(7,773)
Net realized gain (loss) on sale of available-for-sale investments	\$(5,215)	\$18,155	\$(91,090)	\$55,716

The components of the carrying value of available-for-sale securities at September 30, 2017 and December 31, 2016 are presented below. A premium purchase price is generally due to the average coupon interest rates on these investments being higher than prevailing market rates; similarly, a discount purchase price is generally due to the average coupon interest rate on these investments being lower than prevailing market rates.

(in thousands)	September 30, 2017	December 31, 2016
Principal balance	\$12,684,568	\$12,285,204
Unamortized premium	374,852	458,709
Unamortized discount	(6,040)	(1,179)
Gross unrealized gains	80,569	46,906
Gross unrealized losses	(23,458)	(140,909)
Fair value	\$13,110,491	\$12,648,731

As of September 30, 2017, the weighted-average coupon interest rate on the Company's Agency RMBS and U.S. Treasuries was 3.48% and 1.36%, respectively. As of December 31, 2016, the weighted-average coupon interest rate on the Company's Agency RMBS and U.S. Treasuries was 3.37% and 0.63%, respectively. Actual maturities of Agency RMBS are generally shorter than their stated contractual maturities (which range up to 30 years), because they are affected by the contractual lives of the underlying mortgages, periodic payments and principal prepayments.

Table of Contents

Credit Risk

The Company believes it has minimal exposure to credit losses on its Debt Securities at September 30, 2017 and December 31, 2016. Principal and interest payments on Agency RMBS are guaranteed by Freddie Mac and Fannie Mae, while principal and interest payments on Ginnie Mae RMBS and U.S. Treasuries are backed by the full faith and credit of the U.S. government. Since September 2008, both Freddie Mac and Fannie Mae have operated in the conservatorship of the U.S. government. As of September 30, 2017, S&P maintained its AA+ rating for the U.S. government, while Fitch and Moody's rated the U.S. government AAA and Aaa, respectively. Since Fannie Mae and Freddie Mac are in U.S. government conservatorship, the implied credit ratings of Agency RMBS are similarly rated.

4. DERIVATIVE INSTRUMENTS

The Company enters into swaps and caps as part of its efforts to manage its interest rate exposure. The Company had the following activity in interest rate swap and cap transactions during the three and nine months ended September 30, 2017 and 2016 (in thousands):

September 30, 2017			September 30, 2016		
Trade Date	Transaction	Notional	Trade Date	Transaction	Notional
April 2017	Terminated	\$(500,000)	January 2016	Terminated	\$(500,000)
April 2017	Opened	500,000	May 2016	Terminated	(2,200,000)
May 2017	Terminated	(500,000)	May 2016	Opened	1,700,000
May 2017	Opened	500,000	September 2016	Terminated	(500,000)
June 2017	Opened	100,000	Net Decrease		\$(1,500,000)
August 2017	Opened	425,000			
August 2017	Terminated	(500,000)			
September 2017	Opened	500,000			
September 2017	Terminated	(500,000)			
Net Increase		\$25,000			

As of September 30, 2017 and December 31, 2016, the Company had pledged Debt Securities with a fair value of \$68.5 million and \$79.0 million, respectively, as collateral on derivative instruments. As of September 30, 2017, the Company had no cash pledged as collateral on derivative instruments. As of December 31, 2016, the Company pledged cash collateral of \$0.6 million on its derivative instruments. As of September 30, 2017, the Company had Agency RMBS and U.S. Treasuries of \$13.0 million and cash of \$77.3 million pledged to it as collateral for derivative instruments. As of December 31, 2016, the Company had Agency RMBS and U.S. Treasuries of \$33.0 million and cash of \$90.8 million pledged to it as collateral for derivative instruments. The table below summarizes information about our derivative and other hedging instrument assets and liabilities as of September 30, 2017 and December 31, 2016 (in thousands):

Table of Contents

		September 30, 2017		December 31, 2016	
Derivative and Other Hedging Instruments - Assets	Consolidated Balance Sheets	Notional	Fair Value	Notional	Fair Value
Interest Rate Swaps	Derivative assets, at fair value	\$6,475,000	\$79,300	\$6,450,000	\$80,608
Interest Rate Caps	Derivative assets, at fair value	2,500,000	27,860	2,500,000	42,532
TBA Derivatives	Derivative assets, at fair value	650,200	428	2,417,000	19,416
Total derivative assets at fair value		\$9,625,200	\$107,588	\$11,367,000	\$142,556
Derivative and Other Hedging Instruments - Liabilities	Consolidated Balance Sheets	Notional	Fair Value	Notional	Fair Value
Interest Rate Swaps	Derivative liabilities, at fair value	\$—	\$—	\$—	\$—
Interest Rate Caps	Derivative liabilities, at fair value	—	—	—	—
TBA Derivatives	Derivative liabilities, at fair value	2,140,300	(6,586)	1,870,000	(6,051)
Total derivative liabilities at fair value		\$2,140,300	\$(6,586)	\$1,870,000	\$(6,051)

The average notional value of the Company's TBA Derivatives during the three and nine months ended September 30, 2017 was \$1.9 billion and \$1.7 billion, respectively. The average notional value of the Company's TBA Derivatives during the three and nine months ended September 30, 2016 was \$3.0 billion and \$2.0 billion, respectively. The average notional value of the Company's swaps and caps during the three and nine months ended September 30, 2017 was \$9.0 billion, respectively. The average notional value of the Company's swaps and caps during the three and nine months ended September 30, 2016 was \$9.3 billion and \$9.7 billion, respectively.

The following table presents information about the net realized and unrealized gain (loss) on swap, cap and TBA Derivatives for the three and nine months ended September 30, 2017 and 2016 (in thousands):

Derivative Instrument Type	Location of Gain (Loss) on Derivative Instruments	Three Months Ended September 30,		Nine Months Ended September 30,	
		2017	2016	2017	2016
Interest rate swaps and caps	Swap and cap interest expense	\$(6,948)	\$(12,493)	\$(23,709)	\$(45,670)
Interest rate swaps, caps and TBA Derivatives	Net realized and unrealized gain (loss) on derivative instruments	22,117	63,625	2,781	(121,434)
Interest rate swaps, caps and TBA Derivatives	Net gain (loss) on derivative instruments	\$15,169	\$51,132	\$(20,928)	\$(167,104)

The swap and cap notional was \$9.0 billion at September 30, 2017 and December 31, 2016, and respectively 86% and 92% of our repo borrowings at September 30, 2017 and December 31, 2016.

Table of Contents

5. REPURCHASE AGREEMENTS AND FHLBC ADVANCES

The Company leverages its Debt Securities portfolio primarily through repo borrowings. Each of the Company's repo borrowings bears interest at a rate based on a spread above or below the London Interbank Offered Rate ("LIBOR"). While repo borrowings are the Company's principal source of borrowings, the Company may issue long-term debt (i.e., debt with an initial term greater than one year) to diversify credit sources and to manage interest rate and duration risk.

Certain information with respect to the Company's repo borrowings outstanding at the balance sheet dates is summarized in the table below.

(in thousands)	September 30, 2017	December 31, 2016		
Outstanding repurchase agreements	\$ 10,383,226	\$ 9,691,544		
Interest accrued thereon	\$ 24,018	\$ 16,170		
Weighted-average borrowing rate	1.27	% 0.89	%	
Weighted-average remaining maturity (in days)	62	53		
Fair value of pledged collateral ⁽¹⁾	\$ 10,850,607	\$ 10,198,641		

(1) Collateral for repo borrowings consists of Agency RMBS and U.S. Treasuries.

The following table presents the remaining contractual maturity of repo borrowings by collateral type as of September 30, 2017 and December 31, 2016 (in thousands):

September 30, 2017	Remaining contractual maturity			Total
	Up to 30 days	30-90 days	Greater than 90 days	
Agency RMBS	\$ 3,937,870	\$ 2,602,081	\$ 3,246,315	\$ 9,786,266
U.S. Treasuries	596,960	—	—	596,960
Total	\$ 4,534,830	\$ 2,602,081	\$ 3,246,315	\$ 10,383,226

December 31, 2016

Agency RMBS	\$ 4,113,286	\$ 3,694,937	\$ 1,883,321	\$ 9,691,544
Total	\$ 4,113,286	\$ 3,694,937	\$ 1,883,321	\$ 9,691,544

At September 30, 2017 and December 31, 2016, our amount at risk with any individual counterparty related to our repo borrowings was less than 2.1% and 2.6% of stockholders' equity, respectively. The amount at risk is defined as the excess of the fair value of the securities, including accrued interest, and cash, pledged to secure the repurchase agreement, over the amount of the repurchase agreement liability adjusted for accrued interest.

Prior to the issuance of the Final Rule, pursuant to the FHLBC terms and conditions of membership and applicable credit policies, CYS Insurance was able to obtain FHLBC Advances, secured by eligible collateral, including, but not limited to, residential mortgage-backed securities. As a direct result of the Final Rule, all FHLBC Advances were required to be repaid on or before February 19, 2017. The Company repaid all of its remaining FHLBC Advances prior to September 30, 2016.

Table of Contents

6. PLEDGED ASSETS

Assets Pledged to Counterparties

The following tables summarize assets pledged as collateral under repo borrowings, and derivative instruments by type, including securities pledged related to securities purchased or sold but not yet settled, as of September 30, 2017 and December 31, 2016 (in thousands):

September 30, 2017

Asset Type	Repurchase Agreements	Derivative Instruments*	Forward Settling Trades (TBAs)	Total
Agency RMBS - fair value	\$ 10,254,745	\$ 34,269	\$ 2,001	\$ 10,291,015

Assets Pledged from Counterparties

If the estimated fair value of our investment securities pledged as collateral increases due to changes in interest rates or other factors, we may require counterparties to return collateral to us, which may be in the form of identical or similar securities, or cash. As of September 30, 2017 and December 31, 2016, we had assets pledged to us as collateral under our repurchase agreements, derivative agreements and TBAs as summarized in the tables below (in thousands):

Total	\$ 125,520	\$ 2,021	\$ 127,541

* Includes amounts related to TBA Derivatives.

Cash collateral received is not restricted as to use and is recognized in "Cash and cash equivalents" with a corresponding amount recognized in "Payable for cash received as collateral" in the accompanying Consolidated Balance Sheets. The Company's collateral received in the form of securities from counterparties is disclosed in Note 4, Derivative Instruments.

The Company's Master Repurchase Agreements ("MRAs"), Master Securities Forward Transaction Agreements ("MSFTA") and ISDA Master Agreements ("ISDAs", and together with MRAs, the "Master Agreements") generally provide (unless specified otherwise) that the Company may sell, pledge, rehypothecate, assign, invest, use, commingle, dispose of, or otherwise use in its business any posted collateral it holds, free from any claim or right of any nature whatsoever of the counterparty. MSFTAs govern the considerations and factors surrounding the settlement of certain forward settling transactions, TBAs and secured borrowing transactions by and between the Company and our counterparties. As of September 30, 2017, \$13.0 million of assets were pledged to the Company under the Master Agreements, of which \$9.4 million were repledged by the Company to other counterparties at September 30, 2017. As of December 31, 2016, \$34.2 million of assets were pledged to the Company under the Master Agreements, of which \$2.7 million were repledged by the Company to other counterparties at December 31, 2016. Since title to these assets remain with the counterparty under the Master Agreements, these assets are not reflected in the accompanying Consolidated Balance Sheets.

Offsetting Assets and Liabilities

Certain of our repo borrowings and derivative transactions are governed by underlying agreements that generally provide for a right of offset under MNAs (or similar agreements), including in the event of default or in the event of bankruptcy of either party to the transactions. Under GAAP, if the Company has a contractual right of offset, the Company may offset the related asset and liability and report the net amount in the accompanying Consolidated Balance Sheets. However, the Company reports amounts subject to its MRAs and ISDAs in the Consolidated Balance Sheets on a gross basis without regard to such rights of offset.

Table of Contents

At September 30, 2017 and December 31, 2016, the Company's derivative assets and liabilities (by type) are as follows (in thousands):

September 30, 2017	Assets	Liabilities
Interest rate swap contracts	\$79,300	\$ —
Interest rate cap contracts	27,860	—
TBA derivatives	428	6,586
Total derivative assets and liabilities	107,588	6,586
Derivatives not subject to a Master Netting Agreement	78,084	—
Total assets and liabilities subject to a Master Netting Agreement	\$29,504	\$ 6,586

December 31, 2016	Assets	Liabilities
Interest rate swap contracts	\$80,608	\$ —
Interest rate cap contracts	42,532	—
TBA derivatives	19,416	6,051
Total derivative assets and liabilities	142,556	6,051
Derivatives not subject to a Master Netting Agreement	75,033	—
Total assets and liabilities subject to a Master Netting Agreement	\$67,523	\$ 6,051

Below are summaries of the Company's assets and liabilities subject to offsetting provisions (in thousands):

		Gross Amounts Not Offset in the Consolidated Balance Sheets			
As of	Description	Amount of Assets Presented in the Consolidated Balance Sheets	Instruments Available for Offset	Collateral Received ⁽¹⁾	Net Amount ⁽²⁾
September 30, 2017	Derivative assets	\$ 29,504	\$317	\$ 26,531	\$ 2,656
December 31, 2016	Derivative assets	67,523	3,145	49,801	14,577
		Gross Amounts Not Offset in the Consolidated Balance Sheets			
As of	Description	Amount of Liabilities Presented in the Consolidated Balance Sheets	Instruments Available for Offset	Collateral Pledged ⁽¹⁾	Net Amount ⁽²⁾
September 30, 2017	Derivative liabilities	\$ 6,586	\$317	\$ 6,269	\$ —
September 30, 2017	Repurchase agreements and FHLBC Advances	10,383,226	—	10,383,226	—
December 31, 2016	Derivative liabilities	6,051	3,145	2,906	—
December 31, 2016	Repurchase agreements and FHLBC Advances	9,691,544	—	9,691,544	—

(1) Collateral consists of Agency RMBS, U.S. Treasuries and Cash and cash equivalents. Excess collateral pledged is not shown for financial reporting purposes.

