Johnson Controls, Inc.
Notes to Condensed Consolidated Financial Statements
June 30, 2007
(unaudited)

1. Financial Statements

In the opinion of management, the accompanying unaudited condensed consolidated financial statements contain all adjustments (which include normal recurring adjustments except as disclosed herein) necessary to present fairly the financial position, results of operations and cash flows for the periods presented. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to the rules and regulations of the U.S. Securities and Exchange Commission (SEC). These condensed consolidated financial statements should be read in conjunction with the audited financial statements and notes thereto included in the Johnson Controls, Inc. (the Company) Annual Report on Form 10-K for the year ended September 30, 2006. The results of operations for the three and nine month periods ended June 30, 2007 are not necessarily indicative of results for the Company's 2007 fiscal year because of seasonal and other factors.

Certain prior period amounts have been revised to conform to the current year's presentation. The Company has revised its consolidated statements of income for the three and nine months ended June 30, 2006 to reclassify certain amounts previously reported within miscellaneous-net to cost of sales, selling, general and administrative expenses and net financing charges.

2. New Accounting Standards

In February 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* including an amendment to FASB Statement No. 115. SFAS No. 159 permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. SFAS No. 159 will be effective for the Company beginning in fiscal year 2009. The Company is assessing the potential impact that the adoption of SFAS No. 159 will have on its consolidated financial condition or results of operations.

In September 2006, the FASB issued SFAS No. 158, *Employer's Accounting for Defined Benefit Pension and Other Postretirement Plans* an amendment of FASB Statements No. 87, 88, 106 and 132(R). SFAS No. 158 requires that the Company recognize the overfunded or underfunded status of its defined benefit and retiree medical plans as an asset or liability in the fiscal year 2007 year-end balance sheet, with changes in the funded status recognized through accumulated other comprehensive income in the year in which they occur. Additionally, SFAS No. 158 requires the Company to measure the funded status of a plan as of the date of its fiscal year-end no later than fiscal year 2009. The Company has assessed the potential impact that the initial adoption of SFAS No. 158 will have on its consolidated financial condition and expects to record a reduction of accumulated other comprehensive income in shareholders' equity of between \$150 million and \$250 million, after taxes.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*. SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS No. 157 also establishes a fair value hierarchy that prioritizes information used in developing assumptions when pricing an asset or liability. SFAS No. 157 will be effective for the Company beginning in fiscal year 2008. The Company is assessing the potential impact that the adoption of SFAS No. 157 will have on its consolidated

financial condition or results of operations.

In June 2006, the FASB issued FASB Interpretation Number (FIN) 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109, which clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with SFAS No. 109, Accounting for Income Taxes. The interpretation prescribes a recognition threshold and

6

Table of Contents

Johnson Controls, Inc.
Notes to Condensed Consolidated Financial Statements
(unaudited)

measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 allows recognition of only those tax benefits that satisfy a greater than 50% probability threshold. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN 48 is effective for the Company beginning October 1, 2007. The Company is assessing the potential impact that the adoption of FIN 48 will have on its previously established tax reserves, consolidated financial condition or results of operations.

3. Acquisition of Business

In December 2005, the Company completed its acquisition of York International Corporation (York). The total cost of the acquisition, excluding cash acquired, was approximately \$3.1 billion, including the assumption of \$563 million of debt, change in control payments and direct costs of the transaction. The Company initially financed the acquisition by issuing unsecured commercial paper, which was refinanced with long-term debt on January 17, 2006. York's results of operations have been included in the Company's condensed consolidated financial statements since the date of acquisition.

The acquisition of York enabled the Company to become a single source supplier of integrated products and services for building owners to optimize comfort and energy efficiency. The acquisition enhanced the Company's heating, ventilating, and air conditioning (HVAC) equipment, controls, fire and security capabilities and positions the Company in a strategic leadership position in the global building environment industry which the Company believes offers significant growth potential.

During the first quarter of fiscal year 2007, the Company completed its York purchase price allocation. The adjustments were primarily related to the finalization of the restructuring plans, fixed asset valuations and other immaterial adjustments.

The following table summarizes the fair values of the York assets acquired and liabilities assumed at the date of acquisition (in millions):

Current assets, net of cash acquired	\$ 1,919
Property, plant and equipment	390
Goodwill	2,075
Other intangible assets	507
Other noncurrent assets	381
 Total assets	 5,272
Current liabilities	1,379
Noncurrent liabilities	1,360
 Total liabilities	 2,739
 Net assets acquired	 \$ 2,533

In conjunction with the York acquisition, the Company recorded goodwill of approximately \$2.1 billion, none of which is tax deductible, with allocation to the building efficiency business reporting segments as follows: \$427 million to North America Systems; \$602 million to North America Service; \$480 million to North America

Unitary Products; \$149 million to Europe; and \$417 million to Rest of World. In addition, intangible assets subject to amortization were valued at \$251 million with useful lives between 1.5 and 30 years, of which \$199 million was assigned to customer relationships with useful lives between 20 and 30 years. Intangible assets not subject to amortization, primarily trademarks, were valued at \$256 million.

The Company recorded restructuring reserves of \$161 million related to the York acquisition, including workforce reductions of approximately 3,150 building efficiency employees (850 for North America Systems, 300 for North America Service, 60 for North America Unitary Products, 1,150 for Europe and 790 for Rest of World), the closure of two manufacturing plants (one in North America Systems and one in Rest of World), the merging of other plants and branch offices with existing Company facilities and

Table of Contents

Johnson Controls, Inc.
Notes to Condensed Consolidated Financial Statements
(unaudited)

contract terminations. These restructuring activities were recorded as costs of the acquisition and were provided for in accordance with FASB Emerging Issues Task Force Issue No. 95-3, Recognition of Liabilities in Connection with a Purchase Business Combination. The Company anticipates that substantially all of the restructuring actions will be completed by the end of fiscal year 2007.

As of June 30, 2007, approximately 1,800 employees have been separated from the Company pursuant to the York restructuring, including 275 for North America Systems, 50 for North America Unitary Products, 1,100 for Europe and 375 for Rest of World.

The following table summarizes the changes in the Company's York restructuring reserves, included within other current liabilities in the condensed consolidated statement of financial position (in millions):

	Employee Severance and Termination Benefits	Other	Currency Translation	Total
Balance at September 30, 2006	\$ 50	\$ 49	\$ 6	\$ 105
Adjustments	(3)	6		3
Utilized Cash	(6)	(4)		(10)
Utilized Noncash			1	1
Balance at December 31, 2006	41	51	7	99
Utilized Cash	(6)	(2)		(8)
Balance at March 31, 2007	35	49	7	91
Utilized Cash	(7)	(17)		(24)
Utilized Noncash			(2)	(2)
Balance at June 30, 2007	\$ 28	\$ 32	\$ 5	\$ 65

Included within the other category are exit costs for terminating supply contracts associated with changes in the Company's manufacturing footprint and strategies, lease termination costs and other direct costs.

4. Discontinued Operations

In March 2007, the Company completed the sale of the Bristol Compressor business for approximately \$45 million, of which \$35 million was received in cash in the three months ended March 31, 2007 and an additional \$10 million is pending final purchase price adjustments. The sale of the Bristol Compressor business, which was acquired in December 2005 as part of the York transaction (see Note 3), resulted in a loss of approximately \$44 million (\$27 million after-tax), including related costs.

In the second quarter of fiscal year 2007, the Company settled a claim related to the February 2005 sale of its engine electronics business that resulted in a loss of approximately \$4 million (\$3 million after-tax).

Table of Contents

Johnson Controls, Inc.
Notes to Condensed Consolidated Financial Statements
(unaudited)

The following summarizes the net sales, income (loss) before income taxes and minority interests, and income (loss) per share from discontinued operations amounts for the three and nine months ended June 30, 2007 and 2006 (in millions, except per share amounts):

	Three Months Ended June 30,		Nine Months Ended June 30,	
	2007	2006	2007	2006
Net sales	\$	\$ 57	\$ 54	\$ 135
Income (loss) before income taxes and minority interests		4	(13)	5
Income (loss) per share from discontinued operations				
Basic	\$	\$ 0.01	\$ (0.05)	\$ 0.01
Diluted	\$	\$ 0.01	\$ (0.05)	\$ 0.01
Loss per share on sale of discontinued operations				
Basic	\$	\$	\$ (0.15)	\$
Diluted	\$	\$	\$ (0.15)	\$

Net assets of the Bristol Compressor business at the disposal date totaled approximately \$86 million, which consisted of current assets of \$97 million, fixed assets of \$6 million and liabilities of \$17 million.

