NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

1. BASIS OF PRESENTATION

The accompanying interim unaudited condensed consolidated financial statements have been prepared by Maui Land & Pineapple Company, Inc. (together with its subsidiaries, the “Company”) in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information that are consistent in all material respects with those applied in the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2015, and pursuant to the instructions to Form 10-Q and Article 8 promulgated by Regulation S-X of the Securities and Exchange Commission (SEC). Accordingly, they do not include all of the information and notes to financial statements required by GAAP for complete financial statements. In the opinion of management, the accompanying condensed consolidated financial statements contain all normal and recurring adjustments necessary to fairly present the Company’s financial position, results of operations and cash flows for the interim periods ended September 30, 2016 and 2015. The condensed consolidated financial statements and notes should be read in conjunction with the consolidated financial statements and notes thereto included in the Company’s Form 10-K for the fiscal year ended December 31, 2015.

LIQUIDITY

On August 5, 2016, the Company refinanced its \$26.4 million of outstanding bank loans under a \$27.0 million revolving credit facility with First Hawaiian Bank (the “Credit Facility”). The Credit Facility matures on December 31, 2019 and provides for two optional one-year extension periods. The Company has pledged a significant portion of its real estate holdings as security for borrowings under the Credit Facility, limiting its ability to borrow additional funds.

The Credit Facility includes covenants requiring among other things, an initial minimum liquidity (as defined) of \$0.5 million, a maximum of \$45.0 million in total liabilities, and a limitation on new indebtedness. If the Company is unable to meet its covenants, borrowings under the Credit Facility may become immediately due, and it would not have sufficient liquidity to repay such outstanding borrowings.

Net proceeds from the sale of any real estate assets pledged as collateral under the Credit Facility are required to be repaid toward outstanding borrowings and will permanently reduce the revolving commitment amount, limiting the available drawing capacity for future working capital purposes.

The Company continues to undertake efforts to generate cash flow by employing its real estate assets in leasing and other arrangements, by the sale of several real estate assets, and by continued cost reduction efforts.

2. USE OF ESTIMATES AND RECLASSIFICATIONS

The Company's reports for interim periods utilize numerous estimates of general and administrative expenses and other costs for the full year. Future actual amounts may differ from these estimates. Amounts reflected in interim reports are not necessarily indicative of results for a full year. Certain amounts in the December 31, 2015 condensed consolidated balance sheet and condensed consolidated statement of operations and comprehensive income for the three and nine months ended September 30, 2015 were reclassified to conform to the current period's presentation. Such amounts had no impact on total assets and liabilities or net income and comprehensive income previously reported.

Table Of Contents**3. BASIC AND DILUTED SHARES**

Basic and diluted weighted-average shares outstanding for the three and nine months ended September 30, 2016 and 2015 were as follows:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2016	2015	2016	2015
Basic and diluted	18,914,307	18,852,479	18,935,635	18,831,499
Potentially dilutive	25,281	27,500	25,281	27,500

Basic net income per share is computed by dividing net income by the weighted-average number of common shares outstanding. Diluted net income per share is computed similar to basic net income per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the dilutive potential common shares from share-based compensation arrangements had been issued.

Potentially dilutive shares arise from non-qualified stock options to purchase common stock and non-vested restricted stock. The treasury stock method is applied to determine the number of potentially dilutive shares for non-vested restricted stock and stock options assuming that the shares of non-vested restricted stock are issued for an amount based on the grant date market price of the shares and that the outstanding stock options are exercised.

11. COMMITMENTS AND CONTINGENCIES

There have been no changes in the status of commitments and contingencies as reported in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2015. There are various other claims and legal actions pending against the Company. In the opinion of management, after consultation with legal counsel, the resolution of these other matters is not expected to have a material adverse effect on the Company's results of operations.

12. FAIR VALUE MEASUREMENTS

GAAP establishes a framework for measuring fair value, and requires certain disclosures about fair value measurements to enable the reader of the financial statements to assess the inputs used to develop those measurements by establishing a hierarchy for ranking the quality and reliability of the information used to determine fair values. GAAP requires that financial assets and liabilities be classified and disclosed in one of the following three categories:

Level 1: Quoted market prices in active markets for identical assets or liabilities.

Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data.

Level 3: Unobservable inputs that are not corroborated by market data.

The fair value of cash, receivables and payables approximate their carrying value due to the short-term nature of the instruments. The valuation is based on settlements of similar financial instruments all of which are short-term in nature and are generally settled at or near cost. The fair value of debt was estimated based on borrowing rates currently available to the Company for debt with similar terms and maturities. The carrying amount of debt at September 30, 2016 and December 31, 2015 was \$24.5 million and \$40.6 million, respectively, which approximated fair value. The fair value of debt has been classified in the level 2 category.

13. NEW ACCOUNTING PRONOUNCEMENTS

In February 2016, the Financial Accounting Standards Board issued ASU No. 2016-02, Leases. This ASU affects the recognition of lease assets and lease liabilities by lessees for leases classified as operating leases under GAAP. This ASU will be effective for fiscal years beginning after December 15, 2018 for public entities, not-for-profit entities that have issued securities that are traded, listed or quoted on an exchange, and for employee benefit plans that file financial statements with the SEC. The Company is in the process of assessing the impact of ASU No. 2016-02 on its financial statements.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our audited consolidated financial statements and related notes included in our Annual Report on Form 10-K for the year ended December 31, 2015 and the unaudited condensed consolidated financial statements and related notes included in this Quarterly Report on Form 10-Q. Depending upon the context, the terms the "Company," "we," "our," and "us," refer to either Maui Land & Pineapple Company, Inc. alone, or to Maui Land & Pineapple Company, Inc. and its subsidiaries collectively.

Overview

Maui Land & Pineapple Company, Inc. is a Hawaii corporation and the successor to a business organized in 1909. The Company consists of a landholding and operating parent company, its principal subsidiary, Kapalua Land Company, Ltd. and certain other subsidiaries of the Company.

We own approximately 23,000 acres of land on Maui and develop, sell, and manage residential, resort, agricultural, commercial, and industrial real estate through the following business segments:

Real Estate—Our real estate operations consist of land planning and entitlement, development, and sales.

Leasing—Our leasing activities include residential, resort, commercial, industrial and agricultural land and property leases, licensing of our registered trademarks and trade names, and stewardship and conservation efforts.

Table Of Contents

Utilities—We operate two publicly-regulated utility companies which provide potable and non-potable water and wastewater transmission services to the Kapalua Resort. In addition, we also manage several major non-potable irrigation water systems in West and Upcountry Maui.

Resort Amenities—We manage the operations of the Kapalua Club, a private, non-equity club providing its members special programs, access and other privileges at certain amenities at the Kapalua Resort.

Critical Accounting Policies and Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires the use of accounting estimates. Changes in these estimates and assumptions are considered reasonably possible and may have a material effect on the consolidated financial statements and thus actual results could differ from the amounts reported and disclosed herein. Our critical accounting policies that require the use of estimates and assumptions were discussed in detail in our most recently filed Form 10-K. There have been no significant changes in our critical accounting policies during the first nine months of 2016.

Net income for the three and nine months ended September 30, 2016 and 2015 resulted primarily from sales of real estate assets, the proceeds from which were used to reduce our bank debt. Included in pension and other postretirement expenses for the three and nine months ended September 30, 2016 is a reduction of approximately \$0.7 million resulting from a one-time payment settlement with certain participants of our non-qualified retirement plans, which was paid in October 2016.

In August 2016, we sold a five-acre, fully-entitled 42-unit workforce housing project located in West Maui for \$3.0 million. As part of the transaction, the buyer also agreed to provide us with 12 residential workforce housing credits by August 2021. The sale resulted in a gain of approximately \$2.8 million. Proceeds from the sale were used to pay down our First Hawaiian Bank credit facility.