(2) Net amount represents the net amount receivable from (in the case of assets) and payable to (in the case of liabilities) the counterparty in the event of default.

7. FAIR VALUE MEASUREMENTS

The Company's valuation techniques are based on observable and unobservable inputs. ASC 820 establishes a fair value hierarchy that prioritizes and ranks the level of market price observability used in measuring financial instruments. Market price observability is affected by a number of factors, including the type of financial instrument, the characteristics specific to the financial instrument, and the state of the marketplace, including the existence and transparency of transactions between market participants. Financial instruments with readily available quoted prices in active markets generally will have a higher degree of market price observability and a lesser degree of judgment used in measuring fair value.

Financial instruments measured and reported at fair value are classified and disclosed based on the observability of inputs used in the determination, as follows:

Level 1: Generally includes only unadjusted quoted prices that are available in active markets for identical financial instruments as of the reporting date.

Level 2: Pricing inputs include quoted prices in active markets for similar instruments, quoted prices in less active or inactive markets for identical or similar instruments where multiple price quotes can be obtained, and other observable inputs, such as interest rates and yield curves.

Level 3: Pricing inputs are unobservable for the financial instruments and include situations where there is little, if any, market activity for the financial instrument. These inputs require significant judgment or estimation by management when determining fair value and generally represent anything that does not meet the criteria of Levels 1 and 2.

The estimated value of each asset reported at fair value using Level 3 inputs is approved by an internal committee composed of members of senior management, including our Chief Executive Officer, Chief Financial Officer, and other senior officers.

Excluded from the tables below are short-term financial instruments carried in our unaudited consolidated financial statements at cost basis, which is deemed to approximate fair value, primarily due to the short duration of these instruments, including cash and cash equivalents, receivables, payables, and repo borrowings with initial terms of one year or less.

Agency RMBS and U.S. Treasuries are generally valued based on prices provided by third-party pricing services, as derived from such services' pricing models. Inputs to the models may include, but are not limited to, reported trades, executable bid and ask prices, broker quotations, prices or yields of securities with similar characteristics, prepayment rates, benchmark curves or information pertaining to the issuer, as well as industry and economic events. The pricing services may also use a matrix approach, which considers information regarding securities with similar characteristics to determine the valuation for a security.

All valuations we receive from third-party pricing services or broker quotes are non-binding. The pricing committee reviews all prices. Generally, the Company does not adjust any of the prices received from third-party pricing services or brokers. Our pricing review includes comparisons of similar market transactions, alternative third-party pricing services and broker quotes, or comparisons to a pricing model. To ensure proper classification within the fair value hierarchy in ASC 820, the Company reviews the third-party pricing services' methodologies periodically to understand whether observable or unobservable inputs are being used.

We generally value swaps and caps using prices provided by broker quotations. Such broker quotations are based on the present value of fixed and projected floating rate cash flows over the term of the swap contract. Future cash flows are discounted to present value using swap rates provided by electronic data services or by brokers.

"Other investments" is comprised of our investment in FHLBC stock and our net investment in a real estate asset at fair value, inclusive of the corresponding \$3.7 million and \$3.8 million of mortgage debt at September 30, 2017 and December 31, 2016, respectively. Investment in real estate is considered to be a Level 3 asset to which we periodically

apply valuation techniques and/or impairment analysis.

The following tables provide a summary of the Company's assets and liabilities that are measured at fair value on a recurring basis, as of September 30, 2017 and December 31, 2016 (in thousands):

The table below presents a reconciliation of changes in Other investments classified as Level 3 and measured at fair value on a recurring basis in the accompanying Consolidated Balance Sheets for the three and nine months ended September 30, 2017 and 2016.

Level 3 Fair Value Reconciliation

(In thousands)	Three and Nine Months Ended September 30,	
	2017	2016
Other investments		
Beginning balance Level 3 assets	\$8,028	\$8,028
Change in net unrealized gain (loss)	—	—
Gross purchases	—	—
Gross sales	—	—
Net gain (loss) on sales	—	—
Transfers into (out of) Level 3	—	—
Ending balance Level 3 assets	\$8,028	\$8,028

The fair value of our net investment in a real estate asset is primarily derived internally, and is based on inputs observed from sales transactions of similar assets. We also rely on available industry information about capitalization rates and expected trends in rents and occupancy in determining estimates of the fair value of real estate. The significant unobservable input used in the fair value measurement of our net investment in real estate is the capitalization rate, which the Company estimated to be between 4.0% and 4.9% at September 30, 2017 and December 31, 2016.

Table of Contents**8. STOCKHOLDERS' EQUITY**

The Company has authorized 500,000,000 shares of common stock having a par value of \$0.01 per share. As of September 30, 2017 and December 31, 2016, the Company had issued and outstanding 154,990,047 and 151,434,917 shares of common stock, respectively.

The Company has authorized 50,000,000 shares of preferred stock having a par value of \$0.01 per share. As of September 30, 2017 and December 31, 2016, 3,000,000 shares of 7.75% Series A Cumulative Redeemable Preferred Stock (\$25.00 liquidation preference) were issued and outstanding. As of September 30, 2017 and December 31, 2016, 8,000,000 shares of 7.50% Series B Cumulative Redeemable Preferred Stock (\$25.00 liquidation preference) were issued and outstanding. The Series A Preferred Stock and Series B Preferred Stock are not redeemable before August 3, 2017 and April 30, 2018, respectively, except under circumstances where it is necessary to preserve the Company's qualification as a REIT, for federal income tax purposes, or the occurrence of a change of control. On or after August 3, 2017 and April 30, 2018, the Company may, at its option, redeem any or all of the shares of the Series A Preferred Stock and Series B Preferred Stock, respectively, at \$25.00 per share plus any accumulated and unpaid dividends to, but not including, the respective redemption date. The Series A Preferred Stock and Series B Preferred Stock have no stated maturity, and are not subject to a sinking fund requirement or mandatory redemption.

Equity Placement Program ("EPP")

On August 4, 2017, the Company entered into an equity distribution agreement (the "Equity Distribution Agreement") with JMP Securities LLC (the "Placement Agent") whereby the Company may, from time to time, publicly offer and sell up to 20,000,000 shares of the Company's common stock through at-the-market transactions and/or privately negotiated transactions. During the three months ended September 30, 2017, the Company issued 2,951,491 shares under the Equity Distribution Agreement at an average sales price of \$8.76 per share raising approximately \$25.5 million of net proceeds after deducting placement fees. As of September 30, 2017, 17,048,509 shares of common stock remained available for issuance to be sold under the Equity Distribution Agreement.

Dividend Reinvestment and Direct Stock Purchase Plan ("DSPP")

On September 15, 2017, the Company renewed its Dividend Reinvestment and Direct Stock Purchase Plan, whereby stockholders may reinvest cash dividends and purchase up to 10,000,000 shares of our common stock. Stockholders may also make optional cash purchases of shares of common stock subject to certain limitations detailed in the respective plan prospectus. For the nine months ended September 30, 2017, the Company issued 291,815 at an average sales price of \$8.77 per shares for net proceeds of \$2.5 million, after deducting placement fees. For the nine months ended September 30, 2016, the Company did not issue any shares under the DSPP. As of September 30, 2017, there were approximately 9.7 million shares available for issuance under the DSPP.

Share Repurchase Program

On November 15, 2012, the Company announced that its Board of Directors authorized the repurchase of shares of the Company's common stock having an aggregate value of up to \$250 million. Pursuant to this program, through July 20, 2014, the Company repurchased approximately \$115.7 million in aggregate value of its shares of common stock on the open market. On July 21, 2014, the Company announced that its Board of Directors authorized the repurchase of shares of the Company's common stock having an aggregate value of up to \$250 million, which included approximately \$134.3 million available for repurchase under the November 2012 authorization. Subsequently, during 2014 we repurchased 172,549 shares at a weighted-average purchase price of \$8.88 per share, for an aggregate purchase price of approximately \$1.5 million. For the year ended December 31, 2015, the Company repurchased 10,559,493 shares at a weighted-average purchase price of \$8.28 per share for an aggregate purchase price of approximately \$87.7 million. For the year ended December 31, 2016, the Company repurchased 673,166 shares at a weighted-average purchase price of \$7.85 per share for an aggregate purchase price of approximately \$5.3 million. Accordingly, the Company was authorized to repurchase shares of its common stock of approximately \$155.5 million as of December 31, 2016.

For the nine months ended September 30, 2017, we did not repurchase any shares of the Company's common stock.

For the nine months ended September 30, 2016, we repurchased 673,166 shares of the Company's common stock at a weighted-average purchase price of \$7.85, for an aggregate purchase price of approximately \$5.3 million. Accordingly, the Company was authorized to repurchase shares of its common stock of approximately \$155.5

million as of September 30, 2017 and September 30, 2016.

21

Table of Contents

Restricted Stock Awards

For the nine months ended September 30, 2017 and 2016, the Company granted 356,345 and 378,029 shares of restricted stock, respectively, to certain of its directors, officers and employees.

9. EARNINGS PER SHARE

Components of the computation of basic and diluted earnings per share ("EPS") are as follows (in thousands except per share amounts):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
Net income (loss)	\$88,185	\$79,010	\$ 172,430	\$ 196,551
Less dividends on preferred shares	(5,203)	(5,203)	(15,609)	(15,609)
Net income (loss) available to common stockholders	82,982	73,807	156,821	180,942
Less dividends paid:				
Common shares	(38,516)	(37,599)	(113,910)	(114,312)
Unvested shares	(232)	(254)	(697)	(789)
Undistributed earnings (loss)	44,234	35,954	42,214	65,841
Basic weighted-average shares outstanding:				
Common shares	151,562	150,378	150,981	150,520
Basic earnings (loss) per common share:				
Distributed earnings	\$0.25	\$0.25	\$ 0.75	\$ 0.76
Undistributed earnings (loss)	0.29	0.24	0.28	0.43
Basic earnings (loss) per common share	\$0.54	\$0.49	\$ 1.03	\$ 1.19
Diluted weighted-average shares outstanding:				
Common shares	151,562	150,378	150,981	150,520
Net effect of dilutive stock options ⁽¹⁾	—	—	—	—
	151,562	150,378	150,981	150,520
Diluted earnings (loss) per common share:				
Distributed earnings	\$0.25	\$0.25	\$ 0.75	\$ 0.76
Undistributed earnings	0.29	0.24	0.28	0.43
Diluted earnings (loss) per common share	\$0.54	\$0.49	\$ 1.03	\$ 1.19

⁽¹⁾ For the three and nine months ended September 30, 2017 and 2016, the Company had no stock options outstanding.

10. COMMITMENTS AND CONTINGENCIES

The Company enters into certain agreements that contain a variety of indemnifications, principally with broker-dealers. As of September 30, 2017 and December 31, 2016, no claims have been asserted against the Company under these indemnification agreements. Accordingly, the Company has no liabilities recorded for these agreements as of September 30, 2017 and December 31, 2016.

Table of Contents

The Company occupied leased office space for which the term expired on June 30, 2016. In September 2015, the Company entered into a new lease agreement with a commencement date of January 1, 2016, and an estimated rent commencement date of July 1, 2016 (the "New Lease"). The New Lease has an initial term of 84 months from the rent commencement date. All leases have been classified as operating leases. The Company's aggregate future minimum lease payments total approximately \$2.2 million. The following table details the lease payments (in thousands):

Years Ending December 31,	Lease Commitments
2017 (remaining)	\$ 89
2018	363
2019	373
2020	383
2021	393
Thereafter	606
	\$ 2,207

11. SUBSEQUENT EVENTS

The Company has evaluated subsequent events through October 26, 2017, the date these financial statements were issued, and determined that no events have occurred that would require adjustments to or disclosures in the accompanying unaudited consolidated financial statements.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

CYS Investments, Inc. (the "Company", "we", "us", or "our") is a specialty finance company created with the objective of achieving consistent risk-adjusted investment income. Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is intended to provide the reader of the Company's unaudited consolidated financial statements and accompanying notes with a narrative of management's perspective on the business underlying those financial statements and its financial condition and results of operations during the periods presented. The Company's MD&A is comprised of the following sections:

- Forward-Looking Statements,
- Executive Overview,
- Trends and Recent Market Activity,
- Financial Condition,
- Summary Financial Data,
- Results of Operations,
- Off-Balance Sheet Arrangements,
- Liquidity and Capital Resources,
 - Quantitative and Qualitative Disclosures about Short-Term Borrowings, and
- Inflation

The following information should be read in conjunction with our unaudited consolidated financial statements and accompanying notes included in Item 1 of this Quarterly Report on SEC Form 10-Q ("Quarterly Report"), as well as our Annual Report on Form 10-K for the fiscal year ended December 31, 2016, filed on February 17, 2017 (the "2016 Annual Report").