5. Percentage-of-Completion Contracts

The building efficiency business records certain long term contracts under the percentage-of-completion method of accounting. Under this method, sales and gross profit are recognized as work is performed based on the relationship between actual costs incurred and total estimated costs at completion. The Company records costs and earnings in excess of billings on uncompleted contracts within accounts receivable - net and billings in excess of costs and earnings on uncompleted contracts within other current liabilities in the condensed consolidated statements of financial position. Amounts included within accounts receivable - net related to these contracts were \$596 million, \$455 million and \$393 million at June 30, 2007, September 30, 2006, and June 30, 2006, respectively. Amounts included within other current liabilities were \$521 million, \$314 million and \$292 million at June 30, 2007, September 30, 2006, and June 30, 2006, respectively.

6. Inventories

(unaudited)

The Company's other intangible assets, primarily from business acquisitions, are valued based on independent appraisals and consisted of (in millions):

	June 30, 2007			September 30, 2006			June 30, 2006		
	Gross Carrying Amount	Accumulated Amortization	Net	Gross Carrying Amount	Accumulated Amortization	Net	Gross Carrying Amount	Accumulated Amortization	Net
Amortized intangible assets									
Patented technology	\$305	\$ (138)	\$167	\$300	\$ (126)	\$174	\$296	\$ (119)	\$177
Unpatented technology	33	(12)	21	31	(9)	22	33	(9)	24
Customer relationships	318	(24)	294	304	(15)	289	260	(12)	248
Miscellaneous	29	(25)	4	33	(20)	13	30	(16)	14
Total amortized intangible assets	685	(199)	486	668	(170)	498	619	(156)	463
Unamortized intangible assets									
Trademarks	295		295	295		295	309		309
Pension asset	6		6	6		6	7		7
Total unamortized intangible assets	301		301	301		301	316		316
Total intangible assets	\$986	\$ (199)	\$787	\$969	\$ (170)	\$799	\$935	\$ (156)	\$779

Amortization of other intangible assets for the nine month periods ended June 30, 2007 and 2006 was \$36 million and \$30 million, respectively. Excluding the impact of any future acquisitions, the Company anticipates amortization of other intangible assets will average approximately \$36 million per year over the next five years.

8. Product Warranties

The Company offers warranties to its customers depending upon the specific product and terms of the customer purchase agreement. A typical warranty program requires that the Company replace defective products within a specified time period from the date of sale. The Company records an estimate for future warranty-related costs based on actual historical return rates. Based on analysis of return rates and other factors, the adequacy of the Company's warranty provisions are adjusted as necessary. While the Company's warranty costs have historically been within its calculated estimates, it is possible that future warranty costs could exceed those estimates. The Company's product warranty liability is included in other current liabilities in the condensed consolidated statements of financial position.

Edgar Filing: JOHNSON CONTROLS INC - Form 10-Q

The change in the carrying amount of the Company's total product warranty liability for the nine months ended June 30, 2007 was as follows (in millions):

Balance as of September 30, 2006	\$ 189
Accruals for warranties issued during the period	85
Accruals from acquisition	5
Accruals related to pre-existing warranties (including changes in estimates)	6
Settlements made (in cash or in kind) during the period	(101)
Currency translation	4
Balance as of June 30, 2007	\$ 188

9. Restructuring Costs

As part of its continuing efforts to reduce costs and improve the efficiency of its global operations, the Company committed to a restructuring plan (2006 Plan) in the third quarter of fiscal year 2006 and recorded a \$197 million restructuring charge in that quarter. During the fourth quarter of fiscal year 2006, the Company increased its 2006 Plan restructuring charge by \$8 million for additional employee severance and termination benefits. The 2006 Plan, which primarily includes workforce reductions and plant consolidations in the automotive experience and building efficiency businesses, is expected to be substantially completed by the end of the first quarter of fiscal year 2008. The automotive experience business related restructuring is focused on improving the profitability associated with the manufacturing and supply of instrument panels, headliners and other interior components in North America and increasing the efficiency of seating component operations in Europe. The charges associated with the building efficiency business mostly relate to Europe where the Company has launched a systems redesign initiative. The Company expects to incur other related and ancillary costs associated with some of these restructuring activities in future periods. These costs are not expected to be material and will be expensed as incurred.

The 2006 Plan includes workforce reductions of approximately 5,000 employees (2,500 for automotive experience North America, 1,400 for automotive experience Europe, 200 for building efficiency North America, 600 for building efficiency Europe, 280 for building efficiency Rest of World and 20 for power solutions). Restructuring charges associated with employee severance and termination benefits will be paid over the severance period granted to each employee and on a lump sum basis when required in accordance with individual severance agreements. As of June 30, 2007, approximately 3,000 employees have been separated from the Company pursuant to the 2006 Plan. In addition, the 2006 Plan includes 15 plant closures (10 in automotive experience North America, 3 in automotive experience Europe, 1 in building efficiency Europe and 1 in building efficiency Rest of World). The restructuring charge for the impairment of the long-lived assets associated with the plant closures was determined using an undiscounted cash flow analysis.

The following table summarizes the changes in the Company's 2006 Plan reserve, included within other current liabilities in the condensed consolidated statement of financial position (in millions):

	Employee Severance and Termination Benefits	Other	Currency Translation	Total
Balance at September 30, 2006	\$ 125	\$ 12	\$ 1	\$ 138
Utilized Cash	(18)	(1)		(19)
Utilized Noncash			(1)	(1)
Balance at December 31, 2006	107	11		118
Utilized Cash	(15)	(1)		(16)
Utilized Noncash			1	1
Balance at March 31, 2007	92	10	1	103

Edgar Filing: JOHNSON CONTROLS INC - Form 10-Q

Utilized Cash	(22)	(3)		(25)
Utilized Noncash			(1)	(1)
Balance at June 30, 2007	\$ 70	\$ 7	\$	\$ 77

Included within the other category are exit costs for terminating supply contracts associated with changes in the Company's manufacturing footprint and strategies, lease termination costs and other direct costs.

Table of Contents

Johnson Controls, Inc.
Notes to Condensed Consolidated Financial Statements
(unaudited)

In the second quarter of fiscal year 2005, the Company committed to a restructuring plan (2005 Plan) involving cost reduction actions and recorded a \$210 million restructuring charge in that quarter. During the fourth quarter of fiscal year 2006, the Company reversed \$6 million of restructuring reserves that were not expected to be utilized. This restructuring charge included workforce reductions of approximately 3,900 employees. Restructuring charges associated with employee severance and termination benefits are paid over the severance period granted to each employee and on a lump sum basis when required in accordance with individual severance agreements. As of June 30, 2007, approximately 3,375 employees have separated from the Company pursuant to the 2005 Plan. In addition, the 2005 Plan included 12 plant closures, all of which have been completed as of June 30, 2007. The charge for the impairment of the long-lived assets associated with the plant closures was determined using an undiscounted cash flow analysis. The closures/restructuring activities are primarily concentrated in Europe and North America.

As of June 30, 2007 and September 30, 2006, the remaining 2005 Plan reserves were \$10 million and \$31 million, respectively. During fiscal year 2007, the Company utilized \$23 million in cash payments (\$21 million for employee severance and termination benefits and \$2 million in other restructuring costs) and incurred another \$2 million in net currency translation adjustments related to the 2005 Plan reserve. The remaining 2005 Plan reserves relate to employee severance and termination benefits for automotive experience Europe, which are expected to be substantially paid in the fourth quarter of fiscal year 2007.

Company management closely monitors its overall cost structure and continually analyzes each of its businesses for opportunities to consolidate current operations, improve operating efficiencies and locate facilities in low cost countries in close proximity to customers. This ongoing analysis includes a review of its manufacturing, engineering and purchasing operations, as well as the overall global footprint for all its businesses. Because of the importance of new vehicle sales by major automotive manufacturers to operations, the Company is affected by the general business conditions in this industry. Future adverse developments in the automotive industry could impact the Company's liquidity position and/or require additional restructuring of its operations.

10. Research and Development

Expenditures for research activities relating to product development and improvement are charged against income as incurred and included within selling, general and administrative expenses. A portion of the costs associated with these activities is reimbursed by customers. Such expenditures amounted to \$121 million and \$148 million for the three months ended June 30, 2007 and 2006, respectively, and \$390 million and \$410 million for the nine months ended June 30, 2007 and 2006, respectively. These expenditures are net of customer reimbursements of \$70 million and \$75 million for the three months ended June 30, 2007 and 2006, respectively, and \$183 million and \$228 million for the nine months ended June 30, 2007 and 2006, respectively.

11. Income Taxes

The more significant discrete period items affecting the Company's income tax provision from continuing operations are as follows (in millions):

	Three Months Ended June 30,		Nine Months Ended June 30,	
	2007	2006	2007	2006
Federal, state and foreign income tax expense	\$ 106	\$ 49	\$ 213	\$ 139
Valuation allowance adjustments		(131)		(163)
Restructuring charge		(19)		(19)
Uncertain tax positions		(10)	(15)	(10)
Foreign dividend repatriation				31
Change in tax status of foreign subsidiary			(22)	(11)
Disposition of a joint venture				(4)
Provision for income taxes	\$ 106	\$ (111)	\$ 176	\$ (37)

Effective Tax Rate Adjustment

In calculating the provision for income taxes, the Company uses an estimate of the annual effective tax rate based upon the facts and circumstances known at each interim period. On a quarterly basis, the actual effective tax rate is adjusted, as appropriate, based upon changed facts and circumstances, if any, as compared to those forecasted at the beginning of the fiscal year and each interim period thereafter. For the three and nine months ended June 30, 2007 and 2006, the Company's estimated annual effective income tax rate for continuing operations was 21.0%.