Table Of Contents

In June 2016, we sold a 304-acre, fully entitled working-class community project located in West Maui, commonly referred to as Pulelehua, for \$15.0 million. The sale resulted in a gain of approximately \$14.3 million. Proceeds from the sale were used to payoff our American AgCredit term loan. In September 2015, we sold the 25-acre Kapalua Golf Academy parcel and related facilities for \$12.0 million. The property was sold without any development entitlements. The sale resulted in a gain of approximately \$10.5 million. The majority of the proceeds from the sale were used to pay down our American AgCredit term loan and Wells Fargo credit facility.

Also included in our real estate operating revenues were sales commissions from resales of properties owned by private residents in the Kapalua Resort and surrounding areas by our wholly-owned subsidiary, Kapalua Realty Company, Ltd.

We did not have any significant real estate development expenditures during the nine months ended September 30, 2016 or 2015.

Real estate sales and development are cyclical and depend on a number of factors, many of which are beyond our control. Results for one period are therefore not necessarily indicative of future performance trends in this business segment.

LEASING

<i>Other West Maui</i>	37	%	37	%	37	%	37	%
<i>Upcountry Maui</i>	90	%	89	%	90	%	89	%

The decrease in operating income during the three and nine months ended September 30, 2016 compared to the three and nine months ended September 30, 2015 was primarily due to the write-off of approximately \$0.5 million of lease

rent from an agricultural land and property tenant in Upcountry Maui.

Other West Maui leased properties are mainly large-acre former pineapple field parcels and maintenance facilities.

Our leasing operations face substantial competition from other property owners in Maui and Hawaii.

We have contracted a third-party water engineering and management company to manage the operations of our wholly-owned subsidiaries: Kapalua Water Company, Ltd. and Kapalua Waste Treatment Company, Ltd. We have contracted a water maintenance company to manage our non-potable/irrigation water systems in West and Upcountry Maui.

The increase in operating revenues during the three and nine months ended September 30, 2016 compared to the three and nine months ended September 30, 2015 was primarily due to the increase in consumption of non-potable water. The decrease in operating income for the three months ended September 30, 2016 compared to the prior period was primarily due to higher repair and maintenance costs during the quarter.

Included in our September 30, 2015 other operating income is a non-recurring \$70,000 payment to secure a property easement and \$40,000 of cash received for the surrender value of an insurance policy.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity

On August 5, 2016, we refinanced our \$26.4 million of outstanding bank loans under a \$27.0 million revolving credit facility with First Hawaiian Bank. The Credit Facility matures on December 31, 2019 and provides for two optional one-year extension periods. We have pledged a significant portion of our real estate holdings as collateral for borrowings under the Credit Facility, limiting our ability to borrow additional funds.

The Credit Facility includes covenants requiring among other things, an initial minimum liquidity (as defined) of \$0.5 million, a maximum of \$45 million in total liabilities, and a limitation on new indebtedness. If we are unable to meet our covenants, borrowings under the Credit Facility may become immediately due, and we would not have sufficient

liquidity to repay such outstanding borrowings.

Net proceeds from the sale of any real estate assets pledged as collateral under the Credit Facility are required to be repaid toward outstanding borrowings and will permanently reduce the revolving commitment amount, limiting the available drawing capacity for future working capital purposes.

We believe we are in compliance with the covenants under our Credit Facility.

Cash Flows

During the first nine months of 2016 and 2015, net cash provided by our operating activities were \$16.0 million and \$11.0 million, respectively, resulting primarily from real estate asset sales. Proceeds from the sales were used to reduce our bank debt.

Future Cash Inflows and Outflows

Our plans include continued efforts to generate cash flow by employing our real estate assets in leasing and other arrangements, by the sale of several real estate assets, and by continued cost reduction efforts. Proceeds from the sale of any of our real estate assets will be used principally to repay our outstanding bank debt.

We presently do not expect to be required to make minimum contributions to our pension plans in 2016. Our current development activities are limited to planning, permitting and other efforts to secure and maintain project entitlements and we do not have any significant development or capital expenditures planned at this time.