Forward Looking Statements

When used in this Quarterly Report, in future filings with the SEC or in press releases or other written or oral communications, statements which are not historical in nature, including those containing words such as "believe," "expect," "may," "will," "anticipate," "estimate," "plan," "continue," "intend," "should," or the negative of these words and similar expressions, are intended to identify "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and, as such, may involve known and unknown risks, uncertainties and assumptions. The forward-looking statements we make in this Quarterly Report include, but are not limited to, statements about the following:

- the effect of movements in interest rates on our assets, liabilities, and hedging instruments, and our net income;
- our investment, financing and hedging strategies;
 - the effect of U.S. government and foreign central bank actions on interest rates and the housing and credit markets, government sponsored entities and the economy;
- the effect of actual or proposed actions of the U.S. Federal Reserve (the "Fed"), the Federal Housing Finance Agency (the "FHFA") and the Fed Open Market Committee (the "FOMC") with respect to monetary policy, interest rates, inflation, unemployment or reducing the purchase of assets by the Fed;
- the effect of regulations that prevent or restrict the use of Agency RMBS or U.S. Treasuries as collateral for borrowings;
- the supply and availability of Agency RMBS;
- the effect of increased prepayment rates on the value of our assets;
- our ability to convert our assets into cash and cash equivalents or extend the financing terms related to our assets;
- the effect of widening credit spreads or shifts in the yield curve on the value of our assets and investment strategy;
- the types of indebtedness we may incur;
- our ability to achieve anticipated benefits from interest rate swaps and caps;

- our ability to quantify risks based on historical experience;
- our ability to be taxed as a real estate investment trust ("REIT") and to maintain an exemption from registration under the Investment Company Act of 1940, as amended (the "Investment Company Act");
- the tax limitations of capital loss carryforwards;
- our assessment of counterparty risk and/or the rise of counterparty defaults;
- our ability to meet short-term liquidity requirements with our cash flow from operations and borrowings;
- the effect of rising interest rates on unemployment, inflation and mortgage supply and demand;
- our liquidity;

Table of Contents

- our borrowing costs;
- changes in our investment guidelines and the composition of our investment portfolio;
- our asset valuation policies; and
- our dividend distribution policy.

Forward-looking statements are based on our beliefs, assumptions and expectations of our future performance, taking into account all information currently available to us. These beliefs, assumptions and expectations are subject to risks and uncertainties and can change as a result of many possible events or factors, not all of which are known to us. If a change occurs, our business, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements. The following factors could cause actual results to vary from our forward-looking statements:

- the factors referenced in this Quarterly Report;
- changes in our investment, financing and hedging strategies;
- the liquidity of our portfolio and our ability to borrow to finance our assets;
- the adequacy of our cash flow from operations and borrowings to meet our short- and long-term liquidity requirements;
- unanticipated changes in our industry, interest rates, the credit markets, the general economy or the real estate market;
- changes in interest rates and the market value of our Agency RMBS;
- changes in the prepayment rates on the mortgage loans underlying our Agency RMBS;
- actions by the U.S. government or the Fed that impact the value of our Agency RMBS, interest rates or the economy;
- changes in regulations affecting our business;
- changes in the U.S. government's credit rating or ability to pay its debts;
- our ability to maintain our qualification as a REIT for federal income tax purposes;
- our ability to maintain our exemption from registration under the Investment Company Act and the availability of such exemption in the future; and
- risks associated with investing in real estate assets, including changes in business conditions and the general economy.

These and other risks, uncertainties and factors, including those described elsewhere in this Quarterly Report, and in the Company's 2016 Annual Report, which has been filed with the Securities and Exchange Commission, could cause our actual results to differ materially from those projected in any forward-looking statements we make. All forward-looking statements speak only as of the date on which they are made. New risks and uncertainties arise over time and it is not possible to predict those events or how they may affect us. Except as required by law, we are not obligated to, and do not intend to, update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Executive Overview

We seek to achieve our objective of earning consistent risk-adjusted investment income by investing on a leveraged basis primarily in Agency RMBS. These investments consist of residential mortgage pass-through securities for which the principal and interest payments are guaranteed by a government-sponsored enterprise, such as the Federal National Mortgage Association ("Fannie Mae") and the Federal Home Loan Mortgage Corporation ("Freddie Mac"), or by a U.S. government agency, such as the Government National Mortgage Association ("Ginnie Mae") (collectively referred to as "GSEs" and each a "GSE"). We also may invest in debt securities issued by the United States Department of Treasury ("U.S. Treasuries"), collateralized mortgage obligations issued by a government agency or GSE that are collateralized by Agency RMBS ("CMOs"), or securities issued by a GSE that are not backed by collateral but, in the case of government agencies, are backed by the full faith and credit of the U.S. government, and, in the case of GSEs, are backed by the integrity and creditworthiness of the issuer ("U.S. Agency Debentures"). We commenced operations in February 2006, and completed our initial public offering in June of 2009. Our common stock, our 7.75% Series A Cumulative Redeemable Preferred Stock, \$25.00 liquidation preference (the "Series A Preferred Stock"), and our 7.50% Series B Cumulative Redeemable Preferred Stock, \$25.00 liquidation preference

(the "Series B Preferred Stock"), trade on the New York Stock Exchange under the symbols "CYS," "CYS PrA" and "CYS PrB," respectively.

We earn income from our investment portfolio which, as of September 30, 2017, was comprised principally of the Company's Agency RMBS and U.S. Treasuries (collectively, the "Debt Securities"). We finance our investments primarily through borrowings under repurchase agreements ("repo borrowings"), and, prior to the effective date of the Final Rule (as defined below) on February 19, 2016, FHLBC Advances (see further discussion below). Our economic net interest income, a

Table of Contents

non-GAAP measure, described in "Results of Operations" below, is generated primarily from the net spread, or difference, between the interest income we earn on our investment portfolio and the cost of our borrowings and hedging activities. The amount of economic net interest income we earn on our investments depends in part on our ability to control our financing costs, which comprise a significant portion of our operating expenses. Economic interest expense is comprised of interest expense, as computed in accordance with GAAP, plus swap and cap interest expense used to hedge our cost of funds, a component of net gain (loss) on derivative instruments in the Company's Consolidated Statements of Operations. The Company uses interest rate swaps to manage its exposure to changes in interest rates on its interest bearing liabilities by economically hedging cash flows associated with these borrowings. Presenting the contractual interest payments on interest rate swaps and caps with the interest paid on interest-bearing liabilities reflects the total contractual interest payments. This presentation depicts the economic cost of our financing strategy. Although we leverage our portfolio investments in Debt Securities to seek to enhance our potential returns, leverage also may exacerbate losses.

While we use hedging to attempt to manage some of our interest rate risk, we do not hedge all of our exposure to changes in interest rates. Our investments vary in interest rate and maturity compared with the rates and duration of the hedges we employ. As a result, it is not possible to insulate our portfolio from all potential negative consequences associated with changes in interest rates in a manner that will allow us to achieve attractive spreads on our portfolio. Consequently, changes in interest rates, particularly short-term interest rates, may significantly affect our net income. In addition to investing in issued pools of Agency RMBS, we regularly utilize forward settling transactions to purchase and sell certain securities, including forward settling purchases and sales of Agency RMBS where the pool is "to-be-announced" ("TBA"). Pursuant to a TBA, we agree to purchase or sell for future delivery, Agency RMBS with certain principal and interest terms and certain types of underlying collateral, but the particular Agency RMBS to be delivered is not specifically identified until shortly before the TBA settlement date. TBA securities that meet the regular-way securities scope exception from derivative accounting under ASC 815 - Derivatives and Hedging, are recorded on the trade date utilizing information associated with the specified terms of the transaction. TBAs are carried at fair value and begin earning interest on the settlement date. At times, the Company may enter into TBA contracts without having the contractual obligation to accept or make delivery ("TBA Derivatives") as a means of investing in and financing Agency RMBS via "dollar roll" transactions. TBA dollar roll transactions are accounted for as a series of derivative transactions. For other forward settling transactions, we agree to purchase or sell, for future delivery, Agency RMBS. However, unlike TBA Derivatives, these forward settling transactions reference an identified Agency RMBS.

In March 2015, our captive insurance subsidiary, CYS Insurance Services, LLC ("CYS Insurance"), was granted membership in the FHLBC and began obtaining FHLBC Advances from the FHLBC in the form of secured borrowings. Membership in the FHLBC permitted CYS Insurance to access a variety of products and services offered by the FHLBC, and obligated CYS Insurance to purchase FHLBC membership and activity stock, the latter being a percentage of the advances it obtained from the FHLBC. As with our repo borrowings, if the value of any assets pledged to the FHLBC as collateral for advances decreased, the FHLBC could require posting of additional collateral. On January 12, 2016, the FHFA issued a final rule (the "Final Rule") amending its regulations governing FHLBC Membership criteria for captive insurance companies. The Final Rule defines "insurance company" to exclude "captive insurers". Under this Final Rule, which became effective on February 19, 2016, CYS Insurance's membership in the FHLBC was required to terminate within one year of the effective date and it was not permitted to secure any new advances. In response to this action, the Company repaid all of its outstanding FHLBC Advances prior to September of 2016. CYS Insurance's membership in the FHLBC was terminated on February 19, 2017.

We have elected to be treated as a REIT for U.S. federal income tax purposes, and have complied with, and intend to continue to comply with, the provisions of the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"), with respect thereto. Accordingly, we generally do not expect to be subject to federal income tax on our REIT taxable income that we currently distribute to our stockholders if certain asset, income and ownership tests and recordkeeping requirements are fulfilled. Even if we maintain our qualification as a REIT, we may be subject to federal, state and local taxes on our income.

Trends and Recent Market Activity

Overview

Market performance in the Third Quarter was much like the quarter ended June 30, 2017 (the "Prior Quarter"). Geopolitical forces and central bank signals influenced the markets. In the Third Quarter, yields for U.S. Treasuries traded within a narrow 35 basis points ("bps") range. Early in the Third Quarter, interest rates moved to their lows for fiscal year 2017, but then retraced those movements. Concurrently, equity markets continued to advance to all-time highs.

Expectations for meaningful fiscal stimulus programs have diminished through the year, and the bond market has priced in low expectations for accelerating economic growth or a significant increase in inflation in the near term. Notably, in 2017 to date, 10-year U.S. Treasuries have traded in their tightest range (59 bps) since 1965. In the Third Quarter, U.S. Treasury yields

Table of Contents

trended lower as the Federal Reserve (the "Fed") acknowledged some concerns about continued low inflation and heightened North Korean tensions induced a flight to safety, pushing the yield on the 10-year U.S. Treasury to 2.04% in early September, its low for the year. In the final three weeks of the Third Quarter, yields increased as the Fed (as well as the Bank of England) signaled their determination to normalize interest rates over the coming quarters. The markets interpreted these public statements to mean the Fed would likely raise rates at the Federal Open Market Committee's ("FOMC") next meeting in December. The bond markets ended the Third Quarter with the 10-year U.S. Treasury yield at 2.33%, just 3 bps higher than the end of the Prior Quarter.

The yield curve continued to flatten during the Third Quarter as short-term bond yields increased more than longer-term yields due to rising expectations for a Fed increase in interest rates in December. Chairperson Yellen, in a September speech, suggested she supported a December rate hike noting that lower-than-target inflation can be attributed to some transitory factors. Chairperson Yellen also noted that the uncertain inflation outlook "strengthens the case for gradual tightening," implying that the terminal funds rate could continue to drift lower. Given the flatter yield curve driven by slowly rising short-term interest rates, we continue to expect our borrowing costs to slowly rise.

Prices of Agency residential mortgage-backed securities ("Agency MBS") remained firm in the Third Quarter despite the Fed's announced balance sheet normalization program, likely to commence in October as the Fed confirmed in its September 20 meeting. Agency MBS appreciated in price during the Third Quarter even as similar duration U.S. Treasuries increased more modestly. The relative outperformance of Agency MBS reflects several factors; (i) the Fed's normalization plans have been well-telegraphed and understood by the market for some time; and (ii) balance sheet normalization will begin modestly and is not expected to ramp up to its \$20 billion cap until October 2018. Additionally, these securities have been in demand by a wide variety of investors and offer attractive returns relative to corporate bonds and commercial real estate. Thirty-year Fannie Mae yields tightened by 9 bps relative to 7-year swap rates and by a commensurate amount relative to 7-year U.S. Treasuries. Fifteen-year Fannie Mae yields tightened by 10 bps relative to 5-year swaps and 9 bps relative to 5-year U.S. Treasuries. The majority of our Agency MBS holdings increased in price in the Third Quarter.