Valuation Allowance Release

The Company reviews its deferred tax asset valuation allowances on a quarterly basis, or whenever events or changes in circumstances indicate that a review is required. In determining the requirement for a valuation allowance, the historical and projected financial results of the legal entity or consolidated group recording the net deferred tax asset is considered, along with any other positive or negative evidence. Since future financial results may differ from previous estimates, periodic adjustments to the Company's valuation allowances may be necessary.

In the third quarter of fiscal year 2006, the Company completed an analysis of its German operations and, based on cumulative income over a 36-month period, an assessment of expected future profitability in Germany and finalization of the 2006 Plan, determined that it was more likely than not that the tax benefits of certain operating loss and tax credit carryforwards in Germany would be utilized in the future. As such, the Company reversed \$131 million attributable to these operating loss and tax credit carryforwards in the quarter ended June 30, 2006 as a credit to income tax expense, net of remaining valuation allowances at certain German subsidiaries and tax reserve requirements.

Based on the Company's cumulative operating results through the six months ended March 31, 2006 and an assessment of expected future profitability in Mexico, the Company concluded that it was more likely than not that

the tax benefits of its operating loss and tax credit carryforwards in Mexico would be utilized in the future. During the second quarter of fiscal year 2006, the Company completed a tax reorganization in Mexico which will allow operating loss and tax credit carryforwards to be offset against the future taxable income of the reorganized entities. As such, in the quarter ended March 31, 2006, the Company reversed the entire valuation allowance of \$32 million attributable to these operating loss and tax credit carryforwards as a credit to income tax expense.

Table of Contents

Johnson Controls, Inc.
Notes to Condensed Consolidated Financial Statements
(unaudited)

Restructuring Charge

In the third quarter of fiscal year 2006, the Company recorded a \$19 million discrete period tax benefit related to third quarter 2006 restructuring costs using a blended statutory tax rate of 30.6%.

Uncertain Tax Positions

The Company is subject to income taxes in the U.S. and numerous foreign jurisdictions. Significant judgment is required in determining its worldwide provision for income taxes and recording the related assets and liabilities. In the ordinary course of the Company's business, there are many transactions and calculations where the ultimate tax determination is uncertain. The Company is regularly under audit by tax authorities. Accruals for tax contingencies are provided for in accordance with the requirements of SFAS No. 5 Accounting for Contingencies.

In the second quarter of fiscal year 2007, the Company reduced its income tax liability by \$15 million due to the favorable resolution of certain tax audits. The Company's federal income tax returns and certain foreign income tax returns for fiscal years 1999 through 2003 remain under various stages of audit by the Internal Revenue Service and respective foreign tax authorities. Although the outcome of tax audits is always uncertain, management believes that it has appropriate support for the positions taken on its tax returns and that its annual tax provisions included amounts sufficient to pay assessments, if any, which may be proposed by the taxing authorities. At June 30, 2007, the Company has recorded a liability for its best estimate of the probable loss on certain of its tax positions, the majority of which is included in other noncurrent liabilities in the condensed consolidated statements of financial position. Nonetheless, the amounts ultimately paid, if any, upon resolution of the issues raised by the taxing authorities may differ materially from the amounts accrued for each year.

In the third quarter of fiscal year 2006, the Company recorded a \$10 million tax benefit related to a favorable tax audit resolution in a foreign jurisdiction.

Foreign Dividend Repatriation

In October 2004, the President signed the American Jobs Creation Act of 2004 (AJCA). The AJCA creates a temporary incentive for U.S. corporations to repatriate accumulated income earned abroad by providing an 85 percent dividends received deduction for certain dividends from controlled foreign operations. The deduction is subject to a number of limitations. During the quarter ended March 31, 2006, the Company completed its evaluation of its repatriation plans and approximately \$674 million of foreign earnings were designated for repatriation to the U.S. pursuant to the provisions of the AJCA. The increase in income tax liability related to the Company's AJCA initiatives totaled \$42 million. The Company recorded \$31 million of net income tax expense in the quarter ended March 31, 2006 as \$11 million had been previously recorded by York prior to the acquisition in accordance with York's approved repatriation plan.

Change in Tax Status of Foreign Subsidiary

For the three and nine months ended June 30, 2007, the tax provision decreased as a result of a \$22 million tax benefit realized by a change in tax status of an automotive experience subsidiary in the Netherlands. For the nine months ended June 30, 2006, the tax provision decreased as a result of an \$11 million tax benefit realized by a change in tax status of an automotive experience subsidiary in Hungary and a building efficiency subsidiary in the Netherlands.

The change in tax status in each respective period resulted from a voluntary tax election that produced a deemed liquidation for U.S. federal income tax purposes. The Company received a tax benefit in the U.S. for the loss from the decrease in value from the original tax basis of these investments. This election changed the tax status of the respective subsidiaries from controlled foreign corporations (i.e., taxable entities) to branches (i.e., flow through entities similar to a partnership) for U.S. federal income tax purposes and is thereby reported as a discrete period tax benefit in accordance with the provisions of SFAS No. 109.

Table of Contents

Johnson Controls, Inc.
Notes to Condensed Consolidated Financial Statements
(unaudited)

Other Discrete Period Items

For the nine months ended June 30, 2006, the tax provision also decreased due to a \$4 million nonrecurring tax benefit related to a \$9 million gain from the disposition of the Company's interest in a German joint venture.

Tax Law Changes

In March 2007, the People's National Congress in the People's Republic of China approved a new tax reform law to align the tax regime applicable to foreign-owned Chinese enterprises with those applicable to domestically-owned Chinese enterprises. The new law will be effective on January 1, 2008. The Company believes that the new tax reform law will not have a material impact on its consolidated financial condition, results of operations or cash flows.

Discontinued Operations

The Company utilized an effective tax rate for discontinued operations of approximately 38% for its Bristol Compressors' business. This effective tax rate approximates the local statutory rate adjusted for permanent differences.

12. Retirement Plans

The components of the Company's net periodic benefit costs associated with its defined benefit pension plans and other postretirement health and other benefits are shown in the tables below in accordance with SFAS No. 132 (revised 2003), Employers' Disclosures about Pensions and Other Postretirement Benefits, an amendment of FASB Statements No. 87, 88 and 106 (in millions):

	U.S. Pension Plans			
	Three Months		Nine Months	
	Ended June 30,		Ended June 30,

13. Earnings Per Share

The following table reconciles the denominators used to calculate basic and diluted earnings per share (in millions):

	Three Months		Nine Months	
	Ended June 30,		Ended June 30,	
	2007	2006	2007	2006
Weighted Average Shares Outstanding				
Basic weighted average shares outstanding	197.3	195.1	196.6	194.2
Effect of dilutive securities:				
Stock options	3.1	2.2	2.7	2.1
Diluted weighted average shares outstanding	200.4	197.3	199.3	196.3

Antidilutive Securities

Options to purchase common shares	0.1	0.1
-----------------------------------	-----	-----

14. Comprehensive Income

A summary of comprehensive income is shown below (in millions):

	Three Months		Nine Months	
	Ended June 30,		Ended June 30,	
	2007	2006	2007	2006
Net income	\$ 396	\$ 338	\$ 786	\$ 668
Realized and unrealized gains (losses) on derivatives	41	(35)	20	(23)
Foreign currency translation adjustments	65	232	204	213
Other comprehensive income	106	197	224	190
Comprehensive income	\$ 502	\$ 535	\$ 1,010	\$ 858

The Company selectively hedges anticipated transactions that are subject to foreign exchange exposure or commodity price exposure, primarily using foreign currency exchange contracts and commodity contracts, respectively. These instruments are designated as cash flow hedges in accordance with SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended by SFAS No. 137, No. 138 and No. 149 and are recorded in the condensed consolidated statement of financial position at fair value. The effective portion of the contracts' gains or losses due to changes in fair value are initially recorded as unrealized gains/losses on derivatives, a component of other comprehensive income, and are subsequently reclassified into earnings when the hedged transactions, typically sales or costs related to sales, occur and affect earnings. These contracts are highly effective in hedging the variability in future cash flows attributable to changes in currency exchange rates or commodity price changes.

The favorable foreign currency translation adjustments (CTA) for the three and nine months ended June 30, 2007 were primarily due to the strengthening of foreign currencies, mainly the euro and British pound sterling, against the U.S. dollar.

