**Item 8.01. Other Events.**

**Gulf of Mexico**

On May 6, 2010, the Department of the Interior announced that no applications for drilling permits for operations on the Outer Continental Shelf will be issued until the Department of the Interior completes a safety review process of offshore drilling. It is anticipated that a report will be completed on or about May 28, 2010. Drilling operations subject to permits issued prior to April 20, 2010 are not affected by the moratorium. Additionally, it appears that drilling operations that have commenced pursuant to permits issued on or after April 20, 2010 may also continue.

As set forth in the Company's last Monthly Fleet Status Report dated April 28, 2010, the Company has three jackup drilling rigs that are anticipated to complete their contracts during the moratorium. Based on the preliminary timing outlined by the Department of the Interior, the Company does not expect any of these drilling rigs to secure additional contracts until the moratorium is lifted. If the moratorium is extended beyond May 28, 2010, it could also affect our other jackup drilling rigs in the U.S. Gulf of Mexico regardless of contract status. We believe that some of our contracts may not be fully permitted, or may not be fully permitted for the entire duration of the contract. Our customers are responsible for securing permits before we commence drilling operations and often secure the necessary permits shortly before the jackup rig arrives on the drilling location.

**Insurance**

The Company completed the annual renewal of all of its key insurance policies on April 30, 2010. The Company's primary marine package provides for hull and machinery coverage for the Company's rigs and liftboats up to a scheduled value of each asset. The total maximum amount of coverage for these assets is \$2.2 billion. The marine package includes protection and indemnity coverage for marine crew personal injury and death and certain operational liabilities, with primary coverage of \$5.0 million per occurrence with excess liability coverage up to \$200.0 million. The marine package includes limitations for coverage for losses caused in U.S. Gulf of Mexico named windstorms, including a limit of liability of \$100.0 million for property damage and removal of debris liability coverage. The Company also procured an additional \$75.0 million excess policy for removal of debris and certain third-party liabilities incurred in U.S. Gulf of Mexico named windstorms. Deductibles for events that are not caused by a U.S. Gulf of Mexico named windstorm are 12.5% of the insured drilling rig values per occurrence, subject to a minimum of \$1.0 million, and \$1.0 million per occurrence for liftboats. The deductibles for drilling rigs and liftboats in a U.S. Gulf of Mexico named windstorm event are the greater of \$25.0 million or the operational deductible for each U.S. Gulf of Mexico named windstorm event. Vessel pollution is covered under a Water Quality Insurance Syndicate policy with a \$3.0 million deductible providing limits as required by applicable law, including the Oil Pollution Act of 1990. The policies are subject to exclusions, limitations, deductibles, self-insured retention and other conditions. In addition to the marine package, the Company has separate policies providing coverage for onshore foreign and domestic general liability, employer's liability, auto liability and non-owned aircraft liability, with customer deductibles and coverage as well as a separate primary marine package for its Delta Towing business.