In early September, the postponement of the debt ceiling decision until early December 2017 took pressure off short-term borrowing markets. A restrained supply of U.S. Treasuries in the final months of 2017, necessary to achieve the required low-level of cash on the U.S. Treasury's books by the debt ceiling deadline on December 8th, may help hold repo rates at lower levels than previously expected for most of the fourth quarter of 2017. A growing shortage of U.S. Treasuries in the markets is likely to spill over to the short-term borrowing markets and should keep borrowing rates in-line with the federal funds target rate.

In the near-term, we expect that markets will continue to react to speculation and the ultimate nomination of the next Fed chair. This is likely to create volatility in the bond markets and potential opportunities for CYS.

Recent CYS Activity in Response to These Trends

We continue to identify and capitalize on opportunities the markets present to us on the asset, liability and hedge components of our business. During the Third Quarter, we replaced some of our 15-year Agency RMBS holdings with 3-year Treasuries as the market provided for special financing on U.S. Treasuries during this period, which resulted in higher net-interest income and lower price volatility in our portfolio. Prepayment rates continue to be moderate. The weighted average 1-month prepayment speeds increased to 9.5% during the Third Quarter from 7.5% in the Prior Quarter. The increase in prepayment speeds was partially offset by the asset repositioning during the Third Quarter. The net effect was a 7 bps decrease in the average yield on Debt Securities during the Third Quarter to 2.79% from 2.86% in the Prior Quarter.

We also took advantage of the low interest rate environment during the Third Quarter and rebalanced some of our hedges by terminating \$1 billion in notional of 7-year, cancelable swaps and replacing them with \$925 million notional of seven and ten year swaps, extending the duration of our hedges and meaningfully reducing our hedging costs. Terminating the aforementioned hedges resulted in a realized loss of \$(3.9) million during the Third Quarter.

Taken together, we expect the asset and hedge rebalancing to enhance earnings potential for several quarters and simultaneously reduce our interest rate risk.

Financial Condition

Our Agency RMBS were purchased at a net premium to their face value generally due to the average interest rates on these investments being higher than the prevailing market rates at the time of purchase. Inclusive of TBA Derivatives, as of September 30, 2017 and December 31, 2016, we had approximately \$376.4 million and \$452.3 million, respectively, of net unamortized premium included in the cost basis of our investments. TBA Agency RMBS, including those accounted for as derivatives, are included in the table below on a gross basis. Our Debt Securities portfolio, including TBA Derivatives, consisted of the following:

(1) TBAs are excluded from this calculation as they do not have a defined weighted-average loan balance or age until mortgages have been assigned to the pool.

The Constant Prepayment Rate ("CPR") represents the 3-month CPR of the Company's Agency RMBS held at (2) September 30, 2017 and December 31, 2016. The CPR experienced by the Company during the period may differ. Securities with no prepayment history are excluded from this calculation.

Duration measures the market price volatility of financial instruments as interest rates change, using Dollar Value of One Basis Point, or "DV01", methodology. We generally calculate duration using various third-party financial (3) models and empirical data. Different models and methodologies can produce different estimates of duration for the same securities. Duration estimates in the table are calculated utilizing Yield Book® software and may reflect adjustments based on our judgment.

(4) Includes \$400.6 million of forward settling transactions at December 31, 2016.

(5) Coupon represents the weighted-average coupon of Agency Hybrid ARMs.

* Includes TBA Derivatives with a fair value of \$(0.2) billion and \$(308.8) million at September 30, 2017 and December 31, 2016, respectively.

In October 2017, the monthly weighted-average experienced CPR of the Company's Debt Securities decreased to 8.6% from 10.0% in September 2017.

Hedging Instruments

The Company utilizes interest rate swap and cap contracts (a "swap" or "cap", respectively) to hedge the interest rate risk associated with the financing of our Debt Securities portfolio. As of September 30, 2017, the Company held swaps with an aggregate notional of approximately \$6.5 billion, a weighted-average fixed rate of 1.41%, and a weighted-average maturity of 3.5 years. This compares with interest rate swaps with a notional amount of \$6.5 billion, a weighted-average fixed rate of

Table of Contents

1.23%, and a weighted-average maturity of 3.0 years at December 31, 2016. The receive rate on the Company's swaps is the 3-month LIBOR. At September 30, 2017, the Company held caps with a notional of \$2.5 billion, a weighted-average cap rate of 1.28%, and a weighted-average maturity of 2.3 years. This compares with interest rate caps with a notional amount of \$2.5 billion, a weighted-average fixed rate of 1.28%, and a weighted-average maturity of 3.0 years at December 31, 2016.

Below is a summary of our interest rate swaps and caps as of September 30, 2017 and December 31, 2016:

September 30, 2017	Number of Contracts	Notional (000's)	Weighted-Average			Fair Value (000's)
			Rate	Maturity	Duration	
Interest Rate Swaps	22	\$6,475,000	1.41 %	April 2021	(3.15)	\$79,300
Interest Rate Caps	5	2,500,000	1.28 %	January 2020	(1.89)	27,860
	27	\$8,975,000	1.38 %	December 2020	(2.80)	\$107,160
December 31, 2016						
Interest Rate Swaps	17	\$6,450,000	1.23 %	January 2020	(2.72)	\$80,608
Interest Rate Caps	5	2,500,000	1.28 %	January 2020	(1.94)	42,532
	22	\$8,950,000	1.24 %	January 2020	(2.50)	\$123,140

Our swap and cap notional was \$8.98 billion and \$8.95 billion at September 30, 2017 and December 31, 2016, respectively, resulting in a hedge ratio of 86% at September 30, 2017, compared to 92% at December 31, 2016. The Company does not consider TBA Derivatives to be hedging instruments.

Liabilities

We finance our assets through repo borrowings, and prior to the February 19, 2016 effective date of the Final Rule, FHLBC Advances. Repo borrowings and FHLBC Advances are secured by our assets and generally bear interest rates that have historically moved in close relationship to LIBOR. At September 30, 2017 and December 31, 2016, we had liabilities pursuant to repo borrowings with 35 counterparties which are summarized below (dollars in thousands):

September 30, 2017		Weighted-Average			
Original Days to Maturity by Collateral Type	Repo Borrowings Outstanding	Percentage of Total	Interest Rate	Remaining Days to Maturity	Original Days to Maturity
Agency RMBS					
≤ 30 Days	\$2,522,264	24%	1.31%	14	26
> 30 to ≤ 60 Days	458,851	4%	1.28%	7	44

(1) The average settled Debt Securities is calculated by averaging the month end cost basis of settled Debt Securities during the period.

(2) The average total Debt Securities is calculated by averaging the month end cost basis of total Debt Securities and unsettled Debt Securities (inclusive of TBA Derivatives) during the period.

(3) The average repurchase agreements and FHLBC Advances are calculated by averaging the month-end repurchase agreements and FHLBC Advances balances during the period.

The average Debt Securities liabilities are calculated by adding the average month-end repurchase agreements and FHLBC Advances balances plus average unsettled Debt Securities (inclusive of TBA Derivatives) during the period.

(5) The average stockholders' equity is calculated by averaging the month-end stockholders' equity during the period.

(6) The average common shares outstanding are calculated by averaging the daily common shares outstanding during the period.

The leverage ratio is calculated by dividing (i) the Company's repurchase agreements and FHLBC Advances balance plus payable for securities purchased minus receivable for securities sold plus the net TBA Derivatives positions by (ii) stockholders' equity.

(8) The Hedge ratio for the period is calculated by dividing Interest Rate Swaps and Interest Rate Caps notional amount by total repurchase agreements.

(9) Book value per common share is calculated by dividing total stockholders' equity less the liquidation value of preferred stock at period end by common shares outstanding at period end.

(10) The weighted-average amortized cost of Agency RMBS and U.S. Treasuries is calculated using the weighted-average amortized cost by security divided by the current face at period end.

(11) The average yield on settled Debt Securities for the period is calculated by dividing total interest income by average settled Debt Securities.

(12) The average yield on total Debt Securities including Drop Income for the period is calculated by dividing total interest income plus Drop Income by average total Debt Securities. Drop Income was \$7.2 million and \$10.5 million for the three months ended September 30, 2017 and 2016, respectively. Drop Income was \$25.3

million and \$24.8 million for the nine months ended September 30, 2017 and 2016, respectively. Drop Income is a component of our net realized and unrealized gain (loss) on investments and net realized and unrealized gain (loss) on derivative instruments in the accompanying unaudited Consolidated Statements of Operations. Drop Income is the difference between the spot price and the forward settlement price for the same security on trade date. This difference is also the economic equivalent of the assumed net interest margin (yield minus financing costs) of the bond from trade date to settlement date. We derive Drop Income through utilization of forward settling transactions.

- (13) The average cost of funds for the period is calculated by dividing repurchase agreement and FHLBC Advances interest expense by average repurchase agreements and FHLBC Advances for the period.
- (14) The average cost of funds and hedge for the period is calculated by dividing repurchase agreement, FHLBC Advances and swap and cap interest expense by average repurchase agreements and FHLBC Advances.
- (15) The adjusted average cost of funds and hedge for the period is calculated by dividing repurchase agreement, FHLBC Advances and swap and cap interest expense by average Debt Securities liabilities.
- (16) The interest rate spread net of hedge for the period is calculated by subtracting average cost of funds and hedge from average yield on settled Debt Securities.

Table of Contents

- (17) The interest rate spread net of hedge including Drop Income for the period is calculated by subtracting adjusted average cost of funds and hedge from average yield on total Debt Securities including Drop Income.
- (18) The operating expense ratio for the period is calculated by dividing operating expenses by average stockholders' equity.
- (19) The total stockholder return on common equity is calculated as the change in book value plus dividend distributions on common stock divided by book value at the beginning of the period.
- (20) The CPR represents the weighted-average 1-month CPR of the Company's Agency RMBS during the period.
- * All percentages are annualized except total stockholder return on common equity.

Core Earnings

"Core Earnings" represents a non-GAAP financial measure and is defined as net income (loss) available to common stockholders excluding net realized and unrealized gain (loss) on investments and derivative instruments and net unrealized gain (loss) on FHLBC Advances. Management uses Core Earnings to evaluate the effective yield of the portfolio after operating expenses. The Company believes that providing users of the Company's financial information with such measures, in addition to the related GAAP measures, gives investors greater transparency and insight into the information used by the Company's management in its financial and operational decision-making.

The primary limitation associated with Core Earnings as a measure of our financial performance over any period is that it excludes the effects of net realized and unrealized gain (loss) on investments and derivative instruments, and net unrealized gain (loss) on FHLBC Advances. In addition, our presentation of Core Earnings may not be comparable to similarly-titled measures used by other companies, which may employ different calculations. As a result, Core Earnings should not be considered a substitute for our GAAP net income (loss), as a measure of our financial performance, or any measure of our liquidity under GAAP.

(In thousands)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
Non-GAAP Reconciliation:

Core Earnings	\$29,743	\$28,567	\$ 94,016	\$ 93,298

Results of Operations

Our Economic Net Interest Income, a non-GAAP measure, is generated primarily from the net spread, or difference, between the interest income we earn on our investment portfolio and the cost of our borrowings and hedging activities. The amount of Economic Net Interest Income we earn on our investments depends in part on our ability to control our financing costs, which comprise a significant portion of our operating expenses. Economic Interest Expense consists of interest expense, as computed in accordance with GAAP, plus swap and cap interest expense used to hedge our cost of funds, a component of net gain (loss) on derivative instruments in the Company's Consolidated Statements of Operations. The Company uses interest rate swaps to manage its exposure to changes in interest rates on its interest bearing liabilities by economically hedging cash flows associated with these borrowings. Presenting the contractual interest payments on interest rate swaps and caps with the interest paid on interest-bearing liabilities reflects the Company's total contractual interest payments. Economic Interest Expense depicts the economic cost of our financing strategy. We present the non-GAAP measures Economic Interest Expense, and Economic Net Interest Income to provide an economic measure of our interest income net of borrowing and hedge expense, and economic interest expense, which management uses to evaluate the Company's investments portfolio. We believe that providing users of our financial information with such measures in addition to the related GAAP measures gives users additional transparency into the information used by our management in its financial and operational decision-making, and that it is meaningful information to consider in addition to the related GAAP measure as these measures reflects the net

economic interest income earned and cost of financing and hedging our investment portfolio.

The following table provides GAAP measures of interest expense and net interest income and details with respect to reconciling these line items on a non-GAAP basis for each respective period.

Table of Contents

	Three Months Ended September 30,

Three Months Ended September 30, 2017 Compared to the Three Months Ended September 30, 2016

Net Income (Loss)

Net income available to common stockholders increased \$9.2 million to \$83.0 million for the Third Quarter, compared to net income of \$73.8 million for the three months ended September 30, 2016 (the "Third Quarter of 2016"), primarily due to (i) a \$49.5 million increase in net realized and unrealized gain on investments, (ii) a \$9.3 million increase in total interest income, (iii) a \$5.6 million decrease in swap and cap interest expense and (iv) a \$1.1 million decrease in total expenses, offset by (A) a \$41.5 million decrease in net realized and unrealized gain on derivative instruments and (B) a \$14.5 million increase in total interest expense. The major components that make up the net increase in net income available to common stockholders during the Third Quarter compared to the Third Quarter of 2016 are described in more detail below.