Table of Contents

Johnson Controls, Inc.
Notes to Condensed Consolidated Financial Statements
(unaudited)

The Company has foreign currency-denominated debt obligations and cross-currency interest rate swaps which are designated as hedges of net investments in foreign subsidiaries. Gains and losses, net of tax, attributable to these hedges are deferred as CTA within the accumulated other comprehensive income account until realized. Net losses of approximately \$3 million and \$40 million were recorded for the three month periods ended June 30, 2007 and 2006, respectively, and net losses of approximately \$37 million and \$33 million were recorded for the nine month periods ended June 30, 2007 and 2006, respectively.

15. Segment Information

SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information, establishes the standards for reporting information about operating segments in financial statements. In applying the criteria set forth in SFAS No. 131, the Company has determined that it has ten reportable segments for financial reporting purposes. Certain operating segments are aggregated or combined based on materiality within building efficiency Rest of World and power solutions in accordance with the standard. The Company's ten reportable segments are presented in the context of its three primary businesses building efficiency, automotive experience and power solutions.

Building efficiency

North America Systems designs, produces, markets and installs mechanical equipment that provides heating and cooling in North American non-residential buildings and industrial applications as well as control systems that integrate the operation of this equipment with other critical building systems.

North America Service provides technical services including inspection, scheduled maintenance, repair and replacement of mechanical and control systems in North America, as well as the retrofit and service components of performance contracts and other solutions.

North America Unitary Products designs and produces heating and air conditioning solutions for residential and light commercial applications and markets products to the replacement and new construction markets.

Global Workplace Solutions provides consulting and on-site staff for complete real estate services, facility operation and management to improve the comfort, productivity, energy efficiency and cost effectiveness of corporate real estate around the globe.

Europe provides HVAC, refrigeration and control systems and technical services to the European marketplace.

Rest of World provides HVAC, refrigeration and control systems and technical services to markets in Asia, the Middle East and Latin America.

Automotive experience

Automotive experience designs and manufactures interior systems and products for passenger cars and light trucks, including vans, pick-up trucks and sport/crossover vehicles in North America, Europe and Asia. Automotive experience systems and products include complete seating systems and components; cockpit systems, including instrument clusters, information displays and body controllers; overhead systems, including headliners and electronic convenience features; floor consoles; and door systems.

Power solutions

Power solutions services both automotive original equipment manufacturers and the battery aftermarket by providing advanced battery technology, coupled with systems engineering, marketing and service expertise.

Table of Contents

Johnson Controls, Inc.
Notes to Condensed Consolidated Financial Statements
(unaudited)

Beginning in fiscal year 2007, Company management, including the chief operating decision maker, adjusted their measurement of business unit performance, changing from operating income to segment income, which represents income from continuing operations before income taxes and minority interests excluding net financing charges. The primary reason for the modification was to reflect equity income in earnings for each business operation given its growing significance to the Company's global business strategies. Segment income will continue to exclude restructuring costs and certain significant gains and losses. The amounts for the three and nine month periods ended June 30, 2006 have been revised to conform to the current year presentation. Financial information relating to the Company's reportable segments is as follows (in millions):

	Net Sales			
	Three Months		Nine Months	
	Ended June 30, 2007	2006	Ended June 30, 2007	2006
Building efficiency				
North America Systems	\$ 519	\$ 426	\$ 1,447	\$ 1,145

For the three months ended June 30, 2006, the Company recorded income related to a favorable legal settlement associated with the recovery of previously incurred environmental costs in the power solutions segment (\$33 million). The Company also recorded income related to this legal settlement in North America Systems (\$7 million) and other segments (\$6 million) that was offset by other unfavorable commercial and legal settlements. In the aggregate, net legal and other commercial settlements during the three months ended June 30, 2006 totaled \$33 million.

16. Commitments and Contingencies

As previously reported, following allegations in a U.N. Oil-For-Food Inquiry Report that, prior to the Company's acquisition of York, York had made improper payments to the Iraqi regime, York and the Company jointly undertook to investigate the allegations and offered the companies' cooperation to the Department of Justice (DOJ) and the SEC. After completing the York acquisition, the Company continued the internal inquiry and expanded its scope to include other aspects of York's Middle East operations, including a review of York's use of

agents, consultants and other third parties, York's compliance with the Office of Foreign Assets Control licensing requirements, and York's compliance with other potentially applicable trade laws. The Company has also reviewed certain of York's sales practices in selected Asian markets. The factual inquiry is now substantially complete and indicates that, in a number of instances, York engaged in conduct that may lead to enforcement actions against the Company under applicable U.S. laws, which give authorities the right to pursue administrative, civil and criminal sanctions, including monetary penalties. The Company has been voluntarily disclosing this information and offering continued cooperation with the DOJ and SEC, as well as to other relevant authorities in the U.S. Departments of Treasury, Commerce and Defense. The Company has begun discussions with the relevant authorities to explore how these matters may be resolved. The Company is in the process of evaluating and implementing various remedial measures with respect to York operations.

The Company accrues for potential environmental losses in a manner consistent with accounting principles generally accepted in the United States; that is, when it is probable a loss has been incurred and the amount

Table of Contents

Johnson Controls, Inc.
Notes to Condensed Consolidated Financial Statements
(unaudited)

of the loss is reasonably estimable. The Company reviews the status of its environmental sites on a quarterly basis and adjusts its reserves accordingly. Such potential liabilities accrued by the Company do not take into consideration possible recoveries of future insurance proceeds. They do, however, take into account the likely share other parties will bear at remediation sites. It is difficult to estimate the Company's ultimate level of liability at many remediation sites due to the large number of other parties that may be involved, the complexity of determining the relative liability among those parties, the uncertainty as to the nature and scope of the investigations and remediation to be conducted, the uncertainty in the application of law and risk assessment, the various choices and costs associated with diverse technologies that may be used in corrective actions at the sites, and the often quite lengthy periods over which eventual remediation may occur. Nevertheless, the Company has no reason to believe at the present time that any claims, penalties or costs in connection with known environmental matters will have a material adverse effect on the Company's financial position, results of operations or cash flows.

The Company is involved in a number of product liability and various other suits incident to the operation of its businesses. Insurance coverages are maintained and estimated costs are recorded for claims and suits of this nature. It is management's opinion that none of these will have a material adverse effect on the Company's financial position, results of operations or cash flows. Costs related to such matters were not material to the periods presented.

The Company has entered into supply contracts with certain vendors that include minimum volume requirements which, if not met, could subject the Company to potential liabilities. At the end of the third quarter of fiscal year 2007, there were no known volume shortfalls for which the Company was contractually obligated. These supply contracts include cancellation penalties in the event that either party elects to terminate the agreement prior to its expiration. Such penalties, if incurred, could be material to the Company's consolidated financial condition, results of operations or cash flows.

A significant portion of the Company's sales are to customers in the automotive industry. Future adverse developments in the automotive industry could impact the Company's liquidity position and/or require additional restructuring of the Company's operations. In addition, a downturn in the North America automotive market may also impact certain vendors' financial solvency, including the ability to meet restrictive debt covenants, resulting in potential liabilities or additional costs to the Company to ensure uninterrupted supply to its customers.

17. Subsequent Event

On July 25, 2007, the Company announced a three-for-one stock split effective October 2, 2007 to shareholders of record on September 14, 2007.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders
of Johnson Controls, Inc.

We have reviewed the accompanying condensed consolidated statements of financial position of Johnson Controls, Inc. and its subsidiaries (the Company) as of June 30, 2007 and 2006, and the related consolidated statements of income for each of the three-month and nine-month periods ended June 30, 2007 and 2006 and the condensed consolidated statements of cash flows for the three-month and nine-month periods ended June 30, 2007 and 2006. These interim financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statement of financial position as of September 30, 2006, and the related consolidated statements of income, shareholders' equity, and cash flows for the year then ended, management's assessment of the effectiveness of the Company's internal control over financial reporting as of September 30, 2006 and the effectiveness of the Company's internal control over financial reporting as of September 30, 2006; and in our report dated December 1, 2006, we expressed unqualified opinions thereon. An explanatory paragraph was included in our report for the adoption of Financial Accounting Standards No. 123(R), Share-Based Payment and Financial Accounting Standards Board Interpretation No. 47, Accounting for Conditional Asset Retirement Obligations, an interpretation of FASB Statement No. 143. The consolidated financial statements and management's assessment of the effectiveness of internal control over financial reporting referred to above are not presented herein. In our opinion, the information set forth in the accompanying condensed consolidated statement of financial position as of September 30, 2006, is fairly stated in all material respects in relation to the consolidated statement of financial position from which it has been derived.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS****Cautionary Statements for Forward-Looking Information**

Unless otherwise indicated, references to Johnson Controls, the Company, we, our and us in this Quarterly Report on Form 10-Q refer to Johnson Controls, Inc. and its consolidated subsidiaries.

The Company has made forward-looking statements in this document pertaining to its financial results for fiscal year 2007 that are based on preliminary data and are subject to risks and uncertainties. The Company believes these to be forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact are statements that are or could be deemed forward-looking statements. Forward looking statements include information concerning possible or assumed future risks and may include words such as outlook, may, will, expects, intends, estimates, anticipates, believes, should, guidance or plan or the negative thereof or variations thereon or similar terminology are generally intended to identify forward-looking statements. For those statements, the Company cautions that numerous important factors, such as those discussed in Item 1A of the Company's Annual Report on Form 10-K for the year ended September 30, 2006, which was filed with the U.S. Securities and Exchange Commission (SEC) on December 5, 2006, could affect the Company's actual results and could cause its actual consolidated results to differ materially from those expressed in any forward-looking statement made by, or on behalf of, the Company.

Overview

The Company operates in three primary businesses: building efficiency, automotive experience and power solutions. Building efficiency provides facility systems and services including comfort, energy and security management for the residential and non-residential buildings market. Automotive experience designs and manufactures interior systems and products for passenger cars and light trucks, including vans, pick-up trucks and sport/crossover vehicles. Power solutions designs and manufactures automotive batteries for the replacement and original equipment markets.

In December 2005, the Company acquired York International Corporation (York), a leading global provider of heating, ventilating, and air conditioning (HVAC) equipment and services. The results of York's operations are included in the Company's consolidated financial statements from the date of acquisition.

The following information should be read in conjunction with the September 30, 2006 consolidated financial statements and notes thereto, along with management's discussion and analysis of financial condition and results of operations included in the Company's 2006 Annual Report on Form 10-K. References in the following discussion and analysis to Three Months refer to the three months ended June 30, 2007 compared to the three months ended June 30, 2006, while references to Year-to-Date refer to the nine months ended June 30, 2007 compared to the nine months ended June 30, 2006.

Summary

(In millions)	Three Months Ended June 30,			Nine Months Ended June 30,		
	2007	2006	Change	2007	2006	Change
Net sales	\$8,911	\$8,390	6%	\$25,613	\$24,085	6%
Income from continuing operations before income taxes and minority interests	502	233	115%	1,015	660	54%

Table of Contents**Three Months:**

The \$521 million increase in consolidated net sales was primarily due to growth in the building efficiency business (\$424 million), related to strong worldwide commercial markets, higher global workplace solutions volumes and synergies from the York acquisition, and higher sales in the power solutions business (\$143 million) related to higher unit prices resulting from significant increases in the cost of lead, partially offset by lower volumes in the automotive experience business (\$46 million) reflecting lower global demand and the discontinuance of certain automobile models in North America and Europe. Included in the amounts above are the favorable effects of foreign currency translation (approximately \$265 million).

The \$269 million increase in income from continuing operations before income taxes and minority interests was primarily due to the effect of restructuring costs on prior year results (\$197 million), higher sales volume and margin expansion in the building efficiency business (\$83 million) and favorable product mix in the power solutions business (\$32 million), partially offset by the effect on prior year results of a net non-recurring recovery of previously incurred environmental costs (\$33 million) and lower automotive experience results (\$13 million).

Year-to-Date:

The \$1.5 billion increase in consolidated net sales was primarily due to growth in the building efficiency business (\$2.0 billion), related to the impact of the December 2005 York acquisition, strong worldwide commercial markets, higher global workplace solutions volumes and synergies from the York acquisition, and higher power solutions net sales (\$350 million) related to higher unit prices resulting from significant increases in the cost of lead, partially offset by lower sales in the automotive experience business (\$833 million) reflecting the weaker North American automotive market. Included in the amounts above are the favorable effects of foreign currency translation (approximately \$910 million).

The \$355 million increase in income from continuing operations before income taxes and minority interests was primarily due to the effect from restructuring costs on prior year results (\$197 million) and York integration costs, higher sales volume and margin expansion in the building efficiency business, favorable product mix in the power solutions business, improved margins resulting from operational efficiencies and the benefits of cost reduction programs in automotive experience Europe, and the effect on prior year results of an expense of approximately \$53 million related to the York acquisition for the amortization of the write-up of inventory. This increase was partially offset by lower volume, unfavorable vehicle platform sales mix and higher launch costs in automotive experience North America (\$148 million) and net non-recurring recovery of previously incurred environmental costs (\$33 million).

Segment Analysis

Management historically evaluated the performance of its operating segments based primarily on operating income excluding restructuring costs and significant gains and losses. For this purpose, consolidated operating income also excluded interest income and expense, equity in earnings of partially-owned affiliates, gains and losses from sales of businesses, certain foreign currency gains and losses, and certain miscellaneous revenues and expenses.

Beginning in fiscal year 2007, Company management, including the chief operating decision maker, adjusted their measurement of business unit performance, changing from operating income to segment income, which represents income from continuing operations before income taxes and minority interests excluding net financing charges and restructuring costs. The primary reason for the modification was to reflect equity income in earnings for each business operation given its growing significance to the Company's global business strategies. Segment income will continue to exclude restructuring costs and certain significant gains and losses. The Company has revised its prior period segment reporting to conform to the current year's presentation.

Table of Contents**Building Efficiency Net Sales**

(In millions)	Net Sales Three Months Ended June 30,			Net Sales Nine Months Ended June 30,		
	2007	2006	Change	2007	2006	Change
North America Systems	\$ 519	\$ 426	22%	\$ 1,447	\$ 1,145	26%
North America Service	590	516	14%	1,597	1,315	21%
North America Unitary Products	283	266	6%	675	552	22%
Global Workplace Solutions	657	520	26%	1,973	1,450	36%
Europe	578	539	7%	1,743	1,336	30%
Rest of World	620	556	12%	1,697	1,323	28%
	\$ 3,247	\$ 2,823	15%	\$ 9,132	\$ 7,121	28%

Three Months:

The increases in North America Systems and North America Service were primarily due to higher commercial volumes in the construction and replacement markets.

The increase in Global Workplace Solutions primarily reflects new and expanded contracts in Europe and North America and the favorable impact of foreign currency translation (approximately \$25 million).

The increase in Europe reflects the favorable impact of foreign currency translation (approximately \$40 million).

The increase in Rest of World is due to volume increases in Asia Pacific, China and Latin America.

Year-to-Date:

The increases in North America Systems, North America Service, Europe and Rest of World were primarily due to higher commercial volumes and the impact of the December 2005 York acquisition. Net sales in Europe were also favorably impacted by foreign currency translation (approximately \$130 million).

The increase in North America Unitary Products is primarily due to the impact of the December 2005 York acquisition, partially offset by a continued decline in new home construction.

The increase in Global Workplace Solutions primarily reflects new and expanded contracts in Europe and North America and the favorable impact of foreign currency translation (approximately \$80 million).

Table of Contents**Building Efficiency Segment Income**

(In millions)	Segment Income Three Months Ended June 30,			Segment Income Nine Months Ended June 30,		
	2007	2006	Change	2007	2006	Change
North America Systems	\$ 63	\$ 41	54%	\$ 135	\$ 78	73%
North America Service	69	50	38%	117	69	70%
North America Unitary Products	28	31	-10%	42	36	17%
Global Workplace Solutions	17	16	6%	49	46	7%
Europe	33	3	*	53	(20)	*
Rest of World	64	50	28%	138	78	77%
	\$ 274	\$ 191	43%	\$ 534	\$ 287	86%

* Measure not meaningful.

Three Months:

The increases for North America Systems, North America Service and Europe were primarily due to higher sales volumes and margin expansion, partially offset by higher selling, general and administrative (SG&A) expenses needed to support business growth.

The decrease in North America Unitary Products was primarily due to lower unit volumes and product cost increases.

The increase in Rest of World was primarily due to volume and margin increases in Asia Pacific, China and Latin America.

Year-to-Date:

For all building efficiency segments, the current period includes two additional months of segment income related to the December 2005 York acquisition. The prior year period also included \$53 million of expense related to the York acquisition for the amortization of the write-up of inventory (\$5 million for North America Systems, \$7 million for North America Service, \$14 million for North America Unitary Products, \$16 million for Europe and \$11 million for Rest of World).

The increase in North America Systems was also due to higher sales volumes, improved pricing, margin expansion, realization of synergies from the York acquisition and the effect on prior year results of non-recurring York integration costs, partially offset by higher SG&A expenses needed to support the business growth and unfavorable commodity costs, primarily copper.

The increase in North American Service, North America Unitary Products, Europe and Rest of World were also due to the effect of prior year results of non-recurring York integration costs, the realization of synergies associated with the York acquisition, higher sales volumes and operational efficiencies from the branch office redesign efforts implemented in Europe in the prior year.