Interest Income and Asset Yield

Our principal source of income is interest income that we earn on our investment securities portfolio. Interest income, which consists primarily of interest income on Debt Securities, increased by \$9.3 million to \$79.0 million for the Third Quarter, from \$69.7 million for the Third Quarter of 2016. Our interest income increased as a result of an increase in the average yield on settled Debt Securities to 2.79% at September 30, 2017 from 2.38% at September 30, 2016, offset by a decrease in average settled Debt Securities to \$11.3 billion in the Third Quarter from \$11.7 billion in the Third Quarter of 2016, as further illustrated below (in thousands):

Change in Size		Change in Yield		Change in Size & Yield	
		Change in average yield		Change in average settled	
Change in average settled	\$(389,422)	0.41	%	\$(389,422)	
Q3 2016 average annualized yield	2.38 %	Q3 2016 average settled	\$11,725,021	Change in average yield	0.41 %
Quarterly change	\$(2,314)	Quarterly change	\$12,013	Quarterly change	\$(399)
				Total change	\$9,300

The increase in the average yield during the Third Quarter compared to the Third Quarter of 2016 largely resulted from a decrease in prepayment speeds. The Third Quarter weighted-average experienced CPR decreased to 9.5% compared to 14.0% for the Third Quarter of 2016. Amortization expense decreased by \$7.7 million to \$14.4 million during the Third Quarter from \$22.1 million in the Third Quarter of 2016 as a direct result of the decrease in CPR, coupled with a decrease in the average settled Debt Securities.

Table of Contents

Economic Net Interest Income

Our economic net interest income for the Third Quarter was \$40.0 million, and our interest rate spread, net of hedge, was 1.20%, compared to economic net interest income of \$39.7 million and an interest rate spread, net of hedge, of 1.21% for the Third Quarter of 2016. The increase in our economic net interest income was principally due to the \$9.3 million increase in total interest income and \$5.6 million decrease in swap and cap interest expense, offset by the \$14.5 million increase in interest expense further described above. While our economic net interest income is influenced significantly by the size of our portfolio and overall interest rate levels, we believe our interest rate spread net of hedge is an important performance indicator.

Economic Interest Expense and Cost of Funds

Economic interest expense for the Third Quarter, which consists of interest expense from repo borrowings, swap and cap contracts, and FHLBC Advances (solely as it relates to the Third Quarter of 2016), increased \$8.9 million to \$38.9 million from \$30.0 million for the three months ended September 30, 2016. Interest expense from repo borrowings and FHLBC Advances increased by \$14.5 million to \$32.0 million for the Third Quarter from \$17.5 million for the Third Quarter of 2016 due to a higher cost of funds, largely resulting from three separate 25 bps Fed rate hikes during the comparable period. As a result, our weighted-average cost of funds rose to 1.30% in the Third Quarter from 0.68% in the Third Quarter of 2016. The net increase in interest expense was partially offset by a decrease in our average repo borrowings and FHLBC Advances to \$9.8 billion for the Third Quarter from \$10.2 billion for the Third Quarter of 2016. The decrease in average repo borrowings and FHLBC Advances was consistent with the decrease in average settled Debt Securities during the Third Quarter compared to the Third Quarter of 2016. The table below illustrates the result of changes to the average amount of repurchase agreements and FHLBC Advances outstanding and the related rates on interest expense during the three months ended September 30, 2017 and 2016 (in thousands):

Change in Size		Change in Rate		Change in Size & Yield	
Change in average outstanding	\$(402,733)	Change in average rate	0.62	% Change in average outstanding	\$(402,733)
2016 average rate	0.68	% 2016 average outstanding	\$10,223,051	Change in average rate	0.62
Quarterly change	\$(689)) Quarterly change	\$15,804	Quarterly change	\$(623)
				Total change	\$14,492

Swap and cap interest expense decreased by \$5.6 million to \$6.9 million in the Third Quarter, from \$12.5 million in the Third Quarter of 2016. The decrease in swap and cap interest expense was primarily attributable to an increase in 3-month LIBOR, the receive leg of our swaps, combined with a decrease in the average aggregate swap and cap notional by \$0.3 billion to \$9.0 billion in the Third Quarter from \$9.3 billion in the Third Quarter of 2016. 3-month LIBOR increased to 1.33% at September 30, 2017 from 0.85% at September 30, 2016, driving the decrease in the weighted-average swap and cap net pay rate to 0.31% in the Third Quarter from 0.54% in the Third Quarter of 2016, as further illustrated in the table below (in thousands):

Change in Size		Change in Swap and Cap Net Pay Rate		Change in Size & Rate	
Change in average notional outstanding	\$(312,500)	Change in average rate	(0.23))% Change in average notional outstanding	\$(312,500)
2016 average rate	0.54	% 2016 average notional outstanding	\$9,325,000	Change in average rate	(0.23)
Quarterly change	\$(419)) Quarterly change	\$(5,304)	Quarterly change	\$178
				Total change	\$(5,545)

Our annualized weighted-average cost of funds including hedge was 1.59% for the Third Quarter compared to 1.17% for the Third Quarter of 2016. The increase in the weighted average cost of funds including hedge is largely attributable to an increase in cost of funds resulting from three separate 25 bps rate hikes during the comparable period, partially offset by the decrease in the swap and cap net pay rate, as further described above. The components of our cost of funds and hedging are (i) rates on our repo borrowings and FHLBC Advances ("Total Outstanding Borrowings"), (ii) rates on our swaps and caps, (iii) the size of our Total Outstanding Borrowings, and (iv) the total

notional amount of our swaps and caps.

Other Income (Loss)

For the Third Quarter, our total other income (loss) was \$46.3 million compared to \$33.1 million for the Third Quarter of 2016. The key components contributing to the change in total other income (loss) are discussed in more detail below.

35

Table of Contents

Net Realized and Unrealized Gain (Loss) on Investments and Drop Income

During the Third Quarter, our net realized and unrealized gain (loss) on investments increased by \$49.5 million to a net gain of \$31.1 million, compared to a net loss of \$(18.4) million for the Third Quarter of 2016 in response to an increase in the prices of Agency RMBS during the Third Quarter compared to the decrease in prices during Third Quarter of 2016. To illustrate, during the Third Quarter, the price of a 15-year 3.5% Agency RMBS increased \$0.09 to \$104.14 and during the Third Quarter of 2016, the price decreased \$0.56 to \$105.42. Furthermore, during the Third Quarter, the price of a 30-year 3.5% Agency RMBS increased \$0.38 to \$103.05, and during the Third Quarter of 2016, the price was unchanged at \$105.55.

During the Third Quarter and Third Quarter of 2016, we generated Drop Income of approximately \$7.2 million and \$10.5 million, respectively. The lower Drop Income during the Third Quarter was primarily due to lower volumes of forward settling transactions from which we derive Drop Income. During the Third Quarter, the average gross balance in the combined TBA Securities and TBA Derivatives portfolio was \$1.2 billion, a \$0.6 billion decrease compared to the average gross balance of \$1.9 billion for the Third Quarter of 2016. Drop Income is a component of our net realized and unrealized gain (loss) on investments and our net realized and unrealized gain (loss) on derivative instruments in the accompanying unaudited Consolidated Statements of Operations and is therefore excluded from Core Earnings. Drop Income is the difference between the spot price and the forward settlement price for the same Agency RMBS on the trade date. This difference is also the economic equivalent of the assumed interest rate spread net of hedge (yield less financing costs) of the Agency RMBS from trade date to settlement date. The Company derives Drop Income through utilization of forward settling transactions of Agency RMBS.

Net Gain (Loss) on Derivative Instruments

Net gain (loss) on derivative instruments is comprised of net swap and cap interest expense and net realized and unrealized gain (loss) on derivative instruments. Net realized and unrealized gain (loss) on derivative instruments was \$22.1 million (comprised of \$16.2 million net realized and unrealized gain on swap and cap contracts, and \$5.9 million net realized and unrealized gain on TBA Derivatives) in the Third Quarter, compared to a \$63.6 million gain (comprised of \$51.2 million net realized and unrealized gain on swap and cap contracts, and \$12.4 million net realized and unrealized gain on TBA Derivatives) for the Third Quarter of 2016. As previously noted, during the Third Quarter we repositioned a portion of the hedge portfolio by terminating cancelable swaps with a \$1.0 billion notional and a weighted-average pay rate of 2.42% and replaced them with swaps with a \$0.9 billion notional and a weighted-average pay rate of 1.99%. Terminating the aforementioned hedges resulted in a realized loss of \$(3.9) million during the Third Quarter. The change in net realized and unrealized gain (loss) on derivative instruments for the Third Quarter and comparable prior year period were mainly due to an increase in swap rates. During the Third Quarter, the 5-year and 7-year swap rates increased by 4 bps and 3 bps, respectively, while they increased 20 bps and 15 bps, respectively, during the Third Quarter of 2016.

Swap and cap interest expense decreased by \$5.6 million in the Third Quarter to \$6.9 million from \$12.5 million in the Third Quarter of 2016 as further described above.

Operating Expenses

Operating expenses declined to \$5.1 million in the Third Quarter from \$6.2 million in the Third Quarter of 2016, largely resulting from a \$0.5 million decrease in the incentive compensation accrual.

Nine Months Ended September 30, 2017 Compared to the Nine Months Ended September 30, 2016

Net Income (Loss)

Net income available to common stockholders decreased \$24.1 million to \$156.8 million for the nine months ended September 30, 2017, compared to net income of \$180.9 million for the nine months ended September 30, 2016. The decrease in net income during the nine months ended September 30, 2017 is primarily attributable to a \$150.4 million increase in net realized and unrealized loss on investments and a \$25.3 million increase in interest expense, largely offset by a \$124.2 million increase in net realized and unrealized gain on derivative instruments, a \$22.0 million decrease in swap and cap interest expense and a \$3.4 million increase in interest income. Details regarding each of the aforementioned components that make up the net decrease in net income available to common stockholders follow.

Interest Income and Asset Yield

Interest income increased by \$3.4 million to \$229.4 million for the nine months ended September 30, 2017, as compared to \$226.0 million for the nine months ended September 30, 2016. The increase is largely due to an increase in the yield on our investments, offset by a decrease in average settled Debt Securities during the nine months ended September 30, 2017, as further illustrated below (in thousands):

36

Table of Contents

Change in Size		Change in Yield		Change in Size & Yield	
Change in average settled	\$ (806,682)	Change in average yield	0.23	% Change in average settled	\$ (806,682)
2016 average yield	2.54	% 2016 average settled	\$ 11,840,707	Change in average yield	0.23
Change	\$ (15,395)	Change	\$ 20,162	Change	\$ (1,374)
				Total change	\$ 3,393

Our average settled Debt Securities for the nine months ended September 30, 2017 was \$11.0 billion, compared to \$11.8 billion for the nine months ended September 30, 2016. Our annualized yield on average settled Debt Securities for the nine months ended September 30, 2017 was 2.77%, compared to 2.54% for the nine months ended September 30, 2016. The increase in our yield was primarily attributable to a \$19.1 million decrease in amortization expense to \$41.5 million for the nine months ended September 30, 2017 from \$60.6 million in the nine months ended September 30, 2016, partially offset by a decline in average settled Debt Securities. The decline in amortization is attributed to the decline in the annualized rate of portfolio prepayments to 8.4% for the nine months ended September 30, 2017 from 11.4% in the comparable prior year period.

Economic Net Interest Income

Our economic net interest income for the nine months ended September 30, 2017 was \$126.3 million, and our interest rate spread net of hedge, was 1.32% compared to economic net interest income of \$126.2 million and interest rate spread net of hedge of 1.26% for the nine months ended September 30, 2016. The increase in economic net interest income was principally due to the \$22.0 million decrease in swap and cap interest expense and the \$3.4 million increase in total interest income, largely offset by a \$25.3 million increase in total interest expense.

Economic Interest Expense and Cost of Funds

Economic interest expense, which consists of interest expense from repo borrowings, interest rate swaps and caps, and prior to September 30, 2016, FHLBC Advances, increased \$3.3 million to \$103.1 million for the nine months ended September 30, 2017, from \$99.8 million for the nine months ended September 30, 2016.