Automotive Experience Net Sales

Net Sales Three Months Ended June 30,	Net Sales Nine Months Ended June 30,
---	--

Edgar Filing: JOHNSON CONTROLS INC - Form 10-Q

(In millions)	2007	2006	Change	2007	2006	Change
North America	\$ 1,988	\$ 2,036	-2%	\$ 5,549	\$ 6,341	-12%
Europe	2,312	2,288	1%	6,767	6,755	0%
Asia	335	357	-6%	1,080	1,133	-5%
	\$ 4,635	\$ 4,681	-1%	\$ 13,396	\$ 14,229	-6%

Table of Contents**Three Months:**

The decrease in North America was primarily due to volume reductions at General Motors Corporation, Nissan Motor Company and DaimlerChrysler AG, partially offset by volume increases with Toyota Motor Corporation and Ford Motor Company. The decrease in net sales of 2% was in line with the industry's estimated domestic production decrease of 7%, primarily due to the Company's platform mix relative to the industry.

The increase in Europe was primarily due to the favorable impact of currency translation (approximately \$175 million). Excluding the foreign currency impact, Europe net sales decreased 7% from the prior year as a result of lower volumes and/or discontinued programs with Honda Motor Company, Nissan Motor Company, DaimlerChrysler AG, General Motors Corporation and BMW AG, partially offset by new business with Kia Motors Corporation.

The decrease in Asia was primarily due to lower volumes with Nissan Motor Company in Japan.

Year-to-Date:

The decrease in North America was primarily due to volume reductions at all significant automotive customers except Toyota Motor Corporation. Full-size pick-up truck and sport utility vehicle programs with General Motors Corporation, Ford Motor Company and DaimlerChrysler AG experienced the most significant volume declines and were the primary cause of the segment's net sales decline.

European net sales were consistent with the prior period as decreased volumes with DaimlerChrysler AG, General Motors Corporation and Volkswagen AG were offset by electronics volume increases and the favorable impact of foreign currency translation (approximately \$600 million).

The decrease in Asia was primarily due to lower volumes with Nissan Motor Company in Japan and with various local original equipment manufacturers (OEM) in Southeast Asia.

Automotive Experience Segment Income

(In millions)	Segment Income Three Months Ended June 30,			Segment Income Nine Months Ended June 30,		
	2007	2006	Change	2007	2006	Change
North America	\$ 52	\$ 62	-16%	\$ (1)	\$ 147	*
Europe	139	121	15%	339	303	12%
Asia	(11)	10	*	(2)	7	*
	\$ 180	\$ 193	-7%	\$ 336	\$ 457	-26%

* Measure not meaningful.

Three Months:

The decrease in North America was primarily due to lower sales volume, partially offset by lower SG&A expenses (\$10 million) resulting from the favorable impact from prior year restructuring programs and other cost reduction initiatives.

The increase in Europe was primarily due to the benefits of cost reduction programs, purchasing savings and other operational efficiencies and the favorable impact of foreign currency translation (approximately \$5 million), partially offset by lower sales volume and unfavorable vehicle platform sales mix.

The decrease in Asia was primarily due to lower sales volumes, start-up costs in China joint ventures and streamlining our cost base in Japan.

Table of Contents**Year-to-Date:**

The decrease in North America was primarily due to lower sales volume and higher launch costs, partially offset by cost reduction programs, purchasing savings and other operational efficiencies. SG&A expenses decreased \$53 million, due to lower net engineering expenses and operational improvements resulting from prior period restructuring actions.

The increase in Europe was primarily due to the favorable impact of foreign currency translation (approximately \$25 million), as well as cost reduction programs and purchasing savings, partially offset by lower sales volume and unfavorable vehicle platform sales mix.

The decrease in Asia was primarily due to lower sales volumes, start-up costs in China joint ventures and streamlining our cost base in Japan.

Power Solutions

(In millions)	Three Months Ended June 30,			Nine Months Ended June 30,		
	2007	2006	Change	2007	2006	Change
Net sales	\$1,029	\$886	16%	\$3,085	\$2,735	13%
Segment income	119	120	-1%	354	309	15%

Three Months:

Net sales increased primarily due to higher unit prices resulting from significant increases in the cost of lead and the favorable impact of foreign currency translation (approximately \$25 million). Unit sales of automotive batteries were slightly higher in Europe due to improved OEM sales, while North American unit sales were down slightly due to lower aftermarket sales.

Excluding the effect on prior year results of the net non-recurring recovery of previously incurred environmental costs (\$33 million), segment income was \$32 million higher than the prior year due to favorable price/mix in North America and Europe.

Year-to-Date:

Net sales increased primarily due to higher unit prices resulting from significant increases in the cost of lead and the favorable impact of foreign currency translation (approximately \$80 million). Unit sales of automotive batteries were down 2% in Europe due to weak aftermarket sales, and consistent with prior year levels in North America.

Segment income increased primarily due to a favorable product mix in all regions, especially Europe, the benefits of improved operational efficiencies and insurance recoveries related to a manufacturing facility fire in Europe, partially offset by unfavorable commodity costs, primarily lead, and the effect on prior year results of a net non-recurring recovery of previously incurred environmental costs (\$33 million).

Net Financing Charges

(In millions)	Three Months Ended June 30,			Nine Months Ended June 30,		
	2007	2006	Change	2007	2006	Change
Net financing charges	\$71	\$74	-4%	\$209	\$196	7%

Table of Contents

The decrease in net financing charges in the three month period is due to lower borrowing levels compared to the prior year period, partially offset by the impact of higher short-term interest rates.

The increase in net financing charges in the year-to-date period is due to a full nine months of interest expense associated with the financing of the York acquisition.

Provision for Income Taxes

(In millions)	Three Months Ended		Nine Months Ended		
	June 30,		June 30,		
	2007	2006	2007	2006	
Tax provision	\$ 106	\$(111)	\$ 176		\$ (37)
Effective tax rate	21.0%	*	17.4%		*
Base annual effective tax rate	21.0%	21.0%	21.0%		21.0%

* Measure not meaningful.

In calculating the provision for income taxes, the Company uses an estimate of the annual effective tax rate based upon the facts and circumstances known at each interim period. On a quarterly basis, the actual effective tax rate is adjusted, as appropriate, based upon changed facts and circumstances, if any, as compared to those forecasted at the beginning of the fiscal year and each interim period thereafter.

In the second quarter of fiscal year 2007, the tax provision decreased as a result of a \$22 million tax benefit realized by a change in tax status of an automotive experience subsidiary in the Netherlands. For the nine months ended June 30, 2006, the tax provision decreased as a result of an \$11 million tax benefit realized by a change in tax status of an automotive experience subsidiary in Hungary and a building efficiency subsidiary in the Netherlands.

The change in tax status in each respective period resulted from a voluntary tax election that produced a deemed liquidation for U.S. federal income tax purposes. The Company received a tax benefit in the U.S. for the loss from the decrease in value from the original tax basis of these investments. This election changed the tax status of the respective subsidiaries from controlled foreign corporations (i.e., taxable entities) to branches (i.e., flow through entities similar to a partnership) for U.S. federal income tax purposes and is thereby reported as a discrete period tax benefit in accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 109, Accounting for Income Taxes.

In the second quarter of fiscal year 2007, the Company reduced its income tax liability by \$15 million due to the favorable resolution of certain income tax audits. The Company's federal income tax returns and certain foreign income tax returns for fiscal years 1999 through 2003 remain under various stages of audit by the Internal Revenue Service and respective foreign tax authorities.

In the third quarter of fiscal year 2006, the Company recorded a \$10 million tax benefit related to a favorable tax audit resolution in a foreign jurisdiction.

In the third quarter of fiscal year 2006, the Company completed an analysis of its German operations and, based on cumulative income over a 36-month period, an assessment of expected future profitability in Germany and finalization of the 2006 Plan, determined that it was more likely than not that the tax benefits of certain operating loss and tax credit carryforwards in Germany would be utilized in the future. As such, the Company reversed \$131 million attributable to these operating loss and tax credit carryforwards in the quarter ended June 30, 2006 as a credit to income tax expense, net of remaining valuation allowances at certain

German subsidiaries and tax reserve requirements.

In the third quarter of fiscal year 2006, the Company recorded a \$19 million discrete period tax benefit related to third quarter 2006 restructuring costs using a blended statutory tax rate of 30.6%.

Table of Contents

In the second quarter of fiscal year 2006, the income tax provision decreased \$32 million due to the release of a valuation allowance in Mexico, mostly offset by an increase in the income tax provision of \$31 million related to a nonrecurring foreign dividend repatriation expense. Additionally, for the nine months ended June 30, 2006, the income tax provision decreased \$4 million due to a nonrecurring tax benefit related to a \$9 million gain from the disposition of the Company's interest in a German joint venture.

Table of Contents**Net Income**

(In millions)	Three Months Ended			Nine Months Ended		
	June 30,		Change	June 30,		Change
	2007	2006		2007	2006	
Income from continuing operations	\$ 396	\$ 336	18%	\$ 826	\$ 665	24%
Income (loss) from discontinued operations		2	*	(10)	3	*
Loss on sale of discontinued operations			*	(30)		*
Net income	\$ 396	\$ 338	17%	\$ 786	\$ 668	18%

* Measure not meaningful.