Interest expense from Total Outstanding Borrowings increased \$25.3 million to \$79.4 million for the nine months ended September 30, 2017 from \$54.1 million for the nine months ended September 30, 2016, mostly due to an increase in the cost of funds that resulted from three separate 25 bps Fed rate hikes during the comparable period. Our weighted-average cost of funds rose to 1.11% during the nine months ended September 30, 2017 from 0.70% for the nine months ended September 30, 2016. Our average Total Outstanding Borrowings decreased to \$9.5 billion for the nine months ended September 30, 2017 from \$10.4 billion for the nine months ended September 30, 2016, consistent with the decrease in the settled Debt Securities portfolio for the comparable prior year period. The table below illustrates the impact on interest expense resulting from changes to Total Outstanding Borrowings and financing rates during the nine months ended September 30, 2017 and 2016 (in thousands):

Change in Size		Change in Rate		Change in Size & Yield	
Change in average outstanding	\$ (872,320)	Change in average rate	0.41	% Change in average outstanding	\$ (872,320)
2016 average rate	0.70	% 2016 average outstanding	\$ 10,378,241	Change in average rate	0.41
Change	\$ (4,548)	Change	\$ 32,547	Change	\$ (2,736)
				Total change	\$ 25,263

Swap and cap interest expense decreased by approximately \$22.0 million, to \$23.7 million during the nine months ended September 30, 2017 from \$45.7 million during the nine months ended September 30, 2016. The decrease in swap and cap interest expense is largely attributable to the increase in 3-month LIBOR, which increased to 1.33% at September 30, 2017 from 0.85% at September 30, 2016. In addition, the \$0.7 billion decrease in the average aggregate swap and cap notional to \$9.0 billion for the nine months ended September 30, 2017, from \$9.7 billion for the nine months ended September 30, 2016, contributed to the decrease in swap and cap interest expense. The increase in 3-month LIBOR resulted in a 28 bps decrease in the average swap and cap net pay rate to 0.35% during the nine months ended September 30, 2017 from 0.63% during the comparable prior year period. The impact of the decrease in the swap and cap net pay rate and notional on swap and cap interest expense are further illustrated in the table below (in thousands):

Table of Contents

Change in Size	Change in Swap and Cap Net Pay Rate		Change in Size & Rate
Change in average notional outstanding	\$(725,000)	Change in average rate (0.28)%	Change in average notional outstanding \$(725,000)
2016 average rate	0.63 %	2016 average notional outstanding \$9,700,000	Change in average rate (0.28)%
Change	\$(3,413)	Change	Change \$1,498
			Total change \$(21,961)

Our annualized weighted-average cost of funds, including hedges was 1.45% for the nine months ended September 30, 2017 compared to 1.28% for the nine months ended September 30, 2016.

Other Income (Loss)

For the nine months ended September 30, 2017, our total other income (loss) was \$39.2 million compared to \$43.1 million for the nine months ended September 30, 2016. The key components contributing to the change in total other income (loss) are discussed in more detail below.

Net Realized and Unrealized Gain (Loss) on Investments and Drop Income

Net realized and unrealized gain on investments decreased by \$150.4 million to a net gain of \$60.0 million for the nine months ended September 30, 2017, compared to a net gain of \$210.4 million for the nine months ended September 30, 2016. This change was largely driven by changes in long term bond yields, resulting in a less significant increase in the prices of our Agency RMBS for the nine months ended September 30, 2017, compared to a more significant increase in the prices of our Agency RMBS for the nine months ended September 30, 2016. During the nine months ended September 30, 2017 and 2016, the yield on the 10-year U.S. Treasury declined by 11 bps and 68 bps, respectively. During the nine months ended September 30, 2017, the price of a 30-year 3.5% Agency RMBS increased \$0.72 to \$103.05, and during the nine months ended September 30, 2016, the price for the same security increased \$2.32 to \$105.55. In addition, during the nine months ended September 30, 2017, the price of a 15-year 3.0% Agency RMBS increased \$0.25 to \$102.73, and during the nine months ended September 30, 2016, the price increased \$1.90 to \$104.98.

During the nine months ended September 30, 2017 and 2016, we generated Drop Income of approximately \$25.3 million and \$24.8 million, respectively. The increase in Drop Income during the nine months ended September 30, 2017, compared to the nine months ended September 30, 2016 was primarily attributable to more favorable financing in the forward market, partially offset by slightly lower volumes of forward settling transactions from which we derive Drop Income. During the nine months ended September 30, 2017, the average gross balance in the combined TBA Securities and TBA Derivatives portfolio was \$1.4 billion, a \$0.1 billion decrease compared to the average gross balance of \$1.5 billion for the nine months ended September 30, 2016.

Net unrealized gain (loss) on FHLBC Advances

We had no FHLBC Advances outstanding during the nine months ended September 30, 2017. During the nine months ended September 30, 2016, the Company repaid the remaining \$2.1 billion in FHLBC Advances outstanding at December 31, 2015. For the nine months ended September 30, 2016 the net unrealized loss on FHLBC Advances was \$1.3 million. The unrealized loss was due to pricing FHLBC Advances with an initial term greater than one year at par due to an expectation to repay the outstanding balance by August 2016.

Net Gain (Loss) on Derivative Instruments

Net gain (loss) on derivative instruments is comprised of net realized and unrealized gain (loss) on swaps and caps and TBA Derivatives. Net realized and unrealized gain (loss) on derivative instruments was \$2.8 million (comprised of \$(4.9) million net realized and unrealized loss on swap and cap contracts, and \$7.7 million net realized and unrealized gain on TBA Derivatives) for the nine months ended September 30, 2017, compared to a loss of \$(121.4) million (comprised of \$(147.9) million net realized and unrealized loss on swap and cap contracts, and \$26.5 million net realized and unrealized gain on TBA Derivatives) for the nine months ended September 30, 2016. The change in net realized and unrealized gain (loss) on derivative instruments for the nine months ended September 30, 2017 and 2016 was primarily due to changes in interest rates during the nine months ended September 30, 2017, resulting in an

increase in the value of our derivatives during nine months ended September 30, 2017 and a decrease in the value of our derivative instruments during nine months ended September 30, 2016. To illustrate, during the nine months ended September 30, 2017 and 2016, 5-year swap rates increased by 2 bps and decreased 56 bps, respectively. The decrease in swap and cap notional described above also contributed to the change in net realized and unrealized loss on swaps and caps during the comparative period.

Table of Contents

Operating Expenses

Operating expenses decreased to \$16.8 million in the nine months ended September 30, 2017 from \$18.4 million for the nine months ended September 30, 2016. Included in the nine months ended September 30, 2017 operating expenses is approximately \$0.6 million of non-recurring accelerated restricted stock and other compensation expenses due to the retirement of our prior Chief Financial Officer and Treasurer. The net decrease in compensation expense during the current period is primarily attributable to the aforementioned executive's retirement, coupled with a decrease in the incentive compensation accrual.

Contractual Obligations and Commitments

The following table summarizes the principal balances related to our repo borrowings, the related interest expense thereon, and our office lease at September 30, 2017 (in thousands):

September 30, 2017	Within One Year	One to Three Years	Three to Five Years	Thereafter	Total
Repurchase agreements	\$10,383,226	\$ —	\$ —	\$ —	\$10,383,226
Interest expense on repurchase agreements based on rates at September 30, 2017	48,083	—	—	—	48,083
Long-term operating lease obligation	359	751	791	306	2,207
Total	\$10,431,668	\$ 751	\$ 791	\$ 306	\$10,433,516

At September 30, 2017 and December 31, 2016, we held the following interest rate swap and cap contracts (in thousands):

As of September 30, 2017

Interest Rate Swaps Weighted-Average

Expiration Year	Fixed Pay Rate	Receive Rate	Net Pay Rate	Notional Amount	Fair Value
2018	1.00%	1.32%	(0.32)%	\$ 1,500,000	\$ 2,950
2020	1.45%	1.30%	0.15%	1,750,000	20,695

We enter into certain agreements that contain a variety of indemnification obligations, principally with our brokers and counterparties for interest rate swap contracts and repo borrowings. We have not incurred any costs to defend a lawsuit or settle claims related to these indemnification obligations. The maximum potential future payment amount we could be required to pay under these indemnification obligations cannot be reasonably estimated. Accordingly, no liabilities have been recognized for these agreements as of September 30, 2017 and December 31, 2016. In addition, as of September 30, 2017 and December 31, 2016, we had \$1.3 billion and \$1.9 billion of payable for securities purchased, respectively, a portion of which either will be or was financed through repo borrowings.

Off-Balance Sheet Arrangements

As of September 30, 2017 and December 31, 2016, we had no relationships with any significant unconsolidated entities or financial partnerships, such as entities often referred to as structured finance, special purpose or variable interest entities, established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. Further, as of September 30, 2017 and December 31, 2016, other than as discussed in the accompanying consolidated financial statements, we had not guaranteed obligations of unconsolidated entities, entered into commitments or had any intent to provide funding to any such entities.

We may seek to obtain other sources of financing depending on market conditions. We may finance the acquisition of Agency RMBS by entering into TBA dollar roll transactions in which we would sell a TBA contract for current month settlement and simultaneously purchase a similar TBA contract for a forward settlement date. Prior to the forward settlement date, we may choose to roll the position out to a later date by entering into an offsetting TBA position, net settling the paired-off positions for cash, and simultaneously entering into a similar TBA contract for a later settlement date. In such transactions, the TBA contract purchased for a forward settlement date is priced at a discount to the TBA contract sold for settlement/pair off in the current month. The discount is the difference between the spot price and the forward settlement price for the same Agency RMBS on trade date and is referred to by the Company as Drop Income. This difference is also the economic equivalent of the assumed net interest spread (yield less financing costs) of the Agency RMBS from trade date to settlement date. Consequently, dollar roll transactions accounted for as TBA Derivatives, whereby the Company is not contractually obligated to accept delivery on the settlement date ("TBA Derivatives") represent a form of off-balance sheet financing. In evaluating our overall leverage at risk, we consider both our on-balance and off-balance sheet financing.

Table of Contents

Liquidity and Capital Resources

Our primary sources of funds are repo borrowings, monthly principal and interest payments on our investment portfolio, asset sales, equity and debt offerings, and prior to the effective date of the Final Rule on January 19, 2016, which precluded us from securing new advances, FHLBC Advances. Because the level of our borrowings can be adjusted on a daily basis, the level of cash and cash equivalents carried on our balance sheet is significantly less important than the potential liquidity available under our borrowing arrangements. We currently believe that we have sufficient liquidity and capital resources available for the acquisition of additional investments, repayments on borrowings, maintenance of any margin requirements and the payment of cash dividends as required for our continued qualification as a REIT. To qualify as a REIT, we must distribute annually at least 90% of our net taxable income. To the extent that we annually distribute all of our net taxable income in a timely manner, we will generally not be subject to federal and state income taxes. We currently expect to distribute all or substantially all of our taxable income in a timely manner so that we are not subject to federal and state income tax. This distribution requirement limits our ability to retain earnings and thereby replenish or increase capital from operations.

As of September 30, 2017 and December 31, 2016, we had approximately \$1.1 billion and \$0.9 billion, respectively, in Agency RMBS, U.S. Treasuries, and cash and cash equivalents available to satisfy future margin calls. We have consistently maintained sufficient liquidity to meet margin calls, and have historically satisfied all margin calls, although no assurance can be given that we will be able to satisfy margin calls in the future. During the nine months ended September 30, 2017, we maintained an average liquidity level of 61%. Our liquidity level was never less than 53% of stockholders' equity during the nine months ended September 30, 2017. The following table presents our unencumbered liquid assets as a percentage of stockholders' equity for the periods presented:

Unencumbered Liquid Assets	Carrying Value as of	
	September 30, 2017	December 31, 2016
Cash and cash equivalents	\$804	\$ 1,260
U.S. Treasuries	3,635	32,494
Agency RMBS	1,092,174	903,548
Total liquid assets	\$1,096,613	\$ 937,302
Unencumbered liquid assets as % of total stockholders' equity	68.2	% 61.0

During the Third Quarter we had average repo borrowings outstanding of \$9.8 billion with an average cost of funds of 1.30%, and during the Third Quarter of 2016 we had average repo borrowings and FHLBC Advances of \$10.2 billion with an average cost of funds of 0.68%. At September 30, 2017, repo borrowing financing was generally stable but at higher rates relative to the Third Quarter of 2016 as a direct result of three separate 25 bps Fed rate hikes since the Third Quarter of 2016. Repo borrowing rates were between 1.20% and 1.38% for 30-90 day repo borrowings during the Third Quarter compared to 0.58% and 0.92% in the Third Quarter of 2016.

We diversify our funding across multiple counterparties and by counterparty region to limit our exposure to counterparty credit risk. As of September 30, 2017 and December 31, 2016, we had access to 52 and 50 counterparties, respectively, subject to certain conditions, located throughout North America, Europe and Asia. At September 30, 2017 and December 31, 2016 we had no FHLBC Advances outstanding. As of September 30, 2017 and December 31, 2016, repo borrowings with any individual counterparty were less than 7.9% and 7.1% of the Total Outstanding Borrowings, respectively. The table below includes a summary of our outstanding repo borrowings by number of counterparties and region as of September 30, 2017 and December 31, 2016:

Counterparty Region	September 30, 2017	
	Number of Counterparties	Percent of Total Outstanding Borrowings
North America	21	54.1%
Europe	8	25.9%
Asia	6	20.0%
	35	100.0%

Table of Contents

December 31, 2016

Counterparty Region	Number of Counterparties	Percent of Total Outstanding Borrowings
North America	22	60.4%
Europe	8	22.8%
Asia	5	16.8%
	35	100.0%

Our repurchase agreements contain standard provisions and covenants as set forth in the standard master repurchase agreement published by the Securities Industry and Financial Markets Association. Our repurchase agreements generally require us to transfer additional securities to the counterparty if the value of the securities then held by the counterparty in the margin account falls below specified levels and contain events of default in cases where we or the counterparty breaches our respective obligations under the agreement.