The increase in income from continuing operations for the three months ended June 30, 2007 was primarily due to the effect of restructuring costs on the prior year results (\$197 million) and higher sales volume and margin expansion in the building efficiency business (\$83 million), and favorable product mix in the power solutions business (\$32 million), partially offset by the effect on prior year results of a net non-recurring recovery of previously incurred environmental costs (\$33 million), lower automotive experience results (\$13 million) and an increase in the provision for income taxes (\$217 million)

The increase in income from continuing operations for the nine months ended June 30, 2007 was primarily due to prior year restructuring costs (\$197 million), prior year York integration costs, higher sales volume and margin expansion in the building efficiency business, favorable product mix in the power solutions business, improved margins resulting from operational efficiencies and the benefits of cost reduction programs in automotive experience Europe, and the effect on fiscal year 2006 results of approximately \$53 million expense related to the York acquisition for the amortization of the write-up of inventory. This increase was partially offset by lower volume, unfavorable vehicle platform sales mix and higher launch costs in automotive experience North America (\$148 million), an increase in the provision for income taxes (\$213 million), net non-recurring prior year recovery of previously incurred environmental costs (\$33 million) and a decrease in minority interests in net earnings of subsidiaries (\$19 million).

Discontinued operations primarily represent Bristol Compressors, which was acquired as part of the December 2005 York acquisition. In March 2007, the Company completed the sale of the Bristol Compressor business, which resulted in an after tax loss of \$27 million. Additionally, in the three months ended March 31, 2007, the Company settled a claim related to the February 2005 sale of its engine electronics business that resulted in an after tax loss of \$3 million.

Outlook

On July 18, 2007, the Company confirmed its previously issued guidance for fiscal year 2007, projecting net sales of approximately \$34.5 billion and diluted earnings per share from continuing operations of approximately \$6.44 - \$6.49 per share, which includes non-recurring tax benefits of \$0.19 per share recorded in the three months ended March 31, 2007.

Backlog

Building efficiency's backlog relates to its control systems and service activity. At June 30, 2007, the unearned backlog was \$4.3 billion, compared to \$3.7 billion at June 30, 2006, a 16% increase.

Table of Contents**Financial Condition***Working Capital*

(In millions)	September		Change	June 30,	
	June 30, 2007	30, 2006		2006	Change
Working capital	\$ 1,937	\$ 1,357	43%	\$ 1,001	94%
Accounts receivable	6,352	5,697	11%	5,686	12%
Inventories	1,968	1,731	14%	1,740	13%
Accounts payable	4,760	4,216	13%	4,315	10%

The Company defines working capital as current assets less current liabilities, excluding cash, short-term debt, the current portion of long-term debt and net assets of discontinued operations. Management believes that this measure of working capital, which excludes financing-related items and discontinued activities, provides a more useful measurement of the Company's operating performance.

The increase in working capital as compared to September 30, 2006 and June 30, 2006 is primarily due to higher accounts receivable and inventories, partially offset by higher accounts payable.

The Company's days sales in accounts receivable for the three months ended June 30, 2007 were 57, consistent with the comparable period ended September 30, 2006 and slightly higher than the 53 for the comparable period ended June 30, 2006. There has been no significant deterioration in the credit quality of the Company's receivables or changes in revenue recognition policies. The increase in accounts receivable is consistent with higher sales volume.

The Company's inventory turns for the three months ended June 30, 2007 were slightly higher than the periods ended September 30, 2006 and June 30, 2006. Power solutions inventories are higher than prior year periods due to the significant increase in lead costs. In addition, inventory levels in the building efficiency business are higher than prior periods to meet distributor requirements.

Cash Flows

(In millions)	Three Months Ended		Nine Months Ended	
	June 30, 2007	June 30, 2006	June 30, 2007	June 30, 2006
Net cash provided by operating activities	\$ 240	\$ 676	\$ 847	\$ 1,062
Net cash used by investing activities	194	207	637	2,977
Net cash provided (used) by financing activities	(29)	(243)	(314)	2,124
Capital expenditures	141	176	582	438

The decrease in net cash provided by operating activities in the three and nine months ended June 30, 2007 was primarily due to unfavorable working capital, primarily accounts receivable, inventories and other current assets, partially offset by increases in net income and favorable deferred income tax differences.

The decrease in net cash used in investing activities for the three months ended June 30, 2007 was due to a reduction in capital expenditures and proceeds received from the sale of property, plant and equipment, while the decrease for the nine months ended June 30, 2007 was primarily due to the December 2005 York acquisition.

The decrease in net cash used by financing activities for the three months ended June 30, 2007 is primarily the result of higher short-term debt levels compared to the prior year-end balances caused by higher working

capital requirements.

Table of Contents

The decrease in net cash provided by financing activities for the nine months ended June 30, 2007 reflects the financing of the York acquisition in the prior period.

The majority of the capital spending for property, plant and equipment in the three and nine months ended June 30, 2007 was for capacity related investments in the power solutions business and investments within the automotive experience business.

Long-Lived Assets

The Company has certain subsidiaries, mainly located in Germany, Italy, the Netherlands and the U.S., which have generated operating and/or capital losses and, in certain circumstances, have limited loss carryforward periods. As a result, the Company has recorded valuation allowances against tax assets for certain of these subsidiaries in accordance with SFAS No. 109. SFAS No. 109 requires the Company to record a valuation allowance for each legal entity or consolidated group based on the tax rules in the applicable jurisdiction and evaluate both positive and negative historical evidences as well as expected future events.

The Company reviews long-lived assets for impairment whenever events or changes in circumstances indicate that its carrying amount may not be recoverable. The Company's long-lived asset impairment analyses indicate that assets are not impaired based on SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets. SFAS No. 144 requires the Company to group assets and liabilities at the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities and evaluate the asset group against the sum of the undiscounted future cash flows. At June 30, 2007, the Company has concluded that it does not have any material assets whose recovery is at risk.

Capitalization

(In millions)	June 30, 2007	September 30, 2006	Change	June 30, 2006	Change
Short-term debt	\$ 462	\$ 209	121%	\$ 248	86%
Long-term debt	4,155	4,534	-8%	4,765	-13%
Shareholders' equity	8,309	7,355	13%	6,909	20%
Total capitalization	\$ 12,926	\$ 12,098	7%	\$ 11,922	8%
Total debt as a % of total capitalization	35.7%	39.2%		42.0%	

In December 2006, the Company entered into a \$2.0 billion five-year revolving credit facility which replaced the Company's existing \$1.6 billion five-year revolving credit facility that was scheduled to expire in 2010. The new credit agreement matures in December 2011. The Company uses the revolving credit facility to provide a liquidity backstop for the Company's commercial paper, and the facility is available for general corporate purposes. There were no draws on any of the committed credit lines through June 30, 2007.

In December 2006, the Company entered into a 12 billion yen (approximately \$101 million), three year, floating rate loan. The net proceeds of the bank loan were used to repay commercial paper obligations. In January 2006, the Company issued \$2.5 billion in floating and fixed rate notes consisting of the following four series: \$500 million floating rate notes due in fiscal year 2008, \$800 million fixed rate notes due in fiscal year 2011, \$800 million fixed rate notes due in fiscal year 2016 and \$400 million fixed rate notes due in fiscal year 2036. The Company also entered into a 24 billion yen (approximately \$210 million), three year, floating rate loan. The net proceeds of the offering and the bank loan were used to repay the unsecured commercial paper obligations that were used to initially finance the York acquisition.

Table of Contents

The Company is in compliance with all covenants and other requirements set forth in its credit agreements and indentures. The Company believes its capital resources and liquidity position at June 30, 2007 are adequate to meet projected needs. The Company believes requirements for working capital, capital expenditures, dividends, debt maturities, stock repurchases and any potential acquisitions in the remainder of fiscal year 2007 will continue to be funded from operations, supplemented by short- and long-term borrowings, if required.

The Company expects the total debt as a percentage of total capitalization to decline to approximately 30% by the end of fiscal year 2007.

New Accounting Standards

In February 2007, the Financial Accounting Standards Board (FASB) issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* including an amendment to FASB Statement No. 115. SFAS No. 159 permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. SFAS No. 159 will be effective for the Company beginning in fiscal year 2009. The Company is assessing the potential impact that the adoption of SFAS No. 159 will have on its consolidated financial condition or results of operations.