The credit arrangement pursuant to which CYS Insurance maintained FHLBC Advances (the "FHLBC Arrangement") involved observance by CYS Insurance of the rules of FHLBC membership, subject to the FHLBC's credit policy, and was governed by the terms and conditions of a blanket security agreement, and the consent and guaranty of the Company. The FHLBC Arrangement required CYS Insurance to transfer additional securities to the FHLBC if the value of the securities then held by the FHLBC fell below specified levels, and contained events of default in cases where we or the FHLBC breached our respective obligations under the FHLBC Arrangement. An event of default or termination event under the FHLBC Arrangement would have given the FHLBC the option to terminate all FHLBC Advances existing with us and make any amount due by us to the FHLBC immediately payable.

We receive margin calls from our repurchase agreement counterparties in the ordinary course of business, similar to other special finance entities. We receive two types of margin calls under our repurchase agreements. The first type, which are known as "factor calls," are margin calls that occur each month and relate to the timing difference between the reduction of principal balances of our Agency RMBS due to monthly principal payments on the underlying mortgages, and the receipt of the corresponding cash. The second type of margin call we may receive is a "valuation call", which occurs due to market and interest rate movements. Both factor and valuation margin calls occur if the total value of our assets pledged as collateral to our counterparty drops beyond a threshold level, typically between \$100,000 and \$500,000 (although no such minimum applied under the FHLBC Arrangement). Both types of margin calls require a dollar for dollar restoration of the margin shortfall. Conversely, we may initiate margin calls to our counterparties when the value of our assets pledged as collateral with a counterparty increases above the threshold level, thereby increasing our liquidity. All unrestricted cash plus any unpledged securities, are available to satisfy margin calls.

Our collateral is generally valued on the basis of prices provided by recognized bond market sources agreed to by the parties. Inputs to the models used by pricing sources may include, but are not necessarily limited to, reported trades, executable bid and asked prices, broker quotations, prices or yields of securities with similar characteristics, benchmark curves or information pertaining to the issuer, as well as industry and economic events. Our master repurchase agreements contain mostly standard provisions for the valuation of collateral. These agreements typically provide that both the repurchase seller (the borrower) and the repurchase buyer (the lender) value the collateral on a daily basis. Each party uses prices that it obtains from generally recognized pricing sources, or the most recent closing bid quotation from such a source. If the buyer, or the seller, as the case may be, determines that additional collateral is required, it may call for the delivery of such collateral. Under certain of our repurchase agreements, in limited circumstances, such as when a pricing source is not available, our lenders have the right to determine the value of the collateral we have provided to secure our repo borrowings. In instances where we have agreed to permit our lenders to make a determination of the value of such collateral, such lenders are expected to act reasonably and in good faith in making such valuation determinations.

We also pledge collateral for our interest rate swaps, caps, and forward purchase transactions. We will receive margin calls on these transactions when the value of the swap, cap or forward purchase transaction declines or when the value of any collateral pledged falls below a particular threshold level. All unrestricted cash and cash equivalents, plus any unpledged Agency RMBS or U.S. Treasuries, are available to satisfy margin calls.

An event of default or termination event under the standard master repurchase agreement would give our counterparty the option to terminate all repurchase transactions existing with us and make any amount due by us to the counterparty immediately payable.

For our short-term (less than one year) and long-term (more than one year) liquidity and capital resource requirements, we rely on the cash flow from operations, primarily monthly principal and interest payments to be received on our Agency RMBS. During the nine months ended September 30, 2017 and 2016, we recorded \$1.0 billion and \$1.4 billion of principal repayments, respectively, and received \$227.8 million and \$227.3 million of interest payments, respectively. We held cash and cash equivalents of \$0.8 million and \$1.3 million at September 30, 2017 and December 31, 2016, respectively. For the nine

Table of Contents

months ended September 30, 2017 and 2016, net cash provided by operating activities was \$193.9 million and \$148.7 million, respectively. For the nine months ended September 30, 2017 and 2016, net cash provided by (used in) investing activities was \$(822.0) million and \$1.4 billion, respectively. For the nine months ended September 30, 2017 and 2016, net cash provided by (used in) financing activities was \$627.7 million and \$(1.6) billion, respectively. Based on our current portfolio, leverage and available borrowing capacity, we believe that our cash flow from operations and the utilization of borrowings will be sufficient to enable us to meet anticipated short-term liquidity requirements such as funding our investment activities, distributions to stockholders and general corporate expenses. However, an increase in prepayment rates substantially above our expectations may cause a temporary liquidity shortfall due to the timing of margin calls and the actual receipt of cash related to principal paydowns. If our cash resources are at any time insufficient to satisfy our liquidity requirements, we may be required to sell Agency RMBS in our portfolio or issue debt or equity securities, subject to market conditions. If required, the sale of Agency RMBS at prices lower than their amortized cost would result in realized losses. We believe that we have additional capacity through repurchase agreements to leverage our equity further should the need for additional short-term liquidity arise. Our investment portfolio is comprised principally of highly-liquid Agency RMBS and U.S. Treasuries. We regularly monitor the creditworthiness of the U.S. government and the GSEs and believe it remains one of the most secure creditors in the world as of September 30, 2017.

We may increase our capital resources by obtaining long-term credit facilities or making public or private offerings of equity or debt securities. Such capital transactions will depend on market conditions for the investment of any proceeds. If we are unable to renew, replace or expand our sources of financing on substantially similar terms, it may have an adverse effect on our business and results of operations. On May 22, 2017, we filed an automatically effective shelf registration statement on Form S-3 with the SEC. We may offer and sell, from time to time, shares of common stock, preferred stock and debt securities in one or more offerings pursuant to the prospectus that is a part of the registration statement.

On August 4, 2017, the Company entered into an equity distribution agreement (the "Equity Distribution Agreement") with JMP Securities LLC (the "Placement Agent") whereby the Company may, from time to time, publicly offer and sell up to 20,000,000 shares of the Company's common stock through at-the-market transactions and/or privately negotiated transactions. During the three months ended September 30, 2017, the Company issued 2,951,491 shares under the Equity Distribution Agreement at an average sales price of \$8.76 per share raising approximately \$25.5 million of net proceeds after deducting the placement fees. As of September 30, 2017, 17,048,509 shares of common stock remained available for issuance to be sold under the Equity Distribution Agreement.

Our Dividend Reinvestment and Direct Share Purchase Program ("DSPP") is another vehicle we may use to raise capital, through which stockholders may purchase additional shares of common stock by reinvesting some or all of the cash dividends received on shares of common stock. On September 15, 2017, the Company renewed its Dividend Reinvestment and Direct Stock Purchase Plan, whereby the stockholders may reinvest cash dividends and purchase up to 10,000,000 shares of our common stock. Stockholders may also make optional cash purchases of shares of common stock subject to certain limitations detailed in the plan prospectus. For the nine months ended September 30, 2017, the Company issued 291,815 at an average sales price of \$8.77 per shares for net proceeds of \$2.5 million, after deducting placement fees. We did not issue any shares under the DSPP during the nine months ended September 30, 2016. As of September 30, 2017, there were approximately 9.7 million shares available for issuance under the DSPP.

For the nine months ended September 30, 2017, we did not repurchase any shares of the Company's common stock. Accordingly, the Company was authorized to repurchase shares of its common stock approximating \$155.5 million as of September 30, 2017 pursuant to its stock repurchase program. For the nine months ended September 30, 2016, we repurchased 673,166 shares of the Company's common stock at a weighted-average purchase price of \$7.85 per share, for an aggregate purchase price of approximately \$5.3 million. Accordingly, the Company was authorized to repurchase shares of its common stock approximating \$155.5 million as of September 30, 2016.

Table of Contents

Quantitative and Qualitative Disclosures about Short-Term Borrowings

The following table is a summary of quantitative data about our repo borrowings and FHLBC Advances with initial maturities less than one year during the three and nine months ended September 30, 2017 and 2016:

(In millions)	Three Months Ended		Nine Months Ended	
	September 30, 2017	September 30, 2016	September 30, 2017	September 30, 2016
Outstanding at period end	\$10,383	\$9,621	\$10,383	\$9,621
Weighted-average rate at period end	1.27 %	0.77 %	1.27 %	0.77 %
Average outstanding during period ⁽¹⁾	\$9,820	\$10,111	\$9,506	\$10,086
Weighted-average rate during period	1.30 %	0.68 %	1.11 %	0.67 %
Largest month end balance during period	\$10,383	\$10,787	\$10,383	\$10,787

⁽¹⁾ Calculated based on the average month end balance of repurchase agreements and FHLBC Advances with initial maturities less than one year.

The Company's borrowing rates were higher in the three and nine months ended September 30, 2017 than in the corresponding three and nine months ended September 30, 2016 due primarily to three separate 25 bps Fed rate hikes between September 30, 2016 and September 30, 2017. Overall, we continue to experience a stable financing environment. During the nine months ended September 30, 2016 we replaced \$2.1 billion of FHLBC Advances with repo borrowings from existing counterparties. From quarter to quarter, fluctuations occur in repo borrowings that are fairly tightly correlated with the expansion and contraction of our investment portfolio. Though it varies by quarter, we generally maintain leverage between 6.4:1 and 7.2:1.

At September 30, 2017 and December 31, 2016, our amount at risk with any individual counterparty related to our repo borrowings was less than 2.1% and 2.6% of stockholders' equity, respectively.

Inflation

Our assets and liabilities are sensitive to interest rate and other related factors to a greater degree than inflation. Changes in interest rates do not necessarily correlate with inflation rates or changes in inflation rates. Our financial statements are prepared in accordance with GAAP and our dividend distributions are determined by our Board of Directors based in large part on our REIT taxable income as calculated according to the requirements of the Internal Revenue Code. In each case, our activities and balance sheet are measured with reference to fair value without considering inflation.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

As of September 30, 2017 and December 31, 2016, the primary component of our market risk was interest rate risk, as described below. We do not seek to completely avoid risk because we believe that certain risks can be estimated based on historic experience. Accordingly, we manage these risks in an effort to earn the commensurate compensation required to take them and to maintain capital levels consistent with the risks we undertake.

Interest Rate Risk

We are subject to interest rate risk in connection with our investments in Debt Securities and our related debt obligations, which are generally repo borrowings and, prior to the February 19, 2016 effective date of the Final Rule, FHLBC Advances, of limited duration that are periodically refinanced at current market rates. We seek to manage this risk through utilization of derivative contracts, primarily interest rate swap and cap contracts.

Effect on Net Interest Income. We fund our investments in long-term Agency RMBS collateralized by ARMs, Hybrid ARMs and fixed rate mortgage loans with short-term repo borrowings and, prior to the February 19, 2016 effective date of the Final Rule, FHLBC Advances. During periods of rising interest rates, the borrowing costs associated with Agency RMBS tend to increase while the income earned on such Agency RMBS (during the fixed rate component of such securities) may remain substantially unchanged, assuming a static portfolio. This results in a narrowing of the net interest spread between the related assets and borrowings and may even result in losses.

We are a party to interest rate swap and cap contracts as of September 30, 2017 and December 31, 2016, described in detail under Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations—Contractual Obligations and Commitments" in this Quarterly Report.

Table of Contents

Hedging techniques are partly based on assumed levels of prepayments of our Agency RMBS. If prepayments are slower or faster than assumed, the life of the Agency RMBS will be longer or shorter, which would reduce the effectiveness of any hedging strategies we may use and may cause losses on such transactions.

Effect on Fair Value. Another component of interest rate risk is the effect changes in interest rates will have on the fair value of our assets, liabilities, and derivative instruments, which is discussed in further detail below.

We assess our interest rate risk primarily by estimating the duration of our assets and liabilities. Duration, in its simplest form, measures the market price volatility of financial instruments as interest rates change. We generally calculate duration using third-party financial models and empirical data. Different models and methodologies can produce different durations for the same securities.

Extension Risk

We have generally structured our swaps to expire in conjunction with the estimated weighted-average life of the fixed period of the mortgages underlying our Agency RMBS portfolio. However, in a rising interest rate environment, the weighted-average life of the fixed rate mortgages underlying our Agency RMBS could extend beyond the term of the swap agreement or other hedging instrument. This could have a negative impact on our results from operations, as borrowing costs would no longer be fixed after the term of the hedging instrument while the income earned on the remaining Agency RMBS would remain fixed for a period of time. This situation may also cause the market value of our Agency RMBS to decline with little or no offsetting gain from the related hedging transactions. In extreme situations, we may be forced to sell assets to maintain adequate liquidity, which could cause us to realize losses.

Interest Rate Cap Risk

Both ARMs and Hybrid ARMs that collateralize our Agency RMBS are typically subject to periodic and lifetime interest rate caps and floors, which limit the amount by which the security's interest yield may change during any given period. However, our borrowing costs will not be subject to similar restrictions. Therefore, in a period of increasing interest rates, the interest costs on our borrowings could increase without limitation by caps while the interest rate or yield on our Agency RMBS would be fixed or effectively be limited by caps. This problem will be magnified to the extent that we acquire Agency RMBS that are collateralized by Hybrid ARMs that are not fully indexed. In addition, the underlying mortgages may be subject to periodic payment caps that result in some portion of the interest being deferred and added to the principal outstanding. This could result in our receipt of less cash on our Agency RMBS than we need in order to pay the interest cost on our related borrowings. These factors could result in a decrease in our net income or cause a net loss during periods of rising interest rates, which could have an adverse effect on our financial condition, cash flows and results of operations.

Interest Rate Mismatch Risk

We intend to fund a substantial portion of our acquisitions of Agency RMBS with borrowings that, after the effect of hedging, have interest rates based on indices and repricing terms similar to, but of somewhat shorter maturities than, the interest rate indices and repricing terms of the Agency RMBS. Thus, we anticipate that in most cases the interest rate indices and repricing terms of our Agency RMBS and our funding sources will not be identical, thereby creating an interest rate mismatch between assets and liabilities. Therefore, our cost of funds would likely rise or fall faster than the rate of earnings on our assets. During periods of changing interest rates, such interest rate mismatches could adversely affect our financial condition, cash flows and results of operations. To manage interest rate mismatches, we may utilize the hedging strategies discussed above.

Our analysis of risks is based on management's experience, estimates, models and assumptions. These analyses rely on models which utilize estimates of fair value and interest rate sensitivity. Actual economic conditions or implementation of investment decisions by our management may produce results that differ significantly from the estimates and assumptions used in our models and the projected results reflected herein.

Prepayment Risk

Prepayments are the full or partial repayment of principal prior to the original contractual maturity of a mortgage loan. Full repayments typically occur due to refinancing of mortgage loans. Prepayment rates for existing Agency RMBS generally increase when prevailing mortgage interest rates fall. Additionally, the majority of our Agency RMBS were purchased at a premium. The prepayment of such Agency RMBS at a rate faster than anticipated would result in amortization of any remaining unamortized premium faster than expected, which could adversely affect our financial

condition and results of operations.

Effect on Fair Value and Net Income

Another component of interest rate risk is the effect that changes in interest rates will have on the fair value of our

45

Table of Contents

assets and our net income, exclusive of the effect on fair value. We face the risk that the fair value of our assets and net interest income will increase or decrease at different rates than that of our liabilities, including our hedging instruments.

The following sensitivity analysis table estimates the impact of our interest rate-sensitive investments and repo borrowing liabilities on our net income, fair value of our assets, and change in stockholders' equity, exclusive of the effect of changes in fair value on our net income, at September 30, 2017 and December 31, 2016, assuming a static portfolio and an instantaneous increase and decrease in rates of 25, 50 and 75 bps, except as further described in the footnotes to the following table:

September 30, 2017

Interest Rate Change (bps)	Projected Change in Net Income ⁽¹⁾			Projected Change in the Fair Value of Our Investments ⁽¹⁾			Projected Change in Stockholders' Equity	
- 75	21.47	%	(2)(3)	0.35	%		2.84	%
- 50	17.18	%	(2)(3)	0.36	%		2.92	%
- 25	8.59	%	(2)(3)	0.25	%		2.03	%
+ 25	(10.74))%	(2)	(0.40))%		(3.21))%
+ 50	(21.47))%	(2)	(0.92))%		(7.45))%
+ 75	(32.21))%	(2)	(1.55))%		(12.56))%

December 31, 2016

Interest Rate Change (bps)	Projected Change in Net Income ⁽¹⁾			Projected Change in the Fair Value of Our Investments ⁽¹⁾			Projected Change in Stockholders' Equity	
- 75	19.81	%	(2)(3)	0.71	%		5.78	%
- 50	16.23	%	(2)(3)	0.63	%		5.13	%
- 25	12.20	%	(2)(3)	0.38	%		3.10	%
+ 25	(10.08))%	(2)	(0.47))%		(3.83))%
+ 50	(20.16))%	(2)	(1.01))%		(8.22))%
+ 75	(30.24))%	(2)	(1.63))%		(13.21))%

(1) Projected changes in the table are calculated utilizing Yield Book® software and may reflect adjustments based on our judgment.

(2) Immediate impact estimated over 12 month period.

(3) Given the historically low level of interest rates at September 30, 2017 and December 31, 2016, we reduced 3-month LIBOR and our repo borrowing rates by 20, 40 and 50 bps and by 10, 20 and 30 bps for the 25, 50, and 75 bps down net income scenarios, respectively. All other interest rate-sensitive instruments were calculated in accordance with the table.

While the tables above reflect the estimated immediate impact of interest rate increases and decreases on a static portfolio, we rebalance our portfolio periodically either to take advantage of, or minimize the impact of, changes in interest rates. Generally, our interest rate swaps reset in the quarter following rate changes. The impact of changing interest rates on fair value and net income can change significantly when interest rates change beyond 75 bps from current levels. Therefore, the volatility in the fair value of our assets could increase significantly when interest rates change beyond 75 bps. In addition, other factors impact the fair value of and net income from our interest rate-sensitive investments and hedging instruments, such as the shape of the yield curve, market expectations as to future interest rate changes and other market conditions. Accordingly, when actual interest rates change, the change in the fair value of our assets and our net income will likely differ from that shown above, and such difference may be material and adverse for our stockholders.

Risk Management

Our board of directors exercises its oversight of risk management in many ways, including overseeing our senior management's risk-related responsibilities, including reviewing management policies and performance against these

policies and related benchmarks.

As part of our risk management process, we actively manage the interest rate, liquidity, prepayment and counterparty risks associated with our Agency RMBS portfolio. This process includes monitoring various stress test scenarios on our portfolio. We seek to manage our interest rate risk exposure by entering into various hedging instruments in order to minimize our exposure to potential interest rate mismatches between the interest we earn on our investments and our borrowing costs. We seek to manage our liquidity risks by monitoring our liquidity position on a daily basis and maintaining a prudent level of leverage based on current market conditions and various other factors, including the health of the financial institutions that lend to us under repurchase agreements. We seek to manage our counterparty risk by (i) diversifying our exposure across a broad number of counterparties, (ii) limiting our exposure to any one counterparty, and (iii) monitoring the financial stability of our

Table of Contents

counterparties.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of September 30, 2017. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of September 30, 2017, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective.

There have been no changes in our internal controls over financial reporting that occurred during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. Other Information

Item 1. Legal Proceedings

The Company and its subsidiaries are not currently subject to any material legal proceedings.

Item 1A. Risk Factors

There were no material changes during the period covered by this Quarterly Report to the risk factors previously disclosed in our 2016 Annual Report. Additional risks not presently known, or that we currently deem immaterial, also may have a material adverse effect on our business, financial condition and results of operations.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

The following table summarizes the Company's purchases of shares of its common stock during the nine months ended September 30, 2017 (dollars in thousands except per share data):

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid Per Share ⁽¹⁾	Dollar Value of Shares That May Yet Be Purchased ⁽¹⁾
January 1, 2017 - January 31, 2017	—	\$	—\$ 155,502
February 1, 2017 - February 28, 2017 ⁽²⁾	—	—	155,502
March 1, 2017 - March 31, 2017	—	—	155,502
April 1, 2017 - April 30, 2017	—	—	155,502
May 1, 2017 - May 31, 2017	—	—	155,502
June 1, 2017 - June 30, 2017	—	—	155,502
July 1, 2017 - July 31, 2017	—	—	155,502

Edgar Filing: CYS Investments, Inc. - Form 10-Q

August 1, 2017 - August 31, 2017	—	—	155,502
September 1, 2017 - September 30, 2017	—	—	155,502
Total	—	\$	—

(1) The Company repurchases shares of its common stock in open-market transactions pursuant to its share repurchase program, which was authorized by its board of directors and publicly announced on July 21, 2014. Pursuant to this authority, the Company may repurchase shares of its common stock up to \$250 million in aggregate value. Since July 21, 2014, the Company has repurchased approximately \$94.5 million in aggregate value of its common stock, and accordingly, the Company was authorized to repurchase shares with an aggregate value of \$155.5 million as of September 30, 2017.

(2) Excludes 44,521 shares purchased during February 2017 at a weighted-average price per share of \$7.80 to satisfy withholding obligations on the vesting of restricted shares. The price paid per share was the then closing price of our common stock on the New York Stock Exchange. These 44,521 shares are not included in "Dollar Value of Shares That May Yet Be Purchased".

Item 3. Defaults Upon Senior Securities

None.

Item 5. Other Information

On October 23, 2017, our Board of Directors approved and adopted amendments to the Company's Amended and Restated Bylaws (the "Bylaws Amendments"). The Board of Directors adopted these amendments as part of its ongoing commitment to maintaining strong corporate governance practices and its consideration of input from stakeholders. The Bylaws Amendments reflect (a) amendments to the Maryland General Corporation Law ("MGCL"), in many cases to give greater flexibility to the Board of Directors and its committees, (b) changes to the rules of the New York Stock Exchange, (c) recent developments in public company governance, including increased stockholder activism, (d) changes to clarify certain corporate procedures and (e) edits to conform language and style. More specifically, the Bylaws Amendments:

- remove the requirement that the Company's annual meeting take place during the month of May;
- add a requirement that any stockholder requesting a special meeting agree to update the request;
- specify that a stockholder's special meeting request will be deemed to be revoked to the extent of any shares owned by the requesting stockholder at the time of request but subsequently disposed of prior to the special meeting;
- clarify that notices of stockholders meetings may be given electronically;
- provide (a) that notices apply to a stockholders entire household, as permitted by the MGCL and SEC proxy rules and (b) that a minor irregularity in providing notice of a stockholders meeting will not affect the validity of the meeting;
- provide that the Company may postpone or cancel a stockholder meeting, for any reason as permitted by applicable law and exchange rules, by making a public announcement;
- provide a more comprehensive treatment of, and give more explicit powers to, the chairman and inspectors of the meeting;
- require any stockholder nominating a candidate for the Board of Directors to own shares at the record date;

Table of Contents

increase the information that must be provided by a stockholder proposing business or a director nominee, including (a) a representation that the stockholder is a record holder and intends to attend the meeting (either in person or via proxy); (b) a representation as to whether the stockholder intends to solicit proxies; and (c) information relating to (i) the stockholder's ownership of shares of any peer company, (ii) any arrangement between the stockholder and any affiliate or any other person with respect to the nomination or other reportable business, (iii) the text of the proposal or business to be brought before the stockholders meeting, (iv) any business, commercial or contractual interests of the stockholder, any affiliate of the stockholder, or the proposed nominee relating to the Company, (v) the investment strategy and prospectuses for any proponent or any affiliate of the proponent that is an entity as opposed to an individual and (vi) the identity of anyone communicating with the proponent regarding the proposal;

provide that any person nominated to the Board of Directors must (a) sign an undertaking relating to potential service on the Board of Directors, including an agreement not to enter into any voting commitment or undisclosed third-party compensation arrangement, and a commitment to serve a full term if elected, (b) complete an informational questionnaire, which the Company must provide within 10 days of a written request from the nominating stockholder and (c) disclose any compensation or monetary arrangements between the nominating stockholder and the nominee during the past three years;

permit the Board of Directors to (a) deem any inaccurate information that is submitted to not to have been submitted, and (b) request written verification of any information previously submitted by a stockholder;

require a stockholder proposing business or a director nominee at a stockholder meeting to (a) update any information provided by it and (b) attend the meeting (either in person or via proxy);

clarify the method and procedure by which a director may resign from the Board of Directors;

allow a meeting of the Board of Directors to be exempt from the 24-hour notice requirement in special circumstances;

clarify that the Company's election to become subject to Section 3-804(c) of the MGCL has already become effective;

remove references to outdated provisions concerning loss of deposits and the giving of bonds by directors;

amend certain provisions to more closely track a director's reliance rights set forth in MGCL Section 2-405.1(b);

confirm the power of the Board of Directors and stockholders to ratify prior actions or inactions by the Company and to provide that matters questioned in litigation may be ratified and that such ratification bars any claim or execution of any judgment as to the questioned matter;

clarify that committees of the Board of Directors may generally delegate authority to a subcommittee;

remove the requirement that committees keep minutes of their proceedings;

clarify that the chairman of the Board of Directors is not automatically an officer of the Company and make the chairman an optional, as opposed to mandatory, position;

remove outdated references to the giving of surety bonds by the treasurer and assistant treasurers;

confirm the power of the chief executive officer, the president and the chief financial officer to select the financial institutions in which the funds of the Company are deposited;

reflect the Company's power to issue uncertificated shares, and make other revisions consistent with current practices with respect to uncertificated share issuances and transfers, including a provision that empowers the Board of Directors to eliminate any certificates representing outstanding certificated shares;

remove obsolete language regarding the closing of transfer books in lieu of fixing a record date and, to better conform to the MGCL, clarify that a meeting of shareholders may be adjourned or postponed to a date not more than 120 days after the original record date, without the need to set a new record date;

specifically note that director and officer indemnification and expense advance rights are vested and extend indemnification to instances where a director or officer participates in a proceeding as a witness; and

provide that certain types of litigation must be brought in Baltimore City Circuit Court, or if that court lacks jurisdiction, the U.S. District Court in Baltimore.

The foregoing summary of the Bylaws Amendments does not purport to be complete and is qualified in its entirety by reference to the Amended and Restated Bylaws of the Company, which are attached as Exhibit 3.7 to this Form 10-Q and incorporated herein by reference.