In September 2006, the FASB issued SFAS No. 158, *Employer's Accounting for Defined Benefit Pension and Other Postretirement Plans* an amendment of FASB Statements No. 87, 88, 106 and 132(R). SFAS No. 158 requires that the Company recognize the overfunded or underfunded status of its defined benefit and retiree medical plans as an asset or liability in the fiscal year 2007 year-end balance sheet, with changes in the funded status recognized through other comprehensive income in the year in which they occur. Additionally, SFAS No. 158 requires the Company to measure the funded status of a plan as of the date of its fiscal year-end no later than fiscal year 2009. The Company has assessed the potential impact that the initial adoption of SFAS No. 158 will have on its consolidated financial condition and expects to record a reduction of accumulated other comprehensive income in shareholders' equity of between \$150 million and \$250 million, after taxes.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*. SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS No. 157 also establishes a fair value hierarchy that prioritizes information used in developing assumptions when pricing an asset or liability. SFAS No. 157 will be effective for the Company beginning in fiscal year 2008. The Company is assessing the potential impact that the adoption of SFAS No. 157 will have on its consolidated financial condition or results of operations.

In June 2006, the FASB issued FIN 48, *Accounting for Uncertainty in Income Taxes* an interpretation of FASB Statement No. 109, which clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with SFAS No. 109, *Accounting for Income Taxes*. The interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 allows recognition of only those tax benefits that satisfy a greater than 50% probability threshold. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN 48 is effective for the Company beginning October 1, 2007. The Company is assessing the potential impact that the adoption of FIN 48 will have on its previously established tax reserves, consolidated financial condition, or results of operations.

Other Financial Information

The interim financial information included in this Quarterly Report on Form 10-Q has not been audited by PricewaterhouseCoopers LLP (PwC). PwC has, however applied limited review procedures in accordance with professional standards for reviews of interim financial information. Accordingly, you should restrict your reliance on their reports on such information. PwC is not subject to the liability provisions of Section 11 of the Securities Act of 1933 for their reports on the interim financial information because such reports do not constitute reports or parts of the registration statements prepared or certified by PwC within the meaning of Sections 7 and 11 of the Securities Act of 1933.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

At June 30, 2007, the Company did not experience any adverse changes in market risk exposures that materially affect the quantitative and qualitative disclosures presented in the Company's Annual Report on Form 10-K for the year ended September 30, 2006.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended (Exchange Act). Based upon their evaluation of these disclosure controls and procedures, the principal executive officer and principal financial officer concluded that the disclosure controls and procedures were effective as of June 30, 2007 to ensure that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time period specified in the SEC rules and forms, and to ensure that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, as appropriate, to allow timely decisions regarding disclosure.

Changes in Internal Control Over Financial Reporting

There have been no significant changes in the Company's internal control over financial reporting during the quarter ended June 30, 2007 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents**PART II. OTHER INFORMATION****ITEM 1. LEGAL PROCEEDINGS**

As noted in Item 1 to the Company's Annual Report on Form 10-K for the year ended September 30, 2006, which was filed with the SEC on December 5, 2006, liabilities may potentially arise globally under various environmental laws and worker safety laws for activities that are not in compliance with such laws and for the cleanup of sites where Company-related substances have been released into the environment. Currently, the Company is responding to allegations that it is responsible for performing environmental remediation, or for the repayment of costs spent by governmental entities or others performing remediation, at approximately 50 sites in the U.S. Many of these sites are landfills used by the Company in the past for the disposal of waste materials; others are secondary lead smelters and lead recycling sites where the Company returned lead-containing materials for recycling; a few involve the cleanup of Company manufacturing facilities; and the remaining fall into miscellaneous categories. The Company may face similar claims of liability at additional sites in the future. Where potential liabilities are alleged, the Company pursues a course of action intended to mitigate them.

The Company accrues for potential environmental losses in a manner consistent with generally accepted accounting principles in the United States; that is, when it is probable a loss has been incurred and the amount of the loss is reasonably estimable. The Company reviews the status of its environmental sites on a quarterly basis and adjusts its reserves accordingly. Such potential liabilities accrued by the Company do not take into consideration possible recoveries of future insurance proceeds. They do, however, take into account the likely share other parties will bear at remediation sites. It is difficult to estimate the Company's ultimate level of liability at many remediation sites due to the large number of other parties that may be involved, the complexity of determining the relative liability among those parties, the uncertainty as to the nature and scope of the investigations and remediation to be conducted, the uncertainty in the application of law and risk assessment, the various choices and costs associated with diverse technologies that may be used in corrective actions at the sites, and the often quite lengthy periods over which eventual remediation may occur. Nevertheless, the Company has no reason to believe at the present time that any claims, penalties or costs in connection with known environmental matters will have a material adverse effect on the Company's financial position, results of operations or cash flows.

The Company is involved in a number of product liability and various other suits incident to the operation of its businesses. Insurance coverages are maintained and estimated costs are recorded for claims and suits of this nature. It is management's opinion that none of these will have a material adverse effect on the Company's financial position, results of operations or cash flows. Costs related to such matters were not material to the periods presented.

As previously reported, following allegations in a U.N. Oil-For-Food Inquiry Report that, prior to the Company's acquisition of York, York had made improper payments to the Iraqi regime, York and the Company jointly undertook to investigate the allegations and offered the companies' cooperation to the Department of Justice (DOJ) and SEC. After completing the York acquisition, the Company continued the internal inquiry and expanded its scope to include other aspects of York's Middle East operations, including a review of York's use of agents, consultants and other third parties, York's compliance with the Office of Foreign Assets Control licensing requirements, and York's compliance with other potentially applicable trade laws. The Company has also reviewed certain of York's sales practices in selected Asian markets. The factual inquiry is now substantially complete and indicates that, in a number of instances, York engaged in conduct that may lead to enforcement actions against the Company under applicable U.S. laws, which give authorities the right to pursue administrative, civil and criminal sanctions, including monetary penalties. The Company has been voluntarily disclosing this information and offering continued cooperation with the DOJ and SEC, as well as to other relevant authorities in the U.S. Departments of Treasury, Commerce and Defense. The Company has begun discussions with the relevant authorities to explore how these matters may be resolved. The Company is in the process of evaluating and implementing various remedial measures with respect to York operations.

Table of Contents

ITEM 1A. RISK FACTORS

There are no material changes to the disclosure regarding risk factors presented in the Company's Annual Report on Form 10-K for the year ended September 30, 2006.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

In September 2006, the Company's Board of Directors authorized a stock repurchase program to acquire up to \$200 million of the Company's outstanding common stock. Stock repurchases under this program may be made through open market, privately negotiated transactions or otherwise at times and in such amounts as Company management deems appropriate. The stock repurchase program does not have an expiration date and may be amended or terminated by the Board of Directors at any time without prior notice.

The Company entered into an Equity Swap Agreement, dated March 18, 2004 and amended March 3, 2006 and May 16, 2006 (Swap Agreement), with Citibank, N.A. (Citibank). The Company selectively uses equity swaps to reduce market risk associated with its stock-based compensation plans, such as its deferred compensation plans and stock appreciation rights. These equity compensation liabilities increase as the Company's stock price increases and decrease as the Company's stock price decreases. In contrast, the value of the Swap Agreement moves in the opposite direction of these liabilities, allowing the Company to fix a portion of the liabilities at a stated amount.

Citibank has advised the Company that, in connection with the Swap Agreement, Citibank may purchase shares of the Company's stock in the market or in privately negotiated transactions up to an amount equal to \$200 million in aggregate market value at any given time. The Company disclaims that Citibank is an affiliated purchaser of the Company as such term is defined in Rule 10b-18(a)(3) under the Securities Exchange Act or that Citibank is purchasing any shares for the Company. Although the Swap Agreement has a stated expiration date, the Company's intention is to continually renew the Swap Agreement with Citibank's consent. The net effect of the change in fair value of the Swap Agreement and the change in equity compensation liabilities was not material to the Company's earnings for the three or nine months ended June 30, 2007. Citibank reduced its holdings of Company stock by 100,000 shares in the quarter ended March 31, 2007 in connection with the Swap Agreement. There were no purchases by Citibank in the three or nine months ended June 30, 2007.

The following table presents information regarding the repurchase of the Company's common stock by the Company and purchases of the Company's common stock by Citibank in connection with the Swap Agreement during the three months ended June 30, 2007.

Table of Contents

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of the Publicly Announced Program	Approximate Dollar Value of Shares that May Yet be Purchased under the Programs
4/1/07 - 4/30/07 Purchases by Company (1)	25,000	\$ 94.52		\$ 174,946,500
5/1/07 - 5/31/07 Purchases by Company (1)	645	\$ 107.20		\$ 174,877,356
6/1/07 - 6/30/07 Purchases by Company (1)		\$ 0.00		\$ 174,877,356
4/1/07 - 4/30/07 Purchases by Citibank (2)				\$ 36,272,000
5/1/07 - 5/31/07 Purchases by Citibank (2)				\$ 24,480,000
6/1/07 - 6/30/07 Purchases by Citibank (2)				\$ 14,768,000

(1) The repurchases of the Company's common stock by the Company relate to stock option and restricted stock transactions under our equity compensation plans that are treated as repurchases of Company common stock for purposes of this disclosure.

(2) Citibank may purchase shares of the Company's stock

up to an amount
equal to
\$200 million.

The
